This bill does all these things. It does so in a way that most of the needs we have can still be financed within the requirements the bill imposes on local jurisdictions to share in the cost. It has been cost sharing—not a failure to recognize the needs enumerated above—which has prevented this omnibus legislation from passing. The issue is particularly sensitive in our new budget climate, where the Federal burden must be reduced and where a stiffer test is required of local interests in order to weed out those projects which perhaps have less merit than others.

I say perhaps because a local inability to pay is not always a sign that a project is not important or valuable. In fact, a local inability to pay may signify that basic infrastructure improvements are more needed in that place than they are where plenty of cash is available. One of the secrets of our Nation's strength is that the Federal Government has invested tax funds, garnered from regions where economies are strong, in regions where the economy has yet to become strong. This is so particularly when the investment is infrastructural, the sort of facility which is so basic to the functioning of the economic and social system that it is virtually impossible to isolate and rank the beneficiaries for purposes of charging them user fees.

The cost share provisions in this bill approach and, frankly, will exceed the ability of some local sponsors to commit the cash required up front. In that sense the bill represents a levelling off of our aspirations for our economic development, a statement that in some instances those who do not have will not get, whereas before the presumption was always that basic investments will pay off even if—especially if—they were made among the have nots.

Nevertheless, the bill still injects stimulus into regions that would not be able to enrich themselves. Though we are reigning in our ambitions, this bill still makes badly needed progress.

It is far better than the alternative promoted by the other body and the administration, where the philosophy seems to prevail that you need no Federal assistance if you cannot afford it by yourself anyway. For instance, in my own district the Port of Sacramento, authorized by this bill as it was by the supplemental appropriations bill last spring, will have to contribute 25 percent of its total cost in cash during the time of construction. The official figures in this bill list this obligation as a $92 million Federal cost supported by a $33 million local contribution. I have some reason to hope and expect that the final costs for this project will not total $125 million as the corps' October 1984 figures would have it. I am also told that these figures are subject to significant readjustment as requirements and designs of the project are made final.

Nonetheless, these figures illustrate how these percentage requirements are significant local burdens, difficult burdens for a newer port which has yet to build up the business that older ports have been able to establish under the former financing systems.

The local cost is made far worse by the necessity of obtaining lands, easements and rights of way. In the case of Sacramento these amount to roughly $23 million, almost 20 percent of the total project. The principal reason why the House bill is more fair than the Senate bill is that it acknowledges the burden this cost puts on the local sponsor, and credits the sponsor with having to pay it.

The Senate-administration bill, as I understand it, would allow lands easements and rights of way to apply only toward 5 percent of the total project cost, in this case about $6 million. The balance of the lands, easements, and rights of way obligation would not go away, but would have to be absorbed entirely by the local sponsor.

In short, under the Senate proposal the local sponsor at Sacramento would be required to contribute much more than $33 million in cash. Only $6 million of that could be offset by $23 million in lands, easements, and rights of way costs. The local sponsor would still have to absorb $17 million of the latter, on top of the basic $33 million cost-share requirement.

I do not know whether Sacramento can raise capital from conventional sources to finance a debt that large. All the benefits to a port do not accrue in ways direct enough to tap. Sacramento might not be able to afford the burden that the administration would impose. This is not a matter of lacking merit. The cost-benefit ratio is a strong 2.3 to 1, despite inclusion in the corps' October 1984 figures of salinity repulsion sill which might not turn out to be necessary.

This is not the only instance in which the administration is blind towards very tangible local contributions. The administration is now negotiating cost share terms with local sponsors whose projects were funded in last summer's supplemental. The corps representatives are requiring that the local flood control sponsors contribute a minimum of 5 percent of a total project cost in cash during the period of construction, which was a condition established during Senate negotiations with the administration.

I understand that the administration has been unwilling to give the local sponsors credit towards this cash requirement for cash expenditures they have already made, even though they were made to implement recognized features of the project while waiting for the new starts impasse to break. Thus local sponsors would be penalized for having taken initiatives that were Federal responsibilities during that long 8-year period when the Federal Government was paralyzed with indecision on water projects. This posture seems unfair and hypocritical to me, since those local sponsors who ventured nothing on their own will now get full credit for the expenditures they will make henceforth.

I urge our House conferees to adhere strictly to their positions when they meet with the Senate over the final provisions of this bill. The outcome of those negotiations will determine in great measure whether this is a bill for America as a whole or simply those portions of America which were lucky enough to have gotten their public investments already.

Besides the Port of Sacramento, there are a number of valuable provisions in this bill for Northern California and for my constituents in particular:

I am deeply appreciative of the committee's special consideration of Sacramento's attempts to assume financing responsibilities of Stone Lock, a facility which is of great value to Sacramento's recreational boaters and perhaps to the economy of its renovating waterfront as well.

The Corps of Engineers has decided that the fall-off of commercial traffic through

the lock in recent years required its mothballing in late 1982. Of the 7,500 vessels a year through the lock carrying 19,800 passengers, 97 percent were recreational boats. While this recreational activity may not be a Federal interest, it is of great importance to local government, which has been searching for mechanisms to finance the lock's estimated $25,000 per year operating costs under a lease from the corps.

Funding constraints on local governments in California have prevented Sacramento from devising these mechanisms. The ability to charge fees of the lock's users, even though the lock is remaining in the ownership of the corps, will mean that the lock will be available to the boaters who need to traffic between the main Sacramento River and the port's deepwater ship channel.

Perhaps more significant in the long run, an operating lock could provide the economic margin for commercial tour boats between San Francisco and Old Sacramento, the one-time terminous of heavy river traffic during the Gold Rush. Inability to charge these boats fees would mean the lock could not be used, and without the lock the tour boats could not make a round trip to San Francisco quickly enough.

The committee's inclusion of the Stone lock provisions implements a bill introduced by my colleague BOB MATSUI and myself for the past several Congresses. I am personally appreciative of provisions which ensure that Yolo County will be consulted when a schedule for opening the lock and thus interrupting Jefferson Boulevard traffic is determined.

The bill would enable the $37 million Cache Creek flood control project to proceed. I am especially grateful to Chairman BOB ROE for his support of my request that the settling basin near Woodland at the downstream end of the project be acquired in fee title as a 3,600 acre wildlife refuge. The corps had dropped the refuge from the project plans. I appreciate the committee's restoration of it to the bill.

The committee also saw fit to include two important environmental mitigation provisions for the Sacramento River at my request, one of which would authorize the corps to participate in environmental improvement programs from Collinsville to Shasta Dam. Mitigation authority is especially important for the salmon fishery remaining between Chico Landing to Red Bluff, where controversy has plagued bank stabilization years. The corps has been essentially passive in the face of these problems, being confined to the terms of its old authorization. I am hopeful that this mitigation authority will enable the Federal Government to respond more creatively to the problems stabilization causes.

In another instance, the committee has adopted the provisions of a bill introduced by myself and Representative GENE CHAPPIE in 1981, to implement a mitigation plan for the Federal Government to pay 63 percent of the $3 million necessary to purchase 668 acres of riparian habitat along the Sacramento south of Chico Landing. This new authority would enable the corps to mitigate damages caused over the last several decades by phase I of the Sacramento bank protection project, which consists of flood protection levees from Collinsville to Chico. The program fulfills a requirement established by then-Governor Reagan's state administration for continuation of the bank protection project into its second phase.

The bill would authorize badly needed restoration of Sacramento bank levees along the Colusa Trough Drainage Canal and the Knights Landing Ridge Cut, compensating for damage caused by general subsidence of the area.

Last, the bill deauthorizes an old Federal project along the Sacramento River, the Colusa to Red Bluff project, which would have the corps maintain a 10 foot channel from the Suisun Bay to Sacramento, and a 5 foot channel from Sacramento to Colusa. The project has been rendered obsolete by the 30 foot deepwater channel to Sacramento, and by the demise of gravel barging operations above Sacramento.

This is a bill for many purposes. It is an extraordinary achievement by the Public Works Committee, its Chairman JIM HOWARD, and the Water Resoures Subcommittee and its chairman Bob Roe. In literally hundreds of ways it brings our national water infrastructure into synchronization with the economic, social, and environmental objectives of the latter half of the 20th century. For many reasons the bill deserves to be passed.

Mr. MORRISON of Washington. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Washington.

Mr. MORRISON of Washington. I thank the gentleman for yielding.

Mr. Chairman, I want to associate my comments with those of the gentleman from Washington.

The CHAIRMAN. The time of the gentleman from Washington [Mr. SWIFT] has expired.

(On request of Mr. AUCOIN and by unanimous consent, Mr. SWIFT was allowed to proceed for 3 additional minutes.)

Mr. MORRISON of Washington. Mr. Chairman, will the gentleman continue to yield?

Mr. SWIFT. I yield to the gentleman from Washington.

Mr. MORRISON of Washington. The amendment as proposed by the gentleman from Wisconsin in the area of irrigation projects changes the format to the point that ratepayers would be picking up the cost of both the dams that are necessary as well as the irrigation projects. Instead of having them run one after the other, they would be running concurrently. So the costs would be dramatically increased to the point of probably making both projects unaffordable as far as ratepayers are concerned. This is an amendment we must defeat for the sake of the interests in a variety of parts of the United States.

I thank the gentleman for yielding.

Mr. WEAVER. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Oregon.

Mr. WEAVER. I thank the gentleman for yielding.

Mr. Chairman, I would like to be associated on the victorious side for a change.

Mr. Chairman, I strongly oppose this amendment. I join my colleagues from the Northwest in opposing it.

Mr. CRAIG. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Idaho.

Mr. CRAIG. I thank the gentleman for yielding.

Mr. Chairman, I do not know of any of us who question and are concerned about a variety of the costs that we in our wisdom years ago decided were appropriate as related to certain projects that ultimately created economic movement within given areas of the country. I am sure there are a good many of our colleagues who would like to be on the side of some of the Grace Commission studies and efforts. But the question is, why do you segregate or pick out certain areas of Federal expenditure and not others?

We have been in the business of providing low-cost loans across the board in a tremendous number of areas because, in the wisdom of this Congress over the years, we decided it was a good thing to do, to stimulate certain types of economic development.

What we do by this legislation is impose an increased tax. It is a tax increase, without any argument. That is ultimately what happens in given regions of the country where this is impacted.

Is it not wise to say we ought not be subsidizing student loans? No, we find them to be a certain net benefit to the well-being of this country. So I think if you are going to look at this in an incremental way, you had better broaden the base and look at it all. That is why I would have to oppose this kind of legislation at least currently, because of the narrow scope, based on its failure to address the much broader spectrum that we will probably be looking at down the road in something like Gramm-Rudman or some other major effort that brings into play all segments of the Federal Government.

Mr. SWIFT. I thank the gentleman.

Mr. AUCOIN. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I thank the gentleman for getting me the additional time, and if there is any of it left, I would be glad to yield to the gentleman.

Mr. AUCOIN. Mr. Chairman, how much time does the gentleman have remaining?

The CHAIRMAN. Thirty seconds.

(By unanimous consent, Mr. SWIFT was allowed to proceed for 2 additional minutes.)

Mr. SWIFT. Mr. Chairman, I yield to the gentleman from Oregon.

Mr. AuCOIN. I thank the gentleman for yielding.

Mr. Chairman, I rise today in opposition to the Petri amendment to H.R. 6, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985.

This amendment is just another in a series of recent attacks on power marketing administrations—attacks that the House have repelled year after year.

This amendment will unnecessarily penalize the Bonneville Power Administration, which is the power marketing agent for 30 Federal dams in the Northwest that were built by the Army Corps of Engineers and the Bureau of Reclamation. BPA serves Oregon, Washington, Idaho, and western Montana, as well as small neighboring portions of Nevada, Utah, Wyoming, and California. It provides nearly 80 percent of the transmission capacity in the region. Indeed, this network is the "backbone" grid for all interconnected utilities in the Northwest.

BPA is responsible for repaying the Federal investment in power producing resources in the Pacific Northwest. The current repayment agreement requires that the total Federal investment be repaid, with interest, over a 50-year period. Power rates are set, and adjusted when necessary, to guarantee timely payback. This method of repayment provides for flexibility—flexibility that is vital in a system that is hydro-based and subject to the whims of nature.

Like many other utilities, BPA had difficulty meeting its costs in the late 1970's and early 1980's. Revenue shortfalls forced BPA to make smaller-than-planned payments on the principal in those years. And between 1979 and 1983 BPA deferred paying a portion of the interest expense owed to the U.S. Treasury.

But recently BPA has put its financial house in order. In fiscal year 1984 BPA made a $217 million payment to Treasury, paying off all deferred interest costs. On September 30, 1985, they made a payment of $682 million which consisted of $374 million for interest on the capital invested in the FCRPS, $82 million to cover the annual operations and maintenance costs of the Corps of Engineers and the Bureau of Reclamation, and a return of $226 million in capital to the Treasury. Those payments were exactly the payments that Bonneville had pledged to make to the Treasury.

The Petri proposal changes the rules of the game. Under this amendment, BPA would be required to repay the capital invested in the power features of the Army Corps of Engineers hydropower projects using a fixed-year straight line amortization basis.

Based on BPA's recent good performance, there is no justification for changing the repayment procedures.

And the only result will be to increase the cost of power to the citizens of the Pacific Northwest.

Mr. Chairman, this amendment is being proposed at a particularly inopportune time. It is a time when many industries in the State of Oregon are struggling for survival. The aluminum industry, for example, which relies heavily on power from BPA, is having serious financial problems. The passage of this amendment will be another nail in the coffin of that struggling industry.

The most important consideration, however, is the effect this proposal will have on the average consumer of electricity. OMB estimates that the passage of this amendment will result in wholesale power rate increases of 5 percent. Is it fair to increase electricity costs for consumers by changing a system that ain't broke? No.

Years ago the Federal Government entered into an agreement with BPA and other power marketing administrations regarding the repayment of the Federal investment in hydropower facilities. Aside from a few unusually rough years, BPA has kept its part of the bargain. Now, we're being asked to ignore their efforts and change the rules. This is wrong. And I urge my colleagues to defeat this unneccessary and punitive amendment.

Mr. LOWRY of Washington. Mr. Chairman, will the gentleman yield?

Mr. SWIFT. I yield to the gentleman from Washington.

Mr. LOWRY of Washington. I thank the gentleman for yielding, and I thank the chairman of the subcommittee and the ranking minority member of the subcommittee for the responsible handling of this very bad amendment before us. We have kept our part of the deal. OMB now wants to break their part of the deal.

I thank the chairman of the subcommittee and the ranking minority member.

Mr. SWIFT. Mr. Chairman, I join with my colleagues in thanking the chairman.

Mr. DASCHLE. Mr. Chairman, I rise in opposition to the Petri amendment to H.R. 6, the Water Resources Act, which would change existing repayment policy for Federal hydroelectric facilities to require the costs of present and future hydroelectric power facilities to be repaid in levelized annual payments.

The Petri amendment ignores the practical realities of hydropower production. Current repayment agreements between the United States and Federal power customers require the entire cost of the project, plus interest, to be reimbursed over a 50-year period. The reality of hydropower is that more revenue is generated in years of high water flow than in years of low water. Thus, power marketing agencies need special flexibility in their repayment schedule because of their special circumstances.

Existing repayment agreements recognize this fact and provide that in low water years when less energy is produced, the power market agencies may defer part of its scheduled repayment until the following year. It is important that when the repayment is deferred an interest penalty is assessed to the public power marketing agencies.

Also what little problem existed in the past has been corrected. Since 1983, the power marketing agencies are current on their repayment obligations.

If it ain't broke, why fix it?

Former OMB Director David Stockman came to this body on two separate occasions this year to offer us the same concept embodied in the Petri amendment. In both cases, this body had the wisdom to refuse to adopt this straightline amortization approach.

Finally, this change of the established repayment schedule will result in an unnecessary electric rate increase for public power customers. It is estimated that individual power rates would increase approximately 5 percent each year with the adoption of this amendment.

Mr. Chairman, the Petri amendment is unnecessary, unfair, and will needlessly raise thousands of electric power user's bills. I urge my colleagues to reject this amendment as they have on two other occasions during this year.

Mr. MILLER of California. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman and members of the committee, I think that the gentleman has offered a valid amendment, and I must tell you that I share the concerns of many of my colleagues from the Northeast. That is, to understand the full ramifications of this amendment. I appreciate it is a recommendation of the Grace Commission and of the administration in their budget proposal, but, as one who has jurisdiction over a fair amount of hydroelectric power generated in this country, I would hope that we would have an opportunity to have a full hearing on this measure. It has been suggested by the gentleman from Oregon and the gentleman from Washington that in fact the payment schedules have been accelerated and dramatically improved and, at the same time, there have been serious questions raised about whether or not there will be full payment back to the Government of a number of these programs and at what level and what rate that payment should take place.

□ 1625

But I think before we go ahead and adopt this amendment, we would like

to have an opportunity to have some of these issues aired.

I would like to say to the author of the amendment that I would hope that he would consider the withdrawal of this amendment, with an agreement between himself and myself that I would be willing to ask the Water and Power Subcommittee to engage in a hearing on this subject so that we might lay out the facts as they currently are, and then the House can make its will known in an intelligent fashion.

But I am just concerned that to accept this amendment at this time on this bill, which obviously has a tremendous amount of support and is very important to Members of the House, that this one becomes a great deal of trouble not only to the bill but also how we explain what the actual impacts are on purchasers of that power and on the ratepayers.

I think we have the ability to do that on the Water and Power Subcommittee on the Interior Committee, and I think that there is broad enough representation on the Interior Committee, both by the immediately affected jurisdictions and by consumers of that power and the people from other parts of the country, that we can provide that kind of a hearing.

I also know that the gentleman has presented a substantial amount of evidence that he would like to introduce in those hearings, and if we can carry it out of the room we would be delighted to take it and give it the kind of reception that it should have.

Mr. PETRI. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the gentleman from Wisconsin.

Mr. PETRI. I want to thank the gentleman, the chairman of the Subcommittee on Water and Power of the Interior Committee, and I think his point is well taken. This is clearly a very important and broad area that has many ramifications.

There is one other thing I wanted to do and I neglected to say earlier, at the beginning of my remarks, and that is to compliment the chairman of the subcommittee, my esteemed colleague, the gentleman from New Jersey [Mr. ROE], for the great work that he has done in bringing a bill that is going to pass the House without particular controversy and reach the President's desk before long, reauthorizing a whole variety of needed things in this important area.

But with the understanding that your committee will be active in this area and all these reports will see the light of day, you will have hearings on this subject, when the time is appropriate I would ask to withdraw the amendment.

Mr. MILLER of California. I appreciate the agreement of the gentleman.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. MILLER of California. I yield to the chairman.

Mr. ROE. I want to thank the gentleman from Wisconsin for the generosity of his kind comments, and I want to publicly thank him for the outstanding work that he has done on our Public Works Committee. The gentleman has really been one of the leaders in the field of developing this legislation.

As you notice, I have remained mute to this point, allowing the Representatives from the great States of California, Oregon, and Washington, because it fell upon their immediate needs to debate that issue; but from the committee's point of view, I compliment the gentleman from withdrawing this amendment, because we, too, have been reviewing this, as the gentleman knows, in Public Works, and particularly in our Water Resources Committee, as it relates to the Corps of Engineers' hydro project—and I appreciate the gentleman from California mentioning that—thoughout this country.

Any type of program that would emerge should have real solid review, should have real good understanding and should really follow some kind of uniform policy.

So I would appreciate it if the gentleman will withdraw his amendment, in which instance we, too, will join in on hearings on this important issue.

Mr. PETRI. Mr. Chairman, I ask unanimous consent to withdraw my amendment.

The CHAIRMAN. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AMENDMENT OFFERED BY MR. ENGLISH

Mr. ENGLISH. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. ENGLISH: On page 366, strike lines 8 through 22 and all that is contained therein and insert in lieu thereof the following:

Section 201 of the Flood Control Act of 1970, as amended by Section 153 of the Water Resources Development Act of 1976, is amended by striking out the last sentence under the heading "Arkansas-Red River Basin" and inserting in lieu thereof the following: "Construction shall not be initiated on any element of such project involving the Arkansas River Basin until such element has been approved by the Secretary of the Army. The chloride control projects for the Red River Basin and the Arkansas River Basin shall be considered to be authorized as separate projects with separate authority under Section 203 of the Flood Control Act of 1966, as amended.".

Mr. ENGLISH (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from Oklahoma?

There was no objection.

Mr. ENGLISH. Mr. Chairman, I rise in support of my amendment which separates the authorization of the Arkansas River Basin water quality project from the Red River Basin water quality project, and which requires that the Secretary of the Army grant approval before any construction on any element of the Arkansas River Basin water quality project can occur. The intent of this measure is to ensure that no money authorized and appropriated for the Red River Basin water quality project can be spent on any portion of the Arkansas River Basin water quality project. This amendment is the same amendment which the House adopted during its consideration of H.R. 2577, the Supplemental Appropriations of 1985, earlier this year.

By separating the Arkansas River chloride control project from the Red River chloride control project, my amendment requires that each project stands on its own merits. Unfortunately, present law permits funding authorized and intended for the Red River project to be spent on the Arkansas River project. This could happen despite the fact that the Corps of Engineers has concluded after extensive study that the Arkansas River project is not economically feasible and that the corps should not proceed with it.

A closer look at the Arkansas project reveals the actual scope of this billion-dollar question mark. Basically, the Arkansas River Basin project contains a series of shallow salt brine ponds which would be used to collect, store, divert, and dispose of salt brine. These ponds would require the sacrifice of at least 60,000 acres of land in western Oklahoma.

Congress authorized the Arkansas project in the Flood Control Act of 1970. At the same time, and using the same provision, Congress authorized construction on sites for the Red River project. In 1977 corps officials testified that unless Congress was prepared to make a total commitment to the complete Arkansas project, the Congress should not support any part of it. Furthermore, the corps was not prepared to give its go ahead for the entire project. In 1981, 10 years after the initial authorization, the corps rejected plans to proceed with the Arkansas project. Specifically, the corps found that for every $1 spent on the project, only 25 cents would be returned in benefits. This ratio was substantially lower than the required dollar-for-dollar cost-to-benefit ratio. The corps recommended tabling the project until a significant change occurred which "clearly demonstrates a greater need and probable use of the improved water." This has yet to happen, and I doubt it ever will. Additionally, the

corps stated that the "environmental analysis showed that there would not be outstanding contributions to the environmental quality account to offset the lack of economic benefits."

Taxpayers from throughout Oklahoma have expressed their concern over and opposition to the Arkansas project. By separating the authorization of the two projects, however, we can at least ensure that funding intended for the Red River Basin project does not end up spent on the Arkansas River Basin project. It is also important that we maintain present law which prohibits any construction on the Arkansas River Basin water quality project without the prior approval of the Secretary of the Army. Thousands of tax dollars have been spent on corps studies of the Arkansas River Basin project. The conclusions and recommendations of these studies should be followed and not ignored and circumvented. I urge the House to support my amendment.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, let me congratulate the gentleman on offering this amendment. Through the many weeks and months that this has been discussed, the gentleman and I have gone over that language very carefully. Let me say that since it does involve the congressional district that I represent, the language is entirely satisfactory with me, and I am authorized to say for this side that we accept the gentleman's amendment.

Mr. ENGLISH. I want to thank the gentleman from Arkansas for his cooperative support and for the spirit of cooperation in which we have worked together on this.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. ENGLISH. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, we have reviewed this amendment, and we have no objection to the amendment.

Mr. ENGLISH. I thank the gentleman.

The CHAIRMAN. The question is on the amendment offered by the gentleman from Oklahoma [Mr. ENGLISH].

The amendment was agreed to.

AMENDMENT OFFERED BY MR. DASCHLE

Mr. DASCHLE. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. DASCHLE: On page 399, after line 5, insert the following new section:

SEC. 1199K. Section 5 of the Act of September 30, 1982 (Public Law 97-273, 96 Stat. 1182), is amended by inserting "(a)" after "SEC. 5." and by adding at the end thereof the following new subsection:

"(b) The Secretary of Energy is authorized and directed to deliver to the Hilltop and Gray Goose Irrigation Districts, South Dakota, electric pumping power from the Pick-Sloan Missouri Basin Program at rates to be determined by the Secretary, but in no case less than the firm power rate for the sale of such power. Such power shall be made available under the same terms and conditions as presently used for firm power customers of the Eastern Division of the Pick-Sloan."

Mr. DASCHLE (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from South Dakota?

There was no objection.

Mr. DASCHLE. Mr. Chairman, between 1946 and 1968, five main stem dams and reservoirs were constructed on the Upper Missouri River. To build these dams over 520,000 acres of prime farmland adjacent to these projects were permanently flooded and removed from production forever.

To compensate for this enormous loss, Congress, in the Flood Control Act of 1944, called for 170 MW of Pick-Sloan power to be made available for irrigation in South Dakota. That commitment made over 40 years ago has gone unfulfilled until today, with none of the power promised for irrigation having been utilized. Today we have an opportunity to correct that oversight.

The Hilltop and Gray Goose Irrigation Districts were constructed in the late 1970's with Farmers Home Administration financing. Although these two projects sit directly adjacent to the main stem reservoirs, they have not been able to take advantage of the low-cost public power produced by the nearby main stem dams.

In the last 6 years, Hilltop and Gray Goose have realized an increase in their commercial power bills of 72 percent and 86 percent respectively. The rapid rise in power rates is the largest single reason for current financial stress being experienced by these two projects. Hilltop and Gray Goose consist of a group of small farm families working small plots of land. The irrigation system uses modern technology and a pipe delivery system to insure that the fragile environmental balance of the project area is preserved and the delivery of water is cost effective. Because the projects are so small, pumping costs are lower than most other proposed Federal irrigation projects. The two systems are considered by national standards to be of modern, efficient, and economical design. The availability of public power will allow these projects to take advantage of the benefits promised South Dakota by Congress in 1944.

There are numerous precedents for legislation of this sort. Congress has previously provided Pick-Sloan power to existing projects including the Kendrick, Colorado-Big Thompson, North Platte and Shoshone projects.

The Hilltop and Gray Goose projects will use only 5 MW of power or about 3 percent of South Dakota's Pick-Sloan allotment for irrigation. The 5 MW represents only about 0.34 percent of the capability of the Missouri River main stem system.

These small irrigation projects are already constructed and will require no appropriation of funds whatsoever for construction or maintenance.

This amendment will have a negligible effect on public power users. It enjoys the support of local citizens, the State of South Dakota, and the entire congressional delegation. With the passage of the amendment, the Federal Government can at long last take a small step toward living up to the commitment it made in the Flood Control Act of 1944.

Mr. ROE. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from New Jersey.

Mr. ROE. Mr. Chairman, we have investigated this amendment, and it is a very practical amendment and well done. We have no objection on this side.

Mr. DASCHLE. I thank the gentleman for his support.

Mr. HAMMERSCHMIDT. Mr. Chairman, will the gentleman yield?

Mr. DASCHLE. I yield to the gentleman from Arkansas.

Mr. HAMMERSCHMIDT. Mr. Chairman, this side agrees to the amendment, and we have no objection.

Mr. DASCHLE. I thank the gentleman for his support.

The CHAIRMAN. The question is on the amendment offered by the gentleman from South Dakota [Mr. DASCHLE].

The amendment was agreed to.

Mr. BEREUTER. Mr. Chairman, I move to strike the last word.

Mr. Chairman and members of the committee, I would like to begin by expressing my appreciation to the committee for including section 530 in this bill, a demonstration program for the Platte River and its major tributaries. I very much appreciate the wisdom of that effort.

This section is the same provision which was incorporated as part of the committee's amendment last year to H.R. 3678. I thank the members of the Public Works and Transportation Committee for their assistance and cooperation in including this provision again in H.R. 6. This section will provide much needed relief from high water and flooding for the citizens of Nebraska.

As many of you know, the Platte River traverses the entire length of the State of Nebraska. In 1984, once again many areas along the Platte River were inundated by flood waters

caused by massive snow melts in the Rocky Mountains and heavy, above-normal rainfall within the State. The high water and subsequent flooding caused damage to homes, businesses and cropland in the communities and farms throughout the Platte River valley in Nebraska.

Section 530 of H.R. 6 would provide $25 million over a 5-year period for flood control and bank stabilization demonstration projects along critical stretches of the Platte River and its tributaries which each year are prone to flooding.

All too frequently within recent years, the U.S. Soil Conservation Service, the natural resource districts, and the local dike and drainage districts in Nebraska have battled the flooding and bank stabilization problems on a piecemeal and patchwork basis. The resources of many natural resource districts and dike and drainage districts have been either inadequate or inadequately applied. The flood damage to dikes, levees, and bank stabilization structures in many areas is now so severe that the agencies responsible for maintaining these structures have neither an adequate tax base nor sufficient resources on hand to properly or permanently repair these structures.

Because of the high water and flooding in 1984 and previous years, the bank erosion along several stretches of the Platte and Elkhorn Rivers and a tributary, Salt Creek, continues unabated. Many of these stretches are seriously destabilized due to the bank erosion and improperly constructed bank stabilization structures. As river flows change their course, they create a "billiard ball" effect on other stretches of riverbank downstream. In areas where serious bank erosion has occurred, homes have been swept into the river, businesses have been placed under water and thousands of acres of cropland have either been lost or flooded.

The economic and agricultural problems we face in Nebraska are only being complicated by these seasonal floods. While we were fortunate not to experience flooding this year, it will only be a matter of time before the high water and flooding return. While it is regretable that the other body did not act on this legislation last year after it was passed by the House, we must continue to push forward with this legislation if we are to avoid additional flooding and bank erosion in the future.

Section 530, as included in H.R. 6, will encourage not only the Army Corps of Engineers, but also State and local agencies to take a comprehensive look at the flooding and bank stabilization problems along the Platte River and its major tributary, the Elkhorn River. The funds authorized in this bill will be used to provide permanent rehabilitation and reconstruction of flood control and bank stabilization structures along the Platte River and its tributaries. Hopefully, this legislation will result in the development of a long term solution to the flooding and bank stabilization problems in Nebraska.

I appreciate the support that my colleagues on the Public Works Committee have given this project in the past, and I thank them again today for including section 530 in this legislation.

However, primarily, I would like to address a matter that is relevant to title XI. If I could have the attention of the committee, I would say to its leadership that I know you may not be able to respond at this point to my colloquy, but I would like to lay out the facts with respect to a particular situation where I am seeking your advice.

The supplemental appropriation bill of 1985 asked the authorizing committee the Committee on Public Works, to determine what is "appropriate cost sharing in terms of provisions in various projects" and they encouraged a "flexible approach." Then the Energy and Water Development Appropriation Act of 1986 authorized new starts for approximately 41 projects. One of those 41 projects is truly a unique project. It is officially entitled termed the Missouri River National Recreatioin River of Nebraska and South Dakota, a bi-State project. It is unique because it gave responsibilities under the Authorizing Act of 1978, primarily sponsored by my predecessor, Charles Thone, with the help of members of this very committee still serving in leadership capacities to two agencies. It gave responsibilities both to the Corps of Engineers and to the Department of the Interior, and that is one unique aspect about the project authorizations.

The relevant stretch of the Missouri River is designated as a "Recreation River under the Wild and Scenic River Act. A "Recreation River" is one of 3 categories of specified by the Wild and Scenic Rivers Act.

When the Corps of Engineers recently tried to determine what would be an "appropriate cost-sharing provision" it apparently consulted with the Department of Interior, specifically the National Park Service. The National Park Service it reported to have said something to the effect that "we do not have cost sharing arrangements" for wild or scenic or recreation rivers. Furthermore, they indicated that there are no local sponsors for this authorized project. Who then would cost-share?

And so the Corps of Engineers, frankly, not especially committed, I gather, in having cost sharing apply to this authorized project but want to conform to the direction from the authorizing committee and being enthusiastic about starting this project, needs some guidance.

I would hope that since this is a unique project, since there are no local sponsors, and since it is a project that has total support from all parties on both sides of the river, that if the chairman and if the ranking minority member are ready at this point to give some comments and some appropriate advice, I would appreciate it. However, if they still need to do some more consultation with the Corps of Engineers and others, I would be satisfied at this point to bring this matter up and hope that we might resume the colloquy at a later point in this debate under another title of the act.

Mrs. SMITH of Nebraska. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I am pleased to yield to the gentlewoman from Nebraska.

Mrs. SMITH of Nebraska. I would like to associate myself with the remarks of my good friend in the well and with the concerns he has expressed. I hope for the same kind of happy solution that the gentleman is working toward.

Mr. BEREUTER. I thank the gentlewoman, and I especially thank her for her invaluable assistance on this project on the Appropriations Committee.

I would make an inquiry of either side of the aisle, asking if they have completed their consultations, or if they would like to take this matter up later during the debate on this bill?

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. BEREUTER. I yield to the gentleman from Kentucky.

Mr. SNYDER. We have had the staff trying to look at the problem the gentleman has outlined here today. Quite frankly, we have not been able to reach any conclusion on it. We will continue to look to see if we can reach some reasonable solution.

Mr. BEREUTER. While title XI seems to be the proper place to take up my question, I would be pleased to return to this act at a later time when the gentleman does have his advice.

Is that consistent with the chairman's wishes?

Mr. ROE. Yes; the gentleman is correct.

Mr. BEREUTER. I thank the leadership on both sides of the aisle from the Public Works Committee, and I hope to resume this colloquy at a later point.

AMENDMENT OFFERED BY MR. RICHARDSON

Mr. RICHARDSON. Mr. Chairman, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. RICHARDSON: At the end of title XI, add the following new section:

SEC. . The Secretary shall promptly transfer to the responsibility of the Corps

of Engineers district engineer in Albuquerque, New Mexico, those portions of the State of New Mexico that, as of the date of enactment of this Act, are under the responsibility of the district engineers in Sacramento, California, and Los Angeles, California.

Mr. RICHARDSON (during the reading). Mr. Chairman, I ask unanimous consent that the amendment be considered as read and printed in the RECORD.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. RICHARDSON. Mr. Chairman, this is what my amendment will do: It will transfer the responsibility of areas in New Mexico west of the Continental Divide to the Corps of Engineers in Albuquerque, NM, from the Corps of Engineers in Sacramento and Los Angeles.

Here is the rationale for the amendment:

It will conform to language in S. 366.

It will result in a savings to taxpayers and compliment the efficiency, long-range planning and flood protection efforts of the Corps of Engineers.

Counties transferred in New Mexico to the Albuquerque corps include: San Juan, McKinley, Grant, Catron, and Hidalgo. Small portions of: Cibola, Sierra, and Rio Arriba Counties.

Under Public Law 84-99, the Albuquerque corps can only deal with these western New Mexico counties on an emergency flood basis.

In 1983 and 1984, the San Francisco and Hila Rivers in western New Mexico experienced their worst flooding situation in a century. The Albuquerque corps made all flood repairs, are familiar with the area, but will not be responsible for future long-range flood protection.

Currently all emergency repairs from flooding in the affected areas are done by the Albuquerque corps. All long-range planning and studies are done by the Los Angeles and Sacramento corps.

Travel. Corps personnel from Los Angeles and Sacramento are having to fly into Albuquerque and then rent a car and drive to the affected western New Mexico counties. This is expensive—over 900 miles.

Taxpayers are confused. They are having to deal with the Albuquerque corps for flood repairs and with the Sacramento or Los Angeles corps for long-range planning or studies.

The original Senate amendment was incorporated into S. 366 after New Mexico residents complained about the inconvenience.

It only makes sense that if an agency is responsible for emergency repairs that they would best be able to most effectively deal with long-range planning and future flood protection.

Some may ask: Are the counties in New Mexico west of the Continental Divide that you want to transfer to the Albuquerque Corps of Engineers part of another river basin or watershed?

The answer is yes. But there are many Corps of Engineer Districts that split watersheds or river basins. My amendment does not set a precedent.

For instance, the Arkansas River in Colorado is the responsibility of the Albuquerque Corps of Engineers as it flows through Colorado but, when the river reaches Kansas, the Arkansas River becomes the responsibility of the Tulsa, OK, district. Another example that comes to mind is the Canadian River. As it flows through New Mexico, the river is the responsibility of the Albuquerque Corps of Engineers, but once the Canadian River hits the Panhandle of Texas it becomes the responsibility of the Tulsa Corps of Engineers. My amendment does not set a precedent—only good, commonsense policy in enabling the Albuquerque Corps to set long-range policy and planning for areas in New Mexico that they are now responsible under law for making emergency repairs. I think it is important to keep in mind that other large rivers cross into several corps districts.

Some have asked if my amendment ends up costing the taxpayers money.

In the long run, I believe it will save the taxpayers money. I am told that this change will require some adjustments but nothing significant. Second, corps officials from Los Angeles and Sacremento are having to fly into Albuquerque and then rent a car to drive to the affected western New Mexico counties. This is expensive—over 900 miles in some instances. Local government officials in New Mexico are having to place long-distance calls to California or Sacramento and sometimes to Albuquerque because of confusion over what corps they should talk to: New Mexico or California. Last, the corps agency making emergency flood repairs has the best information on how to effectively implement a long-range planning program.

Mr. STRANG. Mr. Chairman, will the gentleman yield?

Mr. RICHARDSON. I yield to the gentleman.

Mr. STRANG. I thank the gentleman for yielding.

Mr. Chairman, I would like simply to share with the gentleman some of the concerns. We have a district in Colorado, Colorado III, which adjoins New Mexico III. We have some of the same concerns with regard to the jurisdiction. I do feel that whereas it may not be appropriate to do this by floor amendment, I would like to join with my colleagues and friend from New Mexico in trying to get this issue sorted out over the next year if this body chooses not to accept it by floor amendment. I think it is an extremely important issue.

Mr. RICHARDSON. I thank my colleague and I now yield to the gentleman from California [Mr. MILLER].

Mr. MILLER of California. I thank the gentleman.

Mr. Chairman, I would hope that this amendment would be accepted. I think the hardship the gentleman has pointed out is quite correct. We had some review of this in the committee and again this is one with the jurisdiction of the Bureau. I just think it makes sense. It is not controversial, and I think it is one of the ways we can rationalize some of the delivery of services to people who have to deal with these agencies on a day-to-day basis. It makes it obviously much more convenient for people who have to work with these offices.

Mr. RICHARDSON. Mr. Chairman, once again, I would hope that the majority and minority support this amendment. It is hard for me to go to my constituents and tell them that I have to hold another hearing; that it is going to take more time. Especially when it has been done in the Senate.

I would like it if at this time the majority and minority could tell me what their views are of the amendment right now. I would very much appreciate that.

I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. I thank the gentleman for yielding.

Mr. Chairman, I had intended to get my own time, but we can just extend the gentleman's time.

The CHAIRMAN. The time of the gentleman from New Mexico [Mr. RICHARDSON] has expired.

(On request of Mr. ROE and by unanimous consent, Mr. RICHARDSON was allowed to proceed for 1 additional minute.)

Mr. RICHARDSON. Mr. Chairman, I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. I thank the gentleman.

Mr. Chairman, I very reluctantly oppose this amendment, but I really believe in the context of good legislation that the amendment has to be opposed at this time.

There are a number of reasons that I think are legitimate. I want to commend the gentleman from New Mexico for bringing the issue to us, for the work he has done on it, for the arguments he puts forth in defense of his amendment.

He makes the case that corps jusidiction in some hydrologic basins are shared. But I would like to point out that while it would not be a precedent to share jurisdictions, it would be a precedent for the Congress to put that basin and that shared jurisdiction into law. The shared jurisdictions today are there because the corps has estab-

lished those shared jurisdictions and not because we have done it by law.

We could very well end up doing this. But I think we ought to hold hearings as to how we do it and when we do it; who gets the major jurisdiction and who gets the lesser jurisdiction. I just do not think that we should redraw corps lines without hearings. If we did this, the question might arise: Who now has the responsibility for long-term planning in this area? Does the long-term planning transfer from Sacramento and Los Angeles to Albuquerque? Or does Sacramento and Los Angeles maintain the long-term planning while Albuquerque would continue the responsibility in the short term?

Mr. ROE. Mr. Chairman, I move to strike the requisite number of words.

Mr. Chairman, I yield to the gentleman from Minnesota [Mr. STANGELAND].

Mr. STANGELAND. I thank the gentleman.

Mr. Chairman, let me say that I think we might be, and I can appreciate the economics of this—I think the gentleman makes some very good arguments on the economics, but the corps is opposed to doing it by statute. At least doing it by statute without hearings.

Normally these corps districts are organized on hydrologic basin lines, and it may well be that after we look at this issue we may want to take the counties from California in this basin and put them under the Albuquerque district. We may want to take some of the Colorado counties in another corps district and put them into Albuquerque where they more naturally belong. But I do not think we should do it here. Since it is in the Senate provision, it would be my hope that we not do it here so that it is not confereeable, so that we do not make a mistake today, but rather give us the time for further analysis, further study, and perhaps if this is a good thing to do, we could do it in conference by yielding to the Senate.

I know that the gentleman would like to do it here in the House, and I can respect and appreciate that, but I would just urge that he would delay because I think there are too many unanswered questions that have to be answered before we can do this.

Certainly, I pledge full cooperation to work to do that in the time that we have, and we will not be in conference for quite some time because the Senate has not passed their provision. I am sure that the chairman of the subcommittee agrees with me that we will work and make every effort because I just commend the gentleman from New Mexico and the work he has done to bring this before us. I just do not think today is the right time and the right way to do it.

Mr. ROE. I share the response from the distinguished gentleman from Minnesota because we have great sympathy and great respect from the gentleman from New Mexico, but I think it is important to note that there are three other areas in the country we have been asked to readjust corps facilities.

If we are successful in getting this bill passed, which is one we have been waiting to get passed now for 15 years, it is going to alter a part of the work force and part of the work program and scheduling, whatever, of the entire corps, and we think it would be highly more profitable to organize properly, which I know is the gentleman's concern and your concern in the Southwest. So I would respectfully suggest to the gentleman that we will consider this matter. We are not unsympathetic, but we would rather not consider it in this legislation.

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman.

Mr. RICHARDSON. I thank the gentleman.

Mr. Chairman, I appreciate the diplomacy and the helpfulness that both managers have shown in this discourse with me. I would like to inquire from both of the managers, would they be particularly offended if I did request not a recorded vote but a vote that would at least enable me to return to my constituents and explain to them that an effort was made but that the committee is considering this further?

I just do not want to prejudice myself, but I just feel, I have had too many cases. I brought this up before the Interior Committee. Many of these issues that we in the West have serious problems with, and I think for my own reasons, unless the gentlemen feel it would be prejudicial, I would like to request a vote.

□ 1650

Mr. ROE. Mr. Chairman, of course, the gentleman has his prerogatives, and it could very well go into a recorded vote. But I think he has had a great dialog between the two of us and with all the leadership of this committee. We are sympathetic. Why would the gentleman want to do this? We have asked him not to bring this up because of legitimate purposes, and we would not want to have to vote against him.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I would say to my friend, the gentleman from New Mexico [Mr. RICHARDSON], I do not know how that vote would come out, but if the gentleman from New Mexico was not successful and the House spoke on the issue, it might put us in a bad position to try to look at it very objectively.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Minnesota.

Mr. STANGELAND. Mr. Chairman, that is my concern. First of all it takes a heck of a lot to offend me, and the gentleman's calling for a vote would not offend me personally. But calling for a vote and having this proposition rejected by the House could be prejudicial as we go to conference, and that concerns me, because I think we are willing to work with the gentleman, and I think it might be better—sometimes discretion is the better part of valor, and it might be better not to have the vote and allow us to fight his fight. He has fought his fight, and I think his constituents have to recognize that he has fought his fight, he has done a yeoman's job on the issue, and I would just hope that he would not do it.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(On request of Mr. STANGELAND, and by unanimous consent, Mr. ROE was allowed to proceed for 2 additional minutes.)

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from New Mexico.

Mr. RICHARDSON. Mr. Chairman, once again, if the vote is not a recorded vote, may I ask the gentleman this: I do not intend to ask for a recorded vote, and I do not detect overwhelming support from the Members on the floor for my position at this time, but would a voice vote once again be something that the gentleman from Kentucky [Mr. SNYDER] and the gentleman from New Jersey [Mr. ROE] feel——

Mr. ROE. Mr. Chairman, I move the pevisous question.

The CHAIRMAN. The Chair will state to the gentleman that that motion is not in order in the Committee of the Whole.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Minnesota.

Mr. STANGELAND. Mr. Chairman, I would just like to respond to the gentleman's question, if I may.

Mr. Chairman, on any vote, the House has spoken, whether it is a recorded vote or a voice vote.

Mr. RICHARDSON. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from New Mexico.

Mr. RICHARDSON. Mr. Chairman, once again I am going to implore that we deal with this issue, but I think the gentleman from Kentucky and the gentleman from Minnesota, whom I greatly respect, have made their position clear. The gentleman from New

Jersey has also made his position clear, and I am going to reluctantly withdraw my amendment. But I say to the gentlemen that I hope that a hearing or some kind of deliberation is scheduled before they go ahead and meet with the Senate, because I just cannot go back and continue to tell my constituents that when the Senate has done it, and they have done it unanimously, and I have gone through the whole procedure with all the committees, that they will not give it an honest shot. I am convinced that they will.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

Mr. RICHARDSON. Mr. Chairman, I ask unanimous consent that my amendment be withdrawn.

The CHAIRMAN. Is there objection to the request of the gentleman from New Mexico?

There was no objection.

Mr. UDALL. Mr. Chairman, there are a number of provisions of this bill which concern our territories and commonwealths. The Committee on Public Works and Transportation is to be commended for the attention that it paid to the needs of the insular areas as it developed this omnibus water resources legislation.

Several needs are addressed in the bill that they originally reported. Others would be met by amendments reported by the Committee on Interior and Insular Affairs.

All but one of these amendments are incorporated in the substitute before us today and another provision is partially based upon the other amendment. So, I particularly want to thank Chairman HOWARD, subcommittee Chairman ROE, ranking minority member SNYDER, and other members of the Public Works and Transportation Committee for their cooperation regarding these amendments.

These members include two who also serve on the committee that I chair and are largely responsible for the insular areas provisions, Delegates DE LUGO and SUNIA. The gentlemen from the Virgin Islands, for example, sponsored the amendments reported by the Interior and Insular Affairs Committee.

These provisions were further made possible by the work of the gentleman from California, Representative LAGOMARSINO, the committee's minority spokesman on insular issues and the gentlemen from Puerto Rico and Guam, Resident Commissioner FUSTER and Delegate BLAZ. The chairman of the Subcommittee on Water and Power Resources, the gentleman from California, and our ranking minority member, the gentleman from Alaska, also helped bring about the insular amendments. Finally, I want to recognize the contributions made by the gentleman from Hawaii, Representative AKAKA; the Resident Representative of the Northern Marina Islands; and the staff of the Pacific Basin Development Council.

Perhaps the most important of our amendments restates the intent of current law and is a necessary extension of it.

Under all Federal programs, amounts that all but one of the territories and commonwealths would have to match in order to participate are waived to a limited extent. The amendment ensures that this adjustment is applied in the case of Corps of Engineers projects. It should not suggest, however, that additional statutory authority is needed in the case of projects or programs of other agencies, such as those of the Environmental Protection Agency, which are already covered.

The limited matching waiver is essential for the participation of insular governments in many programs. It also makes sense because our fiscal arrangements with the territories and commonwealths means that much of their revenue is direct or indirect Federal assistance.

The amendment also provides the Corps of Engineers with critical flexibility in applying standards of evaluating water resources projects in the smaller insular areas. Discretionary authority would be given to factor in criteria related to the unique—and often vastly greater—social and economic needs of these islands, if requested to do so by their chief executive.

This flexibility is essential since several important, small projects on generally remote, small islands have not been able to proceed because of requirements designed for the States. Corps officials in the field recognize that these standards are inapplicable to insular conditions because they give inadequate weight to the unique circumstances and needs of insular situations.

This flexibility should, for example, permit serious erosion of shorelines to be halted so that the sole artery to communities is not cut off from the rest of an island. It should permit the construction of dock facilities so that fishermen do not have to travel extra hours daily and residents of remote and sparsely populated communities have access to essential public services, employment, and shopping.

Costs may be extraordinary because of the distances involved, relatively minuscule markets, and very high rates of deterioration. Basic infrastructure for these Americans it is often only minimally developed in comparison to that of the States. Generally very underdeveloped communities would be assisted.

Similar authority to modify program requirements to adapt them to the special circumstances and needs of the insular areas has been granted to other agencies in other statutes.

Two of the amendments concern the Northern Mariana Islands. Since it is the newest member of the American political family and the only one lacking representation in the Congress, it is incumbent upon us to pay special attention to the needs of these islands.

One amendment is essentially a technical correction of the 1984 omnibus insular areas assistance act. It clarifies the authorization for improvements of the commonwealth's water system.

The deficiencies of the system are so serious as to present a clear danger to public health as well as an impediment to development of the islands' tourism industry.

The other amendment would address another priority need of these western Pacific islands: improvement of the main port which is in Saipan.

The authorization follows a study mandated by the 1980 omnibus insular areas assistance act. The Corps of Engineers study found that the harbor is in a general state of disrepair, prevents economies and modern shipping, and outlined necessary work.

The provision that is partially based on an amendment of the Interior and Insular Affairs Committee would not extend the new tax on port use that the bill would impose to cargo loaded or unloaded at insular ports including those in Hawaii. It further exempts articles shipped to the insular areas for consumption in them from the levy.

The provision, which was reported by the Committee on Ways and Means, differs from the amendment we recommended primarily in that it would apply to the tax to articles grown or manufactured in the insular areas and shipped to other U.S. ports.

There is little economic sense in applying the tax to these shipments. The additional cost will only further penalize manufacturers in the insular areas or result in added costs to U.S. mainland consumers of heating oil, medicine, sugar, and other products.

Insular businesses already face operational costs in some respects higher than mainland businesses and in others higher than regional, foreign competitors. If insular businesses are forced by the market to absorb the cost, it could compel some to curtail operations.

With unemployment rates in the territories and commonwealths ranging to over 20 percent and per capita incomes no more than half those of the States, it is counterproductive to impose further burdens on insular businesses. Doing so contradicts Federal policies providing incentives to insular manufacturing.

The reason that we have accepted the compromise I have outlined is that the adverse impact of the tax on cargo shipped to other areas in the United States is mitigated by the fact that these revenues should be returned to the territories and commonwealths.

The mutual agreements that we have with our commonwealths, the Puerto Rico Federal Relations Act and the act approving the Northern Mariana Islands Covenant, and the organic acts establishing the territories of Guam and the Virgin Islands all provide that all taxes on articles produced in these insular areas and transported to the States are covered into insular treasuries. It is our intent that this fundamental and long-standing principle of Federal-insular fiscal relationships applies in the case of this tax.

I would hope that the insular areas use the proceeds of these revenues for employment-creation purposes.

The compromise does, however, meet the most important concern of the committee that I chair regarding new tax: the potential impacts on insular consumers.

Transportation costs already account for a much greater portion of the cost of most articles in the islands than they do on the mainland. Ocean freight over the long distances involved is expensive, particularly because disparate locations with small populations must be served.

The impacts of a new tax on ocean cargo to the insular areas would, therefore, be significantly more adverse in them than to the States. The States generally have much larger populations served by ports than the insular areas. Because of their nature, insular areas must have many more ports serving their much smaller populations than the mainland.

Again, I want to thank Chairman HOWARD and the others who have helped us adjust this legislation to the important water resources needs of the territories and commonwealths.

Mr. ROGERS. Mr. Chairman, I rise today in strong support for the Water Resources Act of 1985 and H.R. 3670 which will be offered as an amendment in the nature of a substitute.

I would like to begin by commending my distinguished friend from Kentucky, Mr. SNYDER, the chairman of the full committee, Mr. HOWARD, the chairman of the subcommittee, Mr. ROE, and the ranking minority member of the subcommittee, Mr. STANGELAND. They have provided excellent leadership in bringing this bill to the floor.

The bill before us today is desperately needed. It addresses many serious water problems in communities across our country. And it provides the authorizations for us to take responsible action in developing our Nation's water resources so they can contribute to the prosperity of our Nation.

I would like to commend the committee for their actions to reach a compromise agreement that will allow us to deepen our Nation's ports. As chairman of the House Task Force on Coal Exports, I have been concerned about the impact which our lack of such deep ports could have on the long-term competitive position of American coal. In 1981, the landmark year of American coal exports, our Nation sold 110 million short tons of coal to foreign buyers. Last year, they totaled a meager 80 million.

There are many important factors relating to this decline. And fortunately, the current glut of bulk shipping capacity has helped to keep our shipping costs down. But the fact remains, that with our major trading partners in Europe, especially France, the Netherlands, Denmark and Italy, developing their deep port capacity, and with our competitors in South Africa and Australia already using deep water ports, in years to come American coal exporters could find themselves at a terribly serious disadvantage in this overseas trade. Some estimates would give our competitors a $5–6 per ton advantage, once the current excess capacity shrinks to a more normal level, all of which spells out lost jobs in our coal mines, lost jobs on our railroads, lost coal business and a worsening balance of trade.

The bill before us will help us to restore the momentum toward increased American coal exports. It will send a clear signal to the world that America is determined to be fully competitive in the world coal market. And it will help us to close the competitive margin gained by our competitors.

In addition, I would like to thank the committee for their assistance in two matters of particular importance to my district.

First, there is a provision in the bill to raise the authorization ceiling on the Big South Fork National River and Recreation Area by $52.6 million. This will expand the scope of the current project, to include the development of the Bear Creek facilities in Kentucky and the Rugby facilities in Tennessee.

Big South Fork already offers immense economic development potential for McCreary, Wayne, and Pulaski Counties in Kentucky, and in our neighboring counties across the Tennessee line. These are communities battling chronic underdevelopment, poverty, and unemployment hovering around 15 percent. But they are determined to harness this immense tourism business potential, and local chambers of commerce, businesses, and communities are already hard at work to turn this promise into the reality of business, jobs, and economic development.

The provisions in this legislation will expand the current scope of the project, increasing the currently projected increase in tourism by a huge 20 percent. Let me tell you some about the long term benefits of this whole project.

When Big South Fork is fully operational, it is estimated that 400,000 tourists per year will visit McCreary County alone, spending about $16.8 million annually. That will mean 560 new jobs in McCreary County alone. And the promises get better and better. The National Travel Center estimates that if an area has 100 people per day coming in as tourists, they will create $1.9 million in business, $507,000 in payroll income, 47 new jobs, $105,000 in State and local taxes, will support 45 school children, will increase the population in that area by 119 people, will mean 44 new households, and will add 6 new businesses. If all these benefits can be expected to result from just 100 tourists, the potential benefits from 400,000 tourists are deeply heartening.

In addition, I would like to thank the committee for inserting clarifying language in the report relating to flood control measures authorized by section 202 of the 1981 Energy and Water Development Appropriations Act, relating to the Levisa-Tug Forks of the Big Sandy and Upper Cumberland Rivers. This language makes it clear that the cost sharing requirements for new flood control construction are not intended to be applied to construction of the 202 project. Since this project has been under construction for several years, it would seem readily apparent that it was well outside the scope of the new cost sharing requirements. But in view of the ongoing bureaucratic delays in the construction of the project, this language is intended to make it entirely clear that the cost sharing requirements are not intended to be applied to any of the flood control measures on any of the stream reaches constructed pursuant to section 202 of the 1981 Energy and Water Development Appropriations Act.

Once again, I would like to commend and to thank my distinguished colleagues on the committee for all their work on this important bill. I urge my colleagues to support it.

Mr. SYNAR. Mr. Chairman, I rise in strong support of the Howard amendment. Among other items, this amendment will authorize the Cherokee Nation of Oklahoma to construct hydroelectric facilities at the W.D. Mayo lock and dam No. 14 on the Arkansas River. This provision in the Howard amendment will create as many as 400 jobs in an area of Oklahoma that continues to experience excessive unemployment, will provide regional consumers with needed low-cost electricity and will result in a significant contribution to the long-term economic prosperity of the Cherokee Tribe. Mr. Speaker, all of these tremendous benefits can be realized without expending any Federal funds.

The Cherokees have proposed to provide 100 percent—and I emphasize 100 percent—of the financing for design and construction of the hydro plant. Upon completion, the Corps of Engineers would assume ownership of the facility and operate the plant in connection with its current responsibilities at the lock and dam. Power from the 40 mega-watt facility would be marketed by the Southwestern Power Administration, thereby providing needed low-cost electricity for its preference customers. In turn, the power sales will cover the Federal costs associated with the Corps' maintenance of the powerplant, reimbursement costs associated with construction of the facility by the Cherokees and a reasonable annual royalty payment to help secure the economic well-being of the tribe.

The arrangement I have just outlined and embodied in legislation, H.R. 3601, which I introduced a short time ago, has been the source of extensive discussions by all parties involved. Indeed, I believe that all of the parties are in agreement about the enormous near and long-term benefits offered by this proposal.

We are all well aware of the tremendous budget constraints facing the Government today. This provision in the Howard amendment offers economic benefits to the Cherokee Nation, local economies and regional electricity consumers without expending any Government funds. The Cherokees are willing to accept the full financial responsibility of this novel proposal. I commend them for their courage and foresight. And, I also commend them for bringing forth what I hope becomes the benchmark for similar future efforts to provide local economic development opportunities while recognizing the severe budgetary limitations we face as a Nation.

For these reasons I urge my colleagues to join with me in supporting the Howard

amendment. I would like to thank the distinguished chairman for including this provision in his amendment. I would also like to express my sincere gratitude to the subcommittee chairman, Mr. ROE, and his staff for their hard work and assistance on this matter.

Mr. MCEWEN. Mr. Chairman, I appreciate the opportunity to address the House in support of H.R. 6, the long awaited Water Resources, Conservation, Development, and Infrastructure Improvement Act of 1985.

It has now been nearly a decade since Congress has sent a water projects reauthorization bill to the White House. This delay has resulted in the loss of valuable time, and continued negligence will only cause an increase in the cost of these vital projects. The time is long past due for a bill to address the water infrastructure needs of our Nation.

I have the honor of representing a rural area of Ohio, which not unlike most rural areas of America is in dire need of the projects contained in H.R. 6. American history can be traced along the development of the traffic and trade on its rivers. The maintenance of the waterways such as the Ohio River are essential to American industry as are its tributaries essential to the economy of the areas they access.

One such project needing immediate attention is the Gallipolis lock and dam project. This modification to the Ohio River is said to be one of the most dangerous navigation projects on the 981 mile Ohio River. The replacement of this lock and dam is critical to river cargo transfer and safety. In its current state, the hazardous lock, requires diesel powered tows to wait up to eight hours to get through the lock at the river's bend. If these improvements are not made by 1990, 15 percent of the river cargo will not even be able to pass through the lock. A chain is only as strong as its weakest link and at the present time, the Ohio River transportation system is only as strong as its weakest lock—the one at Gallipolis.

Although Congress has appropriated the money for the advanced engineering and design work currently underway at Gallipolis, the work cannot continue without the authorization of H.R. 6.

There are, of course, many other important projects for Ohio in the bill. Of particular interest to southern Ohio are water supply and distribution projects at Ceasar Creek in Warren County and William H. Harsha Lake in Clermont County. The effort at Ceasar Creek is a modification of existing authority to construct a public water supply and distribution system. Completion of the two projects will assure the availability of safe drinking water for southwestern Ohio into the next century.

The passage of H.R. 6 will mean approval for two long awaited flood control projects for the Ohio towns of Logan and Nelsonville in my district. This authorization will enable the construction of the Logan Channel enlargement, following the completion of the planning and engineering stage presently underway. The Nelsonville project will reduce annual flood damage by about 83 percent. These two projects are usually thought of in tandem as they are equally crucial to flood ravaged areas of central Ohio.

The provision to remove the Army Corps of Engineers from jurisdiction over the portion of Great Miami River and its tributries which are under the management of the Miami conservancy district is an excellent example of removing Federal interference where it doesn't belong. These waterways are not navigable, never have been and never will be. The multitude of dams and depths that are barely deep enough "to float a toy boat," to quote the Dayton Journal Herald, are reason enough to return local control to this area of the Great Miami. The Miami conservancy district has an excellent management record. Federal permits, regulations and paperwork amount to unnecessary encroachment. We have the opportunity with the passage of this bill to correct an absurd situation.

Also addressed by H.R. 6 is the problem of land erosion at the Maumee Bay State Park at the recommendation of the Army Corps of Engineers. Ohio is ready to go forward with this key effort and simply awaits congressional approval.

Just as Ohio River played an important role in the growth of the Queen City, the greater Cincinnati area now relies on a series of bridges to connect its heart with the areas across the river which it vitalizes. The bridges currently providing this important linkage between Ohio and northern Kentucky are in desperate need of repair and are destine for replacement. With H.R. 6, the 119-year-old John A. Roebling Bridge will be retired to remain as a landmark, and a new bridge will provide access between Cincinnati and Covington, KY. The central bridge with a life expectancy of only 3 to 8 more years will be replaced by a modern four-lane deck to carry U.S. 27 traffic from Cincinnati to Newport, KY. And the remainder of the allocated funds will be used to repair the bridge linking Aberdeen, OH to Maysville, KY.

Finally, harbor work at Lorain and Cleveland will vastly improve navigation and commerce in Lake Erie. These two crucial projects are important to meet the infrastructure needs of northeast Ohio.

As a strong supporter of legislation that maximizes economic and community development through well planned and controlled water systems, I am hopeful that this will be the Congress which approves this long-awaited and much-needed legislation.

Mr. SMITH of New Jersey. Mr. Chairman, I rise today to urge my colleagues to support H.R. 6, the Water Resources Act of 1985, which, as you know, authorizes 240 water projects nationwide.

Mr. Chairman, our Nation's water-resources infrastructure is in desperate need of repair, rehabilitation, and improvement. I would point out to my colleagues that many canals, inland waterways, locks and dams are past the end of their useful lives. One third of U.S. dams inspected by the Corps of Engineers were found to be unsafe. Clearly, water is an irreplaceable resource that must be properly utilized H.R. 6, the Water Resources Act of 1985, is a responsible answer to the water crisis we face.

I am particularly pleased that the Public Works Committee included a provision in H.R. 6 which I authored that will address and hopefully resolve the Pine Brook flood problems in New Jersey's Manalapan Township. Residents from the Pine Brook section of Manalapan have been plagued by heavy flooding since 1969. And, worse, the incidence of flooding has increased in frequency with continued housing development within this flood plain area. Section 305 of the Water Resources Act—found on page 109 of the bill and page 212 of the accompanying committee report—directs the Secretary of the Army to undertake protection measures to prevent flood damage to Pine Brook residents of Manalapan.

I would like to praise my fellow colleague from New Jersey. BOB ROE, for his leadership fairness and effectiveness with regard to this important water bill and especially, with regard to section 305 which affects the well-being of the present and future residents of Pine Brook community in New Jersey.

Mr. LIGHTFOOT. Mr. Chairman, I rise in support of H.R. 6, the Water Resources Conservation, Development, and Infrastructure Improvement and Rehabilitation Act of 1985.

This legislation is badly needed and long overdue. The last true comprehensive water resources legislation to pass this body was in 1970. The Nation's infrastructure is directly tied to the Nation's economic well-being and our quality of life, and it is badly in need of repair and improvement.

I would like to take a moment to cite a couple of examples of what this bill would do. One of these is a project near Hamburg, IA, which provides for the installation of pumping facilities to correct a long-standing problem with flooding in that area. Mr. Lyle Hodde has organized and recruited membership for a pumping district in the area which will pay for operation and maintenance of the pumping facilities. I believe this is a fine example of how Federal resources can be used in cooperation with a local initiative to provide widespread benefits.

The bill also addresses the inequities which have resulted from the construction of Red Rock Dam. Many farmers and property owners have suffered substantial losses from unforeseen flooding caused by the reservoir's lack of holding capacity. This bill authorizes the Secretary of the Army to purchase land adjacent to the reservoir which should have been part of the project from the beginning. The owners of that land would then be compensated for their property which has been rendered virtually useless because of constant flooding which is beyond the control of the regulation of the Army Corps.

While I now support H.R. 6, I want to note that I withheld my support until I saw the inclusion of the cost-sharing measures which will require non-Federal sources to

help finance these improvements. Under these new requirements, State and local sponsors would pay between 10 and 55 percent of the cost of the project.

I believe these cost-sharing measures are essential to a responsible water resources bill. These requirements will result in a savings of Federal tax dollars as well as shift the responsibility for payment to those who more directly benefit from them. More importantly, it will discourage the use of Federal funds for projects with a low cost-benefit ratio, and help to ensure that only the well-planned, worthwhile projects will be funded.

This bill also deauthorizes 310 projects not yet under construction, which have an estimated completion cost of $11.1 billion. In addition, H.R. 6 provides that projects authorized by this bill will be automatically deauthorized 5 years after enactment of this law if they have not received construction funding by that time.

I would also like to take this opportunity to express my appreciation to the chairman of the Water Resources Subcommittee, the gentleman from New Jersey, Mr. ROE, and the ranking minority member of the subcommittee, the gentleman from Minnesota, Mr. STANGELAND, and all of the members in both public works and other committees who have helped develop this bill.

Again, Mr. Chairman, I believe H.R. 6 is a responsible water resources bill, and I urge my colleagues to join me in supporting this badly needed legislation.

AMENDMENT OFFERED BY MR. MACK

Mr. MACK. Mr. Chairman, I offer an amendment which I sent to the desk.

The Clerk read as follows:

Amendment offered by Mr. MACK: On page 399, after line 5, add the following new section:

"SEC. 1199K. Notwithstanding any other provisions of this Act, not more than 91.8 percent of the funds authorized to be appropriated may be expended in fiscal year 1986 as defined in the Balanced Budget and Emergency Deficit Control Act of 1985, as adopted by the House of Representatives on November 1, 1985."

Mr. SNYDER. Mr. Chairman, until we have a chance to look at this amendment, I reserve a point of order on the amendment.

Mr. ROE. We do not have a copy of the amendment, Mr. Chairman.

Mr. SNYDER. Mr. Chairman, the amendment was just handed to us, and, therefore, we reserve a point of order on the amendment.

The CHAIRMAN. The gentleman from Kentucky [Mr. SNYDER] reserves a point of order on the amendment, and the gentleman from Florida [Mr. MACK] is recognized for 5 minutes in support of his amendment.

Mr. MACK. Mr. Chairman, the amendment that I offer today is pretty simple and pretty straightforward.

I realize that there may be some Members on the floor who will ask the question: Why us, and why now? Well, the reason "now" and the reason "you" is because on Friday, November 1, the Democratic Party basically put together what they referred to as the Rostenkowski alternative, the deficit-reduction plan. What we heard over and over again was that there was a need to reduce the deficit number in 1986 to $161 billion. And the thing that we heard after that was that we have to do it now, that we must do it now. In fact, one of the speakers came to the floor and said something like this: that there are three differences between the Rosty plan and the Gramm-Rudman or the Republican plan; the first difference was that the Rosty plan would do it now, the second point he made was that the Rosty plan would do it now, and the third point he made was that the Rosty plan would do it now.

What we are attempting to do now today is to give you the opportunity to do it now, to reduce that spending by 8.2 percent.

You might ask yourself, where did we come up with 8.2 percent? Did we just pick that figure out of the air? No, we did not.

Just recently the Congressional Budget Office provided us with some information, information based on what the difference was between the two alternatives, what would happen under the Democratic or the Rostenkowski alternative and what would happen under the Republican plan. The CBO letter basically outlines it and gives us a table showing the possible effects in 1986 of the House-passed and the Packwood amendments to the debt-ceiling bill. It says, "For the purpose of estimating the deficit we have assumed an outlay base of $982.5 billion," which is the figure we have been using for all illustrative sequestered calculations. This reflects current law for entitlements and other mandatory spending at 1985 levels for discretionary accounts. The assumed revenue base is $787.9 billion, which is an estimate of current law revenues under CBO, August economic and technical assumptions.

Now, what has happened is that as a result of establishing a deficit target of $161 billion for 1986 and saying that we want to do it now, coupled with the fact that you exempted certain programs, nine programs that you have exempted, and that in addition to that you moved certain programs from category 2 to category 1, now, what that meant was that the number of dollars that were left in the pot to be sequestered was substantially reduced. In fact, it was reduced from roughly $500 billion to less than $300 billion, about $285 billion to be exact.

Now, as a result of that smaller reduction or that smaller number of dollars to be sequestered, what happens is that those programs that are left in the pot have to take a little bit harder hit. And what CBO says down at the bottom of its estimate here is that to reach the percentage reduction in category 2 in outlays necessary to reach the deficit targets that you have established, we would have to cut 8.2 percent across the board in this particular project.

Again I realize that this is difficult for you to do. I suggest you are going to have difficulty in many of the programs that we are going to consider. One of the estimates they made was that in the veterans' medical care under the Senate plan, $172 million in budget authority would have to be reduced. In the House plan, the 8.2 percent is going to require budget authority reductions of $737 million.

This is the plan that you voted for. This is the plan where you set aside the various exemptions. You have chosen those people whom you want to protect, and by the same decision you have stated those people whom you are not going to protect. As a result of that, you are going to have to stand up over the next several months and vote on those issues such as veterans' health care and water projects.

□ 1700

So, Mr. Chairman, it is my intention and the reason that I offer this amendment today is that I think it is about time that we found out if the rhetoric that we heard on Friday really was a true establishment of what we wanted to accomplish. If it is, no one should have any difficulty in voting for this particular amendment to reduce 8.2 percent across the board.

So I would ask my colleagues on both sides of the aisle if they would consider supporting my amendment and voting "yes" on this proposal.

Mr. ROEMER. Mr. Chairman, will the gentleman yield for a question?

Mr. MACK. I would be glad to yield to the gentleman.

Mr. ROEMER. Mr. Chairman, just to make sure I understand the gentleman's proposal, the gentleman is taking the alternative to Gramm-Rudman passed by the House last week and working the percentage reductions that that plan would call for on this particular bill; am I correct?

Mr. MACK. Mr. Chairman, if I may reclaim my time, what I am doing here is after receiving the information back from the Congressional Budget Office which said they took a look at both plans as they had been passed and made an estimate of what the growth in the economy was going to be and what the projected spending was——

The CHAIRMAN. The time of the gentleman from Florida [Mr. MACK] has expired.

(At the request of Mr. ROEMER, and by unanimous consent, Mr. MACK was allowed to proceed for 2 additional minutes.)

Mr. MACK. Again, what CBO said was that given the certain economic projections for growth and certain projections as far as spending is concerned, they made an estimate that certain spending reductions would have to take place. And in order to comply with the House-passed Democratic version of last Friday, an 8.2-percent reduction across the board in those programs that were left in the pot would have to take place.

And the purpose for my amendment today is to say, as so many people said last Friday, it is time to get started now. We cannot wait. So I am offering that opportunity.

Mr. ROEMER. Mr. Chairman, will the gentleman yield further?

Mr. MACK. I am glad to yield.

Mr. ROEMER. As I also understand the gentleman's amendment, he accepts not the OMB numbers, but accepts the CBO numbers; am I correct in that?

Mr. MACK. At this particular point, the only numbers I have available to me are those of the CBO, that is correct.

Mr. ROEMER. I know the gentleman's amendment is a tough one, but I think it is fair under the circumstances.

Mr. MACK. Mr. Chairman, I thank the gentleman.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. MACK. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, let me say that after having looked at the amendment, I am convinced that the point of order does not lie.

Mr. MACK. I beg pardon?

Mr. SNYDER. I am convinced that the point of order does not lie and I intend to withdraw it shortly, but I am a little bit confused as to what it does.

Mr. MACK. Mr. Chairman, who controls the time?

Mr. SNYDER. The gentleman referred to 91.8 percent of the funds authorized to be appropriated in fiscal year 1986.

Mr. MACK. Mr. Chairman, I reclaim my time just to find out where we are.

Mr. SNYDER. Oh, I am sorrry.

The CHAIRMAN. The Chair would announce that the gentleman from Florida is controlling the time.

The Chair would inquire of the gentleman from Kentucky if he withdraws his point of order?

Mr. SNYDER. Mr. Chairman, I withdraw the point of order.

The CHAIRMAN. The point of order is withdrawn.

The gentleman from Florida is recognized.

Mr. MACK. Mr. Chairman, I am glad to yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, I thank the gentleman.

The gentleman referred to not more than 91.8 percent of the funds authorized to be appropriated and expended in fiscal year 1986. If we stop there, I would assume it would apply to the $1.5 billion that appears in section 1173.

Then it goes ahead and says, bringing the definition of the Balanced Budget Emergency Deficit Control Act of 1985 adopted by the House on November 1. What is that number?

Mr. MACK. The number as I understand it $161 billion.

The CHAIRMAN. The time of the gentleman from Florida [Mr. MACK] has again expired.

(At the request of Mr. SNYDER, and by unanimous consent, Mr. MACK was allowed to proceed for 1 additional minute.)

Mr. MACK. It is $186 billion, the deficit target for 1986.

Mr. SNYDER. Mr. Chairman, if the gentleman will yield further, that is the total figure. What is the figure that the gentleman would be reducing for this function?

Mr. MACK. It is an 8.2-percent reduction across the board.

Mr. SNYDER. What is the base?

Mr. MACK. From the gentleman's authorization bill.

Mr. SNYDER. Oh, our authorization bill then is $1.5 billion in section 1173 for that fiscal year, so that is the number the gentleman would be reducing by.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. MACK. Mr. Chairman, if I may reclaim my time, I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I thank the gentleman for yielding.

I think that the amendment language, which I do not have in front of me, indicates that it is in the general provisions section; it would relate to all authorized spending within the bill so that it would not be just that which is in section 11, it would be in all authorizations that would be subject to appropriations in the bill.

Mr. SNYDER. Mr. Chairman, if the gentleman will yield, I think the gentleman is not aware of the fact that in section 1173, we have a cap that can be spent for this whole bill, which is $1.5 billion in the fiscal year which the gentleman mentions.

My question is, Is that the number we are reducing?

The CHAIRMAN. The time of the gentleman from Florida [Mr. MACK has again expired.]

(At the request of Mr. HOWARD, and by unanimous consent, Mr. MACK was allowed to proceed for 5 additional minutes.)

Mr. WALKER. Mr. Chairman, will the gentleman yield further?

Mr. MACK. I am glad to yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, it is my understanding that if that is the cap that is on spending in the bill, if that is the total amount of money that can be spent in fiscal year 1986, since the amendment only goes to fiscal year 1986, what the amendment would purport to do then is limit the spending to 91.8 percent of the number that is capped in the bill.

Mr. SNYDER. That is of the $1.5 billion for fiscal year 1986; there are other caps for other years, but that is the figure we are using here.

Mr. WALKER. Mr. Chairman, if the gentleman will yield further, this figure only goes to fiscal year 1986, because that is the figure around which the Rostenkowski proposal went the other day, where it went to the $161 billion of overall spending.

Mr. SNYDER. Mr. Chairman, could I ask the gentleman in the well if he concurs in that explanation of his amendment?

Mr. MACK. I certainly do.

Mr. DURBIN. Mr. Chairman, will the gentleman yield?

Mr. MACK. I am glad to yield.

Mr. DURBIN. Mr. Chairman, first, I would like to commend my colleague, the gentleman from Florida, for extending this olive branch. I think we may finally have broken this impasse between the House and the other body by rejecting the approach of the other body. I am sure the gentleman offers this amendment in good faith and has given a clear signal that he is prepared to accept the Rostenkowski approach which we passed in the House of Representatives last week.

Is that a fair summation of the gentleman's position today?

Mr. MACK. If I may reclaim my time, Mr. Chairman, let me suggest to the gentleman that if this amendment were to pass with the support of those individuals who supported the $161 billion deficit reduction plan as outlined by the alternative of the gentleman from Illinois [Mr. ROSTENKOWSKI] on Friday, November 1, I certainly would consider supporting that House position.

Mr. DURBIN. Mr. Chairman, will the gentleman yield further?

Mr. MACK. I am glad to yield?

Mr. DURBIN. Mr. Chairman, if we are going to dispel the darkness of this impass that has been created between the House and the other body, is the gentleman from Florida prepared to light the first candle and suggest that he is going to stand tall now for the Rostenkowski alternative, that he is going to be there voting for the appropriation that is required?

Mr. WALKER. Mr. Chairman, will the gentleman yield to me?

Mr. MACK. I yield to the gentleman from Pennsylvania.

Mr. WALKER. Mr. Chairman, I would say that, of course, there are

more than money figures involved with many of us on this side.

The fact that the Rostenkowski plan was a direct act of sabotage against the whole approach to a balanced budget by first of all requiring a court challenge and then saying that all sections of that bill were subject to being ruled out of order if one section was ruled out of order and then specifically putting one section in the bill that was obviously unconstitutional, it was a direct act of sabotage, without some assurance that the program was going into effect.

A lot of us would be reluctant to accept just an amendment or a program that had only figures in it; so I think that there would be other things involved here, but what this particular amendment does is, it says, let us make real what we said we were going to do the other day. Let us cut the 8.2 percent out of the program as a start.

There are a whole series of other programs, too, that we are going to have to do to get to Rostenkowski.

The CBO also shows that the Older Americans Program would have to be cut, in order to get to that $161 billion, by $94 million compared to $22 million in the Gramm-Mack proposal, that authority for low-income energy assistance would have to be cut by $173 million instead of $40 million in the Gramm-Mack proposal; that student financial assistance would have to be cut by $404 million compared to $94 million in the Gramm-Mack proposal; that we would in fact have to make those kinds of cuts as we go through the process here, but this is a start, and I thank the gentleman for yielding.

Mr. DURBIN. Mr. Chairman, will the gentleman from Florida yield?

Mr. MACK. Possibly in just a moment, but I would just like to make another point.

I realize that this may cause some heartburn, that people may look and say, "Wait a minute. Is this really a serious offer? I mean, come on—8.2 percent?"

What I am saying here today is that in response to what I heard last Friday, I disagreed with the proposal that you all put together, but I am giving the gentleman an opportunity to prove to the American people that we are very serious about reaching that goal of $161 billion.

Mr. DURBIN. Mr. Chairman, will the gentleman yield?

Mr. MACK. I am glad to yield to the gentleman.

Mr. DURBIN. Mr. Chairman, I believe the gentleman from Florida is acting in good faith and I am prepared to lock arms with my colleague from the opposite side of the aisle to break this impasse, as long as I have an assurance from my colleague that we are going to walk down this path together all the way. As long as I know the gentleman is willing to stand behind the Rostenkowski alternative to the final path and take it all the way through to completion, I am willing to do that; but if the gentleman is going to pick and choose the things he likes about some packages and not others, then perhaps the gentleman's motives might be questioned.

Mr. MACK. Well, again, if I can reclaim my time, I can understand why one might want to question my motives. I understand the gentleman clearly does not do that.

Mr. DURBIN. Clearly, I would not.

Mr. MACK. I am certainly prepared to vote for my own amendment. I mean, I certainly would not want to give the impression that I would not do that.

The CHAIRMAN. The time of the gentleman from Florida [Mr. MACK] has again expired.

Mr. ROE. Mr. Chairman, I rise in opposition to the amendment. I rise in opposition to the amendment because I thought we were proceeding so well here on a very complicated public works bill that was totally bipartisan and we were supposed to be putting together the needs and the infrastructure of the Nation.

Then, regrettably, I hear a very distinguished Member talk like this and we begin to hear that there is the Rostenkowski bill or the Rudman or whatever. I do not know what that has to do with public works.

So I would like to engage the gentleman in a little bit of colloquy if we can get some attention over there.

It is well to put down words. We have had so many people testify or participate today and have said the shadings of language and whatever. The gentleman might have a great idea.

We are under the impression, as the gentleman from Kentucky pointed out, we probably are one of the very responsible committees because we put a ceiling in our bill. Regardless of the authorizations, we have a ceiling for 1986 of $1.5 billion; so we are not going to the Appropriations Committee or any Budget Committee openhanded. We say that is the maximum we feel we can ask for.

The question I am asking the gentleman specifically, is the 91.8 percent—and I reiterate what the gentleman from Kentucky said—is the gentleman talking about 91.8 percent of our cap of the $1.5 billion?

Mr. MACK. I was referring to that number as——

Mr. ROE. No, not what the gentleman is referring to. Does the gentleman's amendment mean that specifically?

Mr. MACK. The amendment means that specifically.

Mr. ROE. So the gentleman is saying to this committee that if we were to accept the amendment at 91.8 percent, as I am understanding it, that that would only diminish our cap of the $1.5 billion by that other 8 percent. Is that what the gentleman is saying? Is that what the amendment does?

Mr. MACK. I am saying 8.2 percent.

Mr. ROE. Is that the specific understanding?

Mr. MACK. That is the specific understanding.

Mr. SNYDER. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Kentucky.

Mr. SNYDER. Mr. Chairman, it strikes me that the legislative history has been pretty well laid out as to what the propounder of the amendment means; but to resolve any doubt, if you put a period after 1986 and struck the rest of the language, then it would be very clear.

Would the gentleman be willing to entertain a unanimous-consent request that we do that?

Mr. MACK. No, we do not accept that.

Mr. SYNDER. Then it makes me wonder what the gentleman means.

Mr. ROE. Well, Mr. Chairman, I believe it is my time, if I am not mistaken.

If we mean that, the gentleman spoke to 1986 and nobody is being surreptitious here, the gentleman might have a good idea. We are listening to him.

If we are coming back and saying we have in our committee put a cap on what we would recommend for expenditures at $1.5 billion, that is far below what we need in this bill; then we are coming back and the gentleman is saying, as I understood the gentleman and he is telling the people of this House, that he wants to put this through, he wants us to be responsible, which we are trying to do, and we are simply asking, is the gentleman saying that that 8.2 percent is what we would be doing—8.2 percent lesser than the $1.5 billion; is that what the gentleman means?

Mr. MACK. I have already answered that several times.

Mr. ROE. And the gentleman is limiting it to 1986, why would the gentleman strike the rest of the language then?

Mr. MACK. I just happen to be married to that language. I do not see what we gain by the changes made.

Mr. WALKER. Mr. Chairman, will the gentleman yield further?

Mr. ROE. I yield to the gentleman.

Mr. WALKER. Mr. Chairman, let me ask the gentleman whether or not the $1.5 billion which is in the gentleman's bill is in fact the same amount——

Mr. ROE. That is the cap in the bill.

Mr. WALKER. Yes, the cap in the bill, is consistent with the Rostenkow-

ski plan that was brought on the floor last week?

Mr. ROE. We are not voting on that. That is not part of the public works bill.

Mr. WALKER. Well, if the gentleman will yield further?

Mr. ROE. Well, it is my time, if it is, sir.

Mr. WALKER. Mr. Chairman, will the gentleman yield?

Mr. ROE. Well, I know, but I can also take it back, if I understand the rules of the House. I do not want the gentleman to put words in my mouth.

There seems to be acrimony being developed by certain people at the tail end of the public works bill.

We are not disagreeing with the gentleman. We are not dealing with the gentleman from Illinois [Mr. ROSTENKOWSKI] or Senator RUDMAN or anybody else here. The House has not spoken to that issue and the Senate combined.

All I am simply asking, we have an amendment before us and we are willing to try to read the amendment and understand what the gentleman is trying to say and we may accept the amendment. God forbid we should accept an amendment to control financing.

□ 1715

All we are simply saying to the gentleman from Florida, since he is married to that language, is should we offer an amendment if he is married to that language?

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has expired.

(By unanimous consent, Mr. ROE was allowed to proceed for 5 additional minutes.)

Mr. ROE. Mr. Chairman, if the gentleman is talking to the fiscal year 1986, we have NO problem with that. So what is the magic?

Mr. WALKER. Mr. Chairman, if the gentleman would yield, when we dealt with the bill on the floor the other day, it was an important distinction on the floor about which category certain spending fell into. This particular spending would fall into category II under that particular bill, which would result in an across-the-board 8.2-percent decrease in spending.

All I am trying to ascertain is whether or not the spending in the gentleman's bill was consistent with the spending that was in that overall budget approach that was brought to the floor the other day. If, in fact, those two match up, it seems to me there is no problem. If in fact, those two do not match up, then there may be somewhat of a problem in this language and I am trying to work that out. There is no acrimony involved. I am trying to find out where we are.

Mr. SMITH of Iowa. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Iowa.

Mr. SMITH of Iowa. I thank the gentleman for yielding.

Mr. Chairman, to start with, it is consistent because that bill the other day deals with outlays and we are dealing with budget authority here. There is no attempt in that bill to deal with the accumulation of budget authority. It would not make any difference if we have $5 billion in budget authority. We still have a limitation on outlays according to the amount appropriated, and then an 8.2-percent reduction from that.

So it is totally consistent to not even reduce budget authority.

Mr. WALKER. If the gentleman would yield further, we are, in fact, dealing with authority here. We can, in fact, map the authority figures. CBO did that in their analysis today. So we can map authority figures as they relate to the particular legislation that was brought to the floor, and that is all we are trying to do, is make certain the two track. If the two figures are similar, if, in fact, this bill tracks with the approach brought to the floor the other day, there is no problem on this. If has been an 8.2-percent reduction and everybody is happy.

Mr. SMITH of Iowa. If the gentleman will yield further, I would say that $1½ billion in budget authority is going to make us considerably less than $1½ billion in outlays in 1986. So you are already way below $1½ billion. I think you are dealing with two different things here.

Mr. PANETTA. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from California.

Mr. PANETTA. I thank the gentleman for yielding.

Mr. Chairman, let me understand, because I think in trying to implement any of these proposals, whether it is Gramm-Rudman or whether it is the alternative that was adopted on Friday, the question is: What assumptions go into the base to determine what percentage ought to be cut?

The gentleman from Pennsylvania has reached a figure of, I think, 8.9 percent.

Mr. WALKER. 8.2 percent, based upon CBO's analysis.

Mr. PANETTA. All right. Now, 8.2 percent is based on what assumptions? For example, does the gentleman take credit for what the Committee on Appropriations has done in terms of appropriations bills already adopted?

Mr. MACK. Mr. Chairman, if the gentleman would yield, if I could read to the gentleman the wording of the CBO letter as to what they did, I would be glad to do that to clarify the point.

Mr. PANETTA. Just answer my question. In effect, does the gentleman know what assumptions were presented to CBO? Let me ask the gentleman this: Did CBO make an independent judgment here? Yes or no.

Mr. MACK. I feel that they made an independent judgment; yes.

Mr. PANETTA. That is not my understanding. My understanding is that CBO made a judgment based on what was presented to them in terms of assumptions.

Mr. MACK. It says:

> We have assumed an outlay base of $982.5 billion, which is the figure we have been using for an illustrative sequester calculation. This reflects current law for entitlements and other mandatory spending in 1985 levels for discretionary accounts.

Mr. PANETTA. But the problem is, and the gentleman was part of the conference, this was an illustrative sequestering. It was not based on firm assumptions as to what went into the base. It was an illustrative development that was done within the context of the conference.

My point is this: If we are going to be serious about this, then the gentleman ought to lay out what assumptions are going into his base to reach the 8.2-percent figure. Do not just throw out an 8.2-percent number.

Mr. ROE. Mr. Chairman, if I may reclaim my time, please, I have an amendment I want to offer.

The CHAIRMAN. Does the gentleman yield back the balance of his time?

Mr. ROE. No, Mr. Chairman, not yet.

The CHAIRMAN. The Chair will advise the gentleman from New Jersey [Mr. ROE] that if he wishes to offer an amendment, he must yield back the balance of his time.

Mr. ROE. Yes. Mr. Chairman, I yield back the balance of my time.

The CHAIRMAN. For what purpose does the gentleman from New Jersey [Mr. ROE] rise?

AMENDMENT OFFERED BY MR. ROE AS A SUBSTITUTE FOR THE AMENDMENT OFFERED BY MR. MACK

Mr. ROE. Mr. Chairman, I offer an amendment as a substitute of the amendment.

The Clerk read as follows:

> Amendment offered by Mr. ROE as a substitute for the amendment offered by Mr. MACK: On page 399, after line 5, add the following new section:
>
> "SEC. 1199K. Notwithstanding any other provision of this Act, not more than 91.8 percent of the funds authorized to be appropriated may be expended in fiscal year 1986."

Mr. WALKER. Mr. Chairman, I reserve a point of order on the amendment.

Mr. ROE. Mr. Chairman, we have been working here today and we are putting together a very, very important piece of legislation for this country. It seems to me to be a little bit

sad, if not too bad, that this kind of situation has to arise.

I say to all the people who are going to debate this as we fight in some other arena, it could very readily be that his bill could be delayed or could be defeated. It seems to me that the substitute we are offering here simply tracks exactly what the gentleman said and precisely what he wanted to achieve. He wanted to reduce our cap, which is $1.5 billion, which is one of the few bills around here which has an automatic, built-in cap which is there.

We are willing to accept the substitute and reduce that cap by the 8.2 percent. We are willing to accept that substitute, because that does what the gentleman spoke to.

Mr. MACK. Mr. Chairman, will the gentleman yield?

Mr. ROE. I most assuredly yield to the gentleman from Florida.

Mr. MACK. I thank the gentleman for yielding.

Mr. Chairman, if the gentleman will allow me the time, I want to say that the intent was honest, that the information I have given to the gentleman as far as the CBO is concerned is different from the information that we looked at during the conference. I think it is a good analysis of what would happen under present conditions.

I just want to say to the gentleman, I am prepared to accept his substitute, but I want to make it clear that I intend, each time we have the opportunity, to request that the House live up to what it passed on Friday. Again, as far as I am concerned, that is an 8.2-percent reduction wherever we can get it in the programs that are left in the pot.

Mr. ROE. Let me suggest this point of view as the temperatures here all begin to come down a little bit.

I thoroughly respect the gentleman for his concern and his responsibility. I think when we have a committee like this that is doing the right thing, we are willing to move in that direction, if the gentleman can accept that substitute, then I think we are beginning to make progress.

Mr. ROEMER. Mr. Chairman, will the gentleman yield?

Mr. ROE. Yes, of course I yield to the gentleman from Louisiana.

Mr. ROEMER. I thank my colleague for yielding and for his efforts here.

Mr. Chairman, let me point out to the other side of the aisle, if I could, that from the same CBO estimates, the paragraph reads further:

> These estimates, however, are highly preliminary and are unlikely to be those which CBO would use for an actual report pursuant to the House-passed Packwood amendments.

Mr. Chairman, I have already said publicly I agree with the spirit of what the gentleman from Florida is trying to do, but let us be careful about the figures. It is too early.

Mr. STANGELAND. Mr. Chairman, will the gentleman yield?

Mr. ROE. I yield to the gentleman from Minnesota.

Mr. STANGELAND. I thank the gentleman for yielding.

I just want to commend the chairman for what he is trying to do. I just want to back up what the gentleman from Louisiana just said.

There is nothing wrong with us cutting the authorization in this bill to the amount necessary for whatever deficit reduction program we pass. But while this House spoke last Friday, that is not the final word. We do not know exactly what the deficit reduction will call for. So while we may reduce today 8.2 percent, the requirement in the final Budget Act may only require 7.5, 5.4, or 3.8.

I think the gentleman is being very magnanimous and I certainly applaud him for his efforts.

Mr. ROE. Mr. Chairman, if the gentleman would indulge in a little bit of colloquy with me on this, I raised concerns, too, in Public Works. I guess we are the first ones on the totem pole to receive this kind of a shock, let us put it that way, or as the distinguished gentleman from Florida says, a little bit of responsibility, which we are.

I think to us, and let me suggest this to the distinguished gentleman from Florida who brought this matter up, to us it is a bit of a crapshoot. I suppose maybe that is not the right word to use on the floor of the House of Representatives, but it connotes that it is a game we play with dice, or the 40 pieces of silver or something like that, as my father taught me.

So what is being suggested to the chairman, and maybe I am moving too fast here, is that it is a crapshoot, but we expect it to be lived up to. In other words, if somebody has some other scheme that goes through the House and they further reduce that, we are not agreeing to that. We are saying this is about the bottom line that we can possibly go to, and there are all kinds of variables involved in this issue.

So I do not think that we could possibly move anywhere beyond that particular figure.

Mr. AUCOIN. Mr. Chairman, I would inquire as to how much time the gentleman from New Jersey [Mr. ROE] has remaining.

The CHAIRMAN. The time of the gentleman from New Jersey [Mr. ROE] has now expired.

(On request of Mr. AUCOIN and by unanimous consent, Mr. ROE was allowed to proceed for 5 additional minutes.)

□ 1725

Mr. AUCOIN. Mr. Chairman, I appreciate the gentleman yielding.

I would have to say to my colleagues that I think the gentleman who is managing this bill is handling a surprise move with a great deal of courtesy to the other side of the aisle and with a great deal of evenhandedness. He has agreed to an 8.2-percent reduction in his cap on the basis of information that CBO says is only peliminary in nature in terms of its calculations, and yet the gentleman has agreed to accept that. I want to compliment him for that.

But at the same time, I would like to make a word of warning to all of my colleagues, and that simply is if this is what we are to expect on every single bill that comes forward until this other matter is resolved, then the House is going to be put in the position of accepting and being locked into an 8.2-percent figure when even CBO said, as the gentleman from Louisiana [Mr. ROEMER] brought out only a few minutes ago, when CBO admitted that these are very, very preliminary data. And I think that is a very dangerous situation to force the House into.

So I for one compliment the gentleman who is managing this bill well, as he always does, but certainly do not want to state that in my judgment this is any precedent for how this Member is going to vote, nor, I hope, how the House will vote on future matters of this kind until the other budget and Gramm/Rudman argument is worked out.

I yield back to the gentleman from New Jersey.

Mr. ROE. I thank the gentleman and I yield back the balance of my time.

The CHAIRMAN. Does the gentleman from Pennsylvania [Mr. WALKER] withdraw his reservation of a point of order?

Mr. WALKER. Yes, Mr. Chairman, I withdraw my point of order.

The CHAIRMAN. The reservation of a point of order is withdrawn.

Mr. HOWARD. Mr. Chairman, I move that the Committee do now rise.

The motion was agreed to.

Accordingly the Committee rose; and the Speaker, having resumed the chair, Mr. BOUCHER, Chairman of the Committee of the Whole House on the State of the Union, reported that that Committee, having had under consideration the bill (H.R. 6) to provide for the conservation and devlopment of water and related resources and the improvement and rehabilitation of the Nation's water resources infrastructure, had come to no resolution thereon.

FURTHER MESSAGE FROM THE SENATE

A message from the Senate by Mr. Sparrow, one of its clerks, announced that the Senate agrees to the report of

the committee of conference on the disagreeing votes of the two Houses on the amendments of the Senate to the joint resolution (H.J. Res. 372) entitled "Joint resolution increasing the statutory limit on the public debt."

The message also announced that the Senate concurs in first House amendment to Senate amendment No. 1.

The message also announced that the Senate concurs in second House amendment to Senate amendment No. 1, with an amendment.

The message also announced that the Senate concurs in House amendment to Senate amendment No. 2, with an amendment.

PUBLIC DEBT LIMIT INCREASE

Mr. GEPHARDT. Mr. Speaker, I ask unanimous consent that when the House considers the Senate amendments to the House amendments to the Senate amendments to House Joint Resolution 372, it first consider motions to dispose of the Senate amendment to the House amendment to Senate amendment No. 2.

The SPEAKER. Is there objection to the request of the gentleman from Missouri?

There was no objection.

PREFERENTIAL MOTION OFFERED BY MR. MACK

Mr. MACK. Mr. Speaker, I offer a preferential motion.

The Clerk read as follows:

Mr. MACK moves to take from the Speaker's table House Joint Resolution 372, with the Senate amendment to the House amendment to Senate amendment No. 2 and to concur in the Senate amendment as follows:

Senate amendment to House amendment to Senate amendment No. 2.

In lieu of the matter proposed to be inserted by the amendment of the House of Representatives, insert:

TITLE II—DEFICIT REDUCTION PROCEDURES

SEC. 201. SHORT TITLE AND TABLE OF CONTENTS.

(a) SHORT TITLE.—This title may be cited as the "Balanced Budget and Emergency Deficit Control Act of 1985".

(b) TABLE OF CONTENTS.—

TITLE II—DEFICIT REDUCTION PROCEDURES

Sec. 201. Short title and table of contents.
Sec. 202. Congressional budget.
Sec. 203. Budget submitted by the President.
Sec. 204. Emergency powers to eliminate deficits in excess of maximum deficit amounts.
Sec. 205. Budgetary treatment of social security trust funds.
Sec. 206. Budget Act waivers.
Sec. 207. Other waivers and suspensions.
Sec. 208. Supplemental budget estimates.
Sec. 209. Point of order.
Sec. 210. Application.
Sec. 211. Exercise of rulemaking power.
Sec. 212. Sense of the Senate.
Sec. 213. Report required.
Sec. 214. Treatment of certain cost-of-living adjustments.
Sec. 215. Conforming amendment to President's budget.
Sec. 216. Expedited review of constitutionality of this title.
Sec. 217. Permanent technical corrections.
Sec. 218. Congressional Budget Office reports.
Sec. 219. Revenue estimates.
Sec. 220. General Accounting Office study.
Sec. 221. Early election of committees of the House.

Sec. 223. Reports on national defense.

SEC. 202. CONGRESSIONAL BUDGET.

(a) ONE CONCURRENT RESOLUTION ON THE BUDGET REQUIRED ANNUALLY.—

(1) IN GENERAL.—Section 310 of the Congressional Budget Act of 1974 is amended—

(A) by striking out the section heading and all that follows through "necessary—" in the matter preceding paragraph (1) of subsection (a) and inserting in lieu thereof the following:

"RECONCILIATION PROCESS

"SEC. 310. (a) IN GENERAL.—Any concurrent resolution on the budget considered under section 301 or section 304 for a fiscal year shall, to the extent necessary—";

(B) by striking out subsection (b) and redesignating subsection (c) as subsection (b); and

(C) by inserting at the end thereof the following new subsection:

"(h) COMPLETION OF RECONCILIATION PROCESS IN THE HOUSE OF REPRESENTATIVES.—It shall not be in order in the House of Representatives to consider any resolution providing for an adjournment period for more than three calendar days during the month of July until the House of Representatives has completed action on the reconciliation legislation for the fiscal year beginning on October 1 of the calendar year to which the adjournment resolution pertains, if reconciliation legislation is required to be reported by the concurrent resolution on the budget for such fiscal year.".

(2) CONFORMING CHANGES.—

(A) The table of contents in subsection (b) of section 1 of the Congressional Budget and Impoundment Control Act of 1974 is amended—

(i) by striking out "Adoption of first concurrent resolution" in the item relating to section 301 and inserting in lieu thereof "Annual adoption of concurrent resolution";

(ii) by striking out "First concurrent resolution" in the item relating to section 303 and inserting in lieu thereof "Concurrent resolution"; and

(iii) by striking out "Second required concurrent resolution and reconciliation" in the item relating to section 310 and inserting in lieu thereof "Reconciliation".

(B) Paragraph (4) of section 3 of such Act is amended—

(i) by adding "and" after the semicolon at the end of subparagraph (A);

(ii) by striking out subparagraph (B); and

(iii) by striking out "(C) any other" and inserting in lieu thereof "(B) a".

(C) Section 300 of the Congressional Budget Act of 1974 is amended to read as follows:

"TIMETABLE

"SEC. 300. The timetable with respect to the congressional budget process for any fiscal year is as follows:

"On or before:	*Action to be completed:*
First Monday after January 3.	*President submits his budget.*
February 15	*Congressional Budget Office submits report to Budget Committees.*
February 25	*Committees submit views and estimates to Budget Committees.*
April 15	*Congress completes action on concurrent resolution on the budget.*
May 15	*Appropriation bills may be considered in the House.*
June 10	*House Appropriations Committee reports last regular appropriation bill.*
June 15	*Congress completes action on reconciliation legislation.*
June 30	*House completes action on regular appropriation bills.*
October 1	*Fiscal year begins.".*

(D)(i) The heading of section 301 of the Congressional Budget Act of 1974 is amended to read as follows:

"ANNUAL ADOPTION OF CONCURRENT RESOLUTION".

(ii) Section 301(a) of such Act is amended by striking out "the first concurrent resolution on the budget" in the first sentence and inserting in lieu thereof "a concurrent resolution on the budget".

(iii) Section 301(b) of such Act is amended—

(I) by striking out "first concurrent resolution on the budget" in the matter preceding paragraph (1) and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)"; and

(II) in paragraph (1) by striking out all beginning with "the concurrent resolution" through "both" the second place it appears and inserting in lieu thereof "the Congress has completed action on any reconciliation bill or reconciliation resolution, or both, required by such concurrent resolution to be reported in accordance with section 310(b)".

(iv) Section 301(c) of such Act is amended by striking out "March 15" and inserting in lieu thereof "February 25".

(v) Section 301(e) of such Act is amended by striking out "first concurrent resolution on the budget" each place it appears and inserting in lieu thereof "concurrent resolution on the budget referred to in subsection (a)".

(vi) Section 301 of such Act is amended by inserting at the end thereof the following new subsections:

"(g) CONSIDERATION OF PROCEDURES OR MATTERS WHICH HAVE THE EFFECT OF CHANGING ANY RULE OF THE HOUSE OF REPRESENTATIVES.—If the Committee on the Budget of the House of Representatives reports any concurrent resolution on the budget which includes any procedure or matter which has the effect of changing any rule of the House of Representatives, such concurrent resolution shall then be referred to the Committee on Rules with instructions to report it within five calendar days (not counting any day on which the House is not in session). The Committee on Rules shall have the jurisdiction to report any concurrent resolution referred to it under this paragraph with an amendment or amendments which change or strike out any such procedure or matter.

"(h) BUDGET COMMITTEES CONSULTATION WITH STANDING COMMITTEES.—The Committee on the Budget of each House shall consult with the standing committees of its House during the preparation, consideration, and enforcement of the concurrent

resolution on the budget with respect to all matters which relate to the jurisdiction or functions of such committees.".

(E) Section 302(c) of such Act is amended by striking out "or 310".

(F)(i) The heading of section 303 of such Act is amended by striking out "FIRST".

(ii) Section 303(a) of such Act is amended by striking out "first concurrent resolution on the budget for such fiscal year has been agreed to pursuant to section 301" in the matter following paragraph (4) and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a) for such fiscal year has been agreed to".

(G) Section 303(a) of such Act is amended—

(i) by striking out "or" at the end of paragraph (3),

(ii) by inserting "or" at the end of paragraph (4), and

(iii) by adding the following new paragraph:

"(5) new credit authority for a fiscal year;".

(H) Section 304 of such Act is amended—

(i) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)"; and

(ii) by striking out "pursuant to section 301".

(I)(i) Section 305(a)(3) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(ii) Section 305(b) of such Act is amended—

(I) in paragraph (1) by striking out ", except that" and all that follows through "15 hours"; and

(II) in paragraph (3) by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(J) Section 307 of such Act is amended to read as follows:

"HOUSE COMMITTEE ACTION ON ALL APPROPRIATION BILLS TO BE COMPLETED BY JUNE 10

"SEC. 307. On or before June 10 of each year, the Committee on Appropriations of the House of Representatives shall report bills and resolutions providing new budget authority under the jurisdiction of all of its subcommittees for the fiscal year which begins on October 1 of that year.".

(K) Section 308(a)(2)(A) of such Act is amended by striking out "first concurrent resolution on the budget" and inserting in lieu thereof "concurrent resolution on the budget referred to in section 301(a)".

(L) Section 309 of such Act is amended to read as follows:

"HOUSE APPROVAL OF REGULAR APPROPRIATION BILLS

"SEC. 309. It shall not be in order in the House of Representatives to consider any resolution providing for an adjournment period of more than three calendar days during the month of July until the House of Representatives has approved bills and resolutions providing new budget authority under the jurisdiction of all the subcommittees of the Committee on Appropriations for the fiscal year beginning on October 1 of such year, other than supplemental, deficiency, and continuing appropriation bills and resolutions.".

(M) Section 310(f) of such Act is amended by striking out "subsection (a)" and inserting in lieu thereof "section 301(a)".

(N) Section 311(a) of such Act is amended—

(i) by striking out "310(a)" the first place it appears and inserting in lieu thereof "301(a)"; and

(ii) by striking out "310(c)" and inserting in lieu thereof "310(b)".

(b) MAXIMUM DEFICIT AMOUNTS.—

(1) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(A) POINT OF ORDER.—Section 301 of the Congressional Budget Act of 1974 is amended by redesignating subsections (c), (d), and (e) as subsections (d), (e), and (f), respectively, and inserting after subsection (b) the following new subsection:

"(c) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1)(A) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider any concurrent resolution on the budget for a fiscal year under this section, or to consider any amendment to such a concurrent resolution, or to consider a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(B) In the House of Representatives the point of order established under subparagraph (A) with respect to the consideration of a conference report or with respect to the consideration of a motion to concur, with or without an amendment or amendments, in a Senate amendment, the stage of disagreement having been reached, may be waived only by three-fifths of the Members voting for or against the waiver, a quorum being present.

"(2) Paragraph (1) of this subsection shall not apply if a declaration of war by the Congress is in effect.".

(B) CONFORMING CHANGES.—

(i) Section 301(a)(6) of such Act is amended by striking out "subsection (e)" and inserting in lieu thereof "subsection (f)".

(ii) Section 301(e) of such Act, as redesignated by clause (i) of this subparagraph, is amended by inserting "; and when so reported such concurrent resolution shall comply with the requirement described in paragraph (1) of subsection (c), unless such paragraph does not apply to such fiscal year by reason of paragraph (2) of such subsection" after "October 1 of such year" in the third sentence thereof.

(2) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—Section 304 of such Act is amended—

(A) by inserting "(a) IN GENERAL.—" after "SEC. 304."; and

(B) by adding at the end thereof the following new subsection:

"(b) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—

"(1)(A) Except as provided in paragraph (2), it shall not be in order in either the House of Representatives or the Senate to consider any concurrent resolution on the budget for a fiscal year under this section, or to consider any amendment to such a concurrent resolution, or to consider a conference report on such a concurrent resolution, if the level of total budget outlays for such fiscal year that is set forth in such concurrent resolution or conference report (or that would result from the adoption of such amendment), exceeds the recommended level of Federal revenues for that year by an amount that is greater than the maximum deficit amount specified for such fiscal year in section 3(7).

"(B) In the House of Representatives the point of order established under subparagraph (A) with respect to the consideration of a conference report or with respect to the consideration of a motion to concur, with or without an amendment or amendments, in a Senate amendment, the stage of disagreement having been reached, may be waived only by three-fifths of the Members voting for or against the waiver, a quorum being present.

"(2) Paragraph (1) of this subsection shall not apply if a declaration of war by the Congress is in effect.".

(3) DEFINITIONS.—Section 3 of the Congressional Budget and Impoundment Control Act of 1974 is amended by adding at the end thereof the following new paragraphs:

"(6) The term 'deficit' means, with respect to any fiscal year, the amount by which total budget outlays for such fiscal year exceed total revenues for such fiscal year. For purposes of the Balanced Budget and Emergency Deficit Control Act of 1985 (and notwithstanding section 710(a) of the Social Security Act), the receipts of the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund for a fiscal year, and the taxes payable under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954 during such fiscal year, shall be included in total revenues for such fiscal year, and the disbursements of each such Trust Fund for such fiscal year shall be included in total budget outlays for such fiscal year. Notwithstanding any other provision of law, for all purposes of the Balanced Budget and Emergency Deficit Control Act of 1985, the budget authority and outlays of each off-budget Federal entity for a fiscal year shall be included in total budget authority, total budget outlays, and the amounts of budget authority and outlays set forth for each major functional category, for such fiscal year. Amounts paid by the Federal Financing Bank for the purchase of loans made or guaranteed by a department, agency, or instrumentality of the Government of the United States shall be treated as outlays of that department, agency, or instrumentality.

"(7) The term 'maximum deficit amount' means—

"(A) with respect to the fiscal year beginning October 1, 1985, $180,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(E) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(F) with respect to the fiscal year beginning October 1, 1990, zero.

"(8) The term 'off-budget Federal entity' means any entity—

"(A) established by Federal law, and

"(B) the budget outlays of which are required by law to be excluded from the totals of—

"(i) the budget of the United States Government submitted by the President pursuant to section 1105 of title 31, United States Code, and

"(ii) the budget adopted by the Congress pursuant to title III of this Act.

"(9) The term "credit authority" means authority to incur direct loan obligations or

to incur primary loan guarantee commitments.".

(c) RECONCILIATION.—

(1) ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

(A) DIRECTIONS TO COMMITTEES.—Section 301(b) of the Congressional Budget Act of 1974 is further amended—

(i) by striking out "may also require" in the matter preceding paragraph (1) and inserting in lieu thereof "shall also, to the extent necessary to comply with subsection (c)";

(ii) by inserting "require" after the paragraph designation in paragraph (1);

(iii) by inserting "require" after the paragraph designation in paragraph (2); and

(iv) by redesignating paragraphs (1) and (2) as paragraphs (2) and (3), respectively, and inserting before paragraph (2) (as so redesignated) the following new paragraph:

"(1) specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a);".

(B) CONFORMING CHANGES.—

(i) Section 310(a) of such Act is amended—

(I) by inserting "or" at the end of paragraph (2);

(II) by striking out "; or" at the end of paragraph (3) and inserting in lieu thereof a period; and

(III) by striking out paragraph (4).

(ii) Section 310(d) of such Act is amended by striking out "subsection (c)" and all that follows through "year" and inserting in lieu thereof "subsection (b) with respect to a concurrent resolution on the budget adopted under section 301(a) not later than June 15 of each year".

(iii) Subsections (e) and (f) of section 310 of such Act are amended by striking out "subsection (c)" each place it appears and inserting in lieu thereof "subsection (b)".

(2) PERMISSIBLE REVISIONS OF CONCURRENT RESOLUTIONS ON THE BUDGET.—

(A) IN GENERAL.—Section 304(a) of such Act (as redesignated by paragraph (2)(A) of subsection (b)) is amended by adding after the period the following new sentence: "Any concurrent resolution agreed to under this section shall specify and direct any combination of the matters described in paragraphs (1), (2), and (3) of section 310(a) to the extent necessary to comply with subsection (b).".

(B) CONFORMING CHANGE.—Section 310(d) of such Act (as amended by paragraph (1)(B) of this subsection) is further amended by adding at the end thereof the following new sentence: "Congress shall complete action on any reconciliation bill or reconciliation resolution reported under subsection (b) with respect to a concurrent resolution on the budget adopted under section 304(a) not later than 30 days after the adoption of the concurrent resolution.".

(d) LIMITATION ON AMENDMENTS.—

(1) CONCURRENT RESOLUTIONS ON THE BUDGET.—

(A) HOUSE OF REPRESENTATIVES.—Section 305(a) of such Act is amended to read as follows:

"PROVISIONS RELATING TO THE CONSIDERATION OF CONCURRENT RESOLUTIONS ON THE BUDGET

"SEC. 305. (a) PROCEDURE IN HOUSE OF REPRESENTATIVES AFTER REPORT OF COMMITTEE; DEBATE.—

"(1) When the Committee on the Budget of the House has reported any concurrent resolution on the budget, it is in order at any time after the fifth day (excluding Saturdays, Sundays, and legal holidays) following the day on which the report upon such resolution by the Committee on the Budget has been available to Members of the House and, if applicable, after the first day (excluding Saturdays, Sundays, and legal holidays) following the day on which a report upon such resolution by the Committee on Rules pursuant to section 301(c) has been made available to Members of the House (even though a previous motion to the same effect has been disagreed to) to move to proceed to the consideration of the concurrent resolution. The motion is highly privileged and is not debatable. An amendment to the motion is not in order, and it is not in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

"(2) General debate on any concurrent resolution on the budget in the House of Representatives shall be limited to not more than 10 hours, which shall be divided equally between the majority and minority parties, plus such additional hours of debate as are consumed pursuant to paragraph (3). A motion further to limit debate is not debatable. A motion to recommit the concurrent resolution is not in order, and it is not in order to move to reconsider the vote by which the concurrent resolution is agreed to or disagreed to.

"(3) Following the presentation of opening statements on the concurrent resolution on the budget for a fiscal year by the chairman and ranking minority member of the Committee on the Budget of the House, there shall be a period of up to four hours for debate on economic goals and policies.

"(4) Only if a concurrent resolution on the budget reported by the Committee on the Budget of the House sets forth the economic goals (as described in sections 3(a)(2) and 4(b) of the Full Employment Act of 1946) which the estimates, amounts, and levels (as described in section 301(a)) set forth in such resolution are designed to achieve, shall it be in order to offer to such resolution an amendment relating to such goals, and such amendment shall be in order only if it also proposes to alter such estimates, amounts, and levels in germane fashion in order to be consistent with the goals proposed in such amendment.

"(5) Consideration of any concurrent resolution on the budget by the House of Representatives shall be in the Committee of the Whole, and the resolution shall be considered for amendment under the five-minute rule in accordance with the applicable provisions of rule XXIII of the Rules of the House of Representatives. After the Committee rises and reports the resolution back to the House, the previous question shall be considered as ordered on the resolution and any amendments thereto to final passage without intervening motion; except that it shall be in order at any time prior to final passage (notwithstanding any other rule or provision of law) to adopt an amendment (or a series of amendments) changing any figure or figures in the resolution as so reported to the extent necessary to achieve mathematical consistency.

"(6) Debate in the House of Representatives on the conference report on any concurrent resolution on the budget shall be limited to not more than 5 hours, which shall be divided equally between the majority and minority parties. A motion further to limit debate is not debatable. A motion to recommit the conference report is not in order, and it is not in order to move to reconsider the vote by which the conference report is agreed to or disagreed to.

"(7)(A) Appeals from decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to any concurrent resolution on the budget shall be decided without debate.

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in such concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply if a declaration of war by the Congress is in effect.".

(B) SENATE.—Section 305(b)(2) of such Act is amended—

(i) by inserting "(A)" before the paragraph designation; and

(ii) by adding at the end thereof the following new subparagraph:

"(B)(i) No amendment that would have the effect of increasing any specific budget outlays above the level of such outlays set forth in a concurrent resolution on the budget, or of reducing any specific Federal revenues below the level of such revenues set forth in such concurrent resolution, shall be in order unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the concurrent resolution is not increased, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof.

"(ii) Clause (i) of this subparagraph shall not apply if a declaration of war by the Congress is in effect.".

(2) RECONCILIATION BILLS AND RESOLUTIONS.—Section 310 of such Act is amended by inserting after subsection (b) (as redesignated by subsection (a)(1)(C)) the following new subsection:

"(c) LIMITATION ON AMENDMENTS TO RECONCILIATION BILLS AND RESOLUTIONS.—

"(1)(A) It shall not be in order in the Senate to consider any amendment to a reconciliation bill or reconciliation resolution if such amendment would have the effect of increasing any specific budget outlays above the level of such outlays provided in the bill or resolution, or would have the effect of reducing any specific Federal revenues below the level of such revenues provided in the bill or resolution, unless such amendment ensures that the amount of the deficit for any fiscal year set forth in the most recently agreed to concurrent resolution on the budget is not exceeded, by making at least an equivalent reduction in other specific budget outlays or at least an equivalent increase in other specific Federal revenues, or at least any equivalent combination thereof, except that a motion to strike a provision shall always be in order.

"(B) In the House of Representatives, no provision shall be reported in any reconciliation bill, or be in order as an amendment thereto, which is not related to achieving the purposes of the directives to committees contained in the most recently agreed to concurrent resolution: Provided, That nothing in this subparagraph shall be construed to prevent the consideration of any provision in a reconciliation bill or, or any amendment thereto, which only achieves savings greater than those directed of a committee,

or to prevent the consideration of motions to strike made in order by the Committee on Rules to achieve the purposes of the directives. For the purposes of this paragraph, a provision shall be considered related to achieving the purposes of directives contained in the most recently agreed to budget resolution if it is estimated by the Committee on the Budget, in consultation with the Congressional Budget Office, to effectuate or implement a reduction in budget authority or in new spending authority described in section 401(c)(2)(C), or to raise revenues, or both, and, in the case of an amendment, if it is within (in whole or in part) the jurisdiction of any committees instructed in the concurrent resolution. The point of order in this subparagraph shall not apply to Senate amendments or to conference reports.

"(2) Paragraph (1) shall not apply if a declaration of war by the Congress is in effect.".

(e) ENFORCEMENT.—

(1) ALLOCATIONS OF BUDGET AUTHORITY AND OUTLAYS.—

(A) REPORTING DATE FOR ALLOCATIONS.—Section 302(b) of such Act is amended by striking out "Each such committee shall promptly report" in the last sentence and inserting in lieu thereof "Each such committee, within ten days of session after the concurrent resolution is agreed to, shall report".

(B) POINT OF ORDER.—It shall not be in order in the House of Representatives or the Senate to consider any bill or resolution, or amendment thereto, providing—

(i) new budget authority for any fiscal year;

(ii) new spending authority described in section 401(c)(2)(C) of the Congressional Budget Act first effective in any fiscal year; or

(iii) direct loan authority, primary loan guarantee authority, or secondary loan guarantee authority for any fiscal year;

within the jurisdiction of any committee which has received an allocation of budget authority or new spending authority described in section 401(c)(2)(C) pursuant to section 302(a) of the Congressional Budget Act for a fiscal year, unless and until such committee makes the allocation or subdivisions required by section 302(b) of the Congressional Budget Act, in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year.

(C) ALLOCATIONS MADE BINDING.—Section 311 of such Act is amended by redesignating subsections (a) and (b) as subsections (b) and (c), respectively, and inserting immediately after "SEC. 311" the following new subsection:

"(a) LEGISLATION SUBJECT TO POINT OF ORDER AFTER ADOPTION OF ANNUAL CONCURRENT RESOLUTION ON THE BUDGET.—

"(1) IN GENERAL.—At any time after the Congress has completed action on the concurrent resolution on the budget required to be reported under section 301(a) for a fiscal year, it shall not be in order—

"(A) in the Senate—

"(i) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for budget outlays or new budget authority in excess of the appropriate allocation of such outlays or authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(ii) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides new spending authority described in section 401(c)(2)(C) to become effective during such fiscal year, if the amount of budget outlays or new budget authority that would be required for such year if such bill or resolution were enacted without change or such amendment were adopted would exceed the appropriate allocation of budget outlays or new budget authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year, unless such bill, resolution, or amendment was favorably reported by the Committee on Appropriations of the House involved under section 401(b)(2) along with a certification that if such bill, resolution, or amendment is enacted or adopted, the committee will reduce appropriations or take any other actions necessary to assure that the enactment or adoption of such bill, resolution, or amendment will not result in a deficit for such fiscal year in excess of the maximum deficit amount specified for such fiscal year in section 3(7); or

"(B) In the House of Representatives—

"(i) to consider any bill or resolution (including a conference report thereon), or any amendment to a bill or resolution, that provides for new budget authority or new spending authority described in section 401(c)(2)(C) in excess of the appropriate allocation of such authority reported under section 302(b) in connection with the most recently agreed to concurrent resolution on the budget for such fiscal year; or

"(ii) the point of order established under subparagraph (B)(i) may be waived only by three-fifths of the Members voting for or against the waiver, a quorum being present.

"(2) ALTERATION OF 302(b) ALLOCATIONS.—At any time after a committee reports the allocations required to be made under section 302(b), such committee may report to its House an alteration of such allocations. Any such alteration of allocations must be consistent with any actions already taken by its House on legislation within the committee's jurisdiction.

"(3) EXCEPTION.—Paragraph (1) shall not apply if a declaration of war by the Congress is in effect.".

(D) CONFORMING CHANGE.—Section 311(c) of such Act (as redesignated by subparagraph (C)) is amended by striking out "subsection (a)" and inserting in lieu thereof "subsections (a) and (b)".

(2) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 311(b) of such Act, as redesignated by paragraph (1)(C) of this subsection, is amended by inserting before the period at the end thereof the following: "or, in the Senate, would otherwise result in a deficit for such fiscal year that exceeds the maximum deficit amount specified for such fiscal year in section 3(7) (except to the extent that paragraph (1) of section 301(c) or section 304(b), as the case may be, does not apply by reason of paragraph (2) of such subsection)".

(3) REPORTING REQUIREMENT EXTENDED TO CONFERENCE REPORTS.—Section 308(a) of such Act is amended by striking out "the report accompanying that bill or resolution" in the matter preceding paragraph (1) and inserting in lieu thereof the following: "or whenever a conference report is filed in either House, the report accompanying that bill or resolution or the statement of managers accompanying that conference report".

SEC. 203. BUDGET SUBMITTED BY THE PRESIDENT.

(a) MAXIMUM DEFICIT AMOUNT MAY NOT BE EXCEEDED.—Section 1105 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(f)(1) The budget transmitted pursuant to subsection (a) for a fiscal year shall be prepared on the basis of the best estimates then available, in such a manner as to ensure that the deficit for such fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

"(2) Subject to paragraph (3) of this subsection, the deficit set forth in the budget so transmitted for any fiscal year shall not exceed the maximum deficit amount specified for such fiscal year in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974, with budget outlays and Federal revenues at such levels as the President may consider most desirable and feasible.

"(3) Paragraph (2) shall not apply if a declaration of war by the Congress is in effect.".

(b) REVISIONS AND SUPPLEMENTAL SUMMARIES.—Section 1106 of title 31, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) Subsection (f) of section 1105 shall apply to revisions and supplemental summaries submitted under this section to the same extent that such subsection applies to the budget submitted under section 1105(a) to which such revisions and summaries relate.".

SEC. 204. EMERGENCY POWERS TO ELIMINATE DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.

(a) REPORTING OF DEFICITS IN EXCESS OF MAXIMUM DEFICIT AMOUNTS.—

(1) IN GENERAL.—The Director of the Office of Management and Budget and the Director of the Congressional Budget Office (hereafter in this section referred to as "the Directors") shall, with respect to any fiscal year (A) estimate the base levels of total revenues and total budget outlays for such fiscal year, (B) determine whether the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year and whether such excess is statistically significant, and (C) estimate the rate of real economic growth that will occur during such fiscal year and the rate of economic growth that will occur during each quarter of such fiscal year. The Directors jointly shall issue a report to the Comptroller General on December 10 of the fiscal year beginning October 1, 1985, and on September 15 preceding each succeeding fiscal year identifying the amount of any excess, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year and for each quarter of such fiscal year, and specifying the uniform percentage by which automatic spending increases shall be reduced during such fiscal year and the uniform percentage by which controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. In the event that the Directors are unable to agree on an amount to be set forth with respect to any item in any such report, the amount set forth for such item in such report shall be the average of the amounts proposed by each of them with respect to such item. The Directors shall make such report public on the day on which it is transmitted to the Comptroller General. The Comptroller General shall consider the report issued by the Directors for a fiscal year and, with due regard for the data, assumptions, and methodologies used in reaching the conclusions set forth therein, the Comptroller General shall issue a report to the President and the Congress not later than December 15 (for fiscal year 1986) and the September 25 preceding each fiscal year thereafter (for fiscal years 1987 through

1991), estimating the base levels of total revenues and total budget outlays for such fiscal year, identifying the amount by which the deficit for such fiscal year will exceed the maximum deficit amount for such fiscal year, stating whether such excess is statistically significant, specifying the estimated rate of real economic growth for such fiscal year and for each quarter of such fiscal year, and specifying the uniform percentage by which automatic spending increases shall be reduced during such fiscal year and the uniform percentage by which controllable expenditures shall be reduced during such fiscal year in order to eliminate any such excess. The report of the Comptroller General shall explain fully any differences between the contents of such report and the report of the Directors.

(2) EXCEPTION.—Paragraph (1) shall not apply if a declaration of war by the Congress is in effect.

(b) PRESIDENTIAL ORDER.—

(1) CONTENTS.—

(A) IN GENERAL.—Upon receipt of any report from the Comptroller General under subsection (a) of this section which identifies a statistically significant amount by which the deficit for a fiscal year will exceed the maximum deficit amount for such fiscal year, the President shall eliminate the full amount of the deficit excess by issuing an order, in accordance with subparagraph (B), that—

(i) subject to the succeeding subparagraphs, and notwithstanding the Impoundment Control Act of 1974, eliminates one-half of such excess by modifying or suspending the operation of each provision of Federal law that would (but for such order) require an automatic spending increase to take effect during such fiscal year, in such a manner as to reduce (but not below zero) the amount of the outlay increase under each such provision by a uniform percentage, and

(ii) subject to the succeeding subparagraphs, and notwithstanding the Impoundment and Control Act of 1974, eliminates one-half of such excess by sequestering from each affected program, project, or activity (as defined in the most recently enacted relevant appropriations Acts and accompanying committee reports) or from each affected account if not so defined, for funds provided in annual appropriations Acts or, otherwise from each budget account, such amounts of budget authority, obligation limitation, other budgetary resources, and loan limitation, and by adjusting payments provided by the Federal Government, to the extent necessary to reduce the outlays for each controllable expenditure by a uniform percentage; and

shall transmit to both Houses of the Congress a message—

(iii) identifying—

(I) the total amount and the percentage by which automatic spending increases are to be reduced under clause (i) of this subparagraph;

(II) the total amount of budget authority, obligation limitations, loan limitations, and other budgetary resources which is to be sequestered under clause (ii) of this subparagraph with respect to controllable expenditures;

(III) the amount of budget authority, obligation limitations, loan limitations, and other budgetary resources which is to be sequestered with respect to each such controllable expenditure in order to reduce it by the required percentage; and

(IV) the account, department, or establishment of the Government to which each amount of budget authority, obligation limitations, loan limitations, and other budgetary resources described in clause (ii) of this subparagraph would be available for obligation; and

(iv) providing full supporting details with respect to each action to be taken under clause (i) or (ii) of this subparagraph.

Upon receipt in the Senate and the House of Representatives, the message shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it.

(B) EXCEPTION.—If, in order to reduce by one-half the amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year, actions under subparagraph (A)(i) would require the reduction of automatic spending increases below zero, then, in order not to require such reductions below zero, the remaining amount shall be achieved through further uniform reductions under subparagraph (A)(ii).

(C) LIMITATION.—No action taken by the President under clause (i) or (ii) of subparagraph (A) shall have the effect of eliminating any program, project, or activity of the Federal Government.

(D) LIMITATION.—Any automatic spending increases modified or suspended, or any amounts of budget authority, obligation limitation, other budgetary resources, or loan limitations sequestered by an order of the President under this title are permanently cancelled, and the legal rights, if any, of persons to receive such automatic spending increases shall be deemed to be extinguished to the extent that the operation of laws providing for such increases are modified or suspended by such an order. Notwithstanding any other provision of law, any change in the Consumer Price Index or any other index measuring costs, prices, or wages (or in any component of any such index) that is not taken into account for purposes of determining the amount of an automatic spending increase (if any) for a fiscal year for which an order is issued pursuant to subparagraph (A) shall not be taken into account for purposes of determining any automatic spending increase during any fiscal year thereafter.

(E) LIMITATION.—Nothing in clause (i) or (ii) of subparagraph (A) shall be construed to give the President new authority to alter the relative priorities in the Federal budget that are established by law, and no person who is, or becomes, eligible for benefits under any provision of law shall be denied eligibility by reason of this title.

(F) BASE LEVELS.—

(i) IN GENERAL.—Any order issued by the President under this paragraph shall use the base levels of total revenues and total budget outlays (as defined in paragraph (11) of subsection (d)) and the uniform percentage reductions specified in the report issued by the Comptroller General pursuant to subsection (a), adjusted, as provided in clause (ii), for any laws enacted or regulations promulgated between the date the base levels for such report were established and the date of such order. The order shall also use the same economic and technical assumptions used in the report issued by the Comptroller General pursuant to subsection (a).

(ii) ADJUSTMENTS FOR INTERVENING LEGISLATION.—

(I) With respect to legislation enacted or regulations promulgated after an estimation of base levels under subsection (a)(1) for a fiscal year but before the date of the report of the Comptroller General under such subsection for such fiscal year and which have budgetary impact, the Directors shall transmit to the Comptroller General on September 24 a joint report estimating the budgetary impact of such legislation or regulations. On September 25, the Comptroller General shall transmit to the President and to the Congress a report estimating the cost of such legislation or regulations, with due regard for the contents of the Directors' report, and stating his reasons for any divergence therefrom.

(II) With respect to legislation enacted or rules promulgated after the date of the report of the Comptroller General under subsection (a)(1) for a fiscal year but before the date of an order issued under subsection (b)(1) for such fiscal year and which have budgetary impact, the Directors shall transmit to the Comptroller General on each day on which legislation is enacted or rules are promulgated a joint report estimating the budgetary impact of such legislation or regulations. On the same day on which the Directors' report is received, the Comptroller General shall transmit to the President and to the Congress a report estimating the budgetary impact of such legislation or regulations, with due regard for the contents of the Directors' report, and stating his reasons for any divergence therefrom.

(G) FEDERAL PAY.—For purposes of any order issued under subparagraph (A), Federal pay under statutory pay systems (within the meaning of section 5301(c) of title 5, United States Code) and pay of members of the uniformed services (as defined in section 101(3) of title 37, United States Code) shall be treated as controllable expenditures and shall be subject to the uniform percentage reduction under the order; except that (i) no such order may reduce the rate of pay (in the case of a civilian officer or employee of the Government) or the rate of basic pay (in the case of a member of the uniformed services) to which any individual is entitled on the effective date of the order under any such statutory pay system or title 37, United States Code, as the case may be, and (ii) any increase in such rates of pay or rates of basic pay which is scheduled to take effect under section 5305 of title 5, United States Code, section 1009 of title 37, United States Code, or any other provision of law may be reduced under such order only by the uniform percentage reduction.

(H) TREATMENT OF OFF-BUDGET ENTITIES.—Notwithstanding any other provision of law, outlays for each off-budget Federal entity (as defined in section 3(8) of the Congressional Budget and Impoundment Control Act of 1974) shall be subject to uniform percentage reductions under any order issued under subparagraph (A). Amounts paid by the Federal Financing Bank for the purchase of loans made or guaranteed by a department, agency, or instrumentality of the Government of the United States shall be treated as outlays of that department, agency, or instrumentality.

(I) MEDICARE PROGRAM AND ADMINISTRATIVE EXPENSES OF SOCIAL SECURITY TRUST FUNDS.—(i) Reductions pursuant to the order issued under subparagraph (A) of this paragraph shall apply to payments under title XVIII of the Social Security Act so as to reduce all payments under such title for items or services furnished during the period of the order by the uniform percentage reduction specified in such order.

(ii) Payments which are made under such title from annual appropriations and payments for administrative expenses which are made pursuant to limitations on expendi-

tures from the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, or the Federal Supplemental Medical Insurance Trust Fund contained in annual appropriations Acts, shall be reduced for the period of the order by the uniform percentage reduction specified in the order.

(iii) The President may not, pursuant to any authority granted in this section, increase any deductible, coinsurance amount, or premium amount under such title.

(iv) This clause shall not apply to payments for clinical diagnostic laboratory tests to which section 1833(h) the Social Security Act applies.

(J) MEDICAID PROGRAM.—Reductions pursuant to the order issued under subparagraph (A) of this paragraph shall apply to payments under title XIX of the Social Security Act so as to reduce all payments to States under such title for State expenditures for medical assistance furnished, and administrative expenses incurred, during the period of the order by the uniform percentage reduction specified in the order.

(K) AFDC, FOSTER CARE, AND ADOPTION ASSISTANCE.—Reductions pursuant to the order issued under subparagraph (A) of this paragraph shall apply to payments under parts A and E of title IV of the Social Security Act so as to reduce all payments to States under such parts for State expenditures for aid to families with dependent children, foster care maintenance payments, adoption assistance payments, and administrative expenses, made during the period of the order by the uniform percentage reduction specified in the order.

(L) PROHIBITION ON ALTERING PAYMENT TIMETABLE.—No State may, after the date of the enactment of this Act, change the timetable for making payments under a State plan approved under title XIX of the Social Security Act or under part A or E of title IV of such Act, which has the effect of changing the fiscal year in which expenditures under such title or part are made.

(M) UNEMPLOYMENT COMPENSATION.—(i) The order under subparagraph (A) of this paragraph shall not apply to payments of regular unemployment compensation made by a State from amounts in the State's account in the Unemployment Trust Fund, and shall not apply to loans to States made under title XII of the Social Security Act.

(ii) The reduction required pursuant to the order issued under subparagraph (A) of this paragraph shall apply to Federal payments made under the Federal-State Extended Unemployment Compensation Act of 1970 so as to reduce payments to States for extended compensation (or sharable regular compensation) for weeks of unemployment occurring during the period of the order by the uniform percentage reduction specified in the order.

(iii) The reductions required pursuant to the order issued under subparagraph (A) of this paragraph shall apply to amounts payable to States pursuant to titles III and IX of the Social Security Act and under the Wagner-Peyser Act so as to reduce payments to States under such provisions for the period of the order by the uniform percentage reduction specified in the order.

(N) TREATMENT OF CERTAIN BENEFITS.—For purposes of clause (i) of subparagraph (A), increases in black lung benefits and special benefits for disabled coal miners which are required by reason of increases in Federal pay shall be considered to be indexed by such Federal pay increases.

(O) TREATMENT OF CHILD SUPPORT ENFORCEMENT PROGRAM.—Any order issued by the President under subparagraph (A) shall accomplish the full amount of the required reduction in expenditures under the child support enforcement program (established by part D of title IV of the Social Security Act) by reducing the Federal matching rate for State administrative costs under such program, as specified (for the fiscal year involved) in section 455(a) of such Act, to the extent necessary (as provided in the report submitted under section 203 of this title) to reduce such expenditures by that amount.

(P) FISCAL YEAR 1986 REDUCTIONS.—In the case of fiscal year 1986, the reductions and sequestrations required by the order issued pursuant to subparagraph (A) of this paragraph shall be pro rated on the basis of the number of remaining months in such fiscal year.

(Q) COMMODITY CREDIT CORPORATION.—

(i) REDUCTION IN PAYMENTS MADE UNDER CONTRACTS.—After an order is issued under subparagrah (A) for a fiscal year, any payment made by the Commodity Credit Corporation—

(I) under the terms of any contract entered into in such fiscal year; and

(II) out of an entitlement account,

to any person (including any producer, lender, or guarantee entity) shall be deemed to be a controllable expenditure and shall be subject to reduction under the order. Any contract entered into in a fiscal year after an order has been issued under subparagraph (A) for such fiscal year shall provide explicitly for such reduction to be made for the entire period for which such contract is in effect and that in regard to commodity loans made to producers or producer cooperatives for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions.

(ii) REDUCTION IN NONCONTRACTUAL PRICE SUPPORT PROGRAMS.—Price support provided for an agricultural commodity through the Commodity Credit Corporation by a method other than a payment of the type described in clause (i) shall be deemed to be a controllable expenditure, and such level of price support for the fiscal year for which an order is issued under this subsection shall be subject to reduction under the order.

(iii) ADJUSTMENTS TO ACHIEVE REDUCTIONS.—In order to reduce expenditures for programs of the Commodity Credit Corporation as required under the Presidential order, the Secretary of Agriculture is authorized to adjust both target prices and loan rates in such a manner as to achieve the required percentage reduction of such order.

(iv) OPERATING AND ADMINISTRATIVE EXPENSES.—Operating and administrative expenses of the Commodity Credit Corporation shall be considered controllable expenditures and shall be subject to reduction under the order.

(v) UNIFORM PERCENTAGE RATE OF REDUCTION.—All reductions described in clauses (i), (ii), (iii), and (iv) required to be made in connection with an order issued under subparagraph (A) for a fiscal year shall be made at a uniform percentage rate and may not be made at a rate exceeding the rate of reduction specified in the order for the programs to which such subsections apply.

(R) TREATMENT OF LENDING ACTIVITIES OF ENTITIES PROVIDING FEDERAL GUARANTEES FOR STUDENT LOANS.—For the purposes of this title, the lending activities of entities providing Federal guarantees for student loans shall be deemed to be controllable expenditures. Actions taken in response to an order issued under this subsection shall include, but not be limited to, the following:

(i) With respect to loans granted after such an order has been issued, the reduction of the special allowance factor paid to a lender by not more than 0.40 percentage points in the first year of the loan only, but in no case would the statutory special allowance component be reduced below 3.00 percent, except that during the remaining life of the loan, the special allowance factor paid to the lender shall be that provided by the Higher Education Act of 1965, as amended.

(ii) With respect to loans granted after such an order has been issued, the increase of a student's origination fee by an amount not in excess of 0.50 percentage points.

(2) ISSUANCE OF ORDER.—

(A) POSITIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted by the Comptroller General under subsection (a) of this section is zero or greater, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 14 days after transmittal of such report.

(B) NEGATIVE REAL ECONOMIC GROWTH.—If the estimate of real economic growth set forth in a report transmitted by the Comptroller General under subsection (a) of this section is less than zero with respect to such fiscal year or with respect to each of any two consecutive quarters of such fiscal year, the President shall issue the order required to be issued under this subsection pursuant to such report not later than 30 days after transmittal of such report.

(C) SPECIAL RULE.—If any adjustment made pursuant to paragraph (1)(F) eliminates the entire deficit excess, the order issued pursuant to this subsection shall so state, and no reductions shall be made pursuant to clauses (i) and (ii) of subparagraph (A).

(3) EFFECTIVE DATE.—

(A) IN GENERAL.—Except to the extent that it is superseded by a reconciliation bill enacted under subsection (c) of this section, an order issued pursuant to this subsection shall become effective 30 days after its issuance. Any modification or suspension by such order of the operation of a provision of law that would (but for such order) require an automatic spending increase to take effect during a fiscal year shall apply for the one-year period beginning with the date on which such automatic increase would have taken effect during such fiscal year (but for such order).

(B) WITHHOLDING OF BUDGET AUTHORITY FOR 30-DAY PERIOD.—During the 30-day period referred to in subparagraph (A), the President shall withhold from obligation the amounts that would have been suspended or sequestered under such order with respect to such 30-day period if the order issued pursuant to this paragraph had become effective on the date of its issuance. If a reconciliation bill enacted under subsection (c) of this section becomes law on or before the last day of such 30-day period, amounts withheld from obligation pursuant to the preceding sentence shall be made available for obligation to the extent permitted by such reconciliation bill. If such a reconciliation bill does not become law during such period, the budget authority withheld from obligation under the first sentence of this subparagraph shall be permanently cancelled as described in paragraph (1)(D) of this subsection.

(4) PROPOSAL OF ALTERNATIVES.—A message transmitted pursuant to this subsection

with respect to a fiscal year may be accompanied by a proposal setting forth in full detail alternative ways to reduce the deficit for such fiscal year to an amount not greater than the maximum deficit amount for such fiscal year. Upon receipt in the Senate and the House of Representatives, the message and any accompanying proposal shall be referred to all committees with jurisdiction over programs, projects, or activities affected by it.

(c) CONGRESSIONAL ACTION.—

(1) REPORTING OF CONCURRENT RESOLUTIONS AND RECONCILIATION BILLS AND RESOLUTIONS.—

(A) IN GENERAL.—Not later than 10 days after issuance of an order by the President under subsection (b) with respect to a fiscal year, the Committee on the Budget of the House of Representatives and the Senate may report to its House a concurrent resolution. The concurrent resolution may affirm the impact of the order issued under subsection (b), in whole or in part. To the extent that any part of the order is not affirmed, the concurrent resolution shall state which parts are not affirmed and shall contain instructions to committees of the House and the Senate of the type referred to in section 310(a) of the Congressional Budget Act of 1974, sufficient to achieve at least the total level of deficit reduction contained in those sections which are not affirmed.

(B) RESPONSE OF COMMITTEES.—Committees instructed pursuant to subparagraph (A) of this paragraph, or affected thereby, shall submit their responses to their respective Budget Committees no later than 10 days after the conference report on the concurrent resolution referred to in subparagraph (A) is agreed to in both Houses, except that if in either House only one such Committee is so instructed such Committee shall, by the same date, report to its House a reconciliation bill or reconciliation resolution containing its recommendations in response to such instructions. A committee shall be considered to have complied with all instructions to it pursuant to a concurrent resolution adopted under subparagraph (A) if it has made recommendations with respect to matters within its jurisdiction which would result in a reduction in the deficit at least equal to the total reduction directed by such instructions.

(C) BUDGET COMMITTEE ACTION.—Upon receipt of the recommendations received in response to a concurrent resolution referred to in subparagraph (A) of this paragraph, the Budget Committee of each House shall report to its respective House a reconciliation bill or reconciliation resolution, or both, carrying out all such recommendations without any substantive revisions. In the event that a committee instructed in a concurrent resolution referred to in subparagraph (A) fails to submit any recommendation (or, when only one committee is instructed, fails to report a reconciliation bill or resolution) in response to such instructions, the Budget Committee of the relevant House shall include in the reconciliation bill or reconciliation resolution reported pursuant to this subparagraph legislative language within the jurisdiction of the noncomplying committee to achieve the amount of deficit reduction directed in such instructions.

(D) POINT OF ORDER.—It shall not be in order in the Senate to consider any bill or resolution reported under subparagraph (C) with respect to a fiscal year, any amendment thereto, or any conference report thereon if—

(i) the enactment of such bill or resolution as reported;

(ii) the adoption and enactment of such amendment; or

(iii) the enactment of such bill or resolution in the form recommended in such conference report;

would cause the amount of the deficit for such fiscal year to exceed the maximum deficit amount for such fiscal year, unless the report submitted under subsection (a)(1) projects negative real economic growth for such fiscal year, or for each of any two consecutive quarters during such fiscal year; nor shall it be in order in the House of Representatives to consider a conference report on any such bill or resolution if its enactment would cause the maximum deficit amount for that fiscal year to be exceeded, unless the report submitted under subsection (a)(1) projects negative real economic growth for such fiscal year, or for each of any two consecutive quarters, and in such case consideration may only be by the affirmative vote of three-fifths of those present and voting if the conference report alters or suspends the maximum deficit amount for that fiscal year.

(E) TREATMENT OF CERTAIN AMENDMENTS.—In the Senate, an amendment which adds to a concurrent resolution reported under subparagraph (A) an instruction of the type referred to in such subparagraph shall be in order during the consideration of such resolution if such amendment would be in order but for the fact that it would be held to be non-germane on the basis that the instruction constitutes new matter.

(F) DEFINITION.—For purposes of subparagraphs (A) and (B), the term "day" shall mean any calendar day on which either House of the Congress is in session.

(2) PROCEDURES.—

(A) THE SENATE.—Except as provided in subparagraph (B), in the Senate the provisions of sections 305 and 310 of the Congressional Budget Act of 1974 for the consideration of concurrent resolutions on the budget and conference reports thereon shall also apply to consideration of concurrent resolutions, and reconciliation bills and reconciliation resolutions reported under this subsection and conference reports thereon.

(B) LIMIT ON DEBATE.—Debate in the Senate on any concurrent resolution reported pursuant to subparagraph (A) of paragraph (1), and all amendments thereto and debatable motions and appeals in connection therewith, shall be limited to 10 hours.

(C) IN THE HOUSE OF REPRESENTATIVES.—In the House of Representatives, any concurrent resolution reported under this paragraph shall be privileged for consideration on or after the third day on which the report has been available to Members. Any concurrent resolution, or reconciliation bill or resolution under this paragraph, and any conference reports thereon, shall otherwise be considered in accordance with the applicable rules of the House.

(D) LIMITATION ON AMENDMENTS.—Section 310(c) of such Act (as added by section 202(d)(2) of this title) shall apply to reconciliation bills and reconciliation resolutions reported under this subsection.

(E) COMPLIANCE WITH INSTRUCTIONS.—Section 310 of the Congressional Budget Act of 1974 is amended by adding at the end thereof the following new subsection:

"(g) COMPLIANCE WITH RECONCILIATION DIRECTIONS.—Any committee of a House of the Congress that is directed, pursuant to a concurrent resolution on the budget to recommend changes of the type described in paragraphs (1) and (2) of subsection (a) with respect to laws within its jurisdiction, shall be deemed to have complied with such directions—

"(1) if—

"(A) the amount of the changes of the type described in paragraph (1) of such subsection recommended by such committee, and

"(B) the amount of the changes of the type described in paragraph (2) of such subsection recommended by such committee,

do not exceed or fall below the amount of the changes such committee was directed by such concurrent resolution to recommend under such paragraph by more than 20 percent of the total of the amounts of the changes such committee was directed to make under both such paragraphs; and

"(2) if the total amount of the changes recommended by such committee is not less than the total of the amounts of the changes such committee was directed to make under both such paragraphs.".

(3) SPECIAL PROCEDURES IN THE EVENT OF A RECESSION.—

(A) IN GENERAL.—If—

(i) the estimate of real economic growth set forth in a report transmitted by the Comptroller General under subsection (a) of this section for a fiscal year is less than zero with respect to such fiscal year or with respect to each of any two consecutive quarters of such fiscal year; or

(ii) the Department of Commerce preliminary reports of actual real economic growth (or any subsequent revision thereof) for each of any two consecutive quarters of such fiscal year or of the last two quarters of the immediately preceding fiscal year indicate that the rate of real economic growth for such quarters is less than 1 percent;

the Committees on the Budget of the House of Representatives and the Senate may report to their respective Houses a joint resolution that declares that the economy is in a recession and that suspends or revises (in whole or in part) the provisions of this title or of the amendments made by this title.

(B) CONSIDERATION OF JOINT RESOLUTIONS.—

(i) A vote on final passage of a joint resolution reported to a House of the Congress pursuant to subparagraph (A) shall be taken on or before the close of the 10th calendar day of session of such House after the date on which the joint resolution is reported to such House. If the the joint resolution is agreed to, the Clerk of the House of Representatives (in the case of a joint resolution agreed to in the House of Representatives) or the Secretary of the Senate (in the case of a joint resolution agreed to in the Senate) shall cause the joint resolution to be engrossed, certified, and transmitted to the other House of the Congress on the same calendar day on which the joint resolution is agreed to by such House.

(ii)(I) A motion in the House of Representatives to proceed to the consideration of a joint resolution under this paragraph shall be highly privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(II) Debate in the House of Representatives on a joint resolution under this paragraph shall be limited to not more than 5 hours, which shall be divided equally between those favoring and those opposing the joint resolution. A motion to postpone, made in the House of Representatives with respect to the consideration of a joint resolution under this paragraph, and a motion to proceed to the consideration of other business, shall not be in order. A motion fur-

ther to limit debate shall not be debatable. It shall not be in order to move to table or to recommit a joint resolution under this paragraph or to move to reconsider the vote by which the joint resolution is agreed to or disagreed to.

(III) All appeals from the decisions of the Chair relating to the application of the Rules of the House of Representatives to the procedure relating to a joint resolution under this paragraph shall be decided without debate.

(IV) Except to the extent specifically provided in the preceding provisions of this subsection, consideration of a joint resolution under this subparagraph shall be governed by the Rules of the House of Representatives applicable to other bills and joint resolutions in similar circumstances.

(iii)(I) A motion in the Senate to proceed to the consideration of a joint resolution under this paragraph shall be privileged and not debatable. An amendment to the motion shall not be in order, nor shall it be in order to move to reconsider the vote by which the motion is agreed to or disagreed to.

(II) Debate in the Senate on a joint resolution under this paragraph, and all debatable motions and appeals in connection therewith, shall be limited to not more than 5 hours. The time shall be equally divided between, and controlled by, the majority leader and the minority leader or their designees.

(III) Debate in the Senate on any debatable motion or appeal in connection with a joint resolution under this paragraph shall be limited to not more than 1 hour, to be equally divided between, and controlled by, the mover and the manager of the joint resolution, except that in the event the manager of the joint resolution is in favor of any such motion or appeal, the time in opposition thereto, shall be controlled by the minority leader or his designee. Such leaders, or either of them, may, from time under their control on the passage of a joint resolution, allot additional time to any Senator during the consideration of any debatable motion or appeal.

(IV) A motion in the Senate to further limit debate on a joint resolution under this paragraph is not debatable. A motion to table or to recommit a joint resolution under this paragraph is not in order.

(iv) No amendment to a joint resolution considered under this paragraph shall be in order in either the House of Representatives or the Senate. No motion to suspend the application of this clause shall be in order in either House, nor shall it be in order in either House for the Presiding Officer to entertain a request to suspend the application of this clause by unanimous consent.

(d) DEFINITIONS.—For purposes of this section:

(1) The term "automatic spending increase" means increases in budget outlays due to changes in indexes in the following Federal programs:

Rail industry pension fund (60-8011-0-7-601);

Supplemental security income program (75-0406-0-1-609);

Veterans pensions (36-0154-0-1-701);

Veterans compensation (36-0153-0-1-701);

Civil service retirement and disability fund (24-8135-0-7-602);

Military retirement fund (97-8097-0-7-602);

Foreign Service retirement and disability fund (19-8186-0-7-602);

Retirement pay and medical benefits for commissioned offices, Public Health Service (75-0379-0-1-551);

Retired pay, Coast Guard (69-0241-0-1-403);

Judicial Survivors' annuities fund (10-8110-0-7-602);

Tax Court judges survivors annuity fund (23-8115-0-7-602);

Allowances and office staff for former Presidents (47-0105-0-1-802);

Central Intelligence Agency retirement and disability system fund;

Federal Reserve Board employees retirement system;

Comptrollers general retirement system;

Tennessee Valley Authority retirement system;

Special benefits, Federal Employees' Compensation Act (16-1521-0-1-600);

Food Stamp program (12-3505-0-1-605);

Child nutrition programs (12-3539-0-1-605);

National Wool Act (12-4336-0-3-351);

Black lung disability trust fund (20-8144-0-7-601);

Special benefits for disabled coal miners (75-0409-0-1-601); and

Medicare payments for clinical diagnostic laboratory tests to which section 1833(h) of the Social Security Act applies.

For purposes of the preceding sentence, program outlays are the outlays authorized by law as described by the designated account numbers set forth in the Budget of the United States Government, 1986—Appendix. Such term shall not include increases in Government expenditures due to increases in the number of program participants, nor shall it include any increase in benefits payable under the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

(2) The term "budget outlays" has the meaning given to such term in section 3(1) of the Congressional Budget and Impoundment Control Act of 1974.

(3) The term "concurrent resolution on the budget" has the meaning given to such term in section 3(4) of the Congressional Budget and Impoundment Control Act of 1974.

(4) The term "deficit" has the meaning given to such term in section 3(6) of the Congressional Budget and Impoundment Control Act of 1974.

(5) The term "maximum deficit amount" has the meaning given to such term in section 3(7) of the Congressional Budget and Impoundment Control Act of 1974.

(6) The term "real economic growth" means, with respect to a fiscal year, the nominal growth in the production of goods and services during such fiscal year, adjusted for inflation.

(7)(A) The term "controllable expenditures" means total budget outlays except outlays for programs specified in paragraph (1) and except outlays for the following programs:

Payment where credit exceeds liability for tax (20-0906-0-1-609);

Federal Old-Age and Survivors Insurance Trust Fund, except administrative expenses (20-8006-0-7-571);

Federal disability insurance trust fund, except administrative expenses (20-8007-0-7-571);

Claims, Defense (97-0102-0-1-051);

Claims, Judgments, and relief acts (20-1895-0-1-806);

Eastern Indian land claims settlement fund (14-2202-0-1-806);

Soldiers and Airmen's Home, Payment of claims (84-8930-0-7-705);

Payment of Vietnam and USS Pueblo prisoner of war claims (15-0104-0-1-153);

Salaries of judges (10-0200-0-1-752);

Compensation of the President (11-0001-0-1-802);

Payment to the foreign service retirement and disability fund (11-1036-0-1-153);

Payments to health care trust funds (75-0590-0-1-572);

Federal payment to the railroad retirement account (60-0113-0-1-601);

Payments to Social Security trust funds (75-0404-0-01-571);

Payments to civil service retirement fund (24-0200-1-1-805);

Payments to military retirement fund (97-0040-0-1-054);

Payments to State and local government fiscal assistance trust fund (20-2111-0-1-851);

Foreign military sales trust fund (11-8242-0-7-155);

Bureau of Indian Affairs, Miscellaneous trust funds, tribal trust funds (14-9973-0-7-999);

Exchange stabilization fund (20-4444-0-3-155);

Coinage profit fund (20-5811-0-2-803);

Payments to copyright owners (03-5175-0-2-376);

Railroad Social Security equivalent benefits account (60-8010-0-7-601);

Tennessee Valley Authority power program borrowing authority (including expenditures of proceeds from bonds issued or sold by the Tennessee Valley Authority pursuant to an Act of Congress which expressly prohibits any guarantee of such bonds by the United States);

Expenditures from the Bonneville Power Administration fund and borrowing authority established pursuant to section 13 of Public Law 93-454 (1974) as amended;

Tennessee Valley Authority—Seven States Energy Corporation; and

Postal Service fund (18-4020-8-3-372).

For purposes of the preceding sentence, program outlays are the outlays authorized by law as described by the designated account numbers set forth in the Budget of the United States Government, 1986—Appendix:

(B) Further, such term shall not include outlays in the following accounts that result from prior legal obligations to the Government:

Veterans Administration loan guaranty revolving fund (36-4025-0-3-704);

Agricultural credit insurance fund (12-4140-0-3-351);

Agency for International Development, housing and other credit guaranty programs (72-4340-0-3-151);

Overseas Private Investment Corporation (71-4030-0-3-151);

Rural development insurance fund (12-4155-0-3-452);

Economic development revolving fund (13-4406-0-3-452);

International Trade Administration operations and administration (13-1250-0-1-376);

Government National Mortgage Association, guarantees of Mortgage-backed securities (86-4238-0-3-371);

Federal Housing Administration fund (86-4070-0-3-371);

Credit union share insurance fund (25-4468-0-3-371);

Federal Savings and Loan Insurance Corporation fund (82-4037-0-3-371);

Pension Benefit Guaranty Corporation fund (16-4204-0-3-601);

Maritime Administration, war risk insurance revolving fund (69-4302-0-3-403);

Federal Crop Insurance Corporation fund (12-4085-0-3-351);

Aviation insurance revolving fund (69-4120-0-3-402);

Export-Import Bank of the United States, limitation of program activity (83-4027-0-3-155);

Small Business Administration lease guarantees revolving fund (73-4157-0-3-376);

Small Business Administration surety bond guarantees revolving fund (73-4156-0-3-376);

Federal Emergency Management Agency, National insurance development fund (58-4235-0-3-451);

Federal Emergency Management Agency, National flood insurance fund (58-4236-0-3-453);

Nuclear Regulatory Commission salaries and expenses (31-0200-0-1-276);

Check forgery insurance fund (20-4109-0-3-803);

Railroad Rehabilitation and improvement financing fund (69-4411-0-3-401);

Energy security reserve (20-0112-0-1-271);

Small Business Administration, business loan and investment fund (73-4154-0-3-376);

Small Business Administration, pollution control equipment contract guarantee revolving fund (73-4147-0-3-376);

Low-rent public housing—loans and other expenses (86-4098-0-3-604);

Federal ship financing fund (69-4301-0-3-403);

Federal ship financing fund, fishing vessels (13-4417-0-3-376);

Rural housing insurance fund (12-4141-0-3-371);

Indian loan guaranty and insurance fund (14-4410-0-3-452);

Rail service assistance (69-0122-0-1-401);

Office of Personnel Management, employees life insurance fund (24-8424-0-8-602);

Federal Deposit Insurance Corporation (51-8419-0-8-371);

Veterans Administration, servicemen's group life insurance fund (36-4009-0-3-701);

Veterans Administration, United States Government life insurance fund (36-8150-0-7-701);

Veterans Administration, National service life insurance fund (36-8132-0-7-701);

Service-disabled veterans insurance fund (36-4012-0-3-701);

Veterans special life insurance fund (36-8455-0-8-701);

Veterans reopened insurance fund (36-4010-0-3-701); and

Veterans insurance and indemnities (36-0120-0-1-701).

For purposes of the preceding sentence, program outlays are the outlays authorized by law as described by the designated account numbers set forth in the Budget of the United States Government, 1986—Appendix.

(C) Further, such term shall not include regular State unemployment benefits, the State-funded share of extended unemployment benefits, and loans to States from the Federal unemployment account.

(D) Further, such term shall not include non-federal funds appropriated for the District of Columbia.

(E) Further, such term shall not include outlays for net interest (all of budget function 900).

(F) Further, such term shall not include outlays which result from private donations, bequests, or voluntary contributions to the Government.

(G) Further, such term shall not include outlays from intragovernmental funds to the extent that such outlays are derived from other Federal Government accounts.

(H) Further, such term shall not include offsetting receipts.

(I) Further, such term shall not include outlays due to increases in the number of program participants.

(J) Further, such term shall not include outlays for prior-year obligations, except that such term shall include obligations for existing contracts except—

(i) those multiyear contracts which include a specified penalty for cancellation or modification of the contract by the Government and which, if cancelled or modified by the Government would result, due to such penalty for cancellation or modification, in a net loss to the Government in the first year; and

(ii) those contracts the reduction of which would violate legal obligations of the Government.

For purposes of subsection (b), the term "existing contracts" shall include all Federal military and civilian contracts existing at the time a sequester order is issued. Notwithstanding any other provision of law, any contract entered into or modified by the Federal Government after the date of the enactment of this joint resolution shall contain a provision that the contract may be modified, renegotiated, or terminated to the extent necessary to implement a sequester order issued under clause (ii) of subsection (b)(1)(A), and a provision that any penalties that would otherwise be payable by the Federal Government under the contract by reason of modification, renegotiation, or termination of the contract shall not be payable if the modification, renegotiation, or termination is made pursuant to a sequester order issued under clause (ii) of subsection (b)(1)(A).

(K) Receipts credited to an account shall not be deducted from outlays for the purpose of determining the amount to be sequestered pursuant to subsection (b)(1)(A)(ii).

(8) The term "sequester" means the permanent cancellation of budget authority, obligation limitations, other budgetary resources, or direct and guaranteed loan limitations, to the extent necessary to reduce each controllable expenditure by a uniform percentage.

(9) The term "other budgetary resources" means unobligated balances, obligated balances for existing contracts (as provided in paragraph (7) of this subsection), reimbursements, receipts credited to an account, and recoveries of prior-year obligations.

(10) The amount by which the deficit for a fiscal year exceeds the maximum deficit amount for such fiscal year shall be treated as "statistically significant" if the amount of such excess is greater than 5 percent of such maximum deficit amount.

(11) The term "base levels of total revenues and total budget outlays" means, with respect to the report submitted by the Directors or by the Comptroller General under subsection (a) and the order (if any) issued under subsection (b) for a fiscal year, the estimated levels of total revenues and total budget outlays for such fiscal year under laws and regulations that—

(A) are enacted or promulgated prior to the date on which such report is submitted or such order is issued, and

(B)(i) are in effect on such date, or

(ii) will become effective during such fiscal year.

Estimates of such levels shall be made on the date such report is submitted or such order is issued (or on a preceding date that is as close as possible to the date of such report or order). In cases where a regular or continuing appropriation for a full fiscal year has not been enacted by such date, the base level shall be derived from the level of funds appropriated, or otherwise made available, for the previous fiscal year for the applicable budget accounts. Except as provided in the succeeding sentence, in calculating the base level, any provision of law that will expire after the base levels of such report or order are established and prior to the end of such fiscal year shall be assumed to expire in accordance with the terms of such provision. Any provision of law imposing an excise tax the revenues from which are dedicated to a trust fund and any provision administered by the Secretary of Agriculture with respect to the Commodity Credit Corporation shall be assumed to be extended for such fiscal year.

SEC. 205. BUDGETARY TREATMENT OF SOCIAL SECURITY TRUST FUNDS.

(a) FISCAL YEARS 1986 THROUGH 1992.—

(1) IN GENERAL.—Section 710 of the Social Security Act (as added by paragraph (1) of subsection (a) of section 346 of the Social Security Amendments of 1983) is amended—

(A) by striking out all beginning with "the" the first place it appears down through "Disability Insurance Trust Fund, the" and inserting in lieu thereof "the";

(B) by striking out "Fund, and" and inserting in lieu thereof "Fund and";

(C) by striking out "sections 1401, 3101, and 3111" and inserting in lieu thereof "1401(b), 3101(b), and 3111(b)";

(D) by redesignating all after the section designation as subsection (b);

(E) by inserting after the section designation the following:

"(a) The receipts and disbursements of the Federal Old-Age and Survivors Insurance Trust Fund and the Disability Insurance Trust Fund, and the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, shall not be included in the totals of the budget of the United States Government as submitted by the President or of the congressional budget and shall be exempt from any general budget limitation imposed by statute on expenditures and net lending (budget outlays) of the United States Government."; and

(F) by adding at the end thereof the following new subsection:

"(c) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appropriation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to the Federal Old-Age and Survivors Insurance Trust Fund and the Federal Disability Insurance Trust Fund, or for payments from any such Trust Fund to the general fund of the Treasury.".

(2) APPLICATION.—The amendments made by paragraph (1) shall apply with respect to fiscal years beginning after September 30, 1985, and ending before October 1, 1992.

(b) FISCAL YEAR 1993 AND THEREAFTER.—Section 710(a) of the Social Security Act (42 U.S.C. 911 note), as amended by section 346(b) of the Social Security Amendments of 1983 (to be effective with respect to fiscal years beginning after September 30, 1992) is amended by—

(1) inserting "(1)" after the subsection designation; and

(2) adding at the end thereof the following new paragraph:

"(2) No provision of law enacted after the date of the enactment of the Balanced Budget and Emergency Deficit Control Act of 1985 (other than a provision of an appro-

priation Act that appropriates funds authorized under the Social Security Act as in effect on the date of enactment of the Balanced Budget and Emergency Deficit Control Act of 1985) may provide for payments from the general fund of the Treasury to any Trust Fund specified in paragraph (1) or for payments from any such Trust Fund to the general fund of the Treasury.".

SEC. 206. BUDGET ACT WAIVERS.

Section 904 of the Congressional Budget Act is amended by striking out subsection (b) and inserting in lieu thereof the following new subsection:

"(b)(1) Except as provided in paragraph (2), any provision of title III or IV may be waived or suspended in the Senate by a majority vote of the Members voting, a quorum being present, or by the unanimous consent of the Senate.

"(2) Sections 301(c), 304(b), 305(b)(2), 306, 310(c), and 311 of this Act, and section 202(e)(1)(B), 204(c)(1)(D), and 209 of the Balanced Budget and Emergency Deficit Control Act of 1985 may be waived or suspended in the Senate only by the affirmative vote of three-fifths of the Members duly chosen and sworn.".

SEC. 207. OTHER WAIVERS AND SUSPENSIONS.

The provisions of this title may be waived or suspended in the Senate only by the affirmative vote of three-fifths of the Members of that House duly chosen and sworn.

SEC. 208. SUPPLEMENTAL BUDGET ESTIMATES.

Section 1106 of title 31, United States Code, is amended by striking out "July 16" each place it appears and inserting in lieu thereof "September 2".

SEC. 209. POINT OF ORDER.

Notwithstanding any other provision of law, it shall not be in order in the Senate or House of Representatives to consider any reconciliation bill or reconciliation resolution reported pursuant to a concurrent resolution on the budget agreed to under section 301 or 304 of the Congressional Budget Act of 1974, or any amendment thereto, or conference report thereon that contains recommendations with respect to the Federal Old-Age and Survivors Insurance Trust Fund or the Federal Disability Insurance Trust Fund, with respect to revenues attributable to the taxes imposed under sections 1401(a), 3101(a), and 3111(a) of the Internal Revenue Code of 1954, or with respect to the old-age, survivors, and disability insurance program established under title II of the Social Security Act.

SEC. 210. APPLICATION.

(a) IN GENERAL.—Except as provided in subsections (b) and (c), this title and the amendments made by this title shall become effective on the date of the enactment of this title and shall apply with respect to fiscal years beginning after September 30, 1985, and before October 1, 1991.

(b) EXCEPTION.—The amendments made by sections 202(a), 202(b)(1), 202(c)(1), 202(e)(1)(A), and 203 of this title shall apply with respect to fiscal years beginning after September 30, 1986, and before October 1, 1991.

(c) OASDI TRUST FUNDS.—The amendments made by section 205 shall apply as provided in such section.

SEC. 211. EXERCISE OF RULEMAKING POWER.

The provisions of this title, other than those relating to the activities of the executive branch, are enacted by the Congress—

(1) as an exercise of the rulemaking power of the House of Representatives and the Senate, respectively, and as such they shall be considered as part of the rules of each House, respectively, or of that House to which they specifically apply, and such rules shall supersede other rules only to the extent that they are inconsistent therewith; and

(2) with full recognition of the constitutional right of either House to change such rules (so far as relating to such House) at any time, in the same manner, and to the same extent as in the case of any other rule of such House.

SEC. 212. SENSE OF THE SENATE.

It is the sense of the Senate that any funding reductions or sequestering of controllable expenditures implemented by the various Federal agencies as a result of this title shall be made uniformly and shall not disproportionately be made in the funding of programs targeted for rural and lesser populated areas.

SEC. 213. REPORT REQUIRED.

The Directors of the Office of Management and Budget and the Congressional Budget Office, and the Secretary of the Treasury, shall jointly report to the President and to the Committee on Finance and the Committee on Ways and Means on the projected level of revenues which would be raised by increased and improved tax enforcement and collection through audits, examinations, and other methods designed to eliminate tax cheating and increase revenue collections from individuals and corporations evading Federal taxation. The report shall include an analysis of measures which can be implemented to increase voluntary compliance with tax laws, including increased staff for taxpayer assistance, speedier processing of returns, improved information processing and collection, and public education designed to increase public trust and understanding of the Internal Revenue Service enforcement efforts. The report shall also include an estimate of the level of increased expenditures for Internal Revenue Service enforcement and compliance efforts at which additional expenditures would not yield additional revenues of at least $2 of revenue for every $1 in expenditures. The report shall be issued on an annual basis no later than the date on which the President submits a proposed budget for each fiscal year to the Congress.

SEC. 214. TREATMENT OF CERTAIN COST-OF-LIVING ADJUSTMENTS.

During the time in which a sequester order is in effect, any cost-of-living adjustment for Social Security shall not count as income for purposes of determining Supplemental Security Income payments or payments from any other programs which are offset as a consequence of cost-of-living adjustments for Social Security.

SEC. 215. CONFORMING AMENDMENT TO PRESIDENT'S BUDGET.

Section 1105(c) of title 31, United States Code, is amended—

(1) by striking out "The" the first place it appears and inserting in lieu thereof "(1) Notwithstanding any other provision of law, the";

(2) by inserting "(other than action that would require an increase in borrowing authority or an increase in the limit imposed by section 3101(b) of this title by more than the applicable amount for the fiscal year for which the budget is submitted)" after "action" the first place it appears; and

(3) by adding at the end thereof the following new paragraph:

"(2) For purposes of this subsection, the term 'applicable amount' means—

"(A) with respect to the fiscal year beginning October 1, 1986, $144,000,000,000;

"(B) with respect to the fiscal year beginning October 1, 1987, $108,000,000,000;

"(C) with respect to the fiscal year beginning October 1, 1988, $72,000,000,000;

"(D) with respect to the fiscal year beginning October 1, 1989, $36,000,000,000; and

"(E) with respect to the fiscal year beginning October 1, 1990, and each fiscal year thereafter, zero.".

SEC. 216. EXPEDITED REVIEW OF CONSTITUTIONALITY OF THIS TITLE.

(a) QUESTIONS OF CONSTITUTIONALITY.—Any Member of Congress may bring an action for declaratory judgment or injunctive relief concerning the constitutionality of this title or intervene in such action in the United States Court of Appeals for the District of Columbia, which shall hear the matter sitting en banc.

(b) APPEAL TO SUPREME COURT.—Notwithstanding any other provision of law, any decision on a matter brought under subsection (a) shall be reviewable by appeal directly to the Supreme Court of the United States. Such appeal shall be brought no later than 20 days after the decision of the Court of Appeals.

(c) EXPEDITED CONSIDERATION.—It shall be the duty of the Court of Appeals and the Supreme Court of the United States to advance on the docket and to expedite to the greatest possible extent the disposition of any matter brought under subsection (a).

(d) SEVERABILITY.—If any provision of this title is held invalid, the remainder of such provisions shall not be affected.

(e) NONCOMPLIANCE WITH SEQUESTRATION PROCEDURES.—

(1) IN GENERAL.—If the President does not sequester any amount of budget authority, obligation limitation, other budgetary resource or loan limitation for a fiscal year which is required to be sequestered by section 204(b)(1)(A)(ii), on the claim that the constitutional powers of the President prevent such sequestration or permit the avoidance of such sequestration, and such claim is finally determined by the Supreme Court of the United States to be valid, then the entire order issued pursuant to section 204(b)(1) for such fiscal year shall be null and void.

(2) MEMBERS OF CONGRESS.—Any Member of Congress may bring an action in the United States Court of Appeals for the District of Columbia challenging the nonapplication of sequestration, or intervene in such action. The United States Court of Appeals for the District of Columbia shall hear any such action en banc.

(3) PROCEDURES.—The provisions of subsections (b) and (c) of this subsection shall apply to this subsection.

(f) ALTERNATIVE PROCEDURES FOR THE JOINT REPORT OF THE DIRECTORS.—

(1) In the event that the reporting procedures described in section 204(a)(1) are invalidated in an action brought under this section, then the report of the Directors referred to in section 204(a)(1) shall be transmitted to the joint committee established under this subsection.

(2) There is hereby established a Temporary Joint Committee on Deficit Reduction, composed of the entire membership of the House and Senate Budget Committees. The Chairman of these two committees shall act as Co-Chairmen of the Joint Committee. Actions taken by the joint committee shall be determined by the majority vote of the members representing each House. The purposes of the Joint Committee are to receive the report of the Directors as described above,

and to report a joint resolution as described in paragraph (3) below.

(3) No later than 5 days after the receipt of the report of the Directors in accordance with paragraph (1), the Joint Committee shall report to the House of Representatives a joint resolution setting forth the contents of the report of the Directors.

(4) The provisions for the consideration of a joint resolution under section 204(c)(3)(B)(ii), (iii), and (iv) shall apply to the consideration of a joint resolution reported pursuant to this subsection in the House of Representatives and the Senate, except that debate in each House shall be limited to 2 hours.

(5) Upon its enactment, the joint resolution shall be deemed to be the report received by the President under section 204(b)(1)(A).

SEC. 217. PERMANENT TECHNICAL CORRECTIONS.

(a) Section 301(f)(1) of the Congressional Budget Act of 1974 (as redesignated by section 3(b)(2)(A)(i) of this joint resolution) is amended by striking out "set for" in paragraph (1) and inserting in lieu thereof "set forth".

(b) The heading of section 304 of such Act is amended by striking out "OF" the second place it appears and inserting in lieu thereof "ON".

(c) Section 305(a) of such Act, as amended by this title, is amended by redesignating paragraphs (6), (7), (8) and (9) as paragraphs (5), (6), (7) and (8), respectively.

(d) Section 305(b) of such Act, as amended by this title, is amended by redesignating paragraphs (6) and (7) as paragraphs (5) and (6), respectively.

(e) The amendments made by this section shall become effective on the date of the enactment of this title.

SEC. 218. CONGRESSIONAL BUDGET OFFICE REPORTS.

(a) Subsection (f) of section 202 of the Congressional Budget Act of 1974 is amended by inserting at the end thereof the following new paragraph:

"(3) On or before January 15 of each year, the Director shall submit to the Congress a report listing—

"(A) all programs and activities for which funds have been appropriated or otherwise made available in appropriations Acts for the fiscal year ending on September 30 of that calendar year for which authorizations for appropriations have not been enacted for that fiscal year, and

"(B) all programs and activities for which funds have been appropriated or otherwise made available in appropriations Acts for the fiscal year ending on September 30 of that calendar year, but for which no authorizations for appropriations have been enacted for the fiscal year beginning on October 1 of that calendar year.".

(b) The amendment made by subsection (a) shall become effective on the date of enactment of this title.

SEC. 219. REVENUE ESTIMATES.

Notwithstanding any other provision of this title, all revenue estimates necessary to carry out the purposes of this title after the present law base estimates made by the Congressional Budget Office at the beginning of each legislative session shall be made by the Joint Committee on Taxation and transmitted to the Congressional Budget Office for its use in carrying out the requirements of this title and the Congressional Budget Act of 1974. All revenue estimates for legislation enacted each legislative session shall be made by the Joint Committee on Taxation and shall be used exclusively by the Congressional Budget Office for all purposes related to this title. The Congressional Budget Office shall consult with the Joint Committee on Taxation as to the use of these revenue estimates in carrying out this title, and shall further, upon revision by the Congressional Budget Office of economic assumptions upon which the Congressional Budget Office estimates are based under this title and any other Act, convey those revised assumptions to the Joint Committee on Taxation, for the use of the Joint Committee on Taxation in reestimating revenue effects of enacted and considered legislation which shall be provided to the Congressional Budget Office to be used as the revenue estimates necessary for carrying out the purposes of this title and the Congressional Budget Act of 1974.

SEC. 220. GENERAL ACCOUNTING OFFICE STUDY.

Title IV of the Congressional Budget Act of 1974 is amended by inserting at the end thereof the following new sections:

"STUDY BY THE GENERAL ACCOUNTING OFFICE OF FORMS OF FEDERAL FINANCIAL COMMITMENT THAT ARE NOT REVIEWED ANNUALLY BY CONGRESS

"SEC. 405. The General Accounting Office shall study those provisions of law which provide spending authority as described by section 401(c)(2) and which provide permanent appropriations, and report to the Congress its recommendations for the appropriate form of financing for activities or programs financed by such provisions not later than eighteen months after the effective date of this section. Such report shall be revised from time to time.".

SEC. 221. EARLY ELECTION OF COMMITTEES OF THE HOUSE.

Clause 6(a)(1) of Rule X of the Rules of the House of Representatives is amended by striking out "at" and by inserting in lieu thereof "within the seventh calendar day beginning after", and by inserting at the end thereof the following new sentence: "It shall always be in order to consider resolutions recommended by the respective party caucuses to change the composition of standing committees".

SEC. 222. INTEREST REPAYMENTS TO SOCIAL SECURITY TRUST FUNDS AND OTHER RETIREMENT FUNDS.

(a) The Secretary of the Treasury shall pay, from amounts in the general fund of the Treasury not otherwise appropriated, into each of the Social Security Trust Funds and other retirement funds listed in subsection (b), net amounts equal to any amount of interest which would have accrued to such Trust Fund or retirement fund but for actions which were taken by the United States with respect to investments of such Trust Fund or retirement fund which would not otherwise have been taken (as determined by the Secretary of the Treasury) if the increase in the statutory debt ceiling had been enacted into law on September 30, 1985, as provided in H.J. Res. 372 (99th Congress, 1st Session) as it was passed by the House of Representatives and reported by the Senate Committee on Finance.

(b) For purposes of subsection (a), the term "Social Security Trust Funds and other retirement funds" means the Federal Old-Age and Survivors Insurance Trust Fund, the Federal Disability Insurance Trust Fund, the Federal Hospital Insurance Trust Fund, the Federal Supplementary Medical Insurance Trust Fund, the Railroad Retirement Account, the Civil Service Retirement and Disability Fund, and the Department of Defense Military Retirement Fund.

SEC. 223. REPORTS ON NATIONAL DEFENSE.

Reports shall be submitted to Congress containing the following information:

(a) The Congressional Budget Office and the Office of Management and Budget shall each estimate the amount of defense and nondefense outlays, budget authority and other budgetary resources to be sequestered at the level of detail specified in the other sections of this title, for the possible cases of a September 25, 1986, sequester order, at the levels of $10,000,000,000, $20,000,000,000 and $30,000,000,000.

(b) The Secretary of Defense shall submit to Congress a report on how the levels of defense spending reductions estimated by the Office of Management and Budget and the Congressional Budget Office pursuant to subsection (a) above would be allocated to each program, project or activity receiving a uniform percentage reduction as specified in the other sections of this title, and shall report on the impacts of such reductions. This report shall be submitted no later than 60 days following enactment of this title.

Mr. MACK (during the reading). Mr. Speaker, I ask unanimous consent that the Senate amendment be considered as read and printed in the RECORD.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

The SPEAKER. The gentleman from Florida [Mr. MACK] will be recognized for 30 minutes and the gentleman from Missouri [Mr. GEPHARDT] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Florida [Mr. MACK].

Mr. MACK. Mr. Speaker, I yield 4 minutes to the gentleman from Mississippi [Mr. LOTT].

Mr. LOTT. Mr. Speaker, earlier this afternoon, the other body once again voted on this issue that we have been debating, the deficit reduction package known as the Gramm-Rudman-Hollings-Mack deficit reduction package. The vote was almost identical to the vote that occurred some 3 weeks ago, I guess now, 74 to 24.

I understand from talking to our colleagues in the other body that the gentleman from Michigan [Mr. LEVIN] added an amendment that was an improvement on the bill and that was accepted.

PARLIAMENTARY INQUIRY

Mr. AUCOIN. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. AUCOIN. Mr. Speaker, is it not against the rules of the House to refer to actions in the other body, either Members of the other body or votes in the other body?

The SPEAKER. Under normal circumstances, the answer is in the affirmative. But we are referring to a matter that has just been sent over from the other body, so the gentleman may refer to that fact.

Mr. AUCOIN. Mr. Speaker, does that include that announcement of the actual vote in the other body?

The SPEAKER. The Chair will state to the gentleman that that would not be in order.

Mr. LOTT. Mr. Speaker, the vote was a bipartisan vote, again in the other body, and with essentially the same Members voting the same way. It still has overwhelming bipartisan support.

It is time that we begin to move toward resolving this issue. We are not going to have a debt ceiling increase get through the Congress until we work through this deficit reduction question.

We should vote on this issue today. We should support the motion offered by the gentleman from Florida [Mr. MACK] to concur with the Senate position. We have been debating this issue back and forth now for weeks and we know what is in it. We have already enumerated the weaknesses of the House position and they are still there. The question of nonseverability and the constitutional question is still in the House-passed version. That has got to be taken out. We have set ourselves up to guarantee that this whole matter would be unconstitutional, and that is not what we want.

We need a process to move the Congress and the Government through a set of fixed amounts to a zero deficit by fiscal year 1991. That is what we really want, and yet under the House-passed version, with the Obey language, that will not even necessarily occur. We will not have a fixed reduction each year to a balanced budget by fiscal year 1991.

I think the time has come for us to get serious about a workable deficit process here to reduce the deficit and some reasonable maximum deficit amounts.

Our colleague in the Rules Committee today told that House that if we were really serious about this question of $161 billion in deficit, we ought to make it applicable to the continuing resolutions coming before the House; we ought to make it applicable to the water resources bill. The truth of the matter is the House does not intend to go to the $161 billion figure, and so there are Members around here that do not want to start making it apply to the things we are going to be voting on.

We have a chance to resolve this issue right now, today. If we do not vote for this motion to concur, we will eventually wind up, I guess, back in a conference next week, maybe Tuesday or Wednesday. I am sure we would not want to work over the weekend, or on Tuesday if the House is not really going to have votes on Tuesday. And how do we begin to resolve this thing? Are we going to have from the House of Representatives again a group from the House where we are going to have 48 conferees? Come on, let us make it 58. We can all go over, you know. Good, we have one more Member that wants to be included.

If we are going to have a conference, for goodness sake, we should have a small number and we should resolve this issue and get it done quickly so that we can get on with the Government's business.

But the way to resolve it is to go ahead and vote right now on this motion to concur.

Mr. SLATTERY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am glad to yield to the gentleman from Kansas.

Mr. SLATTERY. I appreciate the gentleman yielding, and I have a lot of respect for the gentleman from Mississippi. I know that he would not come to the body and ask the body to vote on something——

The SPEAKER. The time of the gentleman from Mississippi [Mr. LOTT] has expired.

Mr. SLATTERY. Mr. Speaker, I ask unanimous consent the gentleman have 1 additional minute.

The SPEAKER. The gentleman from Florida [Mr. MACK] has control of the time.

Does the gentleman from Florida yield more time to the gentleman from Mississippi?

Mr. MACK. Mr. Speaker, we have a limited amount of time and the gentleman will have to get time from his own side.

Mr. SLATTERY. Mr. Speaker, would the gentleman yield me 2 minutes?

Mr. GEPHARDT. Mr. Speaker, it is not my time to yield.

Mr. LOTT. Mr. Speaker, at the proper time, when the gentleman gets time, I will be glad to respond.

PARLIAMENTARY INQUIRY

Mr. MACK. Mr. Speaker, I have a parliamentary inquiry.

The SPEAKER. The gentleman will state his parliamentary inquiry.

Mr. MACK. Mr. Speaker, the purpose of my question is to find out whether the gentleman from Missouri [Mr. GEPHARDT] has 30 minutes, as I do, or do I control the hour?

The SPEAKER. The gentleman from Florida [Mr. MACK] has 30 minutes, and the gentleman from Missouri [Mr. GEPHARDT] has 30 minutes.

Mr. MACK. I thank the Speaker.

Mr. GEPHARDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I would urge that this motion be rejected, and I rise in opposition to it.

On November 1, this House voted overwhelmingly in favor of an amendment to the Gramm-Rudman proposal. This House voted for a fair deficit reduction proposal, one that would maintain our social safety net and assure that the defense budget would bear its fair share of deficit reduction.

We also voted for an honest deficit reduction proposal, one that would start this year rather than after the 1986 elections. In short, what we sent back to the other body last week was a deficit reduction proposal that was real, and that was workable, and that was fair. We replaced the smoke and mirrors of the Gramm-Rudman proposal with a deficit reduction plan that was understandable and that would begin this year.

The Senate amendment that has been sent back to us represents little improvement and little change over the original Gramm-Rudman proposal. The degree to which defense would be cut is still unclear. Medicare, Medicaid, AFDC and other domestic programs are subjected to much deeper cuts than under the House proposal.

The 1986 deficit figure is still designed to get us beyond the 1986 election before any real deficit reduction pain is felt. The Senate amendment continues to be the "Incumbant Protection Act of 1986."

The House vote last week showed that we were willing to develop a serious, workable deficit reduction plan. If we are still willing to do that, we should reject this motion, get the other body back into conference, and make them work for a real deficit reduction.

Let me say to the Members that last week, in a bipartisan way, the House conferees worked toward a solution that we could adopt and that they could adopt. We were not allowed in the ending hours of that conference to have votes on the various proposals that were in dispute between the conferees on both sides. We were literally told that the conference had to break up and that we had to go to both floors of both bodies to see what the Members wanted to do.

The conference did break up. We came here and voted for our proposal and sent it to the other body, and in essense, now the other body has readopted Gramm-Rudman I, and has sent it back. I think the only appropriate action, in light of those actions, is to go back to conference, and this time to see if real negotiations can take place, going through the various points that are still in contention to see if they can be resolved.

□ 1740

Let me assure Members that I think that these points can be, if there is serious negotiation, can be resolved.

The first major difference is that the House amendment guarantees that the Pentagon will bear its fair share of the spending cuts; that is a very important part of our proposal.

Let me give you the numbers: On a percentage basis, with a $10 billion spending cut under the House version, nondefense would bear 52 percent of that cut, the defense would bear 48 percent of that cut; almost an even

split. Under the Senate version, nondefense would bear 58 percent of the cut, defense 42 percent. Clearly an unfair share of the burden on nondefense with a $10 billion spending cut scenario.

If you had a $25 billion spending cut, nondefense would get 53 percent under the Senate version; defense only 47 percent. Under the House version, nondefense would get 46 percent, but defense would get 54 percent.

So clearly in terms of fairness, we believe the House proposal is better, but we are willing to negotiate about those differences.

Second, on immediate deficit reduction, again the House amendment would take effect immediately, calling for serious additional deficit reduction in 1986, a maximum deficit of $161 billion.

The Gramm-Rudman deficit target would not require additional action in 1986, and would allow a maximum deficit of $189 billion, a clear and important difference, one again that we are willing seriously to negotiate about.

Third, the issue of constitutionality. The charge has been made that the House proposal sets up a booby trap that will require this proposal to be found unconstitutional, which will put the whole issue aside.

I feel very strongly that we have a conflict in this proposal. We have two priorities: A lot of our Members, both Republican and Democrat want a wall to be created that takes these decisions out of the hands of the President and the Congress, and I think a lot of Members on our side share the desire to have a wall.

However if you have a wall, you also have the priority of wanting to keep constitutional powers that the Congress has in the Congress, and if you allow OMB and CBO to be the arbiters, you clearly pass some power to the President that we have not now passed.

It seems to me that there is a way to have perhaps an agreement on this issue that is different than what the House proposal originally was, but we need to have that negotiation, and I think it is clearly unacceptable to go back to the Gramm-Rudman procedure, which allows OMB and CBO to make the arbitration. If that part is found unconstitutional it is likely the Court would say that the CBO part is the part that is unconstitutional; we will wind up with OMB being the final arbiter, which passes, clearly, the power to the President.

Last, Medicare and veterans. The Gramm-Rudman proposal continues holding Medicare in category 2, which means it can be cut beyond the COLA into the parts of Medicare that are beyond the COLA; it could reduce by $7 bilion with a $25 billion cut scenario, the cuts in Medicare.

In addition, the Senate refused to exempt the veterans' programs from the sequestering order. So clearly, these are areas that the House felt strongly about. Again, there can be negotiation, but clearly the majority of the Members last week felt that those programs, the Medicare case should be in category 2 and in the veterans case, should be an exempt program altogether.

In short, let me conclude by saying that I appreciate the action the other body has taken today. Clearly, they feel strongly about a lot of these issues. It is unfortunate that we did not have a serious negotiation last week on these issues. That did not take place.

I think the important thing today is to refuse this motion, to refuse to recede to the Senate amendment and then to pass an amendment to ask that we go back to conference so that in the days between now and November 14 when we again begin to have problems with the Government being able to pay its bills, we can see our way clear to writing a deficit reduction proposal that we can get support from in both bodies, and on both sides of the aisle in both bodies.

I think it is a realizable goal, and I think the only way to reach that goal is to get back to conference.

Mr. ROEMER. Will the gentleman yield?

Mr. GEPHARDT. I yield to the gentleman.

Mr. ROEMER. I thank the gentleman for both his statement and his yielding. As a Democrat in this body, I am pleased with the effort that we made last week, and I would ask only about one part of the gentleman's statement.

The gentleman alluded on several occasions to the seriousness of our willingness and effort to negotiate. I would like the gentleman to say again to your colleague from Louisiana, the seriousness of our willingness to negotiate.

There are many in our party and in this body who want to accept a cleansed, workable version of Gramm-Rudman, and we will hang on as long as we can and as long as the attitude of our leadership is one of serious negotiation.

Would the gentleman address that point again?

Mr. GEPHARDT. Let me respond to the gentleman in two ways; first to say that there was serious work in a bipartisan manner done on many of the issues in the conference last week; and we reached agreement on many of the contested issues.

There were five or six important contested issues on which there was not serious negotiation. I feel strongly, and I think the Member from Louisiana feels strongly about some of those issues, and on some of them it will be hard for us to make changes or to make modifications; but there are many other parts of those issues on which we are willing to seriously and honestly and reasonably negotiate.

We certainly are willing to see if we cannot arrive at a deficit reduction proposal that we can get a lot of support on, on both sides of the aisle in both bodies. I think that is a realizable goal.

Mr. SMITH of Iowa. Will the gentleman yield?

Mr. GEPHARDT. I yield to the gentleman.

Mr. SMITH of Iowa. Mr. Speaker, I think it is rather strange that we keep talking about a deficit reduction proposal when in fact this proposal sent over here by the Senate would increase the deficit goal for 1986 by $8 billion over and above what we voted for on August 1.

That does not seem like a deficit reduction package to me, and if you want to abide by that bill that we passed here August 1, with an $172 billion deficit goal, we should not be voting today for a bill that would increase it or allow $180 billion.

Mr. GEPHARDT. The gentleman's point is well taken. Obviously, the House position thus far has been to reduce that deficit for 1986 to $161 billion rather than even the $172 that the House budget called for on August 1.

Clearly, your argument is well taken and it is another reason to refuse this motion to recede to the Senate position.

Mr. HUNTER. Will the gentleman yield?

Mr. GEPHARDT. I yield to the gentleman.

Mr. HUNTER. I thank the gentleman for yielding, and I thank him for his analysis of Rostenkowski, essentially, versus Mack-Gramm-Rudman. Let me ask the gentleman, because I think it is very important that all Members understand what the difference is, as I understand it, under Rostenkowski there are a number of plans or programs which are exempted including food stamps, AFDC, veterans compensation, community health centers, SSI, child nutrition, veterans pensions, migrant health, and that those plans are essentially "winners" under Rostenkowski; in other words, they are exempted.

However, because of those winners and because we still have to bring the deficit down, there are losers; and as I understand it, and I would like the gentleman to analyze this with me, is it not true that besides defense, the Farmers Home Administration, elementary and secondary education, vocational and adult education, housing programs, energy programs, Bureau of Indian Affairs, FBI, Drug Enforcement Administration, OSHS, Amtrak,

and international security assistance including aid to Israel will be cut 73 percent more than if the pot was bigger; in other words, if we used the Mack-Gramm model where we do not have as many exemptions?

In other words, what I am asking the gentleman is, is not it true that we are going to have to make heavier cuts in these programs that I have listed in order to accommodate the exemptions that were listed under Rostenkowski?

Mr. GEPHARDT. Reclaiming my time, Mr. Speaker, let me make two answers. First, I think the gentleman's percentage is probably off, and the reason I say that is that papers that have been distributed today are trying to indicate that the base that we expose in our plan to cuts is much smaller than the base in the Gramm-Rudman bill.

I think those papers and those statements are incorrect.

Mr. HUNTER. If the gentleman will yield further, could the gentleman give me the correct figure? I understand these figures of 73 percent larger reduction in the programs I listed came from CBO. If the gentleman has another figure, could he give it to the Members?

□ 1750

Mr. GEPHARDT. Well, I think the figures came from CBO, they said, on assumptions given to CBO by Members from the other side of the aisle. Our belief, when you take into account prior year obligations in a way that is fair, between the two plans, is that under the House amendment we have exempted outlays of $551 billion, and under the Senate version of $488 billion. We do not believe there is any great difference between what is exposed to cutting in terms of the base because we feel that we deal with prior year obligations in the same way that the Senate does, or if the Senate does not deal with prior obligations, then we do not either. We think that the computation has not been correctly done. We feel there is a very slight difference in the total of exempt outlays, and we feel that the argument to the contrary is simply not true.

Mr. HUNTER. Could I ask the gentleman to yield further in that case to simplify this, again understanding that these winners or these programs that are exempted under Rostenkowski are not going to be shedding the same deficit reduction that other programs are, what is your figure with regard to the rest of the pie that is going to be taking the brunt of the cuts.

Mr. GEPHARDT. We believe that the exemptions we made in our proposal over Gramm-Rudman only add $11 billion or $12 billion of program that is exempt, that is taken off the table and not subjected to cuts, and not nearly the amount that the gentleman suggests at 73 percent.

Mr. HUNTER. OK, for the gentleman's information, I would simply say the gentleman that I understand CBO calculated it at $50 billion.

Mr. GEPHARDT. I thank the gentleman.

Mr. MACK. Mr. Speaker, I yield 3 minutes to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding. It is interesting we now raise questions about CBO's figures when in fact under the proposal we had on the floor the other day, CBO is given virtually carte blanche authority to make all these decisions. I find that rather interesting.

I think the important thing to realize is that now what we have on the House floor is a very doable, detailed procedure which can lead us successfully to a balanced budget instead of just the conceptual outlay we had dealt with in the original bill.

We have now spelled out specifically how various programs should be treated under the sequestration procedures.

The vague definitions that were there previously have been scuttled in favor of listing which programs are to be singled out for exemption or special treatment.

Treatment of prior year defense contracts is clearly defined. New contracts are specifically required to be sequestered.

Programs which are not susceptible to the sequestering for legal or technical reasons have been singled out. We have responded in this particular approach to the legitimate concern over the impact of a recession or an economic downturn, to the difficulty of projecting economic cycle accurately. We have said that if economic conditions allow the growth to go below 1 percent, that at that point, the program would no longer be effective. It recognizes the constitutional problem of leaving OMB and CBO to develop a report which triggers the sequestering process and instead gives the Comptroller General the responsibility for reporting to the President and to the Congress.

The amendment before us also recognizes that the original bill failed to clarify the baseline against which the budget deficit is measured and generally adopts the House procedure for doing that.

So, in other words, what has happened is that we have been presented with a program that has gone through some fine-tuning. We do, in fact, have a program that could be defended, and it seems to me that to break the impasse, to get beyond a lot of the argument about who is hurting whom and how, that we ought to adopt this particular amendment and get on with the process not only of doing the Nation's business now but also get on with the process of beginning to balance the books of the Federal Government.

Mr. HUNTER. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding, and I thank him for his points.

I want to go back to the point that was made by the gentleman from Missouri. I have here—we have a difference of opinion, obviously, over the difference in cuts under Rostenkowski and under Mack-Gramm. I have a letter from Rudolph Penner that lays out the difference, and he has it as a difference under the House amendment and the Senate amendment as being $348.4 billion as opposed to $297.9 billion, which is about a $50 billion difference.

Turning to all those programs besides defense, this is not guns versus butter, this is a lot of butter versus a few programs that involve butter; the Older Americans Program is going to be cut $94 million as opposed to $11 million.

The SPEAKER. The time of the gentleman from Pennsylvania [Mr. WALKER] has expired.

Mr. MACK. Mr. Speaker, I yield 1 additional minute to the gentleman from Pennsylvania.

Mr. HUNTER. Mr. Speaker, will the gentleman continue to yield?

Mr. WALKER. I yield to the gentleman from California.

Mr. HUNTER. I thank the gentleman for yielding.

Let me carry on: Under the Older Americans Program, the difference between the Rostenkowski package and the Mack-Gramm package is the difference between $94 million in reduction under Rostenkowski as opposed to $11 million—excuse me, it is $22 million as opposed to $11 million under Mack-Gramm.

So there is a substantial difference. Dislocated Workers, there is a large difference; Job Corps, there is a large difference; Indian Education, Head Start, Compensatory Education, Low-Income Energy Assistance, Subsidized Housing Programs, Social Services Block Grant, a large difference.

So I would ask the gentleman if the gentleman from Missouri has a different figure from this $50 billion figure. I would ask the gentleman from Missouri if he could respond, I have the letter from Mr. Penner that says there is a $50 billion difference in reductions among these loser programs because of the winners that were exempted under Rostenkowski. Could he respond? I ask the gentleman to give him 1 minute to respond. I would ask him to respond on his own time.

Mr. GEPHARDT. Mr. Speaker, I yield 2 minutes to the gentleman from California [Mr. MILLER].

Mr. MILLER of California. Mr. Speaker, I would hope that we would vote to go to conference. I am delighted at the newfound concern by my Republican friends for the poor in this Nation. It is a tragedy today that the millionaires in the Senate joined with the President of the United States to turn their backs on what little semblance of a safety net we had for the poorest of the poor in this country, that they made a decision that they take more away in the health care dollars of senior citizens than any of those senior citizens will ever receive in COLA's in the future, that it is a tragedy they took away food from the children in this country who need it to sustain the very life they are seeking to thrive on in this country.

Just a few hours ago, the Select Committee on Children, Youth, and Families traveled a couple of blocks from the Capitol and talked to mothers and to children and to people who are trying to survive on a day-to-day basis.

One of the overwhelming aspects of the testimony those people, people who went to work every day of their life, but they woke up poor at the end of the year, was that these programs enabled them to feed their children, to try to maintain a roof over their heads, and that these programs were the difference between living in the street and not living in the street. They were busting their rear ends to do the best they could for their families, but along comes the Senate of the United States and the President of the United States to pull the leg out from underneath them, to say we will not support their efforts to try to remain gainfully employed. It is a tragedy, and I hope we will reject it and insist on the House-passed bill.

The SPEAKER. A point of order lies against the gentleman. He should not refer to the Senate as he has.

Mr. MILLER of California. I hope I never have to refer to the Senate again, Mr. Speaker, after the actions they took today.

Mr. MACK. Mr. Speaker, I yield 2 minutes to the gentleman from New Hampshire [Mr. SMITH].

Mr. SMITH of New Hampshire. I thank the gentleman for yielding.

Mr. Speaker, I am a bit confused, as one freshman Member listening to the gentleman from Missouri and some of the other comments that have been made here.

I came here last week prepared to vote for Gramm-Rudman. We were denied that vote. And in so doing, we heard a lot of comments about disinvesting Social Security. Now I hear comments we are going to delay things further and a willingness on the part of this side of the aisle to delay the proceedings even further on a day-by-day basis, to make us reach deeper and deeper into that Social Security Fund. I find that a little preposterous. Also, I voted—I do not know how the gentleman on this side voted—I voted against adjournment. I was prepared to stay here. I canceled my plans for the weekend.

I was prepared to stay here and resolve this matter so we would not have to reach deeper and deeper into the Social Security Fund.

I think it is time now to put up or shut up.

I thank the gentleman for yielding.

The SPEAKER. The gentleman from Missouri [Mr. GEPHARDT] has 12 minutes remaining and the gentleman from Florida [Mr. MACK] has 20 minutes remaining.

Mr. MACK. Mr. Speaker, I yield 3 minutes to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. Mr. Speaker, I am really not going to take the time, I have these in my hand, but I will not quote from them. Perhaps it is time, and really I will accept this from either side, to give us a status, because I think it starts to get a little confusing to some of us who have not been here for a long time.

Now, this started over in the other body, where they have all of these millionaires, and I must say to the gentleman from California one of the biggest regrets of my life is I am not one of them. I have never found that that is a problem. But it started with one of our ex-Members who started on that side of the aisle, moved to our side of the aisle, and that we all envy because of the incredible press he is getting.

Then he added on a Democratic candidate for the Presidency, so it became bipartisan. We had a bill come over here in very good bipartisan shape that took us by surprise. It seemed to have a life of its own, and we had my side of the aisle ecstatic because we finally thought we had you guys, and you guys worried about what you could do.

So you worked up eventually a bill that no one was sure how the voting was going to go on, because you had conference after conference, and the Democrats were fighting like crazy, and you had all of these liberals that did not want anything, and then the conservatives that kind of liked Gramm-Rudman, all of a sudden you all stuck together, which is really—parties are supposed to do that. So it is not said in a condemnatory way.

Now, the bill had a couple of flaws, and deep down the people on that side who wanted it knew it; that is, knew it was unconstitutional. A small, petty thing that was not going to make the papers but which kept all the liberals because they know it could never be law.

Now, as I understand it from the chairman of your conference, I think I understand it, you want to go to conference so that those folks of you who really want this kind of a bill, that we can compromise that. I do not know, eventually you have got to decide whether it is severable or unseverable. We cannot do that on our side. I am not going to kid you, we do not have the votes. But it is coming down to not an argument of poor against poor. I can read the programs. "My goodness, you are killing Head Start. How could you?" You know, we can go through all of that jazz. Nobody believes us any more. It is going to affect everybody, defense, nondefense; and those of my side that think you can protect every bomber and every base, we cannot do it. But those of you that are going to play the game that somehow you take one older Americans program and protect it and then exempt the Older Americans Act, we will use that against you. Too bad we do not just do it now. I think the new Gramm-Rudman answered a lot of the legitimate objections. But one of your leaders has said we have got to go to conference.

The SPEAKER. The time of the gentlewoman from Illinois has expired.

Mr. MACK. Mr. Speaker, I yield 1 additional minute to the gentlewoman from Illinois [Mrs. MARTIN].

Mrs. MARTIN of Illinois. As one of the conferees, that does not thrill me. But we will go. I would hope that common sense would have prevailed, that we could just vote this solidly with the changes that were legitimately compromised that came over from the other body. But if we go to conference, if that is your will, the American people will be listening, and we had better come out with a bill pretty close to this one that does cut the budget in 6 years and does cut the deficit to zero. Otherwise, the farce will get bad reviews throughout America.

□ 1805

Mr. MACK. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. KASICH].

Mr. KASICH. I thank the gentleman for yielding.

Mr. Speaker and Members of the House, there are Members on the floor who surprised me last week in voting for the Rostenkowski alternative, because, frankly, they have cast a lot of votes that I thought represented real interest in trying to reduce the deficit.

We passed the budget proposal in this House that gave us about $171.5 billion in deficits. I myself voted for the Democrat budget proposal. I would have preferred the Latta proposal, but I was willing to vote for the Democrat budget proposal because it did several things, it gave us about $55

billion in budget reductions, it had no increase in taxes and, in addition to that, it did not slash defense below what I thought was something we could not afford. So it met those three provisions that I had set up for myself in terms of judging the budget.

So we passed this budget at $171.5 billion in deficits, and now we take a look at this projection and we see we are $20 billion plus over in deficit projections. We are at $194 billion in deficits, which is $23 billion more than what we passed in our budget.

So how can we stand in this House and argue that we ought to be down to $161 billion when our budget calls for deficits of $171 billion and we are $20 billion over that mark?

Now, let us be realistic and let us be practical in terms of what we can pass.

Now, let me say this to you: In addition to this, we get reconciliation bills on this floor. Reconciliation bills are designed to reduce spending with language we pass in our budget resolution and we increase spending by $4.5 billion in reconciliation.

So not only do we have a deficit that is $20 billion over the deficit projection that we established on our budget, but we have $4.5 billion in increased deficit created by our reconciliation bill. And liberals come in this House and say, "We ought to cut it down to $161 billion." A heck of a lot of us would be prepared to live with that, but the simple fact of the matter is that nobody who is proposing this thing is prepared to live with it. None of the liberals in the House are prepared to support this action. I know this because we are passing deficits that are $20 billion over what we passed in our budget resolution and $4.5 billion in increased spending in reconciliation.

To me, it is unbelievable what we are talking about. You want to front load the proposal. And, in addition to that, you want to put this constitutional challenge in there. You really limit the power of the President to exercise veto authority. And then you say if that is challenged, the whole proposal gets thrown out and we cannot operate under any deficit reduction program.

Frankly, I hate to question whether people are legitimate in their concern, but when you are $20 billion over what we originally set as our target, an increase in spending under the reconciliation bill, I do not think you are really being serious about this; frankly, I think you are trying to destroy this whole Gramm-Rudman proposal with the Rosty proposal.

Mr. GEPHARDT. Mr. Speaker, I yield 3 minutes to the gentleman from Texas [Mr. LEATH].

Mr. LEATH of Texas. Mr. Speaker, I think I understand partisan politics about as well as anybody, and I am probably as nonpartisan a type of person in my approach to this job as there is in this building. But I think what we need to focus on right now—we have got a right to take our partisan shots at each other—but what we need to focus on right now is this, and let me just give you a little chronology of what happened:

My good friend, Senator GRAMM—and he is my good friend, I was privileged to work with him in 1981—when we did some things around here that I think needed to be done, and I think he seized an opportunity, in great frustration, as many of us have, that we are not going to reach a consensus, so maybe we can force ourselves to do it. So a piece of legislation was worked up, it passed the Senate, primarily on a very emotional basis, let us all admit that—even they did. It comes over here and it needs some defining, it needs some clarification. There is a very simplistic formula applied to very complicated government. What is going to happen?

So we say, "OK, let's go to conference, and let's work some of these things out."

We split up into four task forces, bipartisan. And let me tell you something, we put in 16, 18, and some of the staff, 20 hours a day on a very intellectually honest basis, working through this. We come back several days later. The Senate is not doing this, the other body is not doing this. The House Members, Democrats and Republicans, are. We come back to that conference last Wednesday with reams of clarification, 75 percent of it bipartisan, 75 to 80 percent acceptable to the Senate. We go in on an honest intellectual basis. And let me tell my Repubican friends something. I know you have got a right to suspect and say, "Well, the Democrats are not serious." Let me tell you, if there has been a meeting that has been held around here since this came up, because of my being on the Budget Committee, I have been in those meetings, I have never heard one second of any Democrat, from the Speaker of this House on down, say, "Let's try to kill this thing?" We accept the fact that it is going to pass. What we are trying to do is make it better and make it work.

So we go into this conference, and the other body accepts all of this work that we have done on a bipartisan basis. The Democrats in the House said, "OK, we are dealing with the most far-reaching legislation, the most far-reaching piece of legislation in this century. We have got four or five things we would like to discuss, Mr. Chairman," they said to the chairman of the caucus. The chairman said, "Nope, sorry, we are not going to discuss it. If you have a package you want to present us, we will look at it."

We looked at each other and said, "What in the world is going on here?"

We had been working for a week to try to improve the situation. We had come to an intellectually honest place to try to work it out. And, "No, absolutely not, we are not going to discuss these points."

Now, that is when you saw the so-called Democratic alternative originate.

I do not think that is the way to deal with the most important piece of legislation in this century.

Now, what we are talking about here today is going back to that conference because nobody knows what was just passed over there, and anybody who will stand down here in this well and say that they have read it and they know everything in it is not telling all the truth, because we do not know.

So what we are talking about here is to go back to that conference and to talk to each other and, hopefully, this time the other body would say, "OK, we are going to listen."

So I would urge us to do that. I think it is reasonable and I think it is common sense.

Mr. MACK. Mr. Speaker, I yield 3½ minutes to the gentleman from Georgia [Mr. GINGRICH].

Mr. GINGRICH. Mr. Speaker, let me say to my good friend from Texas that if in fact he has been at a lot of meetings and has not heard any Democrat suggest they want to kill Gramm-Rudman, I think there must be a whole series of meetings he has not been in, because I can assure him that we have certainly had a lot of different folks who would like to kill Gramm-Rudman.

Mr. LEATH of Texas. Will the gentleman yield?

Mr. GINGRICH. I would be glad to yield to the gentleman.

Mr. LEATH of Texas. I am not saying that, I would say to my dear friend and classmate from Georgia. I am not saying that, but what I am saying is: Let us deal with each other on an intellectually honest basis. Let us accept the fact that we have got people on both sides who want to kill this, that or the other, but let us deal with each other on an intellectually honest basis.

Mr. GINGRICH. I thought I must have misheard the gentleman earlier, and I was just commenting that it does seem to me clearly there are a considerable number of people on the gentleman's side who would very much like for this whole thing to go away.

I am looking forward for what I suspect will wind up being two votes this afternoon. I have a number of friends who consider themselves conservative or moderate Democrats who were saying for weeks that if they ever got a chance to vote for Gramm-Rudman, they were going to vote for it. This afternoon they are going to get a

chance to vote for it. I am looking forward to seeking how they vote.

I am also looking forward because I suspect that if it does fail—and I think the Democratic leadership has done a masterful job of putting together a coalition to ensure that it will fail today—there probably will be a second vote, the core of which I think is on what is the central weakness, if you want to talk about being intellectually honest, of the Rostenkowski amendment last Friday, and that is the notion that, first, you design a measure which you know is unconstitutional, and then you contain a second measure which says if the first item is knocked out, the whole thing dies.

Now, I think if you are faced with the problem the Democratic leadership faced last week, which is how do you put together those Democrats who at least say they want to cut spending with those Democrats who openly say they do not want to cut spending and get them all to vote for the same thing, that certainly Friday's performance was among the finest in recent history in this building.

But the core of pulling that off was to write a document which would self-destruct. It will be very interesting to see, if, for example, instructions are offered later on today, you are given a chance to vote to take out that time bomb. How will moderate and conservative Democrats vote at that point? Will you vote to keep the time bomb in because that was the deal, or do you vote to take it out? And then you might get Rostenkowski without the unconstitutionality. And then even Rostenkowski might not look very good to the liberal wing of your party.

But, finally, let me just say—and I thought the gentleman from New Hampshire began to make this point, and he is exactly right—it has been peculiar to watch the gentlemen on the Democratic side jump up on Friday and say, "We have to pass something immediately to save Social Security, but, by the way, let us vote to go home immediately, without waiting for the other body," and then come in today and say, "Oh, we don't have to rush to do anything," as though it were all the same thing, and to hear similar gentlemen who on Friday assured us that relying only on CBO would work, Rostenkowski was better because it only relied on the Congressional Budget Office.

I will be glad to submit for the RECORD, if the gentleman from Missouri really does question it, the letter from Mr. Penner to Mr. MICHEL, from the Congressional Budget Office, specifically outlining on a purely professional basis exactly how Rostenkowski hits a whole range of programs, including those the gentleman from California was worried about earlier, things such as Older Americans Program, Social Services block grants, Maternal and Child Health, and a whole range of programs which Rostenkowski hits much harder than Gramm-Rudman.

Mr. GEPHARDT. Mr. Speaker, I yield 3 minutes to the gentleman from California [Mr. PANETTA].

Mr. PANETTA. Mr. Speaker, first of all I think we ought to set the record straight with regards to disinvestment. The minute the clock went past 12 midnight on Friday, that is when disinvestment took place. It had nothing to do with the House's action. It had everything to do with the fact that the Senate did not act prior to 12 o'clock.

Let us recognize that there is in this House a legitimate concern that we do something about the deficit. But let us also recognize that the approach we develop has to be fair, it has to be workable, it has to be balanced, and it has to be constitutional.

I think the test of our seriousness is our willingness to negotiate based on these principles.

Now, as the gentleman from Texas pointed out, the fact is that the Senate was never really serious about negotiating the first time. We did not have a conference last time. What we faced was a closed door. The reality was that the other body assumed that we did not have the votes to pass alternative and that the Senate proposal would be adopted. So for that reason, very frankly , there was no negotiation. Yes, we worked on process; yes, we worked on procedure, but when it came to the key elements of concern, the Senate basically said, "We will not consider what the House has to offer."

Now, it did not happen that way last Friday. The alternative passed. Why? Because there are legitimate concerns.

And I would hope that those legitimate concerns are shared on both sides, a legitimate concern about the workability of this proposal. If we are going to say you have to cut across the board, then that has to be verifiable, it has to be enforceable. We do it by using budget authority because the experts tell us it is the most effective way of verifying that cut across the board.

The Senate says they do it on the basis of outlays.

But let me give you one small example. The Senate says they have $75 billion of prior contracts that are part of the pot. The White House says that there are no prior contracts that are part of this pot. You talk to CBO, and they cannot confirm that prior contracts are part of this pot.

□ 1820

What we have proposed is workable because it is verifiable.

In addition to that, we are concerned about a recession trigger because we are concerned about the overall economic situation. Yes, we are concerned about making it real in 1986 and not postpone this effort until 1987 because the whole thrust of this, is to make it work now. Yes, we are concerned about the balance of powers and protecting for the Congress the ability to design that order.

You argue about CBO; the fact is that CBO is very important to our ability to protect the power of the Congress. We also wanted to be fair. The package that came from the Senate and the package that is before us now would eliminate 52 percent of Federal spending. We think the poor ought to be exempted as well in that kind of package.

Please vote to go to conference.

Mr. MACK. Mr. Speaker, I yield 3 minutes to the gentleman from Idaho [Mr. CRAIG].

Mr. CRAIG. I thank the gentleman for yielding.

Mr. Speaker, last Friday afternoon we played budgetary brinksmanship. I think we probably all lost. I know that the Social Security trust funds lost, and if you look at the fingers and the directions in which they were pointing the blame, I suspect that they are pointing in all directions.

The Senate did not need to act timely because there was no one to respond to. This House had decided in its wisdom to go home and the Social Security Trust Funds got disinvested. That is bad policy; that is budgetary brinksmanship.

I suggest now we are at the edge of playing constitutional brinksmanship. This afternoon in the Michigan Legislature, the Michigan Senate voted 24 to 14 to push down the throats of this Congress a constitutional requirement that would either cause us to convene a convention or to offer forth an amendment. The reason they acted is because they are fed up. They recognize that a balanced budget in Michigan would create 30,000 new jobs in that State and Congress won't act.

Democrats and Republicans joined alike. They did not point fingers except at Washington, and they said get on with the business of getting your house in order.

Let me talk constitutional issues for just a second. The Senate substitute that we are asking you now to concur in assures that the act is constitutional by providing for a joint OMB/CBO report with GAO participation. I think my colleague from California mentioned the essentialness of CBO. I concur; so did the Senate. Maybe he ought to read the Senate amendment that was just sent back over. It dealt with the contracting issue that he was concerned about.

The Senate amendment contains an automatic fallback to cure any constitutional problem by providing for a joint resolution by Congress to trigger the sequester order. That is taken care of in the Senate amendment.

The severability clause in the Senate assures that a single constitutional flaw will not affect the entire act. Here we go again, I have to say to my colleagues, but more importantly to the American public. What did we send the Senate Friday? We sent a document that said if one "i" was not dotted properly, the whole law self-destructs. In other words, we said to the American people, "We really cannot do it; we are going to tell you we are going to try; but we are going to play games with it and it will self-destruct." We have taken care of that in the Senate version.

In the House democratic version, it means any constitutional flaw will kill the entire act. I do not think we ought to be doing that. That is brinksmanship in its finest form but not with us this time but with the American people. The House version ignores the presidential veto in determining whether a sequester order may be avoided by congressional action.

Mr. GEPHARDT. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. GLICKMAN].

Mr. GLICKMAN. Mr. Speaker, I support going to conference, but I hope that the conferees will consider a corporate minimum tax as part of the effort. I think there is a feeling here that is shared by the American people that deficit reduction should be borne not just by the poor, by the verterans, by health research, by agriculture, by defense or even by air safety but by corporations that do not pay their fair share of taxes, and there are a lot of them.

I think that this proposal should be shared both on the spending side as well as on the tax side. The other body has given us an opening. The other body has provided that they will try to pass a minimum tax by April 15 of next year. This minimum tax is not inconsistent with tax reform. It provides an equitable way, along with spending cuts, to get our deficits down.

My constituents cannot understand how we are making these enormous cuts without asking big defense contractors and big corporations that they should not share in the process also, and I hope that our conferees will keep this in mind when they go back to conference.

Mr. MACK. Mr. Speaker, I yield such time as he may consume to the gentleman from Arizona [Mr. KOLBE].

Mr. KOLBE. Mr. Speaker, I rise in support of the motion offered by the gentleman from Florida.

Mr. Speaker, the saga of deficit reduction continues. For the third time in the last 3 weeks, this body today has an opportunity to do something about deficits and to reduce the red ink that continues to pour across our budget.

The American people want something done about these deficits. They are not fooled by the efforts to throw a smokescreen across the serious efforts to reduce spending. They are not fooled by scare tactics about disinvestment of the Social Security Trust Fund. And they are disgusted by the finger pointing which is going on in a sad—and I predict, vain—attempt on the part of some Members to shed responsibility for this problem.

Mr. Speaker, when I was in my district over the weekend, I got a lot of questions about what we are doing to stop this deficit. But those folks weren't asking me about disinvesting the social security fund. Sure, they are concerned about that, but they know that is a sideshow to the main event. And they didn't ask about the merits of Rostenkowski or the Gramm-Mack amendments. Their message was simple: "Get back there to Washington and do something—do anything—about the deficit."

We ought to heed what these folks are telling us. Let's stop raising false issues. We are told on the floor this afternoon that disinvestment came about because the Senate failed to act last week by midnight of Friday. But the truth is that it was our rush to get out of town and our adjournment on Friday when this issue had not been resolved that brought about disinvestment. We could have avoided it. We are told we have to have Rostenkowski because of the safety net. But the truth is that picks and chooses which groups and which programs to protect and places all the burden of the cuts on the others. Is Head Start a less important program than Aid for Dependent Children? Are dislocated workers less important than veterans?

The truth is, a deficit reduction program will work only if it affects everyone. We can't pick and choose.

Mr. Speaker, let's get on with our business. Let's pass a deficit reduction plan and do it now.

Mr. MACK. Mr. Speaker, I yield 3½ minutes to the gentleman from Illinois [Mr. MICHEL].

Mr. MICHEL. I thank the gentleman for yielding me this time.

Mr. Speaker, first I would like to applaud the gentleman from Florida for offering this motion to give us a straight up-or-down vote on Gramm-Rudman. I think most Members of this House wanted to express their feelings on that issue.

Mr. Speaker, this is getting to be like a prizefight. We are in round 3 of the title bout on deficit reduction. There have been some blows struck, but I'm not sure who's winning.

That may be the problem here, Mr. Speaker. So many are so worried about who's going to win and who's going to lose. Our commitment to deficit reduction seems to have been left in the locker room with the rest of our dirty laundry.

We are just beginning to get a closer look at the Democratic majority's amendment which passed this House last Friday. It is not the best this body has to offer.

I've heard it argued that the Democratic majority's approach would cut more in 1986. Yet, I'm also told that if current annual GNP growth remains constant at 2.5 percent, the majority's plan will actually cut less.

I've heard it argued that the majority's approach provides protection to worthwhile programs. Yet, I can show you where protection for some programs would cause others, equally worthwhile, to be decimated beyond recognition. Those programs range from education of the handicapped to our national defense.

The new Senate version, on the other hand, has come a long way since its inception some weeks ago. Vague definitions have been made specific. Treatment of contracts is made clear. Affected programs are spelled out in detail. Constitutional questions have been answered. The baseline questions have been answered.

We need to move closer together on this issue, not farther apart.

This exercise in deficit reduction may be the model political scientists use to dramatize what the legislative process is all about. I hope, in the end, it is used as an example of how the system works not how it fails.

This exercise is critically important to the national debate over deficits and fiscal policy.

So far, we've bungled it as badly as it can be bungled. We had a regular circus performance over Social Security disinvestment. There was so much finger-pointing and politicking going on here, the House blew a golden opportunity to avoid that mess altogether. The politics of Social Security turned out to be more important than saving Social Security.

Now we are facing more deadlines. Next week the debt ceiling will be reached, the continuing resolution will expire, as will Superfund and the cigarette tax.

We all have long ago acknowledged that something needs to be done to control deficit spending. We have already committed ourselves to an approach along the lines of Gramm-Rudman. The Senate has now reaffirmed its belief in it. The House did so in instructions to conferees and with passage of the so-called Rostenkowski amendment.

□ 1830

Now, was that all a sham? Was it all just a token political gesture? If it was, let us clear the air right now and go on to other business. And let us keep in mind that that was not a close vote over in the other body today. It was a 3-to-1 majority. It had to be bipartisan to a great extent.

The gentleman from Idaho specifically made mention of those changes that were of real concern both to the majority and some on the minority,

and as has been pointed out several times here, they have been cleared up in those prior conferences that we have had and incorporated in the new package that now has been presented to us by the other body, and being made effective as it is in 1986.

Mr. Speaker, I think we ought to support the gentleman's motion. I certainly am going to do so.

The SPEAKER. The gentleman from Missouri [Mr. GEPHARDT] has 5 minutes remaining, the gentleman from Florida [Mr. MACK] has 3 minutes remaining, and the gentleman from Florida will close the debate.

Mr. GEPHARDT. Mr. Speaker, I yield 1 minute to the gentleman from Kansas [Mr. SLATTERY].

Mr. SLATTERY. Mr. Speaker, very briefly, it seems to me that the bottom line is this: Do we know what we are voting on, or not? And it is very clear that we do not know what we are voting on. There were Members of this body a week ago that were in here urging all of us to stampede this significant piece of legislation through this body, and today I would say that the majority of those Members who a week ago were saying, "Vote for this right now, trust us, it is all good," would not stand here in this well and defend the original proposal.

I would suggest to you that there are not very many Members in this body who can come down here right now and answer my questions about how this plan would affect the Commodity Credit Corporation, military construction and highway construction, Medicare, and a number of other things that we are all deeply concerned about.

As the gentleman from Texas earlier urged, common sense demands that we go to conference, study this thing, and know what we are talking about. Our constituents have a fundamental right to expect us to know what we are voting on, and I would dare say, Mr. Speaker, that the majority of the Members of this body right now do not know what is in this proposal that was just passed within the last few hours by the other body.

I strongly urge us in the name of common sense and good reason to support the effort to get this into conference.

Mr. GEPHARDT. Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. GRAY].

Mr. GRAY of Pennsylvania. Mr. Speaker, there are four tests that are important as we look at this very outstanding piece of legislation that concerns us all. No. 1 is the constitutional test: Does any legislation that we consider pass that, or will we make major changes in the checks and balances? Second, the economic test: Will what we do bring about an economic catastrophe because we may find ourselves in an economic downturn doing something that is bad for the economy? And third, the fairness test: Are we being fair to everyone in our society? Are we concerned about the widow, those who are poor and hungry who did not cause the deficit? And then finally, and the most important test of all, is the deficit-reduction test: Which proposal reduces the deficit the most?

Clearly the one that was proposed here last week does that by reducing the deficit and setting a target of $160 billion, whereas the one that comes from the other body calls for a deficit that is $20 billion higher.

I urge the Members to vote "no" on concurring and vote "yes" on going to conference so we will know what is in this new proposal, and whether the four tests can be met.

Mr. GEPHARDT. Mr. Speaker, I yield the balance of the time to the distinguished majority leader, the gentleman from Texas [Mr. WRIGHT].

The SPEAKER. The gentleman from Texas [Mr. WRIGHT] is recognized for 3 minutes.

Mr. WRIGHT. Mr. Speaker, it seems to me that there are three fundamental questions that we face. Basically we are deciding whether to go back to conference and try there to hammer out upon the anvils of mutual give-and-take some accommodation with which both Houses can live, embodying at least some of the things that we voted for so overwhelmingly in this House last week. Or, on the contrary, do we just cave in and accept the work of the other body without change, and to some degree sight unseen?

I think we want to do the former. If we want to do the former, we will vote "no" on this motion to accept Gramm-Rudman in toto, swallow it whole hog.

The first of those fundamental differences that exists is that the House position takes effect immediately. If you want to begin now, this year, to reduce these staggering deficits, you will vote "no" on this motion, and you will support the House position. The House position takes effect in fiscal year 1986; the Senate amendment would not.

The Gramm-Rudman proposal would allow the budget deficit to rise to $189 billion this year before it made the sequestration order applicable. That just happens to be at least $17 billion higher than both the House and the Senate voted for earlier this year when we adopted our concurrent resolution on the budget. Just this week, only yesterday, the other body rejected an amendment to set the sequestration trigger at $17 billion, which was the figure we earlier adopted.

So I suggest that if you want it to take effect now, if you want to reach a balanced budget sooner, you will vote "no" on this motion to swallow whole hog the Senate's work and abandon our own carefully crafted substitute.

The second difference is that the House substitute preserves at least some shred, some remaining portion of what is called the safety net. The President said, when he began with all his budget cutting, that he wanted there to be a safety net to catch those most vulnerable, those most helpless, those poorest, those most handicapped in our society. The House bill does that; the Gramm-Rudman bill does not.

Two illustrations make the point. With respect to the Medicare Program which assists our needy aged, the Senate would destroy any protection whatever for Medicare and make it subject to the same ax that would fall upon everything else. The House position at least protects it to the extent that it allows it to remain unharmed, at least from cuts below the preceding year's level. It puts it at a freeze, and it makes it subject to not gaining the cost-of-living adjustments, but at least it protects it to that extent.

In the second instance, there are questions of veterans' disability benefits for those who have suffered the loss of their wholeness in defense of their country. The House program places that in the same position as Social Security; the Senate does not.

So, Mr. Speaker, I say to the Members, if you do those things, if you would preserve some shred of the safety net, if you would preserve the constitutional balance, if you would preserve the House position, you will vote "no" on this motion.

The SPEAKER. The Chair recognizes the gentleman from Florida [Mr. MACK].

Mr. MACK. Mr. Speaker, I yield such time as he may consume to the gentleman from New York [Mr. BOEHLERT].

Mr. BOEHLERT. Mr. Speaker, I rise in support of the amendment and the American people who are fed up with paying $15 million an hour in interest on the national debt.

A previous speaker, the gentleman from Texas [Mr. LEATH] ventured the opinion that the Gramm-Rudman-Hollings proposal passed the other body on an "emotional basis." That may be so. The first time. But weeks later, the amendment again passed the other body by a near identical and overwhelming bipartisan vote. No emotionalism this time. Just sober reflection. Just a thoughtful, deliberative response to the expressed will of the American people.

The American people are saying to us, do something and do it now. Be fair, be even-handed, but do something.

They're fed up with annual deficits in the $200 billion range.

They're fed up with paying $360 million a day—every 24 hours—in interest on the national debt.

They're fed up with paying $15 million an hour in interest on the national debt.

Do something, say the American people. Be fair, be evenhanded, but do something. And do it now. The amendment before us offers the opportunity for all of us to respond to that call. I urge its adoption.

Mr. MACK. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am including in the RECORD information in support of my motion today, as follows:

U.S. CONGRESS,
CONGRESSIONAL BUDGET OFFICE,
Washington, DC, November 5, 1985.

Hon. ROBERT H. MICHEL,
Minority Leader, House of Representatives, Washington, DC.

DEAR MR. LEADER: I am enclosing, as you requested, tables showing the possible effects in 1986 of the House-passed and Packwood amendments to the debt ceiling bill. The tables use the same general approach as those provided to the debt ceiling conferees on October 24, while fully reflecting the provisions of the House-passed and Packwood amendments relating to specific programs.

For purposes of estimating the deficit, we have assumed an outlay base of $982.5 billion, which is the figure we have been using for all illustrative sequester calculations; this reflects current law for entitlements and other mandatory spending and 1985 levels for discretionary accounts. The assumed revenue base is $787.9 billion, which is an estimate of current law revenues under CBO August economic and technical assumptions, plus $0.2 billion for extension of superfund taxes at current rates. These estimates, however, are highly preliminary and are unlikely to be those which CBO would use for an actual report pursuant to the House-passed or Packwood amendments. The numbers in the final report could differ significantly from the numbers used above for illustrative purposes.

If you have any questions about these calculations or would like additional information, please call me, or have your staff contact Paul Van de Water (226-2880).

With best wishes,
Sincerely,

RUDOLPH G. PENNER.

Enclosures.

	House amendment	Packwood amendment
Computation of deficit reduction:		
Outlay base	982.5	982.5
Revenue base	787.9	787.9
Resulting deficit	194.6	194.6
Deficit target	161.0	180.0
Difference	33.6	14.6
Deficit reduction prorated for 9 mo	25.2	11.0
Distribution of spending cuts:		
Indexed programs	1.8	1.6
Other nondefense	9.9	4.6
Subtotal	11.7	6.2
Defense	13.5	4.8
Total	25.2	11.0
Outlay base:		
Exempt outlays:		
Exempt programs	348.4	297.9
Prior-year obligations	203.0	104.7
Subtotal	551.3	402.6
Outlays for indexed programs (category I):		
Base outlays	144.4	87.9
Indexing	1.8	1.6
Subtotal	146.2	89.5
Controllable outlays (category II):		
Defense [1]	164.5	248.9
Nondefense	120.5	241.6
Subtotal	285.0	490.5
Total	982.5	982.5
Percentage reduction in category II outlays	8.2	1.9

[1] For purposes of estimating the effects of the Packwood amendment, Senate staff has provided estimates of 1986 outlays in controllable programs resulting from prior-year contracts that may be reduced.

Emergency food and shelter	0	0	0	0

SENATE AMENDMENT HAS COME A LONG WAY FROM ORIGINAL GRAMM-RUDMAN

Now have a do-able, detailed procedure which can lead us successfully to a balanced budget instead of the "conceptual outline" that constituted the original bill.

Have now spelled out specifically how various programs are to be treated under sequestration procedures—

Vague definitions have been scuttled in favor of listing which programs are singled out for exemption or special treatment;

Treatment of prior-year defense contracts is clearly defined and new contracts are specifically required to be sequesterable;

Programs which are not susceptible to sequestration for legal or technical reasons have been singled out.

Have responded to the legitimate concern over the impact of a recession or economic down turn and to the difficulty of projecting the economic cycle accurately.

Senate amendment now addresses the constitutionality issue and allows for expedited judicial review of the new law and for severability in case certain provisions are found unconstitutional.

Recognizes the constitutional problems of leaving OMB and CBO to develop the report which triggers sequestration and instead gives Comptroller General the responsibility for reporting to the President and Congress.

Packwood Amendment recognizes that original bill failed to clarify the "baseline" against which the budget deficit is measured and generally adopts the House procedure for this.

CONSTITUTIONAL ISSUES—WHY PACKWOOD AMENDMENT IS PREFERABLE

Packwood substitute assures that the Act is Constitutional by providing for a joint OMB/CBO report with GAO participation.

Packwood contains an automatic fallback to cure any Constitutional problem by providing for a Joint Resolution by Congress to trigger the sequester order.

Severability clause in Packwood assures that a single constitutional flaw will not affect the entire Act.

House passed Act contains "poison pill" which is designed to have it self-destruct on Constitutional grounds.

Non-severability clause in House version means any single Constitutional flaw will kill the entire Act.

House version ignores a Presidential veto in determining whether a sequester order may be avoided by Congressional action. Congress gets "credit" for bills the President vetoes.

IS $161 BILLION A PHONY TARGET FOR FISCAL YEAR 1986?

The Democrats claim their $161 billion deficit ceiling for FY 1986 is "tougher action" and "more immediate" action on the deficit than the Gramm-Rudman plan. In fact at the current rate of real GNP growth of 2.5%, the Democrats' deficit ceiling is $180.1 billion—virtually identical to the Gramm-Rudman ceiling.

Many credible forecasters see real GNP growth for 1986 at 2.7% or below: Bank of America, N.A.; U.S. Trust Co.; Manufacturers Hanover Trust; Metropolitan Insurance; Chase Manhattan Bank; Equitable Life Assurance; Monsanto Company; Pennzoil Company; and Arthur D. Little.

At any rate of real GNP growth below 2.5% for FY 1986, the Democrats' plan would actually cut less than Gramm-Rudman. For FY 1987 and beyond, it would cut less than Gramm-Rudman at any rate of GNP growth below 2.7%.

DEFICIT REDUCTIONS UNDER GOP PLAN AND DEMOCRAT ALTERNATIVE

[In billion of dollars]

	Democrat alternative	Gramm-Rudman
Real GNP growth cuts:		
2.7 percent	$36	$36
2.5 percent	32	36
2 percent	21	36

WHY PACKWOOD AMENDMENT IS PREFERABLE TO HOUSE-PASSED AMENDMENT

By including more programs in the sequester pot, the Packwood amendment mitigates the impact of a sequester across a broad range of programs.

By contrast the House-passed amendment would require deep cuts in those programs not accorded preferential treatment.

The House amendment exempts $551 billion in outlays, while the Packwood amendment exempts only $403 billion in outlays.

Under the House amendment, with a deficit target of $161 billion, programs in Category II would have to be cut by 8.2%. Under the Packwood amendment, with a deficit target of $180 billion, those programs would only have to be cut by 1.9%.

In specific programs the impact is staggering:

Non-CCC Farm Programs would have to be cut by $577 million in budgetary resources under the House amendment, compared to $139 million under the Packwood amendment.

Student Financial Assistance would have to be cut by $404 million in budgetary resources under the House amendment, compared to $94 million under Packwood.

Head Start would be cut by $88 million under the House amendment compared to $21 million under Packwood.

Compensatory Education would be cut by $304 million under the House amendment compared to $71 million under Packwood.

Social Services Block Grant would be cut by $224 million under the House amendment compared to $52 million under Packwood.

Education for the Handicapped would be cut by $109 million under the House amendment compared to $25 million under Packwood.

Low Income Energy Assistance would be cut by $173 million under the House amendment compared to $40 million under Packwood.

TRIO and Aid to Developing Institutions (Historically Black Colleges) would be cut $26 million under the House amendment compared to $6 million under Packwood.

Maternal and Child Health Block Grant would be cut by $39 million under the House amendment compared to $9 million under Packwood.

Older Americans Programs would be cut by $94 million under the House amendment compared to $22 million under Packwood.

JTPA (Joint Training Partnership Act, excluding Job Corps and Dislocated Workers) would be cut by $241 million under the House amendment compared to $80 million under Packwood.

Brief Explanation of Senate Packwood Amendment

I. DEFICIT TARGETS

A. Realistic, provides for firm but orderly progress to a balanced budget by FY 1991, as follows:

Fiscal year:	*Billions*
1986	$180
1987	144
1988	108
1989	72
1990	36
1991	0

B. "Trigger levels" for sequestration require "statistically significant" excess over targets of *five percent* (i.e. $189 billion in FY 1986.)

C. Recession provisions allow Budget Committees to report a resolution suspending or revising provisions of the Act when two consecutive quarters of less than one percent GNP growth are projected or have occurred.

II. EXEMPTION AND SPECIAL TREATMENT OF PROGRAMS

A. Totally exempts the original items: Social Security, interest on the debt, earned income tax credit, plus a number of other programs excluded for technical reasons.

In addition to above:

B. House exempts: AFDC, Food Stamps, SSI, Veterans Pensions, Veterans Compensation, Child Nutrition, Migrant Health, Community Health Centers, and WIC.

Senate Exempts none of these programs but puts Food Stamps, Veterans Pensions and Compensation, SSI and Child nutrition in Category I.

C. House puts Medicare in Category I, while Senate puts Medicare in Category II.

III. TIMETABLE

	Fiscal year 1986	Regular (fiscal year 1987–91)
CBO/OMB report	Dec. 10, 1985	Sept. 15.
GAO report to President	Dec. 15, 1985	Sept. 25.
Presidential sequestration order.	14 days later; i.e., Dec. 29.	14 days later; i.e., Oct. 9.
Effective date of order	30 days after issuance; i.e., Jan. 28, 1986 (retroactive to Dec. 29).	30 days after issuance; i.e., Nov. 8. (retroactive to Oct. 9)

IV. PROVISION FOR CONGRESSIONAL RESPONSE TO SEQUESTRATION ORDER

A. Budget authority is withheld for 30 days following issuance of order;

B. If alternative reconciliation bill becomes law under expedited procedures during the 30 day period, budget authority is released to the extent permitted by law;

C. If no reconciliation bill, budget authority is permanently cancelled.

V. EXPEDITED CONGRESSIONAL BUDGET PROCESS

Senate amendment adopts Beilenson expedited timetable. Includes separate track for House procedures.

SPECIAL PROVISIONS

Programs	House	Senate
Unemployment	Regular state unemployment benefits and loans to the State and Federal unemployment accounts are exempt from sequestration. Federal benefits and administrative expenses are subject to sequestration.	Same, except for technical differences.
Guaranteed Student Loans	Allows reductions only in loans made after a sequester order is issued. GSLs entered into prior to a sequester order would not be affected.	Same as House.
	Limits sequestration reductions to two options, with reductions coming equally from both: —the special allowances for lenders could be reduced up to 0.40 percentage points, but not below 3.00 percentage points, in the year of the sequester order. —a student's origination fee could be increased by up to 0.50 percentage points.	Describes same two options as the House, but does not limit savings to these two options.
Child Support Enforcement	Federal matching rates for State costs are sequesterable.	Same.
Mineworkers Benefits	Black lung and coalminers benefit increases are treated the same as other automatically indexed programs.	Same, except for technical differences.
Foster Care, Adoption Assistance Programs, and AFDC.	Increases in foster care or adoption assistance payment rates (or both) which are to take effect during the fiscal year involved are subject to sequestration to the extent that the required matching payments attributable to increases taking effect during that year. AFDC is exempted.	Expenditures for aid to families with dependent children, foster care maintenance payments, adoption assistance payments, and administrative expenses, are sequesterable. No State may change the fiscal year in which expenditures for these programs are made.
Dept. of Defense—Military	Requires proportional sequestration of all programs, projects, and activities whether or not they are identified in a committee report or bill	The Senate bill would sequester outlays from budgetary resources which include new BA, unobligated balances and outlays from existing contracts which pass the "net loss" test.
Dept. of Defense—Military	The House bill sequesters only new BA, excluding unobligated balances and all outlays from prior year actions. It requires the sequestration to yield outlays savings in the same proportion that total outlays (as compared to controllable outlays) exist in the defense function. This greatly increases the BA reduction in the slow spending accounts. For example, the House language would require approximately double the budgetary resources than the Senate language for the same sequester.	General sequestering language would sequester at the lowest level of detail identified in the most recently enacted relevant appropriation acts and reports.
Medicare	Medicare would be treated entirely as a Category I (indexed) program. Sequestration would be limited to the indexed portions of medicare (as defined below). The indexes would be defined as the annual adjustments in hospital DRG rates, and in physician reasonable charge increase limits. Sequestration would be applied (as specified below) to the payment increases specified in statute, regulations for Federal Register promulgations. (The law requires annual promulgations specifying DRG rates and physicians fee limits). If these regulations provide an increase over the payment levels in effect when the regulations are issued, sequestration could be used to reduce that proposed increase by the necessary percentage, down to zero. If these regulations establish a payment level equal to or lower than that in effect when the regulations are issued, sequestration could not reduce the payment level below that specified in the regulations.	Reductions shall apply to payments under Title XVIII of the Social Security Act so as to reduce all payments under such title for items or services furnished during the period of the order by the specified uniform percentage reduction. The President may not, pursuant to any authority granted in this section increase any deductible, coinsurance amount, or premium amount under such * * *. This clause shall not apply to payments for clinical diagnostic laboratory tests to which section 1833(h) the Social Security Act applies.
Social Security and Medicare Administrative Expenses.	Exempt.	Administrative expenses for social security are sequesterable like other controllable expenditures.
Medicaid	For all intents and purposes, Medicaid is treated as a Category I program. The only action under a sequester order would be to allow the President to prohibit Federal matching for State increases in Medicaid provided payments (hospital and physicians) to the extent necessary to achieve the needed reductions. As noted, only an increase in a State benefit payment or rate would be subject to sequestration.	Reductions shall apply to payments under Title XIX of the Social Security Act so as to reduce all payments to States under such title for State expenditures for medical assistance furnished, and administrative expenses incurred, during the period of the order by the uniform percentage reduction specified in the order as it applies to all other controllable expenditures.

SPECIAL PROVISIONS—Continued

Programs	House	Senate
CCC	Language is unspecific to the operation of the sequestration order for programs administered by the CCC. Depending upon interpretation, the CCC language in the House amendment could well result in the substantial exemption of CCC farm programs from a sequestration order. In any case, the provision allows reductions only in CCC loans and agreements entered into after a sequester order is issued for the applicable fiscal years. Payments and loan eligibility under any contract entered into with a producer by the CCC prior to the time a sequester order has been issued shall not be reduced. It has not specifically addressed reductions in noncontractual price support programs administered through CCC, but presumably such programs would be included under the general provisions of the House language as a "controllable" expenditure.	Specifically allows producers of the same crop, but in different regions of the Country, to be treated the same, regardless of the timing of a sequestration order and the beginning of a fiscal year. The Senate language also allows the Secretary to adjust both target prices and loan rates to achieve the required uniform percentage reduction of the sequester order. The Senate language clearly addresses how contractual price support programs should be affected by a sequestration order and includes CCC administrative costs as a controllable expenditure. The House amendment is silent on these issues.
Federal Pay	Pay accounts (salaries & expenses) are sequesterable except that the rate of federal civilian pay may not be reduced under a sequester order; Pay increases may be reduced but not below zero. RIFs and furloughs are to be a last resort. Note: House omits any reference to military basic pay, therefore, it appears to be fully sequesterable.	Pay accounts (salaries & expenses) are sequesterable except that the rate of federal civilian pay and military basic pay may not be reduced under a sequester order; Pay increases may be reduced but not below zero.

SIDE-BY-SIDE COMPARISON—SENATE AND HOUSE VERSIONS OF BALANCED BUDGET AND EMERGENCY DEFICIT CONTROL ACT OF 1985

MAXIMUM DEFICIT AMOUNTS AND RECESSION PROVISIONS

House	Senate
FY 86 $161 billion.* FY 87 $110.2 billion.* FY 88 $57.2 billion.* FY 89 $4.2 billion.* FY 90 $0.* FY 91 $0.*	FY 86 $180 billion. FY 87 $144 billion. FY 88 $108 billion. FY 89 $72 billion. FY 90 $36 billion. FY 91 $0. Numbers not subject to change.

* These numbers are subject to change under the following formula: MDA = Deficit for preceding fiscal year (as calculated by CBO) minus 20% of FY 1985 deficit amount (except that this percentage shall be increased by 1% for each 1/10 of a percent by which GNP exceeds 3% and this percentage shall be reduced by 1% for each 1/10% by which GNP is less than 3%).

MAXIMUM DEFICIT AMOUNTS AND RECESSION PROVISIONS

House	Senate
When GNP growth falls below 1%, there shall be no maximum deficit amount; when it falls below zero, budget committees would have same power to report a resolution as in Senate version	If estimates of GNP growth in CG's report is less than one percent (Levin amendment), or Dept. of Commerce's preliminary reports indicate below zero growth for 2 consecutive quarters of fiscal year (including the two quarters immediately preceding the fiscal year), then budget committees may report resolutions suspending Gramm-Rudman.
If average rate of unemployment for 2 consecutive months is 1% above previous year, points of order against legislation breaching MDA would not be available	No such provision.

BUDGET PROCESS TIMETABLE CHANGES

House	Senate
President's Budget: 1st Monday after January 3rd.	Same.
CBO report: February 15th.	Same.
Views and Estimates: February 25.	Same.
Completion of Action on Budget Resolution: April 15th.	Same.
Authorization reporting deadline: Eliminated.	Current law: May 15th..
House Appropriations Committee reports last bill: June 10th.	Same.
Reconciliation deadline: June 15th.	Same.
House completes action on regular appropriations bill: June 30th.	Same.
In the House, not in order to consider a July adjournment of more than 3 days until appropriations work complete.	Same.

BUDGET RESOLUTION

House	Senate
To include BA, outlays, entitlement authority, direct loan obligations, primary loan guarantee commitments.	Current law: BA, outlays.
Point of order against budget resolution (301 or 304) which exceeds MDA.	Same.
Amendments which would cause MDA to be exceeded not in order.	Amendments which would cause a budget resolution deficit level—for any of the fiscal years—to be exceeded would not be in order.

COMMITTEE ALLOCATION

House	Senate
Allocations to apply to "discretionary action".	No such concept in the Senate.
Allocations can be for 1, 2, or 3 fiscal years.	Current law: only upcoming fiscal year.
Allocations of:	Current law: Allocations of—
New BA.	New BA.
New entitlement authority.	Outlays.
New direct loan obligations.	
New primary loan guarantees outlays will not be allocated; only divided among committees for informational purposes).	
Allocation enforcement: point of order to apply to 302(a) allocations.	Allocations enforcement: point of order to apply to 302(b) allocations.
No such provision.	Allocation enforcement: referral procedure exception for entitlement authority.
Same (but includes credit).	Not in order to consider a committee's spending bills until 302(b) suballocations are filed.
Same.	Committee allocations can be altered.

SECTION 303 POINT OF ORDER

House	Senate
Made applicable to new credit authority.	Same.
Re-write of subsection (b) exception language which alters operation of the exception.	No such provision.
Point of order lapses May 15.	No such provision.

RECONCILIATION

House	Senate
Does not allow reconciliation of authorizations.	Current Precedents: allow reconciliation of authorizations.
Instructions would apply to total savings for 1, 2, or 3 years.	Current Precedents: instructions apply to amounts for each of the 3 fiscal years.
House Rules Committee may make in order amendments to bring committees into compliance with instructions.	No such provision.
Not in order to consider amendments which would breach deficit level in most recent budget resolution.	Not in order in the Senate to consider amendments which would breach deficit level in most recent budget resolution.
No such provision.	In the House, reconciliation provisions must be related to the purposes of the instructions.

SECTION 311 POINT OF ORDER

House	Senate
Would cover bills providing new credit authority.	No such provision.
5 Separate Spending Ceilings:	Current law:
Total new BA.	Total new BA.
Total outlays.	Total outlays.
Total entitlement authority.	
Total direct loan obligations.	
Total primary loan guarantees.	
Fazio exemption included: committees held harmless if within allocations.	No such provision.

CHANGES TO TITLE IV OF THE BUDGET ACT

House	Senate
Section 401(b)(1) point of order eliminated.	No such provision.
2 new types of "backdoor authority" made subject to appropriations:	No such provision.
—Authority to forego collection of proprietary offsetting receipts.	
—Authority to make payments (including loans, grants, and payments from revolving funds) other than those covered by the other 4 types of spending authority.	
Point of order against new credit authority unless subject to appropriations.	No such provision.
GAO study of forms of Federal financing.	Same provision.
All programs presently off-budget brought on-budget; referral procedure to Gov't. Ops, Gov't. Affairs if attempt is made to take programs off-budget.	Off-budget programs including FFB to be included for purposes of this law.
"Member User Group" in House to review scorekeeping practices.	No such provision.

SOCIAL SECURITY

House	Senate
Reissue of obligations to social security and other retirement funds, as if debt limit increase had been enacted August 1, 1985.	No provision.
Appropriation to social security and other retirement funds lost interest as if debt limit had passed August 1, 1985.	Same provision.
OASI.	
DI.	
HI.	
SMI.	
Railroad Retirement.	
Civil Service Retirement and Disability.	
DOD Military Retirement.	
Social Security is moved off-budget and excluded from Presidential and Congressional budget.	Same provision.
Receipts and disbursements of OASDI to be included in budget totals for purposes of this law.	Same provision.

MISCELLANEOUS PROVISIONS

House	Senate
No such provision.	Report on tax collection.
No such provision.	Social Security COLA's not to count as income for purposes of determining SSI payments.
No such provision.	Presidential report by Nov. 8, 1985 on implications for DOD obligations if deficit reduction is achieved entirely by sequestering (Hart amendment).

COMMITTEE JURISDICTIONS

House	Senate
In the House, if Budget Committee reports a budget resolution with provisions which have the effect of changing House rules, then the resolution is referred to Rules which can report an amendment.	Same.
Budget Committees to "consult" with spending committees on budget resolutions.	Same.

ECONOMIC ASSUMPTIONS AND REVENUE ESTIMATES

House	Senate
Joint explanatory statement accompanying a conference report to set forth the common economic assumptions.	No similar requirement.
All revenue estimates for purposes of this law to be made by JCT, and transmitted to CBO.	Same.

CBO

House	Senate
Recommendations on appointment of Director to come from all committees, not just budget committees. Similar provision.	No such provision. CBO cost estimate for conference reports.

WAIVER PROVISIONS

House	Senate
3/5 duly chosen and sworn waiver in Senate for sections 305(b)(2) and 306. 3/5 duly chosen and sworn waiver in Senate for provisions of this law. No such provision. Declaration of war: automatic waiver of point of order and presidential order. No such provision	3/5 duly chosen and sworn waiver in Senate for sections 301(c), 304(b)(2), 306, 310(c), and 311 of Budget Act, and sections 202(c)(1)(B), 204(c)(1)(D), and 209 of Gramm-Rudman. Same. 3/5 of members in House to waive point of order with respect to consideration of a conference report which exceeds MDA or consideration of a motion to concur in a Senate amendment which exceeds MDA. Same. 3/5 of members in House to waive 302(b) point of order.

PRESIDENT'S BUDGET

House	Senate
President's budget to adhere to maximum deficit amounts. Implementing legislation to be submitted two weeks after budget.	Same. No such provision.

REPORT TO PRESIDENT

House	Senate
To be done by CBO (in consultation with OMB). Report to President on August 20 (or 14 days after enactment for FY 86): —Determine whether deficit expected as of Aug. 15 exceeds MDA by $10 billion. —Estimate GNP growth. —Specifications of needed sequestering percentages. Baseline Computation: —Assume current law for revenues, entitlements and other mandatories. —Assume prior year's appropriations for discretionary expenditures unless a regular appropriation or CR passed. —Assume expirations will occur except for excise taxes dedicated to a trust fund and CCC price supports. —Assume that federal pay will be as recommended by President (but no decreases assumed). —Assume medicare spending levels to be in accord with regulations. —If appropriations and reconciliaton completed, baseline to take account of such bills.	To be done by GAO (with due regard for estimates provided by CBO and OMB in a September 15 report; FY 86–Dec. 10). Report to President on September 25 (December 15 for FY 86): —Determine whether deficit will exceed MDA by statistically significant amount. —Estimate GNP growth. —Specifications of needed sequestering percentages. Baseline Computation: —Assume current law for revenues and outlays. —Assume prior year's appropriations where a regular or continuing appropriation has not been enacted. —Assume expirations will occur except for excise taxes dedicated to a trust fund and CCC price supports.

Note: Revised Estimates by CBO on October 5.

PRESIDENTIAL ORDER

House	Senate
To be issued September 1 (for FY 86, 14 days after report by CBO) if: MDA exceeded by $10 billion (for FY 86, if MDA exceeded by any amount)	To be issued not later than 14 days after Comptroller General's report if: Real growth is zero or greater and deficit is 5% over MDA. To be issued 30 days after Comptroller General's report if: Real growth is less than zero and Deficit is 5% over MDA.
Order to be effective as of October 1 (for FY 86, 30 days after date of issuance) automatic spending increases: President not to withhold any portion which represents an automatic increase becoming effective on October 1 and with respect to which the adjustments required by the order cannot be accomplished prior to the end of that month; reductions to be made within 15 days, but recoupment not to occur if reduction does not begin within this period.	Order to be permanent 30 days after its issuance.
Issuance of Final Order on October 1 (for FY 86, December 20) taking account of October 5 revised report)	No such provision.
Final Order to become effective on October 15 (for FY 86, 30 days after revised report)	No such provision.
FY 86 Order to be prorated as to number of months remaining in fiscal year	Same provision.
Appropriations Committees may define "program, project, and activity"	No such provision.
Sequestered funds are permanently cancelled (except for amounts sequestered in trust funds which became available at the end of the year).	BA withheld for 30 days following issuance of order; If an alternative reconciliation bill becomes law during 30 day period, BA is released to extent permitted by law; If no reconciliation bill, BA is permanently cancelled at end of 30 days.
One-half of deficit overage to be eliminated by reducing specified automatic spending increases (although not below zero); eliminates the remainder by sequestering outlays for direct spending programs, and new BA, new direct loan obligations, and obligations limitations for discretionary programs.	One-half of deficit overage to be eliminated by reducing automatic spending increases (although not below zero); other half to be eliminated by sequestering BA, obligation limitation, other budgetary resources, and loan limitation and by adjusting payments provided by the Federal Government, so as to reduce outlays from each affected program, project, or activity by a uniform percentage.
Sequester orders shall not have effect of eliminating any program, project, or activity	Same language.
No similar language	Alternative Congressional Plan: Budget Committees may report concurrent resolution which affirms presidential order and/or issues reconciliation instructions to achieve required deficit reduction—Debate in Senate: 10 hours. Committees to respond to instructions within 10 days. Budget Committees to package legislation without revision, except revisions may be made to bring committees into compliance with instructions. Reconciliation bills which would breach MDA not in order unless in a period of negative real growth.

SPECIAL PROVISIONS

Programs	House	Senate
Federal Pay	Federal pay under a staatutory pay system (within the meaning of section 5301(c) of title 5 shall be treated as constituting a controllable expenditure and shall be subject to reduction under the order in the same manner as other administrative expense components of the Federal budget; except that no such order may reduce or have the effect of reducing the rate of pay to which any individual is entitled under any such statutory pay system. Program managers should implement methods of realizing the savings requaired under a sequestration order other than furloughing personnel, which should only be implemented if the other methods are insufficient..	Federal pay under statutory pay systems (within the meaning of section 5301(c) of title 5, United States Code) and military pay (as defined in section 101(3) of title 37, United States Code) shall be treated as controllable expenditures and shall be subject to the uniform percentage reduction under the order; except that (i) no such order may reduce the rate of civilian pay or military basic pay to which any individual is entitled on the effective date of the order and (ii) any increase in rates of civilian pay or rates of military basic pay which is scheduled to take effect may be reduced under such order only by the uniform percentage reduction.
Mineworkerss Benefits	Black lung and coalminers benefit increases are treated the same as other automatically indexed programs..	Same, except for technical differences.
Foster Care, Adoption Assistance Programs, and AFDC	Increases in foster care or adoption assistance payment rates (or both) are subject to sequestration by reducing federal matching payments.. AFDC is exempted.	Expenditures for AFDC, foster care maintenance payments, adoption assistance payments, and administrative expenses, are sequesterable. No State may change the fiscal year in which expenditures for these programs are made.
Outlays for Prior Year Obligations	Exempted	Excluded except for outlays from contracts already signed but which may be reducad or terminated without a net loss to the government or without violating legal obligations of the government.
Unemployment Compensation	Regular state unemployment benefits and loans to the State and Federal unemployment accounts are exempt from sequestration. Federal benefits and administrative expenses are subject to sequestration..	Same, except for technical differences.
Guaranteed Student Loans	Allows reductions only in loans made after a sequester order is issued. GSLs entered into prior to a sequester order would not be affected..	Same as House.
	Limits sequestration reductions to two options, with reductions coming equally from both:. —the special allowance for lenders could be reduced up to 0.40 percentage points, but not below 3.00 percentage points, in the year of the sequester order. —a student's origination fee could be increased by up to 0.50 percentage points	Describes same two options as the House, but does not limit savings to these two options.
Child Support Enforcement	Federal matching rates for State costs are sequesterable.	Same.
Department of Defense—Military	Requires proportional sequestration of all programs, projects, and activities whether or not they are identified in a committee report or bill..	The Senate bill would sequester outlays from budgetary resources which include new BA, unobligated balances and outlays from existing contracts which pass the "net loss" test.
	The House bill sequesters only new BA, excluding unobligated balances and all outlays from prior year actions. It requires the sequestration to yield outlay savings in the same proportion that total outlays (as compared to controllable outlays) exist in the defense function. This greatly increases the BA reduction in the slow spending accounts. For example, the House language would require approximately double the budgetary resources than the Senate language for the same sequester..	General sequestering language would sequester at the lowest level of detail identified in the most recently enacted relevant appropriation Acts and reports.
CCC Loans	This title shall not restrict the Commodity Credit Corporation in the discharge of its authority and responsibility as a corporation to buy and sell commodities in world trade, to use the proceeds as a revolving fund to meet other obligations and otherwise operate as a corporation, the purpose for which it was created. Payments and loan eligibility under any contract entered into with a producer by the Commodity Credit Corporation prior to the time a sequestration order has been issued shall not be reduced by a sequestration order subsequently issued, but any contract entered into after a sequestration order has been for the applicable fiscal year, by which the Commodity Credit Corporation and entities providing Federal guarantees for student loans shall agree to make payments out of an entitlement account to any person, lender, or guarantee entity, shall be deemed to be controllable expenditures and shall be subject to reduction under the Presidential order: Provided, That the reduction in the level of commodity price support programs, supported through the Commodity Credit Corporation, shall not exceed a uniform percentage of reduction specified for those programs in the order..	(i) Reduction in payments made under contracts.—After an order, any payment made by the Commodity Credit Corporation— (I) under the terms of any contract entered into in such fiscal year; and (II) out of an entitlement account, to any person (including a producer, lender, or guarantee entity) shall be deemed to be a controllable expenditure and shall be subject to reduction under the order. Any contract entered into in a fiscal year after an order has been issued under subparagraph (A) for such fiscal year shall provide explicitly for such reduction to be made for the entire period for which such contract is in effect and that in regard to commodity loans made to producers or producer cooperative for a commodity produced in the same crop year, those loans for the same commodity shall be subject to the same terms and conditions. (ii) Reduction in noncontractual price support programs.—Price support provided for an agricultural commodity through the Commodity Credit Corporation by a method other than a payment of the type described in clause (i) shall be deemed to be a controllable expenditure, and such level of price support for the fiscal year for which an order is issued under this subsection shall be subject to reduction under the order. (iii) Adjustments to achieve reductions.—In order to reduce expenditures for programs of the Commodity Credit Corporation as required under the Presidential order, the Secretary of Agriculture is authorized to adjust both target prices and loan rates in such manner as to achieve the required percentage reduction of such order. (iv) Operating and administrative expenses.—Operating and administrative expenses of the Commodity Credit Corporation shall be considered controllable expenditures and shall be subject to reduction under the order. (v) Uniform percentage rate of reduction.—All reductions described in clauses (i), (ii), (iii), and (iv) required to be made in connection with an order issued under subparagraph (A) for a fiscal year shall be made at a rate exceeding the rate of reduction specified in the order for the programs to which such subsections apply.
Medicare	The only provisions which are to be considered automatic spending increases are: (A) The provision of section 1886(b)(3)(B), 1886(d)(3)(A), and 1886(e)(4) of such title (relating to increases in payment amounts for inpatient hospital services), to the extent that regulations issued pursuant to those provisions permit any percentage increase. (B) The provisions of section 1842(b) of such title relating to payment for physicians' services, to the extent they permit an annual increase in the medical economic index (referred to in the fourth sentence of such section).	Considered controllable: Reductions shall apply to payments under title XVIII of the Social Security Act so as to reduce all payments under such title for items or services furnished during the period of the order by the specified uniform percentage reduction. The President may not, pursuant to any authority granted in this section, increase any deductible, coinsurance amount, or premium amount under such title. Does not apply to payments for clinical diagnostic laboratory tests.
Social Security and Medicare Administrative Expenses	Exempt.	Administrative expenses for social security and medicare are sequesterable like other controllable expenditures.
Medicaid	The only provisions of such title which are considered to require an automatic spending increase are the provisions of sections 1902(a)(13)(A) and 1903(a)(1) of such title, and only to the extent that an increase in Federal payments to a State would otherwise occur under section 1903(a)(1) of such title as a result of an increase in payment rates established by a State with respect to the rate established for the previous fiscal year for inpatient hospital services or as a result of an increase in an index used by the State which applies to the rate of increase in payment for physicians' services over the previous fiscal year..	Reductions shall apply to payments under title XIX of the Social Security Act so as to reduce all payments to States under such title for State expenditures for medical assistance furnished, and administrative expenses incurred, during the period of the order by the uniform percentage reduction specified in the order as it applies to all other controllable expenditures.

JUDICIAL REVIEW; SEVERABILITY

House	Senate
If after all appeals are exhausted, a provision is found to be unconstitutional, then all provisions of this law automatically expire and all spending shall exist as if this law had not operated.	If any provision of this title is held invalid, the remainder of such provisions shall not be affected.
At any time within 60 days after this law takes effect, any member of Congress may sue for an injunction to suspend a presidential order on the grounds that the CBO reporting provision is unconstitutional.	Any member of Congress may sue for an injunction or declaratory order on the constitutionality of this law.
Any member of Congress may sue on grounds that the President has not complied with this law.	Same.
No single Supreme Court Justice may enjoin a presidential order.	Same.
No such provision.	If the President does not issue a sequester order as required by this law, on a claim of constitutional powers, if a court upholds such a claim as valid, then the entire presidential order at issue shall lapse.
Not such provision.	If the reporting procedure by the Comptroller General is held unconstitutional, then the OMB/CBO report shall be transmitted to a Temporary Joint Committee on Deficit Reduction composed of the members of the Budget Committees; Joint Committee shall report a joint resolution which could then trigger sequestering if enacted.

EFFECTIVE DATE

House	Senate
Changes to congressional budget process effective immediately and permanently; however, all the provisions relating to maximum deficit amounts would, in effect, lapse since there is no MDA for fiscal years beyond FY 91.	Changes to budget process expire at end of FY 91.
Emergency presidential powers apply only with reference to fiscal years 86–91.	Same.
Provisions with reference to transfers between the general fund and OASDI trust funds are permanent.	Same.

GENERAL LEAVE

Mr. MACK. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my motion, and that I may include extraneous materials with my remarks.

The SPEAKER. Is there objection to the request of the gentleman from Florida?

There was no objection.

Mr. MACK. Mr. Speaker, I yield 3 minutes to the gentleman from Wyoming [Mr. CHENEY] to close debate for our side.

Mr. CHENEY. Mr. Speaker, I thank the gentleman for yielding me this time.

Mr. Speaker, I think we have all grown tired of the debate. My constituents are tired of the debate, and I think the American people are tired of the debate.

The charges have been made here today that somehow this package is unknown to the Congress. The fact is that it was laid before the conference on October 31 and printed in the RECORD last week. It has received far more study than the package that the Democrats passed overwhelmingly last week and which showed up on the floor only at the moment of the vote.

With respect to the fairness charge, it is clearly not fair to cut the budget if we are going to exempt 71 percent of the programs from those cuts. We talk about hitting the budget in 1986, and it is clear that the package that is before us today, as passed by the Senate, does indeed begin the cuts in 1986. So we have heard a lot of phony arguments offered today.

Mr. Speaker, what I want to speak about is failure. I want to talk about the failure of this institution and the other body and the President of the United States to come to grips with what clearly is the most serious public-policy problem of the year.

□ 1840

I think it is important, and I would like to stress with my colleagues on the other side of the aisle, if I might, that we really would like to work out a bipartisan plan that has decent prospects to work and we think we have done it; that the program that is before us incorporates many of the proposals, worthy proposals that were developed in the conference just last week.

We have tried to allay the concerns about fairness by excluding Social Security. We have wrestled with the constitutional questions. We have included GAO.

I am personally convinced, based upon the work that the American Law Division has done at the Library of Congress, that this is indeed a constitutional package.

We have added extensive limits on Presidential power and authority to make it clear that this is not a surreptitious effort to transfer authority to the President of the United States.

The bottom line, Mr. Speaker, is that this bill puts the wood to the President and to the Congress; it will force both institutions to respond and make some of those difficult choices that so far for a long time we have been able to avoid.

Always in the past we have come to the table and had Congress take Social Security off of the table. We have had the President take defense off of the table. We have had taxes taken off the table. We have had the Democrats in the House take off many of the domestic programs. So that when we got through, the only thing that was negotiable was the deficit.

What this bill would do, Mr. Speaker, is make it clear that we no longer have the option, be it the Congress or the President, of financing continued increases in programs by running up the deficit.

Please, I would ask my colleagues, after a lot of deliberation and serious effort, support what is a sincere effort on the part of the Republicans, a bipartisan effort on the part of the Senate, to produce a meaningful bipartisan program that will make it possible for us to carry out our foremost responsibility, to manage the fiscal affairs of the Nation in a responsible manner.

The SPEAKER. All time has expired.

Without objection, the previous question is ordered on the preferential motion.

There was no objection.

The SPEAKER. The question is on the preferential motion offered by the gentleman from Florida [Mr. MACK].

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. MACK. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members.

The vote was taken by electronic device, and there were—yeas 177, nays 248, not voting 9, as follows:

NOT VOTING—9

Addabbo	Dannemeyer	Fuqua
Clay	Evans (IA)	Loeffler
Conyers	Fowler	Nelson

□ 1855

The Clerk announced the following pairs:

On this vote:

Mr. Loeffler for, with Mr. Nelson of Florida against.

Mr. Dannemeyer for, with Mr. Fuqua against.

Mr. RALPH M. HALL changed his vote from "yea" to "nay."

So the preferential motion was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

APPOINTMENT OF CONFEREES ON HOUSE JOINT RESOLUTION 372

Mr. GEPHARDT. Mr. Speaker, I move to take from the Speaker's table the joint resolution (H.J. Res. 372) increasing the statutory limit on the public debt, with the Senate amendments to the House amendments to the Senate amendments Nos. 1 and 2, disagree to the Senate amendments and request a further conference with the Senate thereon.

The Clerk read the title of the joint resolution.

The SPEAKER. The gentleman from Missouri [Mr. GEPHARDT] will be recognized for 30 minutes and the gentleman from Mississippi [Mr. LOTT] will be recognized for 30 minutes.

The Chair recognizes the gentleman from Missouri [Mr. GEPHARDT].

Mr. GEPHARDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, it appears clear to me, in view of the vote taken on the other body's version of this legislation, that we need a further conference on this matter.

Twice this House has now expressed itself on this matter. I sincerely hope that the other body will now come to this conference with a new spirit of compromise on Gramm-Rudman.

We cannot afford any longer to play chicken with the fiscal solvency and integrity of this Government.

Mr. Speaker, I urge Members to vote for the motion to go to conference.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I will be brief on this particular motion because I know the Members know what the issues are, and I will have a motion to instruct conferees, but what I would like to do is to address a question to the gentleman from Missouri.

The gentleman from Missouri has made the point that we should go back to conference now and work together to see if we can resolve differences that still exist, but I made the point earlier that I am very much concerned about our ability to get together, meeting in Kennedy Stadium. We had earlier 48 House conferees. I hear a rumor that that number is going to be increased.

Could the gentleman give us any information about the limits on the size of the conference, and does he recognize—I am sure he recognizes—that it is going to be very difficult to work out a responsible agreement in this difficult area if we are trying to deal with 65 people.

Can the gentleman please inform us as to what the situation is and respond to that?

Mr. GEPHARDT. If the gentleman will yield, I cannot say to the gentleman exactly how many or who will be appointed as conferees. The Speaker must make that judgment.

It would be my suspicion that the same conferees who were appointed before will be appointed again, but again, that is the Speaker's judgment.

With that number, which was a large number, we were able to break into task forces. We were able to reach a lot of agreements on, I would say, two-thirds of the matters at issue. There is no reason that same pattern could not be followed again and that we could reach agreement on the five or six issues that remain.

I do not think the number created our problem. I think our problem was created by the Senate's unwillingness to have hard negotiations about the five or six issues that remained in contention. I do not think that lack of willingness is going to be there. I think this time they are going to negotiate and I do not see the number of conferees as being a barrier to our coming to a resolution of this issue.

Mr. LOTT. I heard the gentleman's comments earlier, I believe, or perhaps someone else's, about the Senate's unwillingness to negotiate. It was very evident to this Member of the conference that really was attended was a series of amendments that were intended to show political positions and intended to try to embarrass Members

and were not really intended to come to some conclusions. But that is history.

I am worried about how we get together and work this thing out at this point. I just want the Members to know that, as a matter of fact, there are going to be, as I understand it, 53 House conferees. I hope that at some point a representative group of a half-dozen or nine of our colleagues representing both sides can get together and bring this thing to a conclusion next week before the debt ceiling expires and the Government does shut down. I am willing to work toward finding that conclusion.

Mr. GEPHARDT. This side is more than willing to do that, and I would suggest that we can find ways and procedures to reach an agreement.

Mr. LOTT. Mr. Speaker, I yield back the balance of my time.

□ 1905

MOTION TO INSTRUCT OFFERED BY MR. LOTT

Mr. LOTT. Mr. Speaker, I offer a motion to instruct.

The Clerk read as follows:

Mr. LOTT moves that the managers on the part of the House, at the conference on the disagreeing votes of the two Houses on House Joint Resolution 372, be instructed to agree to provisions that will include a schedule of reductions in the deficit in fixed amounts that will lead to a balanced budget by 1991; and that the conferees be further instructed not to agree to section 275 (nonseverability) in the amendment of the House.

The SPEAKER. The gentleman from Mississippi [Mr. LOTT] is recognized for 1 hour.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I do not think it would be necessary to take the full hour to debate this motion to instruct, but I would like for my colleagues to make sure they understand what is in this motion to instruct.

Mr. Speaker, the motion to instruct conferees does two things. No. 1, it instructs the conference to agree to provisions that will include a schedule of reductions in the deficit in fixed amounts that will lead to a balanced budget by 1991. It does not say how it will begin. It does not say how much must be included in each year. It just says there must be a scheduled amount fixed each year that would get us to a balanced budget by 1991.

Now I want to be honest with you; this does conflict somewhat with the language that the gentleman from Wisconsin [Mr. OBEY] included in the House version. I think his version allowed for some fluctuation, and there is some question about whether or not it would ever get us to a balanced budget, particularly in 1991.

So it is a fixed scheduled reduction to a balanced budget by 1991.

Mr. HUCKABY. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I will be glad to yield to the gentleman from Louisiana.

Mr. HUCKABY. Mr. Speaker, I thank the gentleman for yielding.

In the Senate version that was first sent to us, the trigger provision for recessions was in there. Is the gentleman suggesting that we back away from that by his fixed amount per year?

Mr. LOTT. No. I think that, I would hope that we would go with that fixed amount that we have. After the trigger is imposed that we would go with the fixed amount that is in the other body's version. But this instruction does not mandate that. It just says at least come back with some systematic, fixed amount in each year that would get us to a balanced budget.

What I am trying to get us to do is to make sure that we do not use floating targets or GNP considerations or other things that might lead us to not having a balanced budget in 1991.

Mr. HUCKABY. If the gentleman will yield further, the point is then you are saying let us go away from GNP with your instructions? In other words, if they have a one-tenth of 1 percent growth, we could cut the same amount as if they have a 3-percent growth in GNP; is that correct?

Mr. LOTT. The fixed amount could vary, but the answer to your direct question, I think, would be yes.

Mr. HUCKABY. I thank the gentleman.

Mr. GRAY of Pennsylvania. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am happy to yield to the gentleman from Pennsylvania.

Mr. GRAY of Pennsylvania. Mr. Speaker, I would like to ask the gentleman from Mississippi, does your proposal call for 1991, did you say, or 1990?

Mr. LOTT. The proposal calls for 1991.

Mr. GRAY of Pennsylvania. So, therefore, you would call for a fixed target that would reach a balance by 1991 as opposed to what was passed here in the House last week which did it in 1990; is that correct?

Mr. LOTT. It is not opposed to anything. It just specifies that we are going to have a fixed schedule that would get us there by at least 1991.

Mr. GRAY of Pennsylvania. I thank the gentleman.

Mr. LOTT. The second point is it would instruct the conferees further not to agree to section 275. That is the nonseverability clause in the House amendment.

I made this comment last Friday. I am very much worried that there have been expressions of concern on both sides about the constitutional question, and one of the specific points that was raised during the debate in the Conference Committee was about the involvement of CBO and the possibility of the unconstitutionality of the Congressional Budget Office involvement. And yet we set it up in such a way that we say, OK, CBO may be unconstitutional, and then we add to that, if you go through this expedited procedure and go to the courts, and the CBO involvement is held to be unconstitutional, then the whole process collapses.

I think that that nonseverability clause really just tries to find a way to have this thing declared unconstitutional, even though it would be applicable only to one small point.

Mr. ROEMER. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I will be glad to yield to the gentleman from Louisiana.

Mr. ROEMER. I thank the gentleman for yielding. If we could go back just quickly to the first instruction vis-a-vis a fixed schedule for a reduction to zero in 1991, does the gentleman's instruction preclude any recession sensitivity?

I noticed the other body and this body both passed a version of Gramm-Rudman that were both recession sensitive, one better than another. But what does the gentleman's instruction do to that?

Mr. LOTT. It does not preclude anything. That sensitivity to recession would still be considered under the provisions of the bill. But there must be some set formula that begin to agree on, or we agree on in the beginning that would lead us to that point of a balanced budget.

If the situation changes, the law that we are working on would apply, and it could be waived by action of the Congress.

Mr. ROEMER. If the gentleman will yield further, the gentleman would agree that if the economy were, in fact, showing negative growth, that we would not want to take a $35 billion or $40 billion reduction in spending on top of that negative growth? I just want to make sure from you that your instructions do not guarantee that we run counter to good common economic sense.

Mr. LOTT. The gentleman is correct.

I might also say it does not preclude the possibility of getting to a balanced budget earlier. If the economy should be good and we could do it by some other means than what we have now realized, we could maybe do it by 1990, and I think we should have that possibility.

Mr. PANETTA. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I am glad to yield to the gentleman from California.

Mr. PANETTA. Mr. Speaker, I thank the gentleman for yielding.

One of the reasons for the long severability question was because of our concern that in the Senate version, there is a combination of CBO and OMB. If you allow severability and the

CBO role is found to be unconstitutional, then it leaves it up to the OMB, and it, in essence, turns our power entirely over to the President and his agency. That is the issue that was at stake in terms of why we built nonseverability in, and I just wonder if the gentleman does not want to retain at least our option to consider that, at least with regard to the trigger mechanism?

Mr. LOTT. We could still perhaps develop a different nonseverability clause, although I would be opposed to that.

But what this says is not the nonseverability clause that is in the House-passed version, in the House amendment.

Let me read you, though, "during the Conference Committee's deliberations, the argument was made repeatedly about the constitutional question. In result, the Senate offer that was passed involved in their process the Comptroller General. The current Senate provision provides for expedited judicial review."

They have that expedited judicial review procedure, with a severability clause.

And, "In the event that the CBO, OMB, GAO triggering mechanism is found unconstitutional, the Senate version has a fallback position, a clearly constitutional, expedited joint resolution process."

So they even built into their package that we are going to be considering further this option that if it should be held unconstitutional, there would be this backup provision.

Mr. PANETTA. If the gentleman would just yield briefly for this comment, we have to go to conference, we have to work out a lot of problems with regard to the constitutional issue and severability. I would just hope the gentleman would not tie our hands by eliminating the nonseverability question from consideration of the conference.

Mr. LOTT. I deliberated over these particular instructions very carefully. I felt these were two very important features and that the House should speak on those particular points, that we want to go to a balanced budget, and not let it just drag out indefinitely; and second, that we do not want the whole process that we have labored on so hard now to collapse because one provision is held to be unconstitutional. And that one provision might not be one that would cause the whole process to collapse.

Mr. SYNAR. Mr. Speaker, will the gentleman yield?

Mr. LOTT. I yield to the gentleman from Oklahoma.

Mr. SYNAR. I thank the gentleman from Mississippi for yielding. We are having some confusion on this side trying to determine what you are striking. When this bill left the House, there were two provisions on nonseverability. There was one provision on nonseverability as it applied to the entire bill, and then there was specific language with respect to severability and nonseverability with respect to the issue of CBO. Would the gentleman please inform this side which one you are striking?

Mr. LOTT. This is the specific provision that relates to CBO.

Mr. SYNAR. In other words, your instruction only applies to the portion with respect to CBO?

Mr. LOTT. That is correct.

Mr. SYNAR. Leaving the other section of the bill which says that if any portion of the entire bill is found unconstitutional, then it would be nonseverable. So you have chosen to eliminate the narrow nonseverability while leaving the whole bill very severable?

Mr. LOTT. Let me answer that clearly.

The section 275 nonseverability, if after all appelate review is exhausted a court of competent jurisdiction finds any provision of the act violates the Constitution or is otherwise invalid, then the provision of this title shall immediately expire.

So it does speak to the nonseverability question for any provision of the bill. That is section 275.

Mr. SYNAR. I thank the gentleman.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Missouri [Mr. GEPHARDT] for purposes of debate only.

Mr. GEPHARDT. Mr. Speaker, I would simply urge Members to vote against this motion for two reasons.

First, the motion instructs our conferees to devise a balanced budget plan that reaches a balanced budget by 1991. The House position, as established last Friday, and again confirmed with the vote of 249 Members today, is that we want to try to balance the budget by 1990 and not 1991. And if we are instructing our conferees to go to conference to change that date, it simply means that you will arrive at a balanced budget a year later than you would if we stick by the House position.

Second, I think it is very important that we keep this severability, nonseverability question alive. The reason I say that, we have had an experience recently with the Federal Elections Act where the court found one provision was unconstitutional, took it out, and left everything else in. If you wind up with the suggestion of the Senate that you have OMB and CBO, it is likely they will find the CBO participation is the unconstitutional part of the law. That means you will wind up with OMB.

That means you transfer the power to the President, something I do not think we want to do.

Second, if we retain our provision which is that the CBO should be the sole determinant of both the trigger and the sequestration order, if the court finds that unconstitutional, there is nothing left. Then the court has to make something out of whole cloth or leave that section out.

If you leave that section out, you have no one to determine if the trigger has been pulled, you have no one to write the sequestration order and, in fact, the whole act is probably unconstitutional.

□ 1920

The point of the matter is simply this: We have this provision in our proposal. We are going to conference. As the gentleman has suggested, there may be alternative ways to deal with this question. Why tie the conferees' hands? Why say that it is 1991? Why say that we cannot keep this severability clause?

Leave it the way it is. Allow us the opportunity to go back to conference. We can arrive at compromise on all of these issues, and we are determined to come back with the proposal that can find bipartisan support on both sides of the aisle and in both bodies.

I urge Members to vote against the motion.

Mr. LOTT. Mr. Speaker, I yield 3 minutes to the gentleman from Ohio [Mr. KINDNESS], for purposes of debate only.

Mr. KINDNESS. I thank the gentleman for yielding and again, I think we have a little problem with understanding what is likely to be on the table for consideration, but with respect to nonseverability, we have a test of good faith before us.

A test of good faith in this respect: The House provision included nonseverability language that even has a severability clause in it. The last part of the House's nonseverability clause says that the provisions of this section shall operate notwithstanding any other provision of this title.

That is an egg within a hand within an egg.

Our problem, Mr. Speaker, is that the House version of the severability question is triggered so as to defeat the Gramm-Rudman proposal in this form or whatever form it comes in.

I think we have a test of good faith to the American public to say yes, we abandon the concept that we are going to try to self-destruct this matter. Let us give it a chance to be worked out in conference.

My colleagues on the other side of the aisle have prevailed; we are going to conference. That can be a constructive process, but if we go in to conference with the notion that we are going to build a product that is faulted and depend upon that little part of the process to throw everything else out, then we have shown bad faith to the American people. It will show just as

clearly as the nose on your face, this language in the House's nonseverability provision is designed for failure.

We ought to not only abandon it, but reject it out of hand; it does not operate as the gentleman from Missouri [Mr. GEPHARDT] has described, depending upon what provisions are decided upon by the conferees with respect to CBO, OMB, and General Accounting Office Participation.

We can construct a perfectly constitutional system and it does not require a self-destruct mechanism. I would certainly urge the adoption of the motion to instruct and to tell the American people by so doing that we are going to proceed in good faith and not take a phony approach to this conference.

Mr. LOTT. Mr. Speaker, I yield 1 minute to the gentleman from Washington [Mr. FOLEY], for purposes of debate only.

Mr. FOLEY. Mr. Speaker, last time a motion to instruct the conferees came forward on the appointment of conferees on this issue, we found it possible on both sides of the aisle to agree to it.

I wish that the first part of this motion had been repeated, because I think the result would have been the same.

One of the issues that we intend to discuss in the conference is the issue of constitutionality; and we are going to discuss it and the issue of nonseverability and the CBO seriously and with an intention to reach agreement, but the addition of last week's instruction by this instruction is I think an unnecessary and not a helpful addition to the instruction.

So I would ask all Members who might respond to this plea to vote against the motion to instruct and to get on with the conference and to resolve this issue.

Let us vote "no" and get moving.

Mr. LOTT. Mr. Speaker, I yield 2 minutes to the gentleman from Texas [Mr. BROOKS].

Mr. BROOKS. Mr. Speaker, the issue before us is one of constitutionality, and everybody knows that there are some problems; I have my doubts, you have yours, some of you have no doubts whatsoever.

If you have no doubts about the constitutionality, do not worry about the nonseverability clause, because it will never be found unconstitutional, and no part of it will fall. So if you believe what you say about Gramm-Rudman, that it is constitutional, pristine-pure, clean like Ivory soap, to not worry about severability.

If, however, you are like me and have some doubts, then if the unconstitutionality goes to the heart of the program, like the participation of the CBO in the triggering mechanism, you might want to say that if that does not work, then we ought to strike the whole thing.

Now I tell you, candidly, we have worked with the Senators and we are willing to work on it in the conference as we did. There are three options, basically: Do not say anything, and that means the courts could decide as to whether they wanted to make it nonseverable or not.

Or you could specify that it was severable, as the Senate wants to do;

Or you could specify that it is nonseverable, as we would like to do.

There is a fourth alternative: We could specify that it was nonseverable as far as certain provisions like the CBO and the triggering provisions, the heart of the operation, are concerned. If you believe it is constitutional, then worry not; but if you are like me and you have some doubts about it, you would want to protect the American public from the continuation of the program even when the heart of it was unconstitutional and it has been so determined by legitimate courts.

I will just say that I think you ought to leave it up to the conferees; we are as openminded as anybody you can find. Those are the alternatives, I hope you will leave it to the conferees.

Mr. LOTT. Mr. Speaker, I yield myself such time as I may consume. Before I move the previous question, I just make these final points.

We may think that this just is some legal argument on nonseverability that lawyers enjoy, or maybe it is something that only those inside the beltway and the Washington media understand, but let us make it very clear: This could collapse the whole process. This is a question of whether or not you want to destroy this whole process to move to a balanced budget or not.

The main issue on constitutionality is whether we abandon the entire deficit reduction process, if any piece is held invalid, as the House version would do; or whether we retain the deficit reduction process with a constitutional fallback provision, as the Senate version would do.

This is to determine whether or not we want to destroy this process before we ever even get off the ground. I move the previous question.

The SPEAKER. Without objection, the previous question is ordered on the motion to instruct.

There was no objection.

The SPEAKER. The question is on the motion to instruct offered by the gentleman from Mississippi [Mr. LOTT].

The question was taken; and the Speaker announced that the noes appeared to have it.

Mr. LOTT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The vote was taken by electronic device, and there were—yeas 181, nays 239, not voting 14 as follows:

[Roll No. 397]

NOT VOTING—14

Addabbo	Fowler	Loeffler
Boggs	Fuqua	Lundine
Clay	Hall (OH)	Nelson
Conyers	Heftel	Whitehurst
Dannemeyer	Hyde	

□ 1945

The Clerk announced the following pairs:

On this vote:

Mr. Loeffler for, with Mr. Nelson of Florida against.

Mr. Dannemeyer for, with Mr. Fuqua against.

Mr. Hyde for, with Mr. Conyers against.

Mrs. COLLINS changed her vote from "yea" to "nay."

So the motion to instruct was rejected.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

The SPEAKER pro tempore (Mr. GRAY of Illinois). The question is on the motion offered by the gentleman from Missouri [Mr. GEPHARDT].

The motion was agreed to.

The SPEAKER pro tempore. Without objection, the Chair appoints the following conferees:

From the Committee on Ways and Means, Messrs. ROSTENKOWSKI, GIBBONS, PICKLE, RANGEL, STARK, JONES of Oklahoma, JENKINS, GEPHARDT, RUSSO, DUNCAN, ARCHER, VANDER JAGT, CRANE, and FRENZEL; from the Committee on Appropriations, Messrs. WHITTEN, BOLAND, NATCHER, SMITH of Iowa, PURSELL, and LOEFFLER; from the Committee on Rules, Messrs. PEPPER, MOAKLEY, DERRICK, BEILENSON, FROST, LATTA, and LOTT; from the Committee on Government Operations, Messrs. BROOKS, FUQUA, WAXMAN, SYNAR, HORTON, and KINDNESS; from the Committee on the Budget, Messrs. GRAY of Pennsylvania, DOWNEY of New York, MILLER of California, LEATH of Texas, KEMP, and GRADISON.

And the following additional conferees: Messrs. FOLEY, FORD of Michigan, OBEY, ASPIN, and MINETA, Ms. OAKAR, Messrs. PANETTA, FAZIO, MICHEL, DICKINSON, CHENEY, and LEWIS of California, Mrs. MARTIN of Illinois, and Mr. MACK.

There was no objection.

NATIONAL BLOOD PRESSURE AWARENESS WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 130) designating the week beginning on November 10, 1985, as "National Blood Pressure Awareness Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would simply like to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservaiton of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 130

Whereas diseases resulting from hypertension cause needless mortality and morbidity which can be reduced if hypertension is discovered through blood pressure screening;

Whereas sixty million Americans are hypertensive;

Whereas hypertension is a major factor in five hundred thousand strokes and one hundred and seventy-five thousand stroke-related deaths annually as well as more than one million five hundred thousand heart attacks and five hundred and sixty-seven thousand heart attack-related deaths annually;

Whereas the prevalence of hypertension in black males is 33 per centum higher than in white males, and the prevalence of hypertension in black females is twice that of their white counterparts;

Whereas twenty-nine million workdays, representing $2,000,000,000 in earnings, are lost each year because of cardiovascular diseases;

Whereas the risk of the major cardiovascular diseases is directly related to hypertension and even mild elevation in blood pressure may result in substantial risk of illness;

Whereas much of the 30 per centum reduction in mortality between 1970 and 1980 for stroke, hypertension heart disease and other cardiovascular system disease can be partially attributed to increased awareness and better control of blood pressure; and

Whereas increased blood pressure screening will identify greater numbers of Americans at risk for hypertension-related cardiovascular disease and encourage these Americans to seek treatment to control their blood pressure: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on November 10, 1985, is hereby designated as "National Blood Pressure Awareness Week", and the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL TEMPORARY SERVICES WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 195) to designate the week of October 20 through 26, 1985, as "National Temporary Services Week", and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would like simply to inform the House that the minority has no objection to the legislation being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 195

Whereas the temporary services industry is the second fastest growing business sector in terms of job creation in the United States;

Whereas the temporary services industry employed over five million people at various times in 1984;

Whereas the temporary services industry payroll has increased between 1970 and 1984 from $547,000,000 to $6,000,000,000;

Whereas one out of every two hundred nonagriculture jobs in the United States was provided through temporary services in 1984; and

Whereas the temporary services industry provides flexibility for employers to meet short-term labor needs: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of October 20, 1985, through October 26, 1985, is designated as "National Temporary Services Week" and as the President is authorized and requested to issue a proclamation calling upon the people of the United States to observe the week with appropriate conference, programs ceremonies, and activities.

AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment.

The Clerk read as follows:

Amendment offered by Mr. GARCIA: Page 2, lines 3 through 4, strike out "October 20, 1985, through October 26, 1985," and insert in lieu thereof "December 1, 1985, through December 7, 1985,".

The SPEAKER pro tempore. The question is on the amendment offered by the gentleman from New York [Mr. GARCIA].

The amendment was agreed to.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed.

TITLE AMENDMENT OFFERED BY MR. GARCIA

Mr. GARCIA. Mr. Speaker, I offer an amendment to the title.

The Clerk read as follows:

Title amendment offered by Mr. GARCIA: Amend the title to read as follows: "Joint resolution to designate the week of December 1, 1985, through December 7, 1985, as 'National Temporary Services Week' ".

The title amendment was agreed to.

A motion to reconsider was laid on the table.

NATIONAL ADOPTION WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 51) to designate the week beginning November 24, 1985, as "National Adoption Week," and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would like simply to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from New Jersey [Mr. SMITH], who is the chief sponsor of House Joint Resolution 320, National Adoption Week.

Mr. SMITH of New Jersey. Mr. Speaker, House Joint Resolution 320 designates Thanksgiving week—November 24 to 30—as "National Adoption Week" and is intended to focus attention on the benefits of adoption to children, parents, and society in general. Companion legislation to House Joint Resolution 320 was approved by the Senate last June.

Mr. Speaker, each year more than 100,000 children are adopted in the United States. For these children, adoption represents a chance to grow up in a home, with a family, among parents who love them. In my view, Mr. Speaker, nothing is more important, no one more precious, or vulnerable than children. For millions, adoption is their last best hope for a happy childhood.

National Adoption Week will, I believe, be very useful in highlighting the availability of approximately 50,000 children with special needs—children who are older, handicapped, in sibling groups, or members of minorities—who are legally free for adoption. Passage of this resolution sends a clear message to the American people—these children with special needs are our children, too. They belong in families and we have a responsibility for them.

Mr. Speaker, as Members will know, most aspects of adoption are governed by State law. Landmark legislation, however, was adopted in 1980 in the form of the Adoption Assistance and Child Welfare Act (Public Law 96-272). This law made numerous changes in the child welfare services, and foster care programs. It also established the adoption assistance program, a federally matched adoption subsidy for special needs children.

Today there are more than 2 million couples ready, willing, and eligible to adopt a child. The average wait for a child is painfully long—5 to 7 years. In recent years, the number of eligible children has declined due in part to the effects of permissive abortion and the fact that many teenage moms opt to keep their child.

Many prospective, adoptive parents now look overseas to adopt and the number of foreign-born children eligible is rising. The Immigration and Nationality Act, as amended, governs the admission into the United States of foreign-born children. Foreign adoptions generally take place in one of two ways. The first method is for the parents to work through a U.S.-based, international, child-placing agency, which usually completes the adoption in the child's home country and brings the child to the United States. The second approach is for the adoptive parents to work directly with a foreign, child-placing entity, and either to have the child brought to the United States for adoption, after all foreign and domestic requirements are fulfilled, or to journey to the child's country of origin and carry out the adoption there.

In sum, Mr. Speaker, every child needs a home.

Every child needs the stability and guidance of loving parents.

Every child needs the sense of genuinely belonging, of being cared for, of being wanted.

National Adoption Week enables us all to applaud the generosity of adoptive parents, to commend assisting organizations such as the Adoptive Parents Committee, and to focus on the law to ensure that adoption policy is the best we can enact.

Mr. HANSEN. Mr. Speaker, I appreciate the excellent remarks of the gentleman from New Jersey, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 51

Whereas the week of November 24 has been commemorated as National Adoption Week for the past ten years;

Whereas we in Congress recognize the essential value of belonging to a secure, loving permanent family as every child's basic right;

Whereas approximately fifty thousand children who have special needs—school age, in sibling groups, members of minorities, or children with physical, mental, and emotional handicaps—are now in foster care or institutions financed at public expense and are legally free for adoption;

Whereas the adoption by capable parents of these institutionalized or foster care children into permanent, adoptive homes would insure the opportunity for their continued happiness and long-range well-being;

Whereas public and private barriers inhibiting the placement of these special needs children must be reviewed and removed where possible to assure these children's adoption;

Whereas the public and prospective parents must be informed of the availability of adoptable children;

Whereas a variety of media, agencies, adoptive parent and advocacy groups, civic and church groups, businesses, and industries will feature publicity and information to heighten community awareness of the crucial needs of waiting children; and

Whereas the recognition of Thanksgiving week as "National Adoption Week" is in the best interest of adoptable children and the public in general: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of November 24 through November 30, 1985, hereby is designated "National Adoption Week", and the President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe such week with appropriate ceremonies and activities.

The Senate joint resolution was ordered to be read a third time, was read

the third time, and passed, and a motion to reconsider was laid on the table.

NATIONAL REYE'S SYNDROME WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent to take from the Speaker's table the Senate joint resolution (S.J. Res. 29) to designate the week of November 11, 1985, through November 17, 1985, as "National Reye's Syndrome Week," with a Senate amendment to the House amendments, and concur in the Senate amendment to the House amendments.

The Clerk read the title of the Senate joint resolution.

The Clerk read the Senate amendment to the House amendments, as follows:

Page 2, lines 19 and 20, strike out "to sponsor a multicenter research study by recognized authorities on Reye's Syndrome;".

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would like simply to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

A motion to reconsider was laid on the table.

NATIONAL WOMEN VETERANS RECOGNITION WEEK

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that the Committee on Post Office and Civil Service be discharged from further consideration of the Senate joint resolution (S.J. Res. 47) designating the week beginning November 10, 1985, as National Women Veterans Recognition Week, and ask for its immediate consideration.

The Clerk read the title of the Senate joint resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

Mr. HANSEN. Mr. Speaker, reserving the right to object, I do not object, but I would like simply to inform the House that the minority has no objection to the legislation now being considered.

Mr. Speaker, under my reservation, I yield to the gentleman from Florida [Mr. BILIRAKIS], who is the chief sponsor of House Joint Resolution 20, National Women Veterans Recognition Week.

Mr. BILIRAKIS. I thank the gentleman for yielding.

Mr. Speaker, let me first extend my sincere thanks to Mr. GARCIA, the chairman of the Subcommittee on Census and Population; and Mr. HANSEN, the ranking Republican on the subcommittee, for allowing me to bring this legislation to the floor this evening.

Senate Joint Resolution 47 would designate next week, the week of November 10, 1985, as National Women Veterans' Recognition Week. I had introduced similar legislation, House Joint Resolution 20, to designate the week of November 11 as a week of recognition for women veterans, and even though we received 204 cosponsors and could have very easily gotten the additional 14, in the interest of getting a bill enacted in a timely manner, I am pleased to have this opportunity to speak on behalf of the Senate's bill. After all, our goal is to honor the tremendous service and sacrifices of our women veterans and I am certainly supportive of whatever action is necessary to see this week of national recognition become a reality.

Until the 1980 census, we had little information about the number of women veterans in this country, and little attention was paid to providing appropriate services to this important group of Americans. Since 1980, however, awareness of the role women have played in the defense of our country has increased steadily. The commemoration of the first National Women Veterans Recognition Week in 1984 played an effective role in this public education process, and I felt it was important to continue this very positive trend in 1985.

It is interesting to note that the formal participation of women in the military began with the formation of the Army Nurse Corps in 1901. Yet women have served in and with the military services since our country was founded. Today, women are fully integrated into all branches of the Armed Forces and continue to demonstrate the invaluable role of women in America's defense.

Despite the continous service of women throughout the history of our Nation, we have not always recognized their tremendous contributions, nor have we paid close enough attention to the needs of women veterans. That is changing and I am pleased to have played a role in increasing women veterans' awareness of and access to the VA services they need through my work on the House Committee on Veterans' Affairs.

Nevertheless, I do not believe that the recognition process has been completed. And I think this country owes it to the 1.2 million women veterans, who make up 4.1 percent of our total veteran population, to continue to educate the public about their many contributions. We also need to increase awareness among women veterans themselves so that they may have the benefit of knowing that a grateful Nation cares. A recent study indicated that, overall, women veterans have made less use of veterans benefits than male veterans, and suggested that the low rate of usage seems to reflect a problem of benefit awareness rather than preference. In one sense, I welcomed this news because it hopefully reflects an improvement in the sensitivity level of the VA to the special needs of women. In another sense, I am disappointed that a higher awareness among women veterans of the care and benefits they have earned is not apparent.

So, let us once again this year make time to honor women veterans for their fine service to this country by approving this simple but important resolution to declare next week as National Women Veterans Recognition Week.

Mr. HANSEN. Mr. Speaker, I compliment the gentleman for his fine remarks, and I withdraw my reservation of objection.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

The Clerk read the Senate joint resolution, as follows:

S.J. RES. 47

Whereas there are more than one million one hundred and sixty thousand women veterans in this country, representing 4.1 per centum of the total veteran population;

Whereas the number and proportion of women veterans will continue to grow as the number and proportion of women serving in the Armed Forces continue to increase;

Whereas women veterans through honorable military service often involving hardship and danger have contributed greatly to our national security;

Whereas the contributions and sacrifices of women veterans on behalf of this Nation deserve greater public recognition and appreciation;

Whereas the special needs of women veterans, especially in the area of health care, have often been overlooked or inadequately addressed by the Federal Government;

Whereas this lack of attention to the special needs of women veterans has discouraged or prevented women veterans from taking full advantage of the benefits and services to which they are entitled as veterans of the United States Armed Forces; and

Whereas recognition of women veterans by the Congress and the President through enactment of legislation declaring the week beginning on November 10, 1985, as "National Women Veterans Recognition Week" would serve to create greater public awareness and recognition of the contributions of women veterans, to express the Nation's appreciation for their service, to inspire more responsive care and services for women veterans and to continue and reinforce important gains made in this regard last year as a result of the designation of the first National Womens Veterans Recognition Week during the week of November 11, 1984: Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week beginning on November 10, 1985, is designated "National Women Veterans Recognition Week". The President is requested to issue a proclamation calling upon all citizens, community leaders, interested organizations, and Government officials to observe that week with appropriate programs, ceremonies, and activities.

The Senate joint resolution was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GARCIA. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate joint resolutions just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New York?

There was no objection.

GENERAL LEAVE

Mr. STRANG. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material, on the subject of the special order today by the gentleman from North Carolina [Mr. BROYHILL].

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Colorado?

There was no objection.

□ 2000

A FREEDOM DEARLY BOUGHT—TRIBUTE TO AMERICA'S VETERANS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia [Mr. RAY] is recognized for 5 minutes.

Mr. RAY. Mr. Speaker, the United States now observes 10 national holidays—commemorating the discovery of America, its founding, our wars, our work force, our religious holidays, and our leaders.

We set aside one of these holidays to honor a special group of people; a group too often ignored or forgotten during the remainder of the year. On Veterans Day, we salute those men and women who have given us our freedom, and who have protected that freedom through the centuries.

Mr. Speaker, on this Veterans Day I am asking my colleagues and others who read and hear these remarks to pause for a moment and think of the freedoms and the liberties that we have in this country.

If you have ever been outside the United States, then you know that we live in a unique society. In very few places can people express themselves freely, join any church or organization they choose, investigate the actions and comments of elected officials and the Government, choose the people who govern them, and hold public meetings to make their opinions known.

Only in America do individuals have this much liberty, and only in America is it taken for granted.

The freedoms we enjoy were not a gift—they were bought for us. Men and women have paid a heavy price for over 200 years to buy the liberty we enjoy today.

The next time you pick up a newspaper, write a letter disagreeing with your mayor or your Senator, or attend church, remember that you can do these things because someone was willing to fight and even to die for you to have that privilege.

On this Veterans Day, take a moment to say a prayer of thanksgiving for the freedom we enjoy in America, and take time to say a personal thank you to those men and women who have served in our country's military.

They understand the value of the liberties we enjoy—they were willing to risk their lives to protect them. All of us who live in the United States and enjoy the privileges of American citizenship owe them a debt that we cannot repay.

The Bible says that there is no greater love that a man can show than to lay down his life for his brother. The veterans of this country have offered their lives for us, and have given us our most precious possession.

On November 11, let's show them our gratitude and offer them our thanks and our appreciation. They deserve it.

THE HONOR OF OUR COUNTRY IS INVOLVED

The SPEAKER pro tempore. Under a previous order of the House, the gentlewoman from Ohio [Ms. OAKAR] is recognized for 5 minutes.

Ms. OAKAR. Mr. Speaker, on October 24, Miroslav Medvid jumped from a Soviet grain ship in the Mississippi River and swam to shore in Louisiana. His every action indicated he was seeking freedom. The INS translator who spoke with him by telephone confirms his intention to defect. Astonishingly, Mr. Medvid was returned to Soviet custody, despite his struggles to break free.

In justifying its actions in this case, the administration indicated it was prepared to use force, if necessary, to win an interview with Mr. Medvid. Presumably, force would have been used to insure his rights under our laws. As it turned out, force was not necessary. After spending 24 hours in Soviet custody onboard ship, Mr. Medvid was allowed to meet U.S. officials. He signed a letter indicating he wanted to return home after all, his struggles notwithstanding. The administration is satisfied that justice has been served. I am not so sure.

Mr. Medvid's initial actions certainly speak for themselves. He was seeking freedom. When he was returned to the Soviet ship, he drew his finger across his throat. He feared reprisals.

When he met with U.S. officials, he was escorted and attended to at all times by Soviet officials as well. Mr. Medvid was not given a lawyer, nor was he informed of his right to an attorney. He was not provided with a translator in his own Ukrainian language, but instead had a Russian translator. According to newspaper accounts, Soviet officials acknowledged that Mr. Medvid had been drugged. American officials noted that he had slashed his wrist, which was newly stitched.

Clearly, Miroslav Medvid was not provided with the justice that the administration claimed it was seeking for him when it threatened force on his behalf. Now, millions of Americans have serious doubts about the manner in which this case has been handled. Many who have been contacting my office believe that the Ukrainian sailor was sacrificed for the sake of politics. Yesterday, at the U.S. Court of Appeals in New Orleans that impression was confirmed when the Assistant U.S. Attorney argued against a measure to help Mr. Medvid on the grounds that "the overriding question is a political question." Fortunately, not everyone agrees. Our country stands for certain values, like freedom and justice, that must be applied in this case as well.

It is essential that the questions on the Medvid case be answered. There is only one person that can explain his motives for jumping ship and then changing his mind and that is Miroslav Medvid. If he was mistreated by the Soviets and coerced into changing his mind, we have a moral obligation to come to his rescue. If he was not mistreated, as the Soviets and the administration claim, then no one should have anything to fear from having Mr. Medvid speak his mind in a truly neutral setting, with a lawyer and a translator who speaks his own language. On Thursday, the House Foreign Affairs Subcommittee on Europe and the Middle East will hold hearings on this case. The perfect witness at the hearing would be Miroslav Medvid. If necessary, the hearing could be postponed a few days to permit him to gather his thoughts and sort out his impressions. Since it appears he has family in our country, who have expressed concern over his well-being and his civil liberties, he could be housed in a noncoercive environment as he comes to terms with the enormous changes that have transpired in his life in the last 2 weeks. If upon further reflection, Miroslav Medvid decides that he genuinely wants to go back home, he can always do so. At least he will have had an opportunity to meet his cousins from Ohio. One thing is clear—as long as there are questions about the case, it cannot be closed. The honor of our country is involved.

CONGRATULATIONS TO GOV. THOMAS KEAN ON HIS LANDSLIDE REELECTION VICTORY

The SPEAKER pro tempore. Under a previous order of the House, the gen-

tleman from New Jersey [Mr. RINALDO] is recognized for 5 minutes.

Mr. RINALDO. Mr. Speaker, on behalf of my Republican colleagues in the New Jersey congressional delegation, I want to congratulate Gov. Thomas Kean on his landslide reelection yesterday, and also extend our compliments to the new Republican majority of the State assembly.

With nearly all precincts reporting, Governor Kean has amassed an outstanding 70 percent of the popular vote, and the New Jersey Assembly has witnessed a swing of 14 seats for a 50-seat to 30-seat Republican majority.

What strikes me most, Mr. Speaker, is the need to look at this election in two ways.

On one hand, this is clearly a victory for all the people of New Jersey. It is an affirmation of effective government policies that provide opportunity for all people. Our State budget is in surplus; we have witnessed a renewed sense of pride in New Jersey; unemployment is below the national average; inflation has remained low, and more than 350,000 jobs have been created during the Kean administration. The voters have clearly endorsed what has been happening in our State.

But while this election was decided on policies, I think it is also time for some partisan celebrating.

Early indications are that Governor Kean swept a majority of voters in all categories—including minorities that traditionally have voted Democratic. As Governor Kean stated, this means a "Republican candidate willing to reach out to the black community and ask for their votes is able to get them."

I agree with the Governor's point of view, and I believe our party is opening its doors and must continue to do so for all groups by demonstrating that we are the party of opportunity, the party of the future, and the party that has a brighter vision of America.

Mr. Speaker, as the dean of the Republican congressional delegation of New Jersey, I want to extend my congratulations and those of my colleagues to Governor Kean and the newly elected majority in the New Jersey State as they celebrate this tremendous victory.

We urge them to continue to work on behalf of all the people of our great State, and we wish them well when they begin their new term together.

THE NAVAL INVESTIGATIONS REORGANIZATION ACT OF 1985

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. BATES] is recognized for 5 minutes.

Mr. BATES. Mr. Speaker, today I am introducing legislation to correct what I consider a fatal flaw in the U.S. Navy's investigative functions.

Through my investigations of waste, fraud, and abuse at Miramar Naval Air Station and aboard the U.S.S. *Kitty Hawk,* I have been troubled by the inabilities, failures, and flaws of the Naval Investigative Service. As a recent Los Angeles Times article reported: "* * * the NIS has developed a reputation inside and outside military circles as a weak agency that does not aggressively pursue investigations," and I would suggest that this evaluation is particularly mild. If I may cite some of the failures of NIS:

NIS investigations have been short-circuited by the senior officer of the command being investigated. A case in point is the inadequate investigation by NIS of the gun-smuggling charges involving Vice Adm. Joseph Metcalf III. As our colleague, Chairman LES ASPIN, so aptly summarized: "It is this approach by NIS (being subordinate to local command) that gives a bad odor to the Metcalf case."

There was an NIS agent aboard the U.S.S. *Kitty Hawk,* but he did not discover the abuses that later surfaced, nor did he protect the whistle blower aboard ship.

The FBI broke the Walker family spy ring with little assistance from the NIS, even though Navy personnel were selling secrets to the Soviet Union.

On August 12, Secretary of the Navy John Lehman announced a restructuring of the Naval Investigative Service. Under this reorganization plan, a new chief was selected for the service with the rank of this office being upgraded from Captain to Commander. In addition, while reports will continue to be made to the command being investigated, the Service will have the authority to initiate and execute investigations of its choosing; the Secretary of the Navy will be the only person able to stop an investigation.

While the Secretary's reorganization proposal is clearly an improvement, it simply does not go far enough; the Naval Investigative Service is simply beyond repair. The old addage "if it ain't broke, don't fix it," could be changed to read "if it can't be fixed, don't waste your time trying."

The Naval Investigative Service is operating without respect or professionalism. Considering the depth of the problems plaguing the NIS, the Secretary's recommendations are purely cosmetic. Furthermore, the changes that are necessary should not be done by executive fiat—where they can be overturned later once the problems are no longer in the headlines; the chnages must be accomplished legislatively.

In addition, a 1983 General Accounting Office report, "DOD Can Combat Fraud Better By Strengthening Its Investigative Agencies." highlights many of the points I have alluded to and suggests additional reforms which I have included in this bill, including:

An effective division of responsibility so that personnel concentrate their efforts where most effective.

A clarification of the applicability of the Posse Comitatus Act on naval investigators engaged in criminal investigations. This law is viewed as hamstringing the efforts of some investigations involving nonmilitary citizens.

Focusing criminal investigations on those cases of greatest potential loss.

Placing greater emphasis on the value and use of fruad prevention surveys.

For these reason, I am introducing legislation today that would reorganize the investigative operations of the Navy. All functions of the NIS relating to investigations of waste or abuse would be transferred to the Inspector General of the Navy. I believe, the Inspector General has the expertise and track-record to justify this transfer of jurisdiction.

Security and counterintelligence functions would be performed by a new entity established by the bill, the Security and Counterintelligence Command. This new command, with its increased rank and stature, should be able to perform more effectively in detecting, preventing and investigating cases similar to the Walker case.

Criminal investigations will be conducted by the newly-established Criminal Investigations Command. This command will be aided by several provisions in the bill which will make this an effective organization: new requirements on the preparation and execution of fraud prevention surveys will help in targetting those areas most subject to instances of fraud and other criminal activities; the command will also benefit from a clarification of the restrictions of the Posse Comitatus Act. These restrictions, designed to protect the Reconstructionist South, serve today as a hinderence to navy investigators. Under these restrictions, a civilian cannot be searched, arrested or investigated by a military investigator. This hamstrings fraud cases which frequently involve civilians. In fact, military investigtors need special permission to even work with agents of the FBI. Clearly this should be corrected. An additional provision of the bill would focus attention of the new command on those instances of fraud most deserving of fraud—though where the dollar value would appear to exceed $500. According to the GAO report. 62 percent of the cases investigated were of less than $500.

In addition, I would note that the GAO report repeatedly calls for greater independence for the investigative services—an effort accomplished by this bill.

In addition, all three commands would be required to report to Congress annually on what investigations it had undertaken during the previous year. This will further facilitate Congress' oversight responsibilities.

Mr. Speaker, I call on my colleagues to join me in this endeavor to correct a serious problem that has threatened our national security and national honor.

THE QUESTION OF THE DEFICIT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Idaho [Mr. CRAIG] is recognized for 60 minutes.

Mr. CRAIG. Mr. Speaker, I have taken this special order tonight to once again discuss with my colleagues

the question of our deficit. Certainly the question of how we arrive at a solution to that deficit, and to discuss in part the debate that has gone on in this House and the other body and in conference the last 2 weeks that I think has roundly confused the American people as to what our Congress now intends to do about deficit reduction.

Before I address that question and have some of my colleagues who are with me this evening here to discuss it, I would like to inform the Members of this House of an action that was taken this afternoon in Lansing, MI, by the Lansing State Senate. They petitioned, by a vote of 24 to 14, the Congress of the United States to convene a convention for the purpose of authoring and sending forth to the people a constitutional amendment to balance the Federal budget.

What is the significance of that act? As many of us know, the second part of article V of our Constitution says that when the Congress in essence refuses to respond to the amendment process, in other words, when the American people feel that there is a need for a constitutional amendment, and the Congress of the United States, this body, who is charged with authoring the amendment, fails to do so, that the States of this Nation may petition the Congress for the purpose of convention to write that amendment and send forth to the people for ratification. It requires two-thirds of the States. That is 34 States of the Union.

To date, 32 States have petitioned Congress for that very purpose: To author an amendment to balance the budget of this country. To place it in the Constitution as constitutional law. It may very well be that within the balance of this week, the whole of the Michigan Legislature will vote in the affirmative on this issue and Michigan will become the 33d State, and then there will be only one more State and this Congress will ultimately be faced with a constitutional crisis of their own making.

Because for years, this Congress has failed to respond to the wishes of the American people, and in poll and poll taken over the last decade, the American people have consistently said by an affirmative of 70 to 80 percent that they wanted this Congress to balance the Federal budget, and that if they failed to do so, that they would accept a constitutional amendment requiring the processes of Congress to arrive at a balanced budget.

I think it is important that this action that was taken in the Michigan Senate this afternoon be called to the attention of this body, because our time is running out. The chairman of the House Judiciary Committee, who has guarded so sacredly all of the amendments that I and others have offered to have the right of this House to act to send forth to the people is just about over. His ability to guard is within possibly hours, days, or maybe weeks of being over. He may ultimately have to send forth an amendment for us to consider because we will be up against the gun. The American people will finally have said, "Enough is enough." We now put a gun to the head of the U.S. Congress and demand that they act and that they act in a responsible fashion by bringing their revenues and expednitures into balance through the constitutional route.

There will be no alternatives at that point. This House must act. The other body must act, or they must produce enabling legislation that would allow the convening of a convention for the purpose of drafting an amendment to the wishes of the American people.

That is the choice that is nearly at hand. That is a choice that will at some point in the near future be taken out of our hands if we fail to be responsive to the needs and the wishes of the American people.

Now, that is really what the Gramm-Rudman-Mack debate of the last 3 weeks has been all about. I think without question the American people sense that there are some in the U.S. Congress who would like to place in law a procedure and a process that would bring this Government in a responsible fashion to a balanced budget by about 1991, that would have limited repercussion on the programs and the systems of our Government, but at the same time would tone down at an average rate of around $36 billion a year a growing deficit to a point of balancing expenditures and revenues.

None of us have said it would be an easy process. But there are a good many of us who would like to try and, of course, we know there are a good many in this body who would simply not like to try, who believe that the only answer to providing the wishes of their people, or more importantly of keeping themselves elected to this body, is to fulfill the old adage of tax and spend, or as one person said the other day, the new adage of borrow and spend.

In the coming days we will once again in this House in conjunction with the Senate convene a conference, and that conference's responsibility will be to attempt to adjust the Gramm-Rudman amendment to a point that all of us can agree on, to serve as enabling legislation to produce by 1991 a budget of this Government that is in balance in revenues and expenditures. Hopefully, once that enabling legislation is accomplished, this body will see the wisdom to then send forth a constitutional amendment for the consideration of the three-fourths of the States of this Nation that would ratify it within a short period of time.

As hard as we work here in our effort to try to bring the budget into balance, I think there is a growing cynicism among the American people that they do not trust us, they do not believe we will do it, and they will assure that we will do it by an act much like the one taken by the Michigan Senate this afternoon, to force a constitutional amendment that would require a balanced budget. And then ultimately they would say, "Now, Congress, it is your responsibility through whatever action you take or justify in taking to bring that budget in balance somewhere by 1990 or 1991.

Mr. MACK. Mr. Speaker, will the gentleman yield?

Mr. CRAIG. I would be happy to yield to my colleague from Florida [Mr. MACK] who serves as one of the authors and major sponsors of the enabling legislation that I just referred to.

Mr. MACK. Mr. Speaker, I thank the gentleman for yielding.

The point that I guess caught my attention was when the gentleman from Idaho referred to the fact that the American people really do not trust what they hear coming out of this place anymore.

I would suggest one of the problems I have with the Democratic alternative to the Gramm-Rudman proposal is that on the one hand it gives the impression that the goal is to reach a balanced budget by 1990, I believe.

Mr. CRAIG. I believe in their proposal it was that, yes.

Mr. MACK. It also says that in the first year that the deficit target should be $161 billion.

But what almost never is discussed is the escape clause that they put in. I think that if most voters around the country, most citizens around the country, if they read they would say, "There they go again."

□ 2010

They tell us one thing and yet they do something else to let themselves off the hook, because what it basically says is this. It affirms that if the real rate of growth in the country is 3 percent and remains steady over a period of time, there would be no changes in the targets that have been established. Three percent real growth across the board for 5 straight years.

It says that if that target is not met, let us say that the growth rate of the country is 3.2 percent, then they say we are to cut more out of the deficit because the country can afford more.

Then they say if the growth rate is 2.8 or 2.9 percent that we change the target.

Now, here is how it works. They are saying there will be a reduction of 20 percent a year over 5 years; in other words, from the target that they started with, $161 billion, take 20 percent

of that over the next 5 years and you get zero.

Mr. CRAIG. Now, the 161 the gentleman is referring to is the 161 deficit, the $161 billion of deficit?

Mr. MACK. That is the claim that our colleagues on the other side of the aisle make as to what their objective in the 1986 spending and revenue program would produce, a deficit no greater than $161 billion.

Let me just finish up with my point here. What is claimed is that for every one-tenth of a percent below the 3-percent real rate of growth, a 1-percent reduction takes place in spending. In other words, 1 percent would equate to a 19-percent reduction in the deficit. Then 2.8 would be an 18-percent reduction in the deficit; a 2.7-percent real growth would be a 17-percent reduction in the deficit.

The point that I am trying to lay out is that there is no such thing as a goal certain in the proposal they put together.

They claim, and I would give them some credit for that, that should economic policy, pure economic theory, would state that when you have slower levels of economic growth you should not reduce the deficit as much; but on the other hand, they make the argument that in the first year they want to reduce the deficit from—what was the projection earlier this year, $210 billion to $220 billion—they want to reduce the number from $210 billion or $220 billion down to $161 billion during a period of time in which we have experienced during the last three quarters about 2½ percent real growth.

Now, under their formula one would think they would come to the conclusion by their own analysis that the reduction in the deficit would be smaller this year as opposed to greater, as they have come up with.

Mr. CRAIG. What the gentleman is telling me then, let us say that I am the average American citizen who has had difficulty in understanding and following this issue, but I am led to believe that whatever this body or the other is working on, that if they agree and pass it, that by 1991 revenues and expenditures will be in balance.

But I think I heard the gentleman just say that in the Democratic proposal, well, that is not necessarily the case, that there is an escapability written into that proposal that might say the budget would never be balanced.

Mr. MACK. Well, that is absolutely correct. That is exactly the point I am making, that apparently they want some wiggle room, and I can understand why they want some wiggle room; but what we are saying in our proposal is—let us contrast it with what we are saying. We are saying that we want to establish a target the first year of $180 billion. And immediately, what do we hear? "Oh, that is a phony thing. They have set that up so that there will be no action taken on the deficit-reduction plan."

I think anybody who understands what is going on in the economy says that one thing for sure is that even at $180 billion there will be a sequestering order that is going to be in the neighborhood of $20 billion to $25 billion. There are going to be real spending cuts and I think if the gentleman will notice what happened here earlier today, we made a proposal of an 8.2-percent reduction across the board in the water bill that we were talking about earlier.

I was pleased to hear that the committee was ready to accept that proposal; but that is the only way we are going to meet it, if we start going after each program and reducing across the board.

Mr. WALKER. Mr. Speaker, will the gentleman yield just for a moment?

Mr. CRAIG. I yield to my colleague from Pennsylvania.

Mr. WALKER. I think the gentleman is making a good point, but let us make this very clear. The committee indicated they were willing to take the amendment, but then rose before we could vote on the amendment. Some of the people have said since that they did not think that was a real figure, so we may want to come back and revisit that later on.

So the fact is that they denied us a vote on that specific issue, knowing that if it won, it would give them problems. Their perception was that it would have a good chance of winning on the House floor, so I think we saw clearly once again an attempt to escape the very obligation they say that they are willing to impose upon themselves and on the U.S. Government.

I thank the gentleman for yielding.

Mr. MACK. Mr. Speaker, will the gentleman yield further?

Mr. CRAIG. I yield to my colleague.

Mr. MACK. The specific targets in our bill are $180 billion in the first year; $144 billion in the second year; $108 billion in the third year; $72 billion in the fourth year; $36 billion in the fifth year, with zero.

These are real numbers. There are no escape clauses.

We do say, however, that if there is a recession, not from some change in the economic level of activity in the country, but if there is a recession as identified by two consecutive quarters of negative GNP growth, that there should be some escape clause, that the Congress would have to act. They would have to say yes, we agree with that. We ought to waive the provisions at this time and adjust the spending and taxing proposal.

Mr. CRAIG. What the gentleman is saying, let me follow through on this, because one of the things that concerns me and concerns a good many of the constituents in my district when they say, "But you said one thing and you did another. We can't understand why you say what you say and then do what you do. They don't seem to be consistent."

The gentleman is saying that in the Democratic proposal that the mechaism allows a certain escape without a specific action on the part of the Congress. If the figures are there, you get into a negative growth or a lower growth proposition——

Mr. MACK. Just a lower growth, just if we got down to a level where we are today.

Mr. CRAIG. In other words, then, it automatically triggers itself. We would not have to stand here on this floor and vote yes or no, that we wanted to spend more or less, depending on the economic conditions.

In other words, we would not have to make a public commitment, if you will, by the statement of an affirmative or a negative vote as to how we wanted to spend money.

Mr. MACK. That is exactly right.

Mr. CRAIG. Ours says that we are required to act. Theirs allow the machinery of the system, if you will, to function.

Mr. MACK. Let me go a step further. There is another escape clause.

Mr. CRAIG. In whose?

Mr. MACK. In the Democratic alternative, the Rostenkowski plan, as I believe it is referred to. It is an escape clause based on unemployment.

Now, let us just assume, and here is how the formula works. If there are two consecutive months where the unemployment rate is 1 percent higher than it was 1 year ago, the whole thing is void.

Mr. CRAIG. Does it take into consideration seasonal adjustments?

Mr. MACK. There is no mention of that in the proposal.

But let us just assume they were for a second. I mean, that was a legitimate proposal there. Again what they developed is an escape clause based on a recessional concept that says the employment level is the thing that you ought to set as the triggering mechanism.

But again, think of what I said. Two consecutive months where the unemployment rate was 1 percent higher than what it was a year ago.

Now, let us just build a scenario here. Let us say that over the next year that we see a gradual reduction in the unemployment rate in the country from 7.1 percent, where it is today, to 6 percent by a year from now. What would happen under this proposal is that 1 year later if we were back to 7.1 percent, that would be a recession and therefore there is an escape clause to get out from under this whole proposal.

Mr. CRAIG. So the policy or the principal built within the Rostenkowski or the Democrat alternative is really back to where we have always been, is it not, that we spend and that we justify almost any activity in the economy as a reason to spend and the reason we do that is because the way to solve the problems in this Nation is to provide a Federal program.

I mean, I am kind of getting that sense.

The gentleman says that if unemployment bumps 1 percent up, that triggers their system, it says there is a recession and allows them to spend beyond the target levels as proposed within their package.

Mr. MACK. Absolutely, absolutely, and again just to close my remarks for this portion and I will be glad to yield to someone else, the gentleman started out by saying the American people have a great deal of problem in dealing with us in any real degree of faith. We say one thing, we do another.

All I am saying, it seems to me there are two clear alternatives here. Do you want to establish a goal certain? Do you really want to make the effort to get a balanced budget by 1991? Do you want to establish targets that you will really live with and stick to?

It is very simple, very clear, very across the board, or do you want to come up with kind of a mumbo-jumbo kind of shell game, here-today-gone-tomorrow type of thing, that says yes, our goal is $161 billion the first year, but we are not real sure of what it is going to be in the second year, depending on the level of economic growth and what might happen with the unemployment rate.

Mr. CRAIG. Let me ask the question then, if I were a citizen out there wanting this Congress to balance its budget and I wanted to write my Congressman and tell him that, which one would I tell him to vote for?

Mr. MACK. Well, I think it is pretty obvious to me.

Mr. CRAIG. I mean, it is really a black-white, yes-no kind of issue that a lot of my constituents have to deal with and ask me that question. "Don't give me all the rhetoric. Tell me which one is going to get the job done."

Mr. MACK. Clearly, the alternative to vote for is the one that everyone talks about. It is the Gramm-Rudman proposal here in the House that is called the Mack-Cheney bill. That is the one. That is the alternative that is going to do it.

Mr. CRAIG. The primary reason for that is because it establishes targets. It does not allow an escape unless there is a very real open public vote of this body.

Mr. MACK. That is correct.

Mr. CRAIG. Recorded vote by this body.

Mr. MACK. That is correct.

Mr. WALKER. Mr. Speaker, will the gentleman yield to me?

Mr. CRAIG. I am happy to yield to my colleague, the gentleman from Pennsylvania.

Mr. WALKER. It is important to recognize that a few moments ago on the House floor the Democratic Party almost en masse, with the exception of two, voted not to establish those targets. Clearly, the vote was shall we have the targets or shall we go with mumbo-jumbo. They voted for mumbo-jumbo, because it was clearly in the instructions that what we wanted to do was to assure them that we had a formula for getting there and that was voted against.

There is another portion of this, though, that also shows how phony the whole process is. The gentleman from Florida has outlined I think fairly specifically what is wrong in the formula that they have put in place if in fact this whole plan would go into effect; the problem being that there is another issue called separability that has been raised, which is a fancy word for self-destruct.

Mr. CRAIG. Would the gentleman explain in good, clear, simple, plain English what separability means?

Mr. WALKER. That is what I want to try to do, because I think it is important that the American people understand that there has been a three-step process built into the Democrat's proposal that is designed to make sure that it never goes into effect, that the whole thing folds up and goes away before it ever goes into effect.

It starts with this. It starts with the premise that there ought to be a court test of this whole process before anything takes place.

The second part. It says that if you have something in the courts that fails the constitutional test, if any one part of the bill fails a constitutional test, as defined by the courts, the whole proposal goes down. In other words, you lose the whole thing. You do not lose just one part, you lose the whole thing.

Mr. CRAIG. That is like an English teacher grading a student's term paper and he misspelled one word, so the whole term paper was "F."

Mr. WALKER. That is right. That is precisely what we are doing.

Then the third portion is you build into the proposal something which is clearly unconstitutional, which in at least two instances they have done in their proposal.

□ 2025

Mr. CRAIG. That is like the English teacher telling the student how to spell the word, knowing he or she has told the student that it was spelled wrong, so, therefore, the student uses it in the term paper and the term paper gets an "F."

Mr. WALKER. That is exactly what they have done, because in this case they have put at least 2 provisions in, one of some constitutional question, one of no constitutional question that it is unconstitutional.

One thing that they have put in was a CBO review only, that CBO would be the only one that could trigger the sequestering process, thereby leaving the Executive out of the whole process. That is probably unconstitutional.

However, there is another portion in the bill that is very unconstitutional as far as I am concerned, and that is that they take away, in limited instances within their bill, the President's veto power. That is an obvious constitutional power of the Executive that is stripped away in certain instances under their approach. So the courts would have no authority whatsoever to do other than to declare the bill unconstitutional, or to declare those parts unconstitutional, and that triggers it right back. Having declared one portion of the bill unconstitutional, the whole bill becomes unconstitutional and that, in fact, assures that it never goes into effect.

So they have built that kind of self-destruct mechanism in. That is the reason why they can get unanimity on their side on these issues. That is the reason why everybody lines up. They know the whole thing is a phony, that it is never going to take effect anyhow.

The severability issues, for all of the high-faluting lawyer talk that we get out here on the floor, is simply this: It is a time bomb designed to destroy the whole process before it ever takes effect so that the spenders can go on doing their things, this crisis will be by them and we will no longer have to face the issue again. They voted again on the same action here just a couple minutes ago to keep severability in. In other words, they voted for no formula that gets us to a balanced budget and they voted to keep the self-destruct mechanism in place.

It is clearly now the Democratic Party in this House that is against doing something to get to a balanced budget. There can be no other conclusion that can be drawn from the vote that we cast just a few minutes ago on the Lott instruction motion.

Mr. CRAIG. I thank my colleague from Pennsylvania for clarifying that. I know that some of the things that we do here, and certainly some of the words we use or the processes become confusing and that has been confusing to me, and I am pleased that the gentleman has outlined it and broken it down in a very clear way so that I think I and others can understand it.

Mr. STRANG. Mr. Speaker, will the gentleman yield?

Mr. CRAIG. I would be happy to yield to my colleague, the gentleman from Colorado.

Mr. STRANG. I thank the gentleman for yielding.

Mr. Speaker, I thank my friend, the gentleman from Idaho, for having this special order and I am most gratified to hear that the State of Michigan has become the next State to approve a referendum to call for a constitutional convention to call for a balanced budget. I believe that leaves one State to go. Am I correct?

Mr. CRAIG. If the house in Michigan now approves this measure passed by the Michigan State senate, then, yes, it would leave one more State to go.

Mr. STRANG. I have to say "Hurrah" to the State of Michigan and hope that they have enough backbone to carry through as a body in this proposal, because as a new Member of Congress, this gentleman arrived in Washington with an amendment in his hand which he dropped into the hopper to offer a constitutional amendment to balance the budget.

I believe that Jefferson meant it when he said we should have it. I know that this Congress has proved that we need to have a balanced budget. I believe that our exercise in discussing Gramm-Rudman and the Rostenkowski proposal has been an exercise in attempting to come to grips either genuinely or disingenuously with the question of balancing the budget.

But I also know from past experience that this body passes laws, and it can un-pass laws. So no matter what we do with laws requiring us to balance the budget, the people of the United States expect us to come through with more than that. As a new Member, I realize that when the Democratic majority in the House of Representatives put forth a program protecting certain areas of the budget, they had necessarily to threaten other parts of the budget, and I have to ask some rhetorical questions, if I may have leave to do so.

When it came to agriculture and the Democratic Party made some choices in this body, on top of all the other things that are happening to the American farmer, did they really mean to add $577 million more in cuts from aid to agriculture than they would have had under the $139 million available to them as a choice under Gramm-Mack?

Did the Democratic House of Representatives, did the leadership, have to choose to cut elderly handicapped housing by $49 million when they had an opportunity under Gramm-Mack to cut only $12 million?

Did the Democratic House of Representatives, in its wisdom and its leadership, really have to cut from the Job Training Partnership Act $241 million when, in fact, under Gramm-Mack they might have only cut $80 million?

Did this House have to cut from the Job Corps $50 million when, in fact, they were offered the opportunity to cut $12 million?

In compensatory education, did this House have to stand up and cut $304 million when, in fact, under Gramm-Mack they could have cut $51 million?

Handicapped education: Did this House have to cut $109 million from handicapped education when, in fact, they had the opportunity to vote for Gramm-Mack which offered cuts of $25 million?

My friends, this is a litany of choice which I, for one, have to ask: Is this the prudent way to do it? Is this the way you start the cuts when you are going through a series of quarters of relatively slow growth in this country? Is that when you put the hammer down?

Severability. My colleagues talked about severability. Severability, in essence, is simply a prudent measure which every legislative body in this country uses to protect the public from having the good parts of legislation thrown out with parts that may be imperfect, so we do not throw out, if you will, the baby with the bath water. Every State legislature does it. This Congress does it. Anybody who would put forth a piece of legislation and take out the severability clause is engaging in an act of cynical assassination on that bill that is as evident to its author as it is to all the rest of us.

Mr. CRAIG. Let me thank my colleague, the gentleman from Colorado, for those observations.

Last weekend I was home in my district speaking to a group of farmers, and they were concerned about the farm bill that had just passed the House and now working its way through the other body. They said, "How does that program, or that idea, or that—" and finally I said, "You are talking about the Rostenkowski balanced budget-debt limitation measure we passed out of the House last night." This happened to be on Friday when we took that action and I was in my district on Saturday.

They said, "Yes."

I said, "Well, I will tell you how it comes down. You lose and everybody else wins because that alternative which I opposed decided to divide an awful lot of issues and it cannot speak to fairness and equity across the board."

I know I have been consistently told by my constituents, "You can cut the budget and we want you to do it. In fact, we ask you to do it. But do it fairly, equitably, and across the board. Treat all programs alike and then we can accept it because we know that if we are benefiting from a program and we are going to take a reduction, somebody else is going to, also."

But, of course, that is not the way that program came about.

Mr. MACK. Mr. Speaker, will the gentleman yield?

Mr. CRAIG. I would be more than happy to yield to my colleague, the gentleman from Florida.

Mr. MACK. I thank the gentleman for yielding.

Mr. Speaker, let me just kind of build on what the gentleman from Colorado was saying, to attempt to explain why one program would see much larger cuts than the other one under the two proposals.

The significant difference really is because of two things. One was that the Democrats desired to get to $161 billion in the first year and, by the way, that figure was arrived at because, again, they felt that the $180 billion that we had established was done for the purpose of avoiding any sequestering action during 1986. Again, I think anybody who knows and has any understanding of the spending patterns of the Nation and the economic flow of things knows darn good and well that the deficit is going to be large enough this year to require a sequestering order to go into effect under the plan passed by the Senate.

The other thing that requires such a larger hit in a number of other programs is because clearly, when you make the decision to exempt some programs, it means that someone else has to pick up the slack. What has happened in the Democrat alternative, or the Rostenkowski deficit reduction plan I guess as it is known, is that there are nine programs that have been added to the exempt list, totally exempt, not put in category I where you can only reduce the automatic cost-of-living adjustments and bring those down to zero. These nine programs are moved totally out of this proposal.

□ 2035

In addition to that, the Democratic plan takes the Medicare Program, that portion which is not affected by COLA's, which is about 97 percent of the program, and moves all of those funds from category II to category I whereby the end conclusion is that only 3 percent of the Medicare dollars are impacted by COLA adjustments.

Mr. CRAIG. Category II is the nonexempt?

Mr. MACK. There are actually three categories. There is the exempt category. Category I are those programs that have automatic cost-of-living adjustments, a COLA, as some people refer to it, and category II are what we call the controllable accounts, and that is supposed to be everything else.

The difference between the two proposals is that roughly, under our proposal, that is the Republican alternative in the House, there are approximately $490 billion in those funds or

that pool of funds. Under the Democratic alternative, there are about $285 billion.

So when you start out with a program that says you are going to cut more, but you are going to cut more out of a smaller number of programs in dollars, that means that those programs have got to get hit harder.

An example that was not mentioned earlier. Under the Veterans Medical Care Program the Senate proposal would require—now, this is again under CBO who has made some projections based on what they think economic activity for the balance of the year would be and what the spending patterns would be; therefore, they have come to a conclusion that there would be a sequester order that would go into effect. Under that sequester order, they say, in effect, in order for the Senate plan to reach the target, there has to be a 1.9 percent reduction in spending in that pool of funds, roughly $490 billion.

In the House plan, because of the large number that has to be met, that is the larger deficit savings have got to be met.

Mr. CRAIG. In other words, to cut more from less.

Mr. MACK. And the fact they are cutting more from less, it states that 8.22 percent must be cut in those programs that are left in the controllable account.

Very simply what that means is that in 1986 fiscal year budget authority under the Senate plan for veterans medical care would be reduced by $172 billion, the budget authority. Budget outlays would be $150 million. Under the House plan that was voted on last Friday, the Gramm-Rudman proposal or the Mack-Cheney proposal was defeated in the House again today, so it was a vote again for their proposal, so there should be a $737 million reduction in budget authority under the veterans medical care, which converts to a $641 million outlay reduction.

I am mesmerized by the fact that people come up here time after time and keep rolling out this word of fairness to us. Fair to who? Is it fair to one group to exempt those nine programs and say now those who are left in the pot are going to have to pick up the additional hit?

I would leave that to the American people to decide whether that is a definition for fairness.

Mr. WALKER. Will the gentleman yield?

Mr. CRAIG. I yield to the gentleman from Pennsylvania.

Mr. WALKER. I thank the gentleman for yielding because I think that point is an important one to build on. We heard a number of speeches in favor of the Democratic proposal that was brought to the floor saying what they were doing was protecting veterans. They, in fact, protected veterans compensation, but for the real veteran who is sick, the wounded person that is really in need of help, the person who is hospitalized, what they have really done is they have slashed those accounts to an even greater extent than could even be imagined under the Gramm/Mack proposal. In fact, what has been cited by the gentleman here is that they are taking four times as much out of the account that would help the veteran who is in real need, the one who is in the hospital.

Mr. CRAIG. Here on the floor Friday, we heard and saw several of our colleagues who may have been with us vote for the Rostenkowski alternative because it "protected veterans."

You are saying it only protected COLA's in, let us say, retirement and also in disability compensation.

Mr. WALKER. That is right.

Mr. CRAIG. But it did not protect them in the medical area. And, of course, that is the area where those large numbers of World War II veterans are now moving into.

Mr. WALKER. Those are the veterans hospitals.

Mr. CRAIG. That is right, and it did not protect them.

Mr. WALKER. It did not protect the veterans hospitals whatsoever and, in fact, subjected the veterans hospitals to greater cuts as a result of protecting other favored programs that were enumerated in their bill.

There is one other point I think I would like to make that is in answer to the gentleman from Colorado, who I think pointed out very specifically the kinds of cuts that are taking place in the program. The point is that the Democrats do not believe those cuts can be made.

The one reason why they vote for this is they are front-loading the program in such a way that they hope again it will destroy itself. If, in fact, you do or would try to do what they are proposing here of taking $173 million out of authority for the low-income energy assistance program versus $40 million in the Gramm/Rudman package, they know that they would never get that $173 million figure. They think you might be able to get the $40 million figure. They know we would never get the $173 million. They know, for example, that in the social services block grants that when you start talking about cutting $224 million out of budget authority that you probably cannot get that. You might be able to get the $52 million that is in the Gramm/Mack proposal.

In other words, they are setting it up for a fall again, because what they can then come back and say is that it did not work. You know, we tried. We had a proposal out there that tried to reduce deficits based upon the formula that you give us, and it did not work.

You see, they did the same thing, they front-loaded the tax program in such a way that it did not kick in until 2 years down the pike. We suffered through a recession in this country because instead of giving us a 10/10/10 tax cut program, we get a 5/10 and 10, and the 5-percent tax cut that we got up front in the front-loading of the process assured that we would go through the recessionary period before we could pull ourselves out when the real tax cut got into place.

The same thing is being tried here. There is an attempt to front-load the spending cut process in such a way that they hope it will fail.

I would suggest that this is one more chapter in the point that we were making here before that there is really three attempts within the Democratic proposal to torpedo the balanced-budget process, and that is why many of us believe that there is something less than sincerity in the attempts by the Democrats to present an alternative on the floor.

I thank the gentleman again for yielding.

Mr. CRAIG. I thank my colleague from Pennsylvania for bringing out those points. I guess I have never questioned sincerity on the part of any Member of this body.

I do, by your observation, certainly have to question the intent. And if the intent is to balance the budget, and the result is to not allow that to happen, then I guess the conclusion you could draw is are those who would support the type of action you have mentioned sincere in their approach?

I think in concluding this special order this evening, I would say that there were 24 very sincere senators in the State legislature in Lansing, MI, this afternoon, sincere in telling this Congress that the economy of the State of Michigan is not going to improve until the fiscal policies of the U.S. Congress improve. That is why they are attempting now to send us a very important message and to become the 33d State to petition the U.S. Congress.

I was up in Lansing, MI, Last year talking with the State legislators and encouraging them to move in the fashion that they are currently moving. I used a figure that I find still holds true in the State of Michigan, a figure that was put together by the American Enterprise Institute and some polling that was done by a couple of national polling firms. That is that a constitutional amendment requiring a balanced budget, to have it in the U.S. Constitution, would bring long-term interest rates in this country down by 2 full percentage points within a 6-month period. And in the State of Michigan alone, that would equate to 30,000 more people being employed if

long-term real interest rates were to drop by only 2 points.

In other words, the economy of this country would recognize the inability of Congress to continue this wild spending habit that we have been engaged in for decades. They would know that we would be able to take less and less of the gross national product, either in the form of taxation or borrowing, and it would leave more out there in the private sector for the purpose of investment, which would ultimately bring interest rates down, and as a result of that, 30,000 more people would go to work in the State of Michigan alone.

I congratulate my colleagues here who support the Gramm-Rudman-Mack approach, and that sincere effort, and I congratulate 24 State senators in Lansing, MI, this afternoon for having the strength and the wisdom to tell this Congress to get its act together, to balance the budget, and to become fiscally responsible.

I also thank those of my colleagues who have joined with me this evening in this special order, and I yield back the balance of my time.

THE ARMENIAN GENOCIDE AND THE OUTCRY IN THE AMERICAN PRESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. EDGAR] is recognized for 60 minutes.

Mr. EDGAR. Mr. Speaker, I have been very patient today and on several occasions I wanted to get up and to challenge my colleagues, but I will leave their statements unchallenged at this point.

Mr. Speaker, it is a privilege for me to sponsor the third in a series of special orders on the American response to the Armenian genocide. My colleagues Mrs. JOHNSON and Mr. PASHAYAN have already demonstrated for us that both the Congress and our Presidents were deeply troubled by the atrocities committed against the Armenians in Ottoman Turkey and tried, over the course of some 30 years, to bring about an end to the massacres.

Today's special order examines the reaction to the Armenian genocide within the American press—in particular the New York Times and the Washington Post—during the period that pre-dates the most notorious genocidal massacres of 1915-23. I would like to thank the Armenian Assembly of America for seeking out this important information and for bringing these articles to my attention.

I hope to remind members of this body that the Armenian genocide was an issue of central concern in the United States as far back as 1890. This tragic period in history merits remembrance by Americans today, many of whom can still recall the national appeals by President Wilson and others to contribute toward the relief of the suffering Armenians.

House Joint Resolution 192, a measure that would designate a day of remembrance for victims of the Armenian genocide, is still before us. This commemorative resolution has the support of a clear majority of the members of this body. Yet, the present Government of Turkey and its Ambassador in Washington have lobbied heavily for the defeat of this resolution, claiming that the Armenian genocide did not occur and creating the false impression that this resolution somehow has a connection with modern Turkey and its relations with the United States.

This approach by our NATO ally is not constructive. There is no inconsistency in the preservation of both the integrity of American history and our friendship with Turkey today. Turkey is calling upon Members of Congress to turn our backs on 90 years of Presidential, congressional, and public recognition of the Armenian genocide. The denial of history cannot occupy a central place in our relations with Turkey.

As early as 25 years before the 1915 period of deportations and massacres of Armenians, reports of atrocities on Ottoman Turkey were reaching the United States. On July 26, 1890, the New York Times ran an article entitled "The Erzeroum Massacre—Armenians Slaughtered and the British Consulate Stoned." The article stated, "The soldiers began a massacre of the Armenians and the Turkish populace joined in the attack * * * Numbers of Armenians, relying on the promises of Turks to escort them to places of safety, were murdered in the streets. Fifty bodies have been found, mostly of persons who were bayoneted; 350 persons were wounded, and 100 are missing." Similar articles continued to appear throughout the year.

Heavy coverage of the massacres appeared again in 1894. On November 19, the New York Times published a piece called "The Massacre of the Armenians," which stated in part: "From many sources, confirmation of former reports of the massacre have been received. The utmost endeavors have been made to prevent the facts from becoming known." On December 2, a Times article entitled "Great Britain Aids Armenia" reported that "a large force of Turkish regulars, with Kurdish and Hamadic cavalry, acting under orders direct from the Turkish capital, destroyed 25 Armenian villages, and massacred some 4,000 men, women, and children." By February 19, 1895, the Washington Post, in an article entitled "Armenian Massacres Confirmed," reported: "The Italian consul at Erzeroum has reported to his government that he has confirmed the accounts of the Armenian massacres with the testimony of eye witnesses."

Throughout 1895, reports of atrocities continued to reach America. On September 10, the New York Times ran an article with the telling headline, "Another Armenian Holocaust", in which it reported that "a force of 1,000 Turkish troops was sent to Kemokh, and five villages were pillaged. Five thousand persons were rendered homeless. Men, women, and children were tortured. Four monasteries were sacked. It is reported that the Turkish minor officials have formed an anti-Christian society to slaughter Christians * * *". By December 1, 1895, the same newspaper ran an editorial entitled "Prompt Relief for Armenians," in which it stated:

* * * It is a simple fact that the wealth, intelligence, and character of the Armenian people all over the empire have been almost blotted out * * * the central Government has not merely been cognizant of the outrages, but has distinctly ordered and encouraged them.

In a December 29 article entitled "Cruelty of the Turks," the New York Times published a chronological list of atrocities in various regions of Ottoman Turkey, including this description of an October incident: "October 27-30—In the district of Kara Hissar Sharki nearly all the Armenian villages (27 are known) were destroyed, numbers of the men killed, and a great number of young women and girls were carried off to be incorporated in the Mohammedan population."

The constant flow of reports about Ottoman Turkish atrocities against the Armenians led the Senate and House to approve a resolution denouncing the massacres. The New York Times carried stories of the congressional action during January 1896, including one on the 25th entitled "An Appeal to the Powers—the Senate Reminds Them of Their Duty to Armenia." By February 2, the New York Times carried a UPI story entitled "Press Censorship in Turkey—United States Senate Resolutions Withheld from Circulation," which stated: "* * * the Government has forbidden the circulation in Turkey of the English newspapers of January 27, which contain dispatches from Washington giving the United State Senate resolutions regarding the condition of affairs in Armenia, and also a report * * * by the Right Hon. Joseph Chamberlain, Secretary of State for the Colonies, in which Mr. Chamberlain declared that the condition of Armenia was a danger and a disgrace to Europe."

The massacres continued throughout 1896 and 1897. On March 24, 1897, the New York Times carried an article entitled "The Armenian Massacre—The British Ambassador in Turkey Makes a Strong Remonstrance," and another piece on the 26th of March entitled "Seven Hundred Killed—the

Massacre of Armenians at Tokat More Extensive Than Was Reported." On July 13, it ran another article under the title "New Horrors in Armenia—Turks Boast of Having Sworn to Wipe Out the Christians Slowly but Surely."

Despite these shocking accounts of mass human destruction, the current Turkish Ambassador, The Honorable Sukru Elekdag, has repeatedly written to Members of Congress asking us to reject this history. In light of the past American record on this issue, we simply cannot comply with his wish. Tampering with history is a dangerous exercise and, as we saw in the Bitburg incident, a morally repugnant one. The credibility of modern Turkey would be enhanced greatly if it would allow the past to be left alone for those who seek to remember, not for those who wish to rewrite.

Our desire today, however, is not to tell Turkey how to handle its affairs. It is simply to remember a period of American history that is dear to many citizens of this country—to Armenian-Americans as well as to those who remember this era of selfless dedication by Americans to the salvation of the Armenian people. The effort to have a national day of remembrance designated for the victims of the Armenian genocide began 10 years and must at last be approved by both Chambers and signed by the President. The 10-year effort by the Republic of Turkey to block this remembrance by the United States must cease.

House Joint Resolution 192 is now awaiting action in the Rules Committee. I urge Chairman CLAUDE PEPPER to schedule the resolution for committee consideration as soon as possible. This body must approve House Joint Resolution 192 when it returns to the floor.

I include the articles I have referred to in my remarks in the RECORD.

[From the New York Times, July 26, 1890]

THE ERZEROUM MASSACRE—ARMENIANS SLAUGHTERED AND THE BRITISH CONSULATE STONED

LONDON, July 26.—The News gives the following details of the recent riots at Erzeroum: "On June 20 the soldiery were ordered to disperse Armenians who were holding a meeting in a churchyard. The soldiers began a massacre of the Armenians and the Turkish populace joined in the attack. The shops and houses of the Armenians were pillaged. The sack lasted four hours."

The British Consulate at which on the same night a fete was being given for the benefit of poor Armenians, was stoned and its gates and windows were broken. The Consul and the members of his family took refuge in the cellars of the building and the fete was abandoned. The American Mission served as a refuge for fifty fugitives.

Numbers of Armenians, relying on the promises of Turks to escort them to places of safety, were murdered in the streets. Fifty bodies have been found, mostly of persons who were bayoneted; 350 persons were wounded, and 100 are missing.

[From the New York Times, Nov. 19, 1894]

THE MASSACRE OF THE ARMENIANS—AN INQUIRY TO BE MADE BY THE PORTE INTO THE TRUTH OF THE REPORTS

LONDON, November 18.—The Daily News' correspondent in Constantinople says, in a dispatch concerning the massacre of Armenians in the Sassoun district:

"Sir Philip Currie sent Consul Hallward's report on the incidents at Sassoun to the Porte, in order to indicate the serious nature of the events. The Porte, instead of accepting this in a friendly manner, brusquely denied the facts, asserting that Mr. Hallward's report is untrue. It was insituated or stated outright that he had encouraged the Armenians to revolt. This was, of course, ludicrous and absurd.

"Sir Philip Currie at once informed the Foreign Minister that he should take steps to verify his assertions. His energy paralyzed the Porte, who on Saturday withdrew the allegations against Hallward. The Sultan ordered a commission of three military men and a civilian to make an immediate inquiry.

"From many sources, confirmation of former reports of the massacre have been received. The utmost endeavors have been made to prevent the facts from becoming known. A number of Armenians who fled toward Trebizend have been ordered to return."

[From the New York Times, Dec. 2, 1894]

GREAT BRITAIN AIDS ARMENIA—EXPLICIT WARNING TO THE PORTE ABOUT THE BERLIN RULE

GOVERNMENT ORGAN AND QUEEN VICTORIA'S BEHAVIOUR EMPHASIZE THE IMPRESSION OF ANGLO-RUSSIAN DEAL

LONDON, December 1.—Rustem Pasha, the Turkish Ambassador to Great Britain, had a long interview last evening with the Earl of Kimberley, Secretary of State for Foreign Affairs, in which, it is understood, he gave Lord Kimberley such a detailed statement of the intention of the Porte to make an honest investigation in regard to the Armenian atrocities as satisfied the Foreign Secretary that the matter would be thoroughly sifted.

Sir Philip Currie, the British Ambassador to Turkey, has also telegraphed to the Foreign Office a statement giving reasons which lead him to suppose that the commission appointed to investigate the matter intends to make an unbiased report. This semiofficial information conveys what the Government wish the public to believe, but withholds the exact truth regarding the position of affairs, which is that the Porte is acting under an explicit warning from England that Article LXI of the Berlin treaty, which guarantees the security of the Armenians, will be enforced through the intervention of the powers unless the result of the commission's labors shall be absolutely satisfactory and the reforms promised in Armenia be effected without delay.

The Speaker, in an article on the subject, predicts the failure of the Porte to meet England's demands, and forecasts Anglo-Russian intervention in Armenia as the inevitable outcome of the present condition of affairs. The paper says that the Porte after a long delay will produce a plan for illusory reforms, and that is the meantime the process of extirpation of the Armenians will proceed unchecked, and adds: "The Government ought to recognize that the time for words is past."

The first fruits of the proposed Anglo-Russian entente, The Speaker continues, may be Russian occupation of Armenia, as no power but Russia can reach the scene of action without raising the question of opening the Dardanelles and the complex negotiations connected therewith, and, as a precedent for such action, the paper quotes the British occupation of Egypt.

This important utterance of a Government organ is accompanied by an authoritative communication from Constantinople, declaring that, after the Armenians had repulsed the Kurds, a large force of Turkish regulars, with Kurdish and Hamadic cavalry, acting under orders direct from the Turkish capital, destroyed twenty-five Armenian villages, and massacred some 4,000 men, women, and children. There is nothing, adds the correspondent, exceptional in this massacre but its proportions.

The same thing, on a small scale, is going on throughout the large districts, where Christians, Nestorians, and Armenians are being exterminated.

With reference to Egypt the article points out the probable extension of the Anglo-Russian entente. If Russia shall occupy Armenia, as the representative of England, under the Anglo-Turkish convention, in which Armenian reforms were further guaranteed, the French policy in Egypt will receive a decisive check.

[From the Washington Post, Feb. 19, 1895]

ARMENIAN MASSACRE CONFIRMED

ROME, February 18.—The Italian consul at Erzurum has reported to his government that he has confirmed the accounts of the Armenian massacre with the testimony of eye witnesses.

[From the New York Times, Sept. 10, 1895]

ANOTHER ARMENIAN HOLOCAUST

FIVE VILLAGES BURNED, 5,000 PERSONS MADE HOMELESS; AND ANTI-CHRISTIANS ORGANIZED

LONDON, September 9.—The Daily News will tomorrow publish a dispatch from Kars, stating that fresh outrages have been perpetrated in the Erzinzian district.

A band of brigands attacked a company of Turkish gendarmes on Aug. 12, killing a Sergeant. Therefore, the Turkish authorities, without making any inquiry, decided that the assailants were Armenian revolutionaries from Kemakh, who intended to release exalted Armenians who are still in prison at Kars.

A force of 1,000 Turkish troops was sent to Kemokh, and five villages were pillaged. Five thousand persons were rendered homeless. Men, women, and children were tortured. Four monasteries were sacked.

It is reported that the Turkish minor officials have formed an anti-Christian society to slaughter Christians if the Porte accepts the scheme of reforms the powers insist upon.

[From the New York Times, Dec. 1, 1895]

PROMPT RELIEF FOR ARMENIANS

It is almost impossible to realize the magnitude of the calamity that has overwhelmed the Armenians of Asiatic Turkey. The telegrams from Constantinople urging the Red Cross Association to enter into relief work as in war times gives a hint of the disaster, and the letters that came by the last mail describe the situation as something appalling. Every shop in every city visited by the marauders has been cleared of everything. Although in their mad eager-

ness for plunder the Kurds and Turks have spared some lives, it is a simple fact that the wealth, intelligence, and character of the Armenian people all over the empire have been almost blotted out. The principal men in every city, including merchants, school teachers, and leaders of thought, were singled out for murder, and those who escaped have been reduced to abject poverty. But it is not merely the cities that have suffered. The farming regions are desolated and flocks and herds have been carried off, so that, according to the best estimates, at least a quarter of a million of people are in immediate danger of starvation.

Meanwhile the story of massacre grows worse rather than lighter. A second massacre in Marash, accompanied this time by the destruction of American school buildings, and rumors of massacre in Aintab and Van, make up the latest list. These are three of the most important cities of Northern Syria and Eastern Turkey. Van is the seat of English, French, and Russian Consuls. In Aintab the Armenian population, long noted for exceptional intelligence and corresponding influence, has always been on friendly terms with the Turks. For these two cities to be ablaze shows that the conflagration has in all probability gone far beyond the power of telegraphic orders from Constantinople to stop it, and proves that the central Government has not merely been cognizant of the outrages, but has distinctly ordered and encouraged them. The story is the same everywhere—the Armenians piteously pleading for protection; the authorities promising the fullest protection and ordering the shops to be opened, and then the Turks going to pray over it and coming out and falling on the Christians like a whirlwind, the Sultan decorating the commanding officer. Under such circumstances to believe a word that either the Sultan or his officials say or to accept a single promise is both farce and crime.

The appeal to America is one that cannot be too earnestly indorsed. In every part of the land the response should be prompt and effectual. Money is needed, but money is not all. The pillage of three months has destroyed millions of dollars' worth of property in the form of clothing and provisions. Both of these can be sent and distributed to great advantage, and the quicker they go the better. But here a very serious situation confronts those who would gladly send aid. How is the aid to reach the people? The country is absolutely closed to private enterprise. The missionaries are marked men. Those in Eraroum and Bitlis have been shot at, but have so far escaped with their lives. They will do what they can, as is shown by the heroic resolve of most of the Harput company to stay by the people even at great personal danger, but it is very evident that they cannot do much. The request for the Red Cross to act is most timely, and we hope that the two relief associations will immediately take what steps they can to come into relations with that organization and gain the indorsement and practical support of the Government. It is no time for personal preferences. Combination, mutual assistance, and united action are imperative. Winter is setting in, and unless help goes at once, it means the direst suffering and the loss of thousands of lives.

[From the New York Times, Dec. 29, 1895]

CRUELTY OF THE TURKS—DETAILS OF CRIMES AT MARASH, IN SANDJAK REGION, AND ELSEWHERE

MUSTAPHA PASHA SHARED IN BOOTY—CHRISTIANS COMPELLED TO ABJURE THEIR RELIGIOUS FAITH AND BECOME MOHAMMEDANS OR WERE TORTURED AND KILLED

CONSTANTINOPLE, December 16.—The United Press correspondent here has received the following information:

"MARASH, November 26.—The following information has been communicated to the Embassies: On the morning of the 18th, almost simultaneously, soldiers were seen discharging their guns all over the city, especially into Christian houses, whose occupants fled. The soldiers looted the houses of everything they could lay hands on. The mob followed, smashing doors, windows, and all else, and carried away as much of them as possible.

"Toward noon a squad of soldiers entered the grounds of the American Theological Seminary. They discovered two students, who had concealed themselves there, and shot one of them, so that he died that night. The other was pierced by minnie balls in four places and severely cut over the head. The soldiers then proceeded to rifle the academy boarding house of all the students' bedding, clothing, and other articles, and also the year's provisions. They were reinforced by soldiers from the barracks nearby, and then began to loot the seminary itself.

"After everything had been carried off, about 3 p.m., a few soldiers entered, and soon smoke was issuing from the rear of the building. This fact is completely proved. The sight of the edifice in flames seems to have aroused the Government to action, and the Americans were soon protected by a trustworthy Captain, with thirty soldiers. The Americans are still being guarded, for as long as the disturbance continues at Zeltoun (twelve hours distant) there is little certainty about anything. The personal losses of the Americans will reach $10,000, but heavier than the loss of the seminary is that of the choice library in it.

"Some details of events:

"Oct. 1.—Monasters of Verakugh, District of Kamekh, sacked.

"Oct. 4.—The Sourp Anardjat Monastery, at Pakarlen, pillaged.

"Oct. 12.—Five other monasteries, District of Kamekh, destroyed.

"Oct. 14.—During the massacre at Baiburt, Armenia, villagers of Baiburt were summoned to abjure their faith on pain of death; four villages yielded.

"Oct. 21.—Monastery at Chokha, District of Kamekh, pillaged.

"Oct. 22.—The church at Perouan, District of Erzinghian, pillaged. Priest and thirty people were killed in church.

"Oct. 24.—Eight monasteries, same district, sacked.

"Oct. 24.—Terjan, District of Erzroum, 1,000 Christians killed. Survivors escaped by accepting Mohammedanism. Moslems insisted upon converted women being given as wives to Moslem young men as proof of conversion.

"Oct. 27-31.—Church village of Umudum burned; priest killed; ditto Koinik, treated similarly; church village Teverik robbed and profaned; ditto Garash, ditto. All these on plain of Erzroum, where twenty-four villages were destroyed at the same time.

"Oct. 29.—Monastery Harsan Kaleh burned, together with Bishop and eleven inmates.

PLUNDERING IN SANDJAK REGION

"During the plundering of the villages in the Sandjak region two of the graduates of the theological seminary were killed at Huseink. The wife of one was carried away captive; the wife of the other was killed at his side; he himself had his arms cut off and was then hacked to pieces. At Hoh the Aghas at first promised to protect the Christians, but when they saw the villages all around burning, they said they would not. The Christians were asked to accept Islam, and they assented and were assembled in the mosque. Eighty males above fifteen years of age were picked out and led outside the village. On the way eight escaped. Their captors said to the rest: 'You are not Moslems; you are lying to us.' And they killed sixty-two and wounded ten. The fairest women were taken to the Turkish harems; the rest were sent to Turkish and Kurdish villages.

"The Kurds came into the city of Harpoot with all that was necessary for this work of destruction. They carried kerosene oil, which they poured upon the woodwork, and then set fire to it. Many eye witnesses testify to this. Those writing from the interior say it is evidently a plan on the part of the Government to make the reforms useless by destroying the Christian population. All who are left in the villages are considered Moslems and will be claimed by the Government as such. There is no restraint upon the Turks in the villages.

"One of the prominent men of Harpoot, who is a general favorite with Government officials, was the guest of an official of high position during the attack. With his host he watched the gathering of the forces to attack the city, and his host told him that the attack would take place at such an hour. He asked how that was known. He was told that it was in accordance with a pre-arranged plan. He said the raiders were soldiers of the reserve corps. They laid aside their uniforms and appeared as Kurds. He saw them go out to the villages and return.

"Another prominent man is the partner of a Kurdish Agha. This Agha told him that Mustapha Pasha, Commander in Chief of the Army, made a requisition on him for 500 men to do the work, and he said the order for it came from Constantinople. Another trustworthy man heard the booty being divided in a garden, and the dividers said: 'This is fit for this official, and this for that.'

"A wagon load of the booty was sent to Mustapha Pasha.

"Oct. 27 to 30—In the district of Kara Hissar Sharki nearly all the Armenian villages (twenty-seven are known) were destroyed, numbers of the men killed, and a great number of young women and girls were carried off to be incorporated in the Mohammedan population. From the Church of Sourp Takvor were stolen vessels and books valued at $30,000.

"Oct. 28.—At Enderes, same district, church burned, with a number of women and children who had taken refuge there.

"Nov. 2.—Denzik, same province. Armenian villagers being commanded to become Moslems on pain of death, saved their lives by professing Islam. At Zijk same thing.

"Nov. 9.—At Khizan, in the Province of Van, the Superior of the Armenian monastery was killed, his skin flayed, stuffed with straw, and hung up in a public place. Many people were forced to become Mohammedans.

"Nov. 11.—Harpool. Many priests were killed, with horrible torture, others yielded to pressure and became Mohammedans. The Protestant pastor near Koh was killed for refusing to embrace Islamism.

"Two Protestant pastor of Halakeny escaped from the horde of butchering Moslems and reached Harpoot in safety, but were taken from the house where they were hidden and ordered to accept Islam. On refusal, they were both put to death.

"An extra tax of 2½ piastres on sheep and 5 piastres on cattle is being levied in Syria for the support of the families of the reserves that have been called out.

"The Turks have called on the Druses to pay twenty-one years' back taxes, and, if these are not forthcoming, the soldiers are to advance. Following the example of the Grant Vizier, the Minister of War, and others, a collection is being taken up to provide horses for the Fifth Regiment. This has been so far successful that twenty horses have already been purchased.

"An extra tax is being levied in Asia Minor to provide uniforms for the reserves."

[From the New York Times, Jan. 25, 1896]

AN APPEAL TO THE POWERS—THE SENATE REMINDS THEM OF THEIR DUTY TO ARMENIA—CALLS ON THEM TO CURB THE TURKS—PASSAGE OF THE RESOLUTION REPORTED BY THE COMMITTEE ON FOREIGN AFFAIRS—FIERY SPEECH BY SENATOR FRYE

WASHINGTON, January 24.—Having stood idly by the months while the Turks have been slaughtering the Armenians, it is not reasonable to assume, as some United States Senators do, that the great powers that are parties to the Berlin Treaty of 1878 immediately will reverse their position out of regard for American sentiment, as expressed in a resolution of Congress—such a resolution, for example, as was reported a few days ago by the Senate Committee on Foreign Relations, and passed by the Senate today.

The resolution reviews the salient features of the Berlin Treaty, and declares that it is an imperative duty to express the hope that the concert brought about by the convention may have speedy effect in measures that will put a decisive stop to the slaughter now going on in Turkey. The President is requested to communicate the resolution to the different Governments interested, and is assured that the Senate, the House concurring, will support him in the most vigorous action he may decide to take.

This resolution was adopted to-day by the Senate without any opposition worth mentioning. Mr. Call has a scheme for committing the Government to the proposition to give Armenia a separate Government, but he is its sole advocate, and the substitute resolution he introduced to-day, embodying this idea, was thrust aside.

The question whether the committee resolution should be endorsed naturally developed some fiery oratory. Mr. Frye of Maine is at home on the subject of foreign missions, and he entertained the galleries in a fervid appeal for American protection of American missionaries in the regions where the Turks are spilling the blood of countless innocent persons. Mr. Frye's well-known tendency to twist the tail of the British lion when occasion offers gave additional strength to his assertion that if British subjects had been injured in person or property by the Turkish hordes there would have been a speedy demand for redress.

Perhaps the most sensational remark made by Mr. Frye was that if he could have had his way Russia would have been told to take possession of Armenia, with the assurance that the United States would stand by her. Mr. Frye did not refer to the possible results of such an alliance. The resolution now goes to the House for its concurrence. Possibly that body will substitute for it one of its own declarations on the same subject.

DEBATE ON THE RESOLUTION.—SPEECHES THAT VOICED THE SENATE DETESTATION OF THE TURKS

WASHINGTON, January 24.—The debate in the Senate today on the Armenian resolution was opened by Mr. Cullom (Rep., Ill.)

Mr. Cullom said he was amazed, astounded, and appalled at the accounts which he had of the awful carnival of havoc, destruction, and blood which prevailed for a time in a country with which the United States maintained amicable relations.

The concurrent and accumlated testimony of hundreds and thousands of intelligent people, Christian and Jew, Catholic and Protestant, European and American, made it conclusively certain that a massacre of innocents, unparalled for ages, had been perpetrated in the Armenian provinces of Turkey. Fire and sword had swept away over many square miles of territory the last vestige of Armenian human life, and over 300 villages the demon of damnation and fanatical hate had spread ruin, desolation, and death.

The English Government had a direct obligation resting on it to protect the Armenians and yet nothing had been done by it, nor by any of the other powers, looking to the enforcement of their treaty obligations, beyond more diplomatic correspondence between them and the Sultan. It therefore had seemed to the Committee on Foreign Relations that it could do nothing less than appeal to the powers to carry out their pledges, as it did in the concurrent resolution.

[From the New York Times, Feb. 2, 1896]

PRESS CENSORSHIP IN TURKEY—UNITED STATES SENATE RESOLUTIONS WITHHELD FROM CIRCULATION

LONDON, February 1.—The United Press correspondent at Constantinople, telegraphing under date of Jan. 31, says the Government has forbidden the circulation in Turkey of the English newspapers of Jan. 27, which contain dispatches from Washington giving the United States Senate resolutions regarding the condition of affairs in Armenia, and also a report of the speech delivered at Birmingham on the night of Jan. 25 by the Right Hon. Joseph Chamberlain, Secretary of State for the Colonies, in which Mr. Chamberlain declared that the condition of Armenia was a danger and a disgrace to Europe.

The correspondent also says that the Russian Consul, who has reached Zeitoun, has reported that hundreds of the Armenians who are holding that town are dying from disease and exposure to the intense cold.

[From the New York Times, Mar. 24, 1897]

THE ARMENIAN MASSACRE—THE BRITISH AMBASSADOR IN TURKEY MAKES A STRONG REMONSTRANCE

CONSTANTINOPLE, March 23.—In consequence of the troubles at Tokat, in the Sivas district of Anatolia, Sir Philip Currie, the British Ambassador, has sent to the Porte the strongest remonstrance that has yet been addressed to the Government in an official communication.

The official report of the affair said that fifteen Armenians and three Mussulmans were killed, but the embassies have received reliable information that fully 100 Armenians were massacred. The people were killed while in church. During and after the massacre the Armenian quarter of the city was given over to pillage.

The Turkish newspapers, in their comments upon the blockade of Crete, remark upon the pacific attitude of the powers toward Turkey. Their attitude, they say, is conformable with the rights and political interests of the Porte, and furnishes fresh proof of the striking success that has been gained by the Sultan. It also testifies to the friendship of the powers for the Porte, and their solicitude for the peace of the world.

[From the New York Times, Mar. 26, 1897]

SEVEN HUNDRED KILLED—THE MASSACRE OF ARMENIANS AT TOKAT MORE EXTENSIVE THAN WAS REPORTED

THE SULTAN FORCED TO ACTION—HE ORDERS THE ARREST OF THE TURKISH OFFICERS AT TOKAT, AND THE APPOINTMENT OF A COMMISSION TO TRY THEM

CONSTANTINOPLE, March 25.—Further and probably more accurate details of the recent massacre of Armenians at Tokat, in the Bivas district of Anatolia have been received by the Armenian Patriarchate here.

The news received today at the Patriarchate shows that the number of victims was fully 700. It was stated at the Patriarchate today that these figures were obtained from reliable persons in Tokat and the vicinity, and that the number of victims stated is without doubt correct.

Sir Philip Currie, the British Ambassador, made a most vigorous protest against the massacre in a note to the Porte, a note which was said to have been the strongest ever delivered by an Ambassador to the Turkish Government. The result of his action was shown today, when the Sultan ordered the dismissal and immediate arrest of the Turkish officials in Tokat who are suspected of complicity in the massacre and the appointment of a special commission to try them.

It is believed that the British Ambassador will watch the trial closely to see that it does not prove a farce, as so many trials of Moslem officials charged with the murders of Christians have been.

Mgr. Ormanian, the Armenian Patriarch, has made a protest to the Sultan against the murders at Tokat, and has added force to his protest by insisting that the Sultan shall accept his resignation, which was tendered some time ago. At that time the Sultan refused to accept it, and promised the Patriarch that further concessions would be made to the Armenians. His Majesty asked, however, that the granting of these concessions be deferred until after Easter. The massacre at Tokat followed.

Eight Armenians were arrested here today as a measure of precaution, the Government fearing that the news of the Tokat massacre might precipitate an outbreak. The prisoners are suspected of having been engaged in an attempt to make a demonstration here.

[From the New York Times, July 13, 1897]

NEW HORRORS IN ARMENIA—TURKS BOAST OF HAVING SWORN TO WIPE OUT THE CHRISTIANS SLOWLY BUT SURELY

LONG REPORT REACHES PARIS—CLANDESTINE EXTERMINATIONS AND TERRIBLE PERSECUTIONS CARRIED ON IN THE REMOTE PROVINCES—WOMEN CHAINED AND BURNED WITH RED-HOT IRONS

PARIS, July 12.—Pere Charmetant, Director General of the French Mission in the Levant, has received by way of the Caucasus and Tiflis a report prepared by a number of Armenian notables and Gregorian Bishops on the situation in Armenia.

It took the messenger who had the document in charge nearly three months to get through the difficulties and dangers along the Turkish frontier, which was carefully guarded against all Armenians or Armenian sympathizers.

The report, which fills thirty printed pages, is very carefully prepared and goes fully into the situation.

According to its authors, the Turks in Armenia, fearing European intervention, have abandoned the old practices of wholesale massacres, but during the last year there have been clandestine exterminations and most terrible persecutions, especially in the more remote provinces.

The Turks openly boast that they have sworn to wipe out the whole Armenian race, slowly but surely.

The document recites in detail various forms of persecution. It appears that the Tax Collectors seize the inhabitants if they do not pay everything demanded. "Women are taken through the streets with chains around their necks and kept for days without food. In some cases they are fastened to pillars, head downward. Freezing water is thrown over them or they are beaten until the blood runs. In other cases their hands are tied behind their backs, and then cats, first made furious, are thrown into their bosoms. Often they are burned in various parts of their bodies with red-hot irons.

"All the highways are guarded so as to prevent emigration. Not a single day passes without our hearing of or witnessing somewhere within our unfortunate provinces some fiendish cruelty. The Turks and Kurds enter the houses of Armenians in gangs, bind the men, and then ill treat their wives, sisters, and daugthers before their eyes."

The document concludes with the despairing cry, "Our hope is dying out. God help us. May Europe have pity upon us."

Mr. WALGREN. Mr. Speaker, I thank the gentleman from Pennsylvania for his efforts to make us better aware of the extent to which this country was aware of the atrocities against the Armenians in Ottoman, Turkey, at the time they were happening. The hundreds of appalling reports in American newspapers caused great concern in the United States over the fate of the Armenian population there.

I was especially moved by the efforts of American religious and relief organizations to provide urgently needed food and supplies and simultaneously to persuade the American Government to intervene on behalf of the Armenians. These reports underscore a deep-seated frustration among Americans over the Ottoman outrages.

On December 16, 1894, an article appeared in the New York Times entitled "Protest for Armenians—Their Treatment by the Turks Denounced as Outrageous." It describes a meeting held in the Calvary Protestant Episcopal Church in Manhattan, during which the massacres of Armenians were deplored. Another article in that newspaper on August 5, 1895, entitled "Assistance to Armenians," contains a report from the American Board of Foreign Missions about the difficulty with which American food and supplies was being distributed:

"There is a so-called Turkish Relief Company * * * and they are trying to interfere with other relief operations as far as they can."

The New York Times ran an article on October 1, 1895, about a resolution adopted by the Evangelical Alliance in Boston against the Armenian atrocities. The article, entitled "Evangelists Against Turkey," contains the text of the resolution, which reads in part:

Resolved, First, That we call upon our Government to join with the Governments of Europe in forcibly stopping the inhuman butchery of fellow Christians in Armenia.

On February 10, 1896, another New York Times article appeared under the headline "Appeal by the Bishops—Slaughter of Armenians by the Turks Should be Stopped." The opening paragraph reads:

The Bishops of the Protestant Episcopal Church in the United States, who, a week ago, sent a petition to President Cleveland asking that the Government interfere in saving the Christian Armenians from continued massacre at the hands of the Turks, have forwarded to the powers of Europe and to the Archbishop of Canterbury a memorial, praying that immediate measures be adopted to compel the Turks to cease from slaughter and persecution.

On March 19, 1896, an article was published by the New York Times entitled "Escaped Many Dangers," describing the perilous efforts of Christian Herald missionary W.W. Howard to distribute relief to the suffering Armenians. The article quotes Mr. Howard:

The Hamidieh cavalry * * * are an irregular soldiery of the Sultan, and they are devils let loose, and let loose under orders of the Sultan to commit these outrages. Wherever there was a Christian village there was destruction, outrage, robbery and murder.

Finally, on January 9, 1897, a piece was carried by the New York Times entitled "To Aid the Armenians," describing the efforts of the National Armenian Relief Committee and its chairman, Spencer Trask, to raise funds for the relief of Armenian widows and orphans. The article describes the publication of a booklet called "How To Save Alive the Orphan Children of Martyrs in Armenia."

This outpouring of American sentiment on behalf of the Armenians of Ottoman Turkey is an important part of humanitarian tradition of our history. Concern for the Armenian people was heard from every corner of America during this tragedy of nearly 30 years. The outcry of Americans echoed the concerns expressed by our Presidents and by the Congress itself in an effort to end the massacres and to bring comfort to the stricken.

This history is certainly worthy of remembrance. House Joint Resolution 192, which will be before us again soon, seeks to bring recognition to this period of our past. Many senior Americans can tell us firsthand of their own efforts on behalf of the Armenians back in this period. As a tribute to their humanitarian acts, we should approve House Joint Resolution 192. I urge my colleagues to join me in voting in favor of this measure.

Mr. MAVROULES. Mr. Speaker, as the representative of many Armenian-Americans, I am pleased to be participating in this special order on the Armenian genocide and the outcry in the American press, sponsored by Congressman BOB EDGAR.

What we know of our past comes to us through what has been left behind—documents, letters, newspapers, and, for more recent history, memories of eye witnesses. It is through this history that lessons of the past are taught to future generations.

Mr. Speaker, as you know, the Armenians were victims of a genocide in the early part of this century. This genocide, perpetrated by the Ottoman government, is now being actively denied by the Turks. The fear of upsetting our ally Turkey has made us blind to the facts. The documents, letters, newspaper articles, and eye witness accounts substantiating the genocide all exist. Our archives alone are filled with affirmative evidence, not to mention the archives of France, Britain, and Germany.

Unfortunately, it is much easier to question the past, labeling an unpleasant event alleged, than to search for the truth and accept it. Turkey is working very aggressively to eliminate all mention of the genocide and many U.S. officials are questioning its reality. What is happening though, is that we are adjusting the past to suit our current needs; we are rewriting history. Americans must have no part in this revisionism; whether a genocide was committed against Cambodians, Jews, or Armenians, it was a genocide and must be remembered as such.

Today, I would like to take a moment to look at some of our own reports of the massacres in the Turkish province of Adana in 1909. These massacres were only one wave in a hurricane of events that started in the 1890's and eventually wiped out the Armenian population of eastern Turkey by the 1920's.

The American press was very prompt and persistent about reporting the events going on in Asia Minor. The Washington Post in April of 1909, gave extensive coverage to the massacres of Armenians. On April 17, 1909, the Post reported the following:

CONSTANTINOPLE, April 16.—A massacre of Armenians has taken place at Adana, Asiatic Turkey, and, according to the latest telegrams from Mersina, still continues. Soldiers, powerless to control the situation, are joining in the pillage of the town. The fatalities are said to be numerous * * *. Consular telegrams received here report that half of the town of Adana has been burned and that the attacks upon the Armenians are extending into the villayet.

To a civilized, 20th century America, this news was shocking and distressing. In response, on April 23, 1909, the Post reports that—

In view of the pressing danger of Americans, missionaries and others in many towns of Asiatic Turkey, where massacres have been going on for a week, the administration is making strenuous efforts to send American guns to the scene of the disturbances.

Unfortunately, the steamer with the guns would not reach Gibraltar until May 1, which would be too late to be of any help.

A week later, on April 24, 1909, the Washington Post reported more of the same bloody news:

BEIRUT, April 23.—The adult male Armenian population of Antioch and vicinity has been practically wiped out in the massacres of the last few days by Fanatical Moslems. There are thousands of destitute Armenian widows and orphans still in the district, unable to get away * * *. Intense alarm exists among the Armenians still alive of a recurrence of the attacks upon them * * *. Massacres are raging today in the neighboring Armenian villages, and instant relief is needed.

The plea for help did not go unheeded. On April 29, 1909, the Washington Post, alongside the news of more carnage, reported on American efforts to provide aid to the victims.

The American National Red Cross Society has already sent $1,000 by cable to Ambassador Leishman in Beirut for relief work * * * the Red Cross would be glad to receive and transmit contributions from the people of the United States to the American ambassador to be used in relief work at his discretion.

Also—

WORCESTER, MASS., April 26.—An appeal for funds to aid the survivors of the massacre in the province of Adana, Turkey, was issued today by the National Armenia and India Relief Association, whose president is Justice David Brewer, of the United States Supreme Court.

In light of these Post articles and the American response, there can be no doubt that these events were a part of our history. Regardless of how our friends Turkey feels about it, we do not choose to rewrite the past.

House Joint Resolution 192 is an attempt by Congress to reaffirm our commitment to the victims and survivors of the Armenian genocide. We are simply echoing the response of our past by designating a national day of remebrane of man's inhumanity to man. When this resolution comes to the floor for a vote, I urge my colleagues to vote for it. It is a vote for compassion, and, more importantly, it is a vote for history.

Enclosed are the articles I referred to above. Please include them for the RECORD.

[From the Washington Post, Apr. 17, 1909]

KILL AND PILLAGE

CONSTANTINOPLE. April 16.—A massacre of Armenians has taken place at Adana, Asiatic Turkey, and, according to the latest telegrams from Mersina, still continues. Soldiers, powerless to control the situation, are joining in the pillage of the town. The fatalities are said to be numerous.

The riots began last Wednesday, and the town of Adana has been burned and many Christians killed in the streets. The Moslems having practically wrecked the town, are said to have now began operations against the Christians in the vilayet. The foreign consuls at Merina have requested that warships be sent to that port.

FOUR HUNDRED REPORTED KILLED

No definite information is obtainable as to the number of persons who lost their lives in the fighting, though one report says 460 Armenians were massacred. Two American missionaries are said to be among the dead, but no names are given, and the report as to these is unconfirmed. The British vice consul at Mersina, Maj. Daughty-Wyne, is said to have been injured during the trouble.

It is known that the regular district meeting of the American missionaries was due to be in session at Adana, and that Mr. and Mrs. William Chambers, the Misses Elizabeth and Mary G. Webb, Miss Wallis, and Miss Borel, missionaries, were to have been present there. Ambassador Leishman has instructed Vice Consul Debbas at Mersina to go immediately to Adana.

Neither the American ambassador, Mr. Leishman, nor the British embassy had received any further news concerning the massacre or confirmation of the reported murder of two American missionaries at Adana.

Consular telegrams received here report that half of the town of Adana has been burned and that the attacks upon the Armenians are extending into the vilayet. They say that the British vice consul at Mersina. Maj. Daughty-Wyne, who was ordered to Adana when the first advices of the massacre were received, has been wounded.

COMMUNICATION INTERRUPTED

Communication with the disturbed district is interrupted, however, and all reports received from there must be taken with caution. The porte declares the disturbances are subsiding. Two additional battalions have been dispatched to Adana.

The government has given assurances that it is doing its best to restore order at Adana and to protect foreigners. Additional troops are being sent in.

The Moslem attacks on the Armenians at Adana recommenced yesterday afternoon, and continued throughout the night. Large numbers of Christians are said to have been killed. One report says that 60 Armenians have lost their lives, and that many houses have been looted and burned.

The first news of this anti-Christian outbreak said the scene was Mersina, but this was erroneous. The trouble occurred at Adana, which is about 36 miles inland from Mersina.

Ambassador Leishman today instructed the American vice consul at Mersina, John Debbas to proceed immediately for Adana and report on the situation. Railroad communication between Mersina and Adana appears to be interrupted.

ANXIETY IN CHICAGO

Chicago, April 16—Press dispatches from Constantinople created alarm in Congregational Church circles today. Among the missionaries at Adana, where some of them are reported slain, are the Rev. William N. Chambers and his wife, who are maintained by the First Congregational Church of Oak Park, an aristocratic suburb of this city, under the auspices of the American board of commissioners for foreign missions.

Mr. Chambers is 70 years of age and has been in Turkey since 1879. He visited Chicago last winter, but returned to his post with Mrs. Chambers in January.

Miss Elizabeth S. Webb and Miss Mary G. Webb, sisters, whose home is in Missouri, also are supposed to be at Adana.

Philadelphia, April 16.—Dr. Talcott Williams, of the Philadelphia Press, whose sister, Mrs. William N. Chambers, is a missionary at Adana, where serious trouble is reported, has received no information as to the safety of his sister.

PRESBYTERIAN MISSIONARIES

NEW YORK, April 16.—Walter T. Miller, treasurer of the board of foreign missions of the Reformed Presbyterian Church, said today that his church had no missionaries permanently stationed at Adana. The Reformed Presbyterian missionaries stationed at Mersina and Tarsus, nearby cities, sometimes visited Adana and cooperated with the American board missionaries in the work of the mission schools, he said. The Rev. C. A. Dodds and wife, the Rev. Robert E. Willspa and wife, of Morning Sun, Iowa; Dr. John Peoples, of Philadelphia, and Miss Elma French, of Winchester, Kans., are stationed at Mersina under the control of the Reformed Presbyterian board. Mr. Miller said he had received no word from any of the Presbyterian missionaries and felt assured they were all safe or he would have been cabled.

[From The Washington Post, April 23, 1909]

FIVE AMERICAN WOMEN IN PERIL—ALONE AND DEFENSELESS AGAINST MOSLEM MURDERERS—WIRELESS APPEAL FOR AID—CUTTER TAHOMA, AT SEA, URGED TO HASTEN TO RESCUE—DEAD MAY NUMBER 15,000.

Fanatical Moslems, stirred to zeal by the events at the Capital, fall upon Christian population, killing women and babies—entire population of the town put to death—country surrounding Alexandretta scene of massacre and pillage—five thousand rendered homeless by the torch at Tarsus—Turkish officials powerless.

In view of the pressing danger of Americans, missionaries, and others in many towns of Asiatic Turkey where massacres have been going on for a week, the administration is making strenuous efforts to send American guns to the scene of the disturbance. On the way to the Mediterranean, some days' sail in advance of the cruisers ordered from Cuban waters, is the revenue cutter Tahoma.

The following wireless message has been sent to the Tahoma from the navy yard in this city. It will be sent to transatlantic steamers in order that they may transmit it to the Tahoma:

"Important Tahoma reach Gibraltar very earliest date. Make all speed. Touch Saint Michaels; coal if necessary. Acknowledge."

NOW IN MIDOCEAN

The Tahoma left Baltimore April 17, and is scheduled to arrive at St. Michaels, Azores, April 29 and at Gibraltar May 5. The vessel is now probably from 900 to 1,000 miles on her trip.

Should the wireless message reach the Tahoma, she should arrive at Gibraltar by the morning of May 1, calculating on a stay of one day at St. Michaels to coal the vessel. A cable will be sent to her at St. Michaels so that in event of the wireless message not being received her trip from that place to Gibraltar will be expedited, and in which event she would probably reach that port May 3, two days ahead of schedule time. She is now probably making 9 to 10 knots to save fuel. She can make 12 to 14 knots.

The Tahoma is a new steel vessel, schooner rigged, displacement of 1,200 tons, has a crew of 61 men, and a battery of three 6-pounder Hotchkiss guns, and a full complement of small arms.

Dispatches from the American embassy at Constantinople reiterated former assurances that everything possible was being done by the officials to guarantee the safety of Americans and American interests at Adana and other disturbed places.

WHOLE TOWN MASSACRED

Aleppo, Asiatic Turkey, April 22.—The entire population of Kirikan, between here and Alexandretta, has been massacred, even the women and children. There is not a survivor.

The French mission at Ekbaz is besieged by fanatical Moslems.

The Armenian village of Deurtyul is surrounded, and according to a messenger who crawled through the Arab lines at night and made his way here for help, the situation there is hopeless. The buildings on the edge of the town already were in flames when he escaped.

All Americans in Aleppo are in danger. The massacres are being carried out with the greatest violence. Neither women nor children are spared. The motto of the Moslem is, "No twig of the accursed race shall be suffered to live."

The Armenians, recognizing that the massacres have been organized and carried out by adherents of the old Turkish regime, are looking to the Young Turks for future protection.

FIVE AMERICAN WOMEN IN PERIL

Beirut, April 2.—Five American woman missionaries are in danger at Hadjin, in the vilayet of Adana. One of them, Miss Lambert, has sent a message down to the coast asking for immediate help. The women are entirely alone and defenseless. The villages surrounding Hadjin are in flames, and Hadjin itself is invested by nomad tribesmen. Messages from the interior are being suppressed by the authorities.

Miss Lambert's message says it is rumored an attack will be made tonight. The situation in the country north, east, and west of Alexandretta is most serious. There has been massacre and pillage at Antioch and rioting at Birejlk. Alopge is in a state of panic. There are only 400 Turkish soldiers in the city. The city is full of Bedouin Arabs, Kurds, and Circassians.

At Ayas, on the west coast of the Gulf of Alexandretta, 418 murderers have been released from prison. They at once joined the mob and began committing depredations. At Tarsus 100 persons have been killed 800 houses have been burned, and there are today 5,000 persons without homes.

Several native pastors from Aintab were killed while on their way to attend the district missionary meeting at Adana. The Turkish government officials at Mernian have done everything possible to check the trouble although they have been able to accomplish little.

TOTAL OF SLAIN MAY BE 15,000

Constantinople, April 22.—The wave of fanaticism, which originated at Adana some ten days ago and found its expression in the killing of Christians, apparently is spreading generally through the eastern provinces. Upward of 10,000 Armenians were massacred in Syrian towns and villages, principally in the villayet of Adana, during outbursts of fanatical zeal that took place at the time of the spring festival in honor of Mohammed and upon the receipt of the news of the overturn of the "heretical" government at Constantinople. One embassy places the estimates of killed as high as 15,000.

MASSACRES IN ASIA

"No two of the acquired race shall live," is motto of the Moslem.

Entire population of Kirikan killed.

Women and children slaughtered.

Five American women alone and in peril in Hadjin.

Total slain may reach 15,000. Wireless messages sent from Washington urging the cutter Tohoma, now at sea, to hasten to relief.

[From the Washington Post, Apr. 24, 1909]

MOSLEMS STILL SLAY—ARMENIAN MEN OF ANTIOCH NEARLY ALL PUT TO DEATH.—4,000 REFUGEES AT TARSUS

Gathered in the yard of the American College is pitiable Conditions—murder of missionaries Maurer and Rogers at Adana confirmed—Alexandretta district a scene of devastation.

Constantinople. April 22.—According to the latest consular dispatches received here, there has been no cessation of the massacre in the Antioch district, and the people are fleeing for their lives in every direction.

The French vice consul at Marash telegraphed that order has been restored at that point.

A cablegram received here today from Mersina sets forth conclusively that both Henry Maurer and D.M. Rogers. American missionaries, were killed during the rioting at Adana.

Beirut, April 23.—The adult male Armenian population of Antioch and vicinity has been practically wiped out in the massacres of the last days by fanatical Moslems. There are thousands of destitute Armenian widows and orphans still in the district, unable to get away. There is no security anywhere in the vicinity of Antioch.

CRITICAL AT ALEXANDRETTA

The situation at Alexandretta continues critical. Beilan is still holding out against the tribesmen that surround it.

Beirut is quiet as yet, but there is great tension between the Christian and the Moslem population. Troops are arriving here, and the authorities are taking energetic measures for the preservation of order. Many people are leaving Beirut for the Lehanon. The British Cruiser Diana came into port today.

Alexandretta, April 23.—Fugitives who arrived here yesterday relate that all the Armenian villages and settlements in the Alexandretta district are being destroyed. Nearly every Armenian dwelling has been burned by the fanatical Moslems, and the Armenians still surviving are living in the open, half starving, and in great fear, especially of Friay and Sunday.

The village of Beilah, a short distance south of Alexandretta, is holding out with difficulty against the nomad tribesmen.

BRITISH FORBIDDEN TO LAND

The British warship which sailed to relieve Deurtyul, an Armenian village on the coast, returned to Alexandretta today without having accomplished anything. The commander of the vessel applied to the governor of the district for permission to land a relief party, but he was refused.

Two more British war vessels are expected here shortly. One of the other foreign warships in port left today for Beirut.

Aleppo, Asiatic Turkey, April 23.—Many refugees have arrived here from the Alexandretta district. Their condition is miserable. Intense alarm exists among the Armenians still alive of a recurrence of the attacks upon them.

Tarsus, Asiatic Turkey, April 23.—The rioting that originated at Adana broke out here April 16. A few Armenians were killed, the whole Armenian quarter was burned, and the churches were sacked.

Over 4,000 refugees are still gathered in the yard of the American college. Their condition is pitiable. The missionaries at Tarsus are safe, but they are still apprehensive for the refugees.

Massacres are raging today in the neighboring Armenian villages, and instant relief is needed.

[From the Washington Post: Thursday, Apr. 29, 1900]

HORROR OF MASSACRE—AMERICAN WOMAN DESCRIBES SCENES AT HADJIN—ARMENIANS QUIT RESISTING

Shooting and Plundering, however, continues—thirty thousand lives lost in Adana province—Turkish troops on the way—missionaries still in dire peril—their messenger killed.

[Special Cable to the Washington Post]

Mersina, Asia Minor, April 26 (via Cyprus, April 28).—Two Turkish regiments which landed here on Saturday have proceeded to Adana, where the massacres of Christians began on April 14, and were resumed late last night with the wholesale murder of Armenians and the burning of their property.

Thousands of Armenians were burned alive, those attempting to escape being shot down by the troops. The destruction of Adana was completed, and the loss of life in the whole province of Adana is estimated at 30,000. The material losses of Europeans are enormous. The British and other foreign warships here are inactive.

In the town of Hadjin 18,000 people, thousands of them Armenians and four of them American women, are besieged by Moslem troops and irregulars.

The four Germans previously reported killed at Bakdjeh have arrived at Morsina safely. The Armenian population of that town perished.

MISS LAMBERT TELLS OF HORRORS

Constantinople, April 28.—The following telegram was received here today from Miss Rose Lambert, one of the besieged American women missionaries at Hadjin. It sets forth the danger surrounding Miss Lambert and her companions, who are quite alone. The messenger who first started with the message to the telegraph office was shot down on the way. The communication is dated Hadjin, April 26, and says:

"The rising against the Christians of Hadjin began nine days ago. The government sent troops to suppress the fighting between Mohammedans and Christians, but the men were not strong enough numerically to restore order. Many were dead and wounded on both sides.

"Desperadoes occupied the Armenian cloister five days ago, and have been firing on the people without interruption since. The Armenian churches are now showing white flags, indicating that there will be no further resistance; yet the shooting and the plundering continue. Many shops have been robbed and others undoubtedly will be. The Armenian settlements and villages in the province have been burned and many persons killed.

CITY WITHOUT FOOD

"Hadjin is almost entirely without food, and animals in the city are dying of starvation. The provincial authorities have been appealed to both orally and in writing to send more troops to Hadjin, but thus far without results.

"The messenger who first started with this dispatch to the local telegraph office was killed on his way."

The American women at Hadjin are Miss Virginia A. Billings, of Kirtland, Ohio; Miss Emily E. Richter, of Chicago; Miss Lambert, who is a daughter of Bishop Lambert, and a Miss Baldwin. The two last mentioned women were sent out by the Mennonite Brethren in Christ, of Ohio.

Christian refugees by the thousand have massed at Hadjin, and for eleven days the town has been threatened by fanatical Mohammedan tribemen, whose camps completely encircle it.

Reading, Pa., April 28.—Miss Rose Lambert and the other American women in danger at Hadjin, Asiatic Turkey, are connected with the "United Orphanage and Mission," of which the Rev. C. H. Brunner, of this city, is head of the general board. Mr. Brunner said today:

"With Miss Lambert at Hadjin at the present time are Miss Ida Tachumi, of Cleveland Ohio; Miss Anna Bowman and Miss Dorinda Bowman. The last two arrived at Hadjin from Michigan two months ago. Miss Frejerika Honk is from Indiana, but she is at present at the hospital at Beirut, where she has been ill since February 16. Miss Penner, another American woman formerly at Hadjin, has left that post, and Elder J. E. Fidler has also returned to America."

[From the Washington Post: Apr. 29, 1909]

RED CROSS ASKS AID—FUNDS NEEDED TO CARE FOR ORPHANS IN ARMENIA

$1,000 SENT TO AMBASSADOR

Mr. Leishman, at Constantinople, given authority to act for the society. Thousands of persons without food or shelter—money needed, he says, at once, or survivors will starve

Another appeal for assistance came yesterday from the relief committee at Beirut, which cabled to the American National Red Cross Society here as follows:

Request funds by cable and authority to act here, as your agents in the Asia Minor and Syria relief.

G. B. RAVDAL,
American Consul.
GEORGE POST
EDWARD G. FREYER,
Relief Committee.

In response, The Red Cross has informed the relief committee at Beirut that American Ambassador Leishman at Constantinople has been given full authority by the Red Cross for the distribution of whatever funds it may send, and refers the committee to him for assistance.

The American National Red Cross Society has already sent $1,000 by cable to Ambassador Leishman for relief work, and yesterday Miss Mabel Boardman, of the executive committee, announced that the Red Cross would be glad to receive and transmit contributions from the people of the United States to the American ambassador to be used in relief work at his direction.

DESTITUTION GREAT

Ambassador Leishman cabled yesterday as follows:

"As distress among population is very great, I am convinced that American Red Cross could not better fulfill the noble purpose for which it was founded than by such a contribution. If desired, money could be sent to the embassy for transportation to the Rev. W. W. Post, treasurer of American mission in Turkey and it would be a most humane act if our charitable organizations could be induced to follow suggestion, as thousands of poor people are without food or shelter. If American Red Cross will wire amount of draft they are donating I will hand over immediately such sum, as funds are urgently needed."

Worcester, Mass., April 28.—Miss Emily C. Wheeler, of this city, secretary and treasurer of the National Armenian and relief committee, tonight expressed her gratification that the American Red Cross had adopted Ambassador Leishman's suggestion, and already had contributed $1,000 for the relief of the sufferers from the massacres in Asiatic, Turkey.

"The funds of the Red Cross," said Miss Wheeler, "will be quickly absorbed by the immediate needs of the hungry and destitute survivors of the massacres. The Red Cross, through its character as an emergency relief organization will be in an excellent position to do this work.

ORPHANS IN NEED

"But it is necessary also to look into the future. Thousands of orphans who have to be provided for during the coming year and in the years to follow, and there is a grave possibility that there may be further disorders during the next few months, which will add to the number of orphans."

Miss Wheeler stated that she believed that it would be for the best interests of the massacre sufferers to have the Armenian relief committee raise a fund distinct from that of the Red Cross, and to be devoted entirely to the permanent support of Armenian orphans. Money for the relief committee's work should be sent to Miss Emily C. Wheeler, secretary and treasurer, 24 Oread Street, Worcester, Mass.

Justice David J. Brewer, of the Supreme Court of the United States, is president of the relief committee.

Mr. FLORIO. Mr. Speaker, I thank my colleague from Pennsylvania, BOB EDGAR, for organizing this special order to recall for us the tremendous amount of coverage given by the American press to the atrocities committed against the Armenians in Ottoman, Turkey. The truly horrifying accounts of destruction and degradation shocked the American public as early as the 1890's.

In addition to the massacres that are described in these gruesome reports, there are accounts of forced religious conversion that are equally appalling. We, Americans, whose Nation was founded on the principle of religious freedom and tolerance, are bound to find these descriptions particularly troubling.

On February 24, 1896, the Washington Post ran an article under the headline, "Turkish Persecution—Armenians Forcibly Converted to Islam Faith." The article states that "multitudes have been forcibly converted to Islam." A March 6, 1896, New York Times article, "Conversions to Islam—By Torture, Threats, False Reports, Massacre and Starvation," corroborated this assault on the religious liberties of the Armenians in estimating the number of forced conversions at 40,000 and stating:

These people were converted, some in the heat of massacre, to save their lives; some in cold blood, to save their wives and daughters from dishonor; some in hunger, to secure food offered by officials on this condition . . . In other districts the Turks have informed them that they will be killed if they attempt to return to Christianity, and that they will all be killed if they admit, upon being questioned, that they were converted by force . . . In some districts these forced convicts (sic) are daily flogged if they do not go to mosque, and if, at mosque, they make errors.

Ten days later, a March 16 New York Times article reiterated the tragedy of this genocide in "Martyrs for the Faith—Christian Armenians Must Become Moslems or Be Killed by Turks." The article states that in "Itsehmeh a certain well-known Sheik . . . murdered 40 persons in cold blood at the door of the church" because they refused to convert.

The press accounts of religious persecution are a profoundly disturbing subchapter in the long history of the attempted destruction of the Armenian people. Armenians who escaped Ottoman, Turkey, during this period are with us today and have chosen this country as their adopted homeland. Some still live with these traumatic memories and are deeply grateful to the United States for providing them safe haven and religious freedom.

These proud Americans left behind many loved ones who could not escape the horror. These press accounts reiterate that not only did this genocide occur but also that our Government and our press was willing to take a stand against this horror and roundly condemned the atrocities. House Joint Resolution 192, which I am proud to have cosponsored, seeks to honor those unfortunates that lost their lives in this tragedy and ensures that the memory of this horror will live on with future generations as an example of man's inhumanity to man. It is most fitting that the American Congress designate a day of commemoration as a tribute to the Armenian survivors, many of whom live on in this country, daily enriching it with their courage and strength.

I urge my colleagues to join in supporting House Joint Resolution 192 for passage and upholding our strong record in preserving the fundamental human rights of freedom to speak, to worship, and to gather. I would like to commend the texts of these articles from the 1890's to the attention of my colleagues:

[From the Washington Post, Feb. 21, 1896]

TURKISH PERSECUTION—ARMENIANS FORCIBLY CONVERTED TO ISLAM FAITH—THEIR DESTRUCTION IS EXTREME

(From a Correspondent of the Associated Press).

CONSTANTINOPLE, February 6.—It will be remembered that the Sublime Ports, soon after the massacre in this country sent out commissioners to investigate into the recent disturbances and take measures for quieting the country. One group of commissioners went to Eraerout and the other entered the

country at Sassoun and came to Nivas. This commission from the interior did its work very rapidly spending only a few days in each of the principal cities on the route.

The day after their arrival they summoned before them a number of leading men, Moslems and Christians. These were admitted to the presence of the commissioners separately—first the Moslems, afterwards the Christians. Reports say that the commissioners said to the Moslems, "We did not expect too much of you, but now you have done it, never mind. Henceforth you must keep the peace."

When the Christians were admitted the commissioners received them standing, and at once began to read an address reciting the benefits the Christians had received during the reign of the beneficent Sultan Abdul Hamid Khan, and the perfidious conduct of the Armenians who had started newspapers and sent men to Washington and Chicago to agitate and stir up the nations against their government. In conclusion, the address said: "Hereafter, if either Turks or Armenans stir up trouble, there will be no more imprisonments, but the death penalty will be visited upon such offenders."

THE CHRISTIANS THREATENED

After the reading of the address. Abdul Pasha began to address the Christians in a much more violent, strain. He said if the Armenians should again begin to agitate, not even the name of Armenian would be allowed to remain; they would all be blotted out. Drawing himself up to his full height and stretching out his arm like a sword, he said: "What we have gained we gained with blood, and when we give up this morsel we will give it up with blood, blood, blood."

So far as I can learn, in the Harpoot village the commissioners spent all their time in Mezreh, and did not even visit the city of Harpoot, which was plundered and burned, although it is only two miles from Mezreh. No questions were asked of the Christians summoned before them. When the commissioners had finished their speeches they dismissed them.

Another fact of interest is the sending out of officials to enroll in the government lists the names of Christians who have become Moslems. Multitudes have been forcibly coverted to Islam. I do not mean simply that they have been obliged to choose between becoming Moslems and perishing by the sword, but that they have been bound or held while the rite of circumcision was performed without their consent. I know of the case in which an aged priest was tied to his own door and circumcised, while in another village Christians begged to be killed, and their Turkish neighbors said to them:

"No, we want you to till fields. We will make you Moslems," and they circumcised the Christians of the place by force.

ENROLLING THE CONVERTS

The government has said that these conversions were worth nothing, and that no one would be forced to change his religion, but now government officials write these new converts, while the Turks drive them to say they are Moslems. In the village of Sheikhaj the official said to the Christians:

"I write your names on a separate list to satisfy the Turks; there is no force about it."

But one acquainted with Turkish ways may expect to find these Christians soon enrolled as Moslem citizens.

The carrying off of Christian girls and women still continues. In the city of Palu Turks carry off girls, keep them for a few days, and return them dishonored. The same is done in many other places. In one of the Arabkir villages eight girls of the place are imprisoned in Turkish harems. Their friends hear their cries, but can do nothing to help them.

The destitution of the Armenians beggars description. Men who were wealthy in October were begging for bread in November. Villages were pillaged of every scrap of food and clothing. When the plunderers could find nothing more to carry off the villagers returned and sifted the dust to gather a few kernels of wheat or barley. Doors and windows were carried off. In many cases the timbers of the houses were pulled out and carried off. Jars were broken. Everything of value which could not be carried away was broken. Windows, cupboards, boxes, were smashed. The utmost pains were taken to leave nothing of value to the owners.

TERRIBLE DESTINATION

And all this was done at a time when winter was so close at hand as to make it reasonably sure that cold and hunger would destroy those whom the sword had spared. Wherever you go you meet man pinched faces, and people clad in scanty garments. And you know that multitudes spend the long, cold nights huddled together with nothing to lie down upon and nothing to cover them. Of course disease sets in and carries them off.

It is estimated that there are between 30,000 and 100,000 people in extreme destitution. Europe and America are touched with compassion, and funds are being gathered for the relief of the sufferers in every town and city. It is far otherwise with the Turk. He views his work with complacency, and does not like to see it interfered with. The government has given a little aid occasionally. In many cases the allowance is one-sixth as much as is given to a Turkish gendarme or soldier. I have seen the bread given in several places. If resembles the linseed cakes used in Europe and America for feeding cattle. Even the allowance is seldom continued for any length of time. A large share of the government's appropriations for the relief of the destitute goes into the pockets of officials.

Moreover, the Turks are hostile to relief work, and oppose it in various ways. In the city of Palu the Turks said to the Christians:

"If our beneficent sultan wishes you to have money he is abundantly able to give it; but he has not seen fit to do so, and now you are receiving money from the English and forming an alliance with them. We will cut you off."

OPPOSITION TO RELIEF WORK

No Christian in Palu dares to receive or distribute relief funds. I happen to know that the Armenian missionaries tried to send money into Palu and it was returned to them because no one in Palu dared to receive and distribute it. The same is true of the town of. . . .

In some of the villages tax gatherers took from the villages the scanty pittance they had received to keep them alive. They beat them to exhort from them the money. One poor villager said: "The red is . . . the flesh is soft so we gave it up."

[From the New York Times, Friday, Mar. 6, 1896]

CONVERSIONS TO ISLAM—BY TORTURE, THREATS, FALSE REPORTS, MASSACRE, AND STARVATION—FORTY THOUSAND WERE INTIMIDATED

LONDON, Feb. 26.—*The United Press correspondent at Constantinople sends the following:*

Some anxiety is felt in regard to renewed threats of massacre made at Aintah, in the Province of Ajeppo. A Mohammedan outbreak against the Christians occurred there in November. The shops and some houses also of the Armenians were pillaged, and about 250 people were killed by the mob, but a considerable number of houses escaped pillage entirely. Since this outbreak the specially pious among the Moslems have felt it a duty to pillage the houses then untouched. They are now openly declaring their intention to do this and to kill the Armenians left alive in the city. Leading Moslems of Aintah, and even the Kaimakam, have assured the Armenians that the Government cannot protect them unless they become Mohammedans.

"The number of Armenians who have nominally accepted Mohammedanism, in various provinces of Turkey since the massacres is now estimated at somewhat over 40,000. These people were 'converted,' some in the heat of massacre, to save their lives; some in cold blood, to save their wives and daughters from dishonor; some in hunger, to secure food offered by officials on this condition, and some on receiving assurances recently that Christianity will no longer be tolerated in the empires, and that security can be restored in no other way. In some districts the Government has allowed these forced converts to return to their own faith. In other districts the Turks have informed them that they will all be killed if they attempt to return to Christianity, and that they will all be killed if they admit, on being questioned, that they were converted by force. In some districts, notably in the mountainous parts of the Province of Aleppo, these forced converts are daily flogged if they do not go to mosque, and if, at mosque, they make errors in the liturgy. The following letter from Harpoot has been received in Constantinople by the Relief Commission:

"We are spending a good deal of money here for relief work, as you already know. Mr. Oates, the treasurer, sends an occasional financial statement, but you have a right to demand from us something more general which shall set forth the needs in this district in justification of these large expenditures. I intended to send such a statement last week, but this work so crowds and overwhelms us that it is difficult to find time for any adequate presentation.

"To say nothing of Diarbekr and its villages, a part of which constitutes a portion of our mission field, there are in the seven other districts 200 villages inhabited by Christians, some of them large, which have been ravaged, and which look to us for relief. We roughly estimate that there are 100,000 persons in the towns and villages for which we have special care, and which are cared for from no other point, who are actually needy and suffering. Official relief is without system and a farce as is also the restoration of stolen property. Nobody who is not actually in the midst of it can have any comprehension of the extent of the desolation about us and of the degree of the

suffering endured. Even we ourselves are bewildered by it. We cannot take it in.

"We, however, do not attempt to care for this great multitude. Every plane is required to prepare a careful list of the most needy, giving the number of adults and of children under ten years of age in each family. This list is submitted to a central committee of nine or ten of our most reliable and sharpest business men. Protestant and Gregorian, under the presidency of the Armeanian Bishop, for their careful scrutiny. Any person whom they find upon this list who is able to squeeze through the Winter without starving is stricken from the list.

"To the remainder we give on the average, at present, 10 piasters to adults and 5 to children. To as many as possible of the needy work is furnished both to men and women in the city, in order that they may provide themselves with bread. Daily rations of bread, amounting to twenty paras for adults and ten paras for children, are given to more than 1,000 in the city, mostly refugees.

"The Misses Seymour and Bush give their whole time to a labor department for women. Some 980 in the city are sewing and ten more are knitting. Other hundreds would be glad to secure work for the 2 piasters a day, which is what is paid, but here, as in every other department, only those who are in absolute need are employed. Over 4,000 suits consisting of shirt and drawers, and 165 pairs of stockings have been made and distributed, while there are other thousands who have not had a change of underclothing since the time of the massacre; also 981 mattresses and 595 voghrans, some of them newly made and some bought second hand, have been given out. The need for bedding is very great, but cannot be met. Many would be glad of a piece of matting or carpet to lie upon, or a piece of bagging to put over them.

"In the villages the cotton industry has been a very important one in the Winter. The massacre took place just at the time of the cotton harvest. Where it had been gathered it was carried away with the rest of the plunder. In many cases it was taken from the field even. Spinning wheels and looms were carried off or broken up. Still there are some of these domestics utensils and our ladies have sent out about 2,000 pounds of cotton to be worked up into thread and cloth for which the women are paid. Wool is also sent out and made into stockings for which they receive pay, and the stockings are given to the needy poor. The whole expense of this industrial branch is 1,000 Turkish pounds. It would be greatly enlarged if there were more money.

"It will be seen from what has already been said that as compared with the demand the supply is very meager. And yet there has been great difficulty in securing the money which we have already distributed as it comes mostly by post, and we also encounter great difficulty in distributing in some of the most needy districts, those most remote from us. We have had no assistance from the Government, and, fortunately, no active opposition. The Government has urged that the work should be done through a mixed commission—two Moslems and the Christians—but this besides being very unsafe and wasteful, would tie our hands and delay the work in every direction. We have appointed good committees in every place. Protestants and Gregorians—but in some places, like Palu, Choonkoosh, and Malatia, they have been afraid to touch the money.

"The committee in Malatia are beginning to work in a quiet way, for we sent them money despite their protest. Nearly 100 lire has been distributed in the city of Malatia, but nothing has gone to its villages, twenty, perhaps, in number. Choonkoosh was not plundered, but the most of the seventeen villages have suffered badly. The Gregorian Council reported the other day that there were 2,500 refugees and destitute in the district. We have sent recently to our committee there fifty lire, and have asked them for more definite particulars. More money is imperatively demanded there.

DESPERATE NEEDS AT CHOONKOOSH

"Choonkoosh is a town of 1,000 Christian houses, of which more than 100 were burned, and the neighboring village of Adiah, with 310 houses, has scarcely anything left. These are just beyond the Taurus. Their needs are desperate, and for nearly two months we have been trying to get money into the place. A couple of weeks ago we sent 50 lire, but whether it reached the place and has been distributed we have not yet learned. The Chareanjak region, north of us, with sixty-three plundered villages and Pori as its centre, has always been an oppressed region, under the dominion of several feudal chiefs and surrounded by wild money villages which it is impossible to reach from Pori, and where, on account of strictness at the Euphrates ferry—for the district lies just north of the Euphrates—it has been impossible to send relief from here, so the people come here in person for the little which we can give them.

"A strong appeal came to us from Kgin for four villages which had been badly sacked and plundered in its vicinity—villages which have relations with Constantinople, and which had the finest village houses to be found in this part of the country. A letter from the village of Lidjo received this week say that forty of its ninety houses have been burned and the rest sacked, and the inhabitants, 600 in number, were living in its remaining houses; that until the snows came they were able to procure a part of their subsistence from the green herbage of the fields, but now that is cut off, so they appeal piteously to us for help. The large, fine village of Bingen has suffered, I believe, even worse. So this week we have sent 100 lire to a good committee in Egin, under the Presidency of the Armenian Bishop, to distribute to these four villages and sent us a report. Egin itself, although not plundered, paid a heavy sum as a ransom.

"Akubkir, like Malatic suffered much worse than Harpoot. We could not send anything there by post or otherwise for several weeks, and no committee was willing to handle the money, through fear. We have, however, succeeded in getting about a hundred and twenty lirae distributed in the city, and have sent them word to draw on us for a hundred more. But not a piaster of this has gone to the fifteen sorely stricken villages in that district, many of which were plundered three or four times and some as many as six times.

"One of the most difficult problems which we have had to consider has been Palu, with his forty-three villages, many of them large. They have had the most awful treatment from Turks and Kurds, and our committee even now, are not willing to receive and distribute funds, because they felt that it would imperial their lives. As in many other places, to save their lives, and to save their families from a fate worse than death the most of the surviving Christians have made a formal profession of Mohammedunism, so they are closely watched by the Turks; and the Turks hearing that money was to come for relief, said: 'So it seems that the Armenians still have political relations with England.' All who can are leaving the place and coming with their families, and every day a large number of villagers appear here with their village lists of the needy, after a two-days' walk, and after there lists are verified and the money is paid to them, they go back to their homes with a sum of money scarcely larger than in prosperous times they could have earned in the same number of days.

"As Palu belongs to the Diarbekr vilayet, though much nearer to Harpoot than to Diarbekr. I have written a letter to Mr. Hallward, the British Consul, to await his arrival at Diarbekr, begging him to give early attention to securing an order for Palu and Choonkoosh to facilitate distribution. This has been an unusually mild and open Winter, otherwise many of these people who have come to us from Palu, and other distant places, would have perished in their homes, or on the way. It is a great grief to us to send them home with such small sums of money, after a Winter's journey, which including their stay here takes nearly a week.

"This work, which has been providentially thrown upon us, is very laborious and very exhausting. The money which is sent to us we regard as a sacred trust, and we use great care in its administration. I can say that our Treasurer is more careful, I think, in its use than he is of his own money. What wears upon us most and is the greatest tax upon our strength is the right of the appalling wretchedness and misery which we can do so little to alleviate. The majority of the, perhaps, 15,000 who were killed, were men with women and children dependent upon them. Here are penniless, half-naked women and children, many of them from houses that have been burned, many of whom have been in comfortable circumstances, and some of the better class, now wandering about in search of food. With them, as with many others, it is not simply a question of surviving the Winter, but there is a dark and hopeless future before them.

"This report is already too long, although it does not express one-thousandth part of the dreadful reality. There is, however, another point which I must mention in closing. The knowledge that we are distributing money has evidently stimulated the Government in the gathering of taxes. In some cases the collectors are on the watch for the villagers when they return with their money. In the village of Shehaji, for example, every piastre taken, by fourteen houses, amounting to 20 piastres, was taken by the tax collectors.

MARYTRS FOR THE FAITH—CHRISTIAN ARMENIANS MUST BECOME MOSLEMS OR BE KILLED BY TURKS—WOMEN THE PREY OF THE ISLAMITES

CONSTANTINOPLE, March 15.—Information from various points in the Provinces of Sivas, Harpoot, Diarbekr, Bitlis, and Van shows that the process of forcing Christians to become Moslems is still in active progress. While Christian worship is allowed to be held in most of the cities and large towns, in the villages throughout the six provinces of the reform scheme it is in practice prohibited.

In twenty-eight villages in the District of Harpoot at last accounts there had been no

Christian worship held since the first week in November. This abolition of Christian worship among a Christian people is at least connived at by the imperial authorities for they do nothing to protect the worshippers from the attacks of the Mohammedans, who declare that it shall no more be allowed. The abolition of worship is simply a part of the scheme to abolish Christianity.

The name of the Rev. Hagop Abouhagatian, pastor of the Protestant church at Oorfa, in the Province of Aleppo, must be added to the long list of Protestant clergymen who have died as martyrs during the recent massacres. He was an able and devoted man, a graduate of the University of Leipsic. He was murdered Dec. 29, when the second massacre, this time of over 4,000 Christians, took place at Oorfa.

Later news from Harpoot shows that in that village, at least, some sort of orders have gone out to discountenance the forced conversions. When the authorities from Harpoot telegraphed to Constantinople for instructions, the reply came: "Do not use force to convert." The local Governor interpreted the orders liberally, and even announced that every one was to return. In one quarter of Harpoot all the Christians had been converted.

In Ksehmen a certain well-known Sheik, ten days after the heat of the outbreak, murdered forty persons in cold blood at the door of the church. He invited all the leading Christians to a conference. Some feared and hid; about sixty, however, assembled in the church, when the door was locked upon them, and then, under the lead of this Sheik, the Moslems brought out these men one at a time. Forty refused to accept Islam and were killed.

There are 15,000 forced converts in the Province of Harpoot alone, and 40,000, in the whole region devastated by the massacres.

The general character of the outrage and the uniformity of its methods and the apathy of the officials when appeared to for redress, all give color to the impression that there is a fiendish purpose in the degradation of womanhood among the Christian communities. A systematic debauchery of Christian women is carried on in nearly all the devastated districts. It is as if the Turks wish to make sure that the women, always conservative in matters of religion, shall lose their self-respect and the grounds of their religious hope. They therefore seize the Christian women, day after day and week after week.

At Tamzara, in the Province of Sivas, all the men were killed in the massacres early in November. From a well-to-do Armenian population of 1,500 all that now remain in this village are about 300 starving and half-naked women and children. Trustworthy information from this place says that the most horrible feature of the situation of these Armenian women and orphaned girls is that passing Turkish soldiers and Turkish travelers attack them in their homes without hesitation.

From Megere, the seat of government of the Province of Harpoot, information declares that the same license exists in that province also. Within earshot of the Governor General's palace Mohammedan young men have broken into Christian houses by night, and the officials have refused to take notice of the abomination.

Because they are Christians the Turkish officials will not protect these women, but do protect their aggressors every time a complaint is made.

The purpose to abolish Christianity is pressed forward with the whole force of the Government by the indirect means of depriving the Christian communities of their men of influence who have survived the massacres. In every town or city where the massacres occurred arrests of such men are now in progress. No charges are preferred against the men arrested. They are arrested simply at the will of the Governor. The communities are thus deprived of their natural advisers and remain a prey to any enterprise which the petty officials of the Government or the Imams of the Moslem hierarchy choose to inaugurate against them. At Aintab one of the Protestant pastors, and at Marash two of the pastors, are thus kept in prison without reason and against all right and law.

□ 2050

GENERAL LEAVE

Mr. EDGAR. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order this evening.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

MORATORIUM ON FINANCIAL RESPONSIBILITY REQUIREMENTS FOR CERTAIN HAZARDOUS WASTE FACILITIES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from North Carolina [Mr. BROYHILL] is recognized for 30 minutes.

Mr. BROYHILL. Mr. Speaker, today I am pleased to introduce legislation, along with Mr. TAUZIN, Mr. LOTT, Mr. SHELBY, Mr. GINGRICH, Mr. DOWDY, Mrs. JOHNSON, Mr. NICHOLS, and Mrs. SMITH of Nebraska, that will provide a 2-year moratorium for certain hazardous waste facilities to comply with the financial responsibility requirements under the Solid Waste Disposal Act. If this legislation is not enacted, many businesses will be forced to shut down, despite their good faith efforts to demonstrate financial responsibility, and despite their compliance with groundwater monitoring requirements. Let me explain.

Last year, Congress passed the Hazardous Waste Control and Enforcement Act, which the President signed into law on November 8, 1984. This legislation was designed to amend and improve the manner in which we handle the treatment, storage, and disposal of solid waste. One of the provisions of that law required all land disposal facilities to certify by November 8, 1985, that they were in compliance with both the groundwater monitoring regulations as well as the financial responsibility requirements promulgated under the Solid Waste Disposal Act. Failure to so certify would result in the closure of the land disposal facility.

I am advised by the EPA that since the time this legislation was enacted into law—less than 1 year ago—insurance has become unavailable for pollution risks. It is, therefore, impossible for many land disposal facilities to obtain the insurance they need to comply with the financial responsibility requirements. If they cannot comply with the financial responsibility requirements, these facilities will have to close.

Mr. Speaker, it is clear that there is a great inequity here. Through no fault of their own, these facilities will have to close even though the only reason they cannot comply with the law is due to problems in the insurance industry over which they have no control. They will have to close even though they have worked hard to comply with the important groundwater monitoring regulations. If we allow this to happen, we will be penalizing those very businesses that have devoted time and money to comply with the groundwater regulations. Furthermore, by forcing these businesses to close, we will destroy their financial ability to properly manage the hazardous wastes remaining in their land disposal facilities. We cannot allow this to happen.

Mr. Speaker, let me make clear that this legislation does not weaken the requirement that all land disposal facilities be able to certify compliance with the groundwater monitoring requirements as of November 8, 1985. Beyond that, this moratorium is only a means to an end. It simply affords Congress the time needed to get a handle on, and hopefully resolve, the underlying problem—the unavailability of liability insurance. I would note for the benefit of my colleagues that this insurance problem affects more than these particular businesses, and I hope that the Congress will quickly focus its attention on the broader insurance problem facing this Nation.

EPA has recently advised me that there is no way to avoid the unintended impact of the current law other than by congressional action. I urge my colleagues to join me in supporting the legislation I am introducing today and to work toward immediate passage of this legislation.

Mr. Speaker, the text of this legislation follows:

H.R. 9692

A bill to modify the deadlines applicable to hazardous waste disposal facilities required to certify compliance with certain financial responsiblity requirements under the Solid Waste Disposal Act

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. CERTIFICATION OF COMPLIANCE WITH FINANCIAL RESPONSIBILITY REQUIREMENTS.

(a) EXTENSION FOR CERTAIN FACILITIES.—In the case of a facility described in subsection (b), notwithstanding the failure of the owner or operator of the facility to file for the determination and make the certification referred to in section 3005(e)(2) of that Act, the interim status of such facility under section 3005(e) shall not terminate on November 8, 1985. The interim status of such facility shall terminate 4 months after the enactment of this Act unless the owner or operator of the facility (before the end of

such 4-month period) takes each of the following action:

(1) Applies for the determination referred to in section 3005(e)(2)(A) of such Act.

(2) Certifies that such facility (A) is in compliance with all applicable groundwater monitoring requirements under subtitle C of such Act and (B) was in compliance with such requirements as of November 8, 1985.

(3) Certifies that such facility meets at least one of the criteria set forth in subsection (b) of this section.

The interim status of each such facility shall terminate on November 8, 1987, unless the owner or operator of the facility certifies (before such date) that such facility is in compliance with all applicable financial responsibility requirements under subtitle C of the Solid Waste Disposal Act. No facility shall be treated as operating in violation of the provisions of section 3005(e)(2) of the Solid Waste Disposal Act during the period between November 8, 1985 and the date 4 months after the enactment of this Act solely by reason of the failure of such facility to comply with such provisions before November 8, 1985.

(b) FACILITIES COVERED.—Subsection (a) shall apply to any facility used for land disposal of hazardous waste which has been operating pursuant to interim status under section 3005(e) of the Solid Waste Disposal Act if the facility satisfies at least one of the following criteria within the 4-month period specified in subsection (a):

(1) The owner or operator of the facility demonstrated before November 8, 1984, that the facility complied with all applicable financial responsibility requirements under subtitle C of the Solid Waste Disposal Act but insurance policies on which such compliance was based were cancelled after such date (or the owner or operator received, after such date, a notice from the issuer of any such policy of the issuer's intent not to renew the policy).

(2) The owner or operator of the facility had sales or revenues of less than $5,000,000 for all lines of business in the fiscal year preceding July 15, 1982.

(3) The facility is located in a State for which an authorized State program was in effect under section 3006 of the Solid Waste Disposal Act and, under such program, financial responsibility requirements pursuant to the Solid Waste Disposal Act did not become effective before November 8, 1984.

(4) The owner or operator of the facility has demonstrated to the Administrator that he has made a good faith effort to obtain the insurance necessary to satisfy all applicable financial responsibility requirements pursuant to the Solid Waste Disposal Act and provides documentation of that effort which is satisfactory to the Administrator.

REFLECTIONS ON THE HANDLING OF THE MEDVID AFFAIR

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Ohio [Mr. PEASE] is recognized for 60 minutes.

Mr. PEASE. Mr. Speaker, I rise today to bring to the attention of my colleagues in the House a situation regarding a young man, a sailor by the name of Medvid who twice tried to escape from a Soviet ship in the Mississippi River near New Orleans.

That ship was in the harbor in order to collect grain and take it back to the Soviet Union. While the ship was waiting in the harbor, this young sailor jumped overboard, 30 feet into the Mississippi, swam ashore, in order to escape into freedom, if you will.

He was returned to the ship not once but twice by our Immigration and Naturalization Service. It is rather clear now, after the event is over, that the event was mishandled by the Immigration and Naturalization Service, and also by the State Department. We do not know why the situation was mishandled, but we are confident that it was.

We are concerned that perhaps the Immigration and Naturalization Service, perhaps the State Department, was more concerned about keeping amicable relations with the Soviet Union on the eve of the summit between Mr. Gorbachev and President Reagan than it was with the human rights, with the freedom of this young Soviet sailor of Ukrainian descent.

I must say that if that was the motivation, if that sort of bureaucratic reasoning went into the decisions that were made to return sailor Medvid to his ship, those considerations have not been adopted by the American people; by Ukrainian Americans in particular and even more particularly by those in the United States, including one of my own constituents who believe that they may be related to this young sailor.

□ 2100

They have kept the situation alive. They have done everything in their power to get their Government to review the decision which forced this young sailor back to his ship.

I would like to take a few minutes to review the events that have happened in only the last 5 days regarding this case.

It was last Thursday, I believe, that Mr. Medvid was returned to his ship after having allegedly signed as statement for the INS that he wished to return to his home country.

But then the next morning, the interpreter who is working for the State Department and INS who did the interpreting between the U.S. officials and the sailor said that it was her feeling that he had categorically said that he wished to stay in the United States and to have asylum here.

That revelation by the interpreter caused a lot of concern on the part of a lot of Americans including myself and one of our colleagues, Representative FEIGHAN, from the neighboring 19th Congressional District in Ohio.

Accordingly, because of the confusion, Mr. FEIGHAN and I sent a telegram to President Reagan on Friday afternoon asking that the case be reopened on behalf of this young sailor. We have not heard an answer, I must say, from the White House. The White House acknowledged on Monday that it had received a telegram, said that we would receive in due course a reply; not, to my way of thinking, a very expeditious answer from the White House.

We were told, however, by the State Department that any hope of getting Mr. Medvid off the ship where he could be interviewed by United States officials would have to be done through Soviet officials here in the United States.

So on Monday, Mr. FEIGHAN and I dispatched a letter to Ambassador Dobrynin making an appeal to him that Soviet officials arrange to have sailor Medvid removed from the ship, again put in the custody of the United States officials so that he could make a decision and we could make certain in our own minds that he really did either wish to stay in the United States or wish to return to his home country.

A very interesting revelation came up over the weekend, and that is that three women, a mother and two daughters who are grown women, in my district and Mr. FEIGHAN's district believe that they may well be related, may be cousins of this young sailor. They have the same family name, they come from the same area of the Ukraine that the sailor is from, and that family, joined by Ukrainian Americans all across the country, have been engaged in the last 4 or 5 days in a heroic effort to see to it that this sailor's rights are fully protected and that this land of America, the home of the free and the brave, the Nation which has always welcomed the oppressed from other countries, does what is right by sailor Medvid.

That family went down to New Orleans on Monday to see what they could do about getting out to the ship. They actually formed a flotilla of small boats, went out to the Russian ship on Tuesday, and sought permission to go aboard and talk with the young sailor. They were denied.

At the same time, Ukrainian-American lawyers went into court here in Washington to seek permission or to seek an order from the court to keep the Soviet ship in United States waters and to get the sailor off that ship so that he could be interviewed by United States officials.

That court decision was not favorable to the plaintiffs, and, again, this morning we were in touch with my constituent, Mrs. Mary Filipovich of Wadsworth, OH, and they were trying a different tack, going into the local Federal court in New Orleans.

I have not yet heard the result of that appearance. In the meantime, Mr. Speaker, other things are happening. A hearing was held yesterday in the Subcommittee on Immigration in the

other body. In that hearing, it was perfectly clear, in fact I think it was admitted by the Immigration and Naturalization Service, that the case was simply bungled, it was mishandled, it should not have been handled the way it was.

There will be a hearing, I will announce to the House, tomorrow afternoon in the Subcommittee on Europe and the Middle East of this House of Representatives where a similar investigation will take place into the reasons why the State Department and the INS handled this case the way it did.

Congressman RITTER, our colleague from Pennsylvania, has been circulating for signatures today a resolution which he intends to introduce calling upon the President to do everything in his power not to let the Soviet ship leave United States waters until this matter is resolved. I have been circulating on the floor of the House a letter to the President carrying the same message. Over 70 of our colleagues have signed that letter so far.

In a late-breaking development, I understand that Senator HELMS of the other body has issued a subpoena calling for Mr. Medvid, the sailor, to appear before the committee of the other body on Friday of this week. It will be interesting to find out from a legal point of view whether or not a subpoena issued by the other body can do what the Federal courts and the administration choose not to do.

Time, Mr. Speaker, is of the essence in this case. My understanding is that the Soviet ship is taking on grain at the moment and could be ready to leave at any time.

I would ask Members of the body, of the House here, to join me in appealing to the President of the United States to take the actions within his power as President, as head of our executive branch, to see to it that the State Department and the Immigration and Naturalization Service reopen this case, examine it again, and try to make sure that simple justice prevails, that the sailor is again removed from the ship, is brought onshore to a neutral place, perhaps to the consulate of the Swiss Government, the Swiss Government being traditionally in world diplomacy a body to deal with international incidents in a fair and neutral way.

If the Soviets would agree, we could make a request that the sailor be taken off the ship, transferred to a neutral place like the Swiss Embassy, where he could be questioned, where he could be confronted with the American citizens from my district who believe that they are his cousins.

I believe that it could make a substantial difference in this young man's decision about his life, what lies ahead for him, if he were to, first of all, know that he was being questioned on neutral territory so that he could make a free and open decision, uncoerced by anybody. Second, it might make a difference to him if he knows that he has relatives in the United States who are concerned about him and who would help him to make an adjustment to life in our society if he were to make the decision to stay here.

Mr. Speaker, we do not know what his decision would be. Certainly that decision is up to him. It would be no more fair for us to coerce him into defecting than it would be for us to not give him the opportunity to make that decision freely, should he decide to do so.

Mr. Speaker, I would like, in conclusion, to read a few passages from the letter which went from the other body, signed by 41 Members of that body, to the President.

I understand that it went out a couple of days ago. This letter refers to what the signers view as an unconscionable miscarriage of justice, that is to say, the return of sailor Medvid to his ship. It refers to the fact that Dr. Irene Padoch, the interpreter hired by our Government to interpret the discussions between our officials and the sailor, said clearly, and I quote, "The INS officer became impatient and asked me to ask whether he, the sailor, wanted political asylum because he could only keep him here under those circumstances. I asked the sailor that, and he unhesitatingly responded, 'Yes.'" That is, yes, he did want asylum.

Yet the letter from the other body continues:

> Incredibly, in the middle of the night, U.S. officials attempted to return Medvid to the ship. En route back to his ship, Medvid jumped into the river a second time.
>
> There are many unanswered questions about this case. But Dr. Padoch gives the best explanation. In her affidavit, she states that "One of the agents told me that 'somebody goofed and that he should jump into the Mississippi himself.'"
>
> Mr. President, a life hangs in the balance because of that "goof." Even beyond that, however, what is at stake here are the very principles upon which this Nation is founded. How can we possibly turn away from the gates of freedom a brave man fleeing from heinous persecution? We cannot and we should not.
>
> We urge you to give this matter your immediate attention. If there are anxieties about disturbing the atmosphere before the summit, then surely an acceptable alternative would be to transfer Mr. Medvid to a neutral third nation, where he would be provided with an opportunity to recuperate, overcome any effects of drugs, and regather his thoughts. Then let him make a clear-headed decision, free from coercive pressures, about what he desires for his future.

Mr. Speaker, as I mentioned earlier, I do not know why the INS and the State Department were in such a hurry to close this case and why they now stonewall the situation and insist that the case is closed and that nothing can be done to reopen it. That does not seem to me to be carrying out justice as we know it in this country.

American citizens know better than that. They know that we as a nation can do better by the human rights of even one young sailor than that. They are asking their Government officials to do what can be done, clearly, and that is to insist that the Soviet officials give us another chance, give the family a chance to be reunited, to see this young man and to let him know that there are people in the United States who care for him.

So I hope the Members of the House will, over the next day or so, join me in doing everything possible to remind the President of the commitment of our Nation, including his administration, to human rights and that that means, if it means anything, that we have to observe and protect the human rights of every individual.

With that, Mr. Speaker, I yield back the balance of my time.

CHILDREN AND FAMILIES IN POVERTY: BEYOND THE STATISTICS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. MILLER] is recognized for 30 minutes.

Mr. MILLER of California. Mr. Speaker and Members of the House, earlier this morning the Select Committee on Children, Youth and Families, which I have the privilege of chairing, held a hearing just a few blocks from this Nation's Capitol to give an opportunity to a number of individuals who are currently living their lives in poverty, attempting to raise their families in poverty, to give them a chance to tell Members of Congress what it is like on a day-to-day basis to be poor in America and to look into the eyes of your children and know that you are poor. And what kind of aspirations they had for themselves, for their families, for their children.

It is a rather tragic commentary on the United States of America that here within the shadow of the dome of the Capitol, just a few short blocks away, we had to listen to the tragic stories of these individuals, individuals who, in some instances, through no fault of their own, find that they were poor and find that they are the left-out in American society.

One of the tragic stories from 1980 to today is the dramatic increase in the number of poor people in America and especially the dramatic increase in the number of poor children in America.

□ 2115

In 1984, 12.9 million or 21 percent of all of the children in America were poor; 8.1 million of those children

were white, 4.3 million were black, 2.3 million were Hispanic children and 6.7 million or 52 percent of these impoverished children were female-headed single-parent households.

The poverty rate for children under 6 was 23.4 percent in 1984. For black children under 6, the poverty rate was 51.1 percent, the highest rate recorded by this group since the Census Bureau began collecting figures on this data in 1970.

The number of poor children increased to nearly 3.5 million between 1979 and 1983 and fell by 520,000 between 1983 and 1984. The decline between 1983 and 1984 was entirely among white children, although the poverty rate for white children, 16.1 percent, remains over 40 percent higher than in 1979.

Poverty rates for black children remained at an astonishing 46.2 percent between 1983 and 1984, and rose from 37.7 percent to almost 39 percent for Hispanic children.

The increase in poverty among children since 1979 included over 2 million children in male-headed families. During that period, poverty rates for male-headed families climbed faster than in female-headed families. Between 1959 and 1969, the child poverty rate in this country was cut in half, to a record low of 13.8 percent. By 1984, the child poverty rate had risen 50 percent above the 1969 level.

Mr. Speaker, I believe that this is an indictment of the Reaganomics program. I believe this is an indictment of the claim by this President of the United States to care about poor children. I believe this is an indictment of the promise of this President that he would maintain a safety net so the poorest of our country or, as he refers to them, the truly needy in America would not fall through it. In fact, the programs of this administration, unfortunately all too often agreed to by the Congress of the United States, has shredded that safety net so that millions of children in this country have simply hit the ground and have been irreparably damaged for as far as we can see into the future.

A child in a female-headed family in this country is 4 times as likely to be poor as one in a male-headed family. A black child is three times as likely to be poor as a white child.

Forty-five percent of all poor white children and 75 percent of all poor black children live in a female-headed single-parent family. By 1990, 3 million more children under the age of 10 will live in single-parent households, totaling almost 39 million children, a 48-percent increase in this decade, raising the percentage of children in such households to 23 percent of all children.

Nearly 40 percent of the families receiving AFDC in this country in 1982 reported earnings from incomes during that year. More than one-sixth of the poor children in 1983, 2.5 million, were in families with at least one full-time year-round worker. Again this takes away the myth that poor children are in poor families because the parents of these children prefer not to work but would prefer to rely on public welfare. The fact is that millions of these poor children are in families where one or both of their parents go to work every day for a good portion of that year but their wages in fact are so low for the hours that they work that this family still ends up poor at the end of the year.

I would like to tell Members of this Congress that it is these low income families that have their income taxes increased by 300 percent in over the last few years. It is these families that have seen a greater tax increase than any other segment of our society.

So I think we have got to understand that whether their parents work or they do not work, we find millions of children in a desperate situation, a desperate situation of poverty. I think while these figures that I have simply read to the Members of this body are an indictment of the programs that we have had to try and help these children, they are a much greater indictment of the actions that this Congress has taken to reduce the programs of support for these families who are trying to work and get out of poverty.

But there is something more important in the statistics that I have just read, and that is the human dimensions to understand that behind those statistics of the millions of children in poverty and the millions of families that are impoverished in the United States today, there are in fact individuals. This morning in the hearing that we held at Friendship House down at 6th and D Streets in Southeast Washington, we heard from Tweedy Williams, who is a parent in Washington, DC, who is now working, trying to stay off of welfare, but described to us the day-to-day combat that she has with the system and with the ability for her to provide the economic well-being for her family, where she went through a great deal of turmoil to try to get shelter and a decent place for her and her 1-year-old son, only to find out after she received that shelter that the person who owned the building in which she was living, in which she paid her rent, had not paid the mortgage for a good period of time. That building was foreclosed on and all of the tenants were evicted.

Once again, she found herself and her son out on the street. Fortunately, she was able to secure a place to live in a shelter for homeless in Bethesda and she unfortunately had to stay in that shelter for some 2 months. During that time, I say to the Members of this body, she was not sitting around that shelter. She was working two jobs to try to provide the income for her and her son. She was getting up at 5 o'clock in the morning to go to work, to work for $4 an hour, and, as she pointed out, at $4 an hour, at least 1 hour of her work had to be spent simply to pay for her carfare to and from work. In fact, it exceeded her hourly wage. She had to work an hour to get the carfare to go to her job.

I do not know if Members of the Senate who voted to eliminate the low-income programs when they voted on Gramm-Rudman today need carfare to go to work; but if they do, for them to achieve the amount of money necessary for them to pay the same carfare that Tweedy Williams has to pay to go to work, I believe that roughly at our salary, if you count the honorariums that Senators and Members of Congress get, they would have to work perhaps a minute, perhaps all of 3 minutes, to achieve that same carfare that Tweedy Williams had to achieve to get to work for a job that paid $4 an hour so she could raise her 1-year-old son.

When she concluded her testimony before us, she told us of her son. She said, "I don't want him to live in the kind of life I have had. I want his home to be filled with the things he needs and wants, and I pray that I can give them to him."

The committee also heard from Aletha Harris, who is a parent from Maryland. Aletha told us about trying to raise her children as a single parent. She told us of giving birth to her first child when she was 17 but her mother discouraged her from getting married because she felt that she was not prepared to go out into the world, and she asked that she finish school so that she could get a good job so she could go to work to raise her family. She talked about what it meant to live in a violent marriage with her spouse, who was chasing her and disturbing her in the middle of the night and beating on her door. She talked about what it was like to live, when she lost her job, on a welfare check of $282 a month, when her rent was $199, when there was $77 in food stamps and she had $6 left for the rest of the month, $6 for the next 30 days.

She talked about what it meant to try to provide for her children as she worked two jobs 16 hours a day and how she finally found a house, but when she moved into the house she found out that she still did not have transportation, so she had to walk 2 miles to pick up groceries at the store and to bring them back, and how many times she had to walk a mile to take her child to be cared for, her day-care mother, so she could continue to work. She talked about how her older child, her daughter, would have to walk through the cold to bring her

younger daughter home while she was still at work and the traumatic decision of whether or not to pay the electric bill or whether or not to pay the car bill because she needed a car so that she could keep her job.

She talked about not being able to pay the electric bill, so there was no heat in the house, and about ironing her clothes on top of the grill in her stove, about the big decision about whether or not to buy curtains so that she could have privacy for her and her family.

Mr. Speaker and Members of the House, very often we like to pretend that those people who are poor, those people who are impoverished in this country are lazy, that they really have no gumption, that if they really wanted to get ahead they could. Well, let me tell you the witnesses we heard this morning simply set that myth aside. I dare say they are working harder than most Members of this body in trying to keep their families together, and they are under far more pressure than any of us.

We also heard from a young man named Michael Jacobs. Michael Jacobs is 17 years old and he told this committee after being raised in a family of a rather difficult background, with a number of brothers and sisters who have gone to the Job Corps, one who has gone to prison, how somehow he was able to escape that because a man told him that an education was more important than selling dope and smoking grass and hanging out on corners, as he was doing when he was a very young child, how Michael Jacobs told this committee "that just don't get it," and how Michael Jacobs is going to school, trying to get his grades in order so that he can go to the University of Maryland.

Michael Jacobs is doing that with a number of strikes against him, but I think he convinced the members of this committee that he was trying, and they wished him well and they were taken quite aback by his sense of gumption, by his sense of the desire to participate in the American dream. As Michael said, "Success means having what I want, a decent job, it means to settle down with a family, a career and a college degree." When I was a kid I was raised by my mother and then she met a man named Lonnie, and they have been together for 12 or 13 years, "and he showed me what life was about, and he told me that to get an education was more important than hanging out on the corner selling drugs, that selling drugs was hurting others and I was killing other people when I sold it to them."

What Michael is saying is that even coming out of a cycle of poverty, he is willing to try and make it.

□ 2130

He is willing to move forward, as are the other witnesses that we heard from in the hearing; as was Tweedy Williams, as was Aletha Harris, as was Michael Jacobs, as was Stephanie Epps. Stephanie Epps is a 17-year-old youngster with two children who is in Cardozo High School here, who told us about getting up at 2:30 in the morning so she could study while the house was quiet because they live in a house with a great number of people. She told us how she came directly home from school so she could study while her grandmother watched her children, and how she hopes some day to have a house of her own, and how she was hoping that either she could learn the trade of a beautician or perhaps even get into the U.S. Army so that she could provide a means of support for her family.

But Stephanie Epps did not drop out of school. Stephanie Epps did not shirk her responsibilities. She accepted them with the support of her family, again a family that is deeply impoverished. They have tried to provide some semblance of support for Stephanie and her children so that she could go on and hopefully provide a better life for her child.

I guess what I am trying to say to the Members of this Congress is that we ought not to treat poor people in the country as them against us.

Very often members of the select committee say to me they want to have hearings on the success stories, why some people escape poverty and why some people do not; what is it that motivates people to leave the ghetto to get an education, and for those who do not.

But very often sometimes I think what these people are really telling me is they want to see somebody who models the notion of success as we would, the kind of life that we would.

I would say to Members of the Congress that had they been in this hearing today, I think they would have understood that for millions of poor people in this country success is a daily battle. It is not the notion of a college degree. It is not the notion of 5 years from today a career move. Success is being able to provide food for your family, shelter for your family. Success is hoping that you are not going out into the street on circumstances beyond your own control. Success is hoping that you will have enough money at the end of the month to make ends meet.

But I think the real success that the witnesses before the select committee told us about is somehow not letting that spirit die, the fact that you have drawn a difficult lot; that somehow you still aspire to make this world better for your children; that somehow you desire to have a better life for them. So you continue on as Tweedy Williams, Aletha Harris, Michael Jacobs, Stephanie Epps, Ana Mareno, and others who testified today do.

What I would like this Congress to understand is that these people have so very often said they would prefer not to be on public assistance. They spent a great deal of time this morning telling us how degrading it is to wait for that check, to have your whole life dependent upon whether that check arrives on time or does not arrive on time.

But they also understand that if they work 16 hours a day on two jobs, they are still going to be poor, and they need some resources to help them over the tough spots.

What they are saying is, "We're willing to go to work. We're willing to pull our load. We're willing to try to stay in school. But we may need some help for a period of time."

Now, what the Congress has answered with the proposal on Gramm-Rudman, what this administration has answered and this Congress, all too often, is that the moment you get a job after years on welfare, we are going to cut off all the resources to you.

The question really is, should we do that, or should we try to work with these people and stay with these people and bet on their success and, as they do better, we will withdraw some of these resources over a period of time to get them on their feet? Are we prepared to look at the dignity of these individuals and to treat them as individuals and to understand what their needs are? Or are we simply prepared to class them as the poor in this country, treat them as an abstract and go on about our business?

Tragically, most Members of this House and most Members of the other body will never get a chance to meet these people who testified today, and rarely will Members of this body or Members of the Senate go out and make an attempt to talk with these people and to understand, will they make an attempt to understand what it means to be poor in America every day, what it means to grow up poor in America.

But until that time, I would hope that they would understand that there are an awful lot of decent people in this country who happen to be poor, and there are an awful lot of people in this country who, if given the chance, will take the chance and make the most of it, and that this Government ought to be as compassionate as its citizens.

It is very interesting that in a recent poll in the Los Angeles Times, the overwhelming number of people polled in the Los Angeles area felt that this Government should do more to help poor children and to help those families in need.

But we do not find that in the Congress of the United States. I guess the reason for that may be that the country is a little bit nicer than the Congress of the United States, that perhaps the country is not as mean spirited as the Congress of the United States.

You know, we hear a lot of talk when we talk about balancing the budget, when we hear about cutting these programs to the poor. We hear about bold actions and tough actions. It does not take a great deal of toughness for Members of Congress in this institution, in this Chamber, to strike out against the poor in this Nation. We do not have to be very bold to strike out against poor children. It takes no great courage to rip the food stamps away from a very young child who has no other means of support, or for the elderly in this country that have now retired and retired into poverty and need that kind of help. It does not take a great deal of courage to kick the crutches out from the elderly in the Medicare Program or the poor in the Medicaid Program. That is not courage; those are acts of cowards. Those are acts of cowards, because when we take those actions, rarely will any Members of this Congress meet the victims of those actions. Rarely will they get an opportunity to talk to the mother who, because of the cuts in the WIC Program, the hundreds of thousands of mothers who are medically eligible because they are at risk of having a low birth weight baby, that has 40 times the chance of dying in the first year of life than a normal weight baby. Rarely will Members of this Congress talk to that mother about the denial of a few dollars a month in high protein food supplements so that we can get the weight of that baby up in the normal range.

We will not talk to that mother. We will not understand the tragedy that befalls a family that sees the birth of a newborn child only to be taken in to the intensive care wards of the hospitals of this Nation.

Unfortunately, not only is the policy with respect to the cutbacks in health care for the poor, nutrition for the poor, not only is it sad policy, but it also happens to be economically very foolish, because it is the very preventative actions in the delivery of health care and nutrition to the poorest people in this country that has the opportunity, according to study after study by the Reagan administration and the previous administration, to save this Government billions of dollars in health care costs. But we, rather, talk about the short-term goal of cutting a few people off of the program.

So I would hope, Mr. Speaker and Members of the House, that the next time we cavalierly talk about cutting programs to the poor, or as this body considers whether or not to exempt programs for the poor from the Gramm-Rudman proposal, when we consider whether or not to follow the cavalier actions of Members of the Senate, many of whom are millionaires, that they cavalierly threw aside the poor in this country, Democrats and Republicans alike, liberals and conservatives alike, I would hope that we would understand that the poor people in this Nation are not an abstraction, but they are very real people who live with the anguish of poverty on a day-to-day basis. On an hour-to-hour basis, they struggle.

□ 2140

Because they are poor does not mean that they do not get an opportunity to witness America society in the media, that they do not get an opportunity to see how the other half lives, and because they are poor does not mean that they are insensitive to the actions that we might take in this Congress; so I would hope that the Congress of the United States would quit striking out at the poor in this country. I would hope in fact that the Congress of the United States would try to do as we did a decade ago, and that is to try to work toward the eradication of poverty in this country.

Let me remind this Congress that in the decade between 1960 and 1970 the child poverty rate was 13.8 percent. Today it is in excess of 21 percent. Something is terribly wrong in this country when we condemn 13 million of our children to a life of poverty. It is not to suggest for a moment that all of that can be made up by the Federal Government, nor should it, but it is to suggest that absent meaningful Federal responses to this epidemic of child poverty in the United States we will simply not be able to roll back the number of children in poverty. We will simply not be able to make the gains on infant mortality that are so necessary, and we simply will not be able to liberate those children from the quite lives of desperation that the poor in this country lead so all too often and in all too great numbers.

So, Mr. Speaker, I appreciate this opportunity to share this morning's hearing with the Members of the House of Representatives, but it is also with some degree of shame that I have to tell you, as I did at the outset, that that hearing was held within the shadow of the dome of this great Capitol, that within the shadow of the dome of this great Capitol there are children in poverty who have little hope of ever escaping that poverty, and that is a national tragedy and the commitment of this Congress ought to be to eradicate poverty among children in this country.

POLITICAL ASYLUM FOR MIROSLAV MEDVID

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Pennsylvania [Mr. RITTER] is recognized for 30 minutes.

Mr. RITTER. Mr. Speaker, the hour is late. It is late for us here in the Halls of the Congress, and it is late for a young Ukrainian seaman named Miroslav Medvid.

Mr. Speaker, it is with deep regret that I take to the floor of the House today to bring this message on behalf of Miroslav Medvid. The case of Miroslav Medvid should never have gotten to the point it has arrived at.

There is no doubt from all the information we have that a grievous error has been made, that a significant human tragedy is underway.

Mr. Speaker, we have in our power in this country the opportunity to avoid a continuation, indeed lifelong continuation of this tragedy.

We have in our power the opportunity to give Mr. Medvid the chance he never had.

I would like to recount the events leading up to the present and how the kind of appropriate rules, regulations, and procedures that are commonly afforded defectors political asylum were not afforded to Mr. Medvid, how they were avoided.

Now I am not saying that I have some knowledge of some conspiracy from on high to somehow save the summit from the destruction of one lonely, desperate man, but I do know that the kind of treatment that this man received in this country, on our sacred American soil, is not worthy of who we are, what we are, and what we stand for.

Mr. Medvid took in a little brown jar some legal documents, a watch, and according to witnesses something red. He took this little brown jar and jumped off the side of a great and large grain ship, grain-hauling ship. He jumped into the Mississippi River in near hurricane conditions and swam to shore. When he first came to shore the first American to see him was the owner of a jewelry store, Mr. Joseph Wyman.

I would like to read the affidavit of Mr. Joseph Wyman:

In the parish of Plaquemines, town of Belle Chasse, State of Louisiana.

I, Joseph Wyman, duly sworn, hereby give the following statement of my own free will and accord:

My name is Joseph Wyman and I reside in Belle Chasse, Louisiana. Today is November 1, 1985, and I am providing this statement to Orest A. Jejna of Phoenix, Arizona.

On October 24, 1985, a Thursday, at 7:30 to 8:00 p.m., I was closing my jewelry store when I noticed a man running up the parking lot. He ran to my nephew, Wayne Wyman.

My nephew asked me to come there because the man was speaking in a foreign language.

I then walked over to them and the man appeared very excited and I noticed that he was soaking wet. It was not raining that night. The man was babbling or trying to speak in a foreign language.

The only thing I was able to understand was "Novi Orlean". I understood this to mean New Orleans. I then understood the language to be some Eastern European dialect.

I then asked the man if he was Russian. He responded by beating his chest with his fist, and saying "Ukrainian".

The man appeared extremely nervous and kept looking south, the direction from which he came.

The man was dressed in the following manner: He had on brown shorts, blue pullover shirt, sneakers, and black socks.

The man was carrying a brown jar, which I later learned from my nephew contained the man's papers, watch, and a small red object.

I then spoke with my nephew and tried to calm the man down.

I then asked the man and said: "You, New Orleans". He said "Yes".

I asked him again, "You, defect, New Orleans".

The man responded "Yes."

I'm not sure if the man understood what I meant, but, based on the facts before me, I felt this man was trying to defect to the United States.

Based on my past experiences as a Jefferson Parish deputy sheriff, I felt this man was trying to defect to the United States.

I then asked my nephew to take the man to New Orleans where he wanted to go.

I then asked the man, "New Orleans?" and gestured, "Where".

He responded, "Policia."

My nephew agreed to take him to New Orleans and they both left in my nephew's car.

Approximately 3 to 5 minutes later, three men approached me and only one man spoke. Two of the men were tall and large and muscularly and the other one was of average height and weight.

One of the men asked me if I had seen a man walking around. I asked him, "Why?" He said, "one of our comrades fell overboard and may be hurt and wandering around looking for help."

At that time I felt it was in my best interest, that I told them, "No".

I knew these men were after him and I wanted to protect him. I personally felt they were after the man.

The statement I have provided above is true and accurate to the best of my knowledge.

Signed, Joseph H. Wyman.

Sworn to before me this first day of November, 1985.

George Pivach, local notary public.

Now I ask you, is there any shadow of a doubt of the impression and of the exchange of this man, this first witness to the young Ukrainian who came off the ship? Not in my mind.

I would now like to read from the affidavit provided by the nephew, Wayne Wyman. The interesting thing, if I might digress, is that these two individuals were the first individuals to see Miroslav Medvid, the young Ukrainian sailor. So their impression and their exchanges are awfully, awfully important.

In the Parish of Plaquemines, town of Belle Chasse, State of Louisiana.

I, Wayne Wyman, duly sworn, hereby give the following statement of my own free will and accord:

My name is Wayne Wyman, and I reside in Tarrytown, Louisiana, in the parish of Jefferson.

I have read the statement of my uncle, Joseph Wyman. I would like to reiterate the facts delineated in paragraphs 1 to 14, as being true and correct to the best of my knowledge.

Upon leaving the premises with the man who approached us in the parking lot, I then drove him to New Orleans.

After we left my uncle's jewelry shop, I was together with the man for about an hour.

During that hour, I tried to figure out where he wanted to go. The man picked up an envelope from my car seat and gestured that he wanted to write.

He then wrote the words "policia" in Latin letters, not in Cyrillic, which is either Russian or Ukranian, so he had some knowledge of English. He wrote the word "policia" on the center of the page. Then he wrote "Novi Orleans" below it, and drew a circle around the word "policia" and drew an arrow to the word "Orlean".

He then drew a line separating the page. On the upper right-hand corner, he wrote "USSR". He pointed to the "USSR" and tried to gesture that that is where he was from.

I said to him "I think you are trying to defect."

I don't believe he understood what I said, but I knew that's what he wanted to do.

I then drove him to the police station and left him there.

The man was pointing at the police station and motioned for me to stop—again indicating that he had some knowledge of English.

The man appeared to be of sound mind and body as best as I could tell. He even wrote my license plate number down. He also could understand some road signs.

Once we got to the police station, I let him get out of the car.

The man tried to thank me by shaking my hand and kissing it.

The brown jar the man had with him was left in my car which I gave to the Immigration and Naturalization Service. The brown jug contained legal papers, watch and something red.

The statement I have provided above is true and accurate to the best of my knowledge.

And so on and so forth.

Sworn to before me this first day of November, 1985. George Pivach.—

The local notary.

I mean, does someone jump off a ship to go swimming in a hurricane-driven river? Does someone jump off a ship with legal papers, a watch, and a little jar if he is not desiring to defect? No, there is no doubt, there is absolutely no doubt whatsoever that Miroslav Medvid was a defector.

□ 2155

He was taken to the police station. There, between the Border Patrol and INS, they eventually hooked him up to a Mrs. Irene Padoch, an elderly woman who lives in New York City, a long-distance contact. A long-distance line was developed between New Orleans and New York City.

I spoke personally with Irene Padoch. Irene Padock has since spoken to the press. Irene Padoch has since testified in court. In Irene Padoch's mind, there was no question, there was no doubt, that Miroslav Medvid was a defector. When asked by the Immigration and Naturalization Service did she think, from what she was talking about with the gentleman, that he wanted to defect, she said, "Yes, he is asking for asylum."

She mentioned other things that Miroslav Medvid said. She mentioned that he told her he wanted to live in an honest country. She mentioned that he told her that he was very much afraid to go back.

Irene Padoch told this to INS. Irene Padoch was told by INS that she would be called back in about an hour. Irene Padoch was never called back that night by INS. That night Miroslav Medvid, after a discussion with the Ukranian-speaking interpreter who told the Immigration and Naturalization Service that Miroslav Medvid wanted to defect, that night about 1 hour after Irene Padoch was asked to tell the man, "Do not worry. There will not come any harm to you. No one is going to hurt you," that night, 1 hour after the conversation, Miroslav Medvid was returned to the Soviet ship *Marshal Koniev.*

I ask you: Does that speak well for what the principles of the United States are? Does that speak well for what America stands for? I do not think it takes a genius to understand that our very own people helped to perpetrate a monstrous tragedy.

Let me describe how Miroslav Medvid was returned to the ship. The Immigration and Naturalization Service called the shipping company that does business with the Soviet line. The shipping company that does business with the Soviet line contacted the *Marshal Koniev.* Eight burly seamen came for Miroslav Medvid, who did not want to go back. They had to drag him, kicking and screaming, back to that ship. Very American.

Miroslav Medvid was on a launch and was about to board the Soviet ship when he jumped into the water and started swimming furiously for shore. At this time, however, the only people around were eight burly Soviet seamen in a launch. They went after him in the launch. They dragged him out of the water and they put him back on the Soviet ship.

Irene Padoch was never called. By the way, this was all happening at about 11:30, when Irene Padoch was called, to about 12:30 a.m. Friday morning. He was then brought back onto the ship in the early hours of Friday morning. The State Department claims, and this is bizarre, I find

this bizarre, but this is the claim, the State Department claims that they did not hear a darn thing until 3:40 p.m. Friday. In other words, here is an international incident growing, a Soviet defector, and the State Department does not hear a darn thing until nearly a day has passed. I think it is bizarre.

The State Department finds out and they send somebody out to the ship and they did a good job getting Miroslav Medvid off that ship. That was not easy. It took some doing. According to the President, the boarding party prepared to use force. I commend them. I think that showed some guts. However, what followed seems to me not to have shown very much guts at all. I hate to say it. I have some good friends at the State Department, but I am disappointed at what happened.

What followed is this: Miroslav Medvid was taken off the Soviet ship and he was taken to a Coast Guard cutter. All the time he was with a Soviet official. When he first came off, he was groggy, he was nauseous, he appeared to have been drugged. We found out from yesterday's Senate hearing, which was not told to us, by the way, it was not offered up to us, this information, but yesterday we found out he had tried to cut his wrists. Yes; he really did want to go back to the Soviet Union.

Then he was taken to a shore facility. He was given a good night's sleep. He was given a good breakfast. In the presence of Soviet officials, he did state his will to go back to the Soviet Union. The Soviet interpreter was not Ukrainian speaking. He was a Russian-speaking person, and there may have been some suspicions there to someone who, when asked whether he was Russian, beat his chest and said, "I am Ukrainian."

Miroslav Medvid spent 24 hours or more back on that ship before the State Department got to take him off. They heard about it at 3:40. They immediately send a man down to the New Orleans area where the ship was, and they took him off. I wonder what kind of deal was made when they took him off? Maybe we will never know. But 24 hours was spent aboard this Soviet ship, 24 hours of exposure to the KGB? Sure, they have KGB officers on these transports, to the political officer, to someone in charge of discipline. Sure.

At that point, after 24 hours, he needed more. He needed more than just an interview with a State Department officer, a Russian-speaking translator, in the presence of Soviet officials. He needed far more. He needed some cooling-off time. He needed some respite. He needed to be able somehow to cool down from the drugs and the threats, the probable drugs, the probable threats that he endured while back on that grain ship for 24 hours. But he did not get it. No. It was closed up and it was said, our State Department said, "We are satisfied this man wants to go home." If that man wants to go home, I am standing here a monkey's uncle. Nothing in his actions stated that he wanted to go home.

Here are some other things that we were never told. Miroslav Medvid, when asked why he jumped off the ship, by the Soviet authorities, said blandly, "I do not remember jumping off the ship." Miroslav Medvid was not in a position to speak freely.

Today a group of us who belong to the Helsinki Commission, a congressional commission composed for Members of the Senate and the House that oversees the Soviet behavior with respect to the Helsinki accords, held a press conference this morning. We displayed a letter which later this afternoon we delivered directly to the President. It was signed by all members of the Helsinki Commission. It stated:

DEAR MR. PRESIDENT: As members concerned with the issue of human rights, particularly in the Soviet Union, we respectfully request to meet with you to discuss the agenda for your meeting in Geneva.

It goes on to talk about human rights and the lack and the sorry state of accordance with those acts that the Soviet Union itself signed.

What Miroslav Medvid did, and his forcible return to the grain-hauling ship, was in direct violation of the Helsinki accords.

□ 2205

We also took another letter to the President today, and that was also signed by all of the members of the Helsinki Commission, and that asked the President to delay the return of Miroslav Medvid to the Soviet Union pending investigation of the facts of the case, and pending the opportunity of Miroslav Medvid to, on some neutral ground, regain his bearings, perhaps speak with Ukrainian Americans, removed from the environment of the threats, and to be able to come to a clear-headed decision on his future.

Earlier some 41 Senators sent a letter requesting essentially the same thing to the President. Another 10 or so Senators have signed that letter since it went over there.

We heard earlier this evening by the gentleman from Ohio [Mr. PEASE], who has a letter to the President that some 70 Members of the House have signed onto, that letter requesting essentially the same thing, some safe harbor, some time to think clearly, some contact with people who are nonthreatening, and give the man a chance. This man is a marked man if he goes back to the Soviet Union. His life is in danger. He will be made an example of.

Today, I and the cochairman of the Helsinki Commission introduced a congressional resolution and we asked essentially for the same thing, and we circulated this resolution. There are some 60-odd Members of the House who have signed onto this resolution. We expect another 100 in addition to that or so tomorrow.

I guess what I am saying is we represent the people here in the august body, and the Senators represent the people in that august body. And what the people are saying is that they believe enough in what America means, and what America stands for, that they are not willing to let this desperate soul be taken back to Lord only knows what awaits him in the Soviet Union.

Mr. Speaker, I urge my colleagues to join with the gentleman from Ohio [Mr. PEASE], on his letter, and to join with me and the gentleman from Maryland, [Mr. HOYER], in our congressional resolution so that we can bring this message loud and clear to the President of the United States, to the White House, to the administration officials who are responsible for this decision. It is important.

We intend at the summit to speak on behalf of the freedom of mankind. I am asking, and the dozens upon dozens of other Members of the Congress are asking that we speak before it is too late on behalf of the freedom of one man.

Not to do so would be a deep embarrassment to all of us.

Mr. Speaker, I yield back the balance of my time.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. RITTER for 30 minutes, today.

(The following Members (at the request of Mr. STRANG) to revise and extend their remarks and include extraneous material:)

Mr. WALKER, for 60 minutes, today.

Mr. MACK, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, today.

Mr. GINGRICH, for 60 minutes, on November 7.

Mr. BROYHILL, for 30 minutes, today.

Mr. IRELAND, for 5 minutes, on November 7.

Mr. RINALDO, for 5 minutes, today.

(The following Members (at the request of Mr. GARCIA) to revise and extend their remarks and include extraneous material:)

Mr. RAY, for 5 minutes, today.

Ms. OAKAR, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. BATES, for 5 minutes, today.

Mr. ECKART of Ohio, for 60 minutes, today.

Mr. PEASE, for 60 minutes, today.

Mr. GONZALEZ, for 60 minutes, today.
Mr. LIPINSKI, for 60 minutes, on November 7.
Mr. DYMALLY, for 60 minutes, on November 12.
Mr. SKELTON, for 60 minutes, on November 13.
Mr. ECKART of Ohio, for 60 minutes, on November 14.
(The following Members (at the request of Mr. EDGAR) to revise and extend their remarks and include extraneous material:)
Mr. MILLER of California, for 30 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:
Mr. ROE, following the remarks of Mr. BIAGGI on title I of H.R. 6, in the Committee of the Whole, today.
Mr. LIVINGSTON, in support of the Roe amendment to H.R. 6, in the Committee of the Whole, today.
(The following Members (at the request of Mr. STRANG) and to include extraneous matter:)
Mr. LUNGREN.
Mr. COURTER.
Mr. GILMAN in three instances.
Mr. THOMAS of California.
Mr. SHUMWAY.
Mr. MILLER of Ohio in three instances.
Mr. STRANG.
Mr. DAUB.
Mr. LEACH of Iowa.
Mr. CHANDLER.
Mr. LIGHTFOOT.
Mr. BARTON of Texas.
Mr. GEKAS.
Mr. GOODLING.
Mr. GINGRICH in three instances.
Mr. SOLOMON.
Mr. VANDER JAGT.
Mr. COBLE.
Mr. MICHEL in two instances.
Mr. BOULTER.
Mr. DIOGUARDI in two instances.
Mr. DENNY SMITH.
Mr. O'BRIEN.
Mr. LAGOMARSINO.
Mr. DORNAN of California in two instances.
Mr. MYERS of Indiana.
Mrs. JOHNSON.
(The following Members (at the request of Mr. GARCIA) and to include extraneous matter:)
Mr. MARKEY.
Mr. EDGAR.
Mr. LEVINE of California.
Mr. MURTHA.
Mr. WHEAT.
Mr. RUSSO.
Mr. OWENS in two instances.
Mr. PEPPER in two instances.
Mr. SHELBY in two instances.
Mr. RAHALL.
Mr. SOLARZ in four instances.
Mr. LIPINSKI.
Mr. FAZIO.
Mr. TRAFICANT.
Mr. WEISS.
Mr. FORD of Michigan in two instances.
Mr. FLORIO.
Mr. BORSKI.
Mr. KILDEE.
Mrs. BURTON of California.
Mr. ACKERMAN in two instances.
Mr. FOWLER.
Ms. MIKULSKI.
Mr. WAXMAN.
Mr. MANTON.
Mr. ANDERSON.
Mr. FASCELL.
Mr. SYNAR.
Mr. DWYER of New Jersey.
Mr. HAMILTON.
Mr. KOLTER.

ENROLLED BILL AND JOINT RESOLUTIONS SIGNED

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee had examined and found truly enrolled a bill and joint resolutions of the House of the following titles, which were thereupon signed by the Speaker:

H.R. 1210, An act to authorize appropriations to the National Science Foundation for the fiscal year 1986, and for other purposes;

H.J. Res. 126. Joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Drug Abuse Education Week"; and

H.J. Res. 282. Joint resolution designating the week beginning October 27, 1985, as "National Alopecia Areata Awareness Week."

ADJOURNMENT

Mr. RITTER. Mr. Speaker, I move that the House do now adjourn.
The motion was agreed to; accordingly (at 10 o'clock and 10 minutes p.m.) the House adjourned until tomorrow, Thursday, November 7, 1985, at 10 a.m.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2214. A letter from the Deputy Secretary for Programs and Commercial Activities, Department of the Army, transmitting notice of the decision to convert to contractor performance the commissary shelf stocking function at Ft. Stewart, GA, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2215. A letter from the Deputy Secretary for Programs and Commercial Activities, Department of the Army, transmitting notice of the decision to convert to contractor performance the commissary shelf stocking function at Hunter Airfield, GA, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2216. A letter from the Deputy Secretary for Programs and Commercial Activities, Department of the Army, transmitting notice of the decision to convert to contractor performance the installation support services at Yuma Proving Grounds, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2217. A letter from the Deputy Secretary for Programs and Commercial Activities, Department of the Army, transmitting notice of the decision to convert to contractor performance the facility engineering function at the Military Ocean Terminal, Bayonne, NJ, pursuant to 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2218. A letter from the Deputy Secretary for Programs and Commercial Activities, Department of the Army, transmitting notice of the decision to convert to contractor performance the commissary shelf stocking function at Ft. Sam Houston, TX, pursuant 10 U.S.C. 2304 nt.; to the Committee on Armed Services.

2219. A letter from the Secretary of Transportation, transmitting a report on progress toward completion of the Northeast Corridor improvement project, pursuant to Public Law 94-210, section 703(1)(D); to the Committee on Energy and Commerce.

2220. A letter from the Secretary of State, transmitting his determination that it is in the national interest to grant assistance to Costa Rica even though it is in default on loans made under the FAA, pursuant to 22 U.S.C. 2370(q); to the Committee on Foreign Affairs.

2221. A letter from the Under Secretary of State for Security Assistance, Science, and Technology, transmitting an arms sale proposal covering all sales and exports under the Arms Export Control Act, pursuant to 22 U.S.C. 2765(a); to the Committee on Foreign Affairs.

2222. A letter from the Assistant Legal Adviser for Treaty Affairs, Department of State, transmitting copies of international agreements, other than treaties, entered into by the United States, pursuant to 1 U.S.C. 112b(a); to the Committee on Foreign Affairs.

2223. A letter from the Assistant Secretary of the Interior for Indian Affairs, Bureau of Indian Affairs, transmitting a proposed plan for the use and distribution of the Wichita and Affiliated Tribe's judgment funds in Docket 371 and 372 before the U.S. Claims Court, pursuant to Public Law 93-134, sections 2(a) and 4; to the Committee on Interior and Insular Affairs.

2224. A letter from the Assistant Secretary of the Interior, transmitting a draft of proposed legislation to amend the Reclamation Project Act of August 4, 1939, to authorize modification of certain contracts, and for other purposes; to the Committee on Interior and Insular Affairs.

2225. A letter from the Comptroller General of the United States, transmitting a report on implementation of and research conducted under the Small Business Innovation Development Act of 1982 (GAO-RCED-86-13), pursuant to Public Law 97-219, section 6; jointly, to the Committees on Government Operations and Small Business.

2226. A letter from the Comptroller General of the United States, transmitting a report on Navy acquisition: SUBACS problems may adversely affect Navy attack submarine programs (GAO/NSIAD-86-12); jointly, to the Committees on Government Operations and Armed Services.

2227. A letter from the Chairman, National Advisory Committee on Oceans and Atmosphere, Department of Commerce, trans-

mitting a copy of the report entitled, "Shipping, Shipyards and Sealift: Issues of National Security and Federal Support"; jointly, to the Committees on Merchant Marine and Fisheries and Armed Services.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HUGHES: Committee on the Judiciary. H.R. 3132. A bill to amend chapter 44, of title 18, United States Code, to regulate the manufacture, importation, and sale of armor piercing ammunition, and for other purposes; with amendments (Rept. 99-360). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. ARCHER (for himself and Mr. DAUB):

H.R. 3688. A bill to restore to the Social Security Trust Funds and other Federal retirement funds losses resulting from noninvestments, redemptions, and disinvestments in connection with efforts to meet the public debt limit, and to amend title II of the Social Security Act to provide for future treatment of the OASDI trust funds in cases in which the public debt limit has been reached; to the Committee on Ways and Means.

By Mr. FORD of Tennessee:

H.R. 3689. A bill to restore to the Social Security Trust Funds and other Federal retirement funds losses resulting from noninvestments, redemptions, and disinvestments in connection with efforts to meet the public debt limit and to require prior approval of the Congress of any further disinvestment of such funds; jointly, to the Committees on Ways and Means and Rules.

By Mr. WEISS (for himself, Mr. WOLPE, Mr. SOLARZ, Mr. CROCKETT, Mr. GARCIA, Mr. STOKES, Mr. KASTENMEIER, Mr. LELAND, Mr. DIXON, Mr. FAUNTROY, Mr. MITCHELL, Mr. WHEAT, Mr. RANGEL, Mr. DYMALLY, Mr. TOWNS, Mr. DELLUMS, and Mrs. SCHROEDER):

H.R. 3690. A bill to prohibit assistance for military or paramilitary operations in Angola; jointly, to the Committee on Foreign Affairs and the Permanent Select Committee on Intelligence.

By Mr. BATES:

H.R. 3691. A bill to reorganize the investigations and counterintelligence functions of the Navy, and for other purposes; to the Committee on Armed Services.

By Mr. BROYHILL (for himself, Mr. TAUZIN, Mr. LOTT, Mr. SHELBY, Mr. GINGRICH, Mr. DOWDY of Mississippi, Mrs. JOHNSON, Mr. NICHOLS, and Mrs. SMITH of Nebraska):

H.R. 3692. A bill to modify the deadlines applicable to hazardous waste disposal facilities required to certify compliance with certain financial responsibility requirements under the Solid Waste Disposal Act; to the Committee on Energy and Commerce.

By Mr. COBLE:

H.R. 3693. A bill to amend title 5 of the United States Code to reform the retirement provisions for Members of Congress; to the Committee on Post Office and Civil Service.

By Mr. DAVIS:

H.R. 3694. A bill to restore to the Social Security Trust funds and other Federal retirement funds current and future losses in connection with efforts to meet the public debt limit; to the Committee on Ways and Means.

By Mr. EDWARDS of Oklahoma:

H.R. 3695. A bill to amend the Education Consolidation and Improvement Act of 1981 to require certain minimum standards of academic achievement and school administration, and for other purposes; to the Committee on Education and Labor.

By Mr. FORD of Michigan:

H.R. 3696. A bill to amend the Higher Education Act of 1965; to the Committee on Education and Labor.

H.R. 3697. A bill to amend the Higher Education Act of 1965; to the Committee on Education and Labor.

H.R. 3698. A bill to amend the Higher Education Act of 1965; to the Committee on Education and Labor.

By Mr. LOWRY of Washington (for himself, Mr. BIAGGI, Mr. BOSCO, Mr. CALLAHAN, Mr. HERTEL of Michigan, Mr. DYSON, Mr. MANTON, Ms. MIKULSKI, Mr. HUGHES, Mr. OBERSTAR, Mr. BONKER, and Mr. ANDERSON):

H.R. 3699. A bill amending the Outer Continental Shelf Lands Act to make certain vessels considered points in the United States, and for other purposes; to the Committee on Merchant Marine and Fisheries.

By Mr. FORD of Michigan (for himself, Mr. HAWKINS, Mr. BIAGGI, Mr. JEFFORDS, Mr. COLEMAN of Missouri, Mr. OWENS, Mr. WILLIAMS, Mr. HAYES, Mr. PERKINS, Mr. BRUCE, Mr. SOLARZ, Mr. DYMALLY, Mr. ECKART of Ohio, Mr. PENNY, Mr. ATKINS, Mr. GUNDERSON, Mr. MCKERNAN, Mr. HENRY, Mr. GOODLING, Mr. TAUKE, Mr. MARTINEZ, Mr. KILDEE, Mr. CHANDLER, Mr. CLAY, Mr. GAYDOS, Mr. MURPHY, Mr. BOUCHER, and Mrs. ROUKEMA):

H.R. 3700. A bill to amend and extend the Higher Education Act of 1965; to the Committee on Education and Labor.

By Mr. PORTER:

H.R. 3701. A bill to suspend most-favored-nation treatment to Romania; to the Committee on Ways and Means.

By Mr. SHUMWAY:

H.R. 3702. A bill to confer U.S. citizenship posthumously on Rudolph Salli; to the Committee on Judiciary.

By Mr. WEBER:

H.R. 3703. A bill to amend the Internal Revenue Code of 1954 to provide an exclusion from gross income for interest on agricultural savings certificates and interest on obligations of the farm credit system, and to allow States to issue tax-exempt agricultural bonds in excess of limits on the issuance of private activity bonds; to the Committee on Ways and Means.

By Mr. COBEY:

H.R. 3704. A bill to protect U.S. citizens and property from state-supported terrorism; jointly, to the Committees on Foreign Affairs and Ways and Means.

By Mr. ROSE:

H.R. 3705. A bill to modify the deadlines applicable to hazardous waste disposal facilities required to certify compliance with certain financial responsibility requirements under the Solid Waste Disposal Act; to the Committee on Energy and Commerce.

By Mr. PEPPER:

H.J. Res. 444. Joint resolution to designate the week of March 3, 1986, to March 10, 1986, as National Back Awareness Week; to the Committee on Post Office and Civil Service.

By Mr. ANDERSON (for himself and Mr. SHUSTER):

H.J. Res. 445. Joint resolution to designate the week of January 26, 1986, to February 1, 1986, as "Truck and Bus Safety Week"; to the Committee on Post Office and Civil Service.

By Ms. SNOWE (for herself and Mr. MCKERNAN):

H.J. Res. 446. Joint resolution disapproving the decision of the President to deny import relief to the domestic shoe industry; to the Committee on Ways and Means.

By Mr. MICA (for himself, Ms. SNOWE, Mr. WEISS, Mr. MAVROULES, Mr. FASCELL, Mr. YATRON, Mr. WOLPE, Mr. GEJDENSON, Mr. KOSTMAYER, Mr. TORRICELLI, Mr. SMITH of Florida, Mr. LEVINE of California, Mr. ACKERMAN, Mr. MACKAY, Mr. UDALL, Mr. GARCIA, Mr. MACK, Mr. MCCAIN, Mr. BONKER, Mr. GILMAN, Mr. DANNEMEYER, Mr. LEACH of Iowa, Mr. BROOMFIELD, Mr. LAGOMARSINO, Mr. SILJANDER, Mr. SOLARZ, Mr. LANTOS, Mr. BERMAN, and Mr. FEIGHAN):

H. Con. Res. 228. Concurrent resolution condemning all acts of terrorism (including the hijacking of the *Achille Lauro*) and calling for the creation of an international coordinating committee on terrorism and for proposals to protect Americans abroad, and for other purposes; to the Committee on Foreign Affairs.

By Mr. ROWLAND of Connecticut:

H. Con. Res. 229. Concurrent resolution expressing the sense of Congress that there should be no increase in individual income tax rates; to the Committee on Ways and Means.

By Mr. RODINO:

H. Con. Res. 230. Concurrent resolution authorizing printing of additional copies of the transcript of hearings entitled "1984: Civil Liberties and the National Security State"; to the Committee on House Administration.

By Mr. GAYDOS:

H. Res. 307. Resolution providing amounts from the contingent fund of the House for continuing expenses of investigations and studies by standing and select committees of the House from January 3, 1986, through March 31, 1986; to the Committee on House Administration.

By Mr. BOLAND:

H. Res. 308. Resolution authorizing printing of the proceedings of the portrait unveiling ceremony of the Honorable Jamie L. Whitten; to the Committee on House Administration.

By Mr. DORNAN of California:

H. Res. 309. Resolution relating to "National Day" greetings made by the President of the United States to the Chairman of the Communist Party of the Soviet Union and the people of the Soviet Union; to the Committee on Foreign Affairs.

By Mr. RITTER (for himself and Mr. HOYER):

H. Res. 310. Resolution expressing the sense of the U.S. House of Representatives that Miroslav Medvid should not be allowed to be removed from the United States until

a complete investigation can determine whether he has been accorded all rights due him as a possible defector, and until he is accorded those rights; jointly, to the Committees on Judiciary and Foreign Affairs.

By Mr. DYMALLY:

H. Res. 311. Resolution expressing the sense of the House of Representatives that February 1986 should be observed as "Anti-apartheid Awareness Month"; to the Committee on Post Office and Civil Service.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 467: Mr. CROCKETT.

H.R. 479: Mr. BOSCO, Mr. SUNIA, Mr. SAXTON, and Mr. WEAVER.

H.R. 604: Mr. FAUNTROY.

H.R. 615: Mr. RAHALL, Mr. DURBIN, and Mr. BORSKI.

H.R. 864: Mr. EVANS of Illinois.

H.R. 1197: Mr. WRIGHT, Mr. LELAND, Mr. MARTINEZ, and Mr. DE LUGO.

H.R. 1284: Mrs. BURTON of California.

H.R. 1380: Mr. CONYERS.

H.R. 1524: Mrs. KENNELLY.

H.R. 1589: Ms. MIKULSKI.

H.R. 1875: Mr. YOUNG of Alaska, Mr. FROST, Mr. CONYERS, Mr. OWENS, Mr. CHAPPIE, Mr. STALLINGS, Mr. ROBINSON, Mr. ROTH, Mr. SWINDALL, Mr. KILDEE, and Mr. GEJDENSON.

H.R. 1877: Mr. CHAPPELL, Mr. BIAGGI, Mr. REID, Mr. ANDERSON, Mr. WIRTH, and Mr. HENRY.

H.R. 2001: Mr. GEJDENSON, Mr. REID, Mr. ATKINS, Mr. SMITH of Florida, Mr. BONER of Tennessee, Mr. DICKS, Mr. ZSCHAU, Mr. LOWERY of California, Mr. GUNDERSON, Mr. HUTTO, Mr. BERMAN, Mr. PETRI, Mr. SHARP, Mr. DANIEL, and Mr. LIPINSKI.

H.R. 2185: Mr. DASCHLE.

H.R. 2210: Mr. GRAY of Illinois.

H.R. 2277: Mr. EMERSON.

H.R. 2295: Mr. MANTON, Mr. CONYERS, Mr. MRAZEK, Mr. RANGEL, and Mr. SUNIA.

H.R. 2353: Mr. TORRICELLI.

H.R. 2591: Mr. SUNIA, Mr. PACKARD, Mr. WHEAT, Mr. SHAW, Mr. BURTON of Indiana, Mr. HARTNETT, Mr. ROWLAND of Connecticut, Mr. DICKINSON, Mr. CAMPBELL, Mr. TAUZIN, Mrs. LONG, Mr. LEHMAN of Florida, Mr. LELAND, Mr. MCHUGH, Mr. RALPH M. HALL, Mr. MITCHELL, Mr. SYNAR, Mr. TORRES, Mr. RICHARDSON, Mr. CHAPPIE, Mr. SCHEUER, Mr. CRAIG, Mr. MCCAIN, Mr. BREAUX, Mr. GORDON, Mr. STAGGERS, Mr. MCEWEN, Mr. SILJANDER, Mr. FAWELL, Mr. FRENZEL, Mr. FRANKLIN, Mr. BOULTER, Mr. COBLE, Mr. NATCHER, Mr. RODINO, Mr. SABO, and Mrs. SCHROEDER.

H. Res. 275: Mr. HUTTO.

H. Res. 276: Mr. HUTTO.

H. Res. 285: Mr. HUTTO.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 1616

By Mr. JEFFORDS:

—Page 9, after line 21, insert the following new section (and redesignate the succeeding section accordingly).

SEC. 10. WORKER READJUSTMENT AND PLACEMENT SERVICE.

(a) REGIONAL ASSISTANCE.—The Secretary shall identify individuals, who shall include but not be limited to employees of the Department of Labor, who shall be available on a regional basis to provide planning, operational, and technical assistance to worker readjustment and placement committees described in subsection (b).

(b) WORKER READJUSTMENT COMMITTEES.—(1) A worker readjustment and placement committee may be established by an employer who has provided notice as required under section 3.

(2) The purpose of the committee shall be to facilitate and coordinate the readjustment or relocation of the workers through retraining, counseling, placement, human resource, community, education, and other services.

(3)(A) The committee shall be composed of the employer or the employer's representative, representatives of the affected employees, and any other individual selected by mutual agreement between such parties.

(B) In any case in which there is no such employee representative, employees shall choose individual employees to represent them on the committee.

(c) FINANCIAL ASSISTANCE.—(1) Subject to funds made available for such purpose, including funds from other applicable programs, the Secretary may provide financial assistance, to any worker readjustment and placement committee.

(2) Such assistance may not exceed—

(A) 50 percent of the operating costs of the committee; and

(B) 50 percent of the costs incurred by the committee is relocating affected employees.

(d) REGULATIONS.—The Secretary shall prescribe regulations establishing conditions and requirements for eligibility by worker readjustment and placement committees to the financial assistance authorized in subsection (c).

(e) VOLUNTARY PARTICIPATION.—Formation of and participation in worker readjustment and placement committees by any employer, employee representative, or employee shall be completely voluntary.

(f) NO DISCRIMINATION BASED ON EMPLOYEE REPRESENTATION.—In administering the assistance authorized under this section, the Secretary shall not discriminate on the basis of employee representation or the lack thereof.

(g) ASSISTANCE MAY NOT BE CONDITIONED ON ACCEPTANCE OF SECRETARY'S ADVICE.—In no case shall the continuation of assistance under this section be conditioned upon the acceptance of any advice or recommendation offered to a worker readjustment and placement committee by the Secretary or the Secretary's representative.

H.R. 6

By Mr. BEREUTER:

(Amendment to the amendment in the nature of a substitute (text of H.R. 3670).)

—After Sec. 1199K of title XI, add the following new section:

SEC. . (1) It is the intention of Congress that no local cost-sharing shall apply to the design, construction, operation or maintenance of streambank stabilization and river preservation structures on rivers designated and protected under the Wild and Scenic Rivers Act (16 U.S.C. 1271 et seq.) or any subsequent act.

(2) Notwithstanding any other provision of law, the Secretary shall waive all local cost-sharing requirements relating to the Missouri National Recreational Project, Nebraska and South Dakota as authorized in Sec. 707 of Public Law 95-625.

EXTENSIONS OF REMARKS

NEW REPORT SHEDS LIGHT ON SOVIET A-TESTING CONTROVERSY

HON. EDWARD J. MARKEY
OF MASSACHUSETTS
IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. MARKEY. Mr. Speaker, for over 2 years, the Reagan administration has accused the Soviets of violating the Threshold Test Ban Treaty [TTBT] by testing some of its nuclear warheads above the treaty's 150-kiloton limit—despite what it has acknowledged to be "ambiguities" and "uncertainties" in the evidence and the growing preponderance of scientific opinion that the Soviets have not violated the 150-kiloton limit.

For years, a number of prominent scientists have contended that the evidence for this charge is based on a formula—for converting the seismic waves given off during a test explosion into estimates of yield—which does not fully account for the differences in the geology of the Soviet test site and that of the U.S. test site in Nevada.

Under pressure from the U.S. scientific community, the United States had made slight modifications in this formula. Outside critics, such as former DARPA consultant Jack Evernden, have long contended that further moves toward a more technically sound methodology have been resisted for political reasons.

Within a few weeks, we may know for certain whether this is indeed the case. Yesterday's New York Times revealed that a secret Government panel has studied the current test verification methods and concluded that our yield estimates should be lowered by 20 percent—which should lead to a reassessment of whether the Soviets had violated the TTBT.

The administration's forthcoming arms control compliance study should reflect this new finding. In the Times piece, I find rather disturbing indications that once the seismological evidence no longer supports the finding of a Soviet TTBT violation, some administration spokesmen appear to be falling back on "nonseismic" evidence. When these same spokesmen believed the seismological evidence was on their side, they did not hesitate to use it. According to the Times piece, the Defense Intelligence Agency believes that seismological evidence is still the most important method for evaluating the yield of Soviet tests. It would seem to me that if the administration's compliance study is going to have any shred of credibility, it should reflect the consensus of the expert seismological community in its discussion of the TTBT issue.

The Times piece also raises questions about the administration's current stance on ratification of the TTBT. In the past, the administration has opposed ratification of the TTBT, citing verification uncertainties. But Dr. Thomas H. Jordan, who headed the Pentagon panel studying these issues, has said that, "It appears to me right now that we can verify the Threshold Test Ban Treaty with existing national technical means." If the technical hurdles have been crossed, the administration should stop stalling and submit the treaty for ratification.

Mr. Speaker, at this point, I would like to insert into the RECORD a copy of the aforementioned article.

The article follows:

[From the New York Times, Nov. 4, 1985]

NEW MEASURE SEEN FOR SOVIET A-TEST

PANEL OF EXPERTS CALLS METHOD U.S. USES TO ESTIMATE SIZE OF EXPLOSIONS FAULTY

(By Michael R. Gordon)

WASHINGTON, Nov. 3.—Accusations by the Reagan Administration that Soviet underground nuclear tests may have violated treaty limits are based on faulty assumptions, according to a group of scientists.

The experts, chosen by the Pentagon to study test verification methods, have recommended that the Government revise its procedures for estimating the power of Soviet tests. The Administration has said the test explosions were "likely" to have been bigger than the legal limit.

The panel of eight scientists made its recommendation last month in a classified report to a Pentagon research agency and to Richard L. Wagner Jr., the assistant Defense Secretary for atomic energy.

If the group's recommendation is followed, the Government's estimates of the yield of Soviet tests would be lowered by about 20 percent, according to experts familiar with the report. An Administration official said the panel's report would lead to a reassessment of whether the Russians had violated the treaty.

The Threshold Test Ban Treaty, signed by the United States and the Soviet Union in 1974, states that each side cannot conduct tests of explosives greater than 150 kilotons, the equivalent of 150,000 tons of TNT. Both sides have said they would abide by the treaty's limits, but the Administration has not ratified the agreement, saying it could not be verified unless American observers were allowed to conduct measurements at Soviet test sites.

On Feb. 1 the Administration said in a report to Congress, "Soviet nuclear testing activities for a number of tests constitute a likely violation of legal obligations under the Threshold Test Ban Treaty of 1974."

REPORT TO CONGRESS IS DUE

The scientists' study comes as the Administration is preparing the latest in a series of reports to Congress on Soviet compliance with arms control agreements. It is due by Dec. 1.

While the development of new weaponry has gained widespread public attention, advances in verification technology and analysis have not. Nevertheless, as in the debate over Soviet underground tests, the science of verification has sometimes played a role in the dispute over arms control policy.

"Our knowledge of seismological methodologies has significantly improved over the past five years," said Thomas H. Jordan, a professor of geophysics at the Massachusetts Institute of Technology, who was chairman of the expert panel. "We have seen a steady advance in capability."

The Defense Intelligence Agency recently completed a separate classified review that includes seismic and nonseismic data, such as intercepted Soviet communications. Some experts who have read the report say the review concludes that seismic information is still the most important and reliable method for evaluating the yield of Soviet tests.

But that has not convinced some Administration officials, who have taken an aggressive stance on the issue of Soviet compliance.

"WE USE ALL SOURCES OF DATA"

"While the seismic community tends to be the most vocal, we use all sources of data when we do the analysis," said Manfred Eimer, assistant director of the bureau of verification and intelligence at the Arms Control and Disarmament Agency.

Mr. Eimer said that further consideration of the issue was necessary, adding he could not yet say if the scientists' report would have an important influence on the Administration's evaluation of Soviet compliance.

Seismology provides a window into the secret world of verification research; much seismic research is unclassified and has application in nonmilitary matters, such as the measurement of earthquakes.

Underlying the debate over allegations of Soviet cheating is a dispute over whether the current Administration view takes sufficient account of distorting effects due to differences in geology at United States and Soviet test sites. The treaty provides for the exchange of geological data, but because the United States has not ratified it, no data have been exchanged.

GEOLOGY IN NEVADA MORE ACTIVE

Experts say the Nevada Test Site, 65 miles northwest of Las Vegas, is more geologically active than the Soviet test site at Semipalatinsk in central Asia. Some of the rocks beneath the Nevada site are believed to be partly molten. In contrast, the Soviet test site "is older, cooler and more stable," said Willard J. Hannon, who manages a seismic monitoring research program of the Lawrence Livermore National Laboratory in California.

As a result of this and other differences, scientists say, some types of seismic waves are stronger at the Soviet test site than they are at the test area in Nevada. Thus, a test explosion in the United States produces a smaller discernible wave traveling through the earth's interior than a Soviet test of the same magnitude.

This anomaly has long been known, and Government estimates of the size of Soviet tests, based on seismic signals, have tried to take it into account by introducing a corrective factor in their calculations. But there

---

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member of the Senate on the floor.
Boldface type indicates words inserted or appended, rather than spoken, by a Member of the House on the floor.

has been a debate over how big the correction should be.

The panel of scientists was commissioned in 1983 by the Defense Advanced Research Projects Agency to determine the size of the correction, or bias value, necessary in figuring the size of Soviet tests. Several other Government reviews, including one by the Air Force Technical Applications Center have also reached the general conclusion that current procedures for evaluating the size of Soviet tests should be changed in a way that would give a lower figure.

To evaluate the distorting effect of different geologic structures on the measurements of seismological waves traveling through the earth's interior, the scientific panel reviewed measurements taken near Ontario of United States detonations. The Canadian site is believed to have a similar geology to that of the central Asian part of the Soviet Union. These readings were compared with measurements from seismic instruments in Nevada.

The panel also pursued ways to estimate the size of Soviet tests by measuring surface waves, which travel in the upper layers of the earth. Measurements of these waves have been distorted by other factors, the scientists said, and they hoped to discover ways to improve their calculations.

"What happens is that the natural stresses and pressures in the earth are released" by the effects of a nuclear blast, said Lynn R. Sykes of the Lamont-Doherty Geological Observatory of Columbia University, who is a member of the study panel. The release of these pressures, he added, is "equivalent to a small earthquake" and has a "contaminating effect" on surface wave measures.

To deal with this problem, the researchers used a mathematical procedure to distinguish between the surface waves of earthquakes and detonations.

A third approach involved readings based on another type of surface wave that bounces around the crust of the earth and propagates over short distances. Important research on this phenomenon has been carried out by Otto Nuttli of Saint Louis University, also a panel member.

1965 SOVIET EXPLOSION STUDIED

The panel scientists also studied a 1965 nuclear explosion that the Russians used to build a dam in the region of the current Soviet test site. Information about that explosion is available in Soviet technical literature.

"All of this is being done in lieu of getting calibration information from the Soviet test site," said Dr. Ralph S. Alewine 3d, the Defense Department research scientist who helped organize the panel. "If we could get onto the Soviet test site and make our own independent estimate of the yield, this is infinitely more valuable to us to calibrate the seismological methods."

Dr. Alewine declined in an interview to discuss the panel's recommendations, but added that "we have the best people in the United States working on this."

But others familiar with the report said that these different approaches also pointed to the need to revise the formula used to estimate the yield of Soviet tests in a way that would give lower measurements.

"The bias value recommended is significantly higher than what is typically used to determine the official estimates of yield," said one expert who has reviewed the report. "Based upon the best estimate, we certainly cannot reject the hypothesis that the Soviets are complying" with the threshold test ban treaty.

The expert, who asked not to be identified, said that measurements using the panel's correction factor showed that some Soviet tests would still be over 150 kilotons. But, he said, "given the uncertainty we would not be comfortable in saying 'we caught you.'"

Mr. Eimer of the arms control agency said that seismic assessments of Soviet test yields still are highly uncertain. A revised method of estimating the yield of Soviet tests would not by itself establish that the threshold treaty is verifiable, he said, adding that additional verification steps would be necessary. The Administration has argued that American experts must take direct measurements of a Soviet test in order to confidently establish the accuracy of its seismic data.

But Mr. Jordan, who was chairman of the review panel, disagreed. "It appears to me right now that we can verify the Threshold Test Ban Treaty with existing national technical means," he said.

SPENDING ON VERIFICATION

The budget for new strategic weaponry in the fiscal year 1985, $17 billion, dwarfed that for research on verification methods. The Defense Department research agency, for example, spent $14 million in 1985 on the problem of verifying nuclear test limitations and test ban agreements.

RESTOCK INADEQUATE MUNITIONS RESERVES

HON. JIM COURTER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. COURTER. Mr. Speaker, there is a tendency among military strategists to only think about the next conflict, without reference to the lessons learned from the last conflict. As our colleague, Congressman DENNY SMITH, points out in his excellent essay from the Wall Street Journal, we may be condemned to repeat the lessons taught by some of the recent conventional conflicts, such as the 1973 Yom Kippur war and our own 1983 Grenada mission.

Specifically, we have paid insufficient attention to our vital stockpiles of war reserve munitions, the very weapons which would be the firebreak between conventional and nuclear conflict. As Mr. SMITH notes, "We have for too long operated under the erroneous assumption that sufficient conventional weapons will somehow be available when they are needed, to ensure that we do not have to resort to nuclear weapons early in a conflict."

Unless some remedial actions are taken soon, we may find that our high-technology military machine, even if it operates precisely according to specification, will run out of mundane but indispensable munitions without any possibility for replacement or resupply. Congressman SMITH makes some specific suggestions for heading off the threat of empty weapons magazines, and I would urge my colleagues to consider these suggestions carefully.

The essay from the Wall Street Journal follows:

RESTOCK INADEQUATE MUNITIONS RESERVES

(By Denny Smith)

The U.S. and its allies must build up their munitions stockpiles immediately. The need for such action is best demonstrated by recounting an incident during the 1973 Yom Kippur War. By day six of that war Israeli forces were close to running out of munitions. Without the help of an 11th-hour massive munitions airlift by the U.S. the Israelis would have been driven into the sea.

The lesson learned? Israeli war planning fell far short in establishing the proper level of war reserves. They, like the war planners of most Western nations, established a war-reserve requirement that is based on a huge gamble, a gamble that war would not come or that a war could be won in a few days.

Alarmingly, the U.S. is in precisely the same condition as was Israel prior to the Yom Kippur War, with one important exception. We have no one to bail us out.

Always present during times of fiscal austerity is the requirement of stretching a military budget. In this budget-stretching game, War Reserve Munitions (WRM) take a back seat to the procurement of glamorous, sophisticated and expensive weapons carriers. Our own Defense Department places the lion's share of money into the procurement of a relatively small number of expensive weapons platforms, and gamble on the notion that either sufficient WRM will somehow materialize in the future or that it is simply not important.

MYTHOLOGICAL JUDGMENTS

The problem with this practice is, if you gamble wrong, you lose a war.

There is an old saying among fighter pilots: "A fighter plane without munitions is just another unscheduled airline." Unfortunately, our own war-reserve planning is based on a series of mythological judgments that may be better suited to operating the world's largest airline instead of winning a war.

In a war, particularly a major war in Europe, our forces are certain to meet a massive number of enemy tanks. At last count, Warsaw Pact tanks outnumbered NATO tanks 2½ to 1. The Warsaw Pact has amassed 50,000 tanks and produces 3,600 more each year. The destruction of a certain percentage of these tanks by U.S. forces in a major war is allocated to the Air Force. The remainder of the task is left to the Army.

For the sake of illustration, let us assume that the Air Force must destroy a mere 10% of these tanks. A "probability of kill" (Pk) is assigned to various Air Force weapons to destroy enemy tanks—probabilities ranging as high as 0.85 Pk (i.e. once the weapon is fired, the assumption is that there exists an 85% chance the weapon will destroy its target). Thus the total number of Warsaw Pact tanks times 0.10 divided by 0.85 would provide a rough estimate of war requirements for a particular munition. From there, a procurement objective is established for the first 30 days and 60 days of a war.

With two exceptions the current Air Force munitions level, even calculated using such a loose set of assumptions as described above, does not approach even the 30-day war requirement. Some other rules of thumb that aren't considered include:

The probability of kill assigned to each weapon is almost always optimistic. The original claim for the Air Force's "Sparrow" missile was a Pk of 0.85. In operation it actually achieved a kill ratio an order of magnitude lower.

In the case of Air Force air-to-ground weapons assigned to kill tanks, the assumption that weapons will be fired only at tanks is a delusion. For every weapon fired at a tank it is probable that 20 will be fired at trucks, armored personnel carriers and other enemy vehicles.

During long storage periods of WRM, weapons "disappear." Faulty weapons and munitions that degrade over time and can be identified are often removed from the WRM stockpile and never replaced. After 10 years less than half of the original allotment may still exist.

Even the strongest advocates of high-tech weaponry and "smart" missiles will acknowledge that 20% to 30% of the weapons will not work due to an inherent complexity that increases their likelihood of failure. When war begins these weapons are worthless, and unfortunately cannot be identified beforehand.

One a war commences, munitions will be lost at a tremendous rate—a factor also not considered in the calculations of WRM. These include munitions that go down with a lost aircraft or resupply ship, those lost when a base or depot is overrun by enemy advances, munitions stored in the Pacific theater while the war is in Europe and munitions lost in the chaos of war.

U.S. war planners are content to gamble on a high-stakes, winner-take-all, short-war scenario that risks lives and jeopardizes the freedom of the U.S. and its NATO allies. Content with less than a 30-day supply of munitions, it seems our war planners must be operating from one of four assumptions:

There won't be a war. This is a wonderful hope, but a dangerous assumption. If our conventional-munitions stockpile is known to be inadequate, our policy represents the opposite of deterrence. In fact, it only makes war more likely since it is an invitation to attack.

There may be a war, but it's one we can win in just a few days. Some people believe a short, vicious blitzkrieg type of war is possible. Possible, yes. But if the Soviets win, we lose. If NATO forces could stop an initial massive Soviet armored thrust there would have to be a second, much longer and brutal campaign to regain our initial losses. With the Soviet's massive advantage in heavy armor, no serious observer believes that NATO would win a short war.

Losing a war is not all that bad an option. No one believes that losing Europe to the Soviets is an acceptable option. Today, the world industrial centers are the U.S., Japan, Europe and the Soviet Union. A new alignment in which Europe is enveloped in the Soviet Bloc would completely disrupt the balance of power.

We'll resort to tactical nuclear weapons when the going gets tough. This option, unfortunately, is all too real. However, it raises serious questions: Will the use of tactical nuclear weapons be allowed in Europe? If so, will their use escalate the conflict to the strategic nuclear level?

Assume for the moment that they will not be used. We then face the specter of embracing option three (losing Europe to the Soviets is an acceptable option) because, as is evident, our pitifully small WRM stockpiles surely do not support the pipe dream expressed in option two (we can win a major war in just a few days). "Use 'em or lose 'em" inevitably will be the driving philosophy as NATO starts to lose a conventional war.

Once tactical nuclear weapons are employed it is certainly a madman's guess as to whether their use can be contained or if one side will escalate into an all-out nuclear exchange.

These scenarios can be avoided. The U.S. and NATO have the resources to ensure an adequate WRM stockpile to deter and quite possibly win a conventional war in Europe if the Soviets attack.

In 1980 the Pentagon budget was $130 billion. Today, after five years of low inflation, that budget is now $300 billion. Yet our WRM stockpiles are still in sad shape. Only 4% of the Air Force's budget, 4% of the Army's and 5% of the Navy's are earmarked for munitions procurement.

The services currently are drafting and revising plans for their FY 1987 budgets. To date, the Air Force has contemplated its needs and decided that 22% of its "cuts" to meet budget constraints should be applied to the paltry 4% of the budget dedicated to . . . munitions.

Even at that, cuts were not applied evenly across the munitions budget. The low-cost 30-mm bullet, the only truly proven and tested antitank killer, was zeroed out. Air-dropped cluster munitions, land mines and other simple munitions took cuts of about 50%. The remaining munitions budget was dominated by two weapons: the IIR Maverick missile and the Amraam radar missile.

Both of these weapons are enormously complex and expensive, and neither has ever passed a genuinely combat-relevant test. But spending for each system approaches a billion dollars a year. Funding of the Maverick was cut about 10%. Funding for the Amraam was actually increased more than 10%.

STRAIGHTFORWARD REFORMS

This week, Sen. Gordon Humphrey (R., N.H.), chairman of the Preparedness Subcommittee of the Senate Armed Services Committee, will begin the first of four hearings to address the problem. Reforms in this area are fairly straightforward.

War-reserve munitions budgets for all of the services should be at least doubled. Also, allowances for munitions loss rates and inefficiencies must be included in future calculations of WRM requirements.

Furthermore, we should not purchase any munitions until they pass sufficient, strenuous testing in combat simulations.

And finally, the 30-day requirement for supply levels should be immediately replaced by a requirement to store enough munitions to last from the start of war until industrial mobilization can sustain a prolonged conflict. This period is typically as short as six months, but could be as long as 18 months.

If the U.S. and its allies are not willing to initiate these steps throughout their armed services they will continue to walk hand in hand down a path that unnecessarily endangers the lives and liberty of free people throughout the world.

FOREIGN GUEST WORKER PROGRAM: AN INTEGRAL PART OF IMMIGRATION REFORM

HON. DAN LUNGREN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. LUNGREN. Mr. Speaker, over the last 7 years I have become quite involved with the immigration reform issue as a member of the Judiciary Committee's Subcommittee on Immigration, Refugees, and International Law. When initial Federal legislation to address the immigration problem surfaced in 1972 and 1973 it was piecemeal in nature. Since that time it has become evident that the broad nature of the problem requires a solution with an equally comprehensive scope. Elements that make up an immigration reform bill must be crafted to work in concert with each other. If we are going to demagnetize the attraction of unlawful employment in the United States, we must have sanctions with respect to employers who knowingly hire those who come here without benefit of papers.

At the same time if we have sanctions, we must not put those who have developed a dependency on undocumented labor in the position of intentionally violating the law or going out of business if they are unable to find a sufficient level of domestic labor. We must have a workable temporary Foreign Worker Program for agriculture that is regulated to protect the rights of American workers as well as those who participate in the program.

The argument is being voiced by those who are opposed to an organized Agricultural Guest Worker Program that California growers are simply looking for a plentiful supply of cheap labor. However, that argument is ignoring the reality of the status quo. Former INS Commissioner Leonel Castillo best characterized the current situation in stating that:

The U.S. is experiencing the world's largest temporary worker program, larger than the guest worker programs in France, Holland and Germany. Only ours is unregulated . . . resulting in the Immigration Service having to arrest over a million persons annually . . . whose crime is that they want to work in this country.

I urge my colleagues to read the following article which appeared in the Washington Post on October 31. This article reveals the plight of the California grower with a small operation, and why many of them can't use thousands of the unemployed workers available. Also, it is pointed out by the reporter that wrote this article, currently workers have no protection under the law and that some growers have housed migrant workers in caves and paid less than minimum wage.

The article reads as follows:

CALIFORNIA GROWERS LOOK TO CONGRESS FOR PICKERS

FOREIGN GUEST WORKER PROVISION BACKED

(By Jay Mathews)

FRESNO, CA.—When members of Congress and labor leaders ask Harry Kubo why Fresno growers need more Mexican laborers to pick their raisins and strawberries, when they ask why can't he use the thousands of unemployed workers already here, he tells this story:

One day last summer a member of the Nisei Farmers League, the growers group of which Kubo is president, asked if he could find 30 workers to pick 20 acres of grapes for raisins when they ripened in a month. Kubo called Doreen Caetano, a job developer for a local community of Laotian immigrants, who said it could be done.

"She kept me advised of her progress. She had found nine; she had found 15; by the time the crop was ready she said she had 25 pickers lined up," Kubo said. "She got up at 4 a.m. and went to round them up and found only nine willing to go."

Most lived on welfare and would lose their benefits if they worked more than 100 hours a month.

Time was short. The grapes were reaching their peak. When the small crew arrived at the grower's farm at 6:30 a.m., Kubo anxiously agreed to give them an hour's training and stay with them through the day.

"But when they started to work, most of them did just the opposite of what they were told. When the grower complained they were too slow, they said they would get at least the minimum $3.35 an hour anyway, so why should they speed it up?" Kubo said. A discouraged Caetano, who confirms Kubo's account, took them away that afternoon.

United Farm Workers union leaders in California's Central Valley have little patience with this episode.

"Why didn't he call us to provide some workers?" said UFW first vice president Dolores Huerta, who argues that growers want more foreign workers only to keep wage rates low.

Kubo's group was formed 14 years ago in response to UFW efforts to picket Japanese-American growers, and the mutual distrust continues to this day.

But Kubo's minidrama crystalizes a new debate that has moved from this lush fruit and vegetable growing region to the Congress:

Do the nation's growers need an additional 350,000 accredited Mexican workers each year, and if they do not get them, will the landmark immigration revision bill penalizing them for hiring illegal immigrants have a chance of success?

Kubo decried what he said is a mistaken impression in Washington, D.C., that California growers are all giants with thousands of acres and millions of dollars to get legislation turned their way.

There are some very large ranches in this valley, but the average Fresno area farm is 90 acres he said. The average for his 1,400-member association—a majority of whom are white—is 74 acres. A crop missed because of a labor shortage can wipe out some small operators.

Impressed by these arguments, the Senate has attached to the immigration bill an amendment sponsored by Sen. Pete Wilson (R-Calif.) that would allow as many as 350,000 "guest workers" into the country each year if the attorney general determines they are needed.

From the late 1940s until 1964, U.S. law allowed up to 400,000 *bracero* workers annually into the country to harvest crops up and down this valley. Charges that growers were providing sub-human working conditions and that *braceros* were remaining in the United States illegally killed the program.

Mindful of this history, Wilson has added provisions requiring proper working conditions and allowing guest workers to move to other jobs if they are dissatisfied.

To ensure that workers return to Mexico, or whatever country they came from, 20 percent of their gross wages would be withheld until they claimed them at a U.S. consulate back home.

Kubo said he and his growers already pay the prevailing wage for farm labor, about $1 above the $3.35 minimum wage, and those who fear immigrants might be exploited should support the Wilson amendment because it would allow the government to monitor wages.

Having won a narrow 51-to-44 victory in the Senate, the amendment is given only an even chance of surviving in the House.

It is attached to an immigration bill that strengthens the Border Partol, offers citizenship to illegal aliens who arrived before 1980 and—most important to growers here—institutes fines and possible criminal penalities against growers who knowingly hire illegal aliens.

Fred Campbell, who needs 40 pickers to harvest his 80 acres of grapes for raisins, said he would have no choice but to risk the fines if the immigration bill passed with no provision for guest workers.

"If we're short of help, the grapes will just dry up on the vines," he said.

His farm has been in his family since 1919, two generations. Campbell pays his workers $4 an hour and provides them with a shed that includes a refrigerator, stove, beds and a door lock for security.

Each year the same men arrive to pick his harvest and dry the fruit. Campbell said he has advanced some as much as $300 on their anticipated wages and never been cheated.

"We're relying on an illegal work force, that's no secret," Kubo said. He extols the Wilson amendment protections for "the human rights of people coming across the border, whose only desire is survival.

He notes that some growers, including one in his area he once reported to authorities, have housed migrant workers in caves and paid less than the minimum wage.

Critics of the Wilson amendment argue that it will not be needed. Enough illegal immigrants will qualify for amnesty under the immigration bill to meet farm labor needs.

Michael V. Durando, president of the California Grape and Tree Fruit League and a Wilson amendment supporter, argues instead that once illegal aliens qualify for citizenship, they will leave the fields for more lucrative, less physically taxing jobs in the cities.

The unemployment rate among legal resident farm workers is at least 14 percent, and much higher in certain California valley towns. But Tony Vang, executive director of the Lao Family Community Inc. here, said that many of those workers need training and find themselves better off accepting welfare than working long hours for wages just above the legal minimum.

Huerta charged that many workers are paid less than that. Asked about grower complaints that local workers are not as productive as immigrants, she said, "Why should they want to work that hard if they should be making twice as much money?"

Sen. Alan K. Simpson (R-Wyo), who voted against the Wilson amendment, has complained of the "greed" of fruit and vegetable growers, a charge that turns the sweet-tempered Kubo sour.

"Is it greedy to want to harvest the crop that you've worked all year for?" he said. "Is it greedy to try to survive in our society without any handouts?"

ECONOMIC OVERVIEW: TOWARD THE BREAKPOINT

HON. JOHN P. MURTHA

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. MURTHA. Mr. Speaker, several years ago, a distinguished Member of Congress wrote a book about the American economy approaching the breakpoint—that is, the point at which major programs start to break down and the economy begins to see major dislocations.

As we near the end of this year and look toward the economic agenda for the coming months, I believe that any assessment of the economic decisions that will face Congress reinforces that we are perilously close to that breakpoint on a number of fronts.

I would like to share with my colleagues some thoughts on those problems ahead and the need to face them.

BUDGET

Congress this year approved the largest budget reduction bill in history, passing the budget resolution calling for $55 billion in budget cuts.

Yet, we still face budget deficits in the range of $200 billion. We passed this year the $2 trillion mark in accumulated debt.

It is hard even to imagine $2 trillion. It is the No. 2 followed by 12 zeros; it is 12 times all the cash in the United States; if counted in pennies with a person taking one penny a second for every 24 hours a day, it would take 63,419 years to count. However it is described, it shows a debt problem that threatens to slow economic growth by eating up the available lending funds in the country.

According to the Congressional Budget Office, domestic spending will have been cut by $333 billion over 1982–87, but that has been offset by $175 billion in Defense Department increases, $604 billion in lost revenue because of tax cuts, and $111 billion in added interest payments to cover the increased debt.

What those numbers add up to is that the budget and its accumulating deficit will have to continue to be the top economic issue we face. The steps we need to take are to continue to attack Government waste, to make prudent budget cuts, and to continue to place every economic decision in relation to its budget impact. As remarks below will note, the budget deficit is affected by our actions on trade, employment, tax reform, and other steps.

Outlook: The President presents his budget early next year and it is likely to stress another round of budget cuts. I believe Congress will respond with a reasonable package of budget cuts coupled with steps in the related areas I mentioned to keep the pressure on reducing the budget deficit.

TRADE

Whether you fall into the camps represented as free traders or protectionists, your conclusion has to be the same: The

present administration trade policy is simply not working.

We face our largest trade deficit in history. We are a debtor nation for the first time since Woodrow Wilson was President. The trade deficit shows no signs of shrinking. Our trading partners show no willingness to help voluntarily. We must shape a firm, tough trade policy.

As chairman of the House steel caucus, I have been particularly involved in the steel trade debate. Its history shows the problems we face.

For 2 years the caucus pushed for import quotas on steel to hold foreign penetration to 12 percent of the U.S. market. The administration has a philosophical opposition to quotas, but we compromised and 14 months ago the administration announced a system calling for voluntary trade agreements with our steel partners that would limit imports to 18.5 percent. Since that would promote progress and relief from imports running at 30 percent, the caucus threw its support behind the plan and has cooperated fully with the Trade Representative's Office.

Fourteen months later, however, we have had to conclude that the import levels remain totally unacceptable and that the program must be redesigned.

For the month of September, steel imports were 30.7 percent, and for the year remain at 26.7 percent. Even if fully implemented, the voluntary agreements would at best result in a limit of only 23.4 percent. And the commitment to full enforcement must be questioned when it is noted that some of our trading partners are deliberatly circumventing agreements by shipping their steel through third countries to avoid import agreements. Proof of this can be shown by the fact that present imports are arriving in the United States from 18 countries that do not even have steel mills.

In the meantime, in the year of this program, unemployment in the steel industry has risen by 13 percent, and the long list of quarterly reports of losses by American steel companies have remained.

We are at a breakpoint where import limits must give the American steel industry a chance to modernize and streamline, or we will lose the basic manufacturing capacity of our Nation.

That example can be followed in other key trade areas—most notably textiles, shoes, and electronics—with the result that our economy loses growth, jobs, and profits. We cannot count on our trading partners to solve our trade problems. We will have to get tough on trade to stabilize our economy.

UNEMPLOYMENT

The breakpoint on unemployment comes from self-delusion. The idea that we are doing a pretty good job.

When I graduated from high school in the 1950's, we were doing a good job if unemployment held at 2 percent; by the Kennedy administration that became 4 percent; now we are hearing that the economy is doing pretty well while unemployment is at 7 percent. That simply is unacceptable.

When you add in discouraged workers who have simply stopped looking for employment, part-time workers who would prefer to be full time but are not counted among the unemployed, and underreporting among teenagers, we are looking at 10 million Americans being out of work and without good job prospects. We simply cannot accept that kind of permanent unemployment in America.

In addition, I talked earlier about how these economic issues are interrelated. Note that for each percent of unemployment the Federal budget loses $30 billion in lost taxes not paid and payments made to help protect unemployed families.

One of the parts of our equation of solving the budget deficit breakpoint, must also be to put Americans back to work and I expect Congress in the coming year to focus more on this problem as unemployment continues to hold at the 7-percent range.

TAX REFORM

We will have a chance in 1986 to complete work on a tax reform bill that will sharpen the minimum tax to insure that millionaires and profitmaking corporations pay taxes, and to eliminate some loopholes. Prospects for a major redrafting of the Tax Code seem further down the line.

But a message has been delivered this year that the citizens find our Tax Code too complicated, too unfair, and too inequitable. The tax reform issue will remain with Congress until we can develop a consensus for changes that meet those goals.

This brief overview of economic problems helps illustrate the breakpoints which we face. It cannot be business as usual because of the severity of the problems and because of their massive impact on our lives. They affect both the overall stability of the Nation, and our individual stability through their impact on interest rates, jobs, inflation, and consumer prices.

TRIBUTE TO HUGH M. BATES

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SHELBY. Mr. Speaker, Hugh M. "Lally" Bates of Clanton, AL, was recently elected president of the National Association of Postmasters of the United States [NAPUS]. This is indeed a great honor for his community and the State of Alabama.

Alabama NAPUS President Cody Ward had the honor of making the nominating speech for Lally in his bid for the office. I am extremely proud of my friend Lally, and would like to share with my colleagues in the House of Representatives, Cody's remarks and Lally's acceptance speech.

WARD NOMINATES BATES

President Tom, distinguished guest, fellow postmasters—there is a man in our midst who is endowed with relentless courage, vision, ability and profound faith in NAPUS and the U.S. Postal Service. He has exemplified this during the past 20 years as a postmaster in Clanton, AL and as a champion among leaders in NAPUS.

His leadership ability and loyalty to NAPUS and the Postal Service is unquestionable in his home state of Alabama. He served his chapter faithfully in every capacity imaginable, and in 1977 earned the rights to our state presidency. The Alabama Chapter reached new heights under his leadership, which have been unequaled. He has used his talents and experience to help each state president since that time; aiding postmasters in trouble, as chairman of our state Postmaster Representation Committee; and helping us all by using his political clout and powers of persuasion in the halls of Congress, as our state legislative chairman.

Most of you know him for his faithful service to our national office over the past years. He has served us all, as national executive committeeman two times, as national membership chairman, national vice president, and on our National Postmaster Representation Committee. During these terms of office, he has proved over and over he is truly a champion of leaders.

In his hometown, he is considered by all a genuine community leader. Besides being highly respected for his role as a loving husband, and father of three, and grandfather, he also is serving or has served as chairman of the hospital board, chairman of the school trustees, commander of the American Legion, commander VFW, chairman county Civil Defense, chairman industrial development board, director Clanton Housing Authority, he is a Shriner, and has assumed numerous other community leadership roles.

He was raised in humble surroundings with ten brothers and sisters and two loving parents. He learned early in life the way to success was hard work and high moral standards. The Marine Corps recognized he was a man of courage and conviction, with the ability to lead others, when they made him a squad leader during the Korean War. When his three years were over in Korea, he had proved them right many times. When he returned home, he had earned three Purple Hearts, three Battle Stars, and a Bronze Star.

We need his proven courage, conviction and leadership ability fighting for us now. Because we, too, are in a war for survival. The Postal Service has more enemies today than ever before, waging war against us much like the enemy in Korea and Vietnam. They are not always easily recognizable. Because we have enemies from within, as well as outside the Postal Service. This ex-Marine is prepared to lead us in this war, with the same courage and conviction he led those Marines with in Korea. He will help us seek out our enemy, and will lead us in each battle.

He will join us with our allies to make our numbers and strengthen even greater. Yes, this will be a different battle field, with different rules, but it too will be won, only if our leadership has the courage with conviction to fight and win at all cost.

I deem it a personal honor to have the privilege of placing in nomination the name of just such a leader for our national president, the Honorable Hugh Bates.

BATES ACCEPTANCE SPEECH

President Costin, Secretary-Treasurer Graves, members of the executive committee my fellow postmasters, postal officials, friends and guests:

Today, with a sense of grave responsibility, and a heart filled with humility, I accept the office of National President of the National Association of Postmasters—of this great United States of America.

I could not give this acceptance speech without first passing out many roses to so many wonderful people.

First, to each of the other five postmasters who offered their time and service to our organization, I want to congratulate them and to praise their valiant efforts. Each of these postmasters has given much to NAPUS and I trust they will continue to serve wherever they are needed. To President Costin, for his leadership during these two years, we all owe a thank you for your tireless efforts.

There are many people in this convention center who are responsible for my election. Too many to recognize individually, but I must pay a tribute to all of you who worked so hard and gave so much that I might be before you today.

To the Alabama Chapter—my chapter—I can never repay you for the sweat, the pain, the agony, the tears of sadness and the laughter of happiness that we have shared together. I want everyone in Alabama to stand, so the rest of the world can see. The greatest friends a postmaster could have.

Part of my family is here and many could not be with me to share in this moment of glory. To those who are with me, and I would like for them to stand; my wife, Janie, my son, Mickey and his wife, Barbara; my daughter, Vickey and her husband, Jerry.

Last night as I lay down and thought that I could at last rest, I recalled the thousands of miles traveled, by plane and automobile and one trip by train. Of all the beautiful cities, farms and states that I had visited. It seems as if a long dream had at least come true.

I thought of the times my feet and legs were so tired that I could not stand. Of all the hours spent in airport terminals, of the lonely drives by automobile. Many times I questioned myself and wondered why any person would do this to become president. My friends, as I look out at this vast group, I no longer question myself, my question is answered. Yes, it was worth it.

Today is today, I am totally rededicated to every challenge and obstacle that lies ahead. There is nothing that we cannot do and I am confident that we will each time we face adversity.

Many of you have heard me speak briefly about what I propose to do and what direction I plan to lead this organization. The late football coach, Vince Lombardi, wrote a book entitled What It Takes to be No. 1. He said winning is a habit. I intend to keep that habit. Running a football team is no different than running NAPUS. The idea is to be No. 1. To win every battle or skirmish that we encounter.

My fellow postmasters, it's a reality of life that we are competitive and the most competitive battle will draw the most competitive opposition. I will not accept second place or compromise when it comes to the welfare of postmasters. As Coach Lombardi said, "I am not a brutal man. I believe in God and I believe in human decency, but I also believe that the tougher the battle, the sweeter the victory."

Today the United States Postal Service faces a grave crisis. I do not need to remind you all of the problems we face daily, of the injustices that we have suffered, of the reduction in service. You know these as well as I. The problem that confronts this service was not caused by postmasters, it was caused because those in command would not listen to postmasters.

The budget deficit was created due to the Postal Rate Commission refusing to admit what they knew to be the truth. A one cent increase in postage would eliminate a $700,000 deficit.

The Board of Governors, by a unanimous vote, could have overruled the Rate Commission, but they did not choose to do so. This deficit crisis is the direct result of top management, and as your president, I will not sit idly by and see you persecuted for their mistakes.

You, as a postmaster, have no control over your workload or over the rates charged and revenue generated. You don't determine the pay scale of your employees or who sets up the transportation of your mail. All this adds up to one thing: we as postmasters don't have control over operating our post office, yet we are given a budget, then have it cut three times and then harassed because the top management won't take the blame for their errors.

The Board of Governors delayed implementation of the rate increase, from October 1984 to February 1985, thus throwing out almost $900 million in revenue. Yes, as a management organization, we are concerned and we want the U.S. Postal Service to succeed, but not oiled to run on the blood of postmasters.

I know you are interested in the programs I intend to implement. This will be the first administration that consists of 22 elected national vice presidents. Every area of this country will be adequately represented by a postmaster of your choice on the National Executive Committee. I intend to see that each of these officers is working and involved in your interest. I plan to involve at least two of them at each consultation meeting with headquarters staff members. I will expect to present from personal knowledge the problems facing postmasters in their areas.

It will be their responsibility to visit the chapters they represent and to report back to their people the progress that has been made in solving these problems. These 22 vice presidents will be more involved than ever before. Each month I will expect to see columns in the Postmaster Gazette, written by national vice presidents. They will also represent the national office at meetings when requested.

Yes, we will have a large National Executive Committee, but let me assure you, NAPUS will benefit from their knowledge and expertise.

Let me comment on H.R. 2854, which will give all non-veterans access to the merit systems protection board. As a member of the National Postmaster Representation Committee, I know the importance of this bill. As your National President, I will give top priority to the passage of this bill.

On communications, I intend to activate the tape program and give first-hand information to the chapter officers on the day of each consultation meeting.

The Output will continue to be mailed to each member and on a timely basis.

The Postmasters Gazette will continue to be a magazine of interest to NAPUS members. We will continue to use regional editors to keep us informed. I will expect an update each month from these writers to appear in the Gazette.

I promise you this, that your magazine, The Postmaster's Gazette, will be printed and mailed on time each month. If it is not, those responsible will be relieved of their duty.

On the closing or retention of small post offices, let me assure you, nothing is more dear to me and nothing will take preference over my time in saving every office in this United States. I will use every ounce of energy within me and every means at my disposal to save the post offices in rural America, just as I will fight for the job protection of every person in the PCES program. While protecting rural mail service, I will not neglect the city delivery or MSC manager. The harassment and intimidation of our MSC managers by higher level officials must cease at once. I say to all who hear me or read these words, for those who would destroy our organization, we shall not retreat, we will face those who oppose us, eyeball to eyeball and cheek to cheek.

In the field of legislation, we must continue to grow stronger each year. We have witnessed our legislative efforts pay dividends, but we cannot rest on our previous accomplishments. Each year we will be confronted by those who oppose the U.S. Postal Service as we know it now. We must continue to be on the offensive and stay one step in front of our opposition. We must have a strong and healthy legislative fund. You have assessed yourself 12 dollars per year capita. How much of this money you return to National Headquarters will be your decision. However, I will present to you early in 1986 a budget of what it will cost to have an effective legislative program. I have faith in you, that you will respond as needed. Our position as postmaster and our retirement is on the line. I will give you a detailed analysis of receipts and expenditures of this fund, just as I will of all other NAPUS monies.

Speaking of money and what it can do, we must and we will continue to have an active political action program. This will, as in the past, be lead by the retired postmasters. I will assist this committee in any way possible.

There is much work to be done by all the committees and their members. Without going into details on each committee, I must comment on the Postmaster Representation Committee. Having served on this committee for the past three years, I have witnessed the case load each year. In 1985 alone, I as one member, have represented 15 postmasters. This committee must be and will be strengthened by the executive committee. I will ask your governing body of elected officials to increase the budget for this committee. Additional training will be provided to the members. The first training session will be in early January or February.

When thinking of postmaster representation, I am reminded of the famous words of John Paul Jones. When the British admiral asked, "Do you surrender?" Jones answered "I've just begun to fight." NAPUS has only begun to fight.

In membership, we must maintain above 90% at all times. NAPUS can be only as strong in Washington, D.C., as we are back home.

Residency requirements:

This is a subject that must be settled. We have heard much talk on this, but we have not witnessed action. To those of you who have been promoted to the rank of postmaster and required to sign Form 2459, stating that you would move to the delivery area of your office, within one year, let me enlighten you why this was made postal policy by postal service headquarters.

A certain postmaster was promoted from one state to another. The citizens of this community did not approve of this selection and went to their U.S. Senator. This Senator threatened to enact legislation that would amend the Postal Reorganization Act to require a postmaster to have been a resident of this delivery area one year before they could be appointed postmaster. Headquarters bowed to the pressure and compromised with this Senator, that a postmaster, once appointed, would move to that area in one year. This was an indication of weakness on the part of headquarters, when we should have challenged this threat and any others who supported threatening bills.

I, as your president, will insist that all residency requirements for all postal employees be abolished. I will seek the support of all other management organizations, as well as the crafts.

I live in my town and have no intention of ever leaving. However, how can we ask a Level 11 postmaster to move 100 miles, when the Postmaster General, his staff, the regional postmaster generals, the district managers and their subordinates, can live in their palaces, in the neighborhood of their choosing?

This is a case of discrimination in the worst way, and as your president, I am prepared to use whatever measures it takes to repeal this requirement.

In my opening remarks, I made a statement that coaching a football team was no different than leading NAPUS. I am reminded of our present dilemma, by words of the late Alabama Coach "Bear" Bryant. His team was playing the Sugar Bowl for the national championship. The opponent had first down and goal to go, from the three yard line. He called time out. The defensive captain came to the side line and asked Coach Bryant what defensive formation should they use. Coach Bryant simply looked him straight in the eyes and said, "Son, this is gut check time. If you and your teammates have got the guts and internal fortitude to want to win and be the best in the land, then you will give it all you have for four downs and you can walk out of here as champions." Yes, this is gut check time for all of us.

My fellow postmasters, if we are willing to pay the price, sacrifice when the need arises, we will walk away as champions.

As your newly elected president, I realize there will be occasions when I must make unpopular decisions with some. But my responsibility does not stop there. The president has a duty to decide, but the postmasters have a right to know why and the president has a responsibility to tell them and to explain why he chose as he did.

Only through an open, candid dialogue with the members can a president maintain his trust and his leadership. In order to lead, a president today must listen; I intend to listen.

The president of NAPUS is the one official who represents every postmaster—small office or large office. He represents the thousands who ask principally to go their own way in decency and dignity. Only if he listens to the quiet voices can he be true to this trust.

The president's chief function is to lead, not to administer.

As Theodore Roosevelt once put it, "The best executive is the one who has sense enough to pick good people to do what he wants done, and self restraint enough to keep from meddling with them while they do it."

This I promise I will do.

As I compaigned across this nation for the past two years, I travelled over 70,000 miles, visited 45 of the 51 chapters. During these times I asked you to send a message to Washington and to send that message by Hugh Bates. That message was that we no longer will turn the other cheek, that we are tired of harassment and intimidation.

You have now elected me as your spokesman for the next two years and by the grace of God, I will take your message to Washington.

In closing, I want to quote three great Americans.

Andrew Jackson said, "One person with courage makes a majority." I pray for that courage and I solicit your prayers that I may have the courage to be that majority.

Andrew Carnegie stated these words: "As I grow older, I pay less attention to what men say, I just watch what they do."

Ben Franklin, our first Postmaster General, is quoted as saying, "Well done is better than well said."

I trust that when my two years are finished, that you will say, Hugh Bates, your job has been well done.

God bless each of you.

INSURANCE CRISIS HAS WIDE IMPACT

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FLORIO. Mr. Speaker, my subcommittee has commenced a series of hearings regarding the unaffordability and unavailability of insurance. The following article from Fortune provides an overview of the causes and impact of the insurance crisis. The article may be useful background for Members as they respond to the many inquiries Congress is receiving. It is very clear from the article that the insurance crisis poses a major economic threat and that the crisis itself may be only a symptom of even more fundamental problems.

The article follows:

[From Fortune Magazine, June 10, 1985]

NAKED CAME THE INSURANCE BUYER

(By Carol J. Loomis)

Going bare is the term for getting along without property and casualty coverage. In a litigious world it's a chilly, unwelcome experience for corporations. But a sudden seller's market has made commercial insurance a hard-to-get, expensive-when-you-can item.

Insurance companies have more than one way of refusing your business, says Norman S. Wintemute, who buys coverage for BankAmerica: "They can simply say no. Or they can quote you a fantastically lousy price."

BankAmerica has met both kinds of rejection in the last few months and so have hundreds of other corporations. With a suddenness that has astounded and horrified corporate buyers, the market for commercial property and casualty insurance has turned wicked. Premiums have risen broadly and, for some types of coverage, are up enormously—by 300%, 500%, even 1,000%. The availability of insurance, nevertheless, has sharply contracted. Many corporations do not have as much coverage as they would like, and for some kinds of potential losses have none at all.

In insurance parlance that leaves them "going bare," and most seem appalled at the exposure. In the past the insurance industry, that spreader of risk, has been the fallback in most corporate disasters. Union Carbide, for example, is believed to have $200 million of coverage for the tragedy at Bhopal, India—an amount of uncertain adequacy but balm nonetheless. Bhopal, however, qualified as "sudden and accidental pollution," a type of coverage now extraordinarily difficult to buy. The probability of a large corporate loss that is not covered by insurance, or only covered meagerly, thus increases daily—as does corporate dread of the event.

The dread is particularly great because most corporations have grown in recent years to want more insurance, not less. Asbestosis, toxic waste, the general litigiousness of society, the tendency of judges and juries to reinterpret the legal doctrines of negligence and fault—all these have driven home the need for bountiful insurance protection. And now it's in scarce supply.

Rivers of tears for the buyers are not totally justified. The property and casualty business is relentlessly cyclical, and for five years before the market turned last year, corporate customers enjoyed a hotly competitive, ever-softening market. Originally, insurers cut prices to haul in premium dollars they could invest at the high interest rates that prevailed ultimately, they scrambled for premiums to cover the claims rolling in from the bad business they had underwritten. In that leg of the cycle, prices for commercial insurance fell in some cases by 50% or more.

The corporate folk who buy insurance—called risk managers—knew prices were absurdly low. But few argued for a return to sanity, naturally, and some abandoned their traditional suppliers to shop for the cheapest prices around. They are now riding a ricochet. A threefold rate increase sounds punitive; but if the base rate is one-third what it was at the last peak—and such cases exist—the rise is no more than restorative.

Wretched results for the insurance industry in 1984—around $3.5 billion of pretax operating losses—produced the ricochet (see chart). Reinsurers, who assume some of the risks that primary insurers underwrite, finally forced the end to the soft market. Throughout the year the reinsurers jacked up premiums and retreated from some lines of business, putting pressure on primary insurers to follow suit. Then, on December 3, came Bhopal, rocking the market just as insurers, reinsurers, brokers, and customers were negotiating renewals for the great number of commercial policies and reinsurance treaties that expire on January 1. Using a metaphor that is unintentionally ghoulish, one broker says Bhopal "put the last nail in the coffin" and "scared the living wits out of reinsurers." A tight, tough sellers' market promptly materialized and has worsened since.

The most tangible part of the problem is the increase in premium rates, which is wrecking corporate budgets approved last fall. The risk manager of a major financial services company says his expenditures in 1984 for insurance—65 different packages of it—were about $8 million. For 1985, anticipating some tightening in the market and wanting if anything to overestimate the bill, he budgeted $10 million. "Today," he says, "it's looking like $24 million or more. We're writing the numbers on plastic now, with crayon, so they'll erase easily."

For their money, companies are getting substantially less coverage, at both the top and the bottom, than they got in 1984. At the bottom, businesses are taking higher "retentions"—deductibles, so to speak. At the top, where the slice is thicker, businesses have lost the high dollar limits they prize as protection against catastrophes.

Why, given the law of supply and demand, aren't the high limits available at a price? Maybe they are. Perhaps the buyers just haven't yet begun talking prices that would bring the supply out.

But another explanation is the so-called capacity problem, a creature of insurance regulation. Trying to make sure that policyholders' claims can be paid off, state insurance departments judge the soundness of insurers on easily measurable criteria. One, called the risk ratio, relates net premiums written (new and renewal premiums minus those passed on to reinsurers) to an insurer's surplus, roughly equivalent to net worth. The rule says that the premiums-to-surplus ratio should not be more than 3 to 1.

The ratio puts a crazy kind of ceiling on insurers during a tight market. They usually enter such a period with surplus depleted, driven down by losses. Were they to choose the most obvious means of getting well—the pursuit of every premium dollar possible—they would soon have a risk ratio unacceptable to the regulators. Consequently, the insurers plead "capacity constraints" to their customers and do not write all the business they can get. They also turn conservative in their choice of what types of risks they will insure. Says Robert Clements, president of the insurance brokerage firm of Marsh & McLennan Inc., "When you have a great contraction in the market, the industry first leaves the area of unpredictable risk."

The exodus is speediest from "excess" coverage that companies seek atop their primary insurance policies. An example is earthquake insurance, on which insurers have done an abrupt about-face. In the soft market, a company could secure $300 million or $400 million of excess quake coverage with ease. It could also get the excess, says broker Daniel Batonick of Johnson & Higgins, almost as a freebie, tossed in with other kinds of property coverage. The probability of a U.S. earthquake cannot be much greater this year than last. Yet today $100 million of excess coverage is about the most a buyer can pull together. "Even with a blank check, we may not be able to get more than that," says Helen Terry, risk manager of Equitable Life, a big owner of California real estate. Terry figures the insurers, focusing on the immensity of their exposure, "finally began to notice how much at risk they are."

High limits are also vanishing from the liability policies that cover such professionals as doctors, lawyers, accountants, engineers, and architects—prime targets of litigants these days. Accounting firms, for example, have proved exceedingly vulnerable to suits charging that they wrongfully gave clean opinions to clients later revealed to be dishonest or financially in deep trouble. Since 1980 the biggest accounting firm, Arthur Andersen & Co., has alone paid out $137 million in judgments and out-of-court settlements and faces many other suits. In what could be a monster case for Alexander Grant & Co., one of its partners is caught up in the litigation involving ESM Government Securities, a Florida dealer charged with defrauding customers.

Lloyd's of London writes most of the accountants' liability insurance and has grown highly nervous about the profession's exposure. Taking steps to reduce its own, Lloyd's just renegotiated policies with a number of Big Eight accounting firms, lowering their limits by about 35%. Accountants won't say what the new maximum is, but a reasonable guess is $125 million or so.

U.S. money center banks also insure with Lloyd's, long the principal provider of the fidelity bonds the banks need as protection against robberies, embezzlements, and other crimes. The lead underwriter in this business in Lloyd's Merrett group, which manages several syndicates of investors. Hit lately by heavy losses (most arising from the dishonesty of bank employees), Merrett first considered withdrawing from the business, but instead imposed higher deductibles on the banks. A couple of years ago deductibles of $2 million or less were common. The norm now is $10 million and Merrett is pushing for $25 million—what Marsh & McLennan broker Walter S. Tomenson, Jr. calls "Merrett's comfort level."

The banks have run into bigger problems in the excess market. At the moment, $150 million of coverage is about the maximum available to a money center bank and limits that big are an endangered species. Financial institutions of all kinds were shocked in March by a sudden announcement from Fireman's Fund, a subsidiary of American Express, that it was canceling all fidelity policies written for financial institutions and would write no more. Fireman's Fund had been a major player in the excess market, able to write a $50-million layer of coverage for a single buyer. But losses on the business had been large and in its announcement Fireman's Fund said it saw neither vigilant screening of risks nor pricing as a solution—so goodbye. The rejection of pricing as a cure suggests the company may have also felt hobbled by its premiums-to-surplus ratio, which at year-end 1984 was nearly 3 to 1, against the industry's average of only 2 to 1.

Companies needing pollution coverage find themselves in the ultimate sellers' market. Growing apprehensive in the early 1970s about pollution liability, the insurance industry divided coverage into two kinds. Coverage for sudden and accidental pollution was included in the general liability policies that businesses buy; it is meant to take in a Bhopal, as well as such occurrences as the spillage of toxic chemicals from an overturned truck, the accidental discharge of harmful effluents into a stream, or an explosion in a manufacturing plant. The second kind of coverage, known as environmental impairment liability, is written under a separate policy and is intended to cover gradual pollution, such as the seepage of buried toxic wastes into underground water supplies. Under Environmental Protection Agency rules, companies handling toxic waste must have both environmental impairment and sudden and accidental insurance, or the financial strength to handle the claims on their own.

But the insurance industry considers environmental impairment risks unmeasurable and therefore uninsurable. You cannot make insurance companies commit suicide, and today almost none are writing environmental impairment policies. At the annual convention of risk managers in April—held, appropriately, in the city of funeral blues, New Orleans—one speaker, broker Robert M. Grella of Alexander & Alexander, named the three suppliers remaining in the market: American International Group; St. Paul Fire & Marine; and Pollution Liability Insurance Association, a consortium. None, Grella said, could offer a buyer more than $10 million of coverage. A speaker from St. Paul Fire & Marine, Kenneth F. Goldstein, contributed further qualifiers, among them his yen to contain risks by doing business only with relatively small companies. Said he: "We're not looking for Fortune 1,000 accounts."

In the other part of the environmental market, meanwhile, the courts have been redefining sudden and accidental pollution to include the gradual variety. Robin A. G. Jackson, a director of Lloyd's Merrett Syndicates, describes the courts as having "driven a hose and cart through the sudden and accidental wording," making it "foolhardy" to continue to provide that coverage. Agreeing, the U.S. industry is scheduled to move in January to a standard general liability policy that will specifically exclude most forms of pollution coverage. Many insurers have already stopped writing sudden and accidental. It can be had, says Grella of Alexander & Alexander, but not easily.

The prospect of going bare in this danger-laden area frightens many corporate executives, among them Gerald A. White, chief financial officer of Air Products & Chemicals of Allentown, Pennsylvania. White counts himself lucky to have renewed his general liability policy last September, before the crunch. He's covered for sudden and accidental, but he worries that the coverage might not be renewable next fall, when many forecasters expect an even tighter market than now. "What we have here," says White, "is a major, major problem for industry. It is not just chemical companies, it's everybody."

In April, Air Products sold $100 million of bonds in an offering managed by Goldman Sachs and Shearson Lehman Brothers. As they must, the underwriters went through the "due diligence" process with White, digging for information that might have to be disclosed to investors. Considering the major problem that insurance has become for corporations, did the underwriters quiz White about Air Products' coverage? "No," he answers, recognizing the irony, "they never mentioned insurance."

Risk managers are searching madly today for solutions to the problems of high premiums, high deductibles, low limits, and making-the-boss-understand-why-all-this-is-happening. For some companies, one approach to the deductibles could be to relax and regard them as logical. They are a limited form of self-insurance (the industry's euphemism for no insurance), and many companies can easily handle the added risk.

In the eyes of some buyers high deductibles are perfectly affordable but unfortunately apt to cause lurches in earnings. That's because accounting rules do not allow companies to gradually build reserves for anticipated insurance losses by making periodic charges to earnings. Instead, the companies must wait until the losses come along and only then charge off the costs. The rules do not promote smoothness in earnings, as premiums paid to an insurer do.

In the last tight market, in the mid-1970s, captive insurance companies were the rage among corporations seeking to self-insure. But the Internal Revenue Service has since pared the tax advantages of captives, and some have also been economic disasters for their parents. Certain companies, however, still find special reasons to set up captives, and Bank- America has just done so. Forced recently to take a $95-million write-off on overvalued mortgage securities for which it

was trustee (Fortune, April 1), the company sued several of its own officers for gross negligence and also filed claims against the two insurers carrying its directors' and officers' insurance. One, First State, had earlier given notice that it was canceling BankAmerica's policy; it's one of many insurers cutting back on this type of coverage (Fortune, March 18). The other, Employers of Wausau, maintained that the policy did not cover the bank's action against its officers and canceled when the claim was filed. BankAmerica sued both insurers. Meanwhile its director of risk management, Wintemute, began searching widely for replacement coverage. But Wintemute ran into those two types of rejection: no and, from one insurer, an out-of-sight price. This presented a thorny problem: under the laws of Delaware (where it is incorporated) BankAmerica cannot reimburse its officers and directors if they are held liable for damages in suits brought on behalf of the company. They must be covered by an outside insurer.

BankAmerica has created one, so to speak: a captive, based in the Cayman Islands. Wintemute says the captive will deal with the parent at arm's length and will thus be sufficiently independent to meet Delaware's requirements. But some bankers and insurance executives say it's all legal hogwash, since BankAmerica's assets will be behind the captive. BankAmerica's directors and officers no doubt devoutly hope that this exotic solution can survive challenge. Otherwise, they are going bare—a far chillier experience for a flesh-and-blood businessman than a corporation.

Focusing on more conventional alternatives than BankAmerica has available, many corporations are now intently studying the possibility of banding together to form captives. The scheme has worked in the past for certain industries denied coverage: Nuclear Electric Insurance Ltd. insures nuclear power plants against damage. Oil Insurance Ltd. (known as OIL, naturally) insures offshore drilling rigs. Today, the New York clearinghouse banks are considering the formation of a captive. Then there's ALAS and ALAC, midwifed by Marsh & McLennan, a whiz at acronyms. ALAS (Attorney's Liability Assurance Society) was incorporated some years ago by law firms based outside New York City. ALAC (Accountants' Liability Assurance Corp.), just being formed, will provide coverage for medium-size accounting firms.

Marsh & McLennan is now working to form ACE (American Casualty Excess Insurance Co.), by far its most ambitious undertaking. As visualized by Clements, the broker's president, ACE would be a $100-million or bigger stock corporation capitalized by insurers and their corporate customers. The company would specialize in excess insurance and would sell only to its owners (who might also cash in later through a public sale of the company). Clements thinks innovations such as ACE are essential if business is to get the coverage it needs: "The loss of high limits of coverage is not going to be acceptable to corporations."

The problem for any industry captive born out of dire need is that it is a refuge for parties that cannot get insurance elsewhere. That makes it a victim of "adverse selection," in which it attracts more than its share of inferior risks; this can drive away prospective members. If you are a New York clearinghouse bank, do you really want to insure other high-wire acts just like your own?

In a chaotic market like today's, all the questions are hard—but answers will develop. Prices will surely rise further. Supply will surely increase. Outsiders will come in to add their capital; the industry will expand its own, partly through profits to be made in this market, partly through securities offerings that insurers are already scurrying to make. The inbalances in this market may, nevertheless, take time to correct, if only because buyers may have to be hauled kicking and screaming toward the prices necessary to clear a market grown paranoid about risk.

A TRIBUTE TO THE UCLA BRUINS

HON. MEL LEVINE

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. LEVINE of California. Mr. Speaker, as the UCLA Bruin football team continues its rise in the national rankings, it is appropriate to recognize the man most responsible for UCLA's success this year, and for the last 10 years, head coach Terry Donahue.

Coach Donahue's list of accomplishments at UCLA is impressive. He is the winningest coach in UCLA history with a combined record of 77–30–6. His team has won New Year's Day bowl games for 3 years in a row—something no other college coach has ever accomplished. And, he has beaten cross-town rival USC for 3 years in a row. It has been 20 years since UCLA can boast of such an accomplishment.

Perhaps more important than his accomplishments on the football field is his reputation as an outstanding member of the community. His reputation is perhaps best summarized by the experience of a local newspaper, which after trying in vain to find someone to say something negative about Donahue declared him "a saint in coach's clothing."

Last Sunday the Los Angeles Times ran a long article about Terry Donahue. I would like to include it in the RECORD. It is a fitting tribute to an outstanding football coach and a remarkable man.

[From The Los Angeles Times, Nov. 4, 1985]

A TRIBUTE TO THE U.C.L.A. BRUINS

(By Tracy Dodds)

Somewhere, J.D. Morgan was smiling the night that Terry Donahue became the winningest coach in the history of UCLA football. Somewhere, he puffed out his chest and gave a nod of approval, proud of his young protege and proud of himself. He had played a hunch and he was right, again.

J.D. didn't live long enough to see Donahue set the record, but he lived long enough to see that he had been right about Donahue.

He'd had confidence in the 31-year-old assistant coach whom he promoted to head coach in 1976.

Ten years later, Donahue has a record of 77-30-6 and has broken Bill Spaulding's record for most victories by a UCLA coach.

Donahue has nurtured a strong and reputable program at UCLA.

For three straight years, he has won a bowl game on New Year's Day. No one else in the country has done that.

He has also beaten the age-old stigma of being the little guy in town. He has beaten USC three years in a row. Until he came along, that hadn't happened since 1955.

Along the way, Donahue has become one of the premier college coaches in the country.

So when Donahue broke Spaulding's record of 72 victories with one over San Diego State at the Rose Bowl earlier this season and accepted, in commemoration, a little crystal Bruin, he had the late J.D. Morgan high on his list of people to thank.

He said that Morgan had given him an opportunity when, perhaps, he wasn't even ready for it.

"Oh, I never would have admitted it at the time, because at the time, I thought I was ready," Donahue said. "There was no question in my mind at the time that J.D. hired me, that I could do the job.

"What I am trying to say is that I certainly was not the most qualified for the job. When J.D. gave me the opportunity here, he could have selected umpteen-hundred coaches who were basically more qualified at that point in time than I was to be a head coach.

"The reason I got it was because, at that time, there was no search committee. I was 31, an assistant. A search committee would have gone out and found a big-name coach or someone with a lot of experience, an older assistant coach. J.D. didn't have to do that.

"I never felt I couldn't do the job, but as I reflect back on it 10 years later, I wasn't as far along as I thought I was—just as a lot of players aren't as good as they think they are.

"J.D. took an unbelievable gamble. He took a big chance hiring me with no proven credentials, no track record as a head coach."

Now that J.D. has been proven correct, it seems like an easy enough choice. But it wasn't always so.

A lot of things have happened in the 10 years that Donahue has been the coach at UCLA, most of them good. Some, of course, have not been so good, and some have been downright embarrassing. Donahue has handled than all, good and bad, one game at a time. And there is lots of game-playing in the coaching game.

Donahue has a way of chalking up victories. Any kind of a setback is, at least, a moral victory in some way. Or a steppingstone to a victory on another day. In every case, Donahue, himself, emerges with his impeccable image intact.

There were some who thought that Morgan had made a stop-gap decision or a too-quick decision when he promoted the young assistant coach three days after Dick Vermeil had quit in February of 1976 to take a job with the Philadephia Eagles.

It was the height of the recruiting season, a week before signing day. A quick decision was needed. But Morgan obviously had had his eye on Donahue for years.

Even at 31, Donahue had a strong reputation among coaches. And he had already proven his grit at UCLA.

Donahue grew up in Los Angeles, the son of a physician, one of five boys and always wanted to play football for UCLA. When he wasn't recruited at Notre Dame High School in Sherman Oaks, he started to work his way in. He walked on a San Jose State and then at Valley College and then, finally, at UCLA.

Bill Barnes was the Bruin coach who gave the 6-foot, 190 pound defensive tackle his

first chance, red-shirting Donahue in 1964, but Tommy Prothro was the coach when Donahue started in the Rose Bowl game on New Year's Day, 1966.

His start in coaching was much the same. Soon after Donahue had been promoted to head coach, Pepper Rodgers told this story:

"When Terry graduated from UCLA, he wrote me and said he wanted to come to Kansas as my graduate assistant. He said he'd work for nothing to prove his ability. It's hard to refuse a man who makes that kind of offer. Too many people in the coaching profession are too concerned about their position or how much money they're going to make before they prove themselves."

Donahue was an unpaid assistant for one season. Kansas went to the Orange Bowl after that 1967 season and Rodgers made him a full-time member of the staff the next season. He had responsibility for the defensive line and, at 23, he was one of the youngest college coaches ever.

Donahue returned to UCLA, as a member of Rodgers' staff when Rodgers was hired as head coach after the 1970 season.

Rodgers said: "When I left UCLA for Georgia Tech in 1974, I wanted to take Donahue along, but J.D. Morgan told me that was the one coach I couldn't take."

Donahue not only had strong recommendations from Prothro, Vermeil and Rodgers when he applied for the job, but other assistants told Morgan that Donahue was the best choice.

Bob Fischer, who was then Morgan's assistant athletic director, remembers that Dick Tomey, who also was considered for the job and who later became the head coach at the University of Hawaii, told Morgan that, "Terry was a great selection and that Terry would turn out to be the best coach UCLA ever had."

Fischer said: "I had a vote, and I voted for Terry. I don't know how much weight that carried with J.D., but when we looked over the various candidates, I definitely thought that Terry was on top—especially as far as promise was concerned."

Those who had worked with him had seen beneath Donahue's beguiling facade of charming, youthful innocence. They had known the hard-driving intensity, the ruthless singleness of purpose, the perfectionist's ego, the defensive attitude toward anything and anyone challenging him.

All are fine qualities for a football coach. They are the kinds of qualities Woody Hayes always admired in field generals.

But they are not necessarily the qualities that Donahue sets before the public.

Even at football practice, Donahue—although briskly businesslike—maintains a gentlemanly demeanor. He doesn't bark obscenities or rip off helmets. He gives nods of approval or icy stares.

The other day, without raising his voice, he stopped a player cold just by using a menacing tone.

Upperclassmen clue the freshmen early: Don't be misled. Donahue is no pushover, and you don't want to get on the wrong side of him. Period.

There is a relaxed and friendly camaraderie among his coaching staff but there is no question who is calling the shots.

Donahue is usually accessible to and cooperative with reporters. He can be very charming and personable. On his terms. But don't press your luck, and choose your adjectives carefully. He once threatened to boycott a whole group of visiting reporters because he had a year-old gripe against one of them. He got his apology before any other reporter saw him that day.

Donahue is sensitive about his image. He knows what he wants it to be. And, of course, he has been successful in making it just that.

Terry Donahue: A winner. A great guy. A gentleman. A family man. A religious man. A moral man.

The administration considers him one of the university's proudest assets. The alums love him. His players respect him. Mothers entrust their sons to him. Other teams would love to have him.

And he really seems to live that role. If he doesn't, he's done a very good job of keeping his slips private.

The Santa Monica Evening Outlook, after finding no one who had a bad word to say about him concluded that he must be "a saint in coach's clothing."

It's hard to say just exactly what Terry Donahue really is or really is not. But one thing is for sure—he's not stupid.

All things considered. Donahue has done a masterful job of putting all the pieces together. He has done what he has had to do to win in the cut-throat competitive world of college football, and he has come away with people thinking he's a saint.

Now, that is a masterful accomplishment.

Of the hundreds of young men who have played for him over the years, very few publicly criticize him.

Recently, Michael Young, now a receiver for the Rams, talked about some of the negative feelings that players have about him. Dokie Williams, a receiver with the Raiders, has said that he thought Donahue didn't use him much at UCLA just to make a point, to show that anyone who crossed him—in his case by skipping spring football to run track—would pay.

Others have complained, off the record, about Donahue's negative approach. They resent the way he never praises his own players, never promotes them for All-American honors or bowl games, and always seems to be afraid of losing instead of looking forward to winning. They say he manipulates and holds grudges.

But then there is Rick Neuheisel, the quarterback who walked on at UCLA and eventually led the team to a Rose Bowl victory. He butted egos with Donahue as often as anyone, saved a season for Donahue and never got much thanks or credit, but counters with the argument: "What good does it do for anyone to speak against him? You have to give him respect for what he accomplishes. We won. I won a Rose Bowl game."

Now, that's what Donahue would call a reasonable statement.

Presented with some of these ideas, Donahue said, "I'm not always nice. I can be hard to deal with at times. I've never tried to project myself as a saint.

"People who are reasonable—and I'm talking about the majority of people; most people are reasonable—realize that there are no perfect human beings. We all make mistakes. The last perfect guy was put on a cross and crucified.

"People who are reasonable realize that anyone who is in a responsible position of authority or decision-making is going to be faced with certain choices. The only thing that they can do is evaluate the information to the best they're capable of and then go with their honest-to-goodness feeling of what is in the best interest of the team or the program or the individual."

Donahue seemed troubled by the idea that he holds grudges. He thought about it for a minute before saying; "I'm not sure what that refers to. . . . I would think that my basis philosophy would not agree with that kind of approach. I would hope I don't do that. I don't think you can keep score. People make mistakes. You don't want a scorecard—don't judge lest ye be judged."

And yet, the coach of a major college football program will be judged constantly. It comes with the territory. That was one of the main things that Donahue had to get used to when he became head coach.

After years in the headlines, he now can say: "I hope I have more friends than enemies. But once you've been successful, you have critics. When you're down, people criticize. When you're up, people pick at you. It's mediocrity that just rolls along, unnoticed. I've been successful. I have my critics. That beats the alternative."

Donahue has had to develop lots of working philosophies. He used to listen to tapes of other coaches' ideas as he drove between UCLA and his home in Westlake Village. Now, he spouts some of his own. He likes to call it growing.

He *was* young when he became the coach, and he had to do a lot of learning on the job, thinking on his feet.

"No one is born a head coach," Donahue said. "You're an assistant coach, and then all of a sudden one afternoon, you're elevated to head coach. And when they elevate you they don't give you a manual that tells you how to become a head coach. There isn't one. Maybe there ought to be.

"So you're given what we used to call in the service, off-the-job training. You learn as you go along and if you're good enough and lucky enough, you survive.

"What happens is that you learn to grow with the job. When I first got the head coaching job here, I thought I got it because I was the best technical coach on the staff. I thought I got the head coaching job because I was a good coach—and it was (the reason), in a sense.

But the more you work as the head coach, the more your time is taken away from the pure technical aspects to other aspects. It took me a long time to learn to like those other aspects.

"I wanted to coach. That was what I was best at. That was what I liked. It took me a long time to learn to spread myself among three areas.

"One is the technical aspects—the X's and O's and the plays you run.

"The second is the administrative aspect, which involves everything from dealing with the school's administration to dealing with the media, speaking, dealing with the students, answering correspondence, whatever, A to Z.

"And then the third is personnel. There are two types of personnel, those currently on your team and those you need to go out and bring to your team.

"It took me a long time to formulate my philosophy and figure out when to have emphasis on one area, when the other area and how to disperse my time over the three fronts."

Of all the adjustments Donahue has made over the years to make himself a success as the football coach at UCLA, the most telling is the change that he made with his offense.

"We were 9-2-1 our first year and it would be very hard for anyone to convince me, from a technical standpoint, that the veer offense wasn't any good," Donahue said. "Lou Holtz was going to bowl games with it. All kinds of people were winning with it. It's

a good offense. Not only that, we had won the year before and gone to the Rose Bowl with it.

"Pepper had been a wishbone coach. Dick was left with wishbone personnel. He didn't want a wishbone team so he went to the veer. The veer took us to the Rose Bowl his second year. So when I got the job, my thought was, 'Gee, we just went to the Rose Bowl with it. Plus, all my background had been veer offense.' So we continued with it. But I got the lable of being a boring, conservative coach.

"I tried to take a good, hard look at the criticism that was leveled at me, and I finally came to the conclusion that it wasn't enough just to win here. I was winning, and I was on a pretty good pace in terms of past UCLA coaches, in terms of percentages. But it obviously wasn't enough. There was a great deal of unhappiness.

"Maybe in this town, it's different. Maybe in this town, you have to do it with some flair and entertainment.

"I've learned that you have to be flexible, adjustable."

And you have to learn how to handle adversity.

Take negatives and make them positives.

During Donahue's reign at UCLA, by far the most embarrassing episode has been the saga of Billy Don Jackson.

Billy Don was one of the best defensive tackles in the country when he was recruited from Sherman, Tex. He was a freshman All-American for UCLA in 1977, eventually transferred to San Jose State and finally, in 1982, was sentenced to a year in jail after pleading no contest to voluntary manslaughter in the fatal stabbing of a drug dealer. The judge called Jackson a functional illiterate and blasted the whole system of college athletics.

Actually, Jackson had a reading disability, similar to dyslexia. But he was a bright young man, and he was enrolled at UCLA in courses that stressed oral skills—speech, sportscasting, an African language that is spoken but not written. He also was supposed to be working with a reading therapist.

Donahue still shakes his head sadly when the subject comes up. "Billy Don Jackson—years later you can't escape it," he said. "Obviously, it was the darkest hour for our program. It was a dark hour for UCLA. I didn't let him in school, I don't let anyone in school . . .

"But I was the head coach, so I was involved. He had a reading deficiency, something we thought we could correct. For whatever reason, Billy Don didn't do his part of what was supposed to be done.

"Consequently, he left school and later became involved in this tragic drug deal. It was a terrible scenario of events. There's no question that to this day we look back on that situation and the only thing I can do is try to learn from it.

"The university learned from it. From that point in time, we shifted philosophies. The admission process was ahead of the support process, then. There were lots of special action admissions, high-risk students. . . . By support I mean tutorial, curriculum, adjustment of the athletic department to these problems. It was a whole new world, and we were just getting into it.

"Jackson, in a sense, brought everybody to look at that whole process more carefully. In the long run, the tragedy of Billy Don Jackson helped the university. Now the academic process and the support is stronger. It's so much different and so much better."

At the time of sentencing, Jackson's attorneys attempted to show what kind of a person he was by showing how many friends had come to the courtroom to support him. He asked everyone there in support of Jackson to stand. Among them was Donahue.

After Jackson was released from jail, Donahue helped him catch on with a USFL team.

The only other black mark on UCLA's record since Donahue became coach is a year's probation in 1980. UCLA was one of five Pacific 10 schools caught up in a scandal involving unearned school credits and falsified transcripts in 1977.

If the forfeits in 1977 are factored into Donahue's record he has not broken Spaulding's mark. The Bruin record was adjusted from 7-4 to 0-9 with 2 no contests. Donahue's record would then be 70-35-6. However, neither UCLA nor any of the other Pac-10 schools take this added factor into mind when reviewing Donahue's success ratio.

Nothing like that has come up lately. The program has been clean. Donahue credits the change of philosophy after Billy Don Jackson for that, too.

"Because of the shift in policy at UCLA in the last five years or so, the kinds of people that we're generally recruiting are easier types of people to recruit," Donahue said. "When you're dealing with intelligent people from stable families and backgrounds, the whole recruiting process is upgraded."

At this stage of the game, UCLA's program is so strong, and so successful, it sells itself. Donahue has always been known as a top recruiter, but he admits it's getting easier. Not easy. Easier.

"I think we're to that point," Donahue said. "I think the UCLA football program has been built to that degree. That doesn't mean I expect us to win the championship every year. I don't. But I expect us to be representative."

Donahue is careful about not being drawn into discussions speculating on whether he might take other jobs—especially when that speculation is based on the rumor that just won't die, that he's the obvious successor to Gerry Faust at Notre Dame.

Donahue considers it "absolutely inappropriate and totally unacceptable" to discuss a job that is not currently available.

"That happened to me after the 1979 season," he said. "People were speculating on who would be the next coach at UCLA. That bothered me. It bothered me a lot. It bothered my family. I'm not going to do that to another coach and his family."

But it's hard to resist the urge to speculate. With Faust in the last year of his contract at Notre Dame and with the Irish losing too many games, the job is likely to be available soon. Figure in a highly respected Irish Catholic coach named Terence Michael Donahue, who went to Notre Dame High School, no less, coming off a season in which he became the winningest coach in his school's history.

True, Donahue does have a contract with UCLA. Last March he signed a three-year extension that keeps him signed to a five-year deal. He does that every third spring. But that contract does not preclude him from moving on if he wants to.

Tommy Prothro had a contract with UCLA when he moved on. So did Pepper Rodgers. So did Dick Vermeil.

Athletic Director Pete Dalis has flatly stated: "Of course we don't want to lose Terry, but if he has an opportunity that he thinks is better for him, we won't stand in his way. That has always been the policy at UCLA."

In the past, Donahue has expressed more interest in pro jobs than in other college jobs. So it remains to be seen whether he would make the move to snowy South Bend, Ind., even if the job were offered. He's Southern California born and reared.

If the Notre Dame opportunity presented itself, Donahue would be in a no-lose situation. He could take what is considered the premier position in college football and start over, or stay in one of the very good positions in college football where he's already a winner.

He just might stay. He turned down Arizona State last season. And he's talked to lots of others without being swayed.

"I'm not saying that I would never consider another job," Donahue said. "You know that I have considered others. But I am saying that I like what I'm doing at UCLA. I'm proud of what we have accomplished here. I feel a sense of satisfaction. I also still feel a sense of challenge."

Donahue wasn't the only one who thought of J.D. Morgan when he set the record. Fischer was conjuring up the same images. Fischer said: "J.D. was very proud of Terry. He got to see Terry five years before he died. You can imagine how happy he was from the very beginning when they went down and played Arizona State in their very first game. (UCLA won Donahue's opener in a nationally televised game at Arizona State.)

"Terry has done just what J.D. knew he would do. He has really developed the program. Terry might not want to say it himself, but I think it's extremely important that he has beaten USC year after year. He has established great pride, and pride in the university covers a tremendous area.

"Not only has he been winning, but the program has been clean and the incoming student-athletes' academic standards, slowly but surely, have risen every year.

"You know, they say that in the service or in corporations, any organization like that, that after about three years any institution or program will reflect the personality of the guy in charge. I think that's true. I think that's why we have such a fine football program right now."

KING HASSAN'S U.N. SPEECH: NEW OPPORTUNITY FOR PEACE IN THE WESTERN SAHARA

HON. GERALD B.H. SOLOMON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SOLOMON. Mr. Speaker, as one of the representatives to this year's session of the U.N. General Assembly, I have had the opportunity to hear the speeches and witness many of the events connected with the celebration of the 4th anniversary of that body. In that regard, I would like to commend to the attention of my colleagues the recent speech by the Prime Minister of Morocco, Mohamed Karim-Lamrani, given on behalf of His Majesty King Hassan II before the U.N. General Assembly on October 23, 1985.

King Hassan has made important new steps toward a resolution of the conflict in the Western Sahara, a subject of contention in Northwest Africa for several years. In his speech, King Hassan calls on the United Nations to hold a referendum of self-determination by January, 1986, for the people residing in the Western Sahara, a former colonial possession of Spain. King Hassan also committed Morocco to an immediate, unilateral cease-fire in order to encourage all sides toward a peaceful resolution of the conflict. With this initiative, Morocco hopes to bring an end to the tensions which exist in Northwest Africa and to the long conflict which has embittered relations between it and its traditional rival, Algeria.

Mr. Speaker, His Majesty's speech, which I am inserting in the RECORD, represents an admirable attempt to deal with a particularly contentious issue that has disrupted relations between the nations in that region for over 10 years. King Hassan's new political initiative, taken at a time when Morocco is winning the conflict militarily, represents a magnanimous and farsighted gesture toward all parties to the dispute. Hopefully, the United Nations will be able to act upon his Majesty's invitation without delay.

The United States, as a world power, often has too little time to devote to these regional sources of tension until they explode into a conflict of such international import that we are absolutely forced to address them. We in the Congress should applaud the efforts of one of our oldest and most valued allies in a region of vital strategic interest for its efforts to resolve this seemingly endless dispute in a just and peaceful manner.

MESSAGE OF HIS MAJESTY HASSAN II, KING OF MOROCCO

Praise be to Allah! May He grant his messenger, the messenger's people and companions his blessings and salvation!

Mr. Chairman, Mr. Secretary-General, Ladies and Gentlemen: A little over two years ago, I have had the honour of addressing you, on behalf of my country, the Kingdom of Morocco, in a message dealing with some problems which were preoccupying the international opinion.

Today, I am particularly happy to have, once more, the opportunity to address you on behalf of my country and my people. Hopefully, my message will bring some useful clarifications on an issue which is so vitally important for my country, so that you may be amply informed of the various phases of the issue and the way in which it has evolved with time.

It is also my hope that the proposition contained in my message will efficiently contribute to the settlement of this question, by bringing a just and final solution. This question which will be the central theme of my message is, as you would be able to tell, nothing but that which has become known as "the Western Sahara question".

For the sake of better clarification, I find it necessary to recall some undeniable truths about the problem per se.

The Kingdom of Morocco which, as recognized by international conventions and treaties, was an independent state with full sovereignty over its entire territory until, all of a sudden, it fell prey to the covetousness of colonialism and became the object of utter dismemberment. Divided up into several zones of influence—French, Spanish and International—, it had to suffer the ill-fate of tutelage, domination and occupation for a rather long period.

When, after the long and painful struggle of its Monarch and People, Morocco recovered its sovereignty, it eagerly hastened to achieve the reunification of all its parts by opening up negotiations with the occupying powers. Thus was it able, in the first stage, to recover the French and the Spanish Zones, along with the International Zone of Tangier. However, in the North as well as in the South, other parts continued to live under foreign domination. To recover them, negotiations have been carried out with our neighbour, Spain, leading to the return of Tarfaya in 1958.

As to Sidi Ifni, Saguiat El-Hamra and Wad-Eddahab which the Spanish Government refused obstinately to return, we were forced to resort to the United Nations, asking that the necessary measures be taken to put an end to colonial rule in those parts.

Even years after the recovery of the Tarfaya Province, Spain, by an act of goodwill and understanding, returned Sidi Ifni. However, she persisted in her occupation of Saguiat El-Hamra and Wad-Eddahab—the two provinces which make up what is known as "Western Sahara".

In reaction to the machinations which endangered our rights and interfered with the efforts we were making to safeguard them, we requested of the United Nations that the dispute be brought before the International Court of Justice. Recognizing the legitimacy of our request, the United Nations referred the case to the International Court of Justice, asking for a consultative opinion on clear and specific questions.

The International Court of Justice then disclosed its opinion, recognizing the existence of judicial links between Morocco and the Sahara, as well as ties of allegiance between the Saharan tribes and the King of Morocco.

Thus, after a long period of patience and perseverance, we have been able to recover parts of our territory through peaceful means, giving preference to negotiations and dialogue.

It should be pointed out here that, as Morocco was earnestly pursuing the means of negotiations with a view to liberating the parts usurped by colonialism, the opponents of our territorial integrity were out of the scene and had no say whatsoever at the international level.

After reaching our goal, we believed that a new era lay before us and that we could confidently take the road of reconstruction and development. Unfortunately, not pleased with the success of our efforts in recovering the parts of our territory usurped by colonialism, the opponents of our territorial integrity waged all sorts of hostilities against us, launching constant aggression in which they used heavy armament and sophisticated weapons and, at the same time, engaging in violent attacks within all the international spheres where they looked for supporters for their misleading and false theories. By so doing, they sought to divert the aim we had assigned ourselves, namely that of ensuring the enhancement and progress of the recovered Saharan Provinces.

In this state of constant and various aggressions, our neighbor, Algeria, played a major role, putting her land, along with financial and military facilities, at the disposal of our aggressors whom she had armed and trained to fight with her own weapons, ignoring thus the links of neighbourhood with Morocco and the obligations and norms such a relation ought to entail.

In the face of this outrageous aggression carried out on several fronts, Morocco limited its action, on one hand to the defense of its territory against attacks of which it was the target and, on the other hand, to warding off the efforts of misleading acts, untruths and false allegations. In spite of all the harm caused, Morocco chose to avoid all that could bring about an escalation or make the crisis still more serious. Instead, it gave proof upon of its sincere adherence to the principles of dialogue and peaceful means, and its dedication to the cause of Peace.

Because of Morocco's eagerness to preserve Africa's present and future, and in response to the wishes expressed to me by some African, Arab and European Heads of State—friends of Morocco—I have, on behalf of my country, taken a decisive step forward, with a view to putting an end to the tension in Northwest Africa, proving thus Morocco's willingness and firm determination to see peace and security reinstalled in the region. I am referring to the initiative I took at the 1981 African Summit held in Nairobi where, on behalf of Morocco and through its highest Office, I announced the acceptance of the organization of a self-determination referendum in the Western Sahara.

Receiving the proposition with unanimous approval, the Summit immediately appointed an Implementation Committee consisting of Heads of State and whose task was to define the necessary measures for the organization of the referendum which had just been decided upon.

Later, I went to Nairobi for a second time, in order to take part in the first meeting of the Implementation Committee. Fully empowered, the meeting defined the means and ways, as well as the conditions likely to help bring about a true consultation of the inhabitants of the Sahara. Without any reservation or hesitation, I gave my consent to such means and ways and conditions.

The opponents of our territorial integrity then expressed fears as to the new phase which the Sahara question had just entered, convinced—as they still are—that the outcome of the referendum would not correspond with their special conception, since their scheme would be totally defeated by the consultation of the inhabitants of the Sahara. Consequently, they stood in the way, creating all sorts of obstacles and believing they could reach their goal by having an artificial entity admitted into the Organization of African Unity. Similarly, they imagined that, by pushing their allies to call for negotiations between Morocco and a group of mercenaries, and imposing them on Morocco, they could achieve one of their principal goals.

Once such an artificial entity imposed on the OAU, Morocco, in reaction to the violation of its Charter and the disregard for legality, withdrew from the Organization, preferring the adherence to the principles of legality, ethics and moral values without which international relations would have no foundation.

Morocco has also systematically refused the direct negotiations its opponents have sought to impose, for it refuses, thereby, to help a handful of mercenaries without representativity to acquire the legitimacy and

the credibility which they cannot achieve through the referendum.

Mr. Chairman, Mr. Secretary General, Ladies and Gentlemen: The inhabitants of the Western Sahara live a quiet and peaceful life in all parts of the region. Day after day, they witness the phases of progress and development their provinces go through, whether economically, socially or culturally. They are so happy with the positive transformation their region has known, as they feel an immense joy to see how their provinces participate, fully and without any restriction, in the Moroccan national life.

Having visited these provinces a few months ago, I have been deeply moved by the exceptionally impressive enthusiasm with which the inhabitants—old, young, men and women—received me.

Foreign political observers following the phases of the event saw in this warm reception and enthusiasm a true referendum through which the inhabitants of the Sahara expressed their self-determination by confirming their allegiance to the King of Morocco and their belonging to the Land of Morocco.

Had it not been for the firm loyalty to the decision taken on the basis of a proposition I myself had made, and which I confirmed on a number of occasions—especially when I addressed this august Assembly—, the overwhelming manifestation of love, devotion and faithfulness which, through Me, is addressed to the symbol I represent, would have led Me to consider it as the most eloquent expression of a political will no other form could likely supersede.

Today once more, I confirm, before you, the commitment to accept, on one hand, the organization of a self-determination referendum in the western Sahara and, on the other hand, the result of such a referendum, whatever it may be.

I would further be happy to accept, before you, not one commitment, but two.

The first commitment relates to the cease-fire which Morocco has unilaterally decided to put into effect as of this very moment, and that it would call it off only in case of aggression against the territories under its responsibility, in which case Morocco would exercise the right of legitimate self-defense. Morocco is even prepared to receive neutral observers wishing to verify, on the premises, to respect of such a cease-fire.

The second commitment relates to Morocco's predisposition and acceptance to hold, under the auspices and control of the United Nations, a referendum in the Sahara, and that in the early part of January of next year. The United Nations is naturally free to request, at any time, the assistance of any regional Organization likely to help in the realization of the process.

What most matters in relation to this false problem of the Sahara is to find a solution by the only efficient means likely to settle the litigation, once and for all, and put an end to any dispute. Such a means is the consultation of the inhabitants of the Sahara through a referendum.

If the United Nations undertakes this referendum process at the proposed date, it would make a gigantic step towards a substantial contribution to the advent of a better world.

The United Nations is celebrating its 40th Anniversary today, its creation has brought big hopes, after the years of darkness the world had been going through. In it, people of all tendencies and continents have at last seen the most efficient and most appropriate instrument to serve Peace, Justice and stability.

Is there a better occasion than this 40th Anniversary for our Organization to prove to the world not only its unshakable dedication to those high ideals, but also, and more particularly, its firm determination to do all that is possible to bring about their realization through the most democratic and noblest way, namely that of the right of people to choose their own destiny freely?

Thank you very much for your kind attention.

TRIBUTE TO LEE EZELL BANKS

HON. RICHARD C. SHELBY

OF ALABAMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SHELBY. Mr. Speaker, I would like to recognize an individual from my hometown of Tuscaloosa, AL, who was recently honored as Alabama's Minority Small Business Person of the Year by the Small Business Administration.

This person is Lee Ezell Banks, owner of Ezell Banks Realty. Following is an editorial that appeared in the Tuscaloosa News which I would like to share with my colleagues in the House.

HONOR WAS WELL EARNED

Lee Ezell Banks, owner of Ezell Banks Realty in Tuscaloosa, is a deserving recipient of the federal Small Business Administration's 1985 award to the Alabama's Minority Small Business Person of the Year.

Banks, who has been in the real estate business for 16 years in Tuscaloosa, was chosen for the award from a group of state peers for his contributions to the betterment of minority small business in Alabama, officials said.

He was honored by the SBA during the Chamber of Commerce's Coffee Club meeting Tuesday.

A Greensboro native, Banks is a leading local businessman. He is a member of the Chamber of Commerce and the State Housing Finance Authority and is an active figure in civic and social affairs.

His honor reflects the hard work he has put into making his business prosper and in improving the business climate in his city and his state through active community leadership.

Mr. Speaker, I feel that having a recipient such as Ezell Banks receive this award says a great deal about the Small Business Administration and its ability to recognize truly outstanding business individuals.

Ezell's accomplishments attest to his high degree of motivation and initiative. A person of Ezell's exemplary character and high personal and professional standards make him an excellent choice for this honor. He has established a reputation of integrity and leadership in his field. His past efforts on behalf of minorities are to be commended by those of us in the public sector.

I am proud of my friend Ezell Banks, and wish him much continued success in his future endeavors.

AFL-CIO: THIRTY YEARS OF COMMITMENT TO WORKING MEN AND WOMEN

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. BIAGGI. Mr. Speaker, this year marks the 30th anniversary of the AFL-CIO. I believe that it is important to stop and note the contributions of the federation during this time and the important role that it has played in the lives of working men and women.

In its three decades of existence, the AFL-CIO has witnessed profound changes in the U.S. economy and its role in securing jobs for its members within our economy. For example, since 1955, the United Steelworkers, with 572,000 members, have lost half their membership in 30 years. The Ladies Garment Workers, in the same time period, have gone from 383,000 to 210,000.

Conversely, unions have made sharp gains in a number of industries and areas, most notably food service, business service, health and lodging. According to a report released at the the AFL-CIO's annual convention last week in Anaheim, CA, the Service Employees Union has grown from 505,000 members in 1977 to 688,000 members in this year. The report, entitled "The Changing Situation of Workers and Their Unions," goes on to note that 90 percent of the new work in services is nonunion, and much of it is at the minimum wage rate of $3.35 per hour—part-time work, primarily filled by women, who are willing to accept lower paying jobs. In sum, despite the gains in terms of numbers—those numbers do not necessarily reflect increased economic equity for the entire membership.

Unions today represent only 18.8 percent of the labor force—around the same level in effect during the Great Depression when the first organizing drives began. Yet, in spite of this, they continue to represent a tremendous force in today's society. Unions have led the fight for improved working conditions, improved wages and most recently on the international front, improved trade practices which will promote fair trade—along with free trade.

As the the AFL-CIO enters the second half of its century of achievement, it is important that it continue its efforts to aggressively recruit and retain minorities and women in leadership and membership positions. Of its 13 million members, 30 percent are women and 20 percent are minority. While both these segments of members are growing, their growth is not reflected in the the AFL-CIO's governing body which is 90 percent white male. Lane Kirkland, elected national president for another 4-year term, is to be commended for his effort to expand representation in this area and I would hope that this effort will aggressively continue into the next decade if unions are going to truly represent the American work force.

Unions have historically been in the forefront of efforts to protect and preserve the pensions of their retired members. This effort is particularly important in light of not only a wave of plant closings and rising number of dislocated workers, but is also important in light of efforts of companies to raid pension assets. Just last Thursday, the troubled Wheeling-Pittsburgh Steel Corp. unloaded its four pension funds, with $475 million in unfunded liabilities, on the Pension Benefit Guarantee Corporation.

As the largest pension dumping scheme in history, this act stands as a direct insult to the thousands of workers who contributed to this plan—as well as a threat to the pensions of the 38 million American workers that are covered by PBGC activities. Once again, we see another hostile attempt on the part of management to use the PBGC as a "subsidy program" without any direct intervention on the part of the administration.

The Reagan administration has made no effort to hide its antiunion bias. However, it is important to note that the new Secretary of Labor, Bill Brock, has made significant efforts to bridge the communication and information gap with Congress as well as national union leaders. Last week, Bill Brock became the first Secretary of Labor in the Reagan administration to address an AFL–CIO meeting.

I believe his comments, in full, deserve the review of my colleagues and therefore, am placing them in full in the RECORD.

On this, the 30th anniversary of the AFL–CIO, it is important that those of us who consider ourselves unqualified friends of organized labor, reaffirm our commitment to to the trade union movement and those working and retired men and women that it serves.

REMARKS BY THE HONORABLE WILLIAM E. BROCK, SECRETARY OF LABOR

I am grateful to President Kirkland for the invitation to address this convention. My mission is a very direct and simple one. I come to support free collective bargaining, to acknowledge and appreciate the contribution the AFL-CIO makes in our society and to discuss mutual concerns with you.

Putting first things first, there is, practically universal acceptance of the fact that collective bargaining is essential in a free society and is a fundamental right for working men and women in this country. America's prosperity and its place in the world economy ultimately depend on the value of the work Americans do. Of all the influences affecting American workers throughout our history, none has been more decisive than the growth of free trade unionism and the changes it has brought to labor-management relations. Trade unionism today derives much of its strength from principles like free and open collective bargaining which have matured and evolved over the years. I support those principles; I will work with you to strengthen and maintain them, and, I will join in your efforts to adapt them to the changing needs of working people and the changing realities of the world's economy.

There is dignity to work, and in the American context, work is opportunity. And that opportunity must be equal for all, black, white, brown, or yellow; young and old; male and female. Government policy rightly recognizes the rights of every individual to get and hold any job they are capable of doing and to be paid fully and equally for doing it. The struggle for equal rights and opportunities has been a long one. The American labor movement should be proud that it has always been in its forefront. As Secretary of Labor, I intend to make my department a trusted and valuable partner in your efforts to help all working people make a significant contribution to society, and, in turn, to reap their fair share of its rewards. That's a settled issue, though as yet, not fully realized.

Society has also agreed that since the workplace itself reflects the dignity of the worker, it should be free of avoidable health and safety risks. The building of America too often has been achieved at great human cost. Through the efforts of trade unions, the safety and health of working people has received increased attention since the first historic social surveys and reports at the turn of the twentieth century revealed the tragic extent of dangerous and unsanitary conditions pervading our factories and workshops. For too long, many hazards were considered part of the job and workers took their chances at being killed, maimed, or sickened. My goal as Secretary is to provide every worker with a safe and healthful workplace. That's a settled issue, let us work together to advance it.

Our capacity to respond to economic change in the coming years will depend on the vitality and adaptability of our economic, social, and political institutions. Only by acknowledging the powerful links between these dimensions of our national well-being can we forge a consensus for progress, a consensus arrived at in an atmosphere of free and open debate and discussion.

One need only look around the world to see that there are no free collective bargaining or free trade unions in authoritarian and totalitarian countries. Just as Nazism could not tolerate a free labor movement, so the state communism of Poland could not. These institutions are the first to go because they are the essence of freedom.

So I say to you that American needs free collective bargaining, and there can be, of course, no free collective bargaining without a free labor movement.

The AFL-CIO has every right to be proud of its one hundred year record.

You have been faithful to the principles of democracy and freedom for your entire existence.

You have done your share in every national emergency—in war and in peace.

You have advocated good citizenship and you have lived by that rule yourself.

You have improved the standard of living of your members and, through your example, you have improved the quality of life for all Americans.

You have provided the Nation with an invaluable skill bank.

You have always fought for the health and safety of all workers—whether they belonged to your federated unions or not.

You have stood up to be counted on the great issues to protect the right of all persons to be free from economic, social and political discrimination and persecution.

For all of that I salute you. Moreover, I appreciate your response to new challenges, to a more difficult climate and to new pressures.

Cynics and critics are willing to write unions off, about to fade into extinction. They are wrong.

It is true that recent years have not been years of growth and prosperity for much of the labor movement. But sometimes temporary setbacks lead to future successes.

The way the AFL-CIO is currently reacting to admittedly bad times, seems to me to portend good times.

First of all, your leaders, Lane Kirkland and Tom Donahue, are in the fray. They are traveling the length and breadth of the land to bring a message of hope and cheer and to search for answers to critical problems. They are on the road, seeking, and, most of all, leading their constituents.

Moreover, I know of no institution in our society that has engaged in more open, public and honest introspection than the AFL-CIO.

The remarkable report issued by the Committee on the Evolution of Work—The Changing Situation of Workers and Their Unions—is a clear sign that the Federation will confront the challenges of change in the same spirit of achievement and determination long the hallmarks of the union movement in this country. I can think of no organization, public or private, which has shown greater courage or honesty in carrying out a comprehensive program of self-analysis and doing it in the full glare of close public scrutiny.

The simple opening statement that "unions find themselves behind the pace of change" itself signals a willingness to admit that some unions may have in fact neglected to adapt themselves, structurally and strategically, to new conditions in a difficult economy and a changing society. Times have changed and conditions change, in many respects at a revolutionary pace. Unions, like other institutions, must find new ways to safeguard their very existence as institutions essential for the preservation of a free and democratic society. And I for one have no doubt that the labor movement will soon again be in an ascendant position in American life.

Your report is based on a proper and traditional concept: "unions are, first and foremost, organizations seeking to improve the lives of those they represent by improving their conditions of work and by insuring respect for their dignity as workers." At the same time the report holds out the possibility of a more cooperative and productive relationship with management. I am not exaggerating when I say that the principles on which this union-management relationship rests will dictate, to a large extent, the role America will play in the world economy for the rest of the century.

One of the principles I am most pleased to see in the report recognizes that "confrontation and conflict are wasteful and that a cooperative approach to solving shared present and future problems is desirable." There can be no healthy labor movement in an unhealthy economy; we must work together to solve the complex issues of productivity and international competitiveness and solve them in their broadest context. Union-management programs that give workers greater participation in the decision-making process can be crucial for humanizing and democratizing the workplace. I am glad to see that the report urges the acceleration of these types of cooperative programs.

In my professional and personal life, I have found that decisions made cooperatively and inclusively gain the widest support. Many companies with cooperative labor policies are showing improved competitive strength through increased productivity and better labor relations, and that leads to

a better product, a better price, and a sound future.

According to your report, unions developing such programs show a positive membership response. This convinces me that a solid atmosphere of cooperation, based on the concepts of worker dignity and equality and grounded in a mutual respect for collective bargaining, enables both unions and management to maintain individual integrity while working for the good of all.

I realize that differences between us—both theoretical and practical—will remain. Fortunately, the strength of our institutions does not depend on absolute agreement but on the ability of honorable men and women to disagree openly on critical issues of the day. But these disagreements must never fall to the level of personal animosity and petty name calling. Our mission is too important for that and our constituencies deserve the best that we can muster. There are far too many issues upon which we can, and must, work together to allow our differences to jeopardize a powerful and productive partnership.

The years I spent as U.S. Trade Representative and now as Secretary of Labor have convinced me that an untempered adversarial process just won't cut it in the international arena. We were once the undisputed leader of the world economy, but our competitive position has gradually eroded as other nations have come to excel in productive efficiency and product quality.

I'm not saying that the survival of our economic system is in doubt but it is an undeniable fact that we are not successfully meeting the challenge of international competition and we are paying a heavy human price for our failure. Part of our failure may lie in clinging to union-management relationships forged a half century ago and which may no longer be relevant to today's issues and problems. To do so is a prescription for mutual disaster, not mutual prosperity.

One thing should be clear. When I call on American unions and businesses to be competitive, I do so within the American value system. We will increase productivity by ingenuity, investment and technology. We will improve quality, value and morale. But none of this can or will be done at the expense of the American dream, or at the cost of sabotaging the American worker's standard of living. To do otherwise would betray the promise of America, and in terms of dollars and cents, would also destroy the greatest consumer market in the world.

As pin-pointed in your report, American workers demand more opportunity to develop and apply their skills; more flexibility in meshing their work and non-work lives; and, perhaps most important of all, more of a say regarding the organization of their work and conditions under which it is performed.

Workers at all levels are seeking to realize their full potential to increase the productivity of their organization, and, in the process, improve the quality of their lives at work and at home. Labor-management cooperation, I believe, has proven itself to be an appropriate vehicle for helping to bring about these organizational and personal improvements.

I believe that we have arrived at a critical juncture in our whole approach to "human resource management" and the industrial relations process that governs it. What makes it most critical is, of course, the awesome challenge of international competition, a competitive challenge that is likely to increase still further in intensity as more countries develop their industrial capability and vie for what they see as their fair share of the world market.

In confronting this competition, we have perhaps three main options open to us. One, and it is a self-defeating response, is to effect trade barriers to lessen the penetration of foreign competitors into our markets, particularly in sectors and industries where survival seem imperiled. But I have not come here today to preach the imperative of free trade among nations. Rather, I want to underscore two other alternatives, each representing a strategy for protecting and improving our competitive position but differing drastically in their consequences.

Some say we should adopt strategies of ruthlessly cutting labor costs. We can see this policy being followed in a number of subtle and not so subtle ways like outsourcing, relocating production facilities abroad, and an increase in union avoidance activities.

To me, it is unthinkable and unnecesary to try and improve our competitive position by reducing the standard of living now enjoyed by American workers and their families. It goes against everything this Federation has worked to achieve and I oppose this kind of thinking as strongly as anyone in this room.

This Nation has always competed on the basis of our creativity, our entrepreneurial instincts, and the productive abilities of our work force. When temporary sacrifices are called for as a matter of sheer survival, simple economic and social justice dictates that they should be shared equally by all the parties involved—owners and managers no less than rank-and-file workers.

But a third and far more attractive option can maintain and improve productivity and, at the same time, give working people the tools they need to do their job and the respect they need to be proud of it.

It is the strategy of participation and, you know, it is not some mysterious concept developed in Japan, Sweden, or in the classroom of some university business school. It is firmly grounded in two old-fashioned values which have been made in the USA for a long time—ingenuity and cooperation.

But, to chart a course in the direction of increased labor quality rather than reduced labor cost requires some bending on both sides. Management must reconsider the wisdom of clinging tenaciously to what it has long regarded as its inherent "rights". And labor must reconsider the wisdom of demanding the perpetuation of work rules and jurisdictional boundaries between jobs that no longer make the same sense that they once did—and abandoning in the last vestige of any belief that productivity, competitiveness and profitability are exclusively a management concern. To me this is the far more promising course of action to take in restoring this country's economic and social vitality.

Regrettably, however, the wisest course to chart is not always the easiest to follow. There often appears to be a near irresistible temptation on both sides of the table to hang tough and follow the familiar path of least resistance. For managers this means putting the axe to wages and benefits and realizing the short-term payoffs of reduced labor costs. Indeed, many managers have realized their own personal rewards by taking such action. And labor leaders too have advanced the immediate interests of their membership by demanding and obtaining wage improvements, sometimes with little or no account taken of the productivity experience and competitive standing of the firm. These are practices that may have worked until now. No more. Competition demands that we change—soon. The recently negotiated Saturn agreement, which in many ways stands the traditional practice of industrial relations on its head is one example of that change.

In its February report, the committee on the evolution of work stresses that "unions must continually seek out and address new issues of concern to workers" as part of their process of revitalization. There can be no question but that the labor movement must attune itself to changes in the makeup of the labor forces and the newer concerns that workers bring to and encounter in their employment experience. Let me mention one. Actually a complex set of interrelated issues, that only recently has become prominent in the industrial relations arena. And it is one that I regret to say has yet to receive the attention and prompt the actions that it requires, whether by unions, employers or agencies of government.

Over the past few decades we have witnessed a dramatic and historically unprecedented increase in the labor force participation of women. Underlying this development is not only women's quest for equality in all facets of our country's economic and social life, but a basic fact of life: That is the need for families to secure the income required to achieve the standard of living to which they are entitled. Two-earner families have become the rule rather than the exception and single parent families headed by women with dependent children now constitute a group of sizeable proportions. In making these observations it is not my intent to lament the demise of the once traditional family structure with the proverbial male breadwinner, homemaker wife and 2.3 children, let along argue that any single family structure is best for this country. There are other forums and institutions in which such matters can be more properly discussed and debated. What we have is what we must deal with.

And what we must deal with, in management and govenment as well as union circles, is the distressing fact that our employment system continues to operate largely as though workers have no families at all. The employment conditions that prevail today in most organizations take little account of the fact that the vast majority of employees are inevitably and inextricably bound to two worlds: The world of work and the world on home and family life. What transpires in one cannot help but determine what is experienced in the other. Entering the factory gate or the office door does not mean that one sheds the role of spouse and parent in assuming the role of worker.

That these roles are often in conflict is nowhere better revealed than in the contemporary dilemma regarding child care. I see no need for me to recite the now familiar statistics about the numbers of employed husbands and wives who have young children at home nor the numbers of infants and children whose parents spend their days at work. Suffice it to say that these are staggering numbers, not only in their magnitude but in their implications for families and society. The fact of the matter is that vast numbers of employed parents, and particularly mothers who are single heads of households, are struggling, often in vain, to somehow reconcile their simultaneous and often conflicting roles as workers and child tenders. Where these conflicts are not satisfactorily resolved, every-

one loses—employers in terms of workforce instability and lost productivity, workers as a consequence of the psychological and physical strains they experience, and above all, children who are deprived of the care and attention they require to develop as healthy, happy and productive members of their communities. To borrow from the title of a classic treatise on our society, this too is "An American Dilemma."

Flexitime and other forms of alternative work scheduling can help us resolve this dilemma. There are more than 480,000 government employees who currently enjoy the privilege of adjusting their working hours to accommodate personal and family needs—I would like to see Congress enact legislation making this privilege a right. What I will not support are any changes in the laws that could jeopardize the rights and protections working people now enjoy.

I have people on flexitime at the Labor Department and, as a manager, I know it works for me. One of my employees was recently quoted in a New York Times story about flexitime. He summed up its impact on his life and I know his story is repeated thousands of times. He said "Flexitime has changed the quality of my family life in ways that money can't. It allows me to attend my third-graders Halloween party, to lead a girl scout troop and still put in my fair share at work for the taxpayer."

It is to the credit of some unions in this country that the various conflicts between work and family life, especially those having to do with child care, have been introduced into their action agendas. And I will note also, not parenthetically, that the work-family perplexity, experienced as it is more by women than by men, is not only a new issue in industrial relations but also suggests an appeal to the unorganized labor force of potentially great consequence. To the extent the labor movement is prepared to grapple with this problem in a major way it stands both to further improve its success as a champion of worker interests and to enlarge its membership and, hence, its influence in accomplishing its laudable goals for society.

One last word on this subject. On April 14 and 15 of next year the Labor Department will be co-sponsoring with the Bureau of National Affairs a conference, in cooperation with the AFL-CIO, that will focus greater national attention on the work-family dilemma and examine what some exemplary unions and employers have done to resolve it. I look forward to joining Tom Donahue and, I hope, many of you at that time. Finally, I might also mention that the National Association of Manufacturers will also serve as a cooperating organization, welcome testimony to the preparedness of management and labor—and government, I might add—to come together in a cooperative effort to deal with a matter of national concern. I hope to see many of you in Washington on April 14.

The history of the American worker is the history of the American Nation. Since Colonial Times, people have worked and struggled to better their lives. The development of the American worker reflects this struggle. By seeking better wages and working conditions, more opportunity for individual advancement and personal fulfillment, and increased security in both employment and life itself, working people have participated in the American Dream; they have, in fact, defined it.

The history of the American worker is by no means completed. As long as this Nation exists, working people and their unions will be, as they have always been, a source of its strength and its pride. In the years to come, working people and their unions will continue to grow with the Nation. I am grateful for the opportunity to join you in this effort.

Thank you very much.

ENVIRONMENTAL PROTECTION IS A WORLDWIDE CHALLENGE

HON. JOHN F. SEIBERLING

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SEIBERLING. Mr. Speaker, recently the Akron Beacon Journal contained an outstanding letter to the editor by one of my constituents, Maxwell Klayman, on the need to recognize that pollution of our environment is a global problem that surpasses even the ability of national governments to control. While national governments have an important, and, indeed, an essential role, international cooperation is also needed.

For example, Mr. Klayman pointed out that if the shallow waters of the ocean become so polluted that plankton cannot survive, the Earth's oxygen supply could become insufficient to support life. It is already well known that acid rain and pesticide pollution is carried across all national boundaries and requires some sort of international agreement, if it is to be brought under control.

To this end, the United Nation's Environmental Program [UNEP] is expected to develop guidelines to prevent ocean and atmospheric pollution. Unfortunately, funding is far too modest so far to perform this task. The Reagan administration earlier this year attempted to impose a 75-percent cut in the modest $10 million a year the United States contributes to UNEP. Fortunately, Congress insisted on continuing the funding at last year's level. However, the same problem may arise in next year's budget. It is essential that Congress realize that the continuation of a livable environment is not a luxury, which can safely be discarded.

The full text of Mr. Klayman's letter follows these remarks:

[From the Akron Beacon Journal, Oct. 2, 1985]

WORLDWIDE EFFORT NEEDED TO FIGHT POLLUTION EFFECTIVELY

"No country, not even a U.S.S.R. or U.S.A., can be an environmental fortress," says Mustafa K. Tolba, executive director of the United Nations Environmental Program.

The life-support systems of the Earth are under assault from pollution caused by industrialization, population pressures and new chemical and nuclear technologies. While the public has begun to recognize the need to stem this tide of pollution, many people still think a clean environment can be assured by their national government. They fail to understand that only an effective organization can adequately protect us.

The reason is simple: Pollutants cross oceans, travel great distances, cross national boundaries and severely impact on living conditions in other countries. Far worse, cumulatively such pollutants may bring about irreversible changes that could eventually rob us of life-sustaining oxygen or alter the Earth's climate, making our planet inhospitable to human survival.

Consider these facts:

Acid rain formed from nitrogen-oxide emissions spewing out of U.S. smokestacks falls on Canadian lakes, killing the fish and denuding surrounding forests.

Sweden documented acid rain's deadly effects in the 1970s and spent huge sums to clean up its own industrial sources, but Swedish lakes are still fouled by acid rain caused by emissions from the Ruhr Valley and Great Britain, where controls weren't enacted.

Scientists fear the ozone layer may be depleted by cumulative emissions from aerosol spray cans, refrigerants, nitrogen fertilizers and the jet burn from supersonic transports, but only Sweden and the United States have banned or controlled aerosol sprays.

The United States also aborted development of supersonic transports, in part because of the ozone controversy, but France and Britain launched their SST, the Concorde, anyway.

Carbon dioxide and ozone-depleting chemicals are increasing at rates that may alter the world's upper atmosphere and climate, causing partial melting of the polar ice caps and catastrophic flooding that could wipe out coastal cities.

Each year an area of crop and grassland as large as Maine becomes barren wasteland, while areas of forest equal to half the size of California disappear.

DDT sprayed in East Africa ends up in the Bay of Bengal, 4,000 miles away; 18 billion cubic meters of liquid pollution flow into the Atlantic yearly from French rivers alone; an oil spill off Mexico's coast fouls the coast of Texas, 500 miles distant; PCBs dumped in New York's Hudson River in the 1970s are still adversely affecting ocean organisms.

If the shallow waters of the continental shelves become so polluted that plankton cannot survive, Thor Heyerdal warns the Earth's oxygen supply would become insufficient to support life. He points out that half of the world's oxygen is produced by plankton. Many species of fish are also dependent on plankton for food.

The present United Nations Environmental Program was created to plan, coordinate and play a catalytic role in protecting the global environment.

While some progress has been made in monitoring ocean and atmosphere pollution, the United Nations itself concedes that not enough of UNEP's action plan has been implemented. The problem is lack of authority, as shown by this typical case:

UNEP got all the nations on the coast of the Mediterranean to jointly monitor pollution, and to restrict dumping of toxic pollutants from ships, but couldn't get them to set uniform standards for land-based pollution, the source of three-fourths of the problem. Since the bulk of this pollution comes from Italy, France and Spain, the southern countries balked at installing the same expensive pollution controls. Italy, France and Spain refused to act alone. Total cost was estimated at $10 billion, less than the world spends in one week on armaments.

Clearly, to adequately protect the Earth's life-support systems, UNEP should be given the authority to:

Develop appropriate guidelines to prevent ocean and atmospheric pollution.

Set up enforcement procedures, including fines, to stop violations.

Assess or be given other sources of autonomous funding to implement designated projects considered essential to world survival.

Mediate and/or arbitrate environmental disputes between nations.

Submit disputes between itself and nations to the World Court.

MAXWELL KLAYMAN.

WHAT HOOSIERS ARE THINKING

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington report for Wednesday, November 6, 1985, into the CONGRESSIONAL RECORD.

STATEMENT OF LEE HAMILTON

From time to time I try to assess the mood of Hoosiers, particularly the residents of the Ninth District, on the major issues of the day. To make the assessment, I consult the polls and review my mail and telephone calls. But principally I reflect on the scores of conversations I have had with Hoosiers in recent weeks, both in Indiana and in Washington. Some of my impressions follow.

Hoosiers are generally positive about the overall economy. In Washington we hear economists talk more frequently about a recession looming on the horizon, but I find no special concern among Hoosiers about a recession. Their concerns about inflation have lessened, but they still are quite uneasy about unemployment. No one talks to me about a rapid acceleration of the economy, as most seem to think the outlook is for modest, steady growth. The exception to this upbeat view is in agriculture. It is hard to find an optimist among farmers these days. Many Hoosiers believe that the economy is going through fundamental changes from employment in large manufacturing industries to employment in communications, high technology, and service industries.

What Hoosiers think about the role of government is always of special interest to me. Their attitudes about government are never easy to capture. Many believe that the economy would work better if the government stayed out of economic matters and left them to the market, and another large group believes that the government should mainly create incentives to support private initiatives. A smaller group of Hoosiers supports an interventionist role for government in the economy, favoring programs like public works and direct investment to create jobs. My feeling is that in periods of recession this latter group becomes much larger in number. Although generally skeptical about government's ability to solve social problems, they nontheless see areas where government should play a role, such as in social security, hazardous waste cleanup, and research in high technology areas.

Many Hoosiers think Government should concentrate on helping poor people and people in need. Support for defense remains high. While Hoosiers want to cap the President's military build-up, they strongly support military preparedness. They also want the government to help the struggling farmer, though they really do not have much confidence in the effectiveness of the federal farm programs. Arguing that there is now equal opportunity for everyone in America, many Hoosiers see a lesser role for government in civil rights. Other Hoosiers, fewer in number, still want to see government take steps to directly benefit minorities.

The thinking of Hoosiers on the federal deficit continues to crystallize. They almost all agree that the President and Congress should act to eliminate the deficits. When given the budget-balancing options of cutting defense spending, raising taxes, or cutting cost-of-living increases for social security, medicare, and other programs, most Hoosiers choose to cut defense. Recent upgrading of U.S. defenses plus the media coverage of defense contractor abuses have sharply reduced support for further boosts in defense spending. More and more of them now say to me that social spending has been cut enough, and a solid majority prefers no tax increase. More Hoosiers than one might think, but still a minority, think that the President and the Congress have no choice but to raise taxes. My hunch is that a bipartisan, compromise approach to deal aggressively with the deficit problem would garner strong support, even though there may be elements in the compromise that not everyone favored. I think Hoosiers would support a major across-the-board deficit reduction package, containing a curb on the growth of defense spending, a modest tax increase spread across a broad range of tax measures, and a cap on cost-of-living increases paid by the government.

Despite all the national attention, Hoosiers seem rather unmoved on the issue of tax reform and tax simplification. The President has failed to create a groundswell among Hoosiers for his tax proposals. At the same time, Hoosiers believe that the federal income tax is unfair, full of loopholes, and not understandable to the average person. They favor a simplified and easily understood income tax system. They are especially distressed that some people escape paying a fair share of taxes, and support a stronger minimum tax on higher-income individuals and corporations. Many Hoosiers speak to me against the President's tax proposal, and focus more on special provisions lost than on the overall rate reductions gained. A few speak to me in favor of it, and many urge Congress to prepare its own proposal. A solid majority of Hoosiers believes that it is more important for the President and the Congress to reduce the deficit than to reform the tax system.

The attitudes of Hoosiers on trade and U.S. competitiveness are still developing. The forces of protectionism are strong in Washington, but less so in Indiana. Hoosiers are becoming more concerned about trade issues, though instinctively they would prefer the expansion of exports to the limitation of imports. They understand that the American economy is tied to the world economy. They are concerned that our economic position in the world is declining and that the U.S. is becoming a debtor nation. They often blame our large trade deficit on unfair trade practices by countries that subsidize their exports to the U.S. and block American sales to their countries. Hoosiers are very much aware that many of their number have lost jobs because of foreign competition and imports, so they can see advantages to protecting manufacturing jobs and preventing further erosion of our industrial base. At the same time, I find they want an opportunity to compete, a reflection, I suppose, of the traditional competitive spirit of the United States. Overall, my sense is that Hoosiers' attitudes on trade, competitiveness, and protection are currently in a state of flux.

While hoosiers are optimistic about the future, they recognize that hard choices on spending, taxes, and trade lie ahead.

ASYLUM FOR SOUTH AFRICANS

HON. MAJOR R. OWENS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. OWENS. Mr. Speaker, I introduced House Concurrent Resolution 175 in July. It calls for the granting of asylum to South Africans who refuse to defend apartheid by force of arms. Asylum for these young men is necessary as refusal to enter the military is tried under a statute which presumes guilt and which invariably ends with the maximum 6-year sentence. That sentence is then served in a military disciplinary barracks where consciencious objectors are subjected to frequent and prolonged solitary confinement.

It is important for us to recognize that refusal to serve in the South African military had been occurring for some time. In the late 1970's our policy was to grant asylum to these young men. Now that the situation has grown worse and members of the military are called upon to fire into crowds with live bullets, gas, et cetera, asylum is not being granted. Our change in policy also coincided with a change in South African law which eliminated consciencious objector status for all except the very small minority who are members of the historic peace churches.

News of House Concurrent Resolution 175 apparently appeared in the South African press, as a result, I received the letter which follows from a young man there.

DEAR CONGRESSMAN OWENS: I read with avid interest an article in a South African newspaper last week concerning your intention to introduce a resolution in Congress that will grant white South Africans, who refuse to join the South African Defence Force, political asylum. It is generally assumed worldwide that if you are white and South African, you are racist. Evidence can be found to prove this when sportsmen from South Africa are barred from entering certain events overseas. No consideration is given to their personal views; the fact that they are South African means that they cannot participate.

I am a firm believer in the statement "you must fight for your country", but in the context of South Africa one must ascertain what this entails. You are most probably aware that a State of Emergency exists in certain areas of the country. It is the army that is going into those areas and acting against the population. How can an army act against its own population? I do not want to be a part of such an army. If I must join an army it must be an army that fights for peace and democracy for the whole population.

When you grow up under such a system (a system that bears a remarkable resemblance to Nazi Germany, I might add), you either grow up and support the system or you see the faults and you oppose it. I fall in the latter category. I am a white male, nineteen years of age and currently studying in second year for a Bachelor of Commerce degree at the local university. In short, I have derived all the benefits that such a system has to offer. A good education, voting rights and superior facilities to name just a few. But there are millions of other "South Africans" who have been denied the same opportunities and I refuse to join the army and fight these people—they also have a right to live.

I am an optimist, but I'm afraid that when it comes to South Africa I have my doubts. Only a few days ago the Leader of the Opposition, Dr. van Zyl Slabbert, stated that the country is slipping into civil war. I tend to agree with that opinion.

The South African Government has resorted to force to keep their beliefs alive. This force is fruitless as the battle for South Africa cannot be won with the gun; South Africa will only see peace when all parties have solved the problem diplomatically. In the meantime the escalation of violence continues.

In conclusion, I would like to offer my services to you in your attempt to get the resolution passed, or in any other attempts you may have to bring peace and justice to South Africa. Please do not hesitate to contact me at the above address.

Yours faithfully,

(Name withheld).

I urge my colleagues to join with me in this effort to see that asylum is granted to those South Africans who do not wish to be a part of the violence of apartheid.

THE BUDGETARY "GNP-GAP"

HON. GUY VANDER JAGT

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. VANDER JAGT. Mr. Speaker, when the subject of taxes arises, when discussions revolve around fiscal responsibility and financial obligations and when decisions are being made as to how best to deal with those matters and questions, I have relied to a great extent on the wisdom, opinions, and on the judgment of Tom Martin, certainly one of the outstanding former minority staff directors of the House Committee on Ways and Means.

In recent days, Tom brought to my attention an excellent newspaper article by Vice President GEORGE BUSH, which appeared in the Washington Times on November 1, 1985. The Vice President is right on target. Through reading this article and discussing important points with Tom, I was reminded once more of the critical need for comprehensive action to address budget deficits. How much longer are we prepared to wait and more importantly, how much longer can our country and our citizens wait for us?

I fully share the concern of our Nation that watches as the Congress currently dabbles and doodles amid a budgetary deadlock that threatens the fiscal integrity and economic viability of America—the greatest nation on the face of the Earth—the nation that is the economic leader of the free world—the nation that safeguards humanity's freedom against the forces of Communist tyranny.

With economic opportunity and human freedom on the line, the continued operation of our country is jeopardized by the refusal of congressional big spenders to pursue a fiscally responsible course in the management of the public debt and in the conduct of our budgetary affairs. If the Congress does not act within the next few days to pass responsible and meaningful debt-ceiling legislation, the Federal Government's ability to function, to meet its obligations, to discharge its responsibilities will come to an abrupt end.

The problem arises because we have profligately spent the last penny in the Treasury till; we are out of money and we are out of credit. The statutory ceiling on the public debt has been reached. We cannot spend more until the Congress approves the pending Balanced Budget and Emergency Deficit Control Act of 1985 or some stopgap alternative response to the fiscal logjam.

This crisis that now so critically confronts the Congress is not an unforeseen or inadvertent development. Fiscally responsible Members of Congress have repeatedly forewarned that budgetary forbearance was an essential precondition of a solvent government and that dire consequences were certain to ensure in its absence. For 30 years, the congressional big spenders have expediently and prodigally ignored that warning and shunned the course of fiscal responsibility.

What might be labeled the GNP-GAP—the excess of the percent of gross national product that Congress votes to spend over the GNP percent it is willing to tax—has insidiously increased. Unrestrained Federal spending has widened the GNP-GAP over the decades and the consequent burgeoning Federal debt has brought us to the existing fiscal brink. In the past 30 years, Federal spending as a percent of gross national product has risen from 18 to 25 percent while taxes have risen from 18 percent of GNP to 20 percent. The escalating point spread in the GNP-GAP has been imprudently countered by the indulgent acceptance of an obscene explosion in the public indebtedness.

Charles Dickens' Mr. Micawber once opined in the pages of David Copperfield:

Annual income twenty pounds, annual expenditure nineteen nineteen six, result happiness. Annual income twenty pounds, annual expenditure twenty pounds ought and six, result misery.

So as it was with Mr. Micawber, it is now also with the Congress—and misery is upon us.

A responsible course of action for the Nation to follow in dealing with this urgent fiscal/budgetary problem has been aptly outlined by the Nation's distinguished Vice President in a commentary which appeared in the November first edition of the Washington Times. Vice President BUSH states that the way out of our dilemma begins with the adoption of the Gramm-Rudman-Hollings amendment now pending in the Congress; and the remedy continues in the long run with improved fiscal discipline through legislative spending restraint, restoration of impoundment authority to the President, and the adoption of a balanced budget amendment to the Constitution. Under these procedures the GNP-GAP would no longer plague the Nation with Macawber-like fiscal misery, and the congressional spenders would have to choose between higher taxes to pay for their higher spending or lower spending so the Nation would live within its means.

Vice President BUSH's comment from the Washington Times is submitted for your consideration.

[From the Washington Times, Nov. 1, 1985]

TAMING THE DEFICIT MONSTER

(By George Bush)

It is time to bring the debate and discussion to a halt on the question of whether or not to surrender to huge federal budget deficits. The answer lies in immediately reforming and disciplining the process by which the federal government makes its spending decisions and puts its budget in place.

The budget deficit is a spending problem, not a tax problem. In the last 30 years, spending rose from 18 percent of the gross national product to 25 percent. During that same period, receipts rose from 18 percent of the GNP to 20 percent, even after the Reagan administration's tax cuts. If we don't control growth in spending, we can't cut the deficit, even with higher taxes.

Only the federal government has systematically and deliberately spent more than it takes in through revenues. The federal government rationale to run a deficit outside of wartime was developed a few decades ago. The idea at the time was that running a deficit would bring about economic growth, new employment, and stabilization of the business cycle. Additionally, deficit spending made it possible to satisfy the claims of every interest group that came looking to the federal government for money, a boon for politicians trying to please all constituents back home.

Everyone knew that increasing taxes would stifle the economy by diverting resources from the efficient private sector to the less efficient public sector, but deficits helped officials avoid confronting the problem.

As a result, deficits became addictive. For 24 of the last 25 years, the federal government's expenditures have exceeded its revenues. Nobody bothered with the old theoretical justifications about stimulating the economy through deficits or curing unemployment, because a deficit was routine in federal budgeting.

Deficits could have been avoided during this period as federal revenues grew by more than $600 billion, or nearly 700 percent. During those 25 years, annual spending grew almost 950 percent, or $800 billion. The federal government now spends $4,200 a year on every man, woman, and child, compared to $470 in 1960.

Unchecked federal spending resulted from two important factors. The first element was the strength of our economy and the sustained pace of real growth resulting from work-force increases, healthy productivity gains from new technologies, stable or de-

clining real energy prices, and the demand for exports fueled by the return to economic health of the devastated economies of Europe and Japan.

The second component in increased spending was inflation. The federal tax system grew bigger, feeding off inflation to push up tax rates automatically. What Congress would never vote to do—raise taxes by tens of billions of dollars each year—happened all by itself through "bracket creep" and the devaluation of business expense deductions and depreciation allowances.

In the 1970s, a third factor contributed to uncontrolled government spending, and that was the "peace dividend" that resulted from a significant decrease in defense spending. It went from $106 billion in 1968 to $67 billion in 1976.

In effect, the federal government put in place a massive structure of programs that required constant revenue feeding. Spending more and more of the taxpayers' money became a completely painless exercise for government officials.

The automatic tax increase resulting from the interaction between the federal tax system and inflation began to falter in the late 1970s under the Carter administration. Productivity faltered, inflation soared, and interest rates skyrocketed.

The Reagan administration in 1981 implemented an economic program which effectively stripped away the veil that covered the mechanisms behind federal spending increases. Tax brackets were indexed, and the inflation rate was lowered.

We've been contining to chip away at excess spending, but we barely have begun to roll back the excesses of the prior 20 years. But it's not because we haven't tried. The Reagan administration has proposed more than $600 billion in spending reductions during the past five years. The problem is that Congress has rejected about half of those spending reductions, preferring instead to finance excess spending on credit and to let government control more and more of the resources in our economy.

How can we get back on a path that leads up to a balanced budget that will keep government from growing faster than the private economy? The answer, of course, lies in disciplined federal spending.

In the executive branch, we are fairly well organized. The president sets spending targets in the fall, the various departments follow up with budget submissions, and then tough choices are made on what to fund and what to cut.

After the budget is ready, it is sent to Congress, where the budget is reshaped and reworked and redone through a lengthy, laborious process. We arrived at the start of this fiscal year without a single appropriations bill ready to be signed by the president. Also, only four bills have been passed by Congress out of 13 bills required to pass funding for the entire government. The budget-spending process has gone out of control.

What we need is discipline in developing a federal budget—discipline and reform.

I believe we can reach the ultimate goal of a balanced budget in two ways. One solution is to undo the erosion in the president's authority to control spending that happened when Congress stripped away his authority to withhold spending in the 1974 Budget and Impoundment Control Act. One route to giving the president this authorize a line-item veto.

Here is one example of why this authorization is critical. Under the Constitution, the Congress has to pass a law to authorize any part of the federal government to spend money. The yearly funding for the federal government is contained in a set of bills, each of which funds a different set of federal programs.

One of those 13 bills for 1985, the Energy and Water Development Appropriations Act, contains a provision to appropriate $1.3 million to pump sand onto a beach in New Jersey. In the same bill, a second provision calls for spending more than $7.3 billion for research, development, and construction of the U.S. nuclear arsenal. In order to veto one provision of the bill, the president must veto the entire bill. With a line-item veto, Congress wouldn't be able to piggyback pork-barrel spending on critical national security programs.

The second major step we can take to bring this spending juggernaut under control is to enact a balanced-budget amendment to our nation's Constitution. Forty-seven states have such an amendment for state budgets.

With the balanced-budget amendment, a line-item veto, and a strengthened budget process that would result from adoption of the Gramm-Rudman proposal by the Congress, the era of spending binges can be put behind us.

AMERICA'S SUCCESSFUL STEEL INDUSTRY

HON. JOE BARTON

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. BARTON of Texas. Mr. Speaker, we are all familiar with the troubles that have plagued the U.S. steel industry over the past decade. Since 1977, 20 steel plants have been closed down or idled. Production has fallen by 10 million metric tons a year. Employment has plummetted by over 45 percent and 200,000 jobs have been lost. Years of inadequate capital investment in plant robbed the U.S. steel industry of its competitive edge and doomed American companies to a losing battle with foreign steel companies. We fell behind the competition and after years of trade restraints the United States is still struggling to catch up with our rivals.

However, it appears that the problems that we all associate with the U.S. steel industry may be particular to big steel. The unsung story of the steel industry over the past 10 years is the success of small steel companies, the "minimills," in meeting the challenge of foreign competition. Little steel now accounts for 20 percent of the domestic market and matches the share of foreign imports. In 1960, little steel accounted for only 2 percent of the domestic market. Some estimates indicate that their share could rise to 40 percent by the year 2000.

There are a number of elements in the success of little steel in meeting the challenge from foreign competition, including the fact that most of these minimills use nonunion labor. However, the most important element in the success of little steel is aggressive and far-sighted management. Instead of banking their earnings, the management of little steel plowed them back into the plant. It is important to note that the average age of plant machinery in a minimill is 9.4 years compared to 22 years in integrated steel plants.

The inspiring success of little steel is perhaps best exemplified by the Chaparral Steel Co. in Midlothian, TX. The average production for a steelworker in the United States is 350 tons per year while Japanese workers produce 850 tons. A steelworker at Chaparral produces 1,300 tons of steel per year. I am proud to say that the Chaparral plant is in my congressional district. Following is an article on the plant that appeared in the Washington Monthly in February 1985. I commend Mr. Kurt Eichenwald for his fine article.

[From the Washington Monthly, Feb. 1985]

AMERICA'S SUCCESSFUL STEEL INDUSTRY

(By Kurt Eichenwald)

Rather than complain about foreign competition, Big Steel should look at mini-mills like Chaparral here at home.

You don't have to be an economist to know that the big steel companies are in trouble. Since 1977 they have closed or idled some 20 plants or parts of plants. Production capacity has shrunk by about ten million metric tons per year—roughly 8 percent—and from 1979 to 1982, the number of steelworkers with jobs plummeted from 453,000 to 247,000—45 percent.

If you listen to the industry lobbyists who troop down to Washington each year to demand government relief, you probably think that foreign competitors are to blame for big steel's troubles. The Japanese and Koreans aren't fair traders, the lobbyists argue; they subsidize their steel industries and throw up tariffs to keep out Amercian products. To complete, this argument concludes, we need import quotas on foreign steel.

But there's a significant flaw in this argument—a lot of the competition is already inside the gate. While the heads of big steel have been in Washington seeking protection, a high-tech, non-union sector of the steel industry right here in the United States has been quietly snatching up their markets. These "mini-mills" now have 20 percent of the domestic steel market and match the share taken by foreign competitors.

How have the minis managed to succeed in an industry littered with failure and bankruptcy? To find out, I paid a visit to one—the Chaparral Steel Company in Midlothian, Texas. In 1982, the year U.S. Steel's losses totaled more than $2.5 billion, Chaparral turned a profit of $11 million. Granted, mini-mills like Chaparral owe much of their success to their ability to ride piggyback on their big, inflexible competitors by working from scrap steel (more on this later). But to a surprising extent the success of mini-mills in general, and Chaparral in particular, rests on elementary principles of management that are accessible to big steel—principles that American industry has neglected for too long.

GOBBLING REFRIGERATORS

Midlothian is not the first place you'd think to look for a successful steel mill. A ranch and farming community 25 miles outside of Dallas with a population of 3,000 before the mill was built, the town was best known for its rolling hills, similar to those of its Scottish namesake. But in 1973, when

Texas Industries (TXI), a cement company, and Co-Steel of Canada, were looking for a place to build a steel mill as a joint venture. Midlothian seemed perfect. For one thing, it was near large power supplies, highways, and railroads. The choice was sealed when Gerald Heffernan, Co-Steel chairman, saw the Chamber of Commerce bulletin board, which proclaimed, "Need money? Try working." Most people in the area had never worked at a steel mill, and that suited management just fine. "We didn't want people who had learned bad work habits," one executive told me.

TXI's move to start up its own steel company seemed like good business sense. After all, it was in the concrete business, and every concrete building needs steel reinforcement. So, thinking there was an impending reinforcing bar shortage, TXI decided to set up its own steel mill. Unfortunately the shortage never happened, so when Chaparral first began churning out steel, a glut of reinforcing bar put the company in the same boat as big steel—the supply exceeded the demand. "We had to diversify, and fast," Chaparral's vice president, Dennis Beach, told me.

Fortunately, Chaparral was a mini-mill. The term "mini-mill" is a bit of a misnomer; mini-mills are not just smaller versions of the bigger, "integrated" mills that covert pig iron into steel. Rather they are recycling plants. Instead of making steel from scratch, they gobble up scrap steel like junked cars and refrigerators and convert them into usable steel products. This allows the mini-mills to eliminate several steps in the steelmaking process. The result: enormous flexibility.

In an integrated plant, a combination of iron ore and scrap is mixed in a furnace. After six hours, you have molten steel. Once the brew is cooked, it's generally poured out in the form of ingots. Like all cast steel, ingots have to be rolled like dough into proper shape. Because ingots usually have defective surface that have to be ground down or burned off, they are reheated and rolled one more time into their final shape.

In a mini-mill, by contrast, there's no iron ore—just scrap—and the electric furnace in which it's cooked can produce molten steel in a little less than two hours. The molten steel is then pored immediately through casting molds, cooled and hardened by water, in a process known as "continuous casting." That skips the ingot phase and, consequently, the need for two rollings. After the steel is cast, it can be rolled immediately into the final product.

Since continuous casting does not preclude the use of iron ore, it is at least theortically as accessible to the integrated steel mills as it is to mini-mills. But the advantages of continuous casting did not become obvious until the last decade, with the result that the newer mini-mills were able to take advantage of the new technology, while big steel, which cut back on capital investment in the seventies, did not. (The average age of the machinery at an integrated mill is 22 years as compared to 9.4 years at a mini-mill.) The amount of steel produced through continuous casting in the United States since 1971 has increased less than 20 percent—and is disproportionately concentrated in the mini-mills—while the Japanese have increased the use of continuous casting by nearly 60 percent.0

FREE COFFEE

Superior technology is one reason the minimills maintain such an impressive level of productivity. The average production for a steelworker in the United States is 350 tons a year. In Japan, it's 850. At Chaparral, the average employee churns out 1,300 tons a year—and that is expected to increase. Chaparral produced nearly one million tons of steel this year.

But technology isn't the whole story. The "us" versus "them" mentality that drove big steel into a deadlock between management and labor is largely absent at Chaparral; instead there's a sense of shared commitment, sacrifice, and pride. "Don't call us steelworkers," one Chaparral veteran says, "we're Chaparral people"—a statement that would mark one as a hopeless patsy to management in many of the steel plants up north.

Every Chaparral person I talked with had that same sense of collective pride. "I want to be the best roller out there," Neil Parker told me. "And I'm sure every other roller feels the same way. I want this to be the top steel mill in the world." You see signs of this spirit as you walk through the plant. In the administrative offices hangs a picture of about 40 workers sitting on a new furnance, with the inscription, "Chaparral Steel Company, World Record, October, 1982—67,888 tons cast." A worker bragged to me about a letter that the company president wrote complimenting him for breaking a shipping record. Work crews compete to be the most productive. Michael Oliver, a pulpit operator, told me, "It's just like being on a football team. I love it."

How has Chaparral sparked that kind of competitive spirit in its people, to the point that the plant runs at 89.1 percent capacity, compared to 60 percent for much of the steel industry? The commitment certainly doesn't come from the pay scale. At about $15 an hour, workers make less than they might in union steel mills or other industries. Indeed, the fact that there hasn't been a pay raise at the plant for the past two years has led to some carping among workers at Chaparral. But the complaint doesn't have quite the hard edge you'd find elsewhere. One reason is the absence of the sort of stiffling seniority rules, common at other big steel mills, that guarantee a promotion to the person who's been around the longest, regardless of whether somebody else with less seniority can do the job better. At Chaparral, promotions are based on merit. The result: workers are motivated to make a better effort, rather than just put in their time.

Another reason is that everyone from the president on down has a share in 6 percent of the company's pre-tax profits. The profit-sharing is distributed on a sliding scale that comes out to between 9 and 20 percent of wages.

In addition to giving workers a share in the outcome, Chaparral gives them a major share in the decisions. Decision-making is pushed all the way down to the shop floor—and with only four layers of management, that's not all that far. (By comparison, U.S. Steel until recently had 11 such layers; now it has eight.) Workers aren't just encouraged to try out their ideas for improving productivity; it's considered part of their job. "We don't have a suggestion box around here," Beach said. "If somebody's got a suggestion, they either do it or tell us what they need to do it."

Executives may make the recommendations to foremen for potential employees, but it's the foremen who make the final hiring decisions. After all, it's the foremen who work with the crews. Similarly, when out-of-state customers have a complaint, production employees with hands-on familiarity with the product are flown out with the sales people to look into the problem and see what can be done to correct it. When they return, they use what they've learned to help make changes that will keep the problem from recurring.

The result is a working environment that is largely free of hierarchy. There is no executive parking. Training classes and foreman/worker meetings take place in the corporate boardroom. The chief of the janitorial crew dictates his letters to the president's secretary. The executive offices are located in the plant's locker room building. There are no time clocks. Everyone is on a first-name basis. Everybody gets free coffee in the morning. Gordon Forward, the company president and a refugee from big steel bureaucracy, had always found it "amazing" that at most companies "management could have free coffee and there was some second-class citizen who couldn't, or there was some second-class citizen who had to park outside the gate or punch a time clock because we didn't trust them." The trust pays off: absenteeism at Chaparral is about 2 percent compared to an industry average of roughly 6 percent.

Faith in the workers' competence is absolute. When Chaparral was designing the medium section mill that it built in 1982, it pulled mill managers off the floor and asked them what they thought they needed. Innovations for the mill came from the managers, who told the engineers the specifications they believed necessary for efficient production. The result was a mill made of German and Japanese technology, with a few parts that were pure Chaparral.

HOMEMADE CONSTRUCTION

Another key to Chaparral's high morale is that no employee has ever been laid off. In December 1981, thanks to soaring production, managers figured that there were about 40 more employees than they needed to fill the orders at hand. But instead of laying people off, Chaparral put them to work. The company was just completing construction of its medium section mill through a contractor. Chaparral polled its employees concerning their experience in construction. The outside contractor was sent home and Chaparral's own crew of steelworkers was put to work with hammers and saws to complete the new plant.

Small wonder efforts to unionize the mill failed. In 1977 the United Steelworkers led a union drive that was soundly rejected: with 98 percent of the workers voting, 73 percent cast their ballots against unionizing the plant. Among the workers I spoke with, there was unanimous agreement that keeping the union out was a key factor in the plant's productivity. Joe Barcevac, a former worker at U.S. Steel's South Works plant in Chicago, told me, "At the other mill I was stuck in a craft line. I couldn't help somebody in a different job, and he couldn't help me. That was because of the union. Here we do what we have to to get the job done."

In fact, it's hard to find anybody at Chaparral who has anything good to say about labor unions—that is, until you walk over to the management offices. Their main suspect for the steel industry killer? Management. "I think the attitude taken by other companies is unnecessarily adversarial," Beach told me. "If they treat their employees like units, then of course they'll band together in a union. But if they treat the union like an adversary, they're guaranteed a stalemate." Forward agrees. "If you treat your

employees like a number," he said, "then you deserve a union."

MOUNTAINS OF SCRAP

In 1960, the minis were to big steel what competitors were to Ma Bell—inconsequential and on the fringe. There were only 10 to 12 minis taking up about 2 percent of the steel market. But since then the mills have exploded onto the scene, with more than 50 producing approximately 14 million metric tons of steel per year. It is now estimated that the minis may capture as much as 40 percent of the American steel market by the year 2000.

It's ironic that this success story is attributable in no small part of the big steel's smug attitude during its heyday. Protected from the free market to which they professed their devotion, the big companies set their prices as though it were manifest destiny that American steel would always be number one. Steel was a classic oligopoly, with the United States Steel Corporation, the unchallenged industry leader, determining the price structure of the entire industry. But to avoid the searching eyes of the trust busters, U.S. Steel made certain that its prices wouldn't put other, less efficient companies out of the market. So the industry protected its noncompetitive members through a price structure that enabled these companies to stay in the black. In effect, this kept the entire steel industry only as competitive as its least efficient producer.

Throughout the 1950s, steel prices were grossly distorted. Despite slumping demand, they increased an average of 5.8 percent annually throughout the decade, compared to 2 percent for wholesale products, according to the Bureau of Labor Statistics. As any smart capitalist should have known, that price umbrella made the appearance of more efficient, more productive mills almost inevitable.

The minis' boom during the 1970s was fueled by two factors. One was the increasing demands of the United Steelworkers. From 1969 to 1981 labor costs rose an average of 11.6 percent a year, helping to price the big companies out of many of the markets that the minis were all too eager to snatch up. The second factor was the technological advances that were propelling foreign companies into a competitive position with big steel. By adopting these new technologies, mini-mills significantly lowered their capital costs in relation to big steel's. In 1980 the Office of Technology Assessment showed how big those differences in costs could be. In 1978 dollars, the estimates range from $154 to $320 per metric ton of annual capacity for a minimill as compared to the $956 to $1,500 for an integrated plant.

A further factor is the cooperative style of management so evident at Chaparral and other mini-mills. The profit-sharing plans, employee stock opportunities, scholarship programs for the workers' children, and the like are akin to the cooperative practices used so successfully in Japan. In fact, one of the most successful mini-mill companies, Nucor Corporation of North Carolina, embraces the principle of lifetime employment.

The particular niche that the mini-mills found—conversion of scrap steel into new steel products—brought scorn from big steel. "They're in what we call the junk end of the business," one executive told Fortune back in 1978, "and they can have it." But the same article noted that, thanks in large part to the efforts of big steel over the last couple of generations, there are 2.3 billion tons of steel sitting out there—more than ten tons for every man, woman, and child in America—and all of that is potential scrap for the mini-mills. It's especially delicious to consider that every foreign automobile that rolls off the docks is another potential morsel for the electric furnaces. For technical reasons, the minis at present are unable to make sheet steel, which keeps them out of a substantial portion of the market right now. But at least one mini-mill company—Nucor—has already begun to explore this area.

None of this is good news to the shell-shocked steel executives demanding government bailouts or to their counterparts at the Steelworkers union. The trim mini-mill bureaucracy, with its salary levels sharply below those of big steel, may not appeal to the execs—any more than the blue-collar wages and high productivity standards appeal to the Steelworkers. And the prospect of abandoning their adversarial positions for some form of cooperation seems equally distasteful to both. But with mini-mills like Chaparral popping up, it's clear that there is a healthy steel industry in this country.

IT'S TIME TO PUT HEAT ON MARCOS

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SOLARZ. Mr. Speaker, a discredited leadership, a declining economy, and a growing Communist insurgency have placed the future of the Philippines, a nation with which the United States has had a long and historic relationship, in jeopardy.

As evidenced by Senator LAXALT's recent trip to Manila, the United States can no longer afford to operate on a "business as usual" basis with President Marcos. Instead, we must be prepared to use our influence to bring about urgently needed reforms.

Senator BILL BRADLEY, in a recent op-ed piece in the New York Times, accurately describes the challenges and options facing the United States in formulating a responsible policy toward the Philippines. It is my hope that all policymakers have the opportunity to read Senator BRADLEY's article. I have included his remarks in the RECORD for the benefit of my colleagues:

IT'S TIME TO PUT HEAT ON MARCOS

(By Bill Bradley)

WASHINGTON.—There is a consensus here about what is wrong in the Philippines. But there seems to be a kind of paralysis about what to do.

First, everyone agrees that Ferdinand E. Marcos has presided over the unchecked spread of a nationwide Communist insurgency. Second, no one disputes that Mr. Marcos has stubbornly rejected warnings that unless he undertakes major reforms soon, the opportunity to revive democracy, regain prosperity and restore security will be lost. Third, policy makers even agree on specific reforms he must make to insure fair elections, free the economy from the monopolistic grip of his cronies and revitalize the leadership of the armed forces.

As Senator Paul Laxalt told Mr. Marcos during a recent visit to the Philippines, important American interests are at stake. If the Communists take over, we are virtually certain to lose our military access to the bases at Clark Field and Subic Bay. The Filipino people would lose any chance for a democratic future. Worst of all, a ruthless Communist regime is likely to turn the Philippines into a brutalized, stagnant society, like Vietnam and Cambodia, and would allow the Soviet Union to replace America as its military partner.

What is so frustrating about this consensus is its failure to produce a solution. High-level warnings to Mr. Marcos have fallen on deaf ears. The reason is that the reforms he must make to turn the tide against the insurgency will also remove the political and economic foundation of his regime, perhaps putting his own life in jeopardy.

Indeed, Mr. Marcos may lack the capacity to carry out the necessary reforms. It's unlikely, for example, that he will confront the power and wealth of many of his corrupt cronies to restore genuine competition to the marketplace. At most, he might be able to deliver free and fair elections—if he devotes himself wholeheartedly to the task. So far, he has shown little inclination to do so.

In due course, America will probably have to choose between supporting Mr. Marcos or supporting the democratic process. Our future position in the Philippines rests not with a dictator but with democracy, which alone gives people hope of a better society without revolution.

Most Filipinos retain respect and affection for the United States. These feelings are a major source of strength we must now openly use or lose. We must sever the symbolic link the Communists are forging with their rallying cry of a "U.S.-Marcos dictatorship." We must put Mr. Marcos on notice that our interests in Filipino democracy will no longer be held hostage to a rigged election. We must let the Filipino people know we will no longer acquiesce in his continued abuses of power.

We may have to establish a timetable for electoral reform if Mr. Marcos lacks the will or capacity. To ease his resignation, we should offer him and his family safe passage and sanctuary for his retirement. We must also be prepared to provide a worthy successor to Mr. Marcos with the additional security assistance needed to restore democracy—not, as Mr. Marcos has used it, to prop up his cronies and loyalists.

President Reagan believes there is still time to persuade Mr. Marcos of the error of his ways and set his regime on a new course. But time is running out. The Administration temporizes, transfixed by the ghosts of old friends in Cuba, Vietnam and Iran. These are false, hence dangerous, parallels. Breaking with Mr. Marcos is not a signal that we are abandoning the Philippines to the Communists. On the contrary, it signals our commitment to seeing democracy restored. The sure way to betray that good will and bring about the Communist victory we are eager to thwart is to slight the democratic option. Then the tide of revolution will sweep away not only the dictator but also future American influence in the Philippines.

This grim reality requires us to act promptly. It is time to speak publicly to the Philippine people, pledging our support for the democratic process. Only by giving Mr. Marcos this kind of ultimatum can we open the way for the free and fair elections upon

which any successful counterinsurgency must be based and upon which the future of the Philippines depends.

CURRENT TRENDS IN U.S. COAL EXPORTS TO THE PACIFIC RIM

HON. NICK JOE RAHALL II

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. RAHALL. Mr. Speaker, Japan has traditionally been one of the largest importers of United States coal, especially coal of metallurgical grade for use in the steelmaking process.

In fact, in 1984 Japan accounted for 20 percent of total United States coal exports, purchasing 16.3 million short tons.

There is no doubt that Japan is a long-standing and important market for United States coal, and West Virginia coal in particular. But in recent years, the United States share of the Japanese coal market has begun to evaporate as that country increases its purchases of coal from other exporting nations.

In 1982, the United States had a 32-percent share of the Japanese coal market. Last year, the United States was barely hanging on to an 18-percent share and during the first 8 months of 1985, this figure plummeted to a mere 15.7-percent market share.

Meanwhile, Australia, Canada, South Africa, and the People's Republic of China all increased their share of the Japanese coal market. Last year, Australia held a 47-percent share of the Japanese coal market, Canada an 18-percent share, South Africa a 9-percent share, and the People's Republic of China a 5-percent share.

This decline in U.S. market share has hit West Virginia metallurgical coal producers especially hard. In 1980, for example, West Virginia shipped 9.5 million metric tons of coal to Japan. In 1984, this figure dropped to 5.3 million metric tons of coal.

One of the reasons given for this decline in the United States share of the Japanese coal market is the price of our coal, which is of a higher quality and more expensive than export coal from other nations.

However, the Japanese have been very artful in creating an excess capacity of coal from their suppliers. Through institutions such as the Japan Coal Development Corp., New Energy Development Organization, the Federation of Electric Power Co's., and the Electric Power Development Co., along with the Japanese Ministry of International Trade and Industry, new coal mines in Canada and Australia were constructed receiving huge loans from Japanese institutions. Japan is also involved in coal projects in the Soviet Union and the People's Republic of China.

As such, today, many United States coal producers are being forced to accept below or near-cost prices assuming the Japanese will take their production at all.

Since the United States-Japanese coal trade is about a $1.5-billion a year item, increased coal sales to Japan offers the United States the ability to reduce the skyrocketing trade imbalance between the two nations.

Certain diplomatic efforts toward this end have been initiated, such as the formation of the United States-Japan Energy Working Group in 1983 and the November 1983 Joint Policy Statement on Energy Cooperation. However, to date, these efforts have not been of great success. It should also be noted that even as late as last month, the President raised the coal trade issue with Prime Minister Nakasone during their meeting in New York.

I believe that given the current mood of the American people toward reducing the United States trade deficit, it is time to escalate efforts to increase the coal trade with Japan. In this regard, I will seek to meet with high-level Japanese coal buyers in the near future to impress upon them the importance this trade holds for West Virginia and other coal producing regions.

I also believe there are other Pacific Rim countries which hold great promise for West Virginia coal. Taiwan, for instance, increased its purchases of United States coal by almost 35 percent between 1983 and 1984. This trend has continued into 1985. During the first half of this year, United States coal exports to Taiwan have increased by 170 percent over the level established during the same period in 1984.

Clearly, this relationship should be nurtured and and continued.

DEBT LIMIT CRISIS

HON. DAN SCHAEFER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SCHAEFER. Mr. Speaker, committed. It is a word I am finding increasingly difficult to use when describing some Members of this House of Representatives. We are not committed to reducing the deficit. We are not committed to balancing the Federal budget. Worst of all, we're not committed to the American people.

Last Friday evening, this body voted to adjourn without first resolving—even temporarily—the debt limit crisis. In so doing, we left a cloud of uncertainty over this country, while we enjoyed our weekend. Worse than that, some have led our Nation's Social Security recipients to believe that unless we passed last-minute legislation to extend the debt limit 5 days, their benefits would somehow be affected. As it turns out, this is only one of a series of deceptions by some of my colleagues.

The majority party also led us to believe that if the House failed to pass a 5-day extension of the debt limit, the Treasury Department would be forced to disinvest the trust fund. Heralded as the bill to save the fund, the temporary extension passed. Why then, was Treasury forced to disinvest $17 billion in Social Security Trust Funds, costing the fund millions of dollars in lost interest?

Simply because the majority party, knowing well the consequences, voted to adjourn and leave the Senate no course of action but to allow the trust fund to be disinvested. When the Senate acted on the measure well after midnight Friday, the halls of the House of Representatives were long since dark. For 8 hours earlier, the House had adjourned, knowing that no one would be present to receive and consider the Senate-modified bill. Without this House consideration, the 5-day extension bill designed to protect the trust fund died a speedy death at the hands of those voting to adjourn. Despite being the self-proclaimed saviors of Social Security, 205 of the 207 yea votes for adjournment were cast by members of the majority party.

In an attempt to cloud over this blatant display of irresponsibility, the majority has somehow associated a vote against the 5-day extension as a vote in favor of disinvestment. Mr. Speaker, I don't care if the vote is to extend the national debt for 5 days or 5 minutes, I will not support a bill which allows the Government to go deeper in debt unless we simultaneously adopt a binding resolution which will significantly reduce Federal spending and eventually lead to a balanced Federal budget. Passage of the 5-day extension would simply have added another $17 billion to our already enormous national debt, with no assurance that this fiscal irresponsibility would ever stop.

I can only wonder how long this charade will continue. Perhaps another member could inform me just how many 5-day debt limit extensions will be necessary before we resolve this issue. Whatever the number is, you can be assured that I will vote against each and every one. I plan on supporting only one debt limit extension, Mr. Speaker, one that results in a balanced Federal budget. And judging by the level of commitment in this body, that yea vote could be a long time coming.

Let me conclude by assuring my colleagues across the aisle, that I have not in the past, nor will I ever, support using Social Security Trust Funds for anything but their intended purpose. Let's stop playing political games and for once do something solely for the benefit of the American people. Let's balance the Federal budget—now.

THE MANUFACTURING CLAUSE OF THE COPYRIGHT ACT

HON. MARTY RUSSO

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. RUSSO. Mr. Speaker, I am pleased to join with Mr. FRANK in introducing legislation to make the Manufacturing Clause of the Copyright Act a permanent part of the law. The Manufacturing Clause has helped our printing industry become one of our most vital and productive industries. This extension will prevent hundreds of thousands of American jobs from being shipped overseas. And with 31,000 of the 42,000 U.S. printing companies employing fewer than

20 workers, this legislation clearly enhances American small business.

For 94 years, the Manufacturing Clause of the Copyright Act has been the trade law of the American printing industry. The clause states that material which is preponderantly of a nondramatic literary nature and is written in English by an American author or by an author domiciled in the United States must be printed in the United States or Canada in order to be entitled to the full and unqualified protection of U.S. copyright laws. The clause is currently due to expire on July 1, 1986.

Although the U.S. printing industry is currently strong, eliminating the Manufacturing Clause would deal it a crippling blow. A 1981 Department of Labor study anticipated a loss of up to 172,000 job opportunities in the printing industry and a total loss of as many as 367,000 job opportunities throughout our economy as a result of foreign competition. In fact, U.S. printing companies would have to rely primarily upon time-sensitive printed material for most of their work. All other printed material, including books, catalogs, directories, commercial printing, business forms and periodicals, would be highly vulnerable to low-wage foreign competition. In addition, U.S. printing would not experience an offsetting increase in printing orders from foreign clients. The losses from foreign competition would fall especially hard on the small businesses comprising the backbone of U.S. printing.

Printing directly employs 1.2 million workers. Many of these workers are unskilled or semiskilled. In fact, a Book Manufacturers Institute study has found that 60 percent of printing industry workers fall into these two categories. In just the last few years, we have seen millions of unskilled and semiskilled job opportunities lost to unfair foreing competitors. Clearly, the economy cannot absorb additional hundreds of thousands of unemployed unskilled and semiskilled workers.

Mr. Speaker, the Manufacturing Clause has a long and successful history. It has been quite effective in its goal: building a strong industry and creating job opportunities for American workers in every region of our country.

At each critical point in the history of the Manufacturing Clause, proponents argued that specific economic conditions presented a serious danger to the U.S. printing industry. The initiation and two subsequent extensions of the clause relied upon extenuating economic circumstances affecting U.S. printing. In 1891, 1976, and 1982, Congress held that the printing industry needed relief from threatening economic conditions which would otherwise cause permanent damage to the industry.

In 1891, Congress added the Manufacturing Clause to the Copyright Act in order to protect an infant industry from foreign competition. The clause ensured that the United States developed its own healthy, modern printing industry.

From 1909 to 1952, Congress periodically modified the clause to reduce any international conflict resulting from the provision. Specifically, the modifications eliminated the manufacturing requirement for nonliterary works, for works of foreign authors in languages other than English, for test marketing of English language works first published in foreign countries, for works first published in a country adhering to the Universal Copyright Convention, and for works written by a national of a country adhering to the Universal Copyright Convention.

In 1976, Congress further modified the Manufacturing Clause and set a July 1, 1982, expiration date for the provision. The modifications eliminated the requirement for domestic typesetting, and removed the manufacturing requirement for non-English works by U.S. citizens or domiciliaries and for American authors or domiciliaries unable to locate an American publisher for their work.

In 1982, a severe recession compelled Congress to further extend the clause for 4 more years, until 1986. The Manufacturing Clause won overwhelming support in both the House, 339 yeas to 47 nays, and the Senate, 84 yeas to 9 nays. The 1981 Department of Labor study clearly suggested that an extension of the clause would help expedite recovery from the worst economic slump in the post-Depression period. For this reason, Congress provided an extension to avoid permanent damage to the U.S. printing industry from the severe recession conditions.

Now the need to continue the Manufacturing Clause is greater than ever. One after another, important U.S. industries are falling victim to unfair foreign trade barriers. Businesses are shutting their doors, workers are losing their jobs, and communities are suffering throughout the country. Just as Congress has declared for the past 94 years, we cannot allow this to happen to our printing industry. That is why the Manufacturing Clause of the Copyright Act must be extended before it expires next year.

Let us not forget, Mr. Speaker, that if Congress permits the Manufacturing Clause to expire, we will undermine efforts to develop an overall trade policy based upon fairness. The elimination of the clause would be a unilateral trade concession which would undermine U.S. efforts to obtain comprehensive, multilateral trade agreements. Even if every foreign nation fully opened its markets to U.S. printing products, American printing would still not penetrate foreign markets since the present high wage differential does not allow successful U.S. entry. For this reason, reciprocity in the trade of printed materials is not possible.

Even though all signatories to the Florence Agreement are forbidden from placing tariffs on books and other cultural or educational printed products, tariffs on catalogs and other printed material are commonplace. For example, the European Economic Community tariff on catalogs currently stands at 6.6 percent. In addition, many foreign nations have set up a labyrinth of nontariff barriers which further restrict imports. Nontariff barriers include: prepayment of imported goods in Indonesia; the requirement in Singapore that all publications be approved by the Ministry of Culture; extensive consular formalities in the Philippines; new French regulations which require French-language documentation of all imported goods; and inflation insurance schemes which allow domestic firms in the United Kingdom and Italy to underbid noninsured foreign competitors in world trade.

Canada, for example, applies a wide array of barriers to imports of United States printed products. In response to their inclusion in the United States Manfacturing Clause, Canada has zero-rated its tariff on books until July 1, 1986. However, the tariff on catalogs is currently over 31 percent of the transactional value, scheduled for reduction to 28.6 percent by 1987. The nontariff barriers against imported books and other printed material are just as significant. Canadian postage rates are higher for imported publications than for Canadian manufactured publications. Additionally, Canada severely restrains Canadian advertising in imported publications.

The United States cannot afford to grant unilateral trade concessions when its unfair foreign competitors continue to restrict the import of U.S. goods. The Manufacturing Clause of the Copyright Act is part of this country's existing law. It is not a new trade protection. Rather, it is a sound policy which has helped build a vibrant, productive printing industry, able to employ over a million men and women. And at a time when the overvalued dollar and unfair foreign trade practices threaten all American manufacturing industries and jobs, this legislation gives U.S. printing the ability to maintain its position in our economy.

TRANSFERRING FINE COLLECTION FROM U.S. MAGISTRATE TO THE CLERK OF COURTS

HON. GEORGE W. GEKAS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. GEKAS. Mr. Speaker, yesterday I introduced H.R. 3682, a measure to provide for the payment to the clerk of the court of fines or penalties imposed by a U.S. magistrate.

I would like to insert into the RECORD a letter to the Speaker of the House from Phillip D. Brady, Acting Assistant Attorney General for the Department of Justice, which thoroughly explains the need for this legislative change as well as the text of H.R. 3682.

I urge all members to cosponsor and support this uncontroversial and extremely necessary measure.

The letter and H.R. 3682 follows:

U.S. DEPARTMENT OF JUSTICE,
Washington, DC, July 18, 1985.

The SPEAKER,
House of Representatives,
Washington, DC.

DEAR MR. SPEAKER: Enclosed for your consideration and appropriate reference is a legislative proposal to amend section 3565 of title 18 of the United States Code to provide for the payment to the clerk of the courts of fines or penalties imposed by a United States magistrate. Because of the nature of cases tried by United States magistrates, this proposal would provide for more effective and efficient procedures to assure the payment of fines and penalties imposed by magistrates than currently provided for in the law.

Procedures for the payment of fines were significantly changed by passage of the Criminal Fine Enforcement Act of 1984, Pub. L. No. 98-596. Prior to passage of that statute, fines were paid to the clerk of the court, who forwarded the payment to the United States Treasury. The Act provided, in 18 U.S.C. §3565(d), for the payment of any amount due as a fine or penalty to the Attorney General, except to the extent that the Attorney General and the Director of the Administrative Office of the United States Courts jointly provided by regulation that fines and penalties for "specified categories of offenses" be paid to the clerk of the court. This provision applies with respect to offenses committed after December 31, 1984, according to section 10 of the Act. Offenses committed prior to that date are subject to the procedure that existed prior to the enactment of the Criminal Fine Enforcement Act.

The proposed legislation is needed because it is simply not cost-effective to the Government to have the United States Attorneys receive payment of fines and penalties imposed by magistrates. The key to successful collection in petty offense cases is immediate, in-court payment. However, the United States Attorneys' offices have no physical presence, at least on a regular basis, in most magistrates' courts, and directing a representative of the United States Attorney to the courts to receive payment would in most instances not be cost-effective, given the relatively small amounts of the fines or penalties involved. In fact, in a majority of cases the United States Attorney's office is not located in the same city or town as the magistrate's court. On the other hand, without legislation providing for receipt of payment of fines and penalties in magistrate cases by the clerk of the court, the only options remaining would be for the magistrate to direct convicted defendants to the nearest United States Attorney's office for payment of a fine or penalty or the use of a mail-in system of payment. Not only would these procedures create unnecessary inconvenience for the defendant, but it is highly likely that many fines would go unpaid. We firmly believe that without a mechanism for in-court payment of fines and penalties in petty offense cases, costly collection efforts for relatively small fines would too often become the only recourse.

The clerks of court are best suited to perform the ministerial function of receiving payment of fines and penalties due as a result of a sentence imposed by a United States magistrate. Regardless of whether the Department of Justice or the clerks of court receive payment of fines, the services of clerks of court are necessary in magistrate cases for the maintenance of case records and related functions. Conversely, the Department would have to hire new personnel and create records for anywhere from 100,000 to 200,000 new cases a year. The duplication of records alone would result in a serious waste of taxpayers' money at a time when Congress and the Administration are making an effort to reduce spending because of the budget deficit. Finally, the clerks of court can rely upon their existing procedures and expertise in carrying out a function they have carried out for years in the past to assure receipt of payment and the proper recording of transactions.

It should be pointed out that the transfer of responsibility to the Department for the receipt of fine payments occurred simultaneously with the creation of mandatory assessments in all cases to provide funds for the Crime Victims Fund.

There appears to be little reason for the Department to process fines for magistrate cases even if the additional staffing were to come from a transfer of positions from the courts. Unlike district court cases, magistrate cases are not evenly distributed among districts in a manner that is proportional to the population of the districts or to local United States Attorney staffing. Most districts have relatively low magistrate court caseloads; hence it would not be cost-effective to transfer court personnel, who must handle a variety of court functions anyway, to the United States Attorneys' offices in these districts solely for the purpose of processing fines imposed by magistrates. Nor would it be cost-effective to send United States Attorney personnel to the outlying courts in these districts on a case-by-case basis to receive payment of fines and penalties. On the other hand, some districts, most with small United States Attorneys' offices, have very large magistrate court caseloads due to the presence of a military base or federal park land. While it might be possible in those situations to transfer a fixed number of court personnel to the Department for this purpose, it would be disruptive to the courts and to the system of processing fines that has long been in place and would not result in increased overall efficiency in the processing of fine payments. Further, it makes sense to utilize the same fine payment system for all magistrate court cases. In short, the processing of fine payments by United States Attorney personnel is in neither instance more efficient than fine processing by court personnel. In most situations it is dramatically less efficient.

Assigning responsibility to the clerk of the court for the receipt of payment of fines and penalties imposed as a result of sentencing by the United States magistrates is not contrary to the concepts prompting the congressional amendment of 18 U.S.C. § 3565 in the Criminal Fine Enforcement Act of 1984. This section provides in subsection (d)(2) for payment to the clerk of the court of fines and penalties for "specified categories of offenses," as jointly provided by regulation by the Attorney General and the Director of the Administrative Office of the United States Courts. As noted in the House report which accompanied the bill enacted:

There may be circumstances in which it would be better for the fine to be paid to court clerks. For example, the fine may be imposed by a United States Magistrate for a traffic offense on a Federal reservation, and the only officials present are the court personnel and the ticketing officer, who is from an agency outside of the Justice Department. Payment of the fine on the spot is more convenient for the defendant, more efficient for the Government, and likely to result in a higher rate of collection. H.R. Rep. No. 906, 98th Cong., 2d Sess. 8 (1984), citing appendix to prepared statement of Judge Gerald Bard Tjoflat.

Nonetheless, the Department and the Administrative Office of the United States Courts have not been able to reach an agreement, pursuant to 18 U.S.C. § 3565(d)(2), to maintain responsibility for fine receipt in magistrates' courts. Under the present statute, the Department of Justice would be constrained to receive payment of fines and penalties in these cases despite the difficulties cited above and the potential crises that may arise. The enclosed legislative proposal would solve these problems without creating any new uncertainties.

The Office of Management and Budget has advised this Department that there is no objection to the submission of this proposal from the standpoint of the Administration's program.

Sincerely,

PHILLIP D. BRADY,
Acting Assistant Attorney General.

Enclosure.

H.R. 3682

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (d)(2) of section 3565 of title 18 of the United States Code is amended by—

(a) adding the following as the first sentence thereof: "The defendant shall pay to the clerk of the court any amount due as a fine or penalty as a result of a sentence imposed by a United States magistrate."; and

(b) inserting the word "other" before the word "specified".

A TRIBUTE TO MRS. POLLY VAUGHAN AND MRS. BEBE BURKE

HON. WILLIAM M. THOMAS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. THOMAS of California. Mr. Speaker, I would like to take a few moments of your time to bring to your attention the endeavors of two very special women from my district, Mrs. Polly Vaughan and Mrs. Bebe Burke.

Polly and Bebe have shown unselfish dedication to improving the community of which they are a most vital part. Through their personal devotion to teenagers of Bakersfield, Polly and Bebe are providing a long-term solution to a problem that is facing many of our young people throughout the country.

Seven years ago, Polly and Bebe began their campaign to help combat teenage drug abuse. Their program, teen involvement, now reaches hundreds of high school and junior high school students, educating them about the dangers of drug abuse. Their program is unique in that it trains high school students to be positive role models for younger students. Their efforts began at West High School in Bakersfield where they trained students to give a series of presentations to a nearby junior high

school They worked with teachers and students of West High School to get the program to the successful level it has now achieved.

Before Polly and Bebe began this training, many hours were spent talking with school officials from not only Kern High School District but also San Diego and Anaheim to find out what programs were available to their students. Due to the unavailability of school funds, fundraising was a big part of their job. Their efforts reached out to the State mental health program, the county superintendent of schools, and many friends in the private sector. Teen involvement is now in full swing at five different high schools. Many junior high students who were once on the receiving end of the drug-abuse presentations have enlisted in the program to serve as role models. The program has recently been institutionalized and for the first time will run without the direct hand of Polly and Bebe.

Polly and Bebe have proven that through hard work and dedication an individual can make a difference. If other schools throughout the country followed the examples set by their program, teen involvement, perhaps the problem of drug abuse among teenagers could be greatly reduced. I feel these women deserve the highest praise from this body.

TRIBUTE TO THE FALLEN FIREFIGHTERS OF 1984

HON. WILLIAM F. GOODLING

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. GOODLING. Mr. Speaker, on October 4, 1981, the people of the United States dedicated a monument at the National Emergency Training Center in Emmitsburg, MD, known as the National Fallen Firefighters Memorial. This monument pays tribute to America's firefighters—patriotic Americans who have given their lives to defend their communities against fire and other disasters.

On Sunday, October 13, 1985, the fourth annual Fallen Firefighters Memorial service was held at the monument site, honoring those who gave their lives in an effort to save others during 1984.

As a final tribute to those firefighters who died last year, and to their families, I would like to list their names as follows: Thomas Baron, Mary R. Matthews, Leonard S. Guerrera, Thomas K. Hollingsworth, Robert G. Chilcote II, Calvin C. Garrett, Anthony L. Confonte, Willis D. Fry, Earl W. Walker, James J. Carbin, Jr., Edwin G. Murphy, Francis E. Burns, John W. Hofacker, Alexander K. Polakovich, Elwin I. King, Max L. Daniel, Frank J. Nerney, James B. Daniels, Jimmy R. Kennedy, Michael T. McCarthy, Edgar O. Hardin, Larry D. Stephens, Thomas C. Ross, James W. Pressnall, John W. Walsh, John C. Huss, Paul J. Dagenbach, Marvin B. Ridgway, Harry M. Korwatch, Gerard DeJohn, Jeffrey L. Haugen, Michael G. Sims, Harold L. Hansen, Thurman P. Keener, Jr., James H. Frizzell, David L. Anderson, Patrick J. deKramer, Matthew R. Baran, Hery Y. S. Sur, Max D. Nason, William A. Satterfield, John P. Brighenti, David E. Foecking, David C. Stephens, Julian R. Bley, Sr., David Gardella, Joseph L. Konrad, Jr., John L. Carlson, James E. Frazier, Jr., Milton A. Densford, Michael W. Thorne, Joseph Somma, Patricia Beran, David A. DeWire, Richard H. Bowers, Barbara A. Booth, Michael P. Mattioda, Kevin J. Cioffi, Jeffrey A. Hardin, Kenneth E. Armour, Lothar S. Cogar, and Katherine A. Hughes.

Also to be honored for sacrificing their lives in the line of duty are: Perry E. Parker, Robert F. Pleski, Barney O. Staggs, Charles R. Staggs, Belle C. Sullivan-Weiss, Christopher I. Watkins, Dale A. Whitmarsh, Melvin S. Rosewag, Jr., John E. Lindquist, Sr., Earl L. Hilliard, James E. Bennett, William R. Smart, Jr., Ronald G. Mullins, James Jimenez, Keith A. Norman, Raymond E. Eichert, Harold Watkins, James M. Murry, George Kuharsky, Dennis C. Martin, Robert C. Ayers, Percy R. Johnson, Ralph E. Hager, Jr., Colin P. Boast, Jose A. Silva, Robert B. Gamble, Elmer Homilius, Roger F. Sullivan, Anthony Shands, Walter J. Bawroski, Sr., Henry W. Rayner, Jr., James A. Kimbel, Michael E. Ard, William G. Countiss, Philip Kenneally, Mitchel E. Spoth, Ricky S. Pearce, David A. Ball, Russell C. Dellinger, Sr., James A. Flanagan, Epifanio J. Gonzalez, James C. Simpson, Phillip C. D'Adamo, Robert M. Reyes, Richard M. Barron, Benjamin Pinel, Russell H. Dixon, Jack L. Pratt, Sr., John D. Evans, Anthony J. Lundy, Sr., John T. Williams, Roger G. Tharp, David F. Murry, Charles J. Elder, and James J. Lausch.

It is proper and a privilege for me to bring the names of everyday patriots to your attention and the attention of the Nation as a permanent record of their honorable and selfless deeds.

Also, I think it appropriate here to remember the Fireman's Prayer, which is as follows:

When I am called to duty, God
Wherever flames may rage,
Give me strength to save some life
Whatever be its age.

Help me embrace a little child
Before it is too late
Or save an older person from
The horror of that fate.

Enable me to be alert to the weakest shout
And quickly and efficiently to put the fire out.

I want to fill my calling and
To give the best in me.
To guard my every neighbor and
Protect his property.

And if according to my fate
I am to lose my life
Please bless with your protecting hand
My family and my wife.

SOUTHWESTERN BELL'S OPERATION IDENT-A-KID

HON. ALAN WHEAT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. WHEAT. Mr. Speaker, one of the most disturbing trends in crime statistics in recent years is the increase in child abduction crimes. The rise in this hideous crime is terribly frightening to parents living in major urban areas, as well as smaller towns, across our Nation.

Our increased awareness of the problem spurred a group of Southwestern Bell Telephone employees to take action. The employees developed Operation Ident-A-Kid, a volunteer program started in 1984 to fingerprint and photograph children in western Missouri, particularly in Kansas City. The program has been a tremendous success, helping to make thousands of parents feel more secure about their children's safety.

Under the guidance of the company's community relations teams, Southwestern Bell Telephone employees volunteer their time on weekends to help fingerprint and photograph children at shopping centers and malls. Each parent that participates in the program receives an identification card that includes a child's age, weight, birthmarks, scars and fingerprints as well as a current photograph. In 1984, 2,700 children in the Kansas City metropolitan area and other towns in western Missouri were fingerprinted. The program is growing and more than 18,000 children have participated in the program so far this year.

The program does more than simply fingerprint and photograph children. At each location, Southwestern Bell Telephone employees distribute information on keeping children safe at home and outside the home. The parents also receive illustrated pamphlets that explain to children how to use emergency telephone numbers. Local law enforcement officials have augmented Southwestern Bell's efforts by going to the shopping malls with the company's employees and answering questions from parents and children on protective measures.

Mr. Speaker, Southwestern Bell Telephone traditionally has been, and remains, a company with a genuine concern for the communities it serves. With the growing number of crimes against children, Operation Ident-A-Kid is one way the company demonstrates its caring attitude. I want to join with the many parents who have participated in the program to express my gratitude to Southwestern Bell and its altruistic employees who participated in this program.

A UNIQUE NOBEL LAUREATE

HON. DON FUQUA

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FUQUA. Mr. Speaker, I want to offer my congratulations to Dr. Jerome Karle of the Naval Research Laboratory [NRL] here in Washington, DC, on being one of the two recipients to share this year's Nobel Prize in Chemistry.

The Nobel award has not only bestowed honor on him, and on Dr. Herbert Hauptman with whom he shared the award, for pioneering research on molecular structure but has also brought acknowledgment and honor once again to American science.

I would like to point out that in Dr. Karle's case the circumstance is somewhat unique. Jerome Karle has spent almost his entire career in Government service and primarily in the Military Research Establishment. Close examination of the statistics tells us that this is a rather rare situation for Nobel recognition. In the period 1901–84, Nobel awards to Americans in the fields of physics, chemistry, and medicine numbered a total of 132. Of that total, 4½ percent or six awards, went to scientists from the Government sector. All six of those Government winners were in the field of biomedical research. Dr. Karle has become the first American scientist with a continuous career in the Military Research Establishment to become a Nobel laureate. I think it is important to note that it can be done.

I would hasten to add also that Dr. Hauptman spent 30 years in Government service, 23 of those at NRL where he and Dr. Karle collaborated. He is presently a professor at Buffalo University and vice president and director of research at the Medical Foundation of Buffalo Research Laboratory.

While we are elated for both of these distinguished scientists, we in the public policy arena should also be reflective of why this Government figure is so low, especially by comparison with the academic sector, and why the Government/military number has been essentially nonexistent until a few weeks ago.

Recent hearings that the Science and Technology Committee has held, as part of our 2-year science policy study, can perhaps shed some light on this. The current hearings have focused on science in the mission agencies and federal laboratories. Two witnesses in particular who testified at the 6 days of hearings offered thoughtful observations for this subject.

Dr. Rodney Nichols of the Rockefeller University pointed out that between 1901–82 in a toal of 126 American awards in physics, chemistry, and medicine:

A total of 14 Nobel Prizes, or about 11 percent, went to industrial and governmental scientists. That is roughly proportional to the total funding, over this history, for basic research in those sectors. This suggests that where serious basic research persists over long periods in industrial and governmental units, it can produce world-class science of the quality that the Nobel Prizes are designed to recognize.

Dr. Karle and Dr. Hauptman are fine examples of this.

What is particularly important for us to elicit from this is the understanding that we not only get what we pay for but that we have considerable influence over the quality and quantity in a long-term scenario for science within a given sector. Although we cannot necessarily target Nobel Prizes, we can safeguard continued good science with stable funding coupled with high quality review processes.

We must learn to be perceptive of how we make things happen in science instead of how they just happen to work out. This is particularly significant as it relates to the environment in which creativity and innovation tend to flurish.

Dr. Nichols pointed out that the Mansfield amendment to the Defense Department's funding in 1969 said, "* * * in effect, that DOD could not support research unless it related directly to its mission." This imposed a considerable change in the existing research environment. In discussing the effect of this change, David Packard, chairman of the board of Hewlett-Packard Co., described in our recent hearings that:

The idea of independent research and development [IRD] for defense programs was based on an understanding of the importance of giving scientists and engineers some time free from their assigned work to explore their own innovative ideas. This program was effectively destroyed by the Mansfield Amendment in 1970 when the Congress required IRD to be limited to ideas related to military work. This required that the justification for IRD be documented to demonstrate that the independent work had a military potential.

We have heard numerous indications throughout the gamut of our science policy hearings that the Mansfield requirement, although somewhat softened by subsequent wording giving the Secretary of Defense discretion over research decisions, still has an influence on the scope and direction of basic research in the military research environment.

The Science Committee has undertaken its science policy study with just such issues in mind. We hope to identify both the strengths and weaknesses in America's current science-producing network.

Forty years ago Vannevar Bush, Director of Franklin Roosevelt's war-time Office of Scientific Research and Development conducted a comprehensive examination of the role of science in America as highly industrial nation. Bush's report, entitled "Science: The Endless Frontier," was the basis for a redirection of America's thinking regarding the Government's role in relation to science. The Bush report has since that time served as the basic rational for the Government's funding of a diverse and evergrowing research effort.

We at the Science Committee are optimistic that our study will lead us to new insights and understandings about our science needs as a nation. In this process, we will be taking into account the changes over the last four decades in order to address the next four decades.

We know with certainty that science and technology play a central role in our national life. We also know that this role will continue to grow. In addition, with the huge Federal budget deficits, we must take a careful look at how all our budget categories are serving the Nation's needs, including the significant expenditures devoted to scientific and engineering research.

We must question whether or not the mechanisms and funding levels which have gradually evolved constitute the optimum approach to our Government investment in science and engineering.

Of our science policy study in general, I would say that in our search and scrutiny of America's science policy, the task force of science committee members conducting the study must be ever mindful of the impulse to recommend change just for the sake of change. Our Science Establishment is a national treasure and the envy of most of the world. Jerome Karle and Herbert Hauptman are evidence of that. Our intent is not to tamper with or change those things that work well. We do want to understand and improve what is not functioning to our optimum advantage.

Our task is both exciting and formidable. I know that my colleagues in the Congress share our concern about the continued health and growth of our Nation's science. I hope that the study's final report, which will be completed in October of 1986, will provide us with information and insights that will be useful for the Congress, the executive branch, and the entire scientific community as all of us work to maintain a sound science structure in the nation for the decades to come.

RETIREMENT INCOME SECURITY ACT OF 1985

HON. ALFRED A. (AL) McCANDLESS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. McCANDLESS. Mr. Speaker, Members of Congress have become increasingly concerned about the lack of an articulated national retirement policy. This concern is growing as more emphasis is placed on deficit reduction. Good tax policy is not necessarily good retirement income policy. We must reevaluate where we are and where we are going in terms of our ultimate goal—a good retirement income for all Americans to live in dignity and economic security.

Because of my deep interest in this subject and my belief that this country must fashion a sound retirement policy, I am cosponsoring the Retirement Income Policy Act of 1985. We have a policy of sorts now, but its one that simply evolved over the years. This patchwork approach came about in recent years as a result of tax legislation with little coordinated attempt to

take into consideration the effects on retirement income.

New policy should be set, not by taking narrow, shortsighted approaches to retirement issues, but by fully recognizing the impact that retirement decisions have on the economy as a whole and the implications that today's retirement decisions will have for the decades ahead. Retirement policies should not create financial burdens which will become unacceptable and unsupportable by future workers, but instead should encourage savings, investment and productivity in a fiscally sound manner.

The Education and Labor Committee and its Subcommittee on Labor-Management, on which I serve, completed hearings earlier this year focusing on what business, organized labor and pension groups think should be included in a national retirement income policy. Meetings were held with similar groups in creating the Retirement Income Policy Act of 1985.

This legislation provides a framework to discuss future objectives. A sound retirement plan rests upon Social Security, an employer-sponsored plan and personal savings—the so-called three-legged stool. This bill recognizes the importance of such an approach and encourages the growth of the current voluntary system of employer-sponsored retirement plans. It increases the number of people covered under private pension plans and opens the door to address portability. When the baby-boom generation begins to retire shortly after the start of the next century, retirement income sources, especially Social Security, will be strained to the breaking point. We must take steps to provide incentives for increased retirement savings. This legislation further begins the discussion of ways for all businesses, including smaller companies, to have private pension plans.

Recently legislated changes in tax policy relating to pension plans have not only caused confusion, but have not increased tax revenue significantly; for example, reductions in dollar contributions and benefits in the Tax Equity and Fiscal Responsibility Act of 1982. On the other hand, expansion of IRA's in the Economic Recovery Act of 1981 have added to revenue losses. These examples indicate the need to step back and form a policy.

It is time for Congress to adopt a comprehensive and consistent national retirement income policy. There appears to be a national consensus for programs that provide economic security and protection against economic risks. There is also a national consensus for tax incentives to encourage employer provision of the programs and individual savings. The challenge is to clearly articulate how various programs fit into the economic security system. The challenge is ours. The Retirement Income Security Act of 1985 can provide the vital first step.

LABOR MAN OF THE YEAR

HON. BOB EDGAR

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. EDGAR. Mr. Speaker, I rise today to honor John J. Convery who on Friday night will be honored by the Delaware County AFL-CIO as Labor Man of the Year. John hails from Holmes, PA, in the heart of my congressional district and has lived in Delaware County for 56 years.

Both as a member of Plumber Local No. 690 and in the community at large, John's involvement is considerable and impressive. Among his many activities, he is the past chairman of the Delaware County Building Trades Council, past member of the Southeast Pennsylvania Plumbing Inspector's Association, and past plumbing inspector of the Township of Ridley where he lived for 31 years. His dedication of community service continues through his long-time involvement with the American Legion, the Our Lady of Fatima Catholic Church, and other civic activities.

Mr. Speaker, I think that it is clear both to you and my colleagues in the House of Representatives that John J. Convery stands out as a community leader and is truly deserving to be named the Delaware County AFL-CIO's Labor Man of the Year.

REGARDING THE UKRAINIAN SEAMAN MIROSLAV MEDBID

HON. WILLIAM O. LIPINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. LIPINSKI. Mr. Speaker, the Statue of Liberty's head must be bowed and she must be crying today because of the situation involving the Ukrainian seaman, Miroslav Medbid, who twice swam to freedom in this land of liberty but unfortunately through our misunderstanding, ignorance, or stupidity still finds himself in the paws of the Russian bear. This seems to me to be a clear-cut case of us, that's the United States, not wanting to rock the boat with the Soviets so close to the summit. For a nation founded on the rights and the freedoms of the individual, and a nation that has served for over 200 years as a safe harbor for individuals fleeing all types of oppression, I find this appalling. We must stop this ship from leaving American waters until this situation is cleared up, so that the Statue of Liberty can once again hold her head high and stop crying. If this Nation ever loses sight of the rights and freedoms of an individual, and turns its back on a liberty seeking person because of political considerations, we lose the right to think of ourselves as the land of liberty and the fortress of freedom that we perceive ourselves to be. Stop the ship before our shame becomes indelible.

OPPOSED TO EXTENDING NATIONAL DEBT LIMIT

HON. MICHAEL L. (MIKE) STRANG

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. STRANG. Mr. Speaker, on Friday November 1, 1985, I rose in opposition to H.R. 3669, the 5-day extension of our debt limit. My reasoning was simple. This bill increased our national debt by $17 billion—plain and simple—and nothing was offered with it that addressed the core issue: the Federal deficit.

By accepting this bill, we sang the same song we've been singing for years—the same old sad song: "Hey buddy, can you spare a dime?" But it's not a dime it's $17 billion—and who's paying? The American public, through debt service that takes 15 cents out of every revenue dollar, around $145 billion this year alone—the American taxpayer is forking over these hard-earned dollars at the behest of a panhandling Congress.

These are funds which could be used for many important programs, including those for the elderly. Essentially, this bill by increasing the national debt, without, at the same time, coming to grips with the deficit issue, robs the taxpayer—especially those who can least afford it—our seniors on fixed incomes.

There is no more pernicious threat to our elderly than the continuation of business as usual on the floor of this House. By dodging Gramm-Rudman-Hollings-Mack and its deficit-reduction opportunities, once again we sent this message to those whom we serve. The particular refrain to the sad song we persist in singing is like a background dirge: "Tax and spend, tax and spend." By passing this bill, we highlight another line: "Tax, spend and borrow: tax, spend and borrow."

I for one, chose not to join the chorus.

POSTHUMOUS CITIZENSHIP FOR RUDOLPH SALLI

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SHUMWAY. Mr. Speaker, today I am introducing a bill which would confer U.S. citizenship posthumously on Mr. Rudolph Salli, a native of Finland who served the United States courageously and selflessly during World War II. In the employ of the Office of Strategic Services [OSS], Mr. Salli worked in Scandanavia on behalf of the United States throughout the war and for a short time afterward. In 1946, however, Mr. Salli and several others were convicted in Finland for espionage service in behalf of a foreign power. During the Finnish court proceedings, that foreign power was identified as the United States of America.

Rudolph Salli served his term and, upon his release, began to seek to immigrate to the United States. In 1957, the Governor of California expunged Mr. Salli's criminal record in order to allow him to immigrate legally to America. Tragically, while awaiting his quota number for immigration to be called, Rudolph Salli died in Finland, never having obtain the American citizenship that he longed for and that he earned through devoted wartime service.

Therefore, I am offering legislation to bestow that citizenship posthumously, in recognition of the sacrifices that Rudolph Salli made on behalf of the United States, sacrifices that were not rewarded during his lifetime. I believe we owe him this debt and honor as an individual who did not live to become a citizen of the nation to which he contributed so much.

SECURITY FOR SOCIAL SECURITY

HON. HAL DAUB

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. DAUB. Mr. Speaker, yesterday a Social Security recipient's daughter called my district office to inquire about the status of her father's current and future benefit payments. She said her father was far too nervous about the current Social Security situation to inquire for himself. It is a travesty that Members on the other side of the aisle overwhelmingly voted last Friday to go home and leave Social Security recipients wondering if they can buy their groceries.

Mr. Speaker, with the leadership of the gentleman from Texas [Mr. ARCHER], I am introducing legislation to ensure that Social Security cannot be used as a political football ever again. H.R. 3688 assures that the Social Security Trust Funds are reimbursed for any interest lost as a result of actions taken by the Treasury Department to pay monthly benefits in the face of the statutory debt ceiling crisis.

Additionally, H.R. 3688 prevents the managing trustee of the Social Security Trust Fund from disinvesting Social Security Trust Funds in the future. Thus, Congress will be forced to act on the debt limit in a timely fashion so that Social Security benefits will be paid as prescribed by law.

I urge support of this legislation to make sure that Social Security Trust Funds lose nothing, not 1 cent, because of actions taken by the Treasury over the last 2 months. It will also prevent gamesmanship at the expense of older Americans by Members who voted to go home last Friday.

TRUCK AND BUS SAFETY WEEK

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. ANDERSON. Mr. Speaker, I am pleased to propose legislation today to designate January 26 through February 1 as "Truck and Bus Safety Week." I urge all my colleagues to join with me in sponsoring this legislation.

It is time for the House of Representatives to recognize the ongoing efforts by Federal, State and local officials, and by the industry itself, to improve the safety record of trucks and buses. Further, designation of "Truck and Bus Safety Week" will serve to focus the efforts of the private and public sectors on the issue of safety. I understand that a number of events have already been scheduled during the month of January, including: a symposium on increasing the effectiveness of State commercial motor vehicle driver licensing, jointly sponsored by the American Association of Motor Vehicle Administrators and the Highway Users Federation; selection of the Driver of the Year by the American Trucking Association; truck safety seminars and technical workshops on vehicle configuration and human factors sponsored by the Transportation Research Board; and the first working session of the Commercial Motor Vehicle Safety Regulatory Review Panel which was established by the House in the Motor Carrier Act of 1984.

January is a particularly good month to designate such a week because special care is necessary to operate safely on roads covered with snow and ice during fewer hours of daylight. Moreover, this special week in January will help establish an increased safety consciousness for the entire year.

Transportation systems bind our Nation together. Safe and efficient highway transportation systems are essential for interstate commerce. So many of the goods we depend on every day are delivered by highway transportation that it is difficult to conceive of life without safe highway transportation systems. Bus transportation serves some communities that are not served by any other form of public transportation. Moreover, the truck and bus industries are major employers of individuals in virtually every city across our Nation. The truck and bus industries are also notable because of the diversity of the entities that function together to provide these vital transportation services. Operating entities range from giant, diversified corporations to so-called mom and pop businesses where the operator is the financier, marketer, accountant, and vehicle operator and owner.

Truck and bus safety is important to everyone in the country. It is important to the smooth flow of interstate commerce. It is important to the safety of the motoring public who share the roads with trucks and buses. And, it is important to the operators and owners themselves because safety is good business. Safe operation improves the image of the industry and the industry's profitability.

As part of the Surface Transportation Assistance Act of 1982 Congress gave the Department of Transportation a new tool to increase compliance with Federal motor carriers laws—the Motor Carrier Safety Assistance Program. In addition, through the Motor Carrier Safety Act of 1984 we gave the Department new civil penalties to enable the Department to better enforce Federal commercial vehicle regulations. Through these programs the States and the Federal Government are making great strides to ensure vehicles and drivers operating on our Nation's highways are safe. But no one can take a rest from working to improve the safety of our Nation's trucks and buses. Ultimately the most important means of improving safety is action by the industry itself.

TRUCK AND BUS SAFETY

HON. BUD SHUSTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SHUSTER. Mr. Speaker, I am pleased to join Mr. ANDERSON in sponsoring legislation to designate January 26 through February 1 as "Truck and Bus Safety Week." As cochairman of the truck caucus I urge all my colleagues in that caucus to join in cosponsoring this legislation.

Trucks transport almost everything we consume at some point in the link between manufacturing and consumption. Our Nation's truck fleet is composed of nearly 5 million trucks which travel over 138 billion miles each year, bringing raw materials, finished goods, food, and other products to market. Trucking employs more than 7.4 million Americans and accounts for revenue in excess of $200 billion each year.

The bus industry is similarly important to the economic and social fabric of America. Nearly 50,000 people are employed by the bus industry. Bus service is provided to over 10,000 cities and communities—many of which are served by no form of public transportation.

Truck and bus safety is important to everyone in our country. Consumers benefit because of the smooth and uninterrupted service possible only when safe vehicles and drivers are present on our highways. Business benefits because safe vehicles enhance the industry's image and industry profitability. And everyone benefits from the reduced number of accidents, injuries, and fatalities.

Mr. Speaker, because the safe maintenance and operation of vehicles is vital to the health and safety of motorists, pedestrains and other users of highways, roads, and streets and because great benefit will result from the focusing of public attention on the problems, I firmly support the designation of the final week in January as "Truck and Bus Safety Week."

H.R. 1616, THE LABOR-MANAGEMENT NOTIFICATION AND CONSULTATION ACT OF 1985

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FORD of Michigan. Mr. Speaker, I feel compelled to correct some of the major misconceptions about H.R. 1616, the Labor-Management Notification and Consultation Act, which arose during a special order on Friday, November 1.

H.R. 1616 is designed to address specific, limited objectives. By requiring employers to provide, whenever possible, 90 days' advance notice of permanent mass layoffs and plant closings affecting 50 or more employees, H.R. 1616 would prevent sudden closures and cutbacks that take employees by surprise, handicap the State employment services and agencies created to assist dislocated workers, and frustrate attempts by local governments and employees to find alternatives that will save jobs.

After 11 years of House and Senate hearings which have established beyond any reasonable doubt the benefits of advance notice, the authors and cosponsors of H.R. 1616 reject the notion that this issue needs more study.

I refer my colleagues to the report on H.R. 1616 for a brief overview of the evidence supporting the notice requirement, but one study in particular deserves mention. A detailed review of 10 years of plant closings has shown that employer compliance with H.R. 1616's notice requirement will significantly reduce the unemployment that results from plant closures and mass layoffs and will save taxpayers hundreds of millions of dollars in unemployment compensation and other costs.

Yet the bill's flexible, relatively brief notice period will not burden any responsible business. Certainly, H.R. 1616 is not intended to, as was suggested last Friday, and will not, prohibit or eliminate plant closings.

Contrary to assertions made on Friday, H.R. 1616, as reported, does not give the Federal Mediation and Conciliation Service any enforcement role. Nothing in the bill would require an employer to seek permission from the FMCS, the Secretary of Labor, or any other Government agency before closing a plant or laying off workers, even if unavoidable business circumstances forced the employer to lay off employees without giving the otherwise required notice.

The consultation provisions of the bill are designed to assure an opportunity for the employer and the employees, through their union, to explore alternatives to a proposed closing or mass layoff. The sponsors of H.R. 1616 believe that American workers deserve the right to participate in and influence decisions that will have a tremendous impact on their lives. Given an opportunity, employees can sometimes find productivity improvements and cost savings that elude even the best-equipped managers. Unprofitable operations have been turned around and thousands of jobs have been saved when employees were given enough time and information to develop alternatives to management decisions that would have eliminated their jobs.

H.R. 1616 would not alter management's ultimate right to change its operations; the employer would have no duty to reach agreement or to meet with employees beyond the 90 day notice period. But the employees would be assured of a forum for bringing their ideas before the employer for its good faith consideration. Even in cases where no mutually acceptable alternative could be found, the employees would have the dignity of a detailed explanation for the elimination of their jobs and the knowledge that their proposals were taken seriously.

In his speech to the AFL-CIO on October 30, Secretary of Labor Brock praised "union-management programs that give workers greater participation in the decision-making process." Obviously, no workplace decision is more important for employees than whether or not their jobs will be eliminated. H.R. 1616 would make employee involvement in such decisions a normal part of union-management relations.

Statements made during Friday's special order on H.R. 1616 suggested that an employer who refused to comply with the bill's minimal requirements would be subject to criminal penalties. Nothing could be farther from the truth. Such penalties have never been part of the bill, and no amendment to create such penalties has been offered or proposed.

I urge Members to read the report of the Committee on Education and Labor on H.R. 1616, House Report 99-336, and the bill itself. Mr. Speaker, I am confident my colleagues will agree that H.R. 1616 is a reasonable, well-balanced bill that will help to mitigate some of the serious problems faced by dislocated workers and communities affected by mass layoffs and plant closings.

NURSING HOME ABUSES BROUGHT TO THE ATTENTION OF CONGRESS

HON. JAMES J. FLORIO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FLORIO. Mr. Speaker, I rise today to commend my colleague from New Jersey, Congressman BOB TORRICELLI for his vigorous efforts to protect the quality of life of our elderly citizens. The following article from the Record newspaper in New Jersey was prompted by Congressman TORRICELLI's concern about questions rising from the investigation of nursing home care in his Bergen County, NJ, area.

Without Congressman TORRICELLI's perseverence and concern it is unlikely that the issue would have received the wide attention which it did. I commend the article to all of my colleagues.

The article follows:

[From the Record (NJ), Oct. 14, 1985]

NURSING-HOME SLEUTHS—INVESTIGATORS ARE NEEDED TO WATCH OUT FOR BAD GUYS

(By Bruce Locklin and Gale Scott)

For two years the Institute of Medicine has been commissioning research papers for the federal government on how to improve the nation's nursing homes. In the piles of words and statistics, a conclusion jumps out: Bad nursing-home operators will continue to neglect patients until they become convinced that government has a system in place that will uncover neglect—and until punishments are stiff enough that no one wants to face them.

The bad guys have to know that they'll get caught and punished severely. But in New Jersey and most of the nation no one is actively chasing them.

The traditional approach to nursing-home enforcement relies on inspectors, people trained in measuring a home against established standards. There are several types of inspectors: nurses, nutritionists, sanitarians. They're visitors with checklists. They usually can determine if a home is complying with regulations, but they don't have any training in collecting evidence of wrongdoing. They've never been instructed on how to find or interview witnesses.

Inspectors simply don't have the tools to cope with a corrupt nuring-home operator who fakes records and intimidates staff and patients.

New Jersey's Health Commissioner, Jr. Richard Goldstein knows that his troops are not up to the task of building cases against bad homes.

"We are not in the testimony-taking business," Goldstein said in an inverview. "We are in the direct-inspecting business."

What New Jersey and most other states need is an effective investigating agency that will catch enough bad guys to scare the hell out of the rest.

Referring nursing-home cases to existing prosecuting agencies doesn't work. Jack Fay, New Jersey's former nursing-home ombudsman, tried unsuccessfully for years to get county prosecutors excited about neglect-and-abuse cases. The prosecutors were polite but not really interested, and Fay became convinced that they saw their duty as chasing "real criminals"—murderers, thieves, and the rest.

The enforcement vacuum in nursing homes across the country is astonishing, particularly because it's easy to prove that a bad nursing home is a bad nursing home.

The practical experience of investigating the two Bel Air Manor nursing homes in New Jersey for The Record has given us some insight into what it takes to expose nursing-home wrongdoing.

We're not nursing-home experts or policy planners. But as reporters who spent seven months building evidence of nursing-home neglect, we think we may have found a methodology that any state could use to clear up its nursing homes and make sure they stay cleaned up.

The approach we're suggesting is similar to what the Justice Department did several years ago, when it decided to pursue mob figures with the strike-force concept, setting up an agency designed to go out and find evidence.

Each state could create a nursing-home strike force, a small, mobile team that includes nurse-investigators.

This investigative unit could be part of any one of several existing agencies: the health department, Medicaid-fraud unit, attorney-general's staff, or ombudsman's office. It should be headed by a lawyer with prosecutorial experience. The staff size could be modest: A minimum would be two investigators and two nurses.

Here's an outline of how such an agency could operate, a three-step process for investigating nursing homes:

Trigger—There should be a low threshold for deciding to check out a nursing home to see if it merits investigation. An initial check could be triggered when a home if found to have significant deficiencies on annual inspection. An investigation also could be triggered by serious or repeat complaints to the health department or the investigating agency.

Decision—The first step should be to have a team member, a nurse, get a job at the home as an aide or orderly. That's usually easy, because nursing homes tend to have a rapid turnover in aides and orderlies—particularly bad nursing homes.

If the nurse finds no serious, systemic problems, the investigation ends there. If she does find problems, the investigation goes to the next stage.

The undercover nurse isn't gathering evidence. Three days' observation won't mean much in court. The nurse's assignment is simply to flash a green or red light.

It won't take more than a few days for the nurse to know what's up: Band nursing homes have bad policies and procedures that are easily detected from the inside. If one aide routinely has to feed 15 patients, management has built-in neglect.

Investigate—The next step, one not currently used by health departments, is to look for witnesses outside the nursing home. As we found at the Bel Air Manors, some of the best nurses and aides get fed up and move on to better nursing homes.

A pervasively bad nursing home spins off many potential witnesses. Investigators find them by tapping into the employee grapevine.

Medicaid field people can help, because they get into nursing homes more frequently than any other officials, often seeing old employees from one home show up at another. Good health-care workers quit bad homes and land at good ones nearby.

If the suspected nursing home is indeed pervasively bad, investigators should be able to find many witnesses with firsthand knowledge who can testify about seeing systemic neglect over an extended period of time. That's the type of solid evidence that can get licenses revoked or criminal indictments.

As elemental as this technique is, it's not used by state health departments. Their "investigations" are limited to recording what inspectors see on the days they visit.

This strike-force approach can be effective, because many potention witnesses are eager to cooperate. Good health-care professionals are well-motivated people. They want to see bad nursing homes cleaned up.

But government is so inept at dealing with bad nursing homes that good people don't talk. They've learned that it doesn't pay to make waves.

Shortly after The Record's series on the Bel Air Manors appeared, industry sources were saying that many nursing-home owners were concerned that their facilities might be the next target of investigators.

Said one North Jersey administrator:

"We were very worried after Bel Air. Everyone thought they would be next. Everyone was telling us, 'Watch out, we heard they are sending an undercover investigator to your place.' So what could we do? We just clean up and fix up and make sure we have enough people working and hope for the best."

Fear can be a healthy motivator.

James Cunningham, lobbyist for the state's private nursing homes, agrees that such a plan could work. He said the good nursing homes, which make up the vast majority in New Jersey, have nothing to fear. "We'd all like to get rid of the bad apples," said Cunningham.

A few successful prosecutions could bring significant change. Employees would soon learn that contacting the strike force would bring swift results.

Such an agressive enforcement system would create a new environment within a state's nursing-home industry, an environment where a bad operator would find it hard to survive.

One amateur nursing-home investigator named JoAnn Wells understands the value of deterence. She's had some experience as a leader in a housewives' crusade that got national TV exposure for a Pennsylvania nursing home on "60 Minutes."

Says Mrs. Wells:

"You wouldn't have to shut down to many, and absolutely drag these bastards, if you'll excuse my English, through the muck and the mire that they have dragged these old people, before the rest of them would get with the program."

THE CONGRESS, INTELLIGENCE AND NATIONAL SECURITY: TIME FOR REEXAMINATION

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. MICHEL. Mr. Speaker, we are being bombarded these days with news about various aspects of intelligence, espionage, and national security. I was shocked last Sunday to discover that a supposedly covert operation of the Central Intelligence Agency was front page news in the Washington Post.

Without discussing the specific facts of this case, I believe the time has come for the Congress—here and in the other body—to address itself to certain important questions involving our own participation in intelligence operations. I have long supported the idea that the Congress has to be in on the takeoffs as well as the landings—and sometimes crashes—of various intelligence operations. We have a legitimate desire to see to it that our intelligence community acts with our interests and our values in mind. But this desire must be measured against the possibility that too many in Congress—including staff—are learning about covert operations beforehand and therefore making it easier for leaks of secret data to occur. I'm not saying that is always the case. But how many disastrous leaks can this Nation afford?

The Chicago Tribune, in an editorial, has asked that Congress reconsider the procedures for handling cover actions. I couldn't agree more. I believe the time has come for Congress, which has asked for and received close oversight on intelligence operations, should closely examine its own procedures in this area.

Congress owes it to its own sense of duty, to the intelligence community and to the American people to investigate its own handling of intelligence matters with the some zeal it used to investigate the intelligence community in the past.

At this point I wish to insert in the RECORD, "Covert Actions in Full View," an editorial in the Chicago Tribune, Tuesday, November 5, 1985.

[From the Chicago Tribune, November 5, 1985]

COVERT ACTIONS IN FULL VIEW

Apparently the United States has reached the point when it can't run a covert CIA operation against the likes of the Libyan leader Col. Moammar Khadafy without someone running to a reporter to blow the whistle.

Last weekend the Washington Post published a story about the operation, which had been disclosed to leaders of the Senate Intelligence Committee, who had some questions about the plan.

It might have been worse, of course. The news might have been that the CIA wasn't doing anything to make trouble for Col. Khadafy, who is one of the most dangerous pirates on the international scene. That would have been one heck of a secret.

As it is, the episode lights up a real problem with the way these matters are handled in Washington. The procedure for planning and authorizing CIA covert actions repeatedly has broken down. In the most absurd instance, there were open debates in Congress about whether to authorize covert aid to the anti-Sandinista guerrillas in Nicaragua. Pretty soon only nostalgia buffs will recall the days when covert still meant secret.

In this latest case, there cannot have been any fundamental controversy over whether it is appropriate for the United States to do what it can to help Col. Khadafy's opponents. If ever covert action were justified, it is justified against Col. Khadafy. But apparently the leaders of the Senate Intelligence Committee were unsure whether the plan entailed anything that could be thought to violate the law against U.S. participation in assassination plots. They wrote letters asking for clarification. Already the thing sounds less like a clandestine operation and more like a negotiation between lawyers over a land deed.

Finally, the information leaked. And the administration is vowing to take some kind of action.

It ought to. Along with Congress, it ought to reconsider the procedures for handling covert actions. It ought to ask whether the loop of people with access to the information is too large. It ought to consider whether legislators should be holding a lively correspondence with the White House over something that is supposed to be utterly secret. If it is important for the United States to be able to take secret steps to help friends and hobble foes—and this newspaper, along with the vast majority of Americans, thinks that it is—let's find a way to do it without making fools of ourselves.

REMARKS OF THE PRESIDENT TO THE GRACE COMMISSION

HON. BEAU BOULTER

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. BOULTER. Mr. Speaker, on Monday, October 28, the President held a Rose Garden ceremony to commend the efforts of the Grace caucus, the Associations United to Cut Federal Spending, and Citizens Against Government Waste.

As the proud founder of the House Grace caucus, I took particular pride in this event, and in the words spoken to us by the President. His strong support of the caucus efforts to cut waste, fraud, and inefficiency from our Federal Government are evident. His commitment to this cause is real.

I would like to share the President's comments with my colleagues who were not at the White House, and have enclosed them for insertion in the RECORD:

REMARKS OF THE PRESIDENT TO THE GRACE COMMISSION

Please be seated. I'm delighted that all of you are here today. First, the distinguished leaders of the Grace Congressional Caucus—Chairman Beau Boulter and Co-chairman Buddy Roemer and Gordon Humphrey. Also, representatives from Associations United To Cut Federal Spending—38 trade organizations led by Wayne Smith, who advised the caucus. And lastly, former members of the Grace Commission, and of another of my favorite organizations, Citizens Against Government Waste, cochaired by Peter Grace and Jack Anderson. (Applause.)

You know, Peter, every time you're here I start thinking about how the Grace contingent keeps growing in numbers in power and in influence. Believe me, nothing delights me more because we need a people's lobby here in Washington.

All of you are here today because of your deep concern about a problem in government that's easy to talk about in terms of saving billions of dollars a year. The war against waste and efficiency is worth waging on just these grounds alone. But I know your involvement goes even beyond this. The people who came before us in this nation put a heavy emphasis on what is today almost a forgotten virtue.

I remember back in Dixon, Illinois when I was growing up, it was called thriftiness. Thriftiness was a quality appreciated as a kind of signal about the maturity and judgment of a person or institution, an indication that deeper values were there. Some of you in business have noticed that when a company gets in trouble, there are more serious problems than simple inefficiency: all sorts of projects and activities that are wasteful or marginal and a neglect of those products or services that made the firm successful in the first place.

Well, government is no different. And as the people here know better than most, the federal government was headed a few years ago in much the same direction. It was neglecting essential tasks like protecting our nation's security abroad and upholding the law at home while it built gigantic bureaucracies to handle all sorts of problems—problems it was neither competent nor intended to handle.

I used to use an example in some of my mashed potato circuit days about the town that decided that they would have better traffic safety if they raised the height of their traffic signs and various warning signs from five feet above the ground to seven feet above the ground. And then, the federal government stepped in and said they had a department to come in and help them, and their plan was to lower the streets two feet. (Laughter.)

Well, then these special interests became involved. Pretty soon the way to a prospering political career was to vote for higher appropriations and for grand new spending schemes that appeal to this or that voting bloc. And if this pattern of putting politics over country sounds familiar, that's because it is. Historians have frequently seen in this "bread and circuses" climate the signs of government in decline and a nation in decay.

Faith in our democratic system—and without that faith democracy simply can't work—was being undermined. As James Madison said, "It's the gradual and silent encroachments of governments, not sudden revolutions, that prove to the threat to freedom." So it was the average citizen who harbored enormous feelings of resentment toward goverment and an enormous sense of frustration. They believed the only voices that were heard in this city were those of the organized lobbies or special interests, not the taxpayers.

Those of you associated with the Grace Commission have forthrightly and without apologies helped change all of this. You have shown that citizens from every walk could come to the capitol and not only make their voices heard, but persuade and, yes, push and prod government to change its ways.

The Grace Commission stood back and took a look at government, concluded that the federal government had lost its moorings, came up with concrete proposals on how to recover those moorings. But, as I know Peter believes, the most important part of the job is upon us—making sure that the Grace Commission is not remembered as just another government commission, and that its recommendations don't become just another pile of reports gathering dust in the Library of Congress—in short, implementing as many recommendations as possible.

And on this point, I have just come from a meeting with the Domestic Policy Council. I have received a final report that shows we are going forward with over 80 percent—as a matter of fact, 83 percent of the commission's recommendations. Many have already been implemented, others included in the '86 budget, and a number will be proposed in the '87 budget. Even with the recommendations deferred at this time, we have every intention of trying to implement as many of them as possible in the future.

I've asked Jim Miller to have OMB continue to monitor our progress and report to me periodically through the Domestic Policy Council.

I also thanked Peter Grace at the close of the meeting, and let me do so now again publicly. Peter, I can think of few Americans who have done more to make the people's voice heard in Washington. You shook this city up. You put the issue of waste and inefficiency front and center on the public agenda. And I am grateful to you and so is America. (Applause.)

But now, we must work together to get your recommendations through the Congress, and that's what this People's Lobby of yours is all about. It's why the Congressional Caucus leaders who are here today are so important. Imagine the courage of these members of Congress who would dare to associate themselves with such a clearcut effort to thwart the special interests. And I want to thank each one of them who are here today.

In carrying on this battle, you're going to need the help of the largest pressure group of all, the taxpayers. And that's why the multimillion dollar, non-partisan campaign by the advertising council is so important in helping to inform and educate the taxpayers.

And, finally, that's why the work of the trade associations and Citizens Against Government Waste are also vital—vital in the battle against budget deficits and vital to the strength and resiliency of the democratic system and public confidence in our government.

So I want to congratulate you on all that you've done. You know, I've mentioned this to you before, but I can well remember a time when waste and inefficiency were thought of as issues without any political appeal—issues that stirred little interest in the media or among the seers and sayers of Washington. Well, all of that is changed.

Government management—mismanagement, I should say, is a hot story, and the Grace Commission has played a key role in bringing the change about. In fact, I want you to know the vigor with which you've pursued this fight has inspired me on other closely related matters, and once again, the issue is your issue—making government responsive to the people.

First, I must warn the Congress that their unwillingness to deal with the debt ceiling and to take responsible action on the deficit is creating a large and unnecessary problem. We're running up against the possibility that we may have to disinvest the Social Security Trust Fund, shortchanging that trust fund of accumulated interest, all because of the inexcusable dithering and delay in meeting the responsibilities about raising the debt ceiling.

So please help us convince them—present company excepted, they're convinced—that the time for political gamesmanship was over long ago.

All of us know the importance of an effective resolution this year to our deficit problem. And I happen to think the Gramm-Rudman-Hollings proposal is an excellent one. This proposal is linked closely to what you're doing, because if we can adopt the plan, we can maintain our commitment to a strong defense while providing a framework for the Grace reforms and a device for flushing out waste and inefficiency. Congress must not fail the people on this.

And, second, I think some of you know that we have a tax reform plan on the agenda this fall. It's a plan I'm certain has the support of the American people. Right now, Congress is in deliberation on this matter and that deliberative process is something I deeply respect. I will await its outcome attentively. But let it be said today, I believe that the essential items of tax reform as I've outlined them, have the support of the American people. And I want action on this plan; I want action this year, and so do the people.

Believe me, if necessary, I'm prepared to spend a lot more time with Congress at Christmas this year than either of us originally anticipated. (Laughter.) (Applause.)

Well, let me conclude by, again, thanking Peter Grace and all those thousands of pa-

triotic Americans who gave unstintingly of their time, their efforts and their talents to help the government. And let me assure you that we, for our part, will not rest in the fight to have their recommenations implemented.

So again, thank all of you and God bless you. (Applause.)

SUPPORT IN UNITED KINGDOM PARLIAMENT FOR UNESCO MEMBERSHIP

HON. JIM LEACH

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. LEACH of Iowa. Mr. Speaker, acts and deliberations of like-minded governments are of an educative value to our own. In this context, I would like to bring to the attention of the House a recently published report of the Foreign Affairs Committee of the British House of Commons regarding UNESCO. The report concludes "that continued membership of UNESCO is an objective which should be pursued in the interests of British scientific, cultural and educational interests," and "that the withdrawal of UK membership of UNESCO is likely to advance Soviet-bloc interests in the Third World." The committee, chaired by Conservative party member Sir Anthony Kershaw, further recommends that the British Government "should not implement its present notice of withdrawal from the Organization unless the Twenty-Third General Conference in Sofia decides either to overturn the recommendations of the Executive Board or decides to adopt new policy directives which would seriously challenge the United Kingdom's interests and the new Concensus which appears to have been achieved in the Executive Board."

I believe the conclusions drawn by the Foreign Affairs Committee of the House of Commons are of direct relevance to the United States and that similar logic should apply to our deliberations on the subject. Excerpts from the House of Commons report are submitted below:

EXCERPTS FROM THE FIFTH REPORT OF THE FOREIGN AFFAIRS COMMITTEE OF THE HOUSE OF COMMONS ENTITLED, "UNITED KINGDOM MEMBERSHIP OF UNESCO"

THE IMPLICATIONS OF WITHDRAWAL

The Benefits of UK Membership of UNESCO

45. Not surprisingly, the organisations in the UK who have given evidence to us have for the most part emphasised the benefits of UK membership of UNESCO so far as their particular interests are concerned. Although there has been a general acceptance of the need for administrative reform and of the dangers of "politicisation", these concerns have in most cases been subordinated to the direct advantages of individual groups and organisations of continuing membership of UNESCO and concern about the likely implications for those individual groups of UK withdrawal.

46. Despite specific concerns, most UK groups have emphasised the direct advantages of remaining in UNESCO and, most important, the problems which would be created by withdrawal. Although the Royal Society, for instance, indicated concern (in their oral as well as their written evidence) about some aspects of UNESCO's programmes, they evidently regarded the prospect of "going it alone" as fraught with difficulty. While continued, separate, membership of some UNESCO-sponsored organisations (such as the IOC) and some UNESCO-supported organisations (such as the ICSU) appeared to be practicable, there were likely to be many problems encountered in continuing international co-operation in other spheres. Successful replacement of some UNESCO programmes would, in practice, depend on the withdrawal of other countries, and, as evidenced by all the UK organisations concerned, on substantial subventions by HM Government to facilitate alternative bilateral and multilateral co-operation.

47. The overwhelming impression of the evidence submitted by partial UK groups is therefore that despite some difficulties in co-operating with UNESCO, the cost and administrative complications of withdrawal from the Organisation would be considerable, and would need to be underwritten by substantial government funds. We were told by ODA officials that no decision had yet been taken by Ministers about the possibility of transferring the present subscription to UNESCO to the support of bilateral and multilateral activities required to replace those conducted through UNESCO.

The financial balance sheet

48. A number of UK organisations drew our attention to the financial benefits of UK membership of UNESCO, resulting in particular from the number of consultancies and contracts placed by the Organisation with UK individuals and companies. The Library Association told us that the US and the UK "have together provided the overwhelming majority of librarians, archivists and other information scientists sent by UNESCO as consultants and advisers." And the United Nations Association claimed that "leaving aside unquantified yields to eg the British publising industry . . . the UK reaps a measurable harvest from its membership".

49. The extent of this harvest is illustrated in Table II, which suggests UK and UK-related receipts from the UNESCO budget substantially in excess of the UK's direct budgetary contribution. Although UNESCO might continue to recruit some advisers and consultants following UK withdrawal, it is likely that most contracts would be brought to a halt or not renewed. Thus, although the Treasury might benefit temporarily from a withdrawal of UK membership, the balance of payments would probably suffer. In his evidence to us, the Director General of UNESCO also drew attention to the relatively high proportion of full-time UNESCO staff who are UK nationals (8.9 per cent of total UNESCO staff), and to British contributions in specific fields of activity, such as science and culture (where 400 of the 900 translations of world classics so far published under UNESCO auspices have been issued by British publishers).

TABLE II.—FINANCIAL COSTS AND BENEFITS TO UNITED KINGDOM OF MEMBERSHIP OF UNESCO

[In U.S. dollars]

	1984 (actual)	1985 (estimate)
Assessed contribution at 4.61 percent of total regular budget	7,945,335	7,945,335
Expenditure in UK from regular programme:		
Fellowships	45,900	35,900
Equipment	61,000	127,200
Fees for Auditors	201,400	201,400
Participation Programme	26,300	26,300
Insurance	240,000	270,000
Total	574,600	660,800
Balance	7,370,735	7,284,535
Expenditure in United Kingdom from extra budgetary funds, eg., other U.N. agencies, funds-in-trust and other voluntary contributions:		
Fellowships	1,239,300	970,300
Equipment	3,420,000	1,188,300
Total	4,659,300	2,158,300
Payments of salaries and fees to UK citizens employed by UNESCO in Paris or in the field:		
Regular budget	6,884,900	6,867,500
Extra budgetary	3,738,400	3,591,400
Grand total	15,857,200	13,278,000

Source: ODA

International consequences of withdrawal

50. Although UK withdrawal would have considerable, and to some extent quantifiable, consequences for the UK organisations involved in UNESCO and for the balance of payments, the wider diplomatic implications of a withdrawal from UNESCO are probably more serious, even if less quantifiable.

51. It was made clear to us during our visit to Paris that UK withdrawal from UNESCO at this stage would be regarded as a breach of faith on the part of HM Government, in particular by the Commonwealth countries who have consistently supported the programme of reforms initiated by Mr. Raison in April 1984. It was bluntly presented to us that, if Britain were to leave UNESCO after receiving so much support from Commonwealth (and other Third World) member states, the chances of further reform in the Organisation would be slim, and further moves towards reform would be viewed with considerable suspicion, particularly if initiated by Western governments who might thereafter leave the Organisation altogether.

52. In part, the Commonwealth reaction to HM Government's actions reflects the very high premium placed by Third World countries on the principle of universality in the membership of the United Nations and its agencies, every breach of which is regarded as devaluing the entire UN system. In part also it reflects the enormous importance attached to the UK presence in UNESCO by the member states of the Commonwealth (as well as other UNESCO members). If anything, the United Kingdom's contribution to UNESCO is more fully appreciated in UNESCO than it is in the United Kindgom, and the universally-expressed regret following a UK withdrawal would be, in our view, entirely genuine. Whereas the withdrawal of the United States was regarded largely as an inconvenience, the withdrawal of the United Kingdom would be genuinely regarded as a serious and substantive loss to the Organisation, particularly by the United Kingdom's Commonwealth allies.

53. Although the West European representatives whom we met were circumspect

about their governments' response to a UK withdrawal, we gained the impression that any hope of a general Western withdrawal from UNESCO was unlikely. Apart from the obvious French interest in continuing membership of the Organisation (since it is based in Paris), other Western countries appear to believe that, while reform is desirable, total Western withdrawal could be counter-productive.

54. Withdrawal would be likely to be counter-productive because, in particular, it would preclude continued Western influence in the development of the Organisation and would therefore be likely to encourage the transfer of effective leadership of UNESCO into the hands of the Soviet Union and its allies. The United Kingdom member of the Executive Board, Mr. W.A. Dodd, drew attention in his evidence to the "heavier" Soviet and Eastern Bloc presence already evident at recent Executive Board meetings, and stressed Third World fears about this development and their concern that, "if Britain left, this predominance or heaviness from the Eastern Bloc would become even more emphatic."

CONCLUSIONS AND RECOMMENDATIONS

55. We share the view of those who have given evidence to us that HM Government had good cause to raise the substantive issues—in relation to the content of UNESCO's programmes and their administration—to which Mr. Raison referred in his letter of 2 April 1984. It is quite clear that concern about the direction of UNESCO's development was widely shared amongst the member states, and that a coherent set of proposals to improve the efficiency of the Organisation, and to encourage a halt to the partisan tendencies within the Organization, was overdue.

56. UNESCO's reaction to the British reform programme was, we believe, as positive as could have been hoped. Mr. M'Bow suggested to us that about 70 per cent of the matters considered by the Executive Board last summer, and subsequently, had originated with the UK Government, and it seems inconceivable that a reform programme of the kind now underway within UNESCO would have been undertaken without the stimulus provided by the UK Government.

57. We have some doubts about whether the threat of withdrawal, issued in late November and early December 1984, contributed more or less to the prosecution of the United Kingdom's case. Drafted in very qualified terms, the notice of withdrawal could be regarded as constituting no more than a warning to UNESCO that a UK withdrawal could prove necessary if substantial improvements were not achieved by the end of the year. On the other hand, the notice of withdrawal was evidently regarded by some as a serious notice of intention to quit the Organisation, and could therefore have been regarded as undermining the UK's negotiating position at UNESCO.

58. The impact of the notice of withdrawal may well have proved more effective than envisaged. We took particular note in this context of the evidence given to us by Mr. W.A. Dodd, the UK member of the Executive Board. Although Mr. Dodd had initially argued strongly against a notice of withdrawal at this stage, he had evidently had second thoughts by the time he gave evidence to us, in view of the apparent beneficial effects of the notice of withdrawal.

59. HM Government's motives in issuing a notice of withdrawal in December 1984 have been questioned by a number of other sources, including Mr. Gough Whitlam (former Prime Minister of Australia and currently Australia's Permanent Delegate to UNESCO). In a recent speech, Mr. Whitlam made particular reference to the role of the US-based Heritage Foundation in the process of moulding British official and public opinion. We have subsequently received what appears to be firm evidence of the Heritage Foundation being involved in campaigns to attack the UN and its agencies, and have no reason to doubt Mr. Whitlam's allegations of attempt by the Heritage Foundation to influence the British press and British opinion-leaders.

60. Despite these allegations we do not doubt that the issuing of a notice of withdrawal was regarded as a legitmate tactic by HM Government's officials and Ministers, and we therefore have no reason to suppose that Ministers were improperly influenced by the Heritage Foundation, or others, in their decision last autumn.

61. We accept the assurance of the Foreign Secretary that the notice of withdrawal was issued in order to "safeguard our position", and we therefore assume that the further review of Government policy after the Sofia Conference will be based on an objective re-examination of the facts and of, in particular, the progress made by UNESCO's institutions in meeting UK demands since Mr. Raison's letter was issued in April 1984.

62. It is evident that substantial progress has been made by the Director General and the Executive Board towards meeting the United Kingdom's requirements for continued membership of the Organization. In particular, the Board has endorsed most of the proposals of the Temporary Committee concerning administrative reform; has endorsed most of the actions taken by the Director General on the advice of his working groups; has accepted most of the advice of the Panel of Counsellors in respect of Major Programme XIII; and has endorsed the United Kingdom's demands for nil growth in the Regular Budget and for no increase in the contributions of member states in consequence of the withdrawal of the United States' 25 per cent contribution. Of the most recent Executive Board meeting (in June and July 1985), the Overseas Development Administration commented that "The most clear cut progress is in a series of proposed amendments to the Secretariat priority grading which will, if endorsed by the General Conference, have the effect of maintaining to a greater extent than was originally proposed a number of high priority programmes, especially in the field of science, which are of direct benefit to member states, particularly the developing countries. A firm recommendation was also made in favour of a further reduction in UNESCO's activities on future orientated studies." Many of the decisions taken to date, however, will require endorsement by the Organisation's General Conference in Sofia.

63. We have concluded

(i) that continued membership of UNESCO is an objective which should be pursued in the interests of British scientific, cultural and educational interests;

(ii) that the withdrawal of UK membership of UNESCO is likely to have detrimental effects on the United Kingdom's relations with other friendly countries, particularly in the Commonwealth;

(iii) that the withdrawal of UK membership of UNESCO is likely to advance Soviet-bloc interests in the Third World; and

(iv) that a breach by the United Kingdom of the principle of universality in the United Nations and its Agencies could have long-term, and damaging, consequences for those organisations, and not merely for UNESCO alone.

64. On the basis of the most recent evidence submitted by the Overseas Development Administration, we believe that UNESCO is moving towards acceptance of the main themes of the UK Government's demands for institutional and programme reform. This must be regarded as a great success for HM Government, so long as the progress so far achieved is endorsed by the Organisation's General Conference. We therefore recommend that HM Government should not implement its present notice of withdrawal from the Organisation unless the Twenty-Third General Conference in Sofia decides either to overturn the recommendations of the Executive Board or decides to adopt new policy directives which would seriously challenge the United Kingdom's interests and the new Consensus which appears to have been achieved in the Executive Board.

65. In view of the importance of UK membership of UNESCO, and of the implications of a British breach of the principle of universality in the United Nations and its Agencies, we further recommend that no decision to alter our present relations with UNESCO should be taken by HM Government without prior consultation of the House.

66. Assuming that the United Kingdom remains a member of UNESCO, we recommend that HM Government should pursue its current programme of reform and should raise in future discussions of the reform of the Organisation the following proposals in particular:

(i) that the term of office of the Director General should be restricted in future to a single term of six years; and

(ii) that the organisational structure of UNESCO should be reformed in such a way as to provide an effective executive body of more manageable proportions than the present Executive Board, perhaps on the lines of the recently-established Temporary Committee.

SOVIET JEWRY

HON. WYCHE FOWLER, JR.

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FOWLER. Mr. Speaker, with the Geneva summit drawing closer, I believe that we need to show our continued concern about the plight of Soviet Jews. Moreover, we must demonstrate our willingness to continue to press the Soviet Union to improve its treatment of Soviet Jews. Emigration levels for Soviet Jews have remained low so far this year. In addition, acts of harassment have occurred on an almost daily basis against Soviet Jews. I am submitting for your review a list of acts of harassment that were committed against Soviet Jews from September through November 1984.

NATIONAL CONFERENCE ON SOVIET JEWRY

SEARCHES, ARRESTS, HARASSMENT AND IMPRISONMENT OF HEBREW TEACHERS AND JEWISH ACTIVISTS IN THE SOVIET UNION

September 4: In Moscow—Yuly Edelshtein was arrested. He was charged with illegal possession of drugs, Article 224. The drugs were found during a search of his home. Since Edelshtein applied to emigrate in 1978 he has been harassed by the authorities, who wanted to expel him from Moscow. His home was searched periodically and he was warned to stop teaching Hebrew.

September 5: In Odessa—the homes of Aleksandr Kushnir, Valery Pevzner, and Yakov Mesh were searched. Tape recorders, cassettes, prayerbooks, Hebrew textbooks, postcards from Israel, prayer shawls, and tefillin were confiscated. At Kushnir's an invitation from his mother in Israel and a necklace with a Magen David he was wearing were confiscated.

September 8: In Moscow—unknown persons attacked Mikhail Kholmiansky (brother of Aleksandr) in the street and took his brief case.

September 8: In Leningrad—Gorodetsky was fired from his job for having refused to divulge details about his place of work.

September 8: In Moscow—Viktor Fulmakht was summoned to the KGB and interrogated.

September 8: Another search was made in Edelshtein's home and newspapers in various languages, requests for exit permits, and a copy of a complaint of Tania about previous searches were confiscated.

September 12: In Odessa—Yakov Mesh was summoned to the Department of Investigations of the Procurator's Office and amidst anti-Semitic insults demands were made upon him to give testimony in the case of Yakov Levin. He was threatened with having a file opened against him if he refused to testify.

September 13: In Moscow—Edelshtein's 16-17 year old pupils were interrogated. Materials in Hebrew, including books and cassettes, were taken from them. They were forced to sign a document stating that Edelshtein sold them books for 15 rubles each.

September 20: In Moscow—Searches were conducted in the homes of Inna Brukhina and Dan Shapiro. A tape recorder, cassettes, and books were confiscated. The searches were related to the case of Edelshtein. The search at Shapiro's lasted nine hours, and during it his mezuzot were broken. At Brukhina's a Tanach, Hebrew books, and a certificate of Israeli citizenship were taken.

September 20: Igor Kharakh was taken to Lubianka Prison for interrogation and warned to stop his relations with Brukhina and Shapiro.

September 20: In Odessa—Sofia Vitaver was summoned for interrogation in connection with an injury sustained by one of the official witnesses during a search in her home on 31 August. Sofia was sentenced to 15 days detention.

September 23: In Moscow—5 persons were interrogated in the case of Kholmiansky by an investigator who came to Moscow from Tallin.

September 23: In Leningrad—Mikhail Vinaver was summoned for interrogation.

September 24: In Moscow—a court of second instance approved Aleksandr Yakir's sentence of two years in a work camp.

September 26: In Irkutsk—Zakhar Zunshain was beaten in prison camp by other prisoners and his ribs and kidneys were injured. One of the guards stated: "Too bad Hitler didn't finish the job."

September 30: Prisoner of Zion—Simon Shnirman was punished by being put in an isolation cell. His wife was not allowed to visit him or to give him parcels. This was in Kishinev.

October 2: In Odessa—Yehudit Nepomniashchy was summoned for interrogation and refused to give in to the demand that she serve as a witness in the case of Levin.

October 4: In Odessa—the investigator refused to allow Yehudit Nepomniashchy to serve as defense attorney for Yakov Levin. This was after Yehudit had had no success in finding him a lawyer.

October 7: In Moscow—A search was conducted at the home of Natalia Rather, relating to the case of Kholmiansky.

October 7: In Kishinev—A search was conducted at the home of Aleksandr Kogan, relating to the case of Kholmiansky. Textbooks and religious books were confiscated. Kogan was warned that he might be arrested.

October 10: In Kishinev—V. Tsukerman and O. Lokshin, who were not able to find jobs, were threatened with being charged with "parasitism."

October 12: In Odessa—At the close of the Sukkot holiday a fourth search was made at the home of Mark Nepomniashchy.

October 12: In Moscow—while visiting here, Mark Nepomniashchy was arrested.

October 16: In Odessa—Yakov Mesh was arrested. When taken into custody he was beaten and dragged to the police station. About 10 policemen participated in his arrest.

October 17: In Bendery—A search was conducted in the home of Moshe Liberman in connection with the case of Yakov Levin.

October 17: In Tiraspol (Moldavia)—A search was conducted in the home of Polina Grin in connection with the case of Jakov Levin. Religious materials were confiscated, which, according to the investigator, would be placed in Levin's file, since the material allegedly contained intentional slander against the Soviet state and social system.

October 17: In Kishinev—A search was conducted in the home of Aaron Minblit in connection with the Levin case. A letter of Nepomniashchy was confiscated.

October 21: In Odessa—Rumors were spread that the authorities were seeking a Zionist group whose activities and ties with people abroad had caused damage to the USSR. At the end of the investigation, according to the rumors, the trial would be televised on Ukrainian or all-Soviet TV. Anti-Semitism in the local Odessa press intensified.

October 23: In Odessa—Marina Mesh was taken from an airplane she was boarding to go to Moscow. She was searched and a copy of a letter signed by nine witnesses, fellow-employees of Yakov Mesh who saw him beaten during his arrest, was confiscated from her.

October 25: In Moscow—The KGB summoned for "conversations" people from different places, in order to get prejudiced, even false, testimony in the cases of Kholmiansky and Edelshtein.

October 25: In Odessa—In connection with the cases of Levin and Nepomniashchy searches were conducted in the homes of several Jews (who are afraid to have their names made known outside the Soviet Union).

October 25: In Odessa—Yehudit Nepomniashchy was told by the authorities that she would not be permitted to marry Yakov Levin until the end of his trial and that she would not be permitted to see him either.

October 30: In Leningrad—Mikhail Vinaver was summoned to the KGB and told that his wife, Evgenia, belonged to a Leningrad group of the Jewish Defense League, which planned to carry out grandiose acts of sabatoge in Leningrad.

November 1: In Odessa—The Procurator's Office summoned 15 fellow-employees of Yakov Levin to testify against him at his trial.

November 1: In Leningrad—The authorities disconnected the telephone in the home of Yosif Radomyslsky.

November 1: In Kiev—The Official in charge of religious ceremonies warned Lev Elbert that the Kabbalat Shabbat service was a religious ceremony and needed an official permit.

November 1: In Leningrad—Mikhail Elman was taken into custody while on the street. At the police station he was beaten and forced to sign a document promising secrecy and cooperation with the authorities. On November 3 he was again summoned to the police station to fulfill the obligation to cooperate with the authorities. When he refused to cooperate he was again beaten. The officials threatened to put an end to Jewish religious life in Leningrad.

November 5: In Moscow—The scientist Mikhail Marinov was summoned to a police station and accused of "parasitism."

November 10: In Leningrad—Policemen tried to break into the apartment of Mikhail Elman during the circumcision ceremony of his son.

November 10: In Leningrad—The authorities threatened to open a criminal file against Nadezhda Fradkova.

November 10: In Leningrad—Three KGB men attacked Evgeny Lein on the stairs to his apartment, beat him severely, and continued hitting him while taking him to a waiting car, in front of passers-by. They twisted a finger on his right hand, injured his left ear, and threatened him with reimprisonment.

November 12: In Leningrad—A TV program was screened which was partly devoted to "international Zionism." The names of activists, and pictures of some, were given. They were described as engineers who refused to work and lived from gifts.

November 13: In Leningrad—Evgeny Lein was fired from his job.

November 13: In Leningrad—A file was open against Nadezhda Fradkova for "parasitism."

November 13: In Moscow—Mikhail Kholmiansky was detained for interrogation in connection with his activities, which, according to the KGB man, were endangering his freedom.

November 14: In Novograd-Volynsk—Refusenik Yosif Berenshtein of Kiev, father of Yana Berenshtein, was arrested.

November 15: In Leningrad—The KGB continued to put pressure on Mikhail Elman, who was summoned to give information about his friends.

November 15: In Odessa—The trial of Yakov Lenin opened. Of those close to him, only his parents were allowed to enter the courtroom. Mikhail Tsivin, who came from Leningrad to attend the trial, was taken into custody for 15 days.

November 16: In Leningrad—Extreme pressure was brought to bear on Yosif Radomyslsky—a KGB man came to his place of work and demanded that he be fired.

November 17: Inna Shlomova and Boris Begun were not permitted to see Yosif

Begun, who was being punished with 52 days in an isolation cell. The meeting with him was postponed until the end of 1985.

November 19: In Tallin—Jews connected with the Kholmiansky case were again interrogated.

November 20: Simon Shnirman's wife's planned visit with him was canceled.

PROHIBITING U.S. ASSISTANCE TO FORCES IN ANGOLA

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. WEISS. Mr. Speaker, there is strong pressure within the Reagan administration to reinvolve the United States in the war in Angola—on the side of the forces backed by South Africa. And we have even seen legislation introduced in this House which would have that effect.

What do we know about the group which calls itself UNITA, and which the administration wants to aid? We know that its leader Jonas Savimbi, was trained in China and has described himself as a "Maoist." We know that UNITA forces killed an American last year when they shot down the civilian aircraft in which he was traveling. We know that they have kidnaped other Americans. We know that they have inflicted terrible suffering on civilians living in the areas where they operate, including torture, mutilation, and murder.

We know that in April 1984, a few months after the truck-bombing of the Marine Barracks in Beirut, UNITA did the same thing—they drove a truck loaded with expolsives into a seven-story building in Huambo, Angola, and killed upward of 100 people. Nor did they deny that they had committed this cowardly and brutal act. According to the respected British weekly the Economist, UNITA claimed responsibility for the bombing and even bragged that the death toll had been 200.

Perhaps most critical of all the things we know about UNITA, we know that it is a surrogate force of the South African Government. It operates from Namibian bases with the collusion of South Africa, and South Africa provides it with material support as well.

In the context of what has happened in the last year in Southern Africa, it is astonishing that anyone in this country would suggest that we enter into a de facto military alliance with the enforcers of apartheid.

Such an alliance would further neither our national interests nor our national security.

As Secretary of State Shultz has argued, if we aid one of the forces fighting in Angola, we destroy our chances of acting as mediator in the conflict.

By helping South Africa to attack Angola, we would make Angola more dependent on Cuban troops, not less so.

We would be promoting South Africa's foreign policy agenda, not our own. By crushing any hopes of a negotiated settlement in Namibia, we would be winking at the illegal South African occupation of that country. We would be assisting in a South African policy of terrorizing its neighbors and keeping them in a state of desperation and dependency. Only last month, South Africa launched a large-scale invasion of Angola which was condemned even by officials of the Reagan administration.

Aid to the South African-backed forces would also demonstrate to the Pretoria government that we are not serious about imposing sanctions on the apartheid regime for its brutal policies. By taking over a share of Pretoria's military adventure against Angola, we would be directly freeing resources for use against the South Africa's own black majority.

The essential point is a simple one: The United States has no business entering into a military alliance with the apartheid Government of South Africa.

For these reasons, I am today introducing legislation which will prohibit U.S. aid, direct or indirect, to any of the forces fighting in Angola. I am pleased to announce that the original cosponsors include Africa Subcommittee Chairman Howard WOLPE and Representatives STEPHEN J. SOLARZ, GEORGE W. CROCKETT, Jr., ROBERT GARCIA, LOUIS STOKES, ROBERT W. KASTENMEIER, MICKEY LELAND, JULIAN C. DIXON, WALTER E. FAUNTROY, RONALD V. DELLUMS, PARREN J. MITCHELL, ALAN WHEAT, CHARLES B. RANGEL, MERVYN M. DYMALLY, EDOLPHUS TOWNS, and PATRICIA SCHROEDER. I invite all Members of this House who are concerned about our South Africa policy to join us as cosponsors.

The text of the bill follows:

H.R. 3690

A bill to prohibit assistance for military or paramilitary operations in Angola

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. MILITARY AND PARAMILITARY OPERATIONS IN ANGOLA.

(a) PROHIBITION ON ASSISTANCE.—Notwithstanding any other provision of law, no assistance of any kind may be provided by any agency or instrumentality of the United States Government for the purpose, or which would have the effect, of promoting or augmenting, directly or indirectly, the capacity of any nation, group, organization, movement, or individual to conduct military or paramilitary operations in Angola.

(b) WAIVER PROHIBITED.—Subsection (a) may not be waived under any other provision of law.

TRIBUTE TO BISHOP JAMES W. MALONE: A MAN OF PEACE AND COURAGE

HON. JAMES A. TRAFICANT, JR.

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. TRAFICANT. Mr. Speaker, at this time I would like to pay a fitting tribute to Bishop James W. Malone, of Youngstown, OH. Bishop Malone is the president of the National Conference of Catholic Bishops and, I am proud to say, a constituent of mine. On October 29, 1985, Bishop Malone addressed a gathering at Youngstown State University to celebrate the 40th anniversary of the United Nations.

Bishop Malone made a moving speech, emphasizing the need to eliminate nuclear arms and the need for the United Nations [U.N.] to take a more active role in achieving worldwide peace. Bishop Malone has been a consistent voice for peace and justice throughout his distinguished career.

The bishop has been outspoken on the conflict in Northern Ireland, and he has consistently spoken out on behalf of peace and morality since the 1940's. Most importantly, Bishop Malone has never wavered in his lifelong commitment to spread the message of peace, and he has never hesitated to speak out in behalf of justice and morality.

Rightfully so, Bishop Malone is extremely concerned over the massive buildup of nuclear arms among the superpowers. He has provided a much needed rational voice for the cause of peace and sanity. While his views may not be popular among many—that has never prevented him from spreading his message. Bishop Malone is a man of vision and rare courage. At a time when it is easy to talk "tough" and, all too often, act "tough" when dealing in foreign affairs, Bishop Malone reminds us of the vital importance of morality and justice in dealing with both our friends and enemies. Bishop Malone has presented all of us with a challenge we cannot ignore: humanity must say "no" to the inevitable arms race, the inability to match moral values with technological capabilities, and to the web of terrorist fear in which the world is caught.

Bishop Malone has contributed so much to the greater Youngstown community and the Nation as a whole. He has been a powerful voice for peace and justice, and his noble message has gained worldwide attention. Mr. Speaker, at this time, I would like to insert into the RECORD an article that appeared in the Youngstown Vindicator on Bishop Malone's recent speech at Youngstown State University:

[From the Youngstown Vindicator, Oct. 30, 1985]

BISHOP SAYS U.N. FAILS ON NUKE CONTROL

(By Alyssa Lenhoff)

Bishop James W. Malone charged that the United Nations has done little to help end the nuclear arms buildup, which he called "one of the greatest curses of the human race."

The bishop, president of the National Conference of Catholic Bishops, was the featured speaker Tuesday night for a celebration of the United Nation's 40th anniversary held in Youngstown State University's Kilcawley Center by the local chapter of the United Nations Association.

Bishop Malone, who became a priest the same year the United Nations was formed, said the international body has been ineffective in controlling nuclear arms and the threat they pose to peace.

"Those living when the U.N. was formed in 1945 shared the hope of [then] Secretary of State John Foster Dulles, who said the

U.N. could become a Magna Carta for peace," the bishop said.

But even then, he recalled, "Few voices spoke about the morality of what our nation had done when it dropped the bomb."

Bishop Malone, whose speech topic was "Who's Speaking for Peace These Days?" said there were some who spoke for peace and morality in the 1940s.

But, like the situation today, he said those voices were and continue to be too weak to convince world leaders that they must take strong action for securing peace.

"Those who speak against stockpiling of atomic weapons are considered to be at best naive and at worst, un-American," Bishop Malone said.

He stated that the President and the leaders of most countries only give "lip service" to arms control.

"I look to the upcoming arms talks with only guarded hope," he said.

But there are people speaking for peace and their voices are beginning to be heard, the bishop said.

The United Nations is one of those voices, but Bishop Malone stated firmly that its actions toward achieving that goal with necessary nuclear arms control are unimpressive.

The United Nations established the Atomic Energy Commission to help rid the national arsenal of atomic, and all mass destruction, weapons.

"The United Nations has seen a lack of success in controlling these weapons," he said.

"Instead of eliminating nuclear weapons, we've made more," he said.

The bishop said nuclear nations have never destroyed one of their nuclear weapons and that 1,000 nuclear weapons have been exploded in atmospheric and ground tests since the United Nation's birth.

Bishop Malone also stated that the amount of money, $550 billion, which is spent worldwide on construction of nuclear weapons could go "a long way" to help conquer "real" world problems.

Quoting former President Dwight D. Eisenhower, the bishop said, "Every gun made signifies a theft from those who hunger and are not fed and from those who are cold and not clothed."

He also quoted civil rights activist Dr. Martin Luther King, saying, "We are traveling along a road of hate."

Bishop Malone is confident we can rechart that course if humanity will "stand up and speak for peace. . . ."

He said humanity must say "no" to the inevitable arms race, the inability to match moral values with technological capabilities, and to the web of terrorist fear in which the world is caught.

Conversely, the bishop said, mankind must agree to the power of each individual to make a difference, to the high priority on life and, most important, humanity must say, "Yes to peace."

"For all of its flaws and failures," Bishop Malone added, the U.N. is still the best vehicle to secure worldwide peace.

He commended the United Nations on its successes with helping to avert potential wars and control volatile situations.

The bishop also hailed the body for its help in controlling hunger and lowering infant mortality rates in many countries.

Bishop Malone joined other American Catholic bishops in 1983 and wrote the "Pastoral Letter on Peace."

The letter states that the United Nations must be examined carefully and that it must take a more "positive and creative" role in helping to achieve worldwide peace.

Bishop Malone was introduced by Dr. Kong T. Oh, an area eye surgeon, who chaired the association's anniversary dinner.

"The promise of world peace is possible and inevitable," Dr. Oh said.

Bishop Malone agreed with Dr. Oh. But he cautioned that before the "inevitable" is achieved, "We all must speak," and more important, "act for peace."

The Youngstown UNA chapter presented Bishop Malone with a certificate recognizing his efforts for world peace and unity.

Grace Luce, who has stepped down after 16 years as chairman of UNICEF cards and gifts for the Mahoning and Shenango Valleys, was awarded a certificate from the chapter in recognition of her service to UNICEF.

Ursuline High School and St. Joseph Newman Center received complimentary one-year organizational chapter memberships, while the Lake-to-River Girl Scout Council and Youngstown Area Camp Fire Council were awarded certificates of appreciation for outstanding support of UNICEF.

Chapter President Raymond Nakley, Jr. made the presentations on behalf of the organization.

In addition, the Camp Fire Council presented the Mahoning-Shenango Valley Area UNICEF committee with a certificate for efforts to help children through UNICEF.

The Girl Scouts presented the UNA chapter with a certificate outlining Girl Scout objectives and goals in supporting UNICEF.

LESSONS OF GRENADA WEEK

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. GINGRICH. Mr. Speaker, the House of Representatives has shown its support for last week's "Lessons of Grenada Week," by passing House Joint Resolution 313. Several of the States' Governors also supported this effort with proclamations. They should be of interest to those in this House who supported House Joint Resolution 313.

The proclamations follow:

COMMONWEALTH OF PENNSYLVANIA,
OFFICE OF THE GOVERNOR,
Harrisburg.

GREETINGS:

More than three hundred years ago, William Penn had a vision of a land of freedom, opportunity and tolerance for all men and women. Today, Pennsylvanians and, indeed, all Americans continue to uphold that dream.

Unfortunately, the government of the Soviet Union, its satellites and other intolerant regimes deny the most basic rights to their citizens. It is, therefore, appropriate that people of goodwill everywhere recognize the situation that exists in countries under totalitarian rule.

During the week of October 21-26, 1985, many people are observing "Lessons of Grenada Week" to recall the events that took place in the island of Grenada on October 25, 1983. As Governor of the Commonwealth of Pennsylvania, I urge all citizens to study the lessons to be learned from that experience.

DICK THORNBURGH,
Governor.

STATE OF MARYLAND—PROCLAMATION

Whereas Armed Forces of the United States, in order to protect the lives of United States citizens and to counter hostile influence threatening the Western Hemisphere, invaded the island of Grenada on October 25, 1983; and

Whereas In this military action 18 members of these United States forces lost their lives and 116 others were wounded; and

Whereas At least one of those killed and two of the wounded were sons of Maryland responding to their country's call; and

Whereas It is appropriate that our nation remember and express appreciation of the eternal sacrifice of those who gave their lives and suffered wounds in the performance of their duty to their country;

Now, Therefore, I Harry Hughes, Governor of the State of Maryland, do hereby proclaim October 25, 1985, as Battle of Grenada Memorial Day in Maryland, and commend this observance to all our citizens.

STATE OF NORTH CAROLINA—PROCLAMATION

On October 25, 1983, American Armed Forces landed on the Island of Grenada and rescued United States students and Grenada from a Communist dictatorship. It was during this rescue mission that troops discovered more than 35,000 pounds of documents which portrayed how the small nation was nearly transformed into a Communist client state. In addition to classified documents, American soldiers also found stores of weapons supplied by Soviet bloc countries.

In liberating the island of Grenada from a Communist dictatorship, the combined military forces brought to the attention of the American people the real threat of Communism to our nation. It is a threat which our citizens must remember vividly if we are to protect our freedom and independence.

During the week of October 20 through October 26, 1985, the second anniversary of the liberation of Grenada, groups and individuals will have an opportunity to sponsor events during the observance of "Lessons of Grenada Week" to foster greater understanding of the threat of Communism.

Now, therefore, I, James G. Martin, Governor of the State of North Carolina, do hereby proclaim the week of October 20 through October 26, 1985 as "Lessons of Grenada Week" in North Carolina, and I commend its observance to all North Carolinians.

In witness whereof, I have hereunto set my hand and affixed the Great Seal of the State of North Carolina at the Capitol in Raleigh this tenth day of October, in the year of our Lord nineteen hundred and eighty-five and of the Independence of the United States of America the two hundred and ninth.

HEALTH WARNING LABELS NEEDED FOR SMOKELESS TOBACCO

HON. MIKE SYNAR

OF OKLAHOMA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SYNAR. Mr. Speaker, the dangers of using smokeless tobacco products become more apparent each day. Numerous studies

have documented the increased risks of oral cancer, gum disease, and tooth loss associated with using smokeless tobacco. Public health organizations are nearly unanimous in their support for legislation to warn users of these dangers.

I am submitting for the RECORD a recent article from the Daily Oklahoman which illustrates the ongoing State efforts to discourage smokeless tobacco use. Oklahoma has been a leader in bringing this issue to the public's attention.

The University of Oklahoma College of Dentistry has created a special clinic for children, adolescents, and young adults who are chronic users of smokeless tobacco. The director of the clinic says that he already has seen a 12-year-old patient with precancerous lesions from using smokeless tobacco.

I urge my colleagues to cosponsor legislation introduced by Representative WAXMAN and myself, H.R. 3510, which requires warning labels on smokeless tobacco packages and advertising, bans TV and radio advertising, and requires the disclosure of chemical ingredients such as nicotine. We should act now to avert an epidemic of oral cancer in the future.

The article follows:

[From the Daily Oklahoman, Nov. 4, 1985]

EFFORTS ACCELERATED AGAINST USE OF SMOKELESS TOBACCO

Oklahomans on several fronts are attempting to warn the public—particularly adolescents and young adults—about the dangers of snuff and chewing tobacco.

In Washington, a U.S. House subcommittee on health has approved a proposal calling for warning labels for smokeless tobacco products and printed advertisements. A cosponsor of the measure is Rep. Mike Synar, D-Muskogee.

In Oklahoma City, the University of Oklahoma College of Dentistry has started a special clinic for children, adolescents and young adults who have been chronic users of smokeless tobacco.

And dental educators with the Oklahoma Department of Health have launched a new campaign to combat the popularity of smokeless tobacco products among school-age children.

The snuff-related death a year ago of 19-year-old Sean Marsee of Ada has brought national attention to what physicians believe are growing health risks associated with the use of smokeless tobacco.

The teen-ager's death was attributed to a six-year habit of dipping snuff.

"Persons who use chewing tobacco or snuff are at an increased risk of developing cancer of the oral cavity, pharyax, larynx, throat and esophagus," said state health commissioner Joan K. Leavitt.

Other harmful effects of smokeless tobacco include increased blood pressure and heart rate, gum disease, greater wear on tooth enamel and discolored teeth, she said.

The House bill co-sponsored by Synar sets the minimum age for the purchase of smokeless tobacco at 21.

The bill also requires that snuff and chewing tobacco carry warnings that the product might cause mouth cancer, gum disease and tooth loss, that it contains nicotine, and that it is addictive.

Labels can be rotated, but they must be carried an equal number of times on each brand during a 12-month period.

The subcommittee's proposal, which next goes to a full House committee on health, also bans radio and television advertisement of smokeless tobacco products.

At the OU College of Dentistry, oral pathologists and pediatric dentists will evaluate the patient's oral cavity for any indication of detrimental changes in oral tissue as a result of the use of smokeless tobacco.

Dr. Richard J. Mathewson said "chronic" users are those who dip snuff or use chewing tobacco at least once a day for a six-month period.

Mathewson said he already has seen a 12-year-old patient who had pre-cancerous lesions from using smokeless tobacco.

The OU clinic will be held during the afternoon the last Friday of each month at the dental college building, 1001 Stanton L. Young Blvd.

Appointments are necessary, and a $5 fee covers the cost of a complete examination of the oral cavity, consultation with faculty members and, if necessary, oral photographs and X-rays.

Patient evaluations will be sent to the family's dentist for follow-up.

Leavitt said health department dental educators report that in every classroom they visit, some children say they use chewing tobacco or snuff.

Oklahoma law banning the sale of tobacco products to minors became effective Nov. 1, she said.

Several state school systems now have policies banning tobacco products from school property and at school events, Leavitt said.

Educational materials on the subject of smokeless tobacco, including a slide/tape presentation designed for elementary and junior high school students, are available through the health department.

A.R. TARANTO RETIRES AFTER 44 YEARS IN THE LINDEN SCHOOL SYSTEM

HON. BERNARD J. DWYER

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. DWYER of New Jersey. Mr. Speaker, every one of us in our dealings in our districts has the opportunity to learn of some wonderful individuals—the unsung heroes of American society. These are the people who dedicate their lives to serving others and to making their communities and, therefore, their Nation a better place to live. I would like to share with my colleagues today the story of one such individual on the occasion of his retirement.

A.R. Taranto will retire in December as the superintendent of the Linden school system after a 44-year career which has seen him rise from a teacher in Linden High School to the head of the entire system. It is a record marked by dedication and achievement.

Although the beginning of his teaching career was interrupted by 3 years of military service during World War II, Mr. Taranto returned to teaching until 1949, when he became an assistant school psychologist. Eight years later, he became school psychologist and, shortly thereafter, was promoted to the department's assistant directorship. In 1963, he assumed the additional responsibility of becoming an elementary school principal, taking on a second school 3 years later.

Mr. Taranto then ascended to the position of administrative assistant to the superintendent, assistant superintendent, and, finally, in July 1972 to the position of superintendent, where he has served for more than 13 years.

But, the story of A.R. Taranto is more than just one of personal success and longevity. It is also a story of achievement.

Taking over the Linden schools in the early 1970's was a substantial challenge, one which he met head on. Long before anyone had heard of "back to basics," well before there was a report called "A Nation at Risk," A.R. Taranto was raising standards and striving for excellence. Setting a stringent, districtwide homework policy and developing rigorous attendance and graduation requirements, he was at least 10 years ahead of other educators. Reading and writing were given the highest priority and gifted and talented programs were developed.

A new alliance was formed between the schools and the parents and, under Taranto's leadership, a newsletter was begun to bring important school-related issues into the home. New programs were begun, including preschool education for the handicapped, remedial and vocational programs and special job placement for handicapped high school students.

More recently, Mr. Taranto has been directing the development of comprehensive computer literacy programs for students and others, as well as the computerization of the district's administrative functions.

Mr. Speaker, it is safe to say that in the last half century, no single individual has had a more dynamic effect on the development of the Linden school system than A.R. Taranto. His vision, his innovation, and his leadership have helped Linden to attain great heights in educational success. He will be sorely missed after his retirement, but it is a retirement well deserved after a lifetime of giving. For that, we all owe him a debt of thanks.

BILL OFFERS RELIEF FOR SMALL BUSINESSMEN

HON. NANCY L. JOHNSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mrs. JOHNSON. Mr. Speaker, I would like to take this opportunity to congratulate and extend my support to the gentleman from North Carolina [Mr. BROYHILL] for his intelligent response to a very real problem in my district and many others throughout the United States. As ranking Republican on the House Committee on Energy and Commerce, his attentiveness to this situation will, I trust, lead to a workable solution to this problem and I hope my colleagues will join us.

Pursuant to the amendments to the Solid Waste Disposal Act as amended by the Resource Conservation and Recovery Act and enacted into law on November 8, 1984, those hazardous waste generators who wish to store such wastes onsite must meet certain minimum technological and financial requirements. The requirements for such landfills and surface impoundments include sophisticated ground water monitoring, installation of liners, and evidence of financial responsibility. As one who supported the goals of H.R. 2867, the bill that eventually became Public Law 98-616, I had no quarrel with those requirements but recently have learned that the financial responsibility provision is causing considerable disruption among those generators who wish to abide by the law.

Mr. Speaker, the Environmental Protection Agency and various State offices of environmental protection and management have determined the financial responsibility requirement to be one of two things: insurance for millions of dollars' worth of coverage or self-insurance. For the smaller companies that make up the backbone of American business, self-insurance for $1 to $6 million is simply out of the question. Thus, many of these companies have spent the last year searching for outside insurance policies that would provide the coverage necessitated by the law.

The November 8, 1985, deadline for meeting these financial responsibility requirements is close at hand. Yet, several employers in my district alone have reported that, despite their best, good faith efforts, they have been unable to secure adequate insurance to meet the mandate of the law. They are in compliance with every other aspect of Public Law 98-616 but face closure of their onsite landfills on November 8 if they cannot find insurance.

Representative BROYHILL's bill offers relief to these small businessmen only insofar as the financial responsibility requirements are concerned. If they can show the EPA Administrator total compliance with all other legal requirements and a good faith effort to obtain insurance coverage, they will be given a 1-year extension on meeting the financial responsibility requirements.

I commend Mr. BROYHILL and strongly urge my colleagues to consider this important measure.

THE TRAGEDY OF ALZHEIMER'S

HON. DENNY SMITH

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. DENNY SMITH. Mr. Speaker, November has been designated as "National Alzheimer's Disease Awareness Month." It is only fitting that we focus our attention on this and the other forms of dimentia that currently afflict 2.5 million Americans. Alzheimer's is an especially tragic disease because, in the words of one prominent physician, "a person with a serious dimentia is no longer human. He is a vegetable. That's devastating. . . . The thought is that it could happen to you."

The societal costs of Alzheimer's disease are staggering. Those suffering from Alzheimer's face progressive cognitive deterioration, eventually resulting in a complete loss of intellectual abilities. Most victims must be institutionalized during the later stages. Alzheimer's disease accounts for an estimated 50 percent of those in nursing homes and long-term care mental hospitals.

The disease can also be devastating to the victim's families. They face increased demands on their time and financial resources. Victims require constant attention and supervision, and custodial services in later stages of the disease. While the Federal Government spending billions each year for Alzheimer's sufferers under the Medicaid Program, the brunt of these costs is still borne by families. In 1982, the Federal Government spent $6.5 billion, while families spent $24 billion for such care.

I am encouraged, however, by recent congressional actions in response to a growing awareness of the disease. The Health Research Extension Act of 1985, recently approved by the Congress, requires the Director of the National Institutes of Health to make grants to public and nonprofit private institutions to conduct research relating to Alzheimer's disease. While progress has been made in diagnosing the causes of Alzheimer's and in developing treatments much remains to be done.

We must also provide relief to the families who tirelessly care for the victims of this heart-wrenching disease. That's why I have cosponsored H.R. 468, a bill to provide a tax deduction for individual taxpayers for home care and adult day care expenses of a dependent who suffers from Alzheimer's or related organic brain disorders. The financial relief that this deduction would provide is certainly needed. Families also need to know that their patience and hard work do not go unnoticed.

Mr. Speaker, as our society ages and as life expectancies continue to increase, Alzheimer's disease will become a more serious problem. We must work together to find prevention and treatments for the disease, as well as provide care that upholds the dignity of the individual.

PUBLIC POWER PREFERENCE IN HYDRO RELICENSING: THE MERWIN CASE

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, November 12, 1985

Mr. BONKER. Mr. Speaker, on October 22, 1985, the District of Columbia Circuit Court of Appeals issued a decision that should have a major bearing on the hydroelectric relicensing issue, which is now before Congress. The court ruled that in a tie between public and private applicants for relicensing of a Federal hydrosite, the public agency has preference. Congressman SHELBY's relicensing bill, H.R. 44, would eliminate the public preference in relicensing and would have the effect of granting perpetual ownership of the Nation's waterways to existing licensees. I support the public power preference reaffirmed by the court of appeals because it brings needed competition to the hydro relicensing process. I would encourage my colleagues to take note of this important case, which is explained below. I would also be happy to provide Members with the full text of the decision upon request.

In CCJOA versus FERC, referred to as the Merwin case, the court determined that public agencies have preference over all other applicants, including an incumbent licensee, upon the relicensing of hydroelectric projects. Thus, when a public agency demonstrates that its plans for operation of a federally licensed hydroelectric project are as good as or, to use the words of the statute, "equally well adapted" as a private entity's plans, then the public entity should receive the new license to the use of the water resource.

The court held that this is exactly what the Congress intended when it passed the Federal Power Act in 1920 following nearly 10 years of careful and spirited deliberation. As stated in the court's Merwin decision—

> At stake is the vitality of a Congressional decision favoring municipalities in the operation of hydroelectric power plants • • • Congress labored long and often to establish a public power policy for this country. The monumental political battles which took place over this issue reflected the willingness and determination of powerful adversaries with strongly held views. Every aspect of the statute that finally emerged was repeatedly and hotly contested.

Nevertheless and despite the unusual congressional effort which went into fashioning the provisions of the Federal Power Act and a public power policy, this Congress is rushing to reverse that longstanding policy.

I believe that we are being railroaded by pressure from private utilities which claim vested property rights, deny the existence of the municipal preference, and finally cloak all their arguments behind warnings of "devastating impacts to their consumers." These claims have not been carefully evaluated and the recent Merwin decision strongly indicates that they should be. Private utilities have been arguing for many years that there is no preference for municipalities upon relicensing and that we should "clarify" the law in their favor. They argued against the existence of a municipal preference before FERC in a proceeding, known as Bountiful, which had been brought by municipal utilities to settle the question of municipal preference on relicensing. FERC in 1980 held that, indeed, municipalities do have a preference upon relicensing and successfully defended this preference in the 11th Circuit Court of Appeals. The private utilities sought review of that decision by the U.S. Supreme Court, but certiorari was denied. Unfortunately, the Commission also sought certiorari at

that time in an effort to get its earlier opinion back in order to reverse it. Four of the five FERC Commissioners had changed since the Commission's earlier Bountiful ruling and the Commission decided at a secret meeting to adopt the arguments of the private utilities which FERC had previously rejected and argued against in the 11th circuit.

Following denial of certiorari in the Supreme Court, the municipalities thought that the issue of municipal preference was settled. However, to their surprise, the Commission reversed Bountiful in a site-specific relicensing hearing involving Merwin Dam. Merwin Dam is in my congressional district. It is located on the Lewis River which is the border between Clark and Cowlitz Counties. The Clark and Cowlitz County PUD's which serve electricity to the two counties joined together to seek the new license for Merwin Dam. The dam is currently licensed to the Pacific Power & Light Co. which serves no customers in Clark or Cowlitz Counties.

An evidentiary hearing on the competing applications was held before an FERC administrative law judge who found the Clark-Cowlitz application equally well adapted to PP&L's and awarded the license to Clark-Cowlitz on the basis of the municipal preference. Following that, FERC reversed itself and the 11th circuit's decision upholding municipal preference on relicensing. Clark-Cowlitz appealed the decision to the D.C. circuit which made absolutely clear the existence of the municipal preference and that there has never been a credible argument to the contrary. The Court stated:

In keeping with this [legislative] history, both the earliest Commission and the courts in the 1920's when first called upon to hear cases relating to the Act, interpreted the municipal preference as applicable across the board without reference to the identity of the incumbent licensee.

And that—

The legislative history removes any shadow of doubt as to what Congress wanted to happen when relicensing time arrived. The municipal preference applies to all relicensing including those involving an incumbent licensee.

The Court made clear that—

[t]he representatives of the private utilities also repeatedly indicated that they understood the bill to mandate municipal preference in all relicensing proceedings.

Nevertheless private utilities have been spending their rate-payers' money arguing the contrary for at least 7 years. In the meantime they continue to hold on to and benefit under their existing licenses. These private utilities have told Congress that municipalities were never intended to have a preference on relicensing and now we find out how very wrong and misleading they have been. We must therefore examine very critically their claims of adverse rate impacts on their customers which the municipalities deny. Municipalities have argued to deaf ears that rate impacts, if any; on private utility customers will be minimal. They argue further that all consumers, of public and private utilities alike, will benefit from competition for these projects. We cannot let ourselves be rushed into a hasty and premature judgment on the basis of the private utility claims.

Similarly we must keep in mind that what we are dealing with here is not a vested property right in existing licensees but rather a right to the use of the Nation's water resources. On this point the Court's opinion unequivocally—

That preventing private corporations from acquiring a permanent hold on water power resources was perhaps the single most important goal of statute's drafters. The desire to prevent private power from acquiring permanent rights over the nation's waterways was, for example, the reason why a system of definite term licenses was adopted.

The Federal Power Act said the Court represents a "compromise between the public interest in maintaining control of water power and the private interest in ensuring a reasonable return on investment." The chief draftsman of legislation which became the Federal Power Act, Mr. O.C. Merrill, who was also the Commission's first Executive Secretary, called "the chief purpose" of the Federal Power Act to "provide conditions under which capital can be secured [to develop hydropower] while at the same time fully to protect the paramount interest of the public in its last great national resource." The Court, citing legislative history, made clear that a bargain was struck between the investor-owned utilities and the Federal Government:

To reassure private investors, Congress authorized long-term licenses (up to 50 years) and provided that if the federal government or any other private entity took over after the expiration of a license, the original licensee would be compensated in an amount equal to its net investment plus severance damages. The evidence is clear that at that time both Congress and the private utility industry considered these two provisions adequate to safeguard the legitimate interests of private power

Yet now the private utilities seek to avoid the deal they struck. The same private utilities, like the Alabama Power Co. and the Pacific Gas & Electric Co., which sought to lock up the Nation's water resources in perpetuity in 1920 are at it again. The provisions of the Federal Power Act make sense today as they did in 1920. The economic strength of the private utilities has become increasingly concentrated—from approximately 4,000 private utilities in 1920 to around 200 today. The act is not an anachronism.

I suggest to you that we must view in a very circumspect manner their arguments and claims of entitlement. To that end, I believe that we can benefit from a careful reading of the Court's opinion in the Merwin case.

HYPOCRISY AND GRAMM-RUDMAN

HON. ROBERT K. DORNAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. DORNAN of California. Mr. Speaker, despite their pronouncements to the contrary, the liberals in the House are not serious about getting spending under control. This should be obvious to anyone who has followed the debate of the Balanced Budget and Emergency Deficit Reduction Act, otherwise known as Gramm-Rudman.

Gramm-Rudman, in its original form, requires Congress to reduce the deficit by $36 billion in each of the next 6 years until the budget is balanced in 1991. If Congress fails to produce a budget that achieves the $36 billion in mandated budget cuts, Gramm-Rudman requires the President to begin sequestering, or canceling, funds for all Federal programs, equally, until the mandated savings are achieved. Social Security, interest on the debt, and long-term defense commitments would be exempt from the sequestering process.

This "sequestering" provision has been the target of most of the more acrimonious liberal rhetoric. Liberal editorialists and welfare-state enthusiasts have consistently attacked Gramm-Rudman as an underhanded attempt by conservatives to balance the budget on the backs of the elderly and poor. For instance, Gramm-Rudman has been called a tradegdy and a travesty, budgetary flimflam, irresponsible, and Congress at its worst.

On the contrary, Gramm-Rudman is simply a logical response to a Congress and a budget process that have gotten completely out of control. Consider the following:

The Congress did not pass a budget resolution this year until 2½ months after the statutory May 15 deadline and just minutes before the Congressmen were due to adjourn for a 1-month summer vacation.

The budget resolution purportedly achieves savings of some $55 billion for fiscal year 1986. But in reality, this figure is overstated by some $28 billion because of budgetary gimmickry.

The fiscal year—which began October 1—is now over a month old and, to date, only 1 of 13 appropriations bills has made it through House-Senate conference. When finally finished, 8 of these 13 bills will be over the President's original request.

The Congress has had to pass a continuing resolution this year to keep the Government operating because it could not get its work done on time. This is the 25th such resolution passed since 1977.

Now what could be more "irresponsible" than that?

The solons making the most noise about Gramm-Rudman are the ones most responsible for our deficit. Liberal big spenders, whose very existence in Congress is due to the special interests, are in an absolute pother over the prospect that some special interest programs will be slashed or possi-

bly terminated. It follows that these pols will be trying every trick in the book, including scare tactics, to kill Gramm-Rudman.

Bur scare tactics won't fool the American people who are tired of runaway government spending and want to put a stop to it.

The liberals keep insisting that under Gramm-Rudman social programs for the poor and elderly would be substantially cut because of the sequestering provision. This argument is not true and assumes that Congress will fail to do its job—which should be enough to get some constituents wondering about the competency of their representatives.

Gramm-Rudman would not become effective unless Congress failed to act in reducing the deficit to the mandated level or unless economic circumstances changed. Thus, the President and Congress are free to develop any program of spending cuts that they deem approprate. With Gramm-Rudman hanging over its head, Congress would have a powerful incentive to produce a reaonable budget to avoid the sequestering of funds. But even if Congress cannot do its job and a sequester becomes necessary, entitlement programs will not be reduced below existing payments.

Gramm-Rudman merely holds Congress' feet to the fire and forces it to make good on its countless promises to reduce Government spending.

Sensing that they are now on the losing end of the issue, the big spenders in the House, led by Speaker "TIP" O'NEILL, mounted a counteroffensive and just recently passed a budget balancing measure of their own. This is a little bit like W.C. Fields coming out in favor of prohibition.

The democractic alternative, unlike Gramm-Rudman, contains a long list of programs exempt from sequesters which reads like a who's who of social welfare programs. What the plan does, however, is target the defense budget for deeper cuts and paves the way for a new round of tax increases.

But despite their rhetoric, their motives are obvious. They want to stop the whole deficit reduction movement dead in its tracks.

Indeed, in a vote taken last Friday, November 1, over half of the Democrats voting in the House—131–116—voted not to consider either Gramm-Rudman or the Democratic alternative at all. They just wished the whole issue would go away.

If it were not so transparent, the liberal's new found fiscal restraint would be truly touching. But alas, their plan is merely the same old product, tax increases and a slashed defense budget, in a new package. It therefore does not deserve serious consideration and I was heartened to see the Senate refuse to even consider the measure.

By attaching Gramm-Rudman to an important piece of legislation—the debt ceiling—conservatives have forced the big spenders to deal with a problem they would otherwise have avoided. The American people are sick and tired of seeing their hard-earned tax dollars squandered on special interest and corporate welfare programs so that liberal fat cats can be reelected term after term by the appreciative recipients of the liberal's largesse.

One final note, it has certainly not been lost on myself or on my colleagues that since Gramm-Rudman was first proposed the bond market has staged an impressive rally, reaching a 6-year high. This has led to a surge in stock prices with the Dow Jones Industrial average breaking 1400. These markets are the best indicators of future economic activity and to see them do so well in the wake of Gramm-Rudman is convincing evidence that we are on the right track.

Passing Gramm-Rudman in its original form is the least we can do for the forgotten American—the taxpayer.

THE ADMINISTRATION'S POOR RECORD ON PROTECTING OUR MARITIME INDUSTRY

HON. THOMAS J. MANTON

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. MANTON. Mr. Speaker, I rise to bring to the attention of the House a matter which clearly illustrates the failure of this administration to understand the importance of a strong American-flag merchant marine to the military and economic security of our Nation. I am referring to the plight of Rainbow Navigation, a small American-flag shipping company which is the ongoing victim of unfair and questionable action by this administration.

Since May, 1984 Rainbow has operated one U.S.-flag general cargo vessel between Norfolk, VA, and Keflavik, Iceland. It is the only American carrier transporting military cargo in this trade pursuant to the Cargo Preference Act of 1904. This act provides that all defense cargoes must be transported by privately owned American ships.

For some 20 years prior to the commencement of Rainbow's operation, this American trade was entirely controlled by the Icelandic shipping lines and their foreign vessels. There was no American-flag participation in this trade, and none of our defense cargoes were being transported on ships manned by U.S. citizen crews loyal to the principles and objective of the United States. It was for precisely this reason—to provide a much-needed measure of control over the transport of American defense cargoes—that Rainbow chartered a vessel from the Maritime Administration and commenced operations.

It is natural to expect the foreign shipping lines who lost their monoply and their advocates in Iceland to protest the entry of Rainbow into this trade. What was not expected by Rainbow, or anyone else concerned about the maritime capability of our country, is that our State Department and our Defense Department would become the most vocal supporters of the foreign shipping lines and the greatest threats to the continued operation of Rainbow's American-flag, American-crewed ship.

Mr. Speaker, it is inconceivable to me that our Government would so easily allow itself to be pressured and intimidated by the Icelandic shipping lines and the Icelandic Government. It is sheer folly to allow foreign interests to dictate to us how we must transport the supplies, equipment and property of our Defense Department.

This situation went so far as to result in an administration's determination that the rates charged by Rainbow Navigation were excessive, even though these rates were identical to those being charged by the foreign lines. The Department of Navy tried to use this unfounded determination as an excuse to avoid the requirements of the Cargo Preference Act and to allow the Icelandic carriers to regain their monoply.

Fortunately, last month, the U.S. District Court for the District of Columbia granted Rainbow Navigation a partial summary judgment against the U.S. Government. The court found that the Government's determination "is based in substantial part upon impermissible factors and is otherwise without factual support."

Mr. Speaker, the court in its opinion correctly stated that the Cargo Preference Act "is first and only a statute designed to protect and nurture the American maritime industry. It was enacted out of concern that the United States might be dependent upon foreign shippers to carry military supplies during wartime if the United States lacked a strong national merchant marine."

Although the law and its intent are clear, the administration persists in its efforts to drive Rainbow Navigation from this trade. Despite the clear statement from the court, the administration has filed notice of appeal and is attempting to overturn the court's decision, which upholds the Cargo Preference Act and preserves the right of this American-flag shipping company to participate in the carriage of American defense cargoes. At the same time, the administration is diverting more and more military moving between Iceland and the United States from water transportation to military aircraft. This, Mr. Speaker, is but another attempt on the part of our administration to make it economically impossible for Rainbow Navigation to continue to operate its ship.

I strongly urge the administration to end its efforts against Rainbow Navigation. Instead of trying to take cargo away from American ships, our Government should by its words and actions encourage the growth of this and other new maritime ventures which wish to ply the world's oceans with vessels flying our flag and crewed with our citizens.

INTELLIGENCE

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. HAMILTON. Mr. Speaker, I would like to insert my Washington Report for Wednesday, November 6, 1985, into the CONGRESSIONAL RECORD:

THE SUMMIT

Americans are alternately hopeful, fearful, confused, anxious or bored as the world and the media prepared for the Reagan-Gorbachev Summit in Geneva on November 19-20, 1985. Both the U.S. and the Soviet leadership are engaged in a sophisticated public relations battle as they prepare for the Geneva meeting. Mikhail Gorbachev's interview in *Time* magazine, the presentation of the Soviets' proposed 50 percent cut in strategic arms, his visit to Paris, and his separate proposals to the French and British on nuclear weapons in Europe are evidence of bold efforts to sway western public opinion. The U.S. similarly has tried to shape public opinion. It insists that the U.S. Strategic Defense Initiative (SDI) is a research program permitted by the Anti-Ballistic Missile (ABM) treaty, that the Soviets have their own SDI program, and that the Soviet proposal for a 50 percent cut in strategic weapons, while a beginning, heavily favors the Soviets when the fine print is examined.

Each side is seeking to use the summit for its own purposes. The Soviets want to undermine allied and public support for the SDI. The U.S. wants to portray its own proposals as reasonable and show that it is dedicated to improved relations. At the same time, to avoid public disappointment afterward it is playing down the prospects for results.

What can we expect from the summit? The U.S. has said its agenda for the summit is arms control, regional issues, bilateral issues and human rights. My impression is that major agreements are not likely.

On arms control, the most important result would be if the U.S. and the Soviet Union achieved some agreement in principle on a trade-off between deep cuts in strategic nuclear arms and limits on SDI. This outcome is unlikely. In the President's view, SDI is a research project vital to U.S. interests, and limits on research are unverifiable in any case. Unless and until the Soviet arms control proposal is clarified and made more attractive, those voices in the U.S. interested trading SDI for deep cuts will face an uphill struggle and will lack the support of public opinion to press their case successfully. An impasse on such an arms control trade-off is likely at the summit. Flexibility will probably have to await further probing in Geneva and tough decisions by both leaders. The Administration itself is deeply divided on the next step in these negotiations.

On regional issues, Reagan and Gorbachev will use the summit to air their differences on Afghanistan, Cambodia, southern Africa, the Middle East and Central America. This will be a continuation of low-level U.S.-Soviet discussions earlier this year. Such an exchange of views is important so that we understand each other's regional interests, policies and intentions, and thus reduce the risks of miscalculation. However, there is unlikely to be progress in narrowing the wide difference between the two in any major regional dispute. The U.S. and Soviet struggle for influence in the Third World will continue for the foreseeable future. No summit or agreements on a "code of conduct" can change this.

Bilateral relations are an area where some progress might occur. The two sides are close to agreement on the renewal of official cultural exchanges, which would include academic exchanges, travelling exhibitions, and theater and dance group tours. Under this agreement, the U.S. is seeking an exchange of television programming, including an annual exchange of addresses by the heads of government. To date, the Soviets have resisted this, and we have resisted Soviet efforts to extract a pledge to prevent defections. These differences can be resolved, according to U.S. negotiators. In addition, the recent conclusion of an agreement on aviation safety in the northern Pacific is an important step which can open the way to the resumption of negotiations on Aeroflot's U.S. landing rights, and progress in discussions on an exchange of consulates in New York and Kiev. Agreements on these issues by the time of the summit are possible, and would serve both Reagan's and Gorbackev's interest in having some tangible signs of the summit's success.

The U.S. will surely raise the subject of human rights, but if the past is any guide, Gorbachev will listen with a deaf ear or trump up charges of U.S. violations. The Soviet Union has some appreciation of the depth of feeling about human rights in U.S. public opinion, and a positive Soviet gesture on the emigration of Soviet Jewry or on some of the well-known human rights cases would make a large impact here. However, Gorbachev will not make any gesture that looks like a concession under U.S. pressure, particularly at a summit the whole world will be watching.

The summit will have been another missed opportunity if its only achievement is the signature of modest bilateral agreements. Reagan's real opportunity at the summit is not to reach an arms control agreement—positions are simply too far apart and the negotiations are not far enough along at this time—but to help create a political climate in which arms control can go forward. Energizing bureaucracies and giving momentum to the arms control process may be the best achievable results. At the summit itself, we should expect Reagan and Gorbachev to signal that arms control is at the top of their agendas. This signal should include a reaffirmation of SALT II and the ABM treaty, and a commitment to resolve difficult compliance questions, such as the Soviet construction of a large new radar site at Krasnoyarsk and the relationship of SDI to the ABM treaty.

Finally, an important outcome of this summit would be an agreement to regularize, and thereby demystify, summitry. It has been far too long between such meetings. Meetings between U.S. and Soviet high officials should be routine and frequent, thereby enabling our leaders to know each other better, tackle differences and avoid the tendency of such meetings to become media events.

NATIONAL LEAGUE OF CITIES ENDORSES H.R. 1616, THE LABOR-MANAGEMENT NOTIFICATION AND CONSULTATION ACT OF 1985

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FORD of Michigan. Mr. Speaker, I would like to bring to my colleagues' attention a letter I received from the National League of Cities in support of H.R. 1616, the Labor-Management Notification and Consultation Act of 1985. The letter makes several points about H.R. 1616 that deserve special emphasis.

First, the problems of worker dislocation and plant closings are national problems of enormous proportions, which affect every region of the country.

Second, the measures proposed in H.R. 1616 are modest and reasonable, will not burden responsible employers, and have been examined in great detail for more than a decade. House consideration of H.R. 1616 should not be delayed.

Third, at a time when Congress and the President have slashed spending for the Job Training Partership Act Title III Dislocated Worker Program by more than one-half, H.R. 1616 is more necessary than ever. Without creating a new bureaucracy or any new spending, H.R. 1616's notice and consultation provisions will provide important benefits for workers and communities facing the threat of plant closures and mass layoffs. H.R. 1616 has the potential of saving hundreds of million of dollars each year in unemployment compensation and other government transfer payments.

Mr. Speaker, I greatly appreciate the strong support of the National League of Cities for H.R. 1616. I trust that the endorsement of the mayors and other elected municipal officials who make up the Nationial League of Cities, and who find themselves on the front line in fighting to protect the stability of our communities, will be highly influential.

The letter follows:

NATIONAL LEAGUE OF CITIES,
Washington, DC, November 4, 1985.

Representative WILLIAM D. FORD,
Chairman, House Committee on Post Office and Civil Service, Cannon House Office Building, Washington, DC.

DEAR CHAIRMAN FORD: This letter comes in strong support of H.R. 1616, the Labor-Management Notification and Consultation Act of 1985. We ask that this letter and the attached National League of Cities Human Development Steering Committee resolution in support of H.R. 1616 be included in the Congressional Record.

H.R. 1616 represents a critically important first-step necessary to assist cities in dealing with the problems of worker dislocation caused by plant closings. The enormity of the plant closing problem today and its effect upon both the workers involved and the cities in which these industries are based demands the very type of action which this legislation initiates.

As you are certainly aware, the number of workers impacted by plant closings over the past six years has taken on frighteningly dramatic proportions.

Between 1979 and 1984, nearly 11.5 million American workers were displaced or "dislocated" from jobs primarily in manufacturing industries. For each of these jobs, an additional 1.4 to 2.0 jobs are lost in related industries in the general economy.

Additional findings indicate that closings were not isolated to one region of the country, but occured everywhere, with the states in the East North Central, South Atlantic, and Pacific regions hit the hardest. Of displaced adults who had worked at least three years at their jobs, the Labor Department found that one-fourth were unable to find a new job. Older persons, women, and minorities had the greatest difficulty gaining new jobs. Of those dislocated workers who found work, 45 percent earned less than at their old jobs.

Figures which you yourself have cited compiled by the Brookings Institution show that the nation as a whole replaced only nine manufacturing jobs for each ten lost in plant closings at large manufacturing firms between 1976 and 1982. As you have stated, these are indeed "truly alarming statistics about the wave of plant closings that has smashed through our communities in recent years."

National League of Cities National Municipal Policy is explicit in its support for the passage of legislation based upon certain notions of basic corporate responsibility such as those premised within H.R. 1616. As our policy states, "federal policy should support those firms that plan to remain responsible members of their localities, yet should create disincentives for those footloose industries that would move without concern for their communities or their employees."

As noted, this bill is an important first-step in attempting to address a very serious municipal problem. We agree that action on this bill after your attempts to pass similar legislation over the past ten years scarcely constitutes a "rush to judgment." We would hope that once this vital bill is enacted into law, further Congressional consideration could be given to the question of limiting any tax benefits which might accrue to a firm in connection with the closing of a plant as well as possible adjustment insurance requirements.

Municipalities across the country continue to face severe fiscal difficulties as their tax base erodes and public spending rises to pay for the social costs of economic dislocation which includes rapid increases in juvenile delinquency, crime, divorce, mental illness, and despair.

Coupled with this, the need for the passage of legislation such as this is all the more necessary in light of recent action taken by both the House and Senate to reduce Job Training Partnership Act Title III Disclocated Worker Assistance fiscal year 1986 funding.

We continue to believe that the United States must adopt a comprehensive national policy to deal with the impact of economic dislocation on workers and their communities. We recognize that economic change is inevitable in our dynamic economy, but the burden of that change must be distributed as equitably as is possible.

H.R. 1616 represents a start in efforts to solve this problem. We commend and appreciate your efforts and those of the many co-sponsors of this legislation and heartily endorse its passage by the House.

Sincerely,

ALAN BEALS,
Executive Director.

RESOLUTION—PLANT CLOSING LEGISLATION
(Submitted by Human Development Steering Committee)

Whereas, the U.S. economy has lost 11.5 million jobs in the manufacturing sector between 1979 and 1984 alone; and

Whereas, many of these job losses have resulted from plant closings and large-scale layoffs of which little or no advance notice was provided to workers and local government officials; and

Whereas, the consequences of abrupt closings and layoffs are often catastrophic for workers and their communities; and

Whereas, the best prospects for preventing or ameliorating problems brought about by economic dislocation are afforded through advance notice of closings or layoffs to workers and local officials; Now, therefore, be it

Resolved that the National League or Cities go on record in support of H.R. 1616 (Notification and Consultation Act of 1985), a bill which would require businesses to provide 90-day advance notice of permanent layoffs to workers, labor organizations and the Federal Mediation and Conciliation Service. Be it further

Resolved that the National League of Cities supports the other provisions of H.R. 1616 which call for labor-management consultations during the 90-day notice period and for the establishment of a National Commission on Plant Closings and Worker Dislocation.

RESOLUTION TO ESTABLISH NATIONAL BACK AWARENESS WEEK

HON. CLAUDE PEPPER

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. PEPPER. Mr. Speaker, I am pleased to introduce today a joint resolution of the Congress designating March 2 through March 8, 1986, as "National Back Awareness Week." Provided that this resolution meets with the approval of both bodies of the Congress and the President of the United States, it will call upon all Government agencies and the people of the Nation to observe this week with appropriate programs and activities.

At any given time, some 75 million Americans suffer with back pain. The elderly are particularly vulnerable to this incapacitating ailment.

According to the American Back Society, more than 400,000 people injure their backs on the job yearly, and the average back injury results in 97 lost work days; $14 billion is spent on the treatment and compensation of back injury each year, and 8 out of 10 Americans will experience back pain at some point in their lives.

Exercise, performed judiciously and as prescribed by a health professional, can have a beneficial effect. Proper posture can provide relief for back pain. Patients can be taught to avoid movements that can injure the back. Certain ways of managing stress can reduce strain on the back, and proper nutrition appears to bring relief in certain individuals.

I believe that National Back Awareness Week can be an important step toward bringing care of the back into the public consciousness. We need to mobilize those interested in back disorders, in order to educate the public and the health care community as to the seriousness of back problems. Orthopedic surgeons, neurosurgeons, physical therapists, radiologists, chiropractors, exercise physiologists, neurologists, nurses—these are but a few of the professions for whom care of the back is an important concern. By enacting National Back Awareness Week, we will be able to provide these persons and their patients—and all other interested persons—information relative to the treatment, prevention, and control of disorders associated with the back.

I would like to thank Dr. David Lehrman, a respected surgeon and constituent of mine from Miami Beach, FL, for bringing to my attention information on back problems. Dr. Lehrman has been especially active trying to educate Americans regarding back pain and how to relieve it.

Back pain has reached epidemic proportions and has become a major public health threat to the life and economy of our country. However, education and awareness can have a significant impact on the prevention and alleviation of back pain. I urge all of my colleagues to support this resolution to establish National Back Awareness Week.

The text of the resolution follows:

H.J. RES. 444

Joint Resolution to designate the week of Mach 3, 1986, to March 10, 1986, as National Back Awareness Week

Whereas 75,000,000 Americans are suffering with back pain;

Whereas more than 400,000 people injure their backs on the job yearly;

Whereas the average back injury results in 97 lost work days;

Whereas $14,000,000,000 is spent on the treatment and compensation of back injuries each year;

Whereas back pain has reached epidemic proportions, and has become a major public health threat to the quality of life and economy of our country; and

Whereas education and awareness make a significant impact on the prevention and alleviation of back pain; Now, therefore, be it

Resolved by the Senate and House of Representatives of the United States of America in Congress assembled, That the week of March 3, 1986, to March 10, 1986, is designated National Back Awareness Week. The President of the United States is authorized and requested to issue a proclamation calling upon the people of the United States to observe this week with appropriate programs and activities.

PEACE

HON. NEWT GINGRICH

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. GINGRICH. Mr. Speaker, yesterday, I circulated Senator PETE WILSON's principles for the Reagan-Gorbachev summit meeting. If accepted by the administration, we can be sure the security of the United States will not be compromised at Geneva.

I think one implication of these principles is that we should develop a better understanding of the Soviet Union and communism. For example, what do the Soviets mean when they refer to "star wars?"

Below is an article by our esteemed colleague, Congressman DON RITTER, entitled "Peace, Yes, But by Whose Definition?" DON explores the concept of the word "peace" and I think this column should be kept in mind as the United States prepares for the summit meeting later this month.

PEACE, YES, BUT BY WHOSE DEFINITION?

The setting was a sumptuous state-sponsored dinner at a 400-year-old church in Havana, Cuba, which had been converted into a restaurant. A man who was part of a group of U.S. "peace activists" opposed to administration policy in Central America rose and proposed a toast. "To peace," he said. "To peace with liberty," I added. He and the other with him continued to toast "to peace."

The debate in America and Europe today is not over war vs. peace. Nobody wants war and everyone wants peace. The crucial, yet unformed, debate is over the meaning of the word "peace."

If peace is taken as the absence of any large-scale war, nuclear or otherwise, then there are entirely different policy options than if a definition of "peace" also embodies the twin concepts of human freedom and human rights.

If real peace is inseparable from freedom and human rights, then the American people must come to grips with the historical record and current activities of our chief rival in the definition of peace, the U.S.S.R.

Coming to grips doesn't eliminate creative diplomacy and dialogue. We can and should negotiate with adversaries to reduce the dangers of direct conflict, but we should do so without any illusions about achieving a peace that embodies freedom and human rights, since that kind of peace doesn't exist for Soveit people at home, nor for Soviet charges abroad.

Lately, Soviet leaders won't even talk about this. In a bizarre incident on French TV recently, Party General Secretary Mikhail Gorbachev berated a journalist for just asking about "100,000" Soviet political prisoners. . . . Period, no answer. That came shortly after Mr. Gorbachev blandly stated that Jews have it better in the U.S.S.R. than anywhere else. Several days later, when Dan Rather again asked about political prisoners, Mr. Gorbachev curtly stated that the subject had already been covered by his response on French TV.

Closer to home, the American people are genuinely confused by peace activists who oppose U.S. government policy in Central America but are silent on the institutionalized violations of human rights by Sandinistas or Salvadoran terrorists. the latter evidently do not qualify as death squads. My discussions with peace activists in Nicaragua indicate they supported the violent overthrow of the Somoza government. Is this an objective witness for peace?

Peace activists urged an end to the Vietnam War which resulted in a tragedy at least as great as the war itself. Yet most were silent on a postwar holocaust in Cambodia and the death, misery, and enslavement in South Vietnam. To this day, they have not owned up to the fact that the end of the war did not bring peace.

The attempt to bring human rights to South Africa is important for peace activists of all stripes, but so is resistance to organized Soviet genocide in Afghanistan. Why is there no outcry from peace activists against a Soviet policy that is far more responsible for events in Afghanistan than is a U.S. policy for those in South Africa? Where are the symbolic arrests at the Soviet Embassy? Where is the worldwide movement for trade sanctions against the Soviet Union?

If the West eventually weakens and accepts nuclear first-strike dominance by the Soviets, that won't be peace.

If the West accepts the use of Soviet proxy troops (Cubans) to guard the Marxist palaces of Ethiopia and Angola and allows freedom fighters to wither away, that isn't peace.

Is an occupied Cambodia without resistance and a conquered South Vietnam "at peace?" To be more blunt, is Poland at peace?

With the Helsinki process crushed inside the U.S.S.R., are the people of the Soviet Union at peace? Is a prisoner in a jail at peace?

While people active in the peace movement may be sincere in their quest, they simply ignore the reality of what they, themselves, would accept as living "in peace."

To have effective discussions about peace with the Soviets, Americans must decide for themselves what the word peace really means, and not just to our own leaders but to Soviet leaders, too. We all know the outcome of the last time the West rejoiced in having achieved "peace in our time."

If Americans want real peace for the world, which means peace with freedom and human rights, we need to ask Mr. Gorbachev in Geneva about the slaughter of innocent Afghans. We need to ask about the Helsinki monitors who, like Ukrainian poet Vasyl Stus, have died in labor camps. We need to ask why Anatoly Scharansky is imprisoned. And we need to ask why one Nobel Peace Prize winner, Andrei Sakharov, can't communicate with his own family while another, Bishop Desmond Tutu, can hold internationally televised press conferences.

Peace demands first a more agreed-upon definition of the word. For starters, how about our peace activists consulting with the unofficial peace movement in the U.S.S.R.?

Last time I heard, it was in exile, dead, or simply out of business.

HOSTAGE CRISIS ENTERS 610TH DAY

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. O'BRIEN. Mr. Speaker, today marks the 610th day Americans have been held hostage in Lebanon.

A U.S. foreign service officer, William Buckley, was kidnaped in Beirut on March 16, 1984, 610 days ago today.

Father Lawrence Jenco, the head of Catholic Relief Services in Beirut, has been held hostage for 303 days.

Terry Anderson, the Associated Press bureau chief in Beirut, was taken hostage 234 days ago.

The director of the American University Hospital in Beirut, David Jacobsen, was kidnaped 162 days ago.

Thomas Sutherland, the dean of the American University Agriculture School, was taken hostage 149 days ago.

Today also marks the 337th day since the disappearance of Peter Kilburn, the American University librarian.

Mr. Speaker, the American hostage crisis continues. It will not be over until all the American hostages in Lebanon are returned safe and sound.

IMPORTANCE OF LIFESAVING PROGRAMS EMPHASIZED

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. DIOGUARDI. Mr. Speaker, on March 29 of this year, Charlene Serra found her 6-year-old brother choking on a lollipop in the basement of their home.

Only 2 weeks prior to this near tragedy, Charlene had completed the American Red Cross basic aid training course. The course had been offered to the members of Charlene's fifth-grade class at Our Lady Fatima School in Scarsdale, NY.

When Charlene found her brother blue-faced and choking, she remembered what Sister Janet Hanley had taught her in class and proceeded to administer the maneuver that would dislodge the lollipop. Because of his sister's brave and adept actions, Michael is alive today. On April 23, Charlene received a well-deserved citation from the American Red Cross for her heroism. She was the youngest ever to receive an ARC citation.

Mr. Speaker, I would like to make a plea to my colleagues to encourage more people to become involved in such lifesaving programs. This young girl's efforts to save her brother were successful, because someone had recognized a need for children to know what to do in an emergency. I hope that more people will appreciate the importance of these lifesaving programs. Just ask Michael Serra.

BROOKLYN SCHOOL BOARD 15: A STAND FOR DECENCY AND DIGNITY

HON. STEPHEN J. SOLARZ

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. SOLARZ. Mr. Speaker, I would like to pay tribute to the members of community school board 15 in Brooklyn for demonstrating their commitment and concern for human rights in South Africa by unanimously adopting a resolution opposing apartheid and urging the Board of Education of New York City to develop instruction on apartheid and to refrain from entering into contracts for goods or services with firms who trade or do business with South Africa.

Community school board 15 has, by this action, lent its voice to the growing chorus of citizenry throughout my district and around the Nation who are demanding more active efforts to end the oppression and injustice caused by the apartheid system in South Africa.

I am, therefore, pleased to share the text of their forthright resolution with my colleagues, many of whom have joined with me in outspoken opposition to the apartheid policies and practices of the Government of South Africa.

Resolution against the Apartheid Government in South Africa:

Whereas, the government of South Africa has systematically denied by force of law to a majority of its population the rights of citizenship and democracy, including the right to vote and the right to reside with their families, solely on the basis of their race, and has limited the freedom of other groups within its population solely on the basis of race, in a system known as apartheid; and

Whereas, many American corporations continue to do business in and with South Africa, thereby profiting from the restricted labor of victims of apartheid;

Be it resolved, That this Board will request the Board of Education of the City of New York that, as of November 1, 1985, they should sign contracts for goods and services only with firms which can affirmatively state that they do not trade with or do business in South Africa; and that copies of this resolution be sent to other Community School Boards of Education, the Chancellor, the Commissioner of Education of the State of New York, and local, state, and federal legislators, especially the President of the United States, so that they may be encouraged to consider taking similar action, and to his excellency, Bishop Desmond Tutu in South Africa, as a sign of solidarity, with the cause of obtaining full freedom and democracy for all South Africa.

Be it further resolved, That the policy of the Community School Board is for instruction on apartheid to be given in all schools of the District.

I would like to commend the members of community school board 15—Philip Scala, Beatrice A. DeSapio, Felix R. Vazquez, Norman Fruchter, P. Peggy Buffalano, Judy Hoffman, Philip Kaplan, and Christopher F. Sarlo—for the action they have taken to oppose the current practices and policies of the Government of South Africa.

JOHN DAVIS LODGE IN MEMORIAM

HON. DANTE B. FASCELL

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FASCELL. Mr. Speaker, a distinguished American, the Honorable John Davis Lodge, died last week while serving on the United States Delegation to the United Nations. He was 82 years old, and it is perhaps typical of his long, varied and eventful public career that he was still serving his country with great distinction when he was fatally stricken.

As Chairman of the Committee on Foreign Affairs, I would like the RECORD to show that Ambassador Lodge entered public life as a Member of this body and of our committee. During the 80th and 81st Congresses, he served on a total of five different subcommittees, and although that was before my time, I have always heard that his contribution to the committee's deliberations was one of inestimable value. This experience undoubtedly prepared him well for his subsequent career in Government and diplomacy.

Mr. Speaker, two of Ambassador Lodge's former colleagues on U.S. Delegation to the 40th anniversary U.N. General Assembly are the gentleman from Florida [Mr. MICA] and the gentleman from New York [Mr. SOLOMON]. They will provide more detailed statements for the RECORD in due course—summarizing the highlights of this remarkable American's remarkable career.

I will, therefore, merely conclude my remarks by extending my deepest sympathy, on behalf of the present and former membership of the Foreign Affairs committee, to his beloved wife, Francesca, and to all members of Ambassador Lodge's family.

CATHOLIC TEACHERS OF NEW YORK HONOR TWO AS EDUCATORS OF THE YEAR

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today on behalf of the Catholic Teachers Association of the New York City Board of Education, which is honoring Rev. Msgr. Vincent D. Breen, STL, and Mrs. Alice M. Riddell, director of Community School District 25's Drug Prevention Program, as its Educators of the Year for the school year 1985–86.

Mrs. Riddell and Monsignor Breen will be honored at an awards dinner on November 8, 1985, in Queens Village, NY by the Catholic Teachers Association, an organization for Catholic teachers in the New York City public school system.

Mr. Speaker, both Monsignor Breen and Mrs. Riddell are very deserving of this honor and of the attention of this House. Monsignor Breen, who was ordained in Rome in 1962, has been extraordinarily active on behalf of public and parochial education. He has been superintendent of education for the diocese of Brooklyn since 1978, and has been a leader in that diocese since 1966. Among the organizations to which he has contributed his energy are Borough President Golden's Advisory Council, the New York State Policy Committee, and the Conference of Public and Non-Public School Officials of the University of New York. He has served as chairman of the Committee of Non-Public School Officials, and as president of the chief administrators of Catholic Education.

Mrs. Alice Riddell organized Project 25, District 25's school-based alcohol and substance abuse prevention and intervention program, and has headed it since its inception in 1971. Project 25 uses individual counseling and group discussion to teach decisionmaking and coping skills and strong self-esteem to help our children say "no" to drugs and alcohol. The program has been tremendously successful; countless young people of Queens have been able to steer away from the pitfall of substance abuse because of Alice Riddell's vision of a drug-free society.

Mr. Speaker, education is not an easy task in our society. Our youngsters are constantly bombarded with conflicting messages, and teachers in our society must reach beyond these messages to provide an atmosphere of education in our classrooms. Alice Riddell and Vincent Breen are two people who have had the commitment to provide a strong moral ground for the youngsters of the diocese of Brooklyn and School District 25 in Queens.

Mr. Speaker, I call on all of my colleagues in the U.S. House of Representatives to join me now in congratulating Rev. Msgr. Vincent D. Breen and Mrs. Alice Riddell on being chosen Educators of the Year, and in congratulating the Catholic Teachers Association of New York City for supporting and encouraging this kind of dedication for students of all religions in New York.

KILDEE HONORS 1984–85 FLINT NORTHWESTERN HIGH SCHOOL WRESTLING TEAM

HON. DALE E. KILDEE

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. KILDEE. Mr. Speaker, I would like to bring to the attention of my colleagues and the Nation the tremendous accomplishments of the 1984–85 Flint Northwestern High School Wrestling Team. The squad ranked fifth in the class A Michigan State finals and was the first and only all-black

contingent ever to finish in the top 10 in the State's history.

As a result of their great efforts and unprecedented determination, many individual honors were bestowed upon the team. Coach Joseph H. Johnson was named Regional Coach of the Year by the Michigan Wrestling Association, and six of the team's seven seniors took advantage of opportunities to further their education through wrestling at major universities. Tremelle Richards is now attending Ferris State College in Michigan; Oscar Murdock and Vincent Lang are students at Coppin State College in Baltimore, MD; Fred Montgomery is at Howard University in Washington, DC, and Chauncy Wynn and Darry Greer are attending Morgan State University in Baltimore. The seventh senior, Dan Magby, is serving his country as a Marine and competes as a member of the All-Marine Corps Wrestling Team.

Mr. Speaker, this wrestling team has been a great inspiration to the youth of the Flint community. They have demonstrated with courage, drive, perseverance, and skill, even the loftiest of goals can be realized. I am pleased to honor this team for they have greatly distinguished themselves through athletic excellence.

A TRIBUTE TO MEL ROSE

HON. JOE KOLTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. KOLTER. Mr. Speaker, today I rise to pay tribute to an individual who has tirelessly served the community of New Brighton in Beaver County in Pennsylvania's Fourth District. Mr. Mel Rose was recently honored by the N.A.A.C.P. as the "Community Man of the Year."

Mr. Rose has been actively involved in community service and local government for the last 30 years. He began in the late 1950's by sponsoring and managing the New Brighton Braves Baseball Team and cofounding and instructing the Young Mens Social Athletic Club. Rose continued to be involved in founding and sponsoring athletic teams throughout the 1960's and 1970's. These contributions are greatly appreciated by the residents of Beaver County, where sports are so important.

Mr. Rose went on to become heavily involved in local politics and local union organizations. He has served as board member of the New Brighton Planning Commission from 1976–81. Rose also served as recording secretary for the local 2035 of the Railroad Workers.

Currently, Mr. Rose is still very active in a variety of activities. He is a brother in both the King Solomon Lodge No. 78 and the Brighton Pioneer Lodge No. 219. He has been a member of the New Brighton Boro Council for the past 6 years, serving as vice president for 2 of those years. Rose is also chairman of the New Brighton Democratic Party.

In addition to being involved in these and other political positions, Mel Rose still finds time to be board member for the New Brighton Boosters and the New Brighton Recreation Board, as well as a host of other organizations.

The long-time efforts and accomplishments of Mel Rose have benefited the community of New Brighton, and I am sure that the residents appreciate his contribution. I think it appropriate at this time, Mr. Speaker, that this body salute the achievements of such a fine and dedicated individual of the Fourth District of Pennsylvania.

CHRISTMAS CANTREE

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. LAGOMARSINO. Mr. Speaker, "Christmas Cantree" is an annual communitywide program sponsored by the Santa Maria Board of Realtors. This program is designed to help less fortunate individuals in the Santa Maria community through the outreach services of the local Salvation Army.

Last year, thousands of Santa Marians contributed over 12,000 cans—more than 6 tons of emergency food—to feed the hungry. This year, in order to meet an even greater need, the Christmas Cantree Committee is aiming to collect 12 tons of food. Members of the Santa Maria Board of Realtors throughout the month of December will be going into the neighborhoods collecting canned food, which will be stacked on the Community Cantree.

I am pleased to note that the California Association of Realtors has adopted the Cantree idea. Through its communication committee, it will be recommending this project to all 180 real estate boards located throughout the State of California.

I would like to extend the congratulations of the House of Representatives to the distinguished members of the Christmas Cantree Committee on their successful effort to help the less fortunate members of their community.

SALUTE TO WEST LAFAYETTE, INDIANA

HON. JOHN T. MYERS

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. MYERS of Indiana. Mr. Speaker, today I am proud to announce to my colleagues that the city of West Lafayette, IN, has been honored nationally by the Department of Energy for the innovative conservation and renewable energy achievements of its Department of Parks and Recreation.

Just last year, West Lafayette's public swimming facility had a leaky bathhouse roof and a faulty heating system. This year, after creative planning and financing, it is now solar-powered with 44 copper solar collectors on the bathhouse roof. This keeps the pool water warm and the shower water hot during the pool's summer season and provides hot water to an adjacent school during the school year.

What is so commendable is that West Lafayette's actions solved its local pool problem by using a renewable energy source and without raising taxes or creating a complicated bond issue. West Lafayette financed the model and innovative project with third party investors and told them that if they built and ran the solar heating facility, the city would buy the energy. The investors under law are eligible now for specific tax credits and depreciation for building a solar facility so they are guaranteed a profit as well.

I am proud of the efforts of West Lafayette's Mayor Sonya Margerum and its Parks and Recreation Department Superintendent, Roger Beaver, for their foresight in not only utilizing a solar source of energy for their project but also by financing it privately and at no extra cost to the community. I, also, appreciate the Department of Energy's actions to recognize the city by honoring it with a National Award for Energy Innovation. Congratulations, West Lafayette!

PUBLIC SCHOOL 18 IN QUEENS VILLAGE, NY, CELEBRATES 30TH ANNIVERSARY

HON. GARY L. ACKERMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. ACKERMAN. Mr. Speaker, I rise today on behalf of Public School 18 in Queens County, NY, which is celebrating its 30th anniversary of innovative, quality education on November 6, 1985.

Mr. Speaker, P.S. 18 has a wide variety of strong educational activities, including a particularly innovative choral group, an exciting young playwrights program, and an excellent computer program. But listing the strengths of the school's curriculum does not do P.S. 18 justice.

P.S. 18 first opened its doors in September 1955, in the heart of the baby boom. By the late 1970's, however, declining enrollment put the future of the school in serious jeopardy. Only the farsighted dedication of the local community, led by former principal Ernest Caponnetti, kept the school doors open. Now, P.S. 18 has increased its enrollment to 240 youngsters ranging from kindergarten to 6th grade—kids that would have had to be bused far from home if the school had closed.

Mr. Speaker, P.S. 18 is once again a leader in Queens education. I would like to publicly acknowledge the current principal, Dr. Eileen Kramer, for her commitment to the continued growth and excellence that she has worked for. I would also like to pay tribute to all of the administrators, teachers, and students of P.S. 18.

I call now on all of my colleagues in the U.S. House of Representatives to join me in congratulating P.S. 18 of Queens Village on the happy occasion of its 30th anniversary,

and in wishing all the men, women, and children of P.S. 18 good luck as they prepare for its next 30 years.

TRIBUTE TO TWO OUTSTANDING LOS ANGELES LEADERS

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. WAXMAN. Mr. Speaker, I would like to ask you and our distinguished colleagues to join me in saluting two outstanding Los Angeles leaders, Rabbi Jacob and Marjorie Pressman.

On December 9, 1985, a gala banquet will be held to mark Rabbi Jacob Pressman's retirement as spiritual leader of Temple Beth Am. Rabbi Pressman has held the pulpit of this distinguished congregation for 35 years. During that period, Rabbi Pressman built Temple Beth Am into one of the largest and most dynamic conservative temples in the United States.

Rabbi Pressman has been a leader in numerous projects. Yet, his work has never lacked focus. His first concern has always been with our youth. He established and actively guided the Herzl schools and the Beth Am Academy. He served not only the Jewish community but the larger community as well by establishing the Beverly Hills Maple Center—a guidance center designed to help young people and their families.

Rabbi Pressman's influence has been felt far beyond the Los Angeles and Beverly Hills communities. In Israel, Rabbi Jacob Pressman is revered as one of Israel's staunchest, most articulate, and most effective friends in the entire American rabbinate. Under Rabbi Pressman's dynamic leadership, Temple Beth Am has risen to the No. 1 position nationally in support of State of Israel bonds.

Despite the enormous burdens of guiding a huge congregation, Rabbi Pressman has served in leadership positions in virtually every rabbinical organization—from the local Board of Rabbis of Southern California to the national rabbinical assembly.

Marjorie Pressman has amazingly carried the considerable burdens of "first lady" of Temple Beth Am and also virgorously and successfully pursued many interests of her own.

This remarkable woman used her talents as an administrator and an organizer to bring together a multifaceted event at Temple Beth Am called Israel Expo West. Attendance topped 50,000.

The same talents Mrs. Pressman brought to her temple and Jewish community activities, she has now brought to the world of commerce and enterprise. Mrs. Pressman may be the only rebbitzen (rabbi's wife) to serve as a vice president and director of a savings and loan. Mrs. Pressman holds those positions with Unity Savings and Loan Association which she helped found.

Such diverse organizations as the American Youth Symphony, the Women's League for Conservative Judiasm, Hadassah, and the Beverly Hills Theatre Guild have benefited from the energy and talent of this remarkable woman.

The Pressman's are the proud parents of two sons and a daughter, and three grandchildren.

Mr. Speaker, I ask that you and our colleagues join me in expressing praise and gratitude to Rabbi and Mrs. Pressman on the occassion of his retirement. I further ask that the leadership and Members of the House of Representatives join me in wishing these extraordinary Americans good health and many years of continued contributions to our community and our Nation.

CONGRESSIONAL RETIREMENT REFORM ACT OF 1985

HON. HOWARD COBLE

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. COBLE. Mr. Speaker, today I am introducing legislation which will correct a longstanding affront to the taxpayers of this country: the congressional pension system. My bill, the "Congressional Retirement Reform Act of 1985," will not only save the taxpayers money, it will restore some credibility to this legislative body as we set about the urgent task of reducing the deficits by cutting Federal spending.

When congressional pensions started in 1946, the actuary who prepared the plan testified: "[We] went overboard in our recommendations here giving a preferential treatment to you folks relative to retirement, departing from all actuarial principles." The Grace Commission has revealed that the current system offers between two and four times the benefits afforded participants in private sector plans. Presently, some former Members earn more in retirement than they did as active Members. Moreover, the current pension formula is so much better than that of all other Federal employees that former Members draw about one-third larger annual pensions than civil servants with the same pay and time in service—even Cabinet Secretaries. These and other data revealed by leading pension expert and legal scholar Roy Schotland highlight the need to act and act now—before temporary regulations governing the system expire at the end of the year.

Mr. Speaker, my bill is simple: it will treat Members no differently than other civil servants for retirement purposes. More specifically, the law which governs contributions, periods of service, and methods of computing annuities for other participants in the Civil Service Retirement System will also apply to Members. However, anyone with 10 or more years of Member service will be grandfathered in under the old system. Additionally, those Members with at least 5 years of service will receive "credit" for those years (not to exceed 10), but thereafter will fall under the new system. Anyone with fewer than 5 years of Member service as of January 3, 1986 may be reimbursed for any contributions above the amount authorized by my bill, but would otherwise entirely be covered by the new system.

While Members and other Federal employees have had to pay Social Security tax since 1983, this revision and others due to occur at the end of 1985 (when the temporary legislation expires), do not adequately address the inequity of treating Members differently from other Federal employees. When Members may leave Congress after 6 or 8 years of service with years of money-earning capacity ahead of them, change is in order. Although I have pledged not to participate in any publicly funded pension plan as a legislator, I am not advocating that congressional pensions be eliminated altogether. Rather, I only ask that this legislative body be treated neither better nor worse than other Federal workers. This is the least that we can do to help reduce Federal spending, the true cause of our current economic woes.

HAPPY BIRTHDAY—JANE McKASKLE MURPHY

HON. SALA BURTON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mrs. BURTON of California. Mr. Speaker, I want to pay tribute today to a distinguished San Franciscan, Mrs. Jane McKaskle Murphy. Monday, November 11 will be her 75th birthday.

Jane McKaskle Murphy has been one of San Francisco's outstanding citizens for nearly four decades. For 21 years, she was area director of the California Department of Social Welfare, supervising the 16 northern California welfare departments. She served on San Francisco's Police Commission for two 4-year terms, including a term as vice-president of the commission.

Mrs. Murphy is a past president of the Democratic Women's Forum, currently serving on its executive board. She is a member of the League of Women Voters, the Pacific Heights Neighborhood Council, and the Union Square Business and Professional Women's Club. Her many awards include the Woman of Achievement Award for the Business and Professional Womens' Club, Certificate of Appreciation from Casa de los Madras, first recipient of the Dorothy Langston Human Rights Award and Lifetime Achievement Award from the Legal Assistance to the Elderly. Her achievements have been recognized in "Who's Who in American Women" and "Who's Who in the West."

She has been an active Democrat, including working with the Host Committee for the Democratic Convention last year. I have known Jane for many years and I am delighted, in this way, to wish her happy birthday!

EVELYN R. BURNS: A TRIBUTE

HON. BARBARA A. MIKULSKI

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Ms. MIKULSKI. Mr. Speaker, I would like to include for the RECORD the following statement by Wilber J. Cohen, former Secretary of Health, Education and Welfare, on Tuesday, October 29, 1985, at Columbia University in New York City:

There were giants on the Earth in those anxious and uncertain days 50 years ago. They stood tall and could see far in the distance, beyond the horizon. They saw far beyond 50 years, into another century.

They realized that they should not build merely for the present but that they must also build for the longer run future.

They were dreamers and visionaries but with a plan; they were social architects who could envision the idea in their mind's eye and transform it into an institutional creation. Some could defend the idea with simplicity; others saw it from a standpoint of complexity.

Some could spell out the specifications of a detailed plan. Another could draft them into the artistry of legislative language. Others could develop an ingenious line of reasoning which would sustain the constitutionality of the idea. Others could explain the idea and the plan to congressional committees.

They were innovative men and women: Labor economists, social reformers, representatives of labor, business, and the public. They were creative thinkers and writers, teachers and researchers.

But they were also giants.

Much had gone before which had come to be significant influences in the brains of men and women as widely separated as New York; California; Madison, WI; Chicago; and Princeton, NJ.

There was Bismark in the 1880's, and John Graham Brooks in 1893;

Prof. Henry Seager of Columbia University in 1907 and 1910.

There was John R. Commons in Madison in 1906, 1910, and in 1919 joined by Arthur J. Altmeyer:

I.M. Rubinow in 1913 and 1934.

Abraham Epstein in 1922, 1928, and 1933.

Prof. Barbara Nachtrieb Armstrong from Berkeley in 1932. And Murray Latimer and Prof. Paul Douglas from the University of Chicage the same year.

There were many others who pioneered in the intellectual development of the ideas, concepts and programs: John B. Andrews, Harold Groves, Elizabeth Brandeis, Paul Rauschenbush, Edwin E. Witte, Merrill G. Murray.

Eve Burns followed in this great tradition of pioneers, intellectuals, and giants who carried into effect the contribution of all intellectuals that—"Ideas are weapons."

Eveline Burns contributed her ideas to the Committee on Economic Security in 1934.

She prepared a special report on "The Integrated Treatment of Unemployment Insurance, Cash Relief, and Emergency Work" and another on "Significant Phases of Foreign Experience."

Then she entered into a period of writing and teaching on Social Security which had far-reaching influences.

Her major books and reports cover the entire formative period of Social Security: 1936, 1942, 1949, 1956, 1968, and 1973. Her students reached out along the length and breadth of the Nation.

Today we convene to celebrate the stimulating contributions of one of the great teachers of Social Security in academia who transformed the dull, dry, statutory verbiage into understandable concepts, who put meaning into the fragmentation, and synthesis into the compartmentalization of the categories. She wrote and talked with the enthusiasm of the social reformer; she could analyze and criticize but with the objectivity of a friend; she could welcome the student to the cathedral of learning and also stimulate the learner into a life of social activism or social research.

I had the good fortune to have known Eve Burns for 51 years under many different conditions. I grew up under her intellectual stimulation and needling. I admired her and enjoyed her as a colleague and friend.

She became a little band of brothers and sisters warding off the blindness of the econometricians, the simplistic advocates of the marketplace and the bottom line, and perfectionists who were never satisfied with incremental improvements.

We had studied the rigors of the dismal science. They could even add the trust funds to the Federal administrative budget to find the total without the necessity of creating the Federal unified budget. Yet, they never forgot that compassion could be included in the budget.

They never forgot the weak while others were exalting only the strong and the affluent.

But still they drew a wide circle in which to include others.

In this 50th anniversary year of Social Security, we celebrate those who have gone before us and those who are still here.

Eve Burns was one of the 50 or so staff persons who in the fall of 1934 participated in the 4 months of research and development which led to the far-reaching Social Security Act of 1935. Of course the role of Frances Perkins, Harry Hopkins, Henry Morgenthau, Arthur J. Altmeyer, Edwin E. Witte, Paul Rauschenbush, Murray Latimer, Tom Eliot, Katherine Lenroot, Grace Abbott, and many others, were preeminent. There were others whose words and voices had helped pave the way: Prof. Henry Seager of Columbia University, I.M. Ribinow, Abraham Epstein, Prof. John R. Commons and Prof. Barbara Nachtrieb Armstrong.

Until last year there were nine of us left from that 1934 group. Today there are only six left.

On behalf of us sturdy six can I ask someone here that on the passing of the last of us to convene a full-scale seminar on the future of Social Security so we may look down or up from wherever we are in recognition of what individuals like Eve Burns tried to build for social justice.

When we think of Eveline Burns, there is love in our hearts, affection on our lips, admiration in our mind, a tear in our eyes, a throb in our throats.

For those of you who are younger and active, not only should you remember Eve, but follow the path she showed us.

She would say:

Do not be of little faith.

Think big when big steps are possible.

Think small when small steps are feasible.

But like Eve, reach with one hand for the stars; keep the other to fend off those who do not treasure the great heritage and hard work of those who have gone before us.

The memory of Eveline Burns should carry us forward another 50 years.

THE CLINIC

HON. VIC FAZIO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. FAZIO. Mr. Speaker, yesterday I had the special pleasure of meeting Ms. Tyne Daly, the gifted and articulate actress who plays Detective Mary Beth Lacey in the Emmy Award winning CBS television series "Cagney and Lacy." Ms. Daly was in Washington, DC, to attend a reception in her honor hosted by me, the National Abortion Rights Action League and Representatives LES AUCOIN, BARBARA BOXER, DON EDWARDS, BILL GREEN, NANCY JOHNSON, LYNN MARTIN, JAN MEYERS, CLAUDINE SCHNEIDER, PAT SCHROEDER, LOUIS STOKES, and HENRY WAXMAN.

During the reception we previewed scenes from an upcoming episode of the television series, airing on the evening of November 11, that will have particular significance for those of us who believe strongly in reproductive rights and freedom of choice.

The episode, entitled "The Clinic," deals with a fictional but unfortunately all-too-realistic bombing of a family planning clinic in New York City. As the plot progresses, Detective Lacy reveals her own very personal concern for a woman's right to choose by disclosing that she herself had an abortion when she was 19. Lacy's partner, Detective Christine Cagney (Sharon Gless), initially has mixed feelings about abortion but eventually decides that she too favors reproductive choice.

The violence being committee against family planning clinics in this country is deplorable and indefensible. "The Clinic" deals realistically with these apalling acts while providing a balanced presentation of the broader issue of reproductive rights by including both prochoice and antichoice characters. It clearly shows that this controversial and very misunderstood issue can be dealt with responsibly and sensitively by the popular media; but moreover, the episode underscores the importance of our

role in defending a woman's basic right to reproductive freedom.

I commend the show's production company, Orion Television as well as Executive Producer Barney Rosenzweig, Tyne Daly and Sharon Gless for their excellent work on behalf of every woman's right to choose.

WILLIAM JAMES TSAKANIKAS: UNSUNG AMERICAN HERO

HON. JOSEPH J. DioGUARDI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. DioGUARDI. Mr. Speaker, I rise today to honor an American hero. Not many people in our country have heard of William James Tsakanikas and his name is not recorded in many history books, but those who knew him and those who fought alongside of him in World War II know that this brave and courageous individual helped to prevent a potentially disastrous course of history.

The Battle of the Bulge is a famous and well-documented moment in World War II, but a far greater battle occurred before this one; a battle that made this victory possible. On the morning of December 16, 1944, Adolf Hitler's Nazi Army began its Ardennes offensive. The only thing that stood between the forces of the Third Reich and the unsuspecting 99th Division of Allied forces were 18 American soldiers of the intelligence and reconnaissance platoon entrenched in the Belgian village of Lanzerath. Had the German Army been able to proceed toward the Bulge uncontested, that battle would have been lost and Hitler's Germany would have gained new life in the war.

Miraculously, these 18 American soldiers were able to hold off the advancing German troops for 18 hours. During the course of fighting, only 2 Americans were killed; the Germans suffered 509 casualties. Finally, the German troops overran the badly wounded and bloodied Americans and captured them. However, the American stand bought the 99th Division enough time to prepare for the German offensive and led to ultimate victory.

The youngest member of that valiant group was 19-year-old William James Tsakanikas. Severely wounded, he was saved by a German doctor. In spite of intense pain due to 36 operations performed on his face, which was severely damaged in fighting, he lived a life dedicated to improving his community and the lives of others until his death in 1977.

In 1979, the President signed into law a bill that would posthumously award William the Congressional Medal of Honor, the highest military award that can be received. Unfortunately, this medal was never awarded by President Carter and I am now attempting to have President Reagan issue this long-overdue honor. At this time, Mr. Speaker, I would like to include in the RECORD an article written by columnist Jack Anderson, which appeared in the March 25, 1979, issue of Parade magazine and eloquently tells the story of William James Tsakanikas.

Finally, Mr. Speaker, this Sunday, the town of Port Chester, where William lived for several years, will have a dedication ceremony for the William James Tsakanikas Memorial Gateway Park. I am honored to be named as the main speaker at this event, but more importantly, this dedication will mean that the memory of a truly great American will live on.

WHY PRIVATE TSAKANIKAS SHOULD GET THE MEDAL OF HONOR

(By Jack Anderson)

The Lanzerath Incident should have gone down as one of the most valorous and pivotal actions of World War II. It was omitted from the histories because no one returned to tell the story until the war was over. Yet for an eternity of 18 hours, 18 stubborn Americans halted an entire column of German panzers, paratroopers and SS troops.

The GI's were ordered to hold a slope overlooking a strategic crossroads at a Belgian village called Lanzerath. Bullets whined around their heads, and artillery shells ravaged the landscape. Their hillside was a hell of gunfire and shrapnel. Yet they fought back, hugging the sides of their foxholes, until their guns burned up or ran out of ammunition.

When the Germans at last overrun the position, they pulled the grimy GI's bodily from their foxholes. Their lieutenant, Lyle J. Bouck Jr., described the end tersely. "We never surrendered," he said. "We were captured." On the American side, miraculously, only two died in the firefight, although many were shot up badly. The German toll: an incredible 509 casualties.

Those few forgotten heroes disrupted the timetable and blunted the surprise of a Nazi strike through the snow-sheeted Ardennes. Had they not held the crossroads for that long December day, the Germans would have caught the untested 99th Division off balance and might have won the Battle of the Bulge.

Writing from retirement, Maj. Gen. Walter Lauer, the division commander, has declared: "Had we failed, there would have been no Bastogne, and the entire complexion of the war could have changed most drastically." He gave all the credit to his men. "Their heroism has been unsurpassed in history. I know it. Many of our soldiers know it. The German soldiers who met them know it. God knows it."

This epic stand of 18 men against overwhelming German might has gone unrecognized by the Pentagon for 35 years. Not a medal has ever been awarded the enlisted men for their extraordinary bravery. Only the lieutenant received an unsought Silver Star that came to him without explanation through the mail in 1965—21 years late.

Every member of the forgotten platoon deserves a medal. But if one soldier symbolizes the heroism of that last-ditch stand, it would be PFC William James Tsakanikas, known to the others simply as "Sak." At 19, he was the youngest of them—an aggressive, gung-ho GI who volunteered for all the tough missions. It took a German burp gun, fired point-blank into his face, to put him out of action.

Somehow the young soldier was saved by a German military doctor. Sak recuperated in a German prison hospital, made a break for freedom but was recaptured. Near the war's end, he was liberated by advancing U.S. forces. He returned home to a life of pain, dropped his tongue-twisting last name and died as Will James on June 27, 1977. He now lies in Arlington National Cemetery, an unremembered hero—but not to the 17 men who fought by his side or to the wife who witnessed the agony of 36 operations to reconstruct his face.

"Whatever he did in the war," she told us, "I knew my husband as a hero all of his life. He didn't talk about what happened that day until a little while before he died. But for me and my sons, he showed his heroism to us every day that he lived."

Seeking to make belated amends, Rep. Richard Ottinger (D., N.Y.) will introduce a bill this week authorizing President Carter to award Will James a posthumous Medal of Honor "for valorous acts performed at the risk of his life above and beyond the call of duty." The proposal has already encountered resistance from the Army bureaucrats behind their red-tape entanglements. They have noted stiffly that "the public law covering retroactive awards prohibits us from considering a recommendation for an award unless there is conclusive evidence that a formal recommendation for the award was entered into official military channels within two years of the act or service. . . ."

It would have been a bit difficult to meet the two-year deadline. Regimental headquarters believed the platoon had been wiped out, and those who knew the story had been dispersed to German prison camps. When they last saw James, he seemed unlikely to recover.

We tracked down Lyle J. Bouck in St. Louis, where he is now a chiropractor. He helped us get the story from other members of his World War II unit. From their accounts, we have pulled together the details of that day of courage.

It began before dawn on the bitter-cold morning of Dec. 16, 1944. The platoon had been handpicked to serve as the eyes and ears of the regiment. Almost all of them had college and athletic backgrounds. But their role had never been combat; they were an intelligence and reconnaissance platoon.

But they had been ordered to fill a gap in the front line. They settled into foxholes overlooking Lanzerath's eight or nine frame houses and a stretch of road leading to the strategic fork. One prong led like an arrow to the Meuse and the rear of their division. Beyond was the vital supply port of Antwerp on which Gen. Dwight D. Eisenhower and his armies depended.

At precisely 4:40 on the fateful morning the men of the I&R platoon were jarred by the thunder and crash of a massive artillery barrage. The ground literally shook under their feet.

They had no way of knowing that they had ringside seats to the opening of Adolf Hitler's Ardennes offensive. He sought to encircle the American divisions in the Bulge and seize Antwerp. Nor did they know that they stood in the path of one of the spearheads of the Nazi assault.

During the next 18 hours, they would foul up the mission of a special panzer SS unit under Lt. Col. Joachim Peiper, who, furious over having his offensive stalled, later ordered the execution of 71 American prisoners at Malmedy.

The entrenched platoon survived the two-hour artillery baptism without casualties. It was followed by an ominous silence in the fields and woods around them. Minutes later, Bouck and James in the forward foxhole were appalled to see their closest sup-

port, a tank destroyer company about a mile away, beat a retreat toward the rear. Jeered James: "They might at least wave goodbye as they leave."

From the regiment came anxious instructions to scout out the situation east of Lanzerath. Four men—Bouck, James, Sgt. Bill Slape and Pvt. John Cregar—crept in a ditch toward the village and sprinted the last lap to the second floor of a house that had served as an observation post. They surprised a civilian talking German over a telephone; he had the look of a fifth columnist caught in the act.

James whipped out his bayonet and forced the stranger to drop the telephone. But Bouck had no stomach for a civilian execution. They let the suspected spy go, and he scurried down the stairs. From their vantage point, the four Americans saw rolling toward them a German column in full battle array. Leaving the other two to keep watch, Bouck and James raced back to their foxholes. The lieutenant radioed headquarters the news that a massive attack was on the way. His superiors were skeptical. "Damn it," exploded Bouck "don't tell me what I can see! We've got 20-20 vision here! There's a whole column of Krauts coming up that road!"

His demand for artillery fire on the road into Lazerath went unheeded. Meanwhile he received an urgent call from the two men in the observation post; they reported the Germans were already occupying the floor beneath them. Three men—Cpl. Aubrey McGehee, PFC Jordan "Pop" Robinson and Pvt. Jim Silvola—were sent to aid the trapped pair. But Slape and Cregar managed to sneak unnoticed through a rear, second story window. In racing to safety across the icy road, Slape became the first casualty of the battle. He slipped and broke two ribs.

All too soon, the Germans appeared below, marching steadily on each side of the road, their weapons slung over their shoulders. Bouck ordered his men to hold their fire until the first command vehicle appeared. But at the last minute, a small girl ran out of a house and pointed to their location.

The Nazi commander, reacting instantly to the alarm, shouted a command, and the advancing Germans dove for cover. The advantage of an ambush was lost, but the Americans were so well hidden on the snow covered slope that the Germans were unable to pinpoint their location.

From the forward position, James fired bursts from his grease gun. Slape manned the mounted machine gun on the jeep with deadly effect. From other foxholes, platoon members such as Risto Milosevich, Lou Kalil and Bill Dustman laid down lethal automatic rifle fire.

Separated from the outfit, Robinson, McGehee and Silvola took shelter behind a pile of cut timber and opened fire from another direction. The attacking Germans fell back, their ranks deciminated, leaving their dead and wounded on the battlefield.

After a second repulse, a team of Germans approched waving a white flag. They sought a cease-fire so their medics could attend the wounded. Someone on the American side let go a defiant round of rile fire at the feet of the Germans. This angered Bouck, who agreed to the cease-fire.

The third German attack began in the early afternoon. Heavy small-arms fire knocked out Slape's machine gun on the jeep and drove him to cover. He sprinted to the foxhole occupied by Milosevich. "Just as I reached his position and before I could get into the hole with him," Slape recounted, "two Germans opened up on me from about 50 yards. I got one of them and my carbine jammed—it was so hot I could barely hold it—so I threw it at the other German and dived into the bunker. I got him with a rifle."

The firefight was ferocious. The three behind the woodpile ran out of ammunition and were captured trying to make their way back to the platoon. Some Americans were wounded but continued to fight, in Slape's words, "like tigers." Two newcomers, Pvt. Cliff Fanscher and an unidentified GI from another unit, were killed in the action.

The Germans again were driven off, but ammunition was running low. Bouck turned to James in their bunker. "My orders are to hold the hill at all costs," said the lieutenant. "But you take off with as many of the men that want to go," James shook his head fiercely. "Lieutenant," he said, "you stay, we all stay." They turned to meet the fourth attack, which they met furiously, according to Slape, "even up to eyeball-to-eyeball contact."

The end came for Bouck and James in a horrific lightning flash. A German burp gun was poked into the rifle slit of their makeshift bunker and fired directly in James's face. The blast tore out his eyeball and most of his right jaw.

Bleeding from a bullet wound in his leg, Bouck helped a German medic carry James down the slope past the German dead toward Lanzerath.

About 10 p.m., an incensed officer wearing the death insignia of the SS, strode into the village cafe where Bouck and James had been deposited. The officer was in a rage. He demanded to know why a "battalion" of Americans had cost him a day. He shouted that his troops had spent the time milling uselessly around when they should have been driving toward their objective.

The enraged Nazi was Lt. Col. Peiper. He never noticed that only a few feet away lay the 20-year-old lieutenant and the savagely wounded James who, with 16 other GI's, had stopped Peiper's elite battalion. (Peiper was to serve a six-year war crimes sentence for the Malmedy massacre, then to be assassinated by a group calling themselves the Avengers at a French villa in July 1976.)

After Peiper stormed out, Bouck succeeded in getting medical attention for James from a German doctor who praised the American's bravery. Then Bouck was led off, leaving James apparently dying behind. The lieutenant heard a black wooden country clock in the tavern chiming midnight and realized that he had reached his 21st birthday with only one gift—the red badge of courage.

This same clock now hangs in the living room of the modest Port Chester, N.Y., home where James and his wife, Lucille, raised their four sons. Her husband went back to Lanzerath a few years before his death and returned triumphantly with the clock.

The widow, sitting proud and erect, took up the story after Bouck's departure. James was moved to a prisoner depot, she said where other German doctors did their best under rudimentary war conditions to repair his face. En route, a Nazi soldier stole his shoes, remarking, "Amerikanischer, you won't need these anymore."

She told about James's escape, recapture and liberation. He returned home to a life of painful surgery. After one operation, he met an Army nurse, Lucille Cassell, a slim, brown-haired West Virginia girl. They were married in 1948 after his graduation from the University of Pennsylvania. Characteristically, he was on the track and wrestling teams. Then he enrolled in Cornell Law School and eventually took his family to Port Chester.

Will James is remembered in Port Chester as a model citizen who was active in community affairs, youth work, church activities and politics. He served for 16 months as Rye Town Republican chairman. But only a few knew he was in constant pain from his war wounds. In June 1977 he returned home from his 36th operation, still in agony. A few days later, he was found dead in his bedroom.

In his St. Louis office, Bouck reflected on the furious battle that helped stop the 1944 Nazi offensive. He endorsed Representative Ottinger's effort to get a Medal of Honor for James: "I'd like to see Will James get every possible honor he has coming to him. He spent a lifetime of mental torture and physical agony."

He had one more thing to say about the unheralded Lanzerath Incident: "I think every man who was there is entitled to a medal, red tape or no red tape."

CONGRESSIONAL TRIBUTE TO TEMPLE BETH EL

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. ANDERSON. Mr. Speaker, I rise to pay tribute to Temple Beth El of San Pedro, CA, on the occasion of its dedication on November 10, 1985, of a new school and administrative building and of the renovated sanctuary-social hall complex.

Temple Beth El has been an important and integral part of the San Pedro religious community for well over 60 years. The congregation was founded in the early 1920's by some 25 Jewish families. In 1938, the congregation officially formed Temple Beth El. That year, the congregation had 10 directors and the religious school had 20 students. The congregation later changed its name to San Pedro Jewish Community Center Association.

On March 18, 1956, the congregation moved its Torah, the scrolls of law, to its present location. At this time they also completed a social hall, which served as the sanctuary, classrooms, offices, and a kitchen. In 1959, the congregation became a Reform temple and changed its name to Temple Beth El and Center.

On September 10, 1966, Temple Beth El dedicated a new sanctuary. The congregation has continued with these facilities to this day. On November 10, 1985, however, their facilities will once again expand.

Temple Beth El has grown in its 63 years from a congregation of 25 families to a congregation of 380 families, and the school has grown from a student body of 20 to 200 students. In a short statement like this it is hard to summarize the contributions and accomplishments that Temple Beth El has made to the quality of life for all residents of the San Pedro area. I would

simply like to say that their contributions are greatly appreciated by all members of the San Pedro community.

My wife, Lee, joins me in congratulating Temple Beth El and all its members on the dedication of their new school and administrative facilities, and its renovated sanctuary-social hall complex, and in wishing the congregation and Temple Beth El "mazel tov" and all the best in the years ahead.

ST. VALENTINE'S DIAMOND JUBILEE

HON. ROBERT A. BORSKI

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. BORSKI. Mr. Speaker, I rise today to recognize the diamond jubilee of St. Valentine's Polish National Catholic Church in Philadelphia. On Sunday, November 10, the parish will celebrate its 75th anniversary.

On February 14, 1910, 400 Polish immigrants established St. Valentine's to meet both the spiritual and cultural needs of their community. At that time, the nearest Catholic Church was inaccessible, making the daily practice of their faith difficult. This small but determined group sought the satisfaction of their religious and cultural needs by organizing a community of believers that shared a similar Polish heritage.

Today, St. Valentine's continues to minister to the descendants of that Polish Catholic community. In its 75 years it has grown and flourished. The parish is now composed of more than 2,000 people from a variety of ethnic backgrounds. St. Valentine's stands as a monument to the cultural and religious freedoms upon which our Nation was built.

I ask my colleagues to join me as I recognize and salute St. Valentine's for preserving their cultural heritage while changing and growing with the needs of all their parishioners.

A RESOLUTION FOR NATIONAL WOMEN VETERANS WEEK

HON. MARY ROSE OAKAR

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Ms. OAKAR. Mr. Speaker, it is appropriate today that the House unanimously passed House Joint Resolution 36, a bill which will authorize the establishment of a memorial to honor the thousands of women who have served in the Armed Forces.

In addition, it is only fitting that the House will soon take up a resolution to honor "National Women Veterans Week." This resolution is of timely importance considering that American women have served in a variety of military occupations in the Armed Forces since the American Revolution. These women have performed a myriad of duties serving as soldiers, pilots, nurses, spys, and other important support services.

Mr. Speaker, today there are 1.2 million women veterans. In the United States alone, they account for more than 4 percent of all American veterans.

I compliment the sponsors and supporters of this legislation for finally recognizing that women are holding leadership positions and are becoming an integral part of the military decisionmaking process.

Mr. Speaker, I urge my colleagues to support this timely and important resolution in time for Veterans day, a day when all Americans thank our genuine heroes and heroines.

DIVESTMENT OF SOCIAL SECURITY TRUST FUNDS: ILLEGAL AND IMMORAL

HON. MARIO BIAGGI

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Wednesday, November 6, 1985

Mr. BIAGGI. Mr. Speaker, I want to be on record in this body as categorically and unequivocably opposed to any effort by the Treasury Department to divest the Social Security trust funds.

Last Friday, we learned that the Department—in order to finance the interest on the national debt—began to tap the Social Security trust funds. Not only was this act against the law—as outlined in the 1983 reform amendments to the act that Congress adopted—but it also flies directly in the face of the intent of that legislation.

That is why I support the so-called Democratic alterantive to the ill-begotten Gramm-Rudman-Hollings deficit reduction plan. This alternative, adopted by the House on Friday, would not only prevent this disvestment from continuing—but would also fully reimburse the trust fund for any and all dollars that have been removed from it by this—or any other act by the Treasury Department.

Two years ago—faced with the almost insurmountable problem of the Social Security trust fund going bankrupt—Congress asked seniors to sacrifice their benefits in order to secure the system for long-range fiscal solvency. Thanks to that bipartisan effort—the Social Security trust funds are now in the black. Surpluses in the fund, not including Medicare, are projected to reach $11.9 billion by the end of 1986 and are projected to jump to $55 billion by 1990.

It is also important to note that the Social Security trust funds are currently repaying the Medicare trust fund as a result of the interfund borrowing that was exercised in 1982 prior to the passage of the 1983 reform amendments. At best, this is the only authorized use of trust fund dollars, in addition to the interfund borrowing authority that is permitted when revenues fall below 20 percent.

The lame excuse that was given to Congress to justify this kamikaze raid was weak, at best. Even in the face of a suit filed in Federal district court last Friday, the Treasury Department defiantly forged ahead and began to siphon off assests—assests that belong in the pockets of the 25 million senior citizens now receiving retirement benefits.

This defiant and ill-conceived act was even more disturbing when one considers the architect of the plan—the Secretary of the Treasury—is also the chief actuarial trustee of the Social Security System. The same person who is responsible for the health and long-term fitness of the system—is the one who is authorizing the divestment of the fund.

At a minimum, the Secretary of the Treasury should be required to consult with Congress in the event that divestment of and of the trust funds are being considered. Congress, in appropriating money for the fund, also should have cofiduciary responsibility with Congress in the management of the trust funds. I plan to introduce legislation to address the common rights and responsibilities of Congress in this area in the very near future.

The 1983 reform amendments required improved investment of the Social Security trust fund dollars in order to secure its long-term security. However, with this act of divestment—we have once again tied Social Security benefits to the railroad track and used the excuse of the national debt—as the train coming down the track.

Mr. Speaker, as we honor 50 years of commitment to the Social Security Program—we cannot at this time—when we have preserved the program into the next decade and for the next generation of retirees—forget what Congress intended when it passed this historic act in 1935 in order to create a "partnership with tomorrow."

When we threaten the system today—we play havoc with those who will be depending on these benefits tomorrow.

Consider these facts:

By the year 2035, an estimated 80 million persons will be beneficiaries in any given month.

This is almost double the number of beneficiaries today.

Even more amazing—this is two-thirds as large as the entire U.S. population in 1935 when the program was first begun.

Again, by 2035, benefits are projected to be 25 times as large as they are today, or $5 trillion.

During the floor debate in the Senate on June 14, 1935 on the Social Security bill, the distinguished Senator from my own State of New York, Robert F. Wagner, characterized the bill as legislation that "embraces objectives that have driven their appeal to the conscience and intelligence of the entire Nation. We must take the old people who have been disinherited by our economic system and make them free men in fact as well as in name. We must not let misfortune twist the lives of our young. We must tear down the house of misery in which dwell the unemployed. We must remain aware that business stability and prosperity are the foundation of all our efforts. In all these things we are united, and

in this unity we shall move forward to an era of greater security and happiness."

Mr. Speaker, let us recall these themes today as we face a real and serious threat to the promise that we have made to present and future recipients of benefits. Our efforts today to halt this raid on the Social Security trust fund—must succeed—if we are to uphold the sacred pact between government and workers that was made by this body a half a century ago.

SENATE COMMITTEE MEETINGS

Title IV of Senate Resolution 4, agreed to by the Senate on February 4, 1977, calls for establishment of a system for a computerized schedule of all meetings and hearings of Senate committees, subcommittees, joint committees, and committees of conference. This title requires all such committees to notify the office of the Senate Daily Digest—designated by the Rules Committee—of the time, place, and purpose of the meetings, when scheduled, and any cancellations or changes in the meetings as they occur.

As an additional procedure along with the computerization of this information, the Office of the Senate Daily Digest will prepare this information for printing in the Extensions of Remarks section of the CONGRESSIONAL RECORD on Monday and Wednesday of each week.

Any changes in committee scheduling will be indicated by placement of an asterisk to the left of the name of the unit conducting such meetings.

Meetings scheduled for Thursday, November 7, 1985, may be found in the Daily Digest of today's RECORD.

MEETINGS SCHEDULED

NOVEMBER 8

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on a Department of Health and Human Services report on proposed reform of the Federal hospital insurance program (Medicare Part A) method of paying for capital costs.
SD-215

9:30 a.m.
Banking, Housing, and Urban Affairs
To hold hearings on the nomination of Robert L. Clarke, of Texas, to be Comptroller of the Currency, Department of the Treasury.
SD-538

Energy and Natural Resources
Natural Resources Development and Production Subcommittee
To hold hearings on S. 570, S. 372, S. 946, and S. 913, bills to improve the administration of the Federal coal leasing program, and other coal related issues.
SD-366

10:30 a.m.
Commerce, Science, and Transportation
To hold hearings on the nomination of Jennifer L. Dorn, of Maryland, to be Associate Deputy Secretary of Transportation.
SR-253

NOVEMBER 12

9:00 a.m.
Armed Services
Strategic and Theater Nuclear Forces Subcommittee
To hold closed hearings on Soviet strategic defense programs.
S-407, Capitol

9:30 a.m.
Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

Labor and Human Resources
To hold hearings on Reyes' Syndrome, a neurological disorder in children.
SD-430

Rules and Administration
To hold hearings on Senate Resolution 204, to authorize supplemental expenditures by the Select Committee on Indian Affairs, Senate Joint Resolution 214, to provide for the reappointment of Carlisle H. Humelsine as a citizen regent of the Board of Regents of the Smithsonian Institution, and Senate Joint Resolution 215, to provide for the reappointment of William G. Bowen, as a citizen regent of the Board of Regents of the Smithsonian Institution; and to consider administrative business.
SR-301

Special on Aging
To resume hearings to review the impact of Medicare's prospective payment system on the quality of care received by Medicare beneficiaries.
SD-628

10:00 a.m.
Judiciary
*Administrative Practice and Procedure Subcommittee
Courts Subcommittee
To resume joint hearings on farm bankruptcy.
SD-226

Labor and Human Resources
Employment and Productivity Subcommittee
To resume hearings on the impact of trade on employment and productivity.
SD-562

Select on Intelligence
Closed briefing on intelligence matters
SH-219

10:30 a.m.
Foreign Relations
To resume hearings on certain defense issues, focusing on nuclear strategy, ballistic missile defense, and arms control.
SD-419

1:30 p.m.
*Conferees
On H.R. 3424, appropriating funds for the Departments of Labor, Health and Human Services, and Education, and related agencies for fiscal year ending September 30, 1986.
H-140, Capitol

NOVEMBER 13

9:00 a.m.
Agriculture, Nutrition, and Forestry
Agricultural Research, Conservation, Forestry, and General Legislation Subcommittee
To hold hearings on S. 703, to designate the Clifty Wilderness in the Daniel Boone National Forest, KY, as part of the National Wilderness Preservation System.
SR-328A

9:30 a.m.
Commerce, Science, and Transportation
Science, Technology, and Space Subcommittee
To hold oversight hearings on LANDSAT commercialization.
SR-253

Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To hold hearings on nutrition and fitness in public health.
SD-430

Select on Intelligence
Closed briefing on intelligence matters
SH-219

10:00 a.m.
Environment and Public Works
Environmental Pollution Subcommittee
Business meeting, to mark up S. 725, to authorize funds for fiscal years 1986 through 1990 for programs of the Endangered Species Act, S. 893, to establish the Florida Panther National Wildlife Refuge in the State of Florida, S. 585, to establish the eastern shore of Virginia National Wildlife Refuge and National Fish and Wildlife Service Training Center at Cape Charles in Northampton County, VA, and to further consider provisions of S. 1354, to authorize funds for the Bon Secour National Wildlife Refuge, the Tensas River National Wildlife Refuge, the Bogue Chitto National Wildlife Refuge, and the Tinicum National Environmental Center (pending on Senate Calendar).
SD-406

Foreign Relations
Business meeting, to consider pending calendar business.
SD-419

Judiciary
Patents, Copyrights and Trademarks Subcommittee
To hold hearings on S. 1667, Electronics Communications Privacy Act of 1985.
SD-226

Veterans' Affairs
To hold oversight hearings on activities of the Small Business Administration's Office of Veterans Affairs.
SR-428A

Select on Indian Affairs
To hold hearings on S. 1452, to settle certain Indian land claims in Gay Head, MA.
SD-628

NOVEMBER 14

9:00 a.m.
Armed Services
To hold hearings on the organization and decisionmaking procedures of the Department of Defense and the Congress.
SD-106

Foreign Relations
European Affairs Subcommittee
To hold hearings on religious persecution behind the iron curtain.
SD-419

9:30 a.m.
Commerce, Science, and Transportation
Business meeting, to consider pending calendar business.
SR-253

Governmental Affairs
Permanent Subcommittee on Investigations
To resume hearings on espionage activities in the United States.
SD-342

Governmental Affairs
Intergovernmental Relations Subcommittee
To hold oversight hearings on regulatory activities of the Office of Management and Budget.
SD-562

Veterans' Affairs
To hold hearings on the effects of radiation.
SR-418

10:00 a.m.
Energy and Natural Resources
To hold oversight hearings on the President's July 8, 1985, National Defense Stockpile "modernization" proposal and its potential impact on the domestic mining industry.
SD-366

Labor and Human Resources
Education, Arts, and Humanities Subcommittee
Business meeting, to mark up proposed legislation authorizing funds for programs of the Higher Education Act.
SD-430

2:00 p.m.
Foreign Relations
To hold hearings on the nominations of Joseph Ghougassian, of California, to be Ambassador to the State of Qatar, and Donald J. Bouchard, of Maine, to be an Assistant Secretary of State.
SD-419

4:00 p.m.
Select on Intelligence
Closed briefing on the November 1985 United States-Soviet Summit in Geneva, Switzerland.
SH-219

NOVEMBER 15

10:00 a.m.
Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To resume oversight hearings on ground-water level and use and on ground-water quality and flow in the United States.
SD-406

NOVEMBER 18

9:15 a.m.
Finance
Health Subcommittee
To hold hearings on the Federal supplementary medical insurance program (Medicare Part B) payments for physician services, focusing on efforts by the Department of Health and Human Services and others to assess the current payment mechanism and develop reform options.
SD-215

2:00 p.m.
Environment and Public Works
Environmental Pollution Subcommittee
To hold hearings on S. 740, authorizing funds through fiscal year 1995 to promote the conservation of migratory waterfowl and to offset or prevent the serious loss of wetlands and other essential habitat.
SD-406

NOVEMBER 19

10:00 a.m.
Commerce, Science, and Transportation
Business, Trade, and Tourism Subcommittee
To hold hearings on the promotion of domestic tourism.
SR-253

Environment and Public Works
Transportation Subcommittee
To hold oversight hearings on the implementation of the disadvantaged business enterprise program (sec. 105(f)) of the Federal Aid Highway Program.
SD-406

Labor and Human Resources
Business meeting, to consider pending calendar business.
SD-430

Office of Technology Assessment
The Board, to meet to discuss pending business.
EF-100, Capitol

NOVEMBER 20

9:30 a.m.
Energy and Natural Resources
Business meeting, to consider pending calendar business.
SD-366

Labor and Human Resources
To resume hearings to examine certain barriers to health care.
SD-430

Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

10:00 a.m.
Governmental Affairs
Energy, Nuclear Proliferation and Government Processes Subcommittee
To hold hearings on the 1985 Conferences on the Treaty on the Non-Proliferation of Nuclear Weapons and on the International Atomic Energy Agency.
SD-342

NOVEMBER 21

9:30 a.m.
Commerce, Science, and Transportation
Aviation Subcommittee
To hold oversight hearings on aviation labor issues.
SR-253

Energy and Natural Resources
Energy Regulation and Conservation Subcommittee
To hold oversight hearings to review Federal Energy Regulatory Commission's Order 436, final rule and notice requesting supplemental comments on regulation of natural gas pipelines after partial wellhead decontrol (Docket No. RM85-1-000).
SD-366

4:00 p.m.
Select on Intelligence
Closed briefing on worldwide intelligence matters.
SH-219

4:30 p.m.
Select on Intelligence
Closed briefing on technology transfer and Soviet research and development.
SH-219

NOVEMBER 27

9:30 a.m.
Select on Intelligence
To hold closed hearings on intelligence matters.
SH-219

DECEMBER 3

9:30 a.m.
*Banking, Housing, and Urban Affairs
To resume hearings on S. 812, to authorize the President to restrict the export or transfer of money or other financial assets to countries subject to national security export controls.
SD-538

*Energy and Natural Resources
To hold hearings on Senate Joint Resolution 192, to authorize financial assistance for the Northern Mariana Islands, and S. 1441, to provide for a plan to govern the use and/or disposal of Federal lands by Guam.
SD-366

10:00 a.m.
Labor and Human Resources
Children, Family, Drugs, and Alcoholism Subcommittee
To hold hearings on the issues of childcare, focusing on education, job training and the labor market.
SD-430

DECEMBER 6

9:15 a.m.
Finance
Health Subcommittee
To hold hearings to review possible reforms in the Federal supplementary medical insurance program (Medicare Part B) payments for physicians' services.
SD-215

DECEMBER 10

10:00 a.m.
Energy and Natural Resources
Water and Power Subcommittee
To hold hearings on S. 1785, to amend the Garrison diversion project in North Dakota.
SD-366

Environment and Public Works
Toxic Substances and Environmental Oversight Subcommittee
To hold oversight hearings on environmental effects of global atmospheric warmings.
SD-406

CANCELLATIONS

NOVEMBER 7

10:00 a.m.
Judiciary
Security and Terrorism Subcommittee
To hold hearings on S. 1654, to provide for criminal forfeiture of proceeds derived from espionage activities and rewards for informants providing information leading to arrests in espionage cases.
SD-226

HOUSE OF REPRESENTATIVES—*Thursday, November 7, 1985*

The House met at 10 a.m.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

The eyes of the Lord are toward the righteous, and His ears toward their cry.—Psalm 34:15.

Visit us, O God, with Your blessing, lead us in the way of truth, and hear our prayer for justice and mercy. May we be honest with our motives and earnest in our supplications that You will bless our land with righteousness and peace. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. The Chair had intended to announce that there would be no 1-minute speeches prior to legislative business, but in view of the fact there are only two Members here, the Chair will recognize the gentleman from Pennsylvania [Mr. CLINGER] and the gentleman from Missouri [Mr. YOUNG].

DO AS I SAY

(Mr. CLINGER asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. CLINGER. Mr. Speaker, I would like to bring to the attention of my colleagues an important article in the latest issue of the New Republic, written by Jacob Weisberg. It is entitled "Do As I Say."

Mr. Weisberg's article reminds us of how we in Congress have imposed a double standard: While the rest of the Nation must comply with employment discrimination laws, Congress has exempted itself.

I commend our colleagues LYNN MARTIN and PAT SCHROEDER for drafting legislation which would end this unfair practice. I also commend our colleague LEON PANETTA for holding hearings on this issue last summer which, I might add, were the first hearings we've ever held on this subject.

Mr. Speaker, the mere notion that we—the Nation's lawmakers—can justify an exemption from the civil rights laws is outrageous at best. The idea that a Member can rationalize discrimination for whatever reasons is to make a mockery of civil rights. The arguments regarding constitutional separation of powers or the speech and debate clause, are flimsy and merely act as a shield against the hypocrisy taking place in the House and the other body.

I urge my colleagues to not only read this article, but to join us in passing reasonable legislation to cure this problem. The country is waiting and watching. Will we be the ones to set an example? Or will we retreat into the sanctity and safety of an exemption which thwarts the very concept of civil rights in America?

[From the New Republic, Nov. 18, 1985]

Do As I Say

(By Jacob Weisberg)

An employee at the Senate Placement Office who helps match job applicants with positions says she often receives requests from Senate offices for "no minorities." What's more, she honors them. Why? "Maybe there are people in the office that don't take to minorities. Maybe they've had a bad experience with a minority in the past. They're being honest, so why send them someone they're not going to hire?" She adds that she often encourages staffers who make such requests to interview minority applicants anyway. "I tell them that it could cause an embarrassment at home," she says, noting that the office often gets requests for "only minorities," too.

This kind of discrimination on the Hill is nothing new. In 1974 the *Fort Worth Star-Telegram* created a minor furor when it reported that the House placement office regularly removed stipulations like "white only" and "attractive, smart, young, and no Catholics . . ." from hiring orders sent by congressional offices. The House Clerk's office now says that its new computer can't input discriminatory data. But the computer apparently is more enlightened than some members of Congress. Practitioner par excellence of the do-as-I-say-not-as-I-do philosophy, Congress has made itself exempt from Title VII of the Civil Rights Act of 1964, which prohibits discrimination on the basis of race, sex, creed, and national origin.

Just as members of Congress can legally exclude or fire whomever they want, they are free to ignore the Fair Labor Standards Act, the Equal Pay Act, the Occupational Safety and Health Act, the Freedom of Information Act, the Privacy Act, and a torrent of other laws. These immunities have disturbed a few outspoken legislators for years, and periodically bills are introduced to bring Congress into compliance with its own laws. Rarely are such proposals enthusiastically received. This summer the House Subcommittee on Police and Personnel, chaired by Representative Leon Panetta, did hold hearings on the most recent anti-hypocrisy measures, the best of which is a proposal sponsored by Representative Lynn Martin of Illinois to protect congressional employees from discrimination by creating a panel of retired judges to hear complaints. But Martin admits that progress is slow. The bill was also referred to the Judiciary and the Government Operations committees, and it is unlikely to reach the floor for a vote this term. Panetta has encouraged Martin and Democratic Representative Pat Schroeder, who has proposed a similar bill, to work on a bipartisan resolution that might make it out of committee.

There are a few flimsy measures already in effect. In 1976, after the furor over Congressman Wayne Hayes's using his position to solicit sexual favors from his secretary Elizabeth Ray, Schroeder helped create a voluntary antidiscrimination hearing board called the Fair Employment Practices Committee. About 130 members have signed a nonbinding agreement (which has never received any support from the House leadership) not to discriminate in hiring. Only staffers who work for signers of the agreement have the privilege of complaining to the FEPC if they feel unfairly treated. Former chairperson Sarah Orrick says that the board seldom convenes, and that she doesn't remember it ever hearing an actual grievance. The reasons are obvious: those who sign the voluntary pledge tend to be those who don't discriminate, and the board has no real power to punish perpetrators or compensate victims.

In 1978, at the urging of John Glenn and others, who pointed out that less than one-third of one percent of the Senate's highest staff positions were held by blacks, and that women did only slightly better, the Senate passed a simple rule forbidding employment discrimination. But Glenn points out that the rule is useless since the Senate neglected to pass any enforcement mechanism. "There was a lot of talk about doing better in the future, and then everybody forgot about it again," he says.

Members of Congress have found several ways to justify their exemptions. Many cite the established need to hire staff members according to regional and political affiliation. When you point out that the Civil Rights Act doesn't prohibit political patronage, they resort to constitutional arguments. Foremost among these is the concept of separation of powers, which some representatives contend prohibits the executive branch from enforcing laws like the Civil Rights Act against the legislative branch. But of course separation of powers works both ways, a fact they overlook when they want the president to open his files under the Freedom of Information Act.

The second argument relies on the "speech and debate clause" of Article One of the Constitution, which protects members from being questioned in court about their legislative activities. Representative Ed Jones of Tennessee recently invoked this notion when he was sued by Anne W. Walker, former manager of the House Restaurant. As chairman of the House Administration Subcommittee on Services, which oversees the restaurant, Jones fired Walker, who claims he told her that a $45,000 salary

was "ridiculous for a woman." A federal court of appeals recently held in favor of Walker's right to sue, saying that selecting restaurant staff is not a legislative procedure, and is thus not covered by the speech and debate clause.

Senator Ernest Hollings (who hired the first black Senate committee chief of staff) offers a distinctly nonconstitutional argument. Legislators, he says, are responsible to their constituents alone. If a racist congressional district wants its representative not to hire any blacks, the representative has that right. Justice Burger agrees. In his dissenting opinion in the highly publicized Hill discrimination suit *Passman* v. *Davis*, he wrote: "A member of Congress has a right to expect that every person on his or her staff will give total loyalty to the political positions of the member, total confidentiality and total support. This may, on occasion, lead a member to employ a particular person on a racial, ethnic, religious or gender basis thought to be acceptable to the constituency represented. . . ." Congressional offices run more efficiently than other government agencies, where firing a subordinate can entail several years of filling out forms and fighting lawsuits. But for the rest of the country Congress has decided to sacrifice some efficiency to protect individual rights.

Members who argue for consistency, like Representative Andrew Jacobs of Indiana, are indignant at these rationales. "What is this, Mount Olympus?" he asks. "Separation of powers doesn't mean you can't send a congressman to prison for embezzlement. And speech and debate is what members plead when they get caught taking bribes." Jacobs cites a favorite example of what he calls Congress's antinomian behavior: when Congress amended federal campaign laws to prohibit the practice of converting leftover campaign contributions to personal funds upon retirement, it left those elected before 1980 the right to collect and even continue adding to their "closeout" accounts. Jacobs, who continually proposes terminating this novel application of the grandfather clause, refers to it as "saying it's a sin for everybody except those who say it's a sin."

Jacobs is perhaps the only member who favors ending Congress' exemptions across-the-board. Many spout platitudes about "becoming better employers," and "not demanding of others more than we ask of ourselves" on civil rights legislation, but whistle a different tune when asked about an exemption that might make a difference in their own offices. Take OSHA standards, for example, which require minimum space per employee in offices, and which sweatshop offices on the Hill routinely violate. "My god, that would shut the whole place down," exclaims Schroeder. And Glenn concedes, "Before we built the new Senate office building, we violated their standards everywhere." This is not to say that Glenn and Schroeder oppose the idea of OSHA standards on Capitol Hill. But they aren't about to sponsor troublesome bills to bring their own offices into compliance.

There is a practical reason for requiring members of Congress to abide by the strictures they have established for every other American employer. OSHA has saved lives and improved working standards for millions of Americans, but also forbids safe but crowded offices like the ones on the Hill. Civil service rules and the Civil Rights Act have made it hard to fire government workers capriciously, but also make it nearly impossible to terminate incompetents if they happen to be among the three-quarters of the population that merits special protection because of race, religion, age, or sexual preference. Because Congress doesn't feel the effects of these measures, it isn't much inclined to improve them. If our legislators were subjected to their own laws, which James Madison called an essential condition for the survival of democracy, they would become better lawmakers. The rest of the country might even regain a measure of respect for the bills Congress passes.

NATIONAL JAYCEES WEEK

(Mr. YOUNG of Missouri asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. YOUNG of Missouri. Mr. Speaker, today I am introducing a joint resolution to designate the week of January 19–25 as "National Jaycees Week."

Founded in 1920 in St. Louis, MO, the United States Jaycees—or the Junior Chamber of Commerce, as it was known then—have a long history of community involvement. Currently there are more than 268,000 Jaycees in 6,500 chapters throughout all 50 States.

The Jaycees welcome young men and women between the ages of 18 and 36 as members. These young people are involved in education, assisting the elderly, fundraising for the handicapped and disease research in addition to other programs and projects that address community needs and problems. Many of the Jaycees programs provide help and assistance that might not otherwise be possible.

Due to the fact that this commemorative week would begin on January 19, 1986, the House is under pressure to approve this resolution by the end of the year. The Senate version of "National Jaycees Week" was passed on November 4, 1985. Therefore, I urge my colleagues to cosponsor this important measure.

AUTHORIZING FUNDS FOR INVESTIGATIONS AND STUDIES BY STANDING AND SELECT COMMITTEES OF THE HOUSE

Mr. GAYDOS. Mr. Speaker, by direction of the Committee on House Administration I call up H. Con. Res. 203, authorizing printing of the brochure entitled "How Our Laws Are Made," and ask unanimous consent for its immediate consideration in the House.

The Clerk read the title of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

Mr. GINGRICH. Mr. Speaker, reserving the right to object, I reserve the right to object in order to ask the chairman of the Accounts Subcommittee to explain the nature of the resolution, and I yield to the gentleman from Pennsylvania for that purpose.

Mr. GAYDOS. Mr. Speaker, I thank my colleague for yielding.

Mr. Speaker, this resolution is the usual and customary resolution which is used to provide amounts from the contingent fund of the House for continuing expenses of investigations and studies by standing and select committees of the House during the period when the respective committees' primary expense resolutions are being considered by the Committee on House Administration and the House.

For the period beginning at noon on January 3, 1986 and ending at midnight on March 31, 1986, a committee will be entitled to spend 25 percent of the amount made available to it during the first session of the 99th Congress. This figure essentially freezes a committee's spending authorization at the 1985 level for the 3-month interim period.

The authority to incur expenses during this interim period under this resolution will expire as soon as the House agrees to the primary expense resolution covering the second session activities of the respective committees. Any expenses incurred under the authority of this resolution are deducted from the amounts made available to the committees under the primary expense resolution when adopted.

Mr. GINGRICH. Mr. Speaker, I withdraw my reservation of objection and urge adoption of the resolution.

The SPEAKER. Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 307

Resolved, That for continuance of necessary investigations and studies by the standing and select committees of the House, there shall be paid out of the contingent fund of the House such sums as may be necessary for the period beginning at noon on January 3, 1986, and ending at midnight on March 31, 1986. For the period specified in the preceding sentence, each such committee shall be entitled to one-fourth of the amount made available under expense resolutions for that committee for the first session of the Ninety-ninth Congress.

SEC. 2. The authority of a committee to incur expenses under this resolution shall expire upon agreement by the House to the primary expense resolution for that committee.

SEC. 3. Payments under this resolution shall be made on vouchers authorized by the committee involved, signed by the chairman of that committee, and approved by the Committee on House Administration.

SEC. 4. Amounts made available under this resolution shall be expended in accordance with regulations prescribed by the Committee on House Administration.

The resolution was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. GAYDOS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the resolution just agreed to.

The SPEAKER (Mr. MURTHA). Is there objection to the request of the gentleman from Pennsylvania?

There was no objection.

AUTHORIZING PRINTING OF BROCHURE ENTITLED "HOW OUR LAWS ARE MADE"

Mr. FOLEY. Mr. Speaker, by direction of the Committee on House Administration I call up H. Con. Res. 203, authorizing printing of the brochure entitled "How Our Laws Are Made," and ask unanimous consent for its immediate consideration in the House.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the concurrent resolution, as follows:

H. CON. RES. 203

Resolved by the House of Representatives (the Senate concurring), That the revised edition of the brochure entitled "How Our Laws Are Made" shall be printed as a House document, with a suitable paper cover in the style selected by the chairman of the Committee on the Judiciary of the House of Representatives and with a foreword by the Honorable Peter W. Rodino, Junior. In addition to the usual number, there shall be printed two hundred and forty-six thousand copies of the brochure for the use of the House of Representatives (of which twenty-five thousand shall be for the use of the Committee on the Judiciary) and there shall be printed fifty-two thousand copies of the brochure for the use of the Senate.

Mr. FOLEY. Mr. Speaker, this resolution authorizes the printing of the revised edition of the brochure entitled "How Our Laws Are Made," to be printed as a House document, with a suitable paper cover in the style selected by the chairman of the Committee on the Judiciary of the House of Representatives and with a foreword by the Honorable PETER W. RODINO, Jr.

The Government Printing Office estimates that the cost of this printing will be:

Usual number as a House document	$3,069.70
246,000 additional copies for the House	73,942.68
52,000 additional copies for the Senate	15,630.16
Total	92,642.54

This concurrent resolution represents a periodic and customary request that such a revised edition of the brochure be reprinted for the use of the House and the Senate.

The concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

AUTHORIZING PRINTING OF TRANSCRIPT OF PROCEEDINGS INCIDENT TO PRESENTATION OF A PORTRAIT OF THE HONORABLE JAMES J. HOWARD

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that the Committee on House Administration be discharged from further consideration of the resolution (H. Res. 228) authorizing printing of the transcript of proceedings of the Committee on Public Works and Transportation incident to presentation of a portrait of the Honorable JAMES J. HOWARD, and ask for its immediate consideration.

The Clerk read the title of the resolution.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

The Clerk read the resolution, as follows:

H. RES. 228

Resolved, That the transcript of proceedings of the Committee on Public Works and Transportation on June 26, 1984, incident to presentation of a portrait of the Honorable James J. Howard to the Committee, shall be printed as a House document with illustrations and suitable binding.

SEC. 2. In addition to the usual number, there shall be printed, for the use of the Committee on Public Works and Transportation, five hundred copies of such document, of which two hundred and fifty copies shall be casebound.

Mr. FOLEY. Mr. Speaker, this resolution authorizes the printing, as a House document with illustrations and suitable binding, the transcript of the proceedings in the Committee on Public Works and Transportation of June 26, 1984, incident to the presentation of a portrait of the Honorable JAMES J. HOWARD to the Committee on Public Works and Transportation.

The Government Printing Office estimates that the cost of this printing will be:

Usual number as a House document (1,500)	$2,700.89
250 additional paperback copies	124.12
250 additional casebound copies	977.67
Total	3,901.68

This resolution is a usual and customary request that such proceedings be appropriately memorialized.

The resolution was agreed to.

A motion to reconsider was laid on the table.

CONFERENCE REPORT ON H.R. 3036, TREASURY, POSTAL SERVICE AND GENERAL GOVERNMENT APPROPRIATIONS ACT, 1986

Mr. ROYBAL. Mr. Speaker, I call up the conference report on the bill (H.R. 3036) making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1986, and for other purposes.

The Clerk read the title of the bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of October 31, 1985.)

The SPEAKER pro tempore. The gentleman from California [Mr. ROYBAL] will be recognized for 30 minutes and the gentleman from New Mexico [Mr. SKEEN] will be recognized for 30 minutes.

The Chair now recognizes the gentleman from California [Mr. ROYBAL].

Mr. ROYBAL. Mr. Speaker, I yield myself such time as I may require.

Mr. Speaker, the conferees have reached agreement on the Treasury, Postal Service, and General Government appropriations bill for fiscal year 1986. This conference report provides $13.2 billion in recommended appropriations for fiscal year 1986. While this is an increase of $951 million over the President's budget, primarily due to the amount included for the Postal Service, it is $84 million under the House-passed bill. The amount recommended is also $323,625,000 below the allocation to this subcommittee under section 302 of the Congressional Budget Act.

Mr. Speaker, I want to point out that the amount recommended by the conferees for fiscal year 1986 is $215 million below the amount appropriated for discretionary items for fiscal year 1985. As Members all know, the committee has no control over mandatory items.

The conference report before you today is under the House-passed bill but I believe that funding for the various activities provided for in this bill are at levels that the House can fully support.

I am particularly pleased to inform the chairman of the Committee on Ways and Means and the chairman of the Committee on Government Operations that the House conferees were able to keep faith with those committees by deleting legislative provisions which were included in the Senate-passed bill. The chairman of the Ways and Means Committee opposed two amendments, one which would have prohibited the allowance of tax exemptions to any cult, organization, or

other group that has as a purpose the promoting of satanism or witchcraft with malicious intent. The other amendment had to do with the tariff treatment of mixtures containing ethyl alcohol.

The chairman of the Committee on Government Operations opposed an amendment on Federal employees relocation expenses. Even though these amendments had a great deal of popular support and even though many of the conferees favored these amendments I am pleased to tell you that none of them were agreed to by the conferees.

The conferees were of the opinion that these matters should be addressed by the appropriate legislative committees.

Now, let me highlight a few of the significant items in the conference report.

In the U.S. Customs Service, the conferees have recommended funds to retain 887 personnel recommended in the budget to be eliminated and added an additional 473 positions. The budget proposed a reduction in personnel of 887 below present onboard strength, including many Customs inspectors. The committee feels that in view of the severe drug problem in this country, it is not prudent to reduce the very agency that mans our borders and ports of entry. I might point out also that the Customs Service collects about $12.5 billion in revenue each year.

The committee believes that the high level of drug abuse and related crime in this country requires a strong law enforcement effort to stem the tide of illicit drugs coming into the United States. The proposed reduction would have also slowed down the processing of visitors to this country and of our own citizens returning from abroad. Further, this reduction would have also slowed down the processing of commercial goods being imported to the United States. More importantly, this reduction would have had a severe adverse impact on the Government's ability to interdict the flow of illegal drugs and other contraband into the country, as well as on its ability to prevent the illegal exportation of high-technology items to unfriendly countries. The conferees, therefore, recommend against the reduction in personnel and have added 473 more positions to strengthen the Customs Service.

The House Appropriations Committee has been very concerned for several years about the very low budget requests for the Internal Revenue Service. Year after year the Congress has restored funds to the IRS and provided additional funding in an attempt to strengthen the tax processing and tax collection activities of the Service. The committee believes that the current problems that the IRS is experiencing in processing tax returns throughout the country is related to a lack of funding. Therefore, the conferees recommend adding $76 million above the budget request for the Internal Revenue Service. The committee believes strongly that increased staffing levels for the Service are essential in order to achieve more responsive and effective administration of the tax system. As a result of this increase in resources, the Internal Revenue Service will be able to collect about $450 million in additional revenue by examining more tax returns and accelerate the collection of $250 million in revenue by closing 6,600 tax shelter cases.

In addition, we will be able to assure that the IRS has the necessary computer capacity for prompt and efficient tax processing in the upcoming filing season. It will also add over 600 positions in IRS service centers to help avoid any repetition of the refund delays and processing errors that plagued millions of taxpayers this past filing season.

In the Postal Service, the conferees have recommended $820 million for revenue forgone to support nonprofit mailers. The President's budget recommended no funding at all for this program, which has been supported by the Congress for a number of years. The effect of this appropriation will be to prevent exhorbitant increases in postal rates for nonprofit mailers. This appropriation would allow rates for nonprofit mailers to increase only to step 16 on the phasing schedule on January 1, 1986.

The conference report also requires that the Postal Service continue 6-day mail delivery including rural mail delivery and continue to provide free mail for the blind and for overseas voting.

After considerable debate, the conferees reached agreement to extend only to May 15, 1986 the prohibition contained in the continuing resolution for 1985 which delayed implementation of certain personnel reforms proposed by the Office of Personnel Management. It is hoped that this extra time can be used to reach an agreement between Congress and the administration on this controversial matter.

Mr. Speaker, I think this is a good conference report and truly represents a reasonable compromise with the Senate. I might point out that not one single conferee on the part of the House or Senate reserved on any item in the conference report.

I, therefore, urge your favorable consideration.

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY

	Fiscal year—		House	Senate	Conference	Conference compared with			
	1985 enacted	1986 estimates				Enacted	Estimates	House	Senate

□ 1015

Mr. SKEEN. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to begin by commending the chairman, the gentleman from California [Mr. ROYBAL] for his consideration and the very great kindnesses that he has shown all of us as Members, both the majority and the minority on that committee. I also want to commend him for the expeditious manner in which this conference was held. I think we worked it out in a manner that was workmanlike and we resolved our differences and did not take a couple of days to do this conference.

Mr. Speaker, this is a very responsible piece of spending legislation. I know we have a lot of doubts in this body about bills, particularly when it comes to spending the taxpayers' money, and a lot of concern, and I can give my assurance that every consideration was given to the taxpayer.

If Members liked this bill when it left the House and before it went to conference, they will love this conference report, because we did at least trim $83 million out, and I know that should cause palpitations in the hearts of tax savers, and I see one palpitating over here.

This has three important parts, Mr. Speaker, and I think the chairman outlined those very well so I am not going to reiterate these same points, but I would like to make the point that in three areas, spending was increased, the most notable being that of revenue forgone. This bill is less as a result of the conference work than it was when it left this House and the House recommendation. We left $820 million in revenue forgone. This is the subsidy to nonprofit publications on mailing. The OMB recommendation was absolutely zero. We did not concur with that rationale, and $820 million was the compromise between the Senate and the House version. We think that is responsible, we think it is necessary, and it was left in there.

We also increased the IRS and we also increased the expenditures for Customs, and we think that is responsible. For every dollar expended in IRS appropriations, we get a return of some $9 back. In the case of Customs, for every dollar expended we get some $14 back. We think that is responsible in light of the fact that we are leaving $80 billion on the table this year, Mr. Speaker, because of the inability of the IRS to fully audit or do field audits in collecting those taxes that are due the Federal Government. We think that is a tremendous amount of money in light of the fact that we are trying to save some $50 billion in spending cuts in the budget, when we are leaving $80 billion on the table that is due and owing to the Federal Government because of an inability to collect.

We want to increase that efficiency. We also know that it gives us a great revenue leverage, and we desperately need that.

In the case of Customs, we have the problem of drug interdiction, and we think it is extremely important that we tighten up the borders of the United States.

In these three cases, we did increase expenditures. This is a good bill, Mr. Speaker, and I recommend it to my colleagues, both the majority and the minority, because it is a responsible bill. It was a responsible effort, and once again, I commend the chairman and the other Members of the House who were on the conference committee for the fine work that they did. It was a good piece of work and it was enjoyable doing this kind of work because it made one feel that we had really accomplished something that I think the focus of this entire House reflects in responsible spending patterns. I think this is a responsible piece of work.

Mr. Speaker, I yield such time as he may consume to the great, newly 64-year-old ranking member of this committee who is a real pleasure to work with, the gentleman from Massachusetts [Mr. CONTE].

Mr. CONTE. Not yet. It will be Saturday.

Mr. Speaker, I rise in strong support of the conference report on H.R. 3036, the Treasury-Postal Service appropriations bill for fiscal year 1986.

I want to commend the chairman of the subcommittee, my good friend, ED ROYBAL, for bringing a well-balanced and fiscally responsible conference report to the floor. Every member of the subcommittee can attest that ED ROYBAL is a fair chairman who listens and acts on the concerns of the Members of this House. As a long-time member of this subcommittee, I've served with the best—Vaughn Gary of Virginia, Tom Steed of Oklahoma, and others—and it's a pleasure for me to work with Chairman ROYBAL, and also with his faithful partner and counsel, Tex Gunnels, who has also been my friend for 27 years, and a very, very able gentleman and counsel to that subcommittee.

I also want to take this opportunity to commend JOE SKEEN for his work on this bill as the ranking minority member of the Treasury Subcommittee. He's done a fine job his first year on the committee.

Mr. Speaker, 46 percent of the money appropriated in this bill is for mandatory items. The payments for retired Federal employee health benefits and to the Civil Service Retirement and Disability Fund, along with the President's salary, amount to $6 billion out of the $13.1 billion provided in this conference agreement. These payments are fixed costs mandated by law. The Appropriations Committee has no control over this mandatory spending, and the amount provided in this bill is the same as the administration requested.

Three agencies will spend 75 percent of the discretionary appropriations provided in this conference report.

The Customs Service was provided additional resources to continue the international war on drugs and to collect several billion dollars in duties and taxes.

The Internal Revenue Service funding was increased to correct the tax return processing problems of last year and to strengthen tax compliance. When the Government pays out almost $200 million in interest alone on tax refunds, it's time to provide the resources necessary to get the job done.

In fact, the administration now agrees with this assessment and urged the conferees to accept the funding level provided in the House bill.

That letter from the administration follows:

DEPARTMENT OF THE TREASURY,
Washington, October 29, 1985.

Hon. SILVIO O. CONTE,
Ranking Minority Member, Committee on Appropriations, House of Representatives, Washington, DC.

DEAR MR. CONTE: As you consider final action on the FY 1986 budget for the Department of the Treasury, I strongly urge that funding levels requested in the President's budget be adopted in conference for all Treasury bureaus, except for the Internal Revenue Service. I am requesting that the $3.689 billion level approved by the House be adopted for the Internal Revenue Service. This level has the approval of the Administration.

For bureaus other than the Internal Revenue Service, the Department's FY 1986 budget submitted to the Congress earlier this year was, in our judgment, the amount necessary to carry out our diverse responsibilities. It included only those items that were fully justifiable and essential to the accomplishment of our missions, and reflected substantial savings in productivity and streamlined administrative operations. Accordingly, we continue to support the President's budget request for all these bureaus. In total, the President's budget for these bureaus is below both the House and Senate approved levels.

We believe the $3.689 billion level approved by the House for the Internal Revenue Service is vital to provide for adequate tax administration in FY 1986. These resources are needed to restore a high level of quality in the Service and to assure an effective tax filing season. The $206 million reduction from the House allowance proposed by the Senate would jeopardize on-going efforts to revitalize tax processing capabilities and would reduce revenues at a time when they are critically needed. We encourage the conferees to identify reductions elsewhere in the bill to offset this increase for the Internal Revenue Service.

I greatly appreciate the continuing support provided by you and your Committee for Treasury programs during these difficult fiscal times. I ask that you give careful consideration to these issues.

Sincerely,

JOHN F.W. ROGERS,
Assistant Secretary of the Treasury (Management).

Mr. John Rogers, Assistant Secretary of the Treasury, wrote to me requesting "the $3.689 billion level approved by the House" and reconfirming that "this level has the approval of the administration."

The third major discretionary item is the postal subsidy for nonprofit mailers. The payment provided in this conference agreement is $390 million less than the amount appropriated last year. Since the administration requested no Federal appropriation, the $820 million payment accounts for 86 percent of the increase over the President's budget.

Although this amount is scored against the bill, the President's budget did not actually call for the elimination of the reduced mail rate program, but instead proposed to use revenues from other classes of mail to finance the subsidy.

The budget claimed that "legislation will enable the Postal Service to continue the subsidy for most existing subsidized mailers." No legislation was sent to the Hill, so the committee was forced to appropriate the funds.

Even with funding increases for the Customs Service and the IRS and with $820 million for the postal subsidy, discretionary spending in this conference agreement is $215 million below the fiscal year 1985 enacted level. This conference report is better than a freeze. It provides a significant spending cut from last year.

The House and Senate bills also contained several language provisions, and the conferees generally defered to the concerns expressed by the authorizing committees and the administration. On amendment 83, however, the conferees took a "middle-of-the-road" position on the longstanding dispute involving OPM pay-for-performance and RIF regulations.

Based on a compromise that I offered last year, the ban on the implementation of the regulations was lifted on July 1, 1985. Contrary to administration objections, the conference agreement reimposes the ban until May 15, 1986, but allows OPM to revise the regulations in the interim. It is not a perfect solution, but I hope this is the last time this issue will be considered in the appropriations process.

Mr. Speaker, this is a good conference report. It balances fiscal restraint with the obligation we have to fund the programs in this bill. I urge my colleagues to support the conference report on H.R. 3036.

□ 1025

I might say in closing that I spoke with OMB last Friday, and at that time they were discussing the possible recommendations of a veto because they felt that we had appropriated too much money here, and also they were very, very disturbed about the language prohibiting the implementation of the OPM regulations.

I begged them to reconsider; I told them the work that we had done in the conference on the OPM language; I was opposed to it and I did everything I could to modify it. We did modify it; unfortunately they seemed to be very upset about this, and I learned this morning that they may be calling me shortly to inform me they are going to veto this bill.

I would like to inform them right now, if they are watching the boob tube down there in the White House that I think they are making a mistake, and I hope that thay will not veto this bill, and if they do veto it, I will have to stand on this floor to try to do everything I can to override that veto.

Mr. HOYER. Will the gentleman yield?

Mr. CONTE. I yield to my good friend from Maryland.

Mr. HOYER. I thank the gentleman from Massachusetts [Mr. CONTE]. I want to echo the sentiments of my good friend from New Mexico, the ranking minority member [Mr. SKEEN] and the sentiments from my chairman, the gentleman from California [Mr. ROYBAL] in saying that it is indeed a pleasure and an honor to be able to serve on this subcommittee with the gentleman from Massachusetts who not only serves his party, but his country so well, both in the appropriations process and in this House.

I would like to also thank the gentleman for what I know was his tenacious work in the subcommittee, working with the gentleman from Virginia and myself with reference to the OPM regulations.

I also want to reiterate to him my concern that this matter be resolved in a positive fashion from the administration's standpoint, and from the employees' standpoint.

I want to reiterate at this point in time, Mr. Speaker, that Constance Horner, the new Director of the Office of Personnel Management, in my opinion has been working very positively,

particularly and pointedly with Congressman WOLF from Virginia in attempting to resolve the differences that we have had between the administration and the Congress on this issue.

I am happy to say, and I see the gentleman from Virginia on his feet, that I believe that we have come very close to a resolution of the differences between the administration and the Congress, and as a result of that, I would very much hope that they would not use that as a reason for vetoing this bill, and would agree with the gentleman from Massachusetts [Mr. CONTE] that would be a mistake.

The gentleman from Virginia and the gentleman from Massachusetts have both been working very hard to bring this matter to resolution, and I am pleased to say that I think we are very close to putting this matter behind us for good.

I thank the gentleman for yielding, again congratulate him for his outstanding work on this subcommittee, in the Appropriations Committee as its ranking member, as one of the senior Members of this House he does an outstanding job on behalf of the entire country.

Mr. CONTE. I want to thank my good friends from Maryland for those remarks.

Mr. ROYBAL. Mr. Speaker, I yield such time as he may require to the gentleman from Maryland [Mr. HOYER].

Mr. HOYER. I thank my chairman for yielding, and again want to congratulate the gentleman from California [Mr. ROYBAL], who is the chairman of the Treasury-Postal Subcommittee. As has been stated by the gentleman from New Mexico [Mr. SKEEN], Mr. ROYBAL does an excellent job at handling a very difficult and complicated task; and those of us who are younger members on the committee are proud to serve under his leadership and to benefit from his teachings.

At this time, I would ask the chairman to yield for a brief colloquy.

Mr. ROYBAL. I would be glad to yield to the gentleman from Maryland.

Mr. HOYER. I thank the gentleman and rise to engage in a colloquy concerning amendment No. 83. I would ask the chairman if the Senate receding on amendment No. 83 with an amendment barring implementation, promulgation, administration, enforcement or reissuance of certain Office of Personnel Management regulations means that existing proposed regulations published on August 30, 1985, are also banned as falling within the ambit of previously banned proposed regulations?

Mr. ROYBAL. The gentleman is correct. The proposed regulations published on August 30, 1985, are a reissuance of previously banned proposed regulations. It is the intent of the conferees that those proposed regulations and the earlier proposed regulations shall have no effect of law until at least May 15, 1986.

Mr. HOYER. Is the gentleman saying that it is the intent of the conferees that no effect be given to any regulations of the type banned by amendment No. 83 until May 15, 1986?

Mr. ROYBAL. That is the intent and I think it is important to make that very clear. Two years ago the Office of Personnel Management decided to ignore the ban and the Court had to stop OPM from implementing the regulations. So, for the purpose of the record, I think it is very important to point out that it is congressional intent that these proposals not move forward at least until May 15, 1986.

Mr. HOYER. Am I also correct, Mr. Speaker, in saying that the intent of the conferees is that no agency may implement these regulations, including OPB?

Mr. ROYBAL. The gentleman is correct.

Mr. HOYER. I thank the gentleman for yielding for that colloquy, and I rise in strong support of the conference report. We have worked hard and long. The bill is substantially below that which it was when it went to the Senate. We nevertheless have provided, I think, funds appropriate to ensure proper staffing levels in IRS and in Customs, and I am in strong support of the conference committee report.

I again congratulate my chairman and the ranking member, the gentleman from New Mexico [Mr. SKEEN], who have both worked so hard to effect this end.

Mr. SKEEN. Will the gentleman yield?

Mr. HOYER. I yield to the gentleman.

Mr. SKEEN. I would like to ask this question of either the chairman or the gentleman from Maryland: The colloquy that you have just engaged in, does that appreciably change the terms of the ban, and so forth? Because this was not information that we have prior to this meeting, and we are a little concerned about whether there is any real change in the intent or not. We are not quibbling, but just want to get the record straight.

Mr. ROYBAL. There is no change in the intent. The intent has been right along that the date be May 15, 1986.

Mr. SKEEN. That is what we agree to in conference.

Mr. ROYBAL. That is what we agreed, and there is no change in the intent whatsoever.

Mr. SKEEN. Does OPM have the right to revise, in any way, there regulations in regard to this ban?

Mr. ROYBAL. Yes, the OPM does have that right.

□ 1035

Mr. HOYER. In further response, I would say, as the gentleman well knows because he was part of the effort to effect this, we agreed to revisions because clearly the intent is to try to reach an accommodation between OPM and the Congress, and therefore it is essential to reaching that accommodation that they have the ability to revise. As I said in my opening statement, the gentleman from Virginia [Mr. WOLF] I know has been working very closely with the Office of Personnel Management, with Miss Horner who, I would reiterate, is working, in my opinion, very forthrightly with the Congress to try to bring this matter to a successful conclusion.

I want to congratulate the gentleman from Virginia for all his work toward that end.

Mr. SKEEN. If the gentleman will yield further, I appreciate his statement. I was trying to establish whether or not there had been any movement since the conference. In view of the language that was put in, you folks worked very hard on it, to make sure that there had been no travel as far as intentions were concerned or a change in the intentions that we had agreed on in conference because I did not know whether you had had the opportunity to have any conversation with OPM or any connection with them insofar as this language.

Mr. HOYER. Briefly, in response, I would say the gentleman from Virginia [Mr. WOLF] really has been carrying the ball on this issue. I understand there has been movement and it is positive movement. That is to say, we are moving closer and not further away. This language simply clarifies the intent of the conferees so that the administration will know clearly where we are and we know clearly where they are, and I think we are going to meet in the middle.

Mr. SKEEN. If the gentleman will yield for one last question, is this the last time this ban will be offered?

Mr. HOYER. I do not want to comment to that until such time as the accommodation is a reality. I will leave that to Mr. WOLF's judgment, because he is the one who has been active.

Mr. SKEEN. I did not expect the gentleman to reply.

Mr. HOYER. I thank the gentleman for his question.

Mr. ROYBAL. Mr. Speaker, I yield myself such time as I may consume.

May I say to the gentleman from New Mexico it is the expectation of the chairman of the committee and every Member that an accommodation will be reached and that this subject matter will not again be a subject of debate the next time we bring a bill to the floor.

Mr. SKEEN. If the gentleman will yield, I thank the chairman once again.

Mr. Speaker, I thank also the gentleman from Maryland for his response.

Mr. ROYBAL. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. I thank the gentleman for yielding.

Mr. Speaker, I would like to enter into a colloquy with my chairman of the subcommittee, Mr. ROYBAL, with regards to the President's original budget submission which proposed a 5-percent pay cut for Federal employees.

Mr. Speaker, when our committee marked up this bill, the administration had not changed its position on the 5-percent pay cut for fiscal year 1986. Subsequent to the passage of H.R. 3036 by the House, the administration sensed that the Congress would not cut Federal pay and requested instead that Congress provide sufficient funds so as to cover Federal pay absent a 5-percent pay cut. Mr. Speaker, because the request from the administration came after the committee and House had passed this bill, adequate funding for the full Federal pay is not contained in this bill. It is my fear that the departments and agencies funded by this bill will be unable to fully fund the number of personnel requested by the committee. This is particularly troublesome to me when we consider the funding levels provided for the Customs Service and the IRS, both of which are increased and greatly needed. When the committee heard testimony from the Director of the Office of Management and Budget this spring, he testified that should the Congress and the administration choose not to cut Federal pay, a Governmentwide amendment or supplemental would be requested to make up the difference. Although the administration has since made such a request, as I have stated, it came after the committee and the House had passed this bill. Therefore, I would like to ask the chairman whether or not it would be appropriate for the committee and the agencies to assume, that when the committee considers a supplemental appropriations bill for fiscal year 1986, that one of the items considered would be the funding of the difference of pay levels contained in this bill and that approved by the Congress and the administration?

Mr. ROYBAL. Mr. Speaker, will the gentleman yield?

Mr. COLEMAN of Texas. I yield to my chairman.

Mr. ROYBAL. I thank the gentleman for yielding.

Mr. Speaker, In answer to the question of the gentleman, I would say the answer to that question is a definite yes. The gentleman probably will remember this matter was discussed in subcommittee. We decided not to enter into a lengthy debate with regard to the increase in pay due to the fact that we had been assured that a supplemental would be sent to the House at the appropriate time. So it would be appropriate for the committee and the agencies to assume that when the committee considers supplemental appropriations for 1986 that one of the items would definitely be the matter of the difference in pay.

Mr. COLEMAN of Texas. I thank the chairman for his response.

Mr. Speaker, furthermore, would it be appropriate for the agencies to assume that the committee and Congress do not intend for the Department and agencies funded under this bill to use moneys appropriated for additional personnel for the cost of funding the difference between the pay levels set in this bill and that actually agreed upon between the Congress and the administration?

Mr. ROYBAL. I am very glad to answer that question for the very simple reason that in the past this committee, this House, and this Congress have appropriated funds for additional positions and those positions have not been filled. It is the intent of this legislation, or it would be when enacted, the intent of this House and the Congress as a whole to fill those positions, those additional positions, that this bill recommends and that additional funds be used only for that purpose and no other purpose.

Mr. COLEMAN. I thank the chairman very much for his answer. I think that is the intent of what we worked on, all of us in the subcommittee, through your leadership and that of the ranking member, the gentleman from New Mexico.

I thank the gentleman very much.

Mr. SKEEN. Mr. Speaker, I yield 5½ minutes to the gentleman from Virginia [Mr. WOLF].

Mr. WOLF. Mr. Speaker, I want to begin by thanking the chairman, Mr. ROYBAL, and the ranking minority member, Mr. "JOE" SKEEN, for their cooperation and help and also Mr. CONTE who is no longer in the Chamber.

I also want to acknowledge the staff. Having been a staff person up here on Capitol Hill for a long time, myself, I think the help that I have gotten from the staff has been super.

I want to publicly thank them. I also want to recognize Congressman HOYER for his work on these OPM rates. Without his help, there is no way we could have made these changes.

Mr. Speaker, I rise in support of this conference report. I want to talk about one provision in the conference report.

Mr. Speaker, what I have in my hand is a babushka doll which says on the bottom, "Made in the U.S.S.R."

Mr. Speaker, this doll was made by slave labor in the Soviet Union. We have language in this report which requires the Secretary of the Treasury and Customs to bring a case to prohibit the importation of these wood products which are clearly made by slave labor in the Soviet Union. We have several indications that this is the fact.

There was an article in Reader's Digest which said:

In February of this year, the United States State Department exposed Russian labor camps in a detailed study concluding that, "Soviet authorities still exploit forced labor on a large scale for both domestic and Western export markets." There can be little doubt now that much of today's Soviet economy is built on the backs of the wretched men, women, and children who toil in nearly 2,000 Russian prisons and forced labor camps.

And I stress, and I have proof, that there are children in these camps.

Thousands more forced laborers died in the Kolyma goldfields of Siberia in the 1930's. Nobel Prize-winning Russian author Aleksandr Solzhenitsyn documented this nearly a decade ago in his monumental work "The Gulag Archipelago."

Mr. Speaker, I submit this article for the RECORD.

"MADE IN U.S.S.R."—BY FORCED LABOR

(By Joseph A. Harriss)

Western nations need to take a closer look at their Soviet imports. Many were manufactured at a terrible price in human suffering.

In Frankfurt, West Germany, I was interviewing some recent inmates of Soviet forced-labor camps. One woman pointed at the wooden folding chair that I was sitting on. "That's a souvenir from the Gulag," she said. On the bottom was marked "Made in U.S.S.R.," followed by the code 133340, indicating the camp where it was produced. The United States last year imported hundreds of such chairs, part of our multimillion dollar trade in which we buy the products of Soviet convict labor, in contravention of U.S. law.

In February of this year, the U.S. State Department exposed Russian labor camps in a detailed study concluding that "Soviet authorities still exploit forced labor on a large scale . . . for both domestic and Western export markets."

There can be little doubt now that much of today's Soviet economy is built on the backs of wretched men, women and children who toil in nearly 2000 Russian prisons and forced-labor camps. What is less well known is that importing the products of forced labor violates an explicit American law, the Smoot-Hawley Tariff Act of 1930. Section 307 states: "All goods, wares, articles and merchandise mined, produced or manufactured wholly or in part in any foreign country by convict labor or forced labor . . . shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited."

Until recently, few realized the extent to which the Soviet Union still depends on convict labor—the only major industrialized nation that makes it a mainstay of its economy. To be sure, many Americans remember that Stalin built spectacular projects like the Volga-Don canal, the second Trans-Siberian railway and entire new town at the cost of hundreds of thousands of lives. Thousands more forced laborers died in the

Kolyma gold fields of Siberia in 1930s. Nobel Prize-winning Russian author Aleksandr Solzhenitsyn documented this nearly a decade ago in his monumental work *The Gulag Archipelago.*

But it took the controversy between the United States and its NATO allies over the Siberian gas pipeline to Europe to focus attention on *continued* Soviet dependence on this practice. The State Department report drew on CIA intelligence, including satellite photos, and suggested that the Soviets had indeed used forced labor on the pipeline, especially for clearing forests and building roads. Commented Sen. William L. Armstrong (R., Colo.), who originally requested the study, "This is a shameful situation beyond the comprehension of most Americans."

The number of convict laborers in the U.S.S.R. is down from its peak of 15 million under Stalin, but they still number an estimated four million, and the conditions under which they work are hardly less nightmarish. Far from fulfilling Marx's promise to free workers from their chains, the Soviet system has systematically enslaved them.

"Graveyard Soup." Goading the West's conscience on the forced-labor issue are the International Society for Human Rights, based in Frankfurt, and the International Sakharov Committee in Copenhagen. Last fall in Bonn the two, groups sponsored an international tribunal of parliamentarians, labor leaders and academics that heard former prisoners graphically portray brutal working conditions in sub-zero temperatures, with inmates picking lichen off trees for nourishment. The tribunal concluded that "prisoners, among them women and children, are forced to work under conditions of extreme hardship." The tribunal chairman declared, "We have presented the truth to the world, and no one can say, 'I did not know.' "

Details of what the world must know are spelled out by such former camp inmates as Julia Voznesenskaya, 43, a frail dissident author from Leningrad. She was arrested by KGB security police after she boldly scrawled on a wall, "You strangle out freedom, but you can't chain people's souls." Charged with "anti-Soviet slander," she spent three years in prison and Siberian camps. One of her main task was making work clothes and uniforms for the Red Army. Shifts stretched to 12 hours to meet impossibly high production quotas. Those who failed to meet them had their meager food ration cut. With gallows homor, she and her fellow laborers called the thin, halfputrid fish broth served every day "graveyard soup"—it contained nothing but bones. Prisoners with tiny children often looked on helplessly as the toddlers sickened and died.

Yuri Belov, 42, spent 15 years in prisons, camps, and banishment and psychiatric hospitals. He was first arrested in 1963 for writing "subversive" poems and founding a community of Catholic believers. The charge: "anti-Soviet agitation and propaganda." He was sent to camp ZhKh 385/11 in Mordovia, 200 miles southeast of Moscow.

Here, 2000 convicts each assembled 140 wooden chairs per shift, which were sent to a "free" factory in Minsk. There, finishing touches were put on before the chairs were exported to the West. Thus the Kremlin could claim the goods were made by "free" workers.

Belov remembers with a sardonic smile the political commissar who told ZhKh 385/11 inmates to be proud because their work earned the motherland hard currency and cost almost nothing. Indeed! The motherland paid Belov and his fellow convicts 60 rubles a month—"free" workers got about 100 rubles—but withheld 75 percent to pay for the minimal camp food, clothing and maintenance.

Sematic Games. Frequently those in Soviet forced-labor camps are there on flimsy pretexts such as "hooliganism" or "parasitism" (being unemployed). Vladimir Bukovsky, a scientist who spent 11 years in the Gulag, writes, "Such a high percentage of criminality is artifically maintained by the state for economic motives."

One of the first signs of a big new Soviet construction project is an anti-crime campaign. Police round up men and women for the forced-labor pool, sometimes resorting to primitive entrapment. Vladimir Borisov, an exiled founder of the underground free labor union SMOT, who now lives in France, told me of a friend of his, Ivar Jukovski. As Jukovski was shopping in a Riga clothing store, an old lady asked him to try on a jacket to see if it would fit her son. Police promptly arrested him for shoplifting, and the "corrective labor colonies" had another worker.

The Ministry of Internal Affairs (MVD) runs the forced-labor system, supplying workers to other state agencies. Because workers under armed guard are not suitable for outdoor work, convicts are often put on parole or probation on condition that they perform compulsory labor. Much of the Soviet chemical industry was constructed this way in the 1960s—so today all such workers are known in camp slang as *khimiki,* or "chemists." In the big oil and gas fields, they can amount to some 20 percent of the adult population. This forced labor without confinement enables the Kremlin to play semantic games and deny that convicts are used, for instance, on the pipeline to Europe.

Political dissidents, however, are seldom released even conditionally. Their "crimes" often fall under the infamous Article 70 of the Soviet Criminal Code, which penalizes "anti-Soviet agitation and propaganda"—a catchall ban on saying, writing or disseminating anything critical of the government.

This was the technique the Kremlin used to crush the Helsinki monitoring group, founded in May 1976 in Moscow to foster compliance with the human-rights provisions of the Helsinki accord. Nine months later, two of its cofounders, Yuri Orlov, a physicist, and Alexander Ginzburg, a journalist, were arrested and charged with violating Article 70. By last year 34 group members had been arrested, and the group's remaining three members disbanded it.

Ginzburg was sent to ZhKh 385/1 in Mordovia. Released in April 1979, he now lives in Paris, where I interviewed him. "We cut and polished glass for chandeliers," he said. "The room was full of abrasive dust. Men spat blood and got silicosis." Their quota: 75 to 90 pieces a day each, far higher than the quota in a "free" factory. (The Department of Commerce says we import articles of glass from the Soviet Union, but is unable to confirm if this includes chandeliers.)

Orlov and other well-known members of the Helsinki monitoring group, such as Anatoly Shcharansky, are still at forced labor. Orlov works as a lathe operator in a camp set up in the Perm region, near the Ural Mountains. Shcharansky, despite failing eyesight, laboriously handweaves eight potato sacks a day in his dimly lit cell at Chistopol Prison 540 miles east of Moscow.

The tortures of hunger and cold drive many Gulag prisoners to desperation. Some chop off their own fingers to get hospitalized. Suicide is often a way out. One method is to race for the barbed wire in full view of a guard. MVD guards shoot to kill; they get an extra week of leave for bagging an escaping prisoner.

Bitter Fruits. Despite such blatant human-rights violations, we and other Western nations continue to buy the fruits of forced labor. Specifically, the United States in 1982 imported:

Chemicals, $118-million worth, particularly anhydrous ammonia for fertilizer. Several Russian chemical plants are integral parts of industrial prison compounds.

Uranium, $10-million worth. Uranium is mined by forced labor at Zheltyye Vody in the Ukraine. Exile sources add a Ukrainian camp at Novaya Borovaya, several Siberian camps at Krasnoyarsk, and another in Central Asia at Uchkuduk. Persistent rumors tell of uranium death camps where workers without protection from radiation last only a few months.

Gold, $4.2-million worth. The CIA notes that forced laborers mine gold at Zeravshan in Central Asia. Exiles say convicts also mine or refine it in nearby Muruntau, and in Siberia at Bodaibo, Artemovsk, Taishet and along the Yenisei River.

Wood and wood products, $3.5-million worth. Logging and wood processing is done in some 350 camps in the Urals, the Northwest, the Volga-Vyatka and Siberia. Women fell trees around Kirov and Lake Baikal. Children from 14 to 18 make shipping cases at Novaya Lyalya in the Sverdlovsk region.

Tractors, $500,000 worth. The main model imported by the United States is the Belarus, a light tractor. Parts are made at a Mordovian forced-labor camp.

"We'll Enforce It." Section 307 of the Tariff Act of 1930 is thus being largely ignored in Washington. Incredibly, I was unable to find a single offical there concerned with trade who showed awareness of its relevance to our Russian imports.

Yet the law is clear. It provides that any citizen who suspects a violation can contact the Customs Service, which is required to open an investigation. If available information "reasonably" indicates a violation, the goods must be impounded. To have them released, the importer must produce a certificate from the foreign seller attesting that no forced labor was employed in any stage of production or any component of the merchandise.

Why doesn't the United States uphold the law? "The question of Soviet goods has just never come up," says a high Customs official in Washington. "But if some one shows us that Russian goods entering this country are made with forced labor, we'll enforce it."

Our allies in Europe import far more Russian goods than we do. Last year West Germany alone bought $4.7-billion worth. French imports amounted to $3.1 billion. The Siberian gas pipeline will raise these figures.

Few other countries have a law prohibiting importation of convict-made goods, but most Western nations are parties to the Universal Declaration of Human Rights and other international treaties. They should join with the United States to raise this issue in the U.N.

The time has come to expose before the world Russia's economic exploitation of its citizens. But first we must ensure that our

own law, intended to prevent complicity in such barbarity, is enforced.

I have a report of a gentleman who served in a slave labor camp. I would like to submit this for the RECORD in complete detail, but let me state for the record: Let me read segments of this report. He said, "I, as a long-term prisoner of the Soviet gulag"—and let me say here one gentleman I met had been in the slave labor camp for 30 years, 30 years. He was an elderly man, and they allowed him to leave Russia because he would then be on their economy, he would require economic support from them. So they allowed him to come to our country because of pressure. But listen to this:

"I, as a long-term prisoner of the Soviet gulag, know that the labor of prisoners is used on a large scale in a whole series of concentration camps of the Soviet Government. These camps belong to the wood industry, extraction of useful industries, heavy chemical and wood pulp industries, light industry, the food industry." He goes on to say, "Research center for prisons, psycho-prisons, and concentration camps of the U.S.S.R. published in Abraham Shifrin's 'Guide to Camps And Prisons of the U.S.S.R.,' thus most of the wood-finishing industries uses raw materials used by slave labor." That is this babushka doll. "In the woodworking industry they also use slave labor. The Soviet economy uses prisoners in the mining/ore industry, in both pits and mines, and they extract coal, gold, uranium, copper, chromium, nickel, molybdenum, and diamonds. I personally worked in a gold mine." He says the extraction of diamonds also uses slave labor. He goes on to mention all the camps, and then he says something which I think is particularly moving: "Odessa Prison (290059, Odessa-59) Establishment YuG-311/76 where there are women's and children's camps. The women work in the textile mill, and the children make consumer metal products." I will submit this entire report for the RECORD.

UTILIZATION OF SLAVE LABOR—EYEWITNESS TESTIMONY

(By S. Karavans'kii)

INTRODUCTION

I as a long-term prisoner of the Soviet Gulag (concentration camp system), know that the labor of prisoners is used on a large scale in a whole series of concentration camps of the Soviet government. These camps belong to the: 1. Wood Industry; 2. Extraction of Useful Minerals; 3. Heavy, Chemical, and Wood Pulp Industries; 4. Light Industry; 5. Food Industry.

In addition to my own observations, this article employs the testimony of other former concentration-camp prisoners, as well as materials of the Research Center for Prisons, Psychoprisons, and Concentration Camps of the USSR, published in Abraham Shifrin's Guide to Camps and Prisons of the USSR. The source of information or the name of the witness is given for each specific piece of testimony. All addresses, whatever the source, have been verified and corrected on the basis of the publication, List of Political Prisoners of the USSR (No. 5, situation as of January 5, 1983).

I. The wood industry

The Soviet wood industry has used and still uses slave labor for felling timber. I, myself, felled timber in Irkutsk Province (Oblast') in the following camps of the Ozerlag: Camp 307, Irkutsk Province, Bratsk District (Rayon), Anzeba settlement, establishment UK-272/307; Camp 018, Irkutsk Province, Vikhorevka settlement, establishment UK-272/018; Camps 041 and 034. From the accounts of prisoners, I know that of the lumber camps in the USSR, the prisoners still work in the following camps: Kitoylag, Irkutsk Province; Ust'-Vymag, Komi Autonomous Republic; Dubrovlag, Mordvidian Autonomous Republic; Sevurallag,[1]) Ivdel'lag, Sverdlovsk Province; Viatlag, Kirov Province; Kraslag, Krasnoyarsk Territory (Kray); Oneglag; Kargopol'lag; Sol'lag, Arkhangelsk Province. A large quantity of lumber is exported from these regions of the USSR to the free world. There are scores of witnesses to the existence of these camps. Here is some of the testimony: N. Akhmetov's and V. Mikhalenko's list of prisoners, dated 1978, and the address of Camp No. 16 of Kraslag, which produces lumber for export were published on pp. 151-52 of the journal *Kontinent* (No. 24, 1980). The address of Camp No. 16 is Krasnoyarsk Territory, Uyar District, Gromadskaya Station, establishment UP-288/16.

Thus, most of the wood-finishing industry uses raw materials produced by slave labor. We must include here the furniture industry, the building materials industry, the paper industry, the wood-pulp (cellulose) industry, and a major part of the chemical industry, as well as the construction industry.

In the wood-working industry they also use slave labor. I personally worked in Camp 019 of the Ozerlag, which served the great wood-working combine in Irkutsk Province, Chuna District, Chuna Station, Establishment UK-272/019; then in Camp 025 of the Ozerlag camps, Irkutsk Province, Tayshet District, Tayshet city, Establishment UK-272/025., and in Camp No. 11 of the Dubrovlag (Mordvidian Autonomous Republic, Zubova Polyana District, Yavas Settlement, Establishment ZhKh-305/11, in the furniture factory.

From the evidence of long-term prisoners, taken down by the Prisons Research Center, we have the following examples: south of Sykyvkar in the Kobra Camp, with a population of 2,000, they made plywood for export. In Bekabad, Uzbek Republic, in Camp 64/21, 1,600 prisoners work in the wood-processing plant, which makes boards. Address: Uzbek Republic, Tashkent Province, city of Bekabad, Establishment UYa-64/21.

In Vologda, there are two camps with 2,500 prisoners each, which provide the work force for the plywood factory and the wood-processing plant.

Testimony of the Prisons Research Center: Abraham Shifrin (Israel).

[1] Translator's note. "lag" means "lager'" or "camp, concentration camp." The designations ending in "lag" (Dubrovlag) stand for a series of camps under that administration. The first part of the word stands for a town or region, e.g., Sevurallag—Northern Ural Camps; Dubrovlag—Dubrovki (town of) camps. For administrative units, I have translated Oblast' as Province, Rayon as District, Kray as Territory. I have guessed the abbreviation "uchr" to be "uchrezhdenie," i.e., establishment.

II. Extraction of useful minerals

The Soviet economy uses prisoners in the mining/ore industry, in both pits and mines, and they extract coal, gold, uranium, copper, chromium, nickel, molybdenum, and diamonds.

I personally worked at the Matrosov gold mine. Address: Magadan Province, Ten'gi District, Matrosov Settlement, Establishment 261/1. This campsite is part of the Berlag, which has about 50 camps. Besides Berlag, the Maglag, which also has 50 camps, extracts gold. At the Matrosov camp they extract gold ore, which then is enriched at the Matrosov Enrichment Plant. At present, the Matrosov mine is not using prison labor, but in Magadan Province and elsewhere prisoners work in the gold mines of Yagodnoye, Susman, Orotukan, Palattsy, Vetrennyi, Budennyy, Timoshenko, and other places. Besides mine, there is the testimony of Mys'o (USA).

Gold for the national treasury of the USSR is extracted at Bodaybo, Irkutsk Province, and the prisoners who work the gold mines are situated in three camps. Testimony of A. Shifrin (Israel).

The extraction of diamonds also uses slave labor. In the center of diamond mining, at the town of Mirnoye, Tyumen' Province, there are no camps, but the polishing of the diamonds is left to prisoners. In Solekhard, Tyumen' Province, there are two camps with 2,500 prisoners each, in which diamonds intended for export to "Russian Gems" stores are polished by prisoners. Testimony of A. Shifrin.

Prison labor is employed in molybdenum, manganese, chromium, nickel (Noril'sk, Krasnoyarsk Territory) and uranium mines in rich sites and even in the Ukraine at Rakhov.

In the southern part of the Komi Autonomous Republic, in the Vorkutlag and Rachlag (Inta) systems, prisoners extract coal. Individual mines where prisoners work are scattered over the whole of the U.S.S.R. For example, according to the Prisons Research Center data: Chernogorsk, Krasnoyarsk Territory. About 6,000 prisoners work in the coal mines; Temir-Tau, Kemerovo Province. 800 prisoners extract coal; Shakhty, Rostov Province, 1,500 prisoners work in coal mines. Address: Rostov Province, city of Novoshakhtinsk, Establishment UCh-398/11.

According to the data of the Prisons Research Center, prisoners work in the gas and petroleum extraction industry in the following places in the U.S.S.R. Apsheronsk Station, Khadyzhensk, Neftegorsk, Krasnoyarsk Territory. The villages of Negotka, Parabel', and Kolpashevo, Tyumen' Province, 4,000 prisoners. The towns of Serafimovich, Vologda Province; Krasnyy Khuduk, Seroglazovka, Dosang, Astrakhan Province; Krasnovodsk, Cheleken, Nebit-Dag, Turkmen Republic; Shchekino and Lipki, Tula Province, 3,000 prisoners work gas deposits at bore holes. In Kitsan, Moldavian Republic, 1,000 prisoners quarry marble. Testimony of the Prisons Research Center, A. Shifrin (Israel).

III. The heavy, chemical, and wood pulp industries

Slave labor is very suitable in the Soviet system of economic exploitation for conducting work-site operations in heavy industry. For example, prisoners assemble radiators for the "Moskvich" automobile factory in Moscow, according to inmates at the Tenth Dubrovlag camp, Mordvidian Autonomous Republic, Zubova Polyana District, Es-

tablishment ZhKh-385/10. Testimony of S. Karavans'kii (USA).

Besides, I know that in Lviv on Stryi Street, there is Camp No. 48 (Lviv, Establishment VL-315/48), where the prisoners make motorized agricultural machines. The Prisons Research Center also has data on the following camps: Camp 62/4, city of Gorky, Establishment UZ-62/4. Prisoners work in the unhealthy paint shop of the automobile plant. Camp 62/12 Gorky Province, city of Bor, Establishment UZ-62/12. Prisoners work in a plastics and glass factory; Camp 154/12, Vologda Province, city of Volzhskii, Establishment YaR-154/12. 1,200 prisoners work in the tractor plant; Camp 15/2, Byelorussian Republic, city of Bobruyski, Establishment 15/2. 1,000 prisoners work at the rubber-tire plant; Minsk, Mogilev Highway. Near the automobile plant "Severnyi Poselok" (North Settlement) there is a new prison for women, who work at the Minsk Automobile Factory; Camp 48/9, Chelyabinsk Province, city of Bakal, Establishment YaV-48/9. 1,300 prisoners work at the metal-working shop; Soroka, Moldavian Republic. 1,000 prisoners make superphosphates; Novaya Lyalya, Sverdlovsk Province. 1,000 prisoners from Camp UShch-349/41 work at the paper mill.
Evidence of the Prisons Research Center: A. Shifrin (Israel).

IV. Light industry

Prison labor is used readily in light industry, which makes consumer goods. I worked in Camp 385/1, Mordvidian Autonomous Republic, Zubova Polyana District, Sosnovka Station, Establishment MZh-385-1. There was a polishing shop, where they polished glass parts (hangers) for electric mirrors. Political prisoners worked here. This shop still exists. Live-in prisoners work here. I also worked at the furniture factory at Camp 385/11, Mordvidian Autonomous Republic, Zubova Polyana District, Yavas Station, Establishment ZhKh-385/11. The factory is still operational and prisoners work there. At Yavas Station, I also worked in a garment factory in Camp 385/4, Mordvidian Autonomous Republic, Yavas Station, Establishment ZhKh-385/4. Women prisoners also worked there, making uniforms for the militia, railroad workers, etc.

In Women's Camp 385/3, for women political prisoners, Mordvidian Autonomous Republic, Ten'gi District, Barashevo Station, Establishment ZhKh-385/3, the women made gloves, which were then sold as specialties in all of the USSR. Testimony of N. Strokata (USA). This witness testifies to the existence of a women's camp at Rostov, Rostov Province, Tunnel'skaya ulitsa (Tunnel Street), Establishment 398/19, where women work in a packing plant.

From the testimony of prisoners whom I met at a stopover, I know that in Camp 385/19, Mordvidian Autonomous Republic, Zubova Polyana District, settlement of Lesnoye, Establishment ZhKh-385/19, the prisoners make and polish watch casings ordered by the Sverdlovsk Clock Factory. The products of this factory are exported to England. The witnesses to this are the prisoner Yu. Vudka (Israel), K. Lyubars'kii (Munich), and M. Budulak-Sharygin (England).

In the city of Vladimir, Camp No. 2, city of Vladimir, Establishment Od-1/St-2) the prisoners worked and still work in the rooms where they sleep and eat, assembling triodes and resistors (radio parts) for the Second Moscow Radio Plant. Besides, in this prison, the prisoners make (Stamp out) zippers and electronic parts. Witness: S. Karavans'kii (USA). From the testimony of prisoners, I know of the following: *Chistopol' Prison* (422950, Tatar Autonomous Republic, city of Chistopol', Establishment UZ-148/4), where the prisoners make wrist watches and alarm clocks in the rooms in which they live.

Odessa Prison (290059, Odessa-59, Establishment YuG-311/76, where there are women's and children's camps. The women work in the textile mill and the children make consumer metal products.

Lviv, Shevchenko Street. There is Camp VL-315/30 in which 1,500 prisoners work at the furniture factory.

From the materials of the Prisons Research Center, we know of the following:

Leningrad. Inmates from the prison work at the cardboard factory that produces boxes for the shoe firm "Skorokhod" (Fast Walker) on the Arsenal Embankment (Arsenal'skaya Naberezhnaya). Address of the prison: Leningrad, IZ-45/1.

Leningrad Province. In the Metallostory (Metal Construction) Camp, prisoners make door locks and mattress springs; in the Ul'yanovka and Volkhov camps, 1,200 men and 1,500 women work in the garment factories.

Minsk. Near the bus stop "Proteznyi Zavod" (Prosthetics Factory), there is a camp of 3,000 persons who work in the furniture factories.

Bobruysk, Byelorussian Republic. On Bokhorevskaya Street there is a children's colony that makes furniture and cardboard packing cases.

Orsha, Byelorussian Republic. There are two camps: UZh-15/12 and UZh-15/6 where the prisoners make metal spoons, knives, and forks.

Irpen', near Kiev. The camp makes radio parts. 2,000 prisoners.

Korosten', Ukraine. 2,000 prisoners make furniture and electrical apparatus.

Nizhnil Tagil, Sverdlovsk Province. 300 prisoners in camp UZhch-349/13 make consumer goods: locks, mattresses.

Beyuk Shor, Azerbaidzan Republic. In Camp UA-38, 300 prisoners make inlaid products as well as miniature casings for jewelers' goods, and the parlor game "Shesh-besh," which is for export.

Achinsk, Krasnoyarsk Territory. 1,000 women prisoners work in the garment factory.

Ul'yanovsk, 600 women in Camp YuI-78/2 make ferrite cells for the computer factory.

Novyi Oskol, Belgorod Province. 1,000 women prisoners in Camp YuS-321/4 work in a textile mill.

Novokuznetsk, Kemerovo Province. 1,000 women work in a knit-goods factory.

Garku, near Tallin, Estonia. 300 women prisoners make buttons.

Rzhev, Kalinin Province. 500 inmates in a high-security (severe discipline) prison assemble electric switches in the rooms in which they live.

Evidence of the Prisons Research Center: A Shifrin.

V. Food industry

Shikotan Island, Kurile Islands. 6,000 women prisoners work in a cannery that makes preserves and packs red caviar.

Testimony: A. Shifrin (Israel).

Now, what does the law say? The law says, "All goods, wares, articles, and merchandise mined, produced, or manufactured wholly or in part in any foreign country by convict labor or/and forced labor or/and indentured labor under penal sanctions shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited."

I tell the people in Treasury Department that it is prohibited. The regulations say clearly this, that if the Commissioner of Customs finds at any time that information available reasonably but not conclusively indicates it, they must prohibit. Reasonably, not conclusively.

We have talked to people, tractor generators, wood products, babushka dolls coming in from the Soviet Union made on the backs of slave labor, political dissidents, Christians, Jews, people who want freedom, and yet we are still allowing that into this country.

Mr. Speaker, the provision that we have in this law would require Customs people and the people at the Department of Treasury to prohibit these goods from coming in. Clearly, Mr. Speaker, this legislation will do it. It is a crime and a blot and a moral crime that we have not done it.

I am pleased with the support of the committee, Mr. HOYER and the others, and of course the chairman and so many others on the Senate side. This was unanimous in our conference that with this language we can do it.

The pertinent statute and regulations follow:

I. STATUTE

Section 307 of the Tariff Act of 1930 (19 U.S.C. 1307) provides as follows:

All goods, wares, articles, and merchandise mined, produced, or manufactured wholly or in part in any foreign country by convict labor or/and forced labor or/and indentured labor under penal sanctions shall not be entitled to entry at any of the ports of the United States, and the importation thereof is hereby prohibited, and the Secretay of the Treasury is authorized and directed to prescribe such regulations as may be necessary for the enforcement of this provision. The provisions of this section relating to goods, wares, articles, and merchandise mined, produced, or manufactured by forced labor or/and indentured labor, shall take effect on January 1, 1931; but in no case shall such provisions be applicable to goods, wares, articles, or merchandise so mined, produced, or manufactured which are not mined, produced, or manufactured in such quantities in the United States as to meet the consumptive demands of the United States.

"Forced labor," as herein used, shall mean all work or service which is exacted from any person under the menace of any penalty for its nonperformance and for which the worker does not offer himself voluntarily.

II. REGULATIONS

19 CFR 12.42(e)

"If the Commissioner of Customs finds at any time that information available reasonably but not conclusively indicates that merchandise within the purview of 307 is being or is likely to be imported he will promptly advise all district directors accordingly and the district directors shall withhold release of any such merchandise pending further instructions."

Mr. ROYBAL. Mr. Speaker, I yield 3 minutes to the gentleman from Hawaii [Mr. AKAKA].

Mr. AKAKA. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of H.R. 3036, the conference report on the Treasury, Postal Service, and General Government.

I first want to applaud my chairman, Mr. ROYBAL, for his able leadership and also the ranking member, Mr. SKEEN of New Mexico, for his help on the subcommittee, and every member of the subcommittee.

I look upon the committee as being a great help to the people of our country as they responsibly legislate, as we did on this bill.

Mr. Speaker, I rise in strong support because the committee has looked at the dire needs of our country in all the areas under its jurisdiction and has done a good job, a responsible job, in seeing that appropriations are proper.

Mr. Speaker, I rise in support of the conference report on H.R. 5798, the Treasury, Postal Service, and related agencies appropriations bill for fiscal year 1986.

First, let me commend the chairman of our subcommittee, Mr. ROYBAL, and our ranking member, Mr. SKEEN, for all their hard work on the bill we have before us today. Few Members are aware of the many hours of work and the countless hearings that have been devoted to preparing this bill. I am proud to be a member of this subcommittee, and I thank my fellow members of the subcommittee and our staff for all their hard work.

The bill we have before us today is a good bill that every Member of the House should support. It contains funding for many essential operations of Government, most notably, the Treasury Department and the Executive Office of the President. One item in the Treasury Department that I want to note is a staffing increase for the Customs Service. This staffing increase is long overdue. For years, the Customs Service has been functioning at pre-1980 staffing levels. We all know that the Customs Service is on the battle line when it comes to fighting drugs.

Mr. Speaker, funding for the Customs Service is just one of the thoughtful actions our subcommittee has taken while still presenting to you a bill that is fiscally responsible.

Once again, I want to thank Chairman ROYBAL for his leadership on this legislation and urge my colleagues to support the conference report.

□ 1050

Mr. SKEEN. Mr. Speaker, I yield 5 minutes to the gentleman from Minnesota [Mr. FRENZEL], the watchdog of the budget.

Mr. FRENZEL. Mr. Speaker, I am responding to some comments made by the distinguished gentleman from Virginia, a member of the subcommittee, Congressman WOLF. I intend later in the proceedings to make a point of order against the amendment that the gentleman from Virginia was talking about and which he has had such a strong position in promoting. In my judgment, his work has been not only effective, but meritorious, because he makes a good point.

In making my point of order, I do so with some trepidation. I do it, however, at the request of the Department of the Treasury, which is charged with carrying out the intention of the basic law to which the gentleman from Virgina referred.

The Department and I are in a difficult position on this matter. We know that there is slave labor in the U.S.S.R. and we do not want to stand in the way of enforcing any of our laws or even other efforts to identify and to try to stop the use of slave labor. There is already in this bill, I might note, a provision directing enforcement of that law, and I think it is a good provision and I believe that the Treasury is going to do its dead-level best to carry it out.

The amendment, however, is a forcing amendment. It takes a list devised by the Commissioner of Customs in 1981—and I would stipulate the babushka dolls are not on it—and says we can accept no more of those after December 31 except in the case of conclusive showing that they are not produced by slave labor. That reverses the normal evidentiary test and it seems to me is too strong and too forcing a statement.

When the Commissioner of Customs wanted to enforce this list a couple of years ago, the Secretary of the Treasury consulted with the CIA, and CIA Director Casey subsequently directed two letters to then Secretary Regan, one on the 16th of May, 1984, and one on the 17th of January, 1985. I would like to insert them in the record, but before so doing, I would simply note that the CIA finds extensive use of slave labor, but Mr. Casey says in letter No. 1:

Accordingly, I have to advise you that the Agency's information, while convincing as to the policy and practices . . . with respect to forced labor, could not now be provided with sufficient precision to have probative value in a legal proceeding with respect to a particular product. You can be assured that we will continue our work * * *.

The 17th of January letter follows that up, following a report from the ITC, which supported the finding of the first letter, indicating that the CIA will continue to keep working on the matter.

The full text of the letters follows:

THE DIRECTOR OF CENTRAL INTELLIGENCE,
Washington, DC, May 16, 1984.

Hon. DONALD T. REGAN,
Secretary of the Treasury,
Washington, DC.

DEAR DON: This letter is written in connection with your statutory responsiblilities to prevent the entry into the United States of foreign goods which are produced by convict, forced or indentured labor. We have a good deal of information that the Soviet Union makes extensive use of such labor. We estimate that there are approximately 2 million forced laborers in camps. An additional 2 million or so forced laborers are not confined and are mostly involved in construction.

We have in the past at the request of the Commissioner of Customs furnished information concerning the production of goods with forced labor in the Soviet Union. Although there is convincing evidence that convict and forced labor is used extensively in the Soviet Union, it is fragmentary with respect to specific products. Our information does not enable us to estimate the proportion of total Soviet production of individual products which comes from forced labor. Nor is our information sufficiently precise to allow us to determine whether and to what extent the products of forced labor are exported to the Unitd States.

I am also concerned that the need to make such evidence as we have publicly available, as would almost certainly be necessary for you to carry out your responsibilities, would endanger intelligence sources and methods.

Accordingly, I have to advise you that the Agency's information, while convincing as to the policy and practices of the Soviet Union with respect to forced labor, could not now be provided with sufficient precision to have, probative value in a legal proceeding with respect to a particular product. You can be assured that we will continue our work in this area and will keep your Department currently advised if we are able to develop more satisfactory and precise evidence that might be helpful in preventing the entry into the United States of goods produced by convict, forced labor, or indentured labor.

Yours,

WILLIAM J. CASEY.

THE DIRECTOR OF CENTRAL INTELLIGENCE,
Washington, DC, January 17, 1985.

Hon. DONALD T. REGAN,
Secretary of the Treasury,
Washington, DC. 20220

DEAR DON: In the wake of the release of the ITC report on the use of forced labor in foreign countries to produce goods for export, I thought I should write you to update the status of our research on this issue. Despite continued monitoring, we are unable to obtain sufficient facts to make a solid case that any particular good we receive from the USSR is produced by convict, forced, or indentured labor.

You will recall that on 16 May I sent you a letter which stated that according to our most recent analysis 3 percent of total Soviet labor is forced. That analysis remains valid, but I can find nothing in the ITC report that indicates the availability of more specific data.

Yours,

WILLIAM J. CASEY.

The trouble, also, with the amendment is that if the Treasury were not to go forward as forced, the entire department or subdepartment on which we rely to do the work to carry out this section of the law would literally be repealed.

I have discussed this matter at length with the Treasury. Those who purport to speak for the Secretary tell

me that he expects to work harder on this program and hopes to have some action within the first half of the next year. I cannot guarantee that anymore than they can, but I believe it is their intention to try to act under section 307 and enforce the law, lay it on them. The word I get from them is that they have received the message that Congressman WOLF, Congressman HOYER and many others have effectively carried. Treasury knows it is on borrowed time and I think does fully intend to carry out the law.

In the meantime, however, the amendment, in my judgment, is too harsh. I understand and sympathize with the frustration of Congressman WOLF and his supporters. I do not blame them. I do, however, invite the House's attention to the timing of the situation which will soon occur, and it would seem that if we are going to take strong action against the U.S.S.R. in any area, we ought to be on most solid ground before we do so and have a strongly provable case.

If my point of order is sustained, I believe that Congressman WOLF, Congressman HOYER and others will still have done the job in demanding the Treasury begin to enforce this law, and I think they will be successful.

Mr. ROYBAL. Mr. Speaker, I yield 4 minutes to the gentleman from Texas [Mr. PICKLE].

Mr. PICKLE. Mr. Speaker, I am grievously concerned about the appropriations in this measure as they affect the Internal Revenue Service. All of us know that we have faced a crisis in this country during the past year with respect to the Internal Revenue Service. In city after city we have been holding special hearings of the Oversight Subcommittee of the Committee on Ways and Means, trying to find out some way to shore up the weak spots in the performance of the Internal Revenue Service.

All through the year, we have kept in close touch with the Appropriations Committee in an effort to get added funds for the Internal Revenue Service. I pay my respects to Chairman ROYBAL and his committee because it kept us from making the cuts earlier called for by the administration. And on the surface of this bill, it looks like we are getting an additional $176 million for Internal Revenue Service. I am advised, though, that that is not so, and that actually we will only be getting about $76 million, because we are losing about $100 million, just to avoid a 5 percent pay cut for all Internal Revenue Service personnel. If that is so, I am informed that the Internal Revenue Service will be in a position where it will lose some 600 people. Now, if that is the case, we should be providing more funding for the IRS. We ought to be adding 600 or 1,200 people, or more, across this land instead of cutting 600.

Now, the Internal Revenue Service may have the choice of either hiring people or spending money on equipment. But it is a cruel choice if the Service is put in that position. If, in fact, this conference report does put the Internal Revenue Service in that position, it would seem to me that we ought to ask for some kind of supplemental report later. We simply cannot decimate the ranks of the Internal Revenue Service and hope to collect the revenue needed to maintain our Federal Government. The Internal Revenue Service is the only agency of Government other than the Customs Service that raises any money for us. And yet, if we turn around and cut its resources, then we have decimated the ability of the Internal Revenue Service to serve its purpose.

I am grieved that the Internal Revenue Service has not brought this to our attention. All through the year, we tried to ask them, "Do you need more help?" and they stonewalled it down there just because the OMB said, "Well, we have got to make this 5-percent ut." Then they send up their revised request after the House has already made its appropriation decision.

Mr. COLEMAN of Texas. Mr. Speaker, will the gentleman yield?

Mr. PICKLE. I yield to the gentleman from Texas.

Mr. COLEMAN of Texas. I want to advise the gentleman that it is no different than what the administration has done with Customs every year since I have been in the Congress. They did exactly the same thing with IRS.

Let me read you some numbers real quick. The administration had originally proposed to cut 1,254 positions from the IRS, and the problem with any committee in the Congress that tries to turn that around is that you start not from zero in trying to help IRS or any other agency, you start, in this case, from a minus 1,254, not zero, because that was the administration's request.

Let me tell you, though, that the funding level in the conference agreement provides for 1,800 additional IRS staff positions. The administration has indicated it will accept now the increased IRS staffing level.

I just want to advise the gentleman of that fact. We are not happy with the overall allocation of dollars, but we had to compromise with the other body on that issue.

Mr. PICKLE. But the net of it is, although you may add some extra funds, about all you are doing is you are just treading water, you are hoping to keep even from last year.

Now, I am just saying if the net effect of it is that we are going to end up cutting the Internal Revenue Service by over 600 people, then that cannot be accepted; and some way or another, we have got to ask for supplemental funds later or else everybody in Government will have to recognize that the Internal Revenue Service does not have the personnel to do the job, and we will not have the money to run the Government.

Mr. COLEMAN of Texas. I want to try to assure the gentleman we added 600, we did not cut 600.

Mr. SKEEN. Mr. Speaker, I yield myself such time as I may consume, and I would like to ask the chairman a question.

In regard to this same discussion that we have been having that the gentleman from Texas alluded to, Mr. Chairman, I know that we added some $76 million to the IRS budget, and it was our understanding, I think, on the committee, that that was for personnel. Is that not correct?

Mr. ROYBAL. The gentleman is correct.

Mr. SKEEN. I have some quarrel with the administration, too, or with the Department. And we come back to now, the IRS is telling us there is some $42 million they have discovered. They are a big agency. They have discovered that out of that $76 million increase, some $42 million could necessarily have to go to mandatory add-on costs, such as cost increases, postage, rent, and so on. That was not our intent. If they wanted that, they should have come to us with a budget requesting that. I appreciate the chairman's response, because we were trying to strengthen IRS. It is ridiculous leaving $80 billion on the table now because we do not have enough people to do the audits and enough equipment.

Mr. PICKLE. If the gentleman will yield, I respect the Appropriations Committee for your efforts, because you have tried to get funds, but because of the action of OMB, we are ending up now with almost a minus-personnel Internal Revenue Service. When you have these big snafus over the country, the Congress ought to remember that we just do not have the trained personnel to carry out our functions, and that ought to be embarrassing for all of us.

Mr. SKEEN. I thank the gentleman for his comments.

Mr. Speaker, I yield 1 minute to the gentleman from Pennsylvania [Mr. WALKER].

Mr. WALKER. I thank the gentleman for yielding.

Mr. Speaker, it is my understanding that this particular bill is $951 million over the President's budget request, it is $48 million over last year, it is $289 million over the congressional budget conference report. It is my understanding, having just spoken to a representative of the administration, that they are threatening to veto this bill.

I think that Members ought to be advised that this is a bill that probably will be vetoed and, at least in the opinion of this Member, it should be vetoed in large part because the spending is far too high.

I think that at a time when we are out here posturing on questions of spending that it is high time that we begin to rein ourselves in. Here is a good place to start.

Mr. SKEEN. Mr. Speaker, will the gentleman yield?

Mr. WALKER. I yield to the gentleman from New Mexico.

Mr. SKEEN. I appreciate the gentleman finding all of this information out, and I also appreciate him bringing it down here to us, and so forth. But we have been threatened with a veto every day we have been in here. I would like to ask the gentleman, how much is the discretionary spending in this bill now under what it was last year?

Mr. WALKER. My understanding is that this is $48 million over last year's expenditures.

Mr. SKEEN. On the discretionary. These are mandatory. What is the discretionary?

Mr. WALKER. I would say to the gentleman that I, for one, am concerned about the broad base of the spending.

Mr. SKEEN. We are all concerned. Will the gentleman answer the question?

Mr. WALKER. Well, I am concerned about the fact that we have $48 million more than last year.

Mr. SKEEN. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. ROYBAL. Mr. Speaker, I yield such time as he may consume to the gentleman from Texas [Mr. COLEMAN].

Mr. COLEMAN of Texas. Mr. Speaker, I rise in strong support of the conference report on H.R. 3036 and I want to congratulate the chairman of our subcommittee, Mr. ROYBAL, and our ranking minority member, Mr. SKEEN, for the fine work and leadership they have contributed in drafting this report.

Mr. Speaker, the subcommittee went to conference with the realities of the massive budget deficits of the last 5 years. We also kept in mind the continued influx of illegal narcotics, contraband, and unreported imports which costs the Nation both lives and revenue. In this vein, the conference committee reported a bill which provides for 623 new Customs personel to protect our borders from the illegal flow of drugs and imports. These increases will also provide increased revenue for the Nation's Treasury through better enforcement of our trade laws. For every dollar we spend on Customs, we receive $20 in return through increased enforcement of our trade laws, and this bill will help achieve this goal.

This bill turns the tide of the last 4 years in which this Nation has let its defenses down along our borders. Every year I have served in this Congress, the administration, as usual, has proposed gutting the Customs Service out some false sense of economy and efficiency. And every year, the Congress has fought to maintain the current years' level. This year, the administration proposed cutting the Customs Service by an additional 887 positions. But this year the Congress not only said no, the Congress said what the Customs Service needed was not less but more to do its job. I realize we are in a time when we must try and do more with less, but in the case of controlling imports and stopping drugs, this is just false economics. Therefore, the committee and the Congress not only restored the 887 positions Reagan cut, but we added an additional 623. This amount is below the House passed level of 800, which I would have preferred, but it represents the middle ground the between the House and Senate, and clearly it is a reversal of the previous policy of defeat along our borders.

The bill also contains a provision which places a floor on the amount of Customs personnel which must be hired in fiscal year 1986. In the past, the Congress has approved funding for a specific number of personnel and yet the Customs Service has hired less than that number. In most cases, the Customs Services has been from 300 to 500 positions below the amount mandated by Congress. The Office of Management and Budget often instructs Customs and other agencies to ignore Congress' intentions. To do so again will be a violation of the law.

The bill also includes a provision which prohibits the use of any funds to close or consolidate any region, district, or port, or any duty assessment or appraisment center of the Customs Service. The Customs Service has continued its efforts to reduce and consolidate the number of districts and ports in every part of the Nation, but has never adequately informed Congress what its long range plans are and specifically which areas will be affected in these reductions. In lieu of such a plan therefore, the committee saw no other alternative but to prohibit any such activity until the Customs Service properly comes before the Congress with its proposals.

The conference also addressed the hard choice of revenue forgone for the Postal Service. Many worthwhile groups and organizations such as the blind, the American Cancer Society, and veterans organizations receive a subsidized mail rate through the revenue forgone appropriation. The administration sought no funding for the program in fiscal year 1986. The House approved full funding at $960 million. The House conferees, although strong supporters of the program, realized the need for deficit reduction in every account, and therefore agreed to compromise with the Senate, providing $820.1 million.

The committee also sought to provide the necessary funds for the Internal Revenue Service, which as we all know has been plagued this year will lack of adequate resources to process tax returns causing unprecedented backlogs and delays. The conference agreed to a figure of $3.7 billion for the IRS, $1.9 million less than the House figure, and $75.9 million more than the Senate. This amount was supported by the IRS and the administration.

Mr. Speaker, throughout the bill the conference committee sought to stay as close to the House-passed figures as possible while providing for economy and efficiency, as well as giving the agencies under our jurisdiction the tools to do the jobs entrusted to them. We are under the House-passed bill by $83.5 million our 302(b) budget allocation by $324 million. This is a good bill and should be adopted by the House.

Mr. ROYBAL. Mr. Speaker, I yield myself the remainder of my time.

Mr. Speaker, I wish to thank the gentleman from New Mexico [Mr. SKEEN] for the excellent work that he does on the committee. He is a new member of the committee but is definitely doing a most excellent job.

I would also like to thank all of the members of the committee. They are most dedicated. They are always present. They always participate. Without them, of course, we would not be bringing to this House a conference report that I believe is a very excellent one and one that has not had anyone asking to dissent in any way, that is, members of the committee.

But I would like to thank still another gentleman of that committee, and that is the gentleman from Massachusetts [Mr. CONTE], who is probably the most knowledgeable member of the Committee on Appropriations, for his advice and the excellent work that he does and the help that he has given me and the members of the committee.

Mr. RUDD. Mr. Speaker, I rise in support of the Treasury Department appropriations conference agreement, and specifically the provisions which call upon the Office of the Assistant Secretary of the Treasury for Enforcement and Operations to bar the importation of goods produced in the Soviet Union by convict, indentured, or forced labor.

While the Trade Act of 1930 makes it clear that the United States should have no part whatsoever in encouraging or subsidizing forced labor, a 1983 Central Intelligence study compiled a list of over three

dozen products made by forced labor for export.

Based on the evidence available, the Customs Service recommended to the Secretary of the Treasury in late 1983 that a ban on Soviet slave labor products be enforced. Yet, despite the Tariff Act, and the evidence of the use of forced labor in the Soviet Union, the Treasury Department has continued to allow slave labor products to enter this country.

In the past, this body has let it be known that is desires compliance with previously enacted slave labor policies. I am therefore encouraged that this legislation includes strong provisions which will direct the Department of Treasury to enforce this ban.

Mrs. LLOYD. Mr. Speaker, I intend to vote for this conference report. Though the funding is above the President's request, the difference lies mainly in three important areas that I believe need the level set by the conferees.

While the Congress is debating trade and tax reform, the administration is requesting inadequate funding for both the IRS and the Customs Service. A report just this week indicated that voluntary tax compliance is down. While this is surely due in part to frustration with the current code, it occurs to me that it just might also be because enforcement is being neglected. In fact, the administration had proposed to cut over 1,000 positions from the IRS. This report provides for 1,800 additional IRS staff positions. The first step toward a fair tax is one that is equally enforced and that can only be accomplished with adequate staff.

The same can be said for the Customs Service. The adminstration has repeatedly told us existing trade laws can address the threat of imports. Americans, particularly in the textile industry in my district, are losing jobs because imports are pouring in. The House has passed legislation to protect these jobs, but the administration opposes that effort saying agreements are already in place. Those agreements are meaningless if they are not enforced and they cannot be enforced without Customs Service personnel. This administration had proposed a cut of 887 positions. That prospect is staggering. The Government Operations Committee has reviewed the enforcement of textile and apparel import quotas and has found that, despite an elaborate system of international agreements, the U.S. has failed to prevent import disruption of its domestic markets. Further, we have failed to stop the evasion of those agreements. Because of increasing workloads and staff shortages, the Service is unable to prevent violations of the restraint system causing serious injury to the domestic textile industry. We need to increase, not decrease, our Customs Service staff. They produce revenue, $21.06 for every appropriated dollar in 1984. I'm extremely pleased that this report provides 473 positions, bringing the total to over 14,000.

I urge the adoption of the report and would call on the President to see the consistency of his policies in it.

Mr. STARK. Mr. Speaker, I would like to thank the conferees of the Appropriations Committees of the House and the Senate for including language in their report on Treasury, Postal Service and general Government appropriations indicating to the Customs Service that additional customs positions should be assigned to the San Francisco district. Under the leadership of Representative ROYBAL and Senator ABDNOR, the conference committee took an important step in helping the bay area customs office obtain some of the additional staff positions which they so desperately need to keep up with the ever-increasing amounts of customs work in the area. I appreciate my colleagues' help.

I would like to urge the Customs Service to follow the suggestion of the appropriations conferees and assign sufficient additional staffers to satisfy the needs of the bay area customs office.

Mr. FRENZEL. Mr. Speaker, I rise in opposition to the conference report.

When an appropriations bill goes to conference, it is understood that some compromise must be made. This conference, however, appears to have caved in completely. The House bill was at $13.2 billion. The Senate bill was at $12.9 billion. Conferees bravely agreed to hold the line at a full $13.2 billion.

Even the House's one money-saving provision, a modest reduction of 2.65 percent from a few programs aimed at coming close to the House budget target, fell by the wayside in conference. The only savings contained in this report is a 14-percent cut in the Postal Service's Federal funding.

Mr. Speaker, our budget crisis is real. We can no longer accept loose controls on spending such as those contained in this report. I urge my colleagues to join me in voting against the conference report on H.R. 3036.

Mr. DORGAN of North Dakota. Mr. Speaker, one of the best ways to reduce the Federal deficit is to collect taxes owed. Yet, the administration's current policy of cutting funds for Internal Revenue Service and Customs Service enforcement and collection would stand this truism on its head.

The IRS recently reported $8.5 billion in active delinquent accounts, with accounts receivable totaling $30 billion. Altogether we face a tax gap of some $90 billion this year, an amount representing the total of uncollected revenues from only legitimate businesses.

When the IRS spends a buck on tax enforcement, it gets 5 in return. Nonetheless, in a time of $200 billion deficits and nearly half that in uncollected revenues, the White House proposed to cut the IRS work force by 1,254 positions. Fortunately, the conferees on the Treasury appropriations bill have rejected this upside-down logic and increased IRS and Customs staff by about 1,800 and 600 workers, respectively.

A recent Government Operations Subcommittee investigation by our colleague, Representative DOUG BARNARD, showed why weaker IRS enforcement is not only bad tax policy but an invitation for more "dirty money" laundering and drug dealing, too. I include an article on this study and urge my colleagues to support fair and effective enforcement by the IRS. Our law-abiding taxpayers deserve no less. (Article follows from the November 5, 1985 Washington Post.)

[From the Washington Post, Nov. 5, 1985]

IRS SEEN AS LAX ON CASH TRANSFERS

(By Kathy Sawyer)

In the world of "dirty money, "public attention has focused on the need for better policing of big banks. Now congressional investigators are looking at another villain—The Internal Revenue Service.

The Treasury Department has fined six banks this year for failure to fulfill reporting requirements that could tip authorities to large-scale money laundering linked to drug trafficking and other crimes.

But House investigators now say one of Treasury's own—the IRS—has left open a convenient secondary money-laundering route and has failed to use its legal authority to develop criminal investigations in the area.

Under the Bank Secrecy Act, the IRS is responsible for assuring that thousands of "secondary financial institutions"—such as check-cashing facilities, finance companies and precious metal or coin dealers—report all transactions of more than $10,000.

But the agency "continues to devote grossly insufficient resources" to the task "and its efforts lack coordination and consistency," Rep. Doug Barnard, Jr. (D-GA.), a Government Operations subcommittee chairman, wrote to IRS Commissioner Roscoe L. Egger, Jr.

"At the current level of resources and commitment, the currency transactions reporting program cannot succeed in meeting its intended purposes of detecting criminal activity and unreported income in the underground economy," Barnard said in an Oct. 25 letter.

Subcommittee investigators found that by December 1984, the IRS had identified only 3.014 of an estimated 15,000 businesses involve in such transactions.

They also found that the agency conducted only 644 compliance checks at such businesses in 1984, less than one-third the number made in 1981.

Accurate reports on large cash transactions can be useful in criminal investigations—as demonstrated by a 1982 internal IRS audit obtained by the subcommittee, an investigator said.

In samplings of two IRS districts—Cincinnati and Louisville—where about 5,000 currency transaction reports were filed from 1976 to 1980, the report found 42 persons involved in three or more transactions. Of these, 10 individuals involved in 57 transactions totaling $1.3 million had no record of ever filing tax returns.

One individual who had filed a tax return in 1980 had 27 currency transactions in 1980 totaling $1.2 million, yet had reported an adjusted gross income of only $2,295. This person also had a number of large transactions in 1978 and reported a small income then. For others with large transactions reported income of less than $10,000 on their 1980 tax returns.

Five in the group had criminal records and two were under investigation for narcotics violations. But officials had made no use or minimal use of the transaction reports to develop criminal investigations, auditors found.

The IRS declined immediate comment but said Egger will reply directly to Barnard.

Mr. ROYBAL. Mr. Speaker I yield back the balance of my time.

The SPEAKER pro tempore (Mr. MURTHA). All time has expired.

The question is on the conference report.

The question was taken; and the Speaker pro tempore announced that the ayes appeared to have it.

Mr. WALKER. Mr. Speaker, I object to the vote on the ground that a quorum is not present and make the point of order that a quorum is not present.

The SPEAKER pro tempore. Evidently a quorum is not present.

The Sergeant at Arms will notify absent Members, and the Clerk will call the roll.

The question was taken; and there were—yeas 237, nays 171, not voting 26, as follows:

[Roll No. 398]

The Clerk announced the following pair:

On this vote:

Mr. MCKINNEY for, with Mr. SILJANDER against.

Ms. KAPTUR and Messrs. SKELTON, LOWERY of California, and BEDELL changed their votes from "nay" to "yea."

□ 1140

So the conference report was agreed to.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. MOODY. Mr. Speaker, on rollcall No. 398, on the conference report on Treasury, Postal Service and General Government Appropriations for 1986, I was unavoidably detained. Had I been present, I would have voted "aye."

AMENDMENTS IN DISAGREEMENT

The SPEAKER pro tempore. The Clerk will designate the first amendment in disagreement.

The text of the amendment is as follows:

Senate amendment No. 3: Page 2, line 14, after "Annex" insert ": *Provided further*, That none of the funds contained in this or any other Act shall be available for the salaries and expenses for the Office of the Assistant Secretary of the Treasury for Enforcement and Operations, after March 1, 1986, unless United States Customs Service authorizing legislation is passed by the Congress."

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendment of the Senate numbered 3 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the follow: "*Provided*, That none of the funds appropriated by this Act shall be available for the salaries and expenses of the Office of the Assistant Secretary of the Treasury for Enforcement and Operations if any of the following products of the Union of Soviet Socialist Republics are entered, or withdrawn from warehouse, for consumption in the customs territory of the United States after December 31, 1985, unless the Commissioner of Customs is provided with sufficient information pursuant to 19 CFR 12.43 attesting to the fact that the products have not been produced, manufactured, or mined (in whole or in part) by forced labor, convict labor, or indentured labor under penal sanctions:

"(1) gold ore,

"(2) agricultural machinery,

"(3) tractor generators,

"(4) tea,

"(5) crude petroleum,

"(6) motor fuel,

"(7) kerosene, and

"(8) any other product that the Commissioner of Customs determines to have been produced, manufactured, or mined (in whole or in part) by forced labor, convict labor, or indentured labor under penal sanctions: *Provided further*, That none of the funds appropriated by this Act shall be available to hinder or impede the Commissioner of Customs in making determinations under subsection (8) of the preceding proviso".

Mr. ROYBAL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

POINT OF ORDER

Mr. FRENZEL. Mr. Speaker, I make a point of order against the amendment.

The SPEAKER pro tempore. The Chair recognizes the gentleman from Minnesota [Mr. FRENZEL].

Mr. FRENZEL. Mr. Speaker, I make a point of order that the amendment is not germane to the Senate amendment numbered 3 under clause 7 of rule XVI of the rules of the House.

Senate amendment numbered 3 provides that no funds shall be available for salaries and expenses for the Office of the Assistant Secretary of the Treasury for Enforcement and Operations after March 1, 1986, unless Congress passes authorizing legislation for the U.S. Customs Service.

The proposed substitute amendment, on the other hand, prohibits funding of that office unless seven specific categories of products and other categories determined by the Commissioner of Customs to be produced by slave or convict labor in the Soviet Union are barred entry into the United States after December 31.

The amendment clearly raises new issues and involves subject matter quite different from the Senate amendment. It also constitutes legislation specifically to prohibit certain imports within the jurisdiction of another committee.

For these reasons, the point of order should be sustained that the proposed amendment is not germane.

□ 1150

The SPEAKER pro tempore. Does any other Member wish to be heard on the point of order?

Does the gentleman from California [Mr. ROYBAL] wish to be heard on the point of order?

Mr. ROYBAL. Mr. Speaker, I rise in opposition to the point of order at this particular point, and I just would like to state that the original Senate amendment provided that none of the funds contained in this or any other act shall be available unless the U.S. Customs Service authorizing legislation is passed by the Congress.

I am not going to ask the Chair to rule on this, but I would like to make a few remarks with regard to the committee's position.

This provision is more restrictive than the amendment in the Senate bill in that, No. 1, it limits the prohibition of funds to those made available by this act only and it does not apply to any other act.

No. 2, the language included in the amendment could appropiately be included in the authorizing legislation designated in the Senate amendment. It, therefore, does not address any additional topic, question, issue, or proposition not committed to committee or conference because the Customs authorizing legislation could contain all of the provisions included in the amendement.

It is the committee's position that the primary purpose of this provision is not to change the scope of existing law. The purpose of this amendment is to compel the U.S. Customs Service to enforce existing laws.

I would like to put the administration on notice that we expect them to start enforcing the law.

Having said that, Mr. Speaker, I concede the point of order.

The SPEAKER pro tempore (Mr. MURTHA). The gentleman concedes the point of order, and the point of order of the gentleman from Minnesota [Mr. FRENZEL] is sustained.

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House insist on its disagreement to the amendment of the Senate numbered 3.

The SPEAKER pro tempore. The gentleman from California [Mr. ROYBAL] is recognized.

Mr. DICKS. Mr. Speaker, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from Washington.

Mr. DICKS. Mr. Speaker, I just want to compliment the committee for the cooperation that it has shown to other Members of Congress who have been concerned about the personnel levels in the Customs Service. I happen to believe that it is one of those situations where the action of the committee and the conference committee will, in fact, improve the operation of the Customs Service, and will certainly help those of us in the Pacific Northwest who have brought this issue to the attention of the chairman. He has really been a champion on this issue, and I just want to compliment him for the work.

The additional personnel, I think, will produce revenues for the Treasury and the Customs Service, and they will certainly help us deal with the serious problems that we have had in the Service.

I just want to compliment the gentleman from California [Mr. ROYBAL] for his leadership.

Also, I want to compliment our good friend, the ranking minority member, the gentleman from New Mexico [Mr. SKEEN], who has also cooperated in this important endeavor.

Mr. SKEEN. I thank the gentleman from Washington.

Mr. DE LA GARZA. Mr. Speaker, will the gentleman yield?

Mr. ROYBAL. I yield to the gentleman from Texas.

Mr. DE LA GARZA. I thank the gentleman for yielding, and I would associate with an echo the words of my colleague from Washington in behalf of those of us on the southern border, and we thank the chairman for this leadership in this effort.

Mr. ROYBAL. I thank the gentleman.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment number 19: Page 6, line 11, after "1986" insert "and shall assign no fewer than forty additional permanent, full time personnel to the Seattle, Washington, Customs District Office, including at least thirty inspectors and ten import specialists".

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendment of the Senate numbered 19 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following: ": *Provided further*, That none of the funds made available by this Act shall be available for administrative expenses to reduce the personnel level of the Customs Service during fiscal year 1986 below an average of 14,041 full time equivalent positions".

Mr. ROYBAL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

Mr. ROYBAL. Mr. Speaker, I ask unanimous consent that Senate amendments numbered 20, 42, 47, 51, 52, 55, 61, 64, and 76 be considered en bloc.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk designated Senate amendments numbered 20, 42, 47, 51, 52, 55, 61, 64, and 76, as follows:

Senate amendment number 20: Page 6, after line 11, insert:

None of the funds made available in this or any other Act may be used to fund more than nine hundred and fifty positions in the headquarters staff of the United States Customs Service in the fiscal year ending September 30, 1986 and the Customs Service shall begin planning to reduce headquarters staff to no more than nine hundred positions by September 30, 1987.

Senate amendment number 42: Page 14, line 2, after "1986" insert ": *Provided further,* That none of the funds made available to the Postal Service by this Act may be used to support in-county second-class rates of postage for any issue of a publication unless more than 50 per centum plus one copy of the total paid circulation is distributed within the county of publication, or the total paid circulation of the publication is under 10,000: *Provided further,* That none of the funds made available to the Postal Service by this Act shall be used to support the mailing of nonsubscriber copies of such publications at the in-county second-class rates of postage at any time during the calendar year in excess of 10 per centum of the total weight of copies mailed to subscribers at the in-county rate during the calendar year".

Senate amendment number 47: Page 18, line 4, after "Affairs" insert ": *Provided further,* That none of the funds made available by this Act or any other Act shall be used to reduce the scope or publication frequency of statistical data relative to the operations and production of the alcoholic beverage and tobacco industries below fiscal year 1985 levels".

Senate amendment number 51: Page 20, strike out line 4 and insert "For additional expenses necessary to carry out the purposes of the fund established".

Senate amendment number 52: Page 20, line 9, after "for," insert "$7,000,000 to be deposited into said fund. The revenues and collections deposited into said fund".

Senate amendment number 55: Page 21, after line 14, insert:

New Jersey:

Newark, Federal Building, Courthouse, $44,975,000

Senate amendment number 61: Page 26, line 23, after "collections:" insert "*Provided further,* That $2,000,000 available herein for design and construction shall be available for transfer to the city of Mesa, Arizona for expenses in connection with the design and construction of a Federal building in Mesa, Arizona:

Senate amendment number 64: Page 28, line 7, strike out "costs associated with" and insert "and associated costs in".

Senate amendment number 76: Page 34, line 2, after "purpose" insert ": *Provided further,* That none of the funds appropriated by this or any other Act shall be used for preparing, promulgating, or implementing new regulations for the 1985 Combined Federal Campaign other than repromulgating and implementing the 1984 regulations for the 1985 campaign. Nothing in this provision shall be construed to apply to the regulations for the 1986 Combined Federal Campaign".

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendments of the Senate numbered 20, 42, 47, 51, 52, 55, 61, 64, and 76, and concur therein.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment number 68: Page 29, after line 18, insert:

NATIONAL DEFENSE STOCKPILE TRANSPORTATION FUND

For the year ending September 30, 1986, in addition to the funds previously appropriated for the National Defense Stockpile Transaction Fund, pursuant to 50 U.S.C. 98a and g(a)(2)(c) and 50 U.S.C. 100(a), notwithstanding the provisions of 50 U.S.C. 98h, an additional $15,000,000 is appropriated, to remain available until expended, for a grant to construct Phase II of the Mines Building at the Mackay School of Mines, University of Nevada Reno, relocate the Generic Center on the Recycling of Strategic Metals and establish the Policy Center on Strategic Materials, including such equipment as the school deems necessary to the conduct of its activities.

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendment of the Senate numbered 68 and concur therein with an amendment, as follows: In lieu of the matter proposed by said amendment, insert the following:

For the year ending September 30, 1986, in addition to the funds previously appropriated for the National Defense Stockpile Transaction Fund, pursuant to 50 U.S.C. 98 a and g(a)(2)(c) and 50 U.S.C. 100(a), notwithstanding the provisions of 50 U.S.C. 98h, an additional $10,000,000 is appropriated, to remain available until expended, for a grant to construct Phase II of the Mines Building at the Mackay School of Mines, University of Nevada, Reno, relocate the Generic Center on the Recycling of Strategic Metals and establish the Policy Center on Strategic Materials, including such equipment as the school deems necessary to the conduct of its activities.

Mr. ROYBAL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment number 71: Page 32, strike out lines 8 to 11, inclusive.

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendment of the Senate numbered 71 and concur therein with an amendment, as follows:

In lieu of the matter stricken by said amendment, insert the following:

SEC. 6. Funds hereafter made available to the General Services Administration for the payment of rent shall be available for the purpose of leasing, for periods not to exceed thirty years, space in buildings erected on land owned by the United States.

Mr. ROYBAL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to

The SPEAKER pro tempore. The Clerk will designate the next amendment in disagreement.

The text of the amendment is as follows:

Senate amendment number 97: Page 54, after line 16, insert:

SEC. 615. The increase in postage rates for nonprofit and certain other mailers announced by the Governors of the Postal Service in Resolution No. 85-7 shall not take effect until January 1, 1986.

SEC. 616. (a) Section 3626(a) of title 39, United States Code, is amended to read as follows:

"(a) In the administration of Subchapters II and III of his chapter, each time rates of postage are established for mail under former sections 4358, 4452 (b) and (c), and 4554 (b) and (c) of this title, the estimated revenues to be received for each class or kind of such mail shall be equal to the direct and indirect postal costs attributable to mail of such class or kind excluding all other costs of the Postal Service.".

(b) This section is effective January 1, 1986.

SEC. 617. If the postage rate delay required by section 615 of this Act causes a shortfall in postal revenues from the amounts which would have been provided by the adjustment contemplated by section 3627 of title 39, United States Code, the Postal Service shall request a supplemental appropriation to avoid placing the burden of that shortfall on unsubsidized mailers.

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendment of the Senate numbered 97 and concur therein with an amendment, as follows:

In lieu of the matter proposed by said amendment, insert the following:

SEC. 616. The increase in postage rates for nonprofit and certain other mailers announced by the Governors of the Postal

Service in Resolution No. 85-7 shall not take effect until January 1, 1986.

SEC. 617. (a) Section 3626(a) of title 39, United States Code, is amended to read as follows:

"(a) In the administration of Subchapters II and III of this chapter, each time rates of postage are established for mail under former sections 4358, 4452 (b) and (c), and 4554 (b) and (c) of this title, the estimated revenues to be received for each class or kind of such mail shall be equal to the direct and indirect postal costs attributable to mail of such class of kind excluding all other costs of the Postal Service."

(b) This section is effective January 1, 1986.

SEC. 618. If the postage rate delay required by section 616 of this Act causes a shortfall in postal revenues from the amounts which would have been provided by the adjustment contemplated by section 3627 of title 39, United States Code, the Postal Service shall request a supplemental appropriation to avoid placing the burden of that shortfall on unsubsidized mailers.

Mr. ROYBAL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The Speaker pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

The SPEAKER pro tempore. The Clerk will designate the last amendment in disagreement.

The text of the amendment is as follows:

Senate amendment number 98: Page 54, after line 16, insert:

SEC. 618 (a) If any individual or entity which provides or proposes to provide child care services for Federal employees applies to the officer or agency of the United States charged with the allotment of space in the Federal buildings in the community or district in which such individual or entity provides or proposes to provide such services, such officer or agency may allot space in such a building to such individual or entity if—

(1) such space is available; and

(2) such officer or agency determines that such space will be used to provide child care services to a group of individuals of whom at least 95 percent are Federal employees.

(b)(1) If an officer or agency allots space to an individual or entity under subsection (a), such space may be provided to such individual or entity without charge for rent or services.

(2) If there is an agreement for the payment of costs associated with the provision of space allotted under subsection (a) or services provided in connection with such space, nothing in title 31, United States Code, or any other provision of law, shall be construed to prohibit or restrict payment by reimbursement to the miscellaneous receipts or other appropriate account of the Treasury.

(3) For the purpose of this section, the term "services" includes the providing of lighting, heating, cooling, electricity, office furniture, office machines and equipment, telephone service (including installation of lines and equipment and other expenses associated with telephone service), and security systems (including installation and other expenses associated with security systems).

MOTION OFFERED BY MR. ROYBAL

Mr. ROYBAL. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. ROYBAL moves that the House recede from its disagreement to the amendment of the Senate numbered and concur therein with an amendment, as follows:

In lieu of the section number proposed by said amendment, insert the following: "619".

Mr. ROYBAL (during the reading). Mr. Speaker, I ask unanimous consent that the motion be considered as read and printed in the RECORD.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California [Mr. ROYBAL].

The motion was agreed to.

A motion to reconsider the votes by which action was taken on the several motions was laid on the table.

GENERAL LEAVE

Mr. ROYBAL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous matter, on the conference report just agreed to.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

CONFERENCE REPORT ON S. 1570, FAIR LABOR STANDARDS AMENDMENTS OF 1985

Mr. HAWKINS. Mr. Speaker, I call up the conference report on the Senate bill (S. 1570) to amend the Fair Labor Standards Act of 1938 to provide rules for overtime compensatory time off for certain public agency employees, to clarify the application of that act to volunteers, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Pursuant to the rule, the conference report is considered as having been read.

(For conference report and statement, see proceedings of the House of November 1, 1985.)

The SPEAKER pro tempore. The gentleman from California [Mr. HAWKINS] will be recognized for 30 minutes and the gentleman from Vermont [Mr. JEFFORDS] will be recognized for 30 minutes.

The Chair recognizes the gentleman from California [Mr. HAWKINS].

Mr. HAWKINS. Mr. Speaker, I yield myself such time as I may consume.

Mr. HAWKINS. Mr. Speaker, I want to briefly restate my appreciation for the bipartisan efforts which produced the amendments to the Fair Labor Standards Act which we enact today. I hope that all Members fully appreciate the hard work, the sincere debate, and the compromise which has produced this important legislation.

During the conference, there were three issues which surfaced which generated substantial debate, and I would like to take just a few moments to offer very brief clarification of those issues.

First, the conferees debated at length whether or not to impose an intent standard in conjunction with section 8, the provision providing for protection against discrimination. A series of words were offered and rejected, including "motivated," and the word, "intended" itself. Each of these words was rejected for the specific purpose of ensuring that section 8 would not be construed to require a showing of intent in conjunction with an employee's discrimination charge.

We also stated that victims of discrimination must show "that coverage was asserted." In offering those clarifying words, we intended only to ensure that some act constituting notification to an employer of the Department of Labor occurred in a timely fashion. Thus, so long as there is an assertion of coverage by an employee or an employee representative, or by an employee on behalf of another employee or employees, this assertion of coverage requirement is fully satisfied.

Finally, Mr. Speaker, although section 8 of the bill does not prohibit States and municipalities from adjusting wage rates out of fiscal necessity, the section would prohibit such wage rate adjustments if the action was in response to extending coverage of the Fair Labor Standards Act coverage.

The statement of managers makes it clear that such wage adjustments made after the enactment of this legislation cannot be directly attributable to the requirements of the Fair Labor Standards Act.

Mr. Speaker, at this time, I reserve the balance of my time.

Mr. JEFFORDS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I certainly am in agreement with the words of the chairman of the committee and would like to say that we all worked hard in conference to bring about a reconciliation of the issues in disagreement.

The only areas that really required any kind of compromise had to do with the caps on hours; where we left the cap for public safety and similar employees the same, but raised the cap

for other employees to 240 from 180 hours.

We also gave the employee full protection on retirement.

Mr. Speaker, at this time, I yield to the gentleman from Texas [Mr. BARTLETT] in order to engage in a colloquy with the chairman of the committee.

Mr. BARTLETT. Mr. Speaker, I thank the gentleman for yielding me this time and would like the attention of the chairman of the committee, the gentleman from California, Mr. HAWKINS, for the purpose of engaging in a colloquy.

Mr. Speaker, it is my understanding that this legislation is intended to be neutral with respect to both employee and employer rights in any action by employees challenging the lawfulness of an employer's unilateral reduction of regular pay or fringe benefits instituted prior to enactment of these amendments. I would ask if this is the chairman's understanding as well.

Mr. HAWKINS. If the gentleman will yield. The gentleman's understanding is correct, and I thank the gentleman for his clarification.

Mr. BARTLETT. I thank the chairman for yielding and for his response.

Mr. Speaker, I want to express my gratitude, and what I think is the gratitude of all State and local and municipal employees throughout the country, for the leadership and the patience and the diligence that the chairman of the committee, the gentleman from California [Mr. HAWKINS] has displayed in bringing this issue to the floor, and in fact, in passing this legislation into law. This legislation is the result of bipartisan negotiation in which the chairman of the committee, the gentleman from California [Mr. HAWKINS] has displayed a great deal of leadership.

We have also had a great deal of leadership and insight displayed by the ranking member, the gentleman from Vermont [Mr. JEFFORDS] the chairman of the subcommittee, the gentleman from Pennsylvania [Mr. MURPHY], and the ranking member of the subcommittee, the gentleman from Wisconsin [Mr. PETRI].

I would also comment as a fellow Texan that we received a great deal of assistance from my colleague from Texas, Mr. BOULTER of Amarillo, because the gentleman from Texas added a great deal to the substance of the debate to ensure that this bill was brought to the floor today in a form that was acceptable to all. I thank the gentleman from yielding and for his leadership.

□ 1205

Mr. JEFFORDS. I thank the gentleman from Texas for his tremendous efforts on this bill, and would join in the words of commendation for the members of the committee as well as the other gentleman from Texas [Mr. BOULTER] to whom I will now yield.

Mr. BOULTER. I thank the gentleman for yielding.

Mr. Speaker, I would also like to engage in a brief colloquy with the chairman.

Mr. BOULTER. I would like to reiterate my colleague from Texas' query. As you know, the city of Amarillo, which I represent, undertook to comply with the Garcia decision in June of this year. The city's actions have been challenged in court. After attending the recent conference committee meeting on this legislation and after studying both the conference agreement and the joint explanatory statement of the committee of conference, it is my understanding that this legislation is expressly neutral with respect to that litigation. I would ask if that is the distinguished chairman's understanding as well.

Mr. JEFFORDS. I yield to the gentleman from California.

Mr. HAWKINS. While I am not familiar with the facts of that case, I believe the gentleman to be correct. Of course, my response is not intended to be inconsistent with the statutory language and the statement of managers which must govern.

Mr. BOULTER. Will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman.

Mr. BOULTER. Mr. Speaker, I wish to express gratitude to the ranking minority member, the gentleman from Vermont [Mr. JEFFORDS], and to the distinguished chairman, to the gentleman from Pennsylvania [Mr. MURPHY], and to the gentleman from Wisconsin [Mr. PETRI] for the many courtesies shown to me as a nonmember of that conference.

Mr. JEFFORDS. Mr. Speaker, I wish to again commend the gentlemen from Texas for their efforts in this legislation, and also the gentleman from Wisconsin [Mr. PETRI] on our side, and again thank the chairman of the committee and the chairman of the subcommittee for their tremendous assistance and nonpartisan attitude toward this very important legislation.

Mr. PETRI. Will the gentleman yield?

Mr. JEFFORDS. I yield to the gentleman.

Mr. PETRI. I thank the gentleman for yielding.

Mr. Speaker, I would like to join in this round of appreciation. This was a difficult and sensitive area, and I think the committee and the House acted responsibly in addressing it and meeting a need that was going to disrupt the lives of a lot of State and local employees around the country, and also the budgets of many of our local governments across the country. I know that the subcommittee will be keeping an eye on this area and if there are other problems that develop, we will try to be attentive to those problems too.

I want to particularly thank the staff on the subcommittee for all the work that they did on both the majority and minority sides in bringing this legislation to successful fruition.

Mr. JEFFORDS. Finally, Mr. Speaker, I would just say that I am pleased that the administration supports the language in this conference report, and that the Secretary of Labor, Secretary Brock, has been of great assistance and help to us. I know all of us want to extend our appreciation for all of his efforts and those of his staff.

Mr. Speaker, I yield back the balance of my time.

Mr. HAWKINS. Mr. Speaker, I, too, wish to join in the appreciation extended to the ranking minority member, the gentleman from Vermont [Mr. JEFFORDS]; the ranking minority member of the Labor Standards Subcommittee, the gentleman from Wisconsin [Mr. PETRI]; and to the very active efforts of the gentleman from Texas [Mr. BARTLETT].

I think that these gentlemen have expressed the highest dedication to the handling of this subject and in a bipartisan and very constructive manner.

At this time, I yield to the chairman of the Subcommittee on Labor Standards, the gentleman from Pennsylvania [Mr. MURPHY], whose patience and whose diligent efforts to effect a compromise are, I think, largely responsible for the legislation which is before us.

Mr. Speaker, I yield 5 minutes to the gentleman from Pennsylvania [Mr. MURPHY].

Mr. MURPHY. Mr. Speaker, I rise in support of the conference report on the Fair Labor Standards Act Amendments of 1985. After many weeks of work by our subcommittee staff, representing both sides of the House, on behalf of all of the members on the Committee on Education and Labor, and many, many individual Members of the House and the other body, and certainly I cannot go without recognizing the efforts put in by the representatives of the various governmental organizations representing the municipalities and States of our country, and then that of the public employees and their representatives who worked so diligently to craft what I think is a very fair and balanced approach to the coverage of municipal employees under the Fair Labor Standards Act.

I thank my chairman, the gentleman from California [Mr. HAWKINS], for his full support and guidance in this very important measure.

The gentleman from Vermont [Mr. JEFFORDS] was correct in his summary of the act; what we are permitting now in municipal governments to do, is to

handle their own personnel matters, handling the schedule of their employees as they deem fit, but with the fairness that we attempt to employ in the Fair Labor Standards Act for all employees in our country.

We have allowed comp time, or compensatory time up to 480 hours to be accumulated by public safety employees. That means that they may take 8 full weeks of employment and bank that time as their employer and the employees deem necessary, and claim it at any later time at 1½ times the rate during the course of their employment.

For nonpublic service and nonseasonal employees, we allow the banking of 240 hours, or 4 full weeks of employment, that they may delay the time taken off and save the municipalities that cost of cash payment of that overtime.

We have fully clarified that volunteers are permitted in municipal employment; that even those engaged in the same occupation may freely trade with their coworkers and volunteer their time in place of their coworker without jeopardizing the necessity of cash payments for the overtime.

We have figured the final comp time upon the employee severance as the best or the highest of the average of his last 3 years of work, or his last year of work, whichever is at the higher level.

We have taken care of a particular situation for Puerto Rico and other territories so that they may have a little more time to come in compliance with the Fair Labor Standards Act.

In effect, Mr. Speaker, we have brought about a compromise between all of the interested parties involved. I urge all of the Members of the House to support this measure unanimously, and again thank the members of my subcommittee for their diligent and patient work.

Mr. MCEWEN. Mr. Speaker, I am pleased to see that this Congress has today adopted legislation seeking to reverse the unsound position reached by the U.S. Supreme Court in its Garcia versus San Antonio Metropolitan Transit Authority ruling.

Under this decision, it appeared that State and local governments would have been required to restrict the use of compensatory time. This decision would have most certainly proven extremely expensive to units of local governments that are already experiencing very serious financial hardships.

As Mr. Michael Morton, the Washington Township administrator for Montgomery County, OH, expressed to me:

I have never experienced a year where so many Federal decisions have had such a negative impact on local government employers and employees. First it was the IRS ruling re: Taxation of employee benefits * * *. Then came the Supreme Court's decision in the Garcia case. The impact of this case will be immense, especially to small and medium-sized fire departments like our own. The new guidelines will cost the township around $75,000 annually to implement or about 7 percent of the department's total budget. * * * I hope you can feel our total frustration with this barrage of Federal "expertise." I hope that you will move quickly to make appropriate changes.

It is a pleasure to finally be able to tell Mr. Morton, and all other local officials like him that the Congress has heard his plea. Legislation approved by both the House and the Senate, and resolved in conference, will seek to continue the system of local government flexibility that has existed over time. Indeed, this legislation will restore to the State and local governments the flexibility needed to schedule their employees to best serve the needs of their own areas. I commend my colleagues for this necessary resolution to a very unnecessary Court decision.

Mr. FORD of Tennessee. Mr. Speaker, I am extremely pleased that a resolution has been achieved on this highly controversial and complex issue and that the basic components of my bill, H.R. 2866, are reflected in this legislation. As a result of the February 19, 1985, Supreme Court decision, State and local governments would be forced to pay their employees overtime compensation instead of compensatory time off. If allowed to stand, the Garcia decision would have abruptly altered the employment and budgetary operations of State and local governments. To taxpayers across the country, this would have meant substantial increases in moneys spent for training and for overtime pay.

On June 25, 1985, when I introduced H.R. 2866, I was a lone spokesman advocating the rights of employees affected by the Supreme Court's Garcia decision. When I introduced my bill, most of my colleagues were somewhat disturbed that I had introduced legislation of this nature. Their concern was that my bill would only open the floodgates, allowing amendment after amendment to the Fair Labor Standards Act, specifically the subminimum wage issue.

My concern went much further. I wanted to protect the rights of employees and grant some relief to already strained city budgets. H.R. 2866 would have amended the Fair Labor Standards Act, to permit employees engaged in law enforcement and fire protection activities to take compensatory time off in lieu receiving overtime pay.

The conference report on H.R. 3530 will solve many of the problems associated with the Supreme Court's decision. The bill will continue to allow compensatory time off in lieu of overtime pay. However, now, as was in my bill, comp time must be computed at the rate of 1½ hours for each hour of overtime worked. The conference language allows a maximum of 480 hours of comp time per year to be banked for employees engaged in public safety and 240 hours of comp time for all other employees. But most importantly, the new legislation will protect employees who have been discriminated against by asserting overtime coverage since the Garcia decision.

It gives me a great deal of satisfaction to know that my bill served as a catalyst to bring about a compromise on an issue that could have caused severe hardships to many State and local governments and their employees.

This legislation is not everything I or anybody else wanted, but it will grant governments and employees some relief from the problems associated with the Supreme Court decision.

This legislation has the support of Ray Maples, president of the Memphis Police Association and hundreds of other labor leaders and I think it is a fair compromise and will benefit thousands of municipal employees nationwide.

Mr. RUDD. Mr. Speaker, this year's Supreme Court ruling in the case of Garcia versus San Antonio Metropolitan Transit Authority is already posing serious budgetary and administrative problems for State and local governments.

Since the Supreme Court decision, many flexible employment practices have been suspended. Volunteers have to be compensated at least at the minimum wage. Accruing compensatory time off in lieu of overtime pay—a practice used extensively by police and firefighters—is prohibited.

In light of these budgetary hardships, I rise in support of the conference agreement for H.R. 3530, the Fair Labor Standards Amendments of 1985. This legislation overturns the rigid interpretations of the Supreme Court decision, and returns greater flexibility to State and local government employment practices. I urge my colleagues to join me in support of this agreement.

Mr. JONES of Oklahoma. Mr. Speaker, I rise in very strong support of this conference report on S. 1570, the Fair Labor Standards Amendments. As my colleagues know, this bill reflects the tireless work of so many of our colleagues, representatives of State and local governments, the employee associations, and the Department of Labor.

It will deflect the blow from State and local governments of the Garcia decision, saving taxpayers millions of dollars while protecting the rights of State and local employees.

Unfortunately, we were unable to consider this legislation last Friday. While there were several hours during the afternoon for thorough review of the conference report, I understand that the required papers were temporarily mislaid in the other body. By the time they were available, the House, unfortunately, had adjourned, even though I voted against adjournment.

I urge my colleagues to support this critical legislation in order to put to rest the persistent questions raised by the Garcia decision.

Mr. FRENZEL. Mr. Speaker, I rise in support of H.R. 3530, which would alleviate some of the damage caused by the Supreme Court decision in the Garcia versus San Antonio case.

This court decision has wreaked havoc upon our State and local municipalities, especially in the scheduling, budget, and volunteer departments. It is ironic that a

measure which was originally designed to ensure employee rights, and create additional jobs, has instead had the impact of reducing services, creating layoffs, and raising taxes.

The cost of this action is monumental. Without any reversal or revision of Garcia, the cost to my home State of Minnesota alone is estimated at $22 million a year and nationwide cost estimates loom at $2 to $4 billion yearly. We need to pass H.R. 3530 with great urgency in order to eliminate some of the problems created by reinstating the 1974 Amendments to the Fair Labor Standards Act for our State and local governments. What we need even more is a total repeal of the Garcia decision. However, since that much-needed action was not given to us as an option, the bill before us will at least lessen the severity of the impact of Garcia upon our cities and States.

I urge my colleagues to join me in support of H.R. 3530.

Mr. JEFFORDS. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. HAWKINS. Mr. Speaker, I have no further requests for time, and I move the previous question on the conference report.

The previous question was ordered.

The conference report was agreed to.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the conference report on S. 1570, the Fair Labor Standards Amendments of 1985.

The SPEAKER pro tempore (Mr. KANJORSKI). Is there objection to the request of the gentleman from California?

There was no objection.

LEGISLATIVE PROGRAM

(Mr. MICHEL asked and was given permission to address the House for 1 minute.)

Mr. MICHEL. I yield to the distinguished majority whip for the purpose of inquiring about the program for next week.

Mr. FOLEY. I thank the distinguished Republican leader for yielding to me.

Mr. Speaker, this concludes the legislative business for today. Tomorrow, the House will be in pro forma session, and it would be my intention in a moment to offer a unanimous-consent request that when the House adjourns tomorrow, it adjourn to meet on Tuesday next.

The House will not meet on Monday, it being Veterans Day.

On Tuesday, the House will meet at noon and consider three suspensions under the suspension rule; H.R. 2722, to require the decennial census to eliminate the drainage census; an unnumbered H.R. relating to the proposed sales of arms to Jordan; and H.R. 1523, the Handicapped Children's Protection Act.

It would be our intention to postpone recorded votes on suspensions until after the debate on those suspensions, but I emphasize that any votes ordered on Tuesday will be taken on Tuesday, and will not be postponed to another day.

In addition, the House will consider an unnumbered H.R. relating to the continuing appropriations—I think that is House Joint Resolution 441; and, subject to a rule being granted, H.R. 1616, the Labor-Management Notification and Consultation Act of 1985, sometimes known as the plant closing bill. An open rule with 2 hours of debate, to consider the rule and general debate only.

So there will be suspensions, to be voted on after debate; there will be the consideration of the continuing resolution extension, and there will be the rule and general debate only on H.R. 1616.

□ 1215

On Wednesday and Thursday, the House will meet at 10 a.m. and return to H.R. 6, the Water Resources Act of 1985, to complete consideration; and H.R. 1616, Labor-Management Notification and Consultation Act of 1985, to complete consideration.

Members, of course, should expect possible further action on the debt limit bill whenever such action is available for consideration of the House. But the likelihood of some action is very high likelihood for next week. The House is not scheduled to meet on Friday, November 15.

Mr. MICHEL. Mr. Speaker, may I also inquire of the distinguished majority whip: I am not sure my memory serves me correctly whether on the milk bill and the Superfund legislation that we extended to November 14, in which case I think the farm provisions would expire. Is there anything in the works on a temporary extension on either of those items?

Mr. FOLEY. We may have to request some Rules Committee action for temporary extension next week. The gentleman is correct with respect to the expiration.

Mr. MICHEL. I did dispatch a letter yesterday to the Speaker with respect to the Superfund suggesting some way by which we may hopefully bring about——

Mr. FOLEY. We do not anticipate a more permanent action on the Superfund bill next week. So it may be necessary to consider some temporary legislation.

Mr. MICHEL. I thank the gentleman.

Mr. Speaker, I yield back the balance of my time.

ADJOURNMENT OF THE HOUSE FROM FRIDAY, NOVEMBER 8, 1985, TO TUESDAY, NOVEMBER 12, 1985

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that when the House adjourns tomorrow, it adjourn to meet at noon on Tuesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

DISPENSING WITH CALENDAR WEDNESDAY BUSINESS ON WEDNESDAY NEXT

Mr. FOLEY. Mr. Speaker, I ask unanimous consent that business in order under the Calendar Wednesday rule be dispensed with on Wednesday next.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Washington?

There was no objection.

CELEBRATING VETERANS DAY

(Mr. MONTGOMERY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MONTGOMERY. Mr. Speaker, Monday, November 11, marks the Nation's annual observance of Veterans Day across the country. Appropriate events have been scheduled to pay tribute to the 28 million living veterans and to the more than 1 million who have died in military service.

Mr. Speaker, ceremonies, speeches, parades, visits to a veteran's gravesite, and displaying the flag are all excellent ways to honor our veterans. But we must also show our appreciation daily by exercising our most precious rights—voting, worshiping, traveling, and speaking freely.

Without our veterans, these rights would not be possible.

So, Mr. Speaker, when your sons march off to war, they left their families, friends, homes, and jobs. They were heroes then and should be treated as heroes now.

So let us say "thanks" to a veteran on Monday.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF HOUSE JOINT RESOLUTION 441, FURTHER CONTINUING APPROPRIATIONS, FISCAL YEAR 1986

Mrs. BURTON of California, from the Committee on Rules, submitted a privileged report (Rept. No. 99-361) on the resolution (H. Res. 312) providing for the consideration of the joint reso-

lution (H.J. Res. 441) making further continuing appropriations for the fiscal year 1986, which was referred to the House Calendar and ordered to be printed.

REPORT ON RESOLUTION PROVIDING FOR CONSIDERATION OF H.R. 1616, LABOR-MANAGEMENT NOTIFICATION AND CONSULTATION ACT OF 1985

Mrs. BURTON of California, from the Committee on Rules, submitted a privileged report (Rept. No. 99-362) on the resolution (H. Res. 313) providing for the consideration of the bill (H.R. 1616) to require employers to notify and consult with employees before ordering a plant closing or permanent layoff, which was referred to the House Calendar and ordered to be printed.

SEPARATING AMERICAN CITIZENS FROM ILLEGAL ALIENS FOR THE PURPOSE OF CONGRESSIONAL REAPPORTIONMENT

(Mr. PETRI asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PETRI. Mr. Speaker, every 10 years the Census Bureau determines population shifts in the United States. As a result of the census report, high growth areas gain additional congressional seats, and slow growth areas lose seats. This seems sensible and fair. Most Americans agree that the right policy for democracies to follow in elections is "one citizen, one vote."

But the Midwest could lose seats in Congress during the 1990's because the Census Bureau counts illegal aliens when determining how many representatives each State should have.

By counting illegal aliens as if they were citizens, the Census Bureau is threatening to move congressional seats from the Midwest to the South and Southwest. The essential injustice of this situation should be obvious.

Accordingly, today I am introducing legislation directing the Census Bureau to separate American citizens from illegal aliens for the purpose of congressional reapportionment.

It is a fundamental principle that each American citizen should have an equal voice in our Government. Let's make our law consistent with that principle.

COOPER LAKE PROJECT

(Mr. CHAPMAN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CHAPMAN. Mr. Speaker, I was 8 years old when the U.S. Congress authorized the Cooper Lake project. H.R. 6, now under consideration by this body, contains an authorization of $14.7 million for the mitigation of fish and wildlife resources for Cooper Lake. This authorization will kick down the final barrier that has existed for over 30 years to the completion of this needed resource in northeast Texas.

Mr. Speaker, two great Americans, Sam Rayburn and Wright Patman, recognized the need for this project over 30 years ago, and gained the initial approval needed for it.

Mr. Speaker, I am pleased that this institution is now prepared to go forward with this needed project in my district, and I am pleased that it is included in the provisions of H.R. 6.

I look forward to the passage of H.R. 6 and the early development and completion of this valued resource in northeast Texas.

OUR VETERANS GAVE THEIR ALL THAT WE MIGHT LIVE

(Mr. DANIEL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DANIEL. Mr. Speaker, on Monday next we observe Veterans' Day. More than 40 million Americans have fought in the wars in which this country has been engaged. Over a million did not return to enjoy the fruits of that sacrifice:

They did give, that you might live, our country; their lives and the air when the need was there; their bodies to the sea when that had to be; their sweat and toil, their blood to the soil; before they would yield a rock, a pebble, or a field of this, our country.

Blood, sinew, and bone, all they had, all they did own they did give; that you might live, our country.

THE HUMAN TOLL OF THE FARM CRISIS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Arkansas [Mr. ALEXANDER] is recognized for 5 minutes.

Mr. ALEXANDER. Mr. Speaker, the farm crisis is bad and is getting worse. The American farmer is the backbone of our Nation and the foundation of our economy. Yet today, he is suffering as he has not suffered since the depths of the Great Depression.

The black clouds on the farm horizon are a stern warning to every citizen of tough times ahead. The following is an article in the Wall Street Journal of November 7, 1985, which I urge my colleagues to read:

[From the Wall Street Journal, Nov. 7, 1985]

FARM CRISIS IS TAKING SUBTLE TOLL ON CHILDREN IN DISTRESSED FAMILIES

(By Wendy L. Wall)

SPIRIT LAKE, IOWA.—Aleta Kuhlman's childhood memories are like a series of Norman Rockwell paintings.

On brisk spring mornings, her family took turns stumbling to the barn in the pre-dawn dark to help struggling ewes give birth. When cows got loose in the cornfield, the whole family would saddle up and ride roundup. On frigid winter nights, they sometimes gathered in the basement to feed wobbly calves and lambs out of baby bottles.

But last fall, the idyll shattered. Threatening to foreclose, the family's bank phoned repeatedly with orders to sell more sheep. Aleta's parents quarreled bitterly. The strong, energetic father whom she idolized sat listlessly, refusing to eat or go outside.

One bright morning a year ago, the 17-year-old took her father's shotgun to the grove behind the house and put it to her head. After a long period of hesitation, she finally broke down and returned, distraught, to the house.

CLIMATE OF HOPELESSNESS

The high-school senior survived her brush with suicide. But her dreams of a life on the farm are gone, a casualty of the most prolonged and severe farm recession in recent memory. The farm economy's sudden plunge from the giddy heights of the 1970s to its current crushing low has brought with it emotional stresses in some ways more brutal even than those of the Depression.

The upheaval is taking a mounting toll on a generation of rural youth. The tranquility of rural life is vanishing, and countless farm children now are growing up in the atmosphere of constant worry, hopelessness, alienation or outright fear.

As century-old farms are threatened, marriages often crack and generations divide. Family abuse rates are rising as some farmers vent their frustrations in alcoholism or violence. Farm suicides are increasing. "It's scary to see your folks scared," says Kristy Miller, a spirited 15-year-old from Ogden, Iowa.

Ironically, the very factors that have long made farm childhood special—the tight bonds of farm families tied to the land—exacerbate the current troubles. "Farm families are a unique population. There are no clear boundaries between job and family," says Frances Joslin, a psychologist at the Southwest Iowa Mental Health Clinic.

LINGERING EFFECTS

Joan Blundall, a counselor at the Northwest Iowa Mental Health Center, worked in Rhode Island eight years ago when the Electric Boat division of General Dynamics Corp. laid off 3,000 employees in the region. That was a financial catastrophe, too, she says, yet it didn't have the lingering emotional effects she sees in the Midwest. Farm kids, who often are deeply involved in the family business, "really grieve about not doing chores with Dad. It's a whole lot different from cleaning out the garage."

Until last December, Matt and Josh Tangeman rose daily at 5 a.m. to help their father feed the hogs and clean their pens. Each boy had his own gilt, or young female, and Josh expected a litter of piglets soon. Then, one bitterly cold day, men sent by the bank loaded the hogs and hauled them off to slaughter.

For weeks, Matt, a burly 10-year-old with a sad smile, lay awake at night, sobbing. Nine-year-old Josh, previously a good student, had so much trouble concentrating he nearly failed third grade.

"I miss having the hogs," Matt tells a visitor, biting his lip. And Josh, fighting back tears, admits he feared losing his house and parents, too. "In these kids' minds, they were violated because someone came on the property and took their pigs away," says Mrs. Blundall, who counseled the family.

SCHOOL FIGHTS

Increasingly, the troubles of farm parents add tension to their children's lives. Jared Taylor, a precocious sixth grader from Dickens, Iowa, used his savings and the bonds his grandparents gave him when he was born to help pay his family's electricity, water and telephone bills last winter.

Jared, an only child, still shoots barn spiders with his BB gun and scales rafters in the family's 80-year-old barn. But the carefree days of youth are gone. His parents both have severe health problems—aggravated by the recent stress—and Jared worries that one day they will have an accident or leave. He refused to go to a youth camp for a week last summer. And when his father was late returning home one evening, the boy sat in the car and honked until his mother agreed to go in search of her husband. "I was scared," he recalls. "I thought something might have happened."

In Sibley, Iowa, school nurse Julie Helmers says more fights break out now in junior high because edgy students are quick to take offense. The number of children coming to her with minor complaints—often a sign of depression—has doubled in the last two years.

Others across the Farm Belt tell similar stories. The Rev. Delano Cunningham, a Methodist minister in Palmer, Neb., counseled one 16-year-old girl who accidentally learned of her family's voluntary bankruptcy filing while sitting in the local cafe. Five days later, she developed a problem of bedwetting. And a boy aged 2½ suddenly started stuttering when the family farm began to founder. "All this little one could hear was his parents' voices being raised at the other end of the house," the minister says.

Arlene and Norman Kunkle were forced off their rolling Missouri farm around Thanksgiving 1983. In the dead of winter, Mrs. Kunkle sold some scrap iron, firewood and a 1938 Chevy to make a down payment on a tiny trailer, the size of two rooms in her former farmhouse. Her husband spent months in and out of hospitals, being treated for severe depression.

Shunned in church, taunted in school and often subsisting on skimpy meals, the Kunkles' four youngest children reflected the stress. Christopher, formerly an A and B student, started bring home Ds. KiKi, then 11, cried with little provocation. Carol, then a high-school junior, had such severe headaches and stomachaches that her mother suspected an ulcer.

Fifteen-year-old Kerri, his dreams of joining his father on the farm dashed, turned violent. The former altar boy threatened his brother with a switchblade and stabbed his father in the arm with a paring knife. "Kerri blamed Dad. He blamed him for losing the farm," Mrs. Kunkle says simply.

The family has recovered better than many. Mrs. Kunkle, who is a registered nurse, got a night job in a nursing home, and her husband's condition has improved. Christopher's grades are edging up, KiKi smiles more, and Carol won a scholarship and is studying nursing. Kerri has finally calmed down. "A lot of Kerri might have been that he was hungry," his mother says.

Even so, scars remain, Kerri, staring straight ahead and shielding his eyes, speaks of the lost farm: "I always thought even after I left home, it'd always be there, I'd always have something to come home to," he says. "You've got to watch how you make your money or you'll lose it all. It'd make me think twice before I'd borrow a large amount."

"We talk about the Depression mentality," says William Heffernan, a rural sociologist at the University of Missouri. "It will probably have a similar impact here."

MORE RUNAWAYS

As pressures mount, problems long common to urban areas are taking root in the country. In the rural communities around Mitchell, S.D., where there have been 14 farm suicides in the past 20 months, teen-age alcoholism is on the rise. Mr. Cunningham in Nebraska says calls to him concerning suicidal teens have tripled in the last year. An Iowa group called Youth and Shelter Services has seen a sharp jump in rural teen-age runaways.

Jeanet Mosher, a bubbly red-haired teenager, recalls the rising panic she felt one night last winter as she sat alone in her darkened bedroom watching the flashing lights of a squad car in the driveway. When her parents returned home, the sheriff delivered foreclosure papers.

The Moshers are still on their Milo, Iowa, farm, but Jeanet isn't. Last spring she ran away, and now she lives with a married sister in nearby Indianola. "You're wondering if the farm is going to be there tomorrow and if you're going to be there tomorrow," she says. "It's nerve racking. I just couldn't handle the stress."

Jeanet says she misses Sunday dinners at home, but she vows not to return until her parents' troubles have ended: "I didn't want them or their problems to mess up my life. I don't think I should be punished for decisions they made."

The stress affects even some youngsters who weren't reared on the farm. Kim Smith, the associate director of the Menninger Clinic of Albuquerque, N.M., a new branch of the Topeka, Kan., Psychiatric hospital and research institute, has been called into six or seven rural towns with teen suicide problems since 1982. He believes the farm crisis indirectly spurred the outbreaks. "When a county begins to see foreclosures at such a rate, it sets up a pessimistic sense of life in general—that life is a hard struggle," he says.

COUNSELING EFFORTS

Other mental-health workers say couples under the stress of losing a farm sometimes suffer such a setback in their self-confidence that they become ineffective parents. Some specialists think factors like this and a general sense of hopelessness may be related to a rise in rates of teen-age pregnancy in some rural counties, at a time when such rates nationwide are declining slightly.

Youth agencies, schools and others generally have been slow to wake up to the problems, but some are beginning to take action. In Iowa, Youth and Shelter Services is doing more suicide prevention work in schools and setting up outreach programs in rural areas. The Iowa 4H is training its staff to spot stress in youngsters and deal with it. And Iowa teachers are being shown a videotape entitled "The Rural Crisis Comes to School."

All this may help, but it isn't likely to halt farm children's flight away from agriculture. Participation in vocational agriculture classes, 4H programs and Future Farmers of America has declined sharply in recent years. Enrollments at agricultural colleges are dropping too. Many kids "don't want to have anything to do with farming. They just want to get away," says Rex Campbell, a rural sociologist at the University of Missouri.

That worries Paul Lassley, a rural sociologist at Iowa State. "Just as we overreacted in the 1970s to continued agricultural expansion, we could overreact (to the recession) in the 1980s," he warns. "We could well wake up in 20 years and find out that we have a human capital shortage in agriculture."

Aleta Kuhlman will probably be one of those casualties. Despite her deep ties to the land, "I just kind of want to move away and start over," she says.

TRIBUTE TO INTERNATIONALLY KNOWN RESTAURANTEURS TED BALESTRERI AND BERT CUTINO

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California [Mr. PANETTA] is recognized for 5 minutes.

Mr. PANETTA. Mr. Speaker, I am pleased to inform my colleagues that the people of Monterey will gather on November 10 to honor two of our most successful and well-known businessmen—Ted Balestreri and Bert Cutino, the owners of the renowned Sardine Factory in Monterey's Cannery Row.

Ted and Bert, who I am proud to say have been good friends of mine for many years, are being honored for the contribution they have made to the tourism and hospitality industry along the California coastline, which is one of the mainstays of the economy not only of coastal communities but of the entire State.

The Sardine Factory is well known as one of the finest restaurants in the Nation. It has received a number of prestigious awards, including the Ivy Award, the Travel/Holiday Magazine Award, the Nation's Restaurant News Hall of Fame Award, the Mobil Travel Guide Award, the Signature Award of the Diners Club, the Business Executives Dining Award, Wine Spectator's Grand Award, and the Knights of the Vine Gold Vine Award. In addition, it has been named by the Armstrong Gourmet Guide as one of California's top 10 restaurants and was one of 50 restaurants selected to serve at the last two Presidential inaugurations.

Ted and Bert also operate the Carmel Butcher Shop in Carmel, the Rogue Restaurant on Fisherman's Wharf in Monterey, and the San Simeon Restaurant near the Hearst Castle in San Simeon. In addition, they own a number of real estate ventures together.

Ted was born in Brooklyn, NY, and moved to the Monterey Peninsula in 1957. He graduated from Carmel High School in 1958 and attended Monterey Peninsula College as well as Lewis Management School

in Washington, DC. He has worked in the hospitality industry as everything from busboy to owner.

Ted has been very active in the hospitality industry both locally and nationally. He currently serves as president of the National Restaurant Association. He is a past president of the California Restaurant Association and is also past chairman of the executive and finance committee of the CRA. He is a member of the board of trustees for the National Institute for the Food Service Industry and is a member of the Corporation of the Culinary Institute of America. Ted serves on the State of California's Tourism Corporation as well as on the California Tourism Commission.

Locally, Ted is a past president and one of the founders of the Monterey Peninsula Hotel and Restaurant Association. He is also a founder and past president of the Northern California Restaurant Association, which he helped move into a merger with the Southern California Restaurant Association to from the California Restaurant Association.

Ted has also served as regional director of the Monterey Peninsula chapter of the Wine Investigation for Novices and Oenophiles and is currently a master knight in the Monterey Chapter of the Brotherhood of the Knights of the Vine. He served as bailli of the Monterey chapter of the Confrerie de la Chaine des Rotisseurs.

In the community, Ted has been appointed to serve on the Monterey County Sheriff's Advisory Council and is chairman of the membership committee of the Monterey Chamber of Commerce.

In 1981, Ted received the Restaurant Hospitality Magazine's Hall of Fame Award, and in 1982, he received the Gold Plate Award from the American Academy of Achievement. He has also received the Outstanding Hospitality Professional Award from the Monterey Peninsula Hotel and Restaurant Association and the Silver Plate Award and the prestigious Gold Plate Award from the International Foodservice Manufacturers Association.

Ted and his wife, Velma, have two sons and live in Pebble Beach.

Bert Cutino was born in Monterey and graduated from Monterey High School in 1957. He received an A.A. degree from Monterey Peninsula College in 1964 after attending at night while working full time in restaurants.

Bert started his restaurant career at the age of 13, and has worked as everything from dishwasher and chef to manager and owner.

Bert's specialty has always been the culinary arts. He is a certified executive chef and a member of the American Culinary Federation and the American Academy of Chefs, which is the honor society of the American Culinary Federation. He is also a member of the American Institute for Food and Wine, founded by Julia Chila, and is a member of the Confrerie de la Chaine des Rotisseurs, in which he holds the office of vice chancelier-argentier. He is also a member of the Wine Investigation for Novices and Oenophiles and a master knight of the Monterey chapter of Knights of the Vine. He is a member of the Guild of Sommeliers from England and the Toques Blanches International Society.

Locally, Bert has served as president, vice president, and secretary of the Monterey Peninsula Chefs Association. He is currently its chairman of the board. In 1982, he founded the Culinary Arts Salon held at the California Wine Festival in Monterey.

Bert helped institute the culinary program at Monterey Peninsula College and has also been active with the college as a guest lecturer and a strong supporter of education in the culinary arts. Bert is a vice president of the Monterey Peninsula Chamber of Commerce and is a member of the chamber's visitor education committee.

In 1982, Bert received both the Distinguished Alumni Award from the California Association of Colleges and the Monterey Peninsula Chefs Association President's Award for outstanding service. In 1983, the Chefs Association named him Chef of the Year, and he was chosen as the California Restaurant Association Chef of the Year in 1984.

Bert, his wife, Velma, and their daughter and two sons live in Monterey.

Mr. Speaker, Ted Balestreri and Bert Cutino have made tremendous contributions to the Monterey Peninsula, and the community is going to give them a well-deserved tribute. I know my colleagues join me in congratulating them and their families and in wishing them the best of luck in the future.

PERSONAL EXPLANATION

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida [Mr. NELSON] is recognized for 5 minutes.

Mr. NELSON of Florida. Mr. Speaker, due to official business, I was unable to be present and voting on November 6, 1985, for rollcall vote Nos. 391 through 395. Had I been present I would have voted "aye" on roll No. 391, final passage of House Joint Resolution 36, Women in Armed Forces Memorial; "aye" on roll No. 392, final passage of H.R. 2205, Korean Conflict Memorial; "aye" on roll No. 393, final passage of House Joint Resolution 142, Black Revolutionary War Patriots Memorial; "nay" on roll No. 394, the Edgar amendment regarding the Mississippi River and tributaries flood control project, to H.R. 6, water resources development; and, "aye" on roll No. 395, the Weaver amendment to deauthorize the Elk Creek Dam project, to H.R. 6, water resources development.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. MCKINNEY (at the request of Mr. MICHEL), for today, on account of illness.

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. SABO) to revise and extend their remarks and include extraneous material:)

Mr. ALEXANDER, for 5 minutes, today.
Mr. ANNUNZIO, for 5 minutes, today.
Mr. PANETTA, for 5 minutes, today.
Mr. NELSON of Florida, for 5 minutes, today.
Mr. GONZALEZ, for 60 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. BOULTER) and to include extraneous matter:)

Mr. CLINGER in two instances.
Mr. SCHUETTE.
Mr. MICHEL in two instances.
Mr. DUNCAN.
Mr. CHAPPIE.
Mr. HILLIS.

(The following Members (at the request of Mr. SABO) and to include extraneous matter:)

Mr. WHEAT.
Mr. LIPINSKI.
Mr. SMITH of Florida.
Mr. GARCIA in three instances.
Mr. BOUCHER.
Mr. FUQUA.
Mr. STARK in three instances.
Mr. LAFALCE in two instances.
Mr. TALLON.
Mr. DONNELLY.
Mr. MCCLOSKEY.
Mr. SOLARZ.

JOINT RESOLUTIONS PRESENTED TO THE PRESIDENT

Mr. ANNUNZIO, from the Committee on House Administration, reported that that committee did on this day present to the President, for his approval, joint resolutions of the House of the following titles:

H.J. Res. 126. Joint resolution to designate the week of November 3, 1985, through November 9, 1985, as "National Drug Abuse Education Week"; and

H.J. Res. 282. Joint resolution designating the week beginning October 27, 1985, as "National Alopecia Areate Awareness Week."

ADJOURNMENT

Mr. MONTGOMERY. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 25 minutes p.m.) the House adjourned until tomorrow, Friday, November 8, 1985, at 10 a.m.

EXPENDITURE REPORTS CONCERNING OFFICIAL FOREIGN TRAVEL

Report of various House committees concerning the foreign currencies and U.S. dollars utilized by them during the second and third quarters of calendar year 1985 in connection with foreign travel pursuant to Public Law 95-384 are as follows:

REPORT OF EXPENDITURES FOR OFFICIAL FOREIGN TRAVEL, COMMITTEE ON MERCHANT MARINE AND FISHERIES, U.S. HOUSE OF REPRESENTATIVES, EXPENDED BETWEEN APR. 1 AND JUNE 30, 1985

Name of Member or employee	Date		Country	Per diem [1]		Transportation		Other purposes		Total	
	Arrival	Departure		Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]	Foreign currency	U.S. dollar equivalent or U.S. currency [2]
Brooks, Sharon	5/30	6/3	Panama		356.00		([3])				356.00
Corn, Lynne	5/30	6/3	Panama		356.00		([3])				356.00
Dentler, John	6/1	6/9	Scotland	617.38	774.00		1,443.60				2,217.60
Franklin, Webb, M.C	5/30	6/3	Panama		356.00		([3])				356.00
Lowry, Mike, M.C	5/30	6/3	Panama		356.00		([3])		[4] 271.72		627.72
Marquette, Linda	5/30	6/3	Panama		356.00		([3])				356.00
Marshall, Curt	5/30	6/3	Panama		356.00		([3])				356.00
Puah, Shelia	5/30	6/3	Panama		356.00		([3])				356.00
Tallon, Robin, M.C	5/23	5/31	Germany		525.00		1,666.00				2,191.00

LEE H. HAMILTON, Chairman, Oct. 30, 1985.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2228. A letter from the Deputy Assistant Secretary of Defense, transmitting notice of a new and an altered Federal records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2229. A letter from the Deputy Assistant Secretary of Defense, transmitting notice of a new Federal records system, pursuant to 5 U.S.C. 552a(o); to the Committee on Government Operations.

2230. A letter from the National Adjutant, Disabled American Veterans, transmitting the report of the proceedings of the national convention held in New Orleans, LA, July 21-25, 1985, Including an independent audit of receipts and expenditures as of December 31, 1984, pursuant to 44 U.S.C. 1332 and Public Law 88-504, section 3. (H. Doc. No. 99-123); to the Committee on Veterans' Affairs and ordered to be printed.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. MOAKLEY: Committee on Rules. House Resolution 312. A resolution providing for the consideration of House Joint Resolution 441, joint resolution making further continuing appropriations for the fiscal year 1986 (Rep. 99-361). Referred to the House Calendar.

Mr. MOAKLEY: Committee on Rules. House Resolution 313. A resolution providing for the consideration of H.R. 1616, a bill to require employers to notify and consult with employees before ordering a plant closing or permanent layoff (Rep. 99-362). Referred to the House Calendar.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. HAYES (for himself and Mrs. BURTON of California):

H.R. 3706. A bill to amend chapter 44 (relating to firearms) of title 18, United States Code, to prohibit the sale of handguns commonly called Saturday night specials; to the Committee on Judiciary.

By Mr. JACOBS:

H.R. 3707. A bill to extend benefits under section 8191 of title 5, United States Code, to law enforcement officers and firemen not employed by the United States who are killed or totally disabled in the line of duty; to the Committee on Judiciary.

By Mr. JENKINS:

H.R. 3708. A bill to amend title 5, United States Code, to provide that entitlement to a survivor annuity under the Civil Service Retirement System in the case of certain individuals who are mentally or physically disabled shall not be affected by marriage if the spouse is incapable of self-support due to a disability; to the Committee on Post Office and Civil Service.

By Mr. LEWIS of Florida (for himself and Mr. MACK):

H.R. 3709. a bill to provide that court for the southern district of Florida shall be held in Naples, FL; to the Committee on the Judiciary.

By Mr. PETRI (for himself and Mr. GOODLING):

H.R. 3710. A bill to prevent distortions in the reapportionment of the House of Representatives caused by the use of census population figures which include illegal aliens; jointly, to the Committees on Post Office and Civil Service and the Judiciary.

By Mr. ROSE:

H.R. 3711. A bill to modify the deadlines applicable to hazardous waste disposal facilities required to certify compliance with certain financial responsibility requirements under the Solid Waste Disposal Act; to the Committee on Energy and Commerce.

By Mr. SMITH of Florida:

H.R. 3712. A bill to provide for grants under the Bureau of Justice Assistance to local governments for innovative antiterrorism plans for deep draft ports and international airports; to the Committee on the Judiciary.

By Mr. ROBERT F. SMITH (for himself and Mr. DAUB):

H.R. 3713. A bill to restore to the Social Security Trust Funds and other Federal retirement funds losses resulting from noninvestments, redemptions, and disinvestments in connection with efforts to meet the public debt limit; to the Committee on Ways and Means.

By Mr. UDALL:

H.R. 3714. A bill to revitalize the U.S. copper industry; to the Committee on Ways and Means.

By Mr. GREGG (for himself, Mr. SMITH of New Hampshire, Mr. FUQUA, Mr. LUJAN, Mr. NELSON of Florida, and Mr. WALKER):

H. Con. Res. 231. Concurrent resolution congratulating Sharon Christa McAuliffe on her selection as the first teacher in space, and for other purposes; to the Committee on Science and Technology.

By Mr. RITTER (for himself, Mr. HOYER, Mr. LANTOS, Mr. GILMAN, Mr. KEMP, Mr. FEIGHAN, and Mr. PEASE):

H. Res. 314. Resolution expressing the sense of the U.S. House of Representatives that Miroslav Medvid should not be allowed to be removed from the United States until a complete investigation can determine whether he has been accorded all rights due him as a possible defector, and until he is accorded those rights; to the Committee on Foreign Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 64: Mr. WEISS.

H.R. 66: Mr. SUNIA.

H.R. 67: Mr. GONZALEZ and Mr. SUNIA.

H.R. 1457: Mr. GINGRICH, Mr. BARNARD, Mrs. VUCANOVICH, and Mr. SUNIA.

H.R. 1769: Mr. ROEMER, Mr. MOLLOHAN, and Mr. TAYLOR.

H.R. 1918: Mr. PARRIS.

H.R. 2349: Mr. FAWELL.

H.R. 2814: Mr. HANSEN, Mr. PORTER, and Mr. DAUB.

H.R. 3109: Mr. TRAFICANT.

H.R. 3469 Mr. DE LUGO, Mr. DARDEN, Mr. WEAVER, Ms. KAPTUR, Mr. CONYERS, Mrs. BOXER, Mr. FAZIO, Mr. TRAFICANT, Mr. RANGEL, Mr. WEISS, Mr. TOWNS, Mr. MITCHELL, Mr. LOWRY of Washington, and Ms. MIKULSKI.

H.R. 3507: Mr. GRAY of Illinois.

H.R. 3557: Mr. MORRISON of Washington, Mr. WEBER, and Mr. SCHUETTE.

H.J. Res. 400: Mr. SOLOMON, Mr. YOUNG of Alaska, Mr. COATS, Mr. BARTON of Texas, and Mr. BADHAM.

H.J Res. 421: Mr. MCHUGH, Mr. VALENTINE, Mr. CAMPBELL, and Mr. ACKERMAN.

H. Con. Res. 15: Mr. BURTON of Indiana.

SENATE—*Thursday, November 7, 1985*

(Legislative day of Monday, November 4, 1985)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the President pro tempore [Mr. THURMOND].

PRAYER

The Chaplain, the Reverend Richard C. Halverson, D.D., offered the following prayer:

Let us pray.

They that wait upon the Lord shall renew their strength * * *.—Isaiah 40:31.

Father in Heaven, the prayer this morning is for those I love, whose willing servant I am privileged to be—the men and women who labor with such incredible endurance in the Senate. They work hard for long hours, often feeling little is accomplished. They expend enormous effort on an issue, only to see it go down. Almost anything they try to do meets with stubborn resistance. Physical stress is aggravated as emotions are stretched and strained in this pressure cooker where strong wills clash and demands are relentless and unceasing.

Gracious God of love, protect them from going beyond the limit where burnout brings discouragement, disillusionment, depression, and cynicism. Make them wise in their responsibility to themselves that they may take time, make time for rest, relaxation, and renewal. Teach them how to wait upon Thee for strength. In His name Who was never in a hurry, yet finished the work He came to do. Amen.

RECOGNITION OF THE ACTING MAJORITY LEADER

The PRESIDENT pro tempore. The distinguished acting majority leader is recognized.

SCHEDULE

Mr. BOSCHWITZ. Mr. President, the business for the day will be that after the two leaders are recognized for 10 minutes each, there are special orders for Senators PROXMIRE, BRADLEY, and BAUCUS.

Routine morning business will not extend beyond 10 a.m.

Following routine morning business, it will be the intention of the majority leader to proceed to the consideration of Calendar No. 380, H.R. 3327, the military construction appropriations bill. Votes can be expected in relation to that measure, and votes may take place before noon.

At 2 p.m., by unanimous consent, a rollcall vote will occur on the nomination of Alex Kozinski, to be U.S. circuit court judge for the ninth circuit.

Also, the Senate can be expected to proceed to the consideration of S. 1527, the civil service retirement bill, under a time agreement.

Votes are expected to occur all day long, and the session could well go into the evening.

I reserve the remainder of my time.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The distinguished acting Democratic leader is recognized.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the time of the minority leader be reserved for his use later in the day.

The PRESIDENT pro tempore. Without objection, it is so ordered.

RECOGNITION OF SENATOR PROXMIRE

Mr. PROXMIRE. Mr. President, I understand that I have a 15-minute order. Is that correct?

The PRESIDENT pro tempore. Under the previous order, the Senator from Wisconsin [Mr. PROXMIRE] is recognized for not to exceed 15 minutes.

WHY THE ABM TREATY IS CRUCIAL IN PREVENTING NUCLEAR WAR

Mr. PROXMIRE. Mr. President, the Secretary of Defense and others in the administration and in the Senate have vigorously criticized the Soviet Union for persistent and widespread violations of the arms control treaties the Soviets have signed with the United States. These criticisms have raised serious question as to whether or not we should renounce the antiballistic missile—ABM—Treaty and refuse to enter into future arms control treaties with the Soviet Union.

Arms control is extraordinarily popular in this country. No administration and no political party can become identified with hostility to arms control without risking a very substantial loss of public support. On the other hand, Americans love this country. Americans are patriotic. Americans want to believe our country is right. Americans give the benefit of the doubt to whomever is President of the United States in his differences with foreign countries. A popular President knows this. He also knows that our fellow countrymen deeply yearn for peace. He knows Americans recognize that in this terribly dangerous nuclear age, a superpower war would be the supreme catastrophe. Most Americans understand that neither superpower could survive such a war. And certainly, on the basis of the most reliable professional polls, the vast majority of Americans recognize that arms control treaties with the Soviet Union advance the prospect of peace, and therefore the prospects of the survival of our Nation.

So what does an administration that is reluctant to enter into an arms control agreement with the Soviet Union do? It cannot discredit the arms control process itself. It can, however, easily discredit the Soviet Union's compliance with arms control. It can then charge that arms control with the Soviet Union will do little to advance the cause of peace, and might actually set it back. It can argue, as the Secretary of Defense Caspar Weinberger has argued, that while the United States abides by arms control treaties, the Soviet Union does not. What does this mean? It means that an arms control agreement that limits nuclear weapons or reduces weapons on both sides constitutes unilateral disarmament for the United States. Why? Because this country will honor the agreement. The Soviets will not.

So the critical issue is this: Have the Soviets complied with arms control agreements? Or have they engaged in wholesale violations? Well, have they? Certainly, the most widely discussed alleged violation by the Soviet Union has been with respect to the Anti-Ballistic Missile Treaty.

Recently, this Senator discussed at length on this floor the allegation that the Soviets had violated the ABM Treaty by building a radar system that could be a prime focus for a comprehensive ABM network at Krasnoyarsk, far inside the perimeter of the Soviet Union. That seems to constitute one very likely and important violation of the ABM Treaty. The treaty requires that such a radar installation must be constructed on or near the perimeter of the country. That seems to be a clear ABM violation. But how about the Soviet Union's general compliance with the ABM Treaty?

Mr. President, one of the best informed and most competent arms control organizations in the country is the Arms Control Association. In the asso-

ciation's July/August 1984 publication, Arms Control Today, in an article by John Pike, the following assessment appears:

The Soviets have generally maintained a good record of compliance with the ABM treaty, indicative of a strong degree of commitment to this regime. Since the early 1970's occasional Soviet activities have raised questions regarding their strict compliance with the terms of the ABM treaty. All of these issues were discussed in the Standing Consultative Commission, a joint U.S. Soviet forum for discussion and implementation of SALT I and resolved to the satisfaction of both parties.

As I pointed out recently on the floor, the Soviets have recently offered to suspend their construction of their radar at Krasnoyarsk, if we suspend our upgrading of radar sites in Greenland and England. That seems to be a conclusion by the Soviets that their Siberian installation does, indeed, violate the ABM Treaty—though they deny this. At any rate, we could propose to stop our radar modernization in Greenland and England, if they in turn dismantle—not cease construction, but actually dismantle—their Krasnoyarsk facility. Certainly, if the Soviets do acquiesce in such a counterproposal by the United States, their acquiescence would constitute the strongest kind of concrete affirmation of their support of the ABM Treaty. As Mr. Pike points out in his article, the Soviets do not have strong incentives to terminate the treaty.

The treaty is in their interest as well as in ours. In any antiballistic race with the United States, Pike contends that the Soviets are at least 10 years behind technologically. An ABM system would not, in Pike's view, constitute a cost effective investment for the protection of Soviet missile sites and would be just about useless to protect population centers. U.S. offensive missiles now in being could penetrate whatever the Soviets constructed in the next 10 years or more. On the other hand, in Pike's view, if the Soviets believe the United States is rushing ahead with its advanced ABM system, the Soviets could deploy a less effective defense that could be operational years before the more advanced American system could be in place.

Just think, Mr. President, of the danger under those circumstances. The Soviet Union would have a rudimentary but partially successful ABM system able to knock out many of our incoming missiles; but for a limited time they would have that advantage because the United States would have a super-ABM system on the way. What a scenario for a Soviet Union dictator to feel the time to strike is now or never.

This is why the ABM Treaty can be so critical in preventing a nuclear war by preventing their going ahead and our going ahead at all.

MYTH OF THE DAY—THE AMERICAN LABOR MOVEMENT IS DEAD

Mr. PROXMIRE. Mr. President, I want to make a statement this morning about an issue that I think has, just by neglect by many people, been assumed is the case.

The myth of the day is that the American labor movement is dead. In the next 2 days I intend to debunk the idea the American labor movement has succumbed to mortal blows dealt by both a changed economic and social environment and fossilized internal leadership and programs.

As demonstrated by innovative and ambitious strategies presented and approved at the recent biennial meeting of the AFL-CIO in Anaheim, CA, the AFL-CIO continues to serve as the people's lobby for not only higher wages and benefits but also better working conditions, the dignity of working people everywhere, civil rights, and education.

Today, there are some 40,000 local unions negotiating and administering more than 145,000 labor contracts.

Mr. President, we should keep in mind that this does not happen in the Soviet Union, it does not happen effectively in Poland. The labor movement is struggling there, but it is suppressed by the Government. The great glory of this country is our pluralism, our independence, our freedom, the fact that we can have labor unions that are strong and can stand up to big business and big government.

The local unions in this country are doing the solid, nuts and bolts work of the labor movement in trying to improve the conditions of American workers and their families.

The rise of the middle class out of the depths of the depression parallels the rise of organized labor especially after the passage of the Wagner Act in 1935. In many ways, unionism helped create America's large middle class and our Nation's great economic growth over the 40 years since the end of World War II.

The fringe benefits which are so much a part of the economic security of the American family is to a large part the result of initial victories won by unions in the post-World War II period.

Because of organized labor's initiation and sustaining of these programs, today 140 million Americans receive health care through their place of employment.

Most workers are entitled to holiday and paid vacations and sick pay and pensions. Millions have life insurance through their jobs and workman's compensation is a law of the land.

Incidentally, unions have played a very big part in making that the law of the land, persuading Members of Congress to vote for it.

It should be quickly pointed out that winning in the workplace for organized labor now often means protecting these already hard-won rights and benefits. To say that organized labor is no longer winning the huge pay and benefits' increases that were its hallmark decades ago is similar to saying that an Olympic champion is not improving his performance now as much as he did between his high school and college competitions.

Today, the AFL-CIO continues its efforts to protect the health and safety of American workers. For example, organized labor has set a high priority on insuring that people know what hazards they may be facing when they enter a particular workplace. Since the Occupational Safety and Health Administration has the major responsibility of seeing that employers provide healthy environments for their workers, the AFL-CIO has been a constant watchdog of that critically important Federal agency.

The strength and vitality of organized labor at the local level has resulted in developing literally thousands of individuals who are today exercising leadership roles far beyond their local union.

That is something neglected, the fact that this gives many, many Americans the opportunity to develop leadership qualities. Every small union local has a president, a vice president, and other officials who can exert leadership in a way that they could not possibly exert it absent that kind of a free labor union movement.

From scouting to blood drives, from drug abuse programs to local crime resistance projects, from foster parent programs to community activities for the elderly—in every one of these pursuits you will find the active involvement and leadership of organized labor.

Clearly, the AFL-CIO with its over 13 million members is still a vigorous and potent force in American life, in spite of the fact that usually in political campaigns they take a pasting—certainly in the last campaign they did. And people have too often associated labor unions with fat, lazy, incompetent, and crooked bosses, whereas the great majority of union leaders are conscientious, hardworking people who get very little for their work and give a great deal.

TERROR ON TRIAL

Mr. PROXMIRE. Mr. President, on September 18 the Argentine Government rested its case in its trial of nine former Argentine Government leaders accused of murder, torture, and unlawful detention.

Last October an Argentine Government commission blamed these men for the deaths of 8,960 men, women,

and children. Unfortunately, many more were tortured.

Mr. Julio Strassero, the Argentine state prosecutor in the case stated:

> This trial has meant for those of us who had the painful privilege of following it closely, a descent into the terrible depths of the human soul, where misery, degradation, and horror have been registered with such intensity that it could scarcely have been imagined or understood.

Friends of the nine defendants call this a show trial, and in one sense it is. Three of the defendants are former presidents, Generals Videla, Viola, and Galtieri. The other six are brigadier generals or admirals who served on their juntas.

Mr. President, such proceedings are unprecedented in Latin America. Dictators have been toppled and exiled, even assassinated, but never before have they been put on trial by a democratically elected civilian government.

It is a welcome sign that the voice of reason is being heard in Argentina where it had been suppressed for such a long time. For the first time, the Argentine public is learning the truth about what some of its leaders have done.

The development of human rights protection is a slow and tedious process. Sadly, savage and serious violations occur throughout the world. Nevertheless, the trial in Argentina represents an important step in guaranteeing human rights. Other steps must follow.

Mr. President, the U.S. Senate must ratify the Genocide Treaty making clear to the world our support for human rights. Our ratification can have a profound impact on people all over the world by demonstrating that the United States is unalterably opposed to the heinous crime of genocide.

Mr. President, by ratifying the Genocide Treaty we can serve notice to the world's leaders, including the nine former Argentine Government officials, that we shall hold them accountable for their actions.

RECOGNITION OF SENATOR BRADLEY

The PRESIDING OFFICER (Mr. MCCONNELL). Under the previous order, the Senator from New Jersey [Mr. BRADLEY] is recognized for not to exceed 15 minutes.

ECONOMIC SECURITY IN RETIREMENT: WHOSE RESPONSIBILITY?

Mr. BRADLEY. Mr. President, in this country, the whole notion of planning for retirement is a relatively recent phenomenon. A century ago, when life expectancy was 46 years, most men worked until they died, and most men and women who could not work were supported by their families.

But times have changed. Life expectancy has increased dramatically. People aged 65 can now expect to live an additional 10 to 20 years. And since people are living longer, they are spending a smaller portion of their lifespan in the labor force. A man born in 1900 spent about 70 percent of his life in the labor force; a man born today will only spend a little more than half of his life in the labor force.

That adds up to fewer years of income production and more years of nonproduction. Hence, the need for more retirement planning.

Since the 1930's, experts have come to view retirement income as a three-legged stool, made up of Social Security, private pensions and savings. This system has served us fairly well. In 1950, when only one out of four elderly persons received Social Security and very few people received pensions, over 35 percent of the elderly were living in poverty. Currently, with 9 out of 10 elderly persons receiving Social Security and one quarter of retirees receiving pensions, only 14 percent of older Americans fall below the poverty line. It is fair to conclude that our three-legged stool has generally succeeded in providing adequate economic security for the elderly.

But the changing nature and needs of our elderly require that we broaden our definition of "adequate economic security." What was considered adequate 30 years ago is certainly not adequate today. And what is adequate today will not be adequate in 30 years.

Today's retirees and those who approach retirement are not just concerned about how to pay the rent and buy food. Another economic need overwhelms those relatively small monetary requirements. The need for long-term health care is apparent and its astronomical cost frightens them.

The greatest economic risk that the elderly currently face is the risk of incurring massive health care costs. And this risk will grow over time. To the extent that our current three-legged stool fails to take into account these increased costs, our system will fail to meet the economic security needs of retirees.

Given this expanded view of economic security in retirement, how will our three legged-stool hold up as our Nation ages? Which legs will need to be strengthened to ensure economic security? And who will have to take more responsibility for ensuring economic security in retirement—we, as individuals; we, as employers, or we, as a Nation?

These are not simple questions. Our European friends are currently grappling with the issue of how to provide adequate economic security to their rapidly growing aging population. And one thing is certain: We will not be far behind them, especially when the baby boom of 1950 becomes the senior boom in the early part of the next century.

So, what does the future hold for our three-legged stool?

SOCIAL SECURITY

It is impossible to discuss U.S. retirement policy without starting with the Social Security Act, one of this Nation's most significant achievements. It would not be an exaggeration to say that Social Security wrought major changes in the fabric of American life. Passage of this legislation in 1935 represented the expression of a new, emerging, and growing consensus—a consensus that we, as individuals, are not islands—that we have responsibilities for the well-being of our neighbors as well as ourselves. As this consensus developed, the first tentative safety net in America took shape.

Fifty years ago, when the question was asked, "Who is responsible for retirement security?", the answer was clear: Individuals and their families. When the question is asked today, most Americans answer that we, as a Nation, are also partly responsible. Social Security is how this responsibility is discharged: Those who are able to be productive—the young and employed—provide to those who are not—the elderly and disabled.

A recent public opinion poll concluded that extremely strong support exists among all age groups for the continuation of the Social Security Program. Roughly 9 out of 10 Americans oppose the phasing out of Social Security and replacing it with reliance on private pension plans. Three-quarters of all Americans consider the Social Security tax to be fair—compare that to the income tax—and only one-quarter of Americans think that the Social Security tax is too high.

This sense of community and commitment was readily apparent in 1982, when it was becoming increasingly clear that the Social Security Trust Fund was in imminent danger of insolvency; corrective measures had to be adopted or the July 1, 1983, Social Security check would not be in the mail. The legislation that was adopted asked everyone to pitch in to save the system. And everyone did, because everyone saw the need to pitch in to keep this important life support system going. The legislative changes adopted in 1983 put the Social Security Retirement Program on sound footing for several decades. And the progressive benefit structure, coupled with taxation of benefits, will insure that an increasing share of benefits will go to lower income elderly.

Over the next 25 years, I do not anticipate major changes in the retirement component of Social Security; I foresee a mature retirement system, with a stable benefit structure that continues to replace the current levels of preretirement income as well as a

stable tax system to finance this level of benefits.

But when we look at the Medicare Trust Fund—another essential component of our retirement security policy—we see a very different situation. Under most economic forecasts, Medicare Trust Fund reserves will be depleted well before the first baby boomer nears retirement. Strong cost containment measures will have to be instituted if we are to live up to our current commitments to provide adequate acute care coverage. And this does not take into account the growing costs associated with the long-term care needs of the elderly.

Somewhere in our three-legged stool, we will have to find the means to finance these rapidly increasing costs. Where is the money going to come from? Will the retirement and health care components of Social Security be able to pick up all or part of these costs?

Short of increasing Social Security revenues, there is one pot of money that could be available over the next couple of decades for expanded benefits. According to the Social Security actuaries, the Retirement Trust Fund is scheduled to build up massive surpluses—$7 trillion over the next 30 years. There will be suggestions that we use those funds to expand Medicare benefits or expand cash benefits to help the elderly pay for increased health care costs. But if we do that, we will not have the funds needed in the period 2015 to 2040 to pay basic Social Security retirement benefits to the baby boom generation. If the Congress spends the surplus on expanded benefits, rather than saving it for the senior boom generation, the Social Security System will be in a very, very precarious condition in 30 years: Tax rates will have to skyrocket to pay retirement benefits. Clearly then, we would pay a big price for failing to find a way in the near future to finance these health care costs.

In sum, in the years ahead, the Social Security retirement benefit will continue to be the largest single source of income for most elderly Americans, with an increasing share of benefits targeted to lower income elderly. The program should be able to replace roughly the same proportion of preretirement income as it currently does. But the economic needs of the elderly—as individuals and as a group—will increase in future years. Will we be able to significantly expand benefits beyond their current levels to cover these additional costs? Will Social Security be able to become a considerably larger leg of our stool? I think not. Therefore, most of the increases in retirement income will have to come from the private legs of the stool—savings and pensions. Let us look at each of those.

THE OTHER LEGS OF THE STOOL

The elderly's asset and pension income has been growing in recent years. Savings amounted to 23 percent of the elderly's total income in 1981, up from 15 percent in 1967. And about 14 percent of the elderly's income comes from pensions, up from 9 percent in 1962.

As of 1983, about 50 percent of all private industry employees 18 years old and older were covered by pensions in their current jobs. Although some growth will occur, that percentage is expected to be relatively stable for the foreseeable future. If past behavior continues, about half of the covered workers—one-fourth of all workers—can expect to receive pensions when they reach retirement age.

Pensions will continue to be an important retirement security component. But unless we can increase the number of employees getting pensions—remember, only a fourth of the workers get them—this component will not provide extra security for a considerable share of the population.

What is the outlook for savings? The baby boomers have not been in a position up until now to save much or to vest in pensions. But the next 20 to 30 years may be different. Right now, the baby boomers are settling down—buying houses and consumer goods and settling into careers. We may see a real increase in the savings rate for this age group as they start to prepare for retirement. If this happens, it will be a very favorable outcome. We need to do whatever we can to encourage savings.

THE ROLE OF TAX POLICY

Under the Federal income tax system, people are generally taxed on income as it is earned. Historically, exceptions to this rule have been made to encourage certain retirement savings. Present tax law provides incentives by permitting taxpayers to postpone income tax on current compensation set aside for retirement and on the investment earnings of those savings, under special pension and deferred compensation plans.

There have been two reasons for granting favorable treatment to these retirement plans: To encourage individuals to save for their own retirement, and, second, to create additional savings that contribute to the formulation of investment capital needed for economic growth.

While many people criticize tax policy for not doing enough to encourage people to save more, others identify serious shortcomings in the current approach. For example, there is concern that tax preferred retirement savings provide disproportionately generous benefits to the relatively well off while neglecting the neediest Americans. We can gauge whether this concern is justified by looking at the primary sources of income among persons of retirement age. These include wages and salaries, pensions, Social Security benefits, interest and dividends, and capital gains. According to a recent study by the Congress' Committee on Taxation, Social Security benefits plus distributions from pension plans comprise less than half of all income going to taxpayers over 65. Social Security benefits represent the largest single source of income to these taxpayers. But while over 90 percent of the elderly received at least some Social Security benefits, those benefits represented less than 30 percent of total income from all sources ($113 billion of $387 billion in 1983). An amount almost as large, $103 billion, came from interest and dividends.

Of the total $387 billion in total income received by those over 65, only about 18 percent—$70 billion—came from public and private pensions.

These statistics raise important equity issues. Relatively few taxpayers aged 65 and over benefit from tax preferred pension and other retirement plans. Yet everyone—including the elderly—subsidize these plans by paying higher tax rates on income that does not enjoy special treatment, like interest and dividends. For the period fiscal year 1986-90, the revenue loss attributable to the various tax-favored income security provisions is projected to reach almost $450 billion. We make up for this loss by higher tax rates on income that does not get favored treatment and on which most retired people depend.

While I am not advocating repeal of all the tax preferences currently available to retirement income, I do believe we need to examine the existing system with a view to ensuring that retirement income security is available to everyone who has worked and earned and that our tax policy in this area is truly fair.

We also need to take a hard look at whether the present tax law achieves the second rationale for tax-preferred retirement vehicles; namely, encouraging more savings. Here, the record is clouded at best. Let us take a look at IRA's as a case in point. Available data show, not surprisingly, that the greatest participation is among middle- and upper-income taxpayers. In 1983, over 66 percent of total IRA contributions were made by taxpayers with AGI over $30,000. In addition, this group was responsible for over 75 percent of total spousal IRA contributions.

These data have led many to argue that such tax-preferred savings vehicles result in greater retirement income only for taxpayers whose savings are more than likely to be adequate during retirement even without a tax break. Thus, the incentives merely shift part of the cost of this group's retirement savings to the Federal Government which in turns shifts

that cost to taxpayers as a whole in the form of higher tax rates.

In addition, studies show that IRA contributions have not come from new savings—notwithstanding Congress' expectation when it adopted the IRA provisions that this would happen. Most experts agree that there is no evidence of any change in the U.S. savings rate looked at from an historical perspective, and, if anything, the most recent data suggest saving is on the decline. And there is a growing consensus, reflected in all the pending tax reform proposals, that the existing incentives simply have not worked. Not only have they not increased savings, they have also reduced the progressivity of the tax laws and introduced serious distortions into the allocation of capital.

It may be that savings simply is not very responsive to tax changes that increase after tax rewards. But even if it is, the existing incentives are, for the most part, not well designed to achieve their stated goals. For one thing, most of the savings tax benefits go to taxpayers who merely switch assets from one form of saving or one kind of account to another. Taking money out of one's savings account to put into an IRA will reduce your taxes but it does nothing to increase savings.

Another shortcoming is that the Tax Code still rewards borrowing. Thus, a taxpayer can borrow and deduct the interest to purchase an asset whose income is fully or partially tax exempt. This gives him a tax reduction even though his net saving has not increased. This problem, I should add, is exacerbated by inflation because the deduction for nominal interest payments may result in a negative real after tax borrowing rate.

So if we are serious about legislating tax incentives that will really encourage saving, as opposed to tax arbitrage, we need to pay much greater attention to designing incentives that work. And we need to get rid of the tax provisions that encourage borrowing.

And if we are serious about promoting pension savings as a way of enhancing both capital formation and retirement security, we might want to take a hard look at what all those funds are being used for. I am especially troubled, as I know many others are, by recent corporate attempts to divert billions in surplus pension money to other uses such as takeover financing. Indeed, the mergers and acquisitions craze of the last 2 years appears to owe much of its vitality to pension fund redemptions. For example, the Occidental Petroleum Corp. financed part of its Cities Service purchase with $400 million from Cities' pension plans; Mobil captured $29 million in excess pension funds after it took over Superior Oil; and the St. Regis Corp. collected $88 million after the postacquisition of Champion International's assets. Even the administration has recognized there is a problem here. To deal with it, they have proposed 10 percent excise taxes on all profits from pension fund redemptions. With pension assets of well over a trillion dollars, it is appropriate for Government to worry about just how those assets are deployed and for whose benefit.

In my judgment, the single most effective tax policy for achieving these goals is to lower tax rates and broaden the tax base. Few would question that there is a public purpose in giving an incentive for a pension to provide an adequate, indeed a comfortable, retirement. But beyond a certain level, individuals should save themselves out of after tax dollars. This is particularly true under a tax reform measure like the Bradley-Gephardt Fair Tax, where 80 percent of taxpayers pay no more than 14 percent in tax and the highest rate on any income is 30 percent. That is a powerful incentive for saving for retirement, or indeed for any other purpose.

Moreover, lowering the tax rates and broadening the base would ensure that income is taxed more uniformly, thereby improving resource allocation and directing capital toward the most efficient—not merely the most tax preferred—uses. Lower rates would reinforce this positive effect. It would also promote savings by reducing the tax subsidy for borrowing. Finally, because tax preferences really redistribute a greater share of the total tax burden to those who are not rich enough or sophisticated enough to take advantage of complex tax rules, a low-rate broad-based tax would significantly enhance tax fairness.

U.S. RETIREMENT POLICY AND THE INTERNATIONAL ECONOMY

A recent development is the contribution of all Federal expenditures and transfers to a Federal budget deficit that is sending shock waves through the international economy. In order to finance this budget deficit, U.S. interest rates have risen and attracted a massive inflow of capital from abroad. This capital inflow, on the order of $100 billion per year, helps to raise the value of the dollar on international currency markets and thus perpetuates the trade deficit that is eroding U.S. manufacturing competitiveness.

If Americans were saving at a considerably higher rate, these international problems would be minimized, because we wouldn't need major inflows of foreign capital to finance our deficit.

Social Security plays a special role among the categories of Government expenditure contributing indirectly to the U.S. trade deficit. This is because Social Security—as important and beneficial as it is—also tends to discourage U.S. savings. It is not necessary to save as much for retirement to the extent that Social Security provides retirement income that is protected against inflation. Between 1965 and 1983 Social Security and SSI coverage increased from 82 to 96 percent of the over-65 population; while personal savings dropped from 7.1 to 5.0 percent of disposable income.

Decreased U.S. savings forces the Government to borrow from abroad. Borrowing from Japanese savers has been particularly large, amounting to an estimated $35 to $40 billion in 1984. Government borrowing from abroad is an immediate cause of the U.S. trade deficit, since it drains the dollars that foreigners would otherwise spend on U.S. exports.

In sum, we are faced with the possibility that the Government's leg of the retirement stool is inadvertently contributing to some extent to the erosion of U.S. industrial competitiveness. Social Security discourages U.S. savings, and maybe that's the price of humane Government, but it forces the Government to borrow from abroad. This borrowing cuts into our export markets. In a very real sense, because of our large deficits, U.S. industry and Social Security beneficiaries are competing for foreign resources, and until we can revitalize U.S. savings rates, or cut the budget deficit, U.S. industry will continue to lose ground.

That does not mean that we end or even reduce our support for Social Security, what it does mean is that until we get our deficits down to manageable size, there will be a tension between meeting the needs of the elderly and economic growth.

SUMMARY

In summary, as we age as a nation, our definition of retirement security will have to expand. The elderly—as individuals and as a group—are going to need more than our current commitments will provide. Their expanded needs will have to be met. You will, tomorrow, be examining how we do that.

Failure to satisfactorily meet the challenge may well create a tension between meeting the needs of the elderly and other responsibilities of families and of Government. That is a tension that need not be significant if we take effective action to plan for the long-term health needs of the elderly, if we reform our income tax system to encourage private savings through overall reduction of rates and if we move more effectively than we have to get our budget deficits under control.

How well we accomplish those tasks will determine not only the welfare of our elderly but the economic welfare of our country.

The PRESIDING OFFICER. The Senator's time has expired.

RECOGNITION OF SENATOR BAUCUS

The PRESIDING OFFICER. The Senator from Montana is recognized.

THE JAPANESE TECHNICAL LITERATURE ACT OF 1985

Mr. BAUCUS. Mr. President, on May 6, I introduced S. 1073, the "Japanese Technical Literature Act, for myself and Senator ROCKEFELLER. The Commerce Committee has reported this bill favorably and placed it on the calendar.

I would like to explain why this bill is important.

THE TRADE CRISIS

America faces a trade crisis.

We all know the statistics.

Our international competitors are beating the daylights out of us. As a result, our trade deficit is getting larger each month.

Two important causes of our declining competitiveness are the high value of the dollar and unfair foreign trade practices.

Both of these causes have received a lot of attention in this Chamber, as they should.

COMPETITIVENESS

But there's a third cause, which has not received enough attention: declining American productivity growth.

Let's face facts. In the end, we have to produce our way out of the trade deficit.

Unfortunately, our competitors are increasing their productivity faster than we are:

Germany twice as fast; France five times as fast; and Japan six times as fast.

Why has this happened? Why have we lost our edge in the productivity growth rate?

One reason is our low savings rate, which sank to 1.9 percent last September.

Another reason is failings in our education performance, compared with some of our competitors.

And a third reason is that we haven't adapted well to the new, hypercompetitive global economy.

JAPANESE TECHNICAL LANGUAGE POLICY

Let me give one small example of our failure to adapt.

A commonly accepted reason for Japan's postwar economic miracle is Japan's ability to incorporate American technology.

This has not happened by accident.

Japan sends 13,000 undergraduates to American universities each year.

Japanese companies use university affiliate programs, endowed chairs, and university-based research to get early access to U.S. technology.

And, since 1957, the Japanese Prime Minister's office has operated the "Japanese Information Center for Science and Technology," which gathers information from around the world, in all languages, translates it, and makes it available to Japanese companies.

What do we do in America? Americans, in contrast, have not paid much attention to Japanese technical literature.

At one time, this may have been justified by the belief that the Japanese are imitators, not innovators.

But even if that belief was justified once, it isn't now. Japan ranks third in scientific research, just behind the United States and the Soviet Union. Japanese semiconductors, telecommunications equipment, fiberoptics, biotechnology, and robotics technology compete directly with ours.

There is plenty of published material describing Japanese technical developments. As anyone who has visited Japan knows, the Japanese people are prolific writers and voracious readers. In fact, the Japanese publish about 10,000 technical journals, from "Advances in Biophysics" to "World of Steel."

Unfortunately, we do not monitor Japanese technical literature closely.

Japanese is a difficult language.

And acquiring and translating Japanese technical documents is very expensive, especially for small companies.

The result is that we know very little about Japanese inventions. As an Assistant Commerce Secretary recently said, "We are not doing an adequate job of translating, much less monitoring."

THE JAPANESE TECHNICAL LITERATURE ACT

To address the problem, I introduced S. 1073. I am proud to have the Senator from West Virginia [Mr. ROCKEFELLER] as a chief cosponsor.

As the Commerce Committee report says, "The objective of the bill is to create a program within the Federal Government to increase the availability of Japanese technical literature within the United States." To accomplish this, we build upon several nascent private sector and Government programs.

Specifically, the bill directs the Commerce Department to take four specific actions.

First, it directs the Commerce Department to monitor Japanese technical information and translate selected Japanese technical documents.

Second, it directs the Commerce Department to prepare an annual report describing important Japanese technical developments.

Third, it directs the Department to make existing Government translations more widely available to U.S. businesses, primarily by publishing an annual index of Government translations.

Finally, it directs the Department to encourage more United States companies and trade associations to review Japanese literature.

Mr. President, Senator ROCKEFELLER and I have worked hard, with the help of the Commerce Committee and its staff, to design a program that helps U.S. businesses at the lowest possible cost.

I think we have succeeded.

And I am delighted that our bill has been endorsed by the National Association of Manufacturers, the Semiconductor Industry Association, and the American Institute of Aeronautics and Astronautics.

CONCLUSION

Overall, our Japanese Technical Literature Act will encourage American Government and business to work together to identify Japanese technical breakthroughs and respond to them quickly.

This will be only one small step toward restoring American trade leadership.

For, as the Japanese say, a journey of a thousand miles begins with a single step.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business, not to extend beyond 10 a.m., with statements therein limited to 5 minutes each.

IN PRAISE OF CHAIRMAN DICK LUGAR

● Mr. DOLE. Mr. President, in the last week, two major newspapers, the Wall Street Journal and the Washington Post, have paid homage to the skills and achievements of one of our own—DICK LUGAR.

The Wall Street Journal featured Senator LUGAR on its front page last Friday under the heading "Strong Helmsman." The Post article is entitled "Virtuoso Performance Surprises Hill" and appears on page A-12 of Sunday's edition. While the Post article may be accurate, the title is misleading. It comes as no surprise to anyone who knows DICK LUGAR that his intelligence and rare gifts of conciliation and judgment would once again prove him to be the one to tackle an enormous task in a masterful way.

The upshot of these articles is that as chairman of the Senate Foreign Relations Committee, one of the most prestigious posts in American politics, Senator LUGAR has quickly injected the committee with an espirit de corps that has resulted in respect and acclaim for the chairman of the committee and its members.

Hard work made DICK LUGAR a Rhodes Scholar just as it made him one of the most respected mayors Indianapolis has claimed. He has had a dominant impact on domestic policy

and has already made an indelible imprint on the foreign policy of this country. As a colleague and a friend I congratulate DICK LUGAR on his good work.

I commend these articles to my colleagues and ask unanimous consent that they be printed in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Wall Street Journal, Nov. 1, 1985]

STRONG HELMSMAN; SENATOR LUGAR IS GAINING NEW PRESTIGE FOR PANEL ON FOREIGN RELATIONS

(By Robert S. Greenberger)

WASHINGTON—During a recent roast of Sen. Richard Lugar, who is known as a competent but colorless legislator, an old friend served up a one-liner that brought down the house.

"Dick has maintained that childhood capacity of walking into an empty room and blending right in," joked William Ruckelshaus, former administrator of the Environmental Protection Agency. Mr. Ruckelshaus, who has known the Indiana Republican since kindergarten, says, "I used to go over to his house and push him off his swings."

But since becoming the chairman of the Senate Foreign Relations Committee last January, Dick Lugar has been doing the pushing. By finding consensus positions on foreign-policy issues and selling them to the White House, he has restored some of the credibility and clout that the once influential panel lost in recent years.

SOUTH AFRICA AND JORDAN

Some examples of his pushing:

As racial violence grew in South Africa, Mr. Lugar saw the political and diplomatic risks in the Reagan administration's policies toward that country and pressed a reluctant White House to impose economic sanctions.

He saved the White House from an embarrassing defeat by forging a compromise to delay a showdown on a controversial arms sale to Jordan.

He crafted a bipartisan consensus on a $12.8 billion foreign-aid authorization bill, the first such bill that the committee had been able to clear since 1981.

"Everyone knows he has made the committee more effective," says Sen. Joseph Biden, a liberal Delaware Democrat who is a member of the panel, "He can make judgments and take the committee with him."

As a result, Mr. Lugar and his committee have an unusual opportunity to fill any gaps in the administration's foreign policy. The White House hasn't achieved significant successes in the Middle East following its involvement in Lebancn. It is struggling to find ways to promote orderly change in the Philippines. And its policy in the arms-limitation talks with the Soviet Union has been marked by internal disarray; if an agreement is reached, the committee is expected to play a decisive role in the drive for Senate ratification.

Mr. Lugar is well positioned to strengthen the role of the committee, which has been more liberal than the rest of the Senate for much of the past two decades. A man of the middle and a man of the Senate, he reflects the nation's conservative mood and enjoys the trust of colleagues on the left and the right.

He also has the confidence of the administration. He breakfasts every other week with Secretary of State George Shultz, when their schedules permit, and has long telephone conversations with him nearly every weekend. When the White House decided to impose economic sanctions on South Africa, Mr. Shultz, nattily attired in yellow pants and green golf shirt, sought out Sen. Lugar in his Capitol hideaway office late on a Saturday afternoon to deliver the news.

Mr. Lugar notes that the committee has the respect, too, of the Senate membership. "There is a sense of confidence on the part of members on both sides of the aisle that the committee is thoughtful in what it does," he says. This trust is important because senators often rely on the panel for guidance on many issues they don't have time to master.

"Senators don't want to be mousetrapped into votes that can be used destructively against them by somebody back home in a campaign," Mr. Lugar explains.

SCOUT AND SCHOLAR

Dick Lugar, a 53-year-old one-time Eagle Scout and Rhodes Scholar, brings considerable energy to his post. After becoming chairman, he set out to meet as many foreign ambassadors to Washington as possible and on some days had "three or four of them stacked up in his office" waiting to see him, an aide says. Last summer he spent the five-week congressional recess pounding out a still-untitled book on foreign policy.

Mr. Lugar contends that most Senate members are ready to follow the panel's lead and that even on minor issues his influence is growing. A few months ago, he recalls, a conservative senator complained at the Republicans' weekly Tuesday luncheon about rumors that a Soviet ship with nuclear weapons was heading toward a Mexican port. The irate senator vowed to introduce a resolution cutting off aid to Mexico if the ship was permitted to dock. Sen. Lugar, understanding that such a resolution would needlessly strain U.S.-Mexican relations, convinced the senator that he would quietly pass the word to the State Department to look into the matter.

"I don't know whether the story was true or not, but I do know that you can't conduct foreign policy on the lam, no matter how strongly you feel," he says.

Sen. Biden says that his Indiana colleague is "a masterful chairman. He's a good strategist for this administration because he's able to keep the committee out of issues the administration doesn't want it involved in." At times, though, Sen. Lugar seems too deferential to the administration and too eager to do its bidding.

For instance, in a bizarre incident on the Senate floor in September, Mr. Lugar tarnished the bipartisan image he had built during his successful effort to persuade the White House to impose economic sanctions on South Africa. To prevent a procedural vote on tougher, congressional sanctions after the White House had imposed its own penalties, Mr. Lugar, at the behest of Sen. Robert Dole, the majority leader, put the official copy of the tough bill in his jacket pocket and left the Senate floor to place it in his safe.

Mr. Lugar says the parliamentary maneuver was borrowed from the Democrats, but his opponents were enraged. "It was an arbitrary act by one senator—a one-person veto," grouses Sen. Alan Cranston, a liberal California Democrat.

LOW EXPECTATIONS

When Mr. Lugar became chairman—after an unsuccessful bid to become Senate majority leader—many panel members had low expectations. Although he had been on the Foreign Relations Committee since 1979, he hadn't played a particularly active role on the panel. Staff aides considered him a rubber stamp for the administration and said he usually was active only on those issues on which the White House asked for his help. When the panel under Sen. Charles Percy, the previous chairman, pushed to attach conditions to aid Turkey, for example, it was Mr. Lugar who was the administration's point man in opposing the plan.

But he soon surprised colleagues with his skill and evenhandedness in balancing the divergent views on the committee. When Sen. Jesse Helms, the ultraconservative North Carolina Republican, objected to language in a genocide treaty that has languished in the Senate for 37 years, Mr. Lugar worked patiently with him and met some of his concerns in a package that passed the panel. The two senators work closely together often; Mr. Lugar is the second-ranking GOP member on the Agriculture Committee, which Mr. Helms heads.

At the same time, Mr. Lugar works well with the Foreign Relations Committee's liberal Democrats. When Sen. John Kerry of Massachusetts, the panel's junior member, pushed an amendment limiting military aid to the Philippines and linking it to that nation's human-rights record, Mr. Lugar listened patiently. The amendment was defeated in committee, but Mr. Lugar honored a pledge to support a Kerry resolution designed to pressure the Philippines into improving its human-rights record and moving toward democracy. The Senate passed the resolution.

BEATING LINDSAY

Throughout his political career the soft-spoken Mr. Lugar has turned to his advantage a general inclination to underestimate him. In 1969, when he was the mayor of Indianapolis, he successfully mounted a surprise challenge to New York's Mayor John Lindsay, the prototype of 1960s charisma, to become the vice president of the National League of Cities. He became its president a year later. In 1982, he edged out the highly respected Sen. Bob Packwood of Oregon to head the National Republican Senatorial Committee, which raises and spends money for GOP senators.

Now he is devoting his energy to reestablishing the Foreign Relations Committee's leadership in shaping a bipartisan foreign policy. The panel's role has diminished since the heady days when Sen. J. William Fulbright, the Arkansas Democrat who ruled it for 15 years, helped turn the nation against the Vietnam War with televised hearings.

After Vietnam—and Mr. Fulbright's defeat in a 1974 primary—other committees nibbled away at the panel's foreign-policy turf. In 1979, when the Senate debated the Salt II treaty (which Mr. Lugar opposed), the Armed Services Committee aggressively moved in to hold hearings, even though the Foreign Relations panel had clear jurisdiction.

The decline in power was accelerated by a succession of Foreign Relations Committee chairmen who lacked Mr. Fulbright's stature. First came two Democrats, John Sparkman of Alabama, a caretaker chairman in the twilight of his career, and Frank Church of Idaho, a liberal whose personality was too abrasive for some colleagues. Then, when Republicans won control of the Senate in 1980, Sen. Percy of Illinois

became the panel's chairman. He was perceived as ineffective and weak and was badly distracted by a growing electoral challenge in his home state that eventually led to his defeat.

In the committee's good old days, Mr. Fullbright used to complain that members frequently missed hearings because they were running for the presidency. John F. Kennedy was the last committee member to win the White House; Eugene McCarthy, Hubert Humphrey, George McGovern and Mr. Percy were panel members who didn't make it. In the last decade, however, the committee lost some of its appeal and some potential new members worried that service on the panel could be a liability because "foreign policy was becoming less of an asset back home and membership on the committee could end up being an electoral albatross," observes Norman Ornstein, an expert on Congress at the American Enterprise Institute.

Last January, in his first major action as chairman, Mr. Lugar convened a set of hearings on American foreign policy. An aide says Mr. Lugar wanted to get the attention of panel members, whose attentance at hearings had been slipping, and also to raise the committee's visibility by signaling that the panel, once again, would become the forum for comprehensive foreign-policy debates. The hearings also reflected Mr. Lugar's view that it was necessary to redefine an American consensus in foreign policy after the turmoil of the Vietnam era.

Although generally serious, Mr. Lugar occasionally shows a glimmer of humor. On the morning that President Reagan changed course because of Senate pressure and announced sanctions against South Africa, Mr. Lugar held a news conference. When asked if the administration had buckled to congressional pressure, he looked at his watch and replied: "No, I think this was an independent action. The Senate isn't due to convene for another hour and a half."

[From the Washington Post, Nov. 3, 1985]

VIRTUOSO PERFORMANCE SURPRISES HILL

(By John M. Goshko)

On the afternoon of Saturday, Sept. 7, Senate Foreign Relations Committee Chairman Richard G. Lugar (R-Ind.) was in his Capitol hideaway office catching up on paperwork when Secretary of State George P. Shultz unexpectedly called to say, "Dick, I'd like to come over and talk with you about South Africa."

An hour later, Shultz arrived, still wearing the green polo shirt and canary yellow trousers of a golf outing. With Shultz was Chester A. Crocker, his assistant secretary for African affairs and the author of President Reagan's controversial "constructive engagement" policy of friendship for South Africa's white minority government.

In a gesture symbolic of Lugar's increasing influence in U.S. foreign policy, Shultz handed him a draft copy of a White House order imposing economic sanctions against South Africa. After months of resistance, the president finally had been persuaded—in large measure by the persistant senator from Indiana—that such action was the best way to avoid an embarrassing defeat by a combative Congress determined to impose even tougher sanctions on Pretoria's apartheid regime.

It wasn't the first time in the 10 months since Lugar became committee chairman that the administration, having boxed itself into a corner, relied on him to find an escape route. The deceptively soft-spoken senator also has hammered out compromises on such sensitive issues as an arms sales to Jordan and aid to Nicaragua's counterrevolutionaries.

In the process, he is leading the Foreign Relations Committee out of the drift and malaise that hobbled it for more than a decade and is restoring much of its luster as a force in foreign policy.

Not much was expected from Lugar last January when he became chairman following the 1984 election defeat of Sen. Charles H. Percy (R-Ill.). Lugar's record on the committee, where he had served since 1979, had been unspectacular; he generally was regarded in the Senate as a pragmatic, slightly right-of-center Republican with respected opinions but a penchant for hugging the background.

"When a leadership spot was up for grabs, everyone tended to think of Dick as a good second or third choice," one Senate colleague said.

Other senators praised his intellect—Lugar was a Rhodes Scholar—but they also spoke of his "Boy Scout image." In general, the former Eagle Scout seemed cut from the same gray cloth as his two predecessors in the chairmanship, Percy and the late Sen. Frank Church (D-Idaho).

Lugar has confounded those lowered expectations by displaying a virtuoso ability to stride into confrontations between the administration and Congress and produce an 11th-hour formula for compromise.

Less dazzling, but ultimately more important, has been Lugar's ability to distract Democrats from his staunchly conservative record and inject a bipartisanship into committee deliberations through a capacity to listen to other sides of an argument.

In dealing with a potentially fractious committee membership that ranges from Sen. Jesse Helms (R-N.C.) on the far right to liberals such as Sens. Alan Cranston (D-Calif.) and Christopher J. Dodd (D-Conn.), Lugar wins high marks for fairness.

"He's very charming and very accommodating," Sen. Nancy Landon Kassebaum (R-Kan.) said. "But that doesn't mean that it's a committee of coequals. It goes almost unnoticed, but his way of accommodating differing views always seems to end up with them being wrapped around a position that reflects Dick Lugar's interpretation of the way things should be. It's the mark of a strong chairman that he can do that while maintaining a sense of consensus."

In June, when the administration was about to propose a major arms sale to Jordan despite heavy congressional opposition, Lugar was instrumental in convincing the White House to defer the move and settle for $250 million in economic aid.

Two weeks ago, the administration sought anew to push through the $1.9 billion Jordan arms sale. At the last minute, as opponents were preparing for a showdown in which at least 74 senators were expected to vote against the sale, Lugar suddenly came up with an agreement—reluctantly accepted by the administration—to delay the sale until March 1. The compromise passed the Senate 97 to 1.

It was Lugar, working with Sen. Sam Nunn (D-Ga.), who rescued Reagan's aid program for the rebels fighting Nicaragua's leftist government by producing the formula that allowed funding to continue, in the form of "humanitarian assistance."

And it was Lugar, collaborating with Rep. Dante B. Fascell (D-Fla.), chairman of the House Foreign Affairs Committee, who shepherded the first foreign-aid authorization bill through Congress since 1981.

Dodd, who calls that action Lugar's biggest achievement as chairman, said much of the committee's diminished influence on foreign policy in recent years was the result of its failure to agree on legislation spelling out the ways aid funds can be used. When employed skillfully, amendments tacked onto a foreign-aid authorization enable the committee to impose its views across the range of policy decision-making.

The committee's inability to use that weapon gave the executive branch a freer hand. It turned to the Budget and Appropriations committees, which provide aid funding through continuing resolutions that are much less restrictive.

"By frittering away its authorizing function, the Foreign Relations Committee became a largely irrelevant debating society," Dodd said. "In getting a foreign-aid bill through the Senate, Lugar restored some small measure of the committee's prestige and relevance."

In Dodd's gloomy assessment, the committee has a long way to go if it is to recapture the glory days after World War II when it was virtually an equal partner of the White House in defining the bipartisan policy that guided the United States to super-power status. In the mid-1960s, the committee shifted direction. Under J. William Fulbright (D-Ark.), its chairman for 15 years, it became the stronghold of congressional opposition to the Vietnam war. But, after Fulbright's departure in 1974, the committee, hobbled by the lingering divisions of Vietnam and led ineffectively by a succession of weak chairman, was unable to carve out a new purpose and role.

Defeat at the polls ended Church's tenure after two years. And Percy, who came in when the Republicans took control of the Senate in 1980, was disliked by the inner circle of Reaganites, who undermined his authority by treating him with open condescension and working instead through then-Majority Leader Howard H. Baker Jr. (R-Tenn.).

It was against that background that Lugar took over, determined, as he says, "to get the committee used to working and reasoning together again. My aim was to convince the members, both Republican and Democrat, that if they wanted the committee to be effective, if they wanted to make a record that they could take back to their constitutents, then they would have to replace the pervasive sense of partisanship with a new esprit and willingness to find common ground."

He has some important help. Shultz, eschewing the animosity some Reaganites had shown Percy, established a close and cordial working relationship with Lugar that includes regular breakfast meetings and frequent telephone calls. Sen. Robert J. Dole (R-Kan.), who became majority leader in January, has followed an informal arrangement of trusting Lugar to control most of the Senate's day-to-day foreign policy business and to keep him informed.

But the biggest factor has been Lugar's undeviating emphasis on what he calls "consensus and common ground." In search of that, he began by scheduling a series of hearings that ranged across the entire foreign policy spectrum. They were long, frequently dull and attracted little outside notice.

But in Lugar's view "they were an excellent forum for finding out what the members of the committee and, by extension, the other members of the Senate have on their minds. I could see who had a special

interest in Greece and Turkey, who in Israel, who in human rights. And that gave us a better gauge of how to assure that these interests somehow get addressed in the committee's work.

"In each of the issues that come before the committee, there's no manual that tells you how to do it," he said. "Each is a situation where you have to play it as it lies. If there's a single rule that I try to follow, it is that we've had a time of confrontation in this country and that we now should look for compromise and accommodation.

"I try to keep that in mind if I'm dealing with my Democratic counterparts or with Secretary Shultz and President Reagan. I support the main outlines of President Reagan's policy, but I've made clear to them that I can't be a rubber stamp. When I tell them I think they're going the wrong way on an issue, it's coming from someone who isn't looking for a confrontation but who wants them to be seen and heard at their very best."

RONALD D. CASTILLE, ELECTED DISTRICT ATTORNEY OF PHILADELPHIA

Mr. SPECTER. Mr. President, Tuesday's election in the city of Philadelphia is worthy of note by the U.S. Senate because it signaled the strengthening of the two-party system in a major American city and it marked the election of a fine young attorney, Ronald D. Castille, esq., as district attorney of Philadelphia.

It is of special significance to this Senator because it was precisely 20 years when I was elected district attorney of Philadelphia under similar circumstances.

The strength of the American political structure resides in the two-party system. We observe that daily in the Congress of the United States, as the Republican Party or the Democratic Party take policy positions which lead to a quality of competition to produce the best of the governmental process for the American people.

Unfortunately, the two-party system has not flourished in most major American cities and Republican victories in any major city have been a relative rarity, so that yesterday's election in Philadelphia is worthy of special attention. As a matter of fact, Philadelphia is one of the few cities in the United States which can boast an active Republican Party. On the other hand, the Democratic City Committee of Philadelphia has long been a national powerhouse rivaled perhaps only by the Democratic organization of Chicago for national preeminence among city political organizations. For example, in 1960 when President Kennedy carried the Nation by about 100,000 votes, he carried Philadelphia by approximately 330,000 votes. President Lyndon Johnson carried Philadelphia in 1964 by about 440,000 votes. Even President Eisenhower lost decisively in Philadelphia in both 1952 and 1956.

In this context and in view of the importance of the two-party system in our Nation and in our great cities, Tuesday's victory for the Republican Party of Philadelphia and for Ronald D. Castille has national importance.

Mr. Castille is an attorney of outstanding qualification whom I appointed assistant district attorney in 1971. For 14 years, until he announced his candidacy for the Republican nomination for district attorney of Philadelphia, Mr. Castille served with distinction in the district attorney's office, holding important administrative positions and compiling an outstanding conviction rate as a prosecuting attorney.

The fight against violent crime, organized crime, white collar crime, and official corruption requires innovation, integrity and industry. I am confident that Ron Castille can fill the bill and will be an outstanding district attorney.

Yesterday's election should give encouragement to minority parties, whether Republican or Democratic, in cities, counties, towns, or hamlets across the United States. The maintenance of a Republican organization in the face of infrequent victories is a great credit to the leader of the Philadelphia organization, William Austin Meehan, Esquire; the city chairman, the Honorable D. Donald Jamieson; and the executive director, Mr. Joseph J. Duda. They and the 66 ward leaders and the approximately 3,500 committeemen and committeewomen and the thousands of Philadelphians, including independents and Democrats as well as Republicans, merit congratulations on the choice of Ronald D. Castille for district attorney and for vigorous law enforcement in Philadelphia, PA.

VETERANS DAY

Mr. GLENN. Mr. President, all too often America's riches are described in economic terms—factories, raw materials, farm production, GNP. But these descriptions overlook our greatest national resource, the spirit of our people. On November 11, we commemorate a special manifestation of that spirit—the dedication and courage of those who served their Nation in the Armed Forces. In conflicts from the very beginning of our Republic to the rubble of Beirut, Americans have served and sacrificed for this Nation, and this day has been set aside to pay particular tribute to them. It is appropriate that we designate this day in their honor, but making flowery speeches 1 day a year cannot in any way suffice to meet our obligation to our veterans.

We owe our freedom and our independent way of life to the sacrifices of America's veterans—men and women who answered the call to duty and served with honor. In recognition of that debt we have an obligation to protect and maintain the benefits they earned. As a veteran of 23 years in the Marine Corps I know that the costs of war can never be accurately measured and that they do not end with the cessation of hostilities. These costs should not be discounted by budget cutting bureaucrats and must not be written off during time of peace.

This means that we must commit adequate resources and sufficient personnel to meet the health care needs of our veterans. It means that we reject any attempts to reduce programs whose primary beneficiaries are veterans disabled in military service. That is why I have consistently and forcefully supported congressional efforts to insure adequate funding for the VA medical care system and opposed efforts to tax the compensation paid to veterans for service-connected disabilities. The Director of OMB and the Administrator must respect the sacred trust our citizenry shares with our veterans. The VA must be a strong and effective advocate of veterans benefits and services within the administration. That is why I have joined the congressional effort to elevate the VA to full Cabinet rank, a position which will enable its Director to most effectively represent veterans needs and concerns to the President.

In the 20th century we have had all too many occasions to create new generations of veterans. During World War I my father served in the Argonne, but the peace our country won 67 years ago proved neither total nor permanent. A quarter of a century later, I served my country as a marine pilot in the Pacific; a very few years later I saw combat again in Korea. The next decade sent another generation of young Americans to fight in Vietnam. Most recently in Beirut and Grenada still more Americans showed they were willing to give their last full measure of devotion.

In addition to renewing our commitment to our veterans, Veterans Day should also be a time for celebrating and honoring peace. My own experience suggests that if there is one thing a combat veteran takes home, it is a deep and abiding devotion to peace. But maybe that's really not too surprising, since the most peace-loving people in the world are those who have lived through the horrors of war. Perhaps President Eisenhower put it best when he said "I love peace as only a soldier can." In that vein, unless we are vigilant in the pursuit and maintenance of peace we will not be keeping faith with those we honor today.

CALL TO CONSCIENCE

Mr. EAGLETON. Mr. President, last month Amnesty International released

51-059 O-87-29 (Pt. 22)

its 1985 report providing detailed information on violations of human rights commitments governments have pledged to uphold.

Today, I wish to call to the attention of my colleagues Amnesty International's recitation of the Soviet Union's imprisonment of prisoners of conscience—those held only for their beliefs or origins. I ask unanimous consent that the section of Amnesty International's report relating to human rights abuses in the U.S.S.R. be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

UNION OF SOVIET SOCIALIST REPUBLICS

Amnesty International was concerned that many Soviet citizens were imprisoned or confined in mental hospitals solely for the non-violent exercise of their human rights. It received reports of ill-treatment from prisons, corrective labour colonies and psychiatric institutions. During 1984 it learned of 53 death sentences and 16 executions. Amnesty International had adopted as prisoners of conscience or was investigating the cases of more than 560 individuals, but believed the total number of prisoners of conscience to be much higher. Official sources rarely reported on cases of concern to Amnesty International, while individuals who tried to gather such information independently themselves risked imprisonment.

In April Konstantin Chenenko was elected Chairman of the Presidium of the USSR Supreme Soviet in place of Yury Andropov, who died in February. Amnesty International wrote to the new President asking to meet representatives of his government to discuss its concerns in the USSR, but received no reply. In October the USSR presented its second periodic report to the Human Rights Committee set up to monitor compliance with the International Covenant on Civil and Political Rights, in which it said that the USSR Constitution and Soviet legislation guaranteed the rights enshrined in the Covenant.

Throughout the year Amnesty International received evidence to the contrary. At least 132 Soviet citizens were imprisoned under laws specifically restricting freedom of religion and expression. Some individuals, previously persecuted for their exercise of human rights, were imprisoned on criminal charges which Amnesty International believed to be false.

Soviet law required religious believers to register their congregations with the authorities and to give up their right to evangelize, do charitable work and teach religion to children. Around 70 religious believers who rejected these restrictions on their religious freedom were sentenced to imprisonment and internal exile of up to 10 years for "violating the laws separating church from state" and "engaging in anti-social religious activity." They were mostly unregistered Seventh Day Adventists, Pentecostalists and Baptists. Five Hare Krishna devotes in Moscow who had been denied permission to register as a group were also imprisoned for "engaging in anti-social religious activity." Amnesty International adopted as prisoners of conscience five young men arrested for refusing to do military service on religious grounds. All were ruled unfit to stand trial and confined in psychiatric hospitals.

In a paper issued in September Amnesty International described the imprisonment in 1983 of two Lithuanian Roman Catholic priests, and drew attention to the persecution of active Ukrainian Greek Catholics (or Uniates) whose church had been banned in 1946. In 1984 it learned of the arrest of another Uniate and four officials of the Roman Catholic Church whom it believed to be imprisoned for their religious activities.

Some of those imprisoned for exercising their freedom of expression were convicted—often in closed trials—of "anti-Soviet agitation and propaganda" and given sentences of up to 15 years' imprisonment and internal exile. However, imprisonment of up to three years for "circulating anti-Soviet slander" was more common. Amnesty International learned of no instances in which a prisoner tried on these charges was acquitted. People were imprisoned for: remarks allegedly made to other prisoners (Nikolai Baturin, Mykola Horbal); private letters to the authorities or personal friends (Mustafa Dzhemilev, Adam Zarivny, Zakhar Zunshain); taping foreign broadcasts of religious music (Gennady Bedarev, Aleksandr Semchenko): photocopying foreign literature (Vitaly Cheverev and five library employees); researching controversial literary or historical themes (Aleksandr Bogoslovsky, Liudas Dambrauskas); and associating in unofficial groups to preserve Jewish culture (Yakov Levin, Mark Nyepomnyashchy, Leonid Shrayer, Yakov Rosenberg and Iosif Zisels).

Most of those imprisoned under these laws, however, were convicted of systematically preparing *samizdat*, that is literature which bypassed official censors. They included two advocates of independent trade unions as well as Roman Catholics, Pentecostalists, Seventh Day Adventists and Baptists.

Individuals suspected of documenting official abuses of human rights were also targets for prosecution. In January Yelena Sannikova, a kindergarten teacher, was arrested for a *samizdat* bulletin called *The Chronicle of the Human Rights Movement* had been confiscated from her home. She was sentenced to one year's imprisonment and four years' internal exile for "anti-Soviet agitation and propaganda". In September a Moscow mathematician, Yury Shikhanovich, was sentenced to 10 years' imprisonment and internal exile on the same charge for editing 30 issues of the *samizdat* human rights journal *A Chronicle of Current Events.*

In February an amendment came into force which increased the penalties for first-time offenders convicted of "anti-Soviet agitation and propaganda" using money or other material aid from foreign organizations. The penalty rose from 12 to 15 years' imprisonment and internal exile. To Amnesty International's knowledge no one was sentenced under this section of the law in 1984.

In May the prisoner of conscience Academician Andrei Sakharov went on hunger-strike to demand that his wife, Yelena Bonner, be allowed abroad for surgery. Amid international protest, permission was refused and Yelena Bonner was sentenced in August to five years' internal exile for "circulating anti-Soviet slander". Dr. Sakharov was reportedly hospitalized and forcibly fed, and returned to his place of exile in September. Amnesty International learned of other individuals and an entire Pentecostal community on hunger-strike because they were refused permission to leave the country. At least four people were imprisoned for up to eight years for allegedly trying to emigrate without permission. They were convicted of "illegal exit abroad" or "treason—in the form of flight abroad". Amnesty International also adopted as prisoners of conscience numerous individuals imprisoned on charges not directly related to their attempts to leave the country. For example, Aleksandr Yakir, a Jewish would-be emigrant of long standing, was imprisoned for refusing military call-up. Twenty-three would-be emigrants were imprisoned for "violating the passport regulations", since they had returned their identity papers to speed their visa applications. They were mostly Pentecostalists and citizens of German origin. In May Amnesty International issued a paper analyzing the use of the law against "parasitism" to imprison would-be emigrants and other prisoners of conscience for the exercise of human rights. In 1984 at least four people who had lost their jobs after applying to emigrate were imprisoned as "parasites". Amnesty International also investigated the cases of 11 Jews imprisoned on criminal charges, all of whom had a history of harassment for their attempts to leave the USSR.

The Soviet authorities continued to use forcible psychiatric confinement as a means of punishing known dissenters. In 20 reported cases individuals were said to have been put in mental hospitals against their will for indefinite periods following conflict with officials that centered on their exercise of human rights. Amnesty International believed they were confined for political, rather than medical, reasons, and that they had neither used nor advocated violence. Most of the cases involved religious believers and would-be emigrants, committed without criminal charges to ordinary psychiatric hospitals and released after a few months. Some reported that they had been forcibly treated with drugs which caused them intense physical discomfort. Amnesty International also learned of one Roman Catholic confined to a special psychiatric hospital under the criminal procedure: Sandr Riga was arrested in February and charged with "circulating anti-Soviet slander" and "engaging in anti-social religious activity". He was accused of printing an unofficial ecumenical journal called *Prizyv* (Summons) and of holding prayer meetings in Moscow without permission. Ruled unaccountable for his actions, he was tried in his absence and confined to a maximum-security psychiatric hospital in Blagoveshchensk, 9,000 kilometers from his only relative. In January it was reported that Aleksei Nikitin, a miner, had died only weeks after he had been released from three years' psychiatric confinement as a prisoner of conscience. Valentin Sokolov, a poet, also died, in Chernyakhovsk special psychiatric hospital in September, after more than 24 years as a prisoner of conscience.

Most prisoners of conscience served sentences in corrective labour colonies. According to reports reaching Amnesty International they suffered from persistent hunger and medical neglect and were forced to do taxing compulsory labour. Officials often punished prisoners arbitrarily, cutting their already limited food rations and concealing their rights to letters and visits. Although entitled to complain to the procuracy, prisoners were commonly powerless to obtain redress when their rights were violated: often their letters were censored, or their complaints were sent for investigation by the very officials complained of. As a pro-

test many prisoners went on hunger-strike, itself a punishable offence.

Amnesty International was concerned by the deaths of three prisoners of conscience imprisoned in special regime institution Perm 36-1. All were serving 15-year terms of imprisonment and internal exile for "anti-Soviet agitation and propaganda". It is not known what medical treatment they had received before their deaths. Oleksa Tykhy, a member of the unofficial Ukrainian Helsinki monitoring group set up in 1977 to document human rights violations, died of stomach cancer in May, at the age of 57. In 1979 doctors had redcommended his release on grounds of ill-health, but their recommendation was rejected. In August the death was reported of another Ukrainian Helsinki monitor, Yury Lytvyn. Aged 50, he had previously spent 18 years as a prisoner of conscience. The cause of his death was not known. Amnesty International appealed to the Soviet authorities to release a third inmate of Perm 36-1 on grounds of ill-health. At his trial in March Valery Marchenko, a Ukrainian journalist, was reported to be suffering from chronic nephritis and acute hypertension. Six months into his sentence, he died of kidney failure, aged 37.

Amnesty International received disturbing allegations that some prisoner of conscience had been systematically beaten, either by officials or with official consent. In 1984 eight cases of systematic official brutality were alleged. Although Amnesty International was unable to verify all these allegations, it was concerned that not one had apparently been thoroughly investigated by the competent authorities. In August it appealed for an urgent inquiry into the case of Anatoly Marchenko, who was reported to have been handcuffed and beaten unconscious by officials at his corrective labour colony in the Perm region after submitting a formal complaint about conditions in the colony to the procuracy.

One prisoner of conscience had his term extended under Article 188-3 of the Russian Criminal Code which forbids "willful disobedience" in a corrective labour institution. Vladimir Poresh, a young Russian Orthodox believer from Leningrad, had been sentenced in 1980 to eight years' imprisonment and internal exile for "anti-Soviet agitation and propaganda" in connection with his religious activities. In October he was retired in Chistopol prison and sentenced to a further three years' imprisonment for sending a complaint to the procuracy alleging that prisoners had been beaten and that officials had broken the arm of another prisoner of conscience, Sergei Grigoryants. To Amnesty International's knowledge this was the first time Article 188-3 had been applied to a prisoner of conscience since it was introduced in 1983.

Amnesty International learned of 53 death sentences and 16 executions during the year, but believed the total number of death sentences passed to be much higher. It appealed for the commutation of every death sentence of which it learned. Yermak Lukyanov, a 70-year-old Belgian citizen of Kalmyk origin, against whose death sentence Amnesty International had protested in 1983 (see *Amnesty International Report 1984*), was reportedly executed on 14 May. In December Amnesty International publicized information about an unofficial petition in the Georgian republic, protesting against death sentences passed on four convicted hijackers. Three thousand Georgians were said to have signed the petition, among them two deputies of the republic's Supreme Soviet. It was not known if the hijackers had been executed.

Mr. EAGLETON. Mr. President, the Soviet Union has recently issued an exit visa to Yelena Bonner, wife of Andrei Sakharov, to allow her to seek long-needed medical care. Obviously, I, and I am sure all of my colleagues, welcome that action. In so doing, we should not lose sight of the tens of thousands of other prisoners of conscience who continue to be denied freedom of expression, freedom of movement, freedom of religion.

President Reagan and Secretary Gorbachev will meet later this month in Geneva. President Reagan has made clear his intention to raise the issue of human rights with Secretary Gorbachev during that meeting. I applaud the President's commitment and I urge him to hold firm to that intention. The Soviet argument that human rights issues are strictly internal matters belies the commitment made by the Soviet signature on the Final Act of the Conference on Security and Cooperation in Europe [CSCE] in Helsinki in 1975, in which the U.S.S.R., and 34 other nations, including the United States, pledged to respect human rights and to allow a freer movement of people across international borders. President, Reagan must pursue every opportunity to continue to pressure the Soviet Union to live up to the Helsinki Final Act.

VETERANS DAY 1985

Mr. CRANSTON. Mr. President, Veterans Day provides us with an important opportunity to pause in the rush of our day-to-day business to reflect on those who, often at great personal sacrifice, have stood in defense of our Nation. Whether they faced combat or stood ready to do so if called, the men and women who have served in our Armed Forces deserve our heartfelt thanks and appreciation.

Too often, as we debate expenditures of billions for this program or that, we lose sight of the individuals these programs are designed to serve. A special day, such as Veterans Day, helps refocus our thoughts. It helps us to rediscover important elements in our national make-up and gives us the opportunity to rededicate ourselves to important causes.

America has a tradition of honoring its veterans, but too often the initial fervor and support for those who served in our defense fades as we move further away from a period of war. Perhaps no one has captured that tendency better than Kipling in his famous poem "Tommy" where he wrote:

For it's Tommy this, an' Tommy that an' "Chuck him out, the brute!"
But it's "Savior of 'is Country", when the guns begin to shoot.

This Veterans Day, let us pledge ourselves to keeping strong America's support for our veterans, both through expressions of support and through tangible programs of benefits and services.

I recognize that a current overriding concern of this body and the American people involves—very properly—ongoing efforts to reduce Federal expenditures so as to curb the enormous Federal deficits that are choking our economy. Thus, in urging rededication to the support of programs of benefits and services for veterans, I want to be clear that I am not suggesting that those programs must not be considered as we seek ways to reduce Federal spending. Indeed, veterans programs have borne their share of cuts in this effort in recent years and continue to do so.

What I am urging is that, as we make the many hard choices that lie ahead, veterans not be dismissed as just one more special interest group pleading its case. In a very real sense, our Nation's veterans have made it possible for the future of all other programs and concerns to be debated. Without the dedication and commitment of our veterans—their very real sacrifices, including the ultimate sacrifice for many—over the years in our Nation's hours of need, we Americans would not enjoy the great freedoms that we so often take for granted.

The vast majority of our veterans returned from their service unmarked by long-term injury or illness. For them, assistance in readjusting to civilian life and a sincere act of recognition and thanks is generally all that is needed to let them know in appropriate ways that their sacrifices are appreciated.

For those who returned from their service with disabilities and for the survivors of those who gave their lives, much more is needed. For them, we must revivify and reaffirm the historic commitment, expressed so eloquently by President Lincoln in his second inaugural address, "to care for him who shall have borne the battle, and for his widow and his orphan."

This commitment—which is the motto of the Veterans' Administration—is a moral commitment of the highest order. It must be maintained.

I believe it is fair to say that there is general agreement in the Congress that national defense is a legitimate, high priority of the Federal Government—indeed, our collective defense can only be met on a national level.

What is not understood by some, however, is that the great costs of providing for our defense do not end when the guns cease firing.

Providing benefits and services to meet the needs of veterans and their survivors is a continuing cost of war—a continuing obligation of waging war—and must be recognized as such.

Health care must be provided to heal the wounds of war.

Adequate compensation must be provided for those with disabilities incurred during their service.

Programs of education support, counseling, and employment assistance are needed to help veterans readjust to civilian life.

Programs to assist the survivors of those who gave their lives are vital to help replace their great loss in the limited ways we can.

A weapons system that is no longer needed can be discarded. Those who stood guard must not be treated in the same way.

This Veterans Day, as we pause to remember the sacrifices of those valiant men and women who have served our Nation so well, let us renew our commitment to repaying the debts we owe them.

CARRYING FRIENDSHIP TOO FAR

Mr. GLENN. Mr. President, the November 25 issue of the New Republic includes an article titled "Carrying Friendship Too Far," which comments on the administration's proposed nuclear sale to the Peoples' Republic of China. Comments made in the article are right on target and well worth consideration by my colleagues in the Senate, as well as others in our society interested in nuclear nonproliferation.

Mr. President, I ask unanimous consent that the article be published in the CONGRESSIONAL RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

CARRYING FRIENDSHIP TOO FAR

The Ayatollah Khomeini and Muammar al-Qaddafi are probably the heads of state whom the world would least like to see with their fingers poised at the nuclear button. Neither man has the bomb but both are scheming to get their hands on the technology. If they succeed, it may well be thanks to the reckless nuclear export policy of the People's Republic of China—and perhaps even to the reckless export policy of the Reagan administration. In the name of Sino-American rapprochement, we are about to embark on a 30-year Agreement for Nuclear Cooperation with the most egregious proliferator in the history of the atomic age.

The most likely setting for nuclear war is not the Black Hills of Dakota or Siberia or even Europe, but the Third World. Clearly, then, our best means of averting nuclear holocaust lies in preventing the spread of atomic weapons to smaller, less responsible countries. Yet the Reagan administration's proposed agreement with China is not the first time an American president transcended our outspoken verbal commitment to nonproliferation for financial and geopolitical gains. In 1980 President Carter waived the Nuclear Nonproliferation Act in order to provide India with nuclear fuel deliveries, and three years later Reagan circumvented the same statute by designating France as a surrogate supplier. Now we seem on the verge of an even greater folly.

A number of considerations have converged to produce the China agreement. One prime impetus has been the woes of the American nuclear power industry, which hasn't sold a single reactor in the United States since 1975. China's budding energy program, with its call for six foreign-supplied reactors by the year 2000, offers Westinghouse and its cohorts a potential seven-billion-dollar market. Also working in favor of the agreement is the current frustration over the trade deficit. Few in Congress can resist the lure of a possible ten-figure sale. Perhaps most important, the administration sees the agreements as a way to secure further strategic ties to China.

No one doubts that selling nuclear power reactors to China would serve all of these valid goals. But almost everybody who has carefully examined the text of this agreement recognizes that it is poorly worded and courts catastrophe. At the moment five countries—the U.S. USSR, Britain, France, and China—admit to possessing nuclear weapons. Two others, India and Israel, are widely suspected of having joined the club. Three of the five weapons states and 125 non-weapons states have signed the Nuclear Nonproliferation Treaty, which includes a list of procedures for verifying the strictly peaceful use of any nuclear export to a non-weapons state.

China has persistently refused to ratify the Nonproliferation Treaty or to follow its recommended safeguards. Until just last year, China's official pronouncements actually declared that nuclear proliferation was a worthwhile enterprise serving to erode U.S.-Soviet nuclear hegemony. "So long as the imperialists refuse to ban nuclear weapons," the Chinese government once declared, "the greater the number of socialist countries possessing them, the better the guarantee of world peace." With this policy China established itself as the National Rifle Association of nuclear matters. Since 1980 U.S. intelligence sources have reported several Chinese shipments of nuclear materials to Argentina, India, and South Africa, whose nuclear ambitions are well established.

China's most egregious breach of the nonproliferation ethic is its collaboration with the nuclear program of neighboring Pakistan. In exchange for permission to study Pakistan's enrichment techniques, the Chinese reportedly have provided design information on a bomb already successfully tested in China. Intelligence documents indicate that Chinese technological assistance since at least 1980 has brought Pakistan within two years of possessing its own small nuclear arsenal. And since Libya's oil revenues have helped support the Pakistani program, the CIA fears that Pakistan may be obliged to share its technology with Qaddafi.

Supporters of the agreement acknowledge China's poor nuclear record. But they insist that Beijing's behavior has changed. In 1983 China signed on as a member of the International Atomic Energy Agency, ending a 30-year boycott. In January 1984 Premier Zhao Ziyang declared before a White House audience, "We do not engage in nuclear proliferation ourselves, nor do we help other countries develop nuclear weapons."

America's 1978 Nonproliferation Act sensibly requires more than just amiable after-dinner words. The law demands a "guaranty" of safeguards on U.S. nuclear shipments to any country as well as American consent to any retransfer of technology or enrichment or reprocessing of fuel supplied by us. The guarantee is essential because any of these procedures can lead to the distillation of nuclear explosive materials.

The agreement with China, however, provides no safeguarding mechanism other than "mutually acceptable arrangements for exchanges of information and visits" to be clarified at some point in the future through "diplomatic channels." If China decides to enrich or reprocess U.S.-supplied nuclear fuel, we are required "to consider such activities favorably" while holding "consultations to agree on mutually acceptable arrangements."

Despite these glaring loopholes, Kenneth Adelman, the director of the Arms Control and Disarmament Agency, has asserted that the nebulous "exchanges on information and visits" clause is "adequate to provide confidence against the misuse of any items subject to the proposed agreement." Similarly, in lieu of formal consent rights over retransfer, enrichment, or reprocessing, Adelman accepted China's private pledge that it has "no plan to undertake reprocessing of spent fuel from power reactors for at least 15 years." Adelman also claims that "the prospect of the proposed agreement played an important role in bringing about this evolving attitude [toward nonproliferation] on the part of China." The logic seems to be: what we can't get the Chinese to concede publicly, we can expect them to concede privately on the basis of their newfound commitment to nonproliferation. Contrary to the available evidence, Reagan officials insist that an admittedly tainted trading partner is inching toward reform and that our surest means of encouraging this process is through further commercial involvement. This sounds like "constructive engagement" with South Africa.

As with the putative reforms of the Botha regime, China's purported spiritual rebirth is at best a tenuous, begrudging concession, at worst a calculated charade. For starters, despite Zhao's White House dinner toast, there's good reason to believe that China's fundamental attitude toward the merits of proliferation hasn't changed. In July 1985, long after Chinese envoys had begun to project a more conciliatory tone to their American audiences, Vice Chairman Zhou Peiyuan of the Chinese People's Political Consultative Conference told the Brazilian press that Third World nations should develop nuclear energy technology "if they feel the need to have it for peaceful purposes" as a means of "breaking the monopoly of the two superpowers: the Soviet Union and the United States." According to a CIA translation of the Brazilian report, Zhou defended China's initial atomic explosion "as a way of breaking the nuclear monopoly." This sort of talk purposely muddles the vital distinction between nuclear power and nuclear destructive power in the hope of breaking a U.S.-Soviet "monopoly."

Nor are current Chinese nuclear export practices much different from those of the past. After the initialing of the agreement in April 1984, the State Department was forced to reopen negotiations with the Chinese to clarify their commitment to nonproliferation. It seems that after Chinese negotiators had renounced assistance to "outlaw" states—those with secret, weapons-oriented nuclear development programs—Chinese technicians were discovered at Pakistan's top secret nuclear facility. By July of this year, U.S. intelligence had satisfied itself that the Chinese were gone from Pakistan, and Reagan signed the agreement. But since then reports have surfaced in the

intelligence community that China has continued its nuclear exports to South Africa and Argentina and, even more disturbing, that it has engaged an Iranian envoy in serious discussions over the export of sensitive nuclear technology once the U.S. cooperation pact is secured. China has held meetings with Iranian representatives in both Beijing and Tehran to discuss terms for the sale of nuclear-capable surface-to-surface missiles. Agence France-Presse reported on October 23 that the talks were "progressing rapidly."

Since the inauguration of the International Atomic Energy Agency two decades ago, every nuclear power agreement signed by the U.S. has contained a safeguards requirement. Yet in his official assessment of the China deal, ACDA director Adelman pleaded that "the United States did seek Chinese acceptance of IAEA safeguards on U.S. supply under the agreement, but the Chinese adamantly refused." Why cave in to China's refusal? The argument is that since China is a nuclear weapons state, IAEA safeguards aren't strictly required by law. This is true. It's also true that the "exchange of information and visits" provision isn't much of a safeguard in any sense of the word. Obviously the U.S. negotiators were willing to sacrifice the spirit of American nonproliferation law as long as the appearance of legality was maintained. They made such concessions because, as the language of the final document illustrates, proliferation was the least of their concerns.

The State Department and its allies insist that the negotiators made no such concessions. They argue that despite the text of the agreement, they have obtained private assurances from the Chinese that Beijing will cooperate with unwritten American expectations. In particular the chief American negotiator, Special Ambassador Richard T. Kennedy, has prepared a classified "Summary of Discussions," in which he asserts that the Chinese have provided further pledges to reform their nuclear export policies. Touting these unwritten, unofficial assurances, he claims that the China pact would not compromise our vigilance against the spread of nuclear weapons. A number of representatives believe he is bluffing.

Fortunately there is a way to call the bluff. Senators John Glenn and Bill Roth, along with their colleagues in the House, have introduced meaures to clarify the ambiguous passages of the agreement. The Glenn-Roth bill simply articulates the State Department's professed interpretations of these passages as offical U.S. policy and requires the president to certify that the Chinese accept these interpretations before the licensing of any nuclear exports. It mandates specific safeguards and frees us from any obligation to yield to China's discretion. It requires China to issue a "written, detailed statement of its nonproliferation policies," and reaffirms our understanding that the agreement is subject to U.S. export laws. Since the bill does not more than bind both countries publicly to the commitments purportedly secured in private by the State Department, there is no apparent reason to oppose it.

The real threat of the Glenn-Roth proposal is not, as the State Department claims, that it will "gut the agreement" but that, quite the contrary, it will put guts into it. It may, as some officials protest, demand a degree of strictness to which the Chinese will never submit. These officials may be right. If so, the world is better off without this deal.

AFL-CIO CONRAIL RESOLUTION

Mr. SPECTER. Mr. President, I am truly pleased today to report that the AFL-CIO has joined many companies and individuals from business in endorsing a public sale of Conrail, and has opposed the proposed merger of the Conrail and Norfolk Southern rail freight systems. This position was unanimously adopted in a resolution by the AFL-CIO at its 16th Annual Constitutional Convention in Anaheim, CA, from October 28-31, 1985.

The public stock offering proposal, which I have long supported, provides the most effective assurance of a long-term, viable and competitive rail system in the East and Midwest. S. 1361, the legislation I introduced last summer, will best ensure this outcome by implementing the plan of the distinguished investment banking firm, Morgan Stanley, to purchase the Federal Government's 85 percent share of Conrail, and return the railroad to the private sector through a public sale.

The support of labor for this proposal is invaluable. Mr. President, I ask unanimous consent that the AFL-CIO resolution be printed in the CONGRESSIONAL RECORD as though it were read in full here today.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

SALE OF CONRAIL

Whereas, Conrail, which serves shippers, industries and communities in 15 States in the East and Midwest, is one of the largest railroad systems in the United States; and

Whereas, almost 40 percent of all rail freight handled in this country originates or terminates on Conrail lines and the system provides dependable rail shipping to the public employing more than 35,000 employees; and

Whereas, originally created by Congress from several bankrupt and ailing railroads to maintain vital railroad service to the Northeast, Midwest and middle Atlantic regions, Conrail is today an efficient, well-run, profitmaking railroad; and

Whereas, the Federal law that created the system also provided that Conrail should be sold to divest the Government of permanent ownership; and

Whereas, the proposal by the Reagan administration to sell the system to Norfolk Southern would not produce a fair return to the Treasury because of tax loopholes available to the purchaser and such sale would create a rail monopoly that would have an adverse effect on the public, shippers, industries, communities and other railroads, including massive layoffs for Conrail employees and for many employees of other railroads; therefore be it

Resolved, that the AFL-CIO joins the Railway Labor Executives Association in favoring a public sale of Conrail and opposing the Reagan administration's plan to sell the system to the Norfolk Southern Corp., and be it

Resolved, that the AFL-CIO fully supports rail labor in calling for the public sale of Conrail that would ensure the viability of Conrail as an efficient railroad system, assure the public of dependable railroad service at reasonable rates, and protect the jobs and livelihoods of thousands of Conrail and other railroad workers.

VIEWS OF SOUTH DAKOTANS ON THE FARM BILL

Mr. ABDNOR. Mr. President, my colleagues are well aware I was incensed when we recessed for the month of August without passing a farm bill so that winter wheat farmers in my State would be paid the common courtesy of knowing what the program would be as they were planting their crop for harvest next summer.

It is ridiculous and inexcusable, Mr. President, that time and time again we leave farmers hanging, that we can't pass a bill to give farmers a reasonable planning timeframe, and that we continue to tinker with and change the program up till and past the last moment farmers have a chance to make production and marketing decisions. Our actions are tantamount to forcing farmers to try to hit a target which not only is moving, but also is hidden from view.

Surely, we can do better than that. I implore my colleagues to join in passing a bill which provides not only the very best possible program to address the immediate, severe problems in rural America but, just as importantly, gives farmers assurance of stability and the opportunity to plan their operations without fear of sudden changes which could render their best laid plans obsolete without warning.

Despite the fact this bill should have been passed months ago and it is high time Congress gets its act together on the best possible program for America's farm families, I have taken advantage of the delay to continue my discussions with South Dakotans in an effort to keep completely up to date on their latest and best thinking on the problem and potential solutions.

In that regard, Owen Ambur and Bruce Knight of my staff joined me over the Columbus Day recess in traveling to 17 communities to hold listening sessions with farmers in their own communities, and I'd like to take a few moments to convey to my colleagues some of the comments we heard at each meeting.

At the first session in Dell Rapids, the discussion focused particularly on complaints about the quality of our grain exports. Support was voiced for strengthening our standards to protect our ability to compete for and win sales abroad. At the same time, it was argued that we are allowing too many imports of farm products into the United States and that imports are responsible for a large part of the depression in the agricultural economy. Finally, a strong case was made for requiring cross compliance so that one individual cannot put one field or one crop under the farm program in order

to get the benefits while holding other crops or fields out, producing as much as possible on the one hand and gaining price support benefits on the other.

At Brookings several of the suggestions centered on the development of ethanol as a new use of farm commodities, the use of natural fertilizers and crop rotation as means of lowering input costs, and the thought of exporting livestock products instead of crops. At least one participant strongly supported more restrictive payment limitations for individual producers. It was argued on the one hand that a price structure is needed for all of agriculture, instead of just for certain commodities, but, on the other hand, that as few strings should be attached to the program as possible. The conflict of purposes was not lost on the participants, and one individual highlighted the paradox: Rural America is looking to Washington for solutions when in fact Washington is largely responsible for the problem in the first place.

One participant in Brookings and the suggestions he made deserve special mention. Former Congressman Frank Denholm, who served with me in the House of Representatives, expressed some very strong views that make a great deal of sense. First, he argued the budget for agriculture was actually greater in 1971 when he was here than it is now. Second, he decried the policies of the current program which in effect pay farmers not to produce. He suggested instead of placing the emphasis on bushels, as current policies do, the emphasis should be placed upon people. He argued that can be done through a graduated scale of payments to farm families, based upon their farm sales level. For example, he suggested guaranteeing a farm family 100 percent of parity on the first $50,000 in sales, 90 percent on sales of $60,000, 80 percent on $70,000, 70 percent on $80,000, and no support on sales in excess of $100,000. He left room for debate on the exact sales/payment levels, but he insists that the payments should be made directly to each farm family—a husband, wife, and minor children—and not to corporations or large operators who circumvent payment limitations by breaking up their operations into small units. Finally, the former Congressman stated emphatically that government should not be in the business of storing grain and that the last thing farmers need is more loans.

In Watertown concern was voiced over the implications for farm borrowers if ag lending is exempted from the provisions of the Uniform Commercial Code. Another individual, a farmer with two sons involved in his operation, decried the high price of land, argued that farmers do not need Government telling them what to do and that commodity support prices should be reduced, detested the acreage allotment system, and supported tax changes to do away with investment tax credits and fast write-offs and preferential treatment of capital gains. Support was voiced for maintaining the payment limitation at no more than $50,000, and it was argued that FmHA and Farm Credit have actually created the problem farmers are now facing, rather than helping to solve it.

Attendance at the Webster meeting was hampered by competition from the Ducks Unlimited banquet occurring in the same building, but one of the farmers who dropped by has had a long and active concern for preserving and enhancing the ability of the Rural Electrification Administration to continue to assist in delivering reasonably priced power to farms and rural communities.

One of the highlights of the Aberdeen session was the suggestion that acreage setaside or diversion programs should require a multiyear commitment. Three years was suggested, during which time the same acres would lie idle for conservation and wildlife purposes, instead of the current annual program which does not lend itself to the benefits which could be achieved through a multiyear approach.

In Pierre the issue of grain standards again was raised, but it was argued the impetus for needed changes should come from the grassroots up, instead of from Washington down. Otherwise, the fear is the result will be still lower prices to farmers. No doubt was expressed that grain standards should be upgraded and simplified, but caution was urged. It was pointed out, for example, that the Taiwanese say United States wheat is still the best quality in the world and that, in the current buyers market, foreign customers will use every means possible to try to bargain the price down still further. Support was voiced for compromise on the issue of cargo preference.

A specific problem raised with respect to the Federal Crop Insurance Program is that winter kill is not covered for winter wheat. Farmers must sign up for the program in the fall and if their wheat crop does not survive the winter, they are required to replant another crop in the spring, with no indemnification for the risk of winter kill. In other words, the all-risk crop insurance program is not all-risk at all for winter wheat farmers.

Finally, in Pierre it was stated emphatically that farmers do not need more loans, nor do they need Government telling them how to farm.

In Mitchell a commodity-by-commodity check-off was suggested to support the costs of referendums on production cutbacks. It was argued a 5- to 10-year rolling average should be used to determine program bases, instead of the current 3-year average, and that bushels rather than acres should be used to establish a farmer's program base. One individual who will remain nameless but is particularly well qualified to speak on the subject argued very strongly that cross compliance and offsetting compliance should be required of any farm program participant. In other words, a producer either should be all in or all out of the program. He should not be permitted to have it both ways. The same individual indicated a variable target price program based upon optional setaside levels would make sense, and that the use of proven yield would facilitate the use of a bushel base in place of the current acreage allotment system. On that score, it was argued a producer's proven yield should be established by one agency and the same yield should be used by all agencies.

It was also suggested that a more proper role for Government is to help market agricultural products in lieu of paying farmers not to produce. Some in attendance suggested Government programs have put a premium on and acutally rewarded incompetence, and those were opposed to any action to bail out the Farm Credit System. Finally, an improved dairy inspection and testing program was suggested, as a means of cutting production, along with an assessment to be levied upon imports for promotional purposes.

In Scotland it was pointed out that farm programs have not worked and, obviously, something different must be done. Some felt that ag imports should be cut off, and all insisted on fairer trade policies. It was suggested farm program benefits should be limited strictly to those actually living on the farm and denied to anyone else, particularly those who are not really farmers and have large non-farm incomes. It was argued strongly that price is the key and not more loans, that farmers need to price their products, and that the farm program should be flexible to enable each producer to deal with his own needs.

A bone of contention at Yankton was the higher storage payment rate for commercial elevators than for farmer storage. There was unanimity that farm program payments should be denied to those farming fragile lands, and it was suggested lands placed under the plow in recent years should be excluded too. Support was voiced for allowing the Farm Credit System to fail and for directing credit relief to farmers themselves instead of to the lending bureaucracy. A related comment expressed a strong opposition to helping those who bid up the price of land with Federal Land Bank and FmHA loans, and the thought was voiced that banks pushed out ag loans

with little thought to the longer term consequences for farmers. It was argued FmHA should focus its lending activities on young farmers instead of established operators. Participants in Yankton were bewildered over the amount of money we pour out to other countries, why we can't use our grain for alcohol, and why we are importing so much oats.

In Vermillion an early remark centered on our efforts to promote agricultural development in other countries. We are now paying a price in lost sales. Concern was voiced over cargo preference, grain standards, and overvaluation of the dollar, grain company profits, and the high percentage of USDA's budget which goes to nonfarm program.

On credit, the question was asked why borrowers are being penalized for the new buildings and mismanagement of the Farm Credit System. It was suggested FmHA, FLB, and PCA have accelerated inflation in competition with private lenders. Yet, it was argued Uncle Sam bailed out Chrysler and got its money back, so why should something similar not be done for farmers. It was rumored that FLB and FmHA are offering farms received through foreclosure for sale at more favorable terms than were allowed for those who were foreclosed upon. It was said FmHA has in some cases induced borrowers to build new homes and should accept a share of the responsibility. One individual indicated FmHA shows favoritism and helps very few, and that farmers would have been better off without FmHA. Finally, with respect to an interest rate buy-down it was argued the State does not have the money, that the only tax base in the State is agriculture, and that's where the money would have to come from.

The investment tax credit was said to have hurt farmers badly, and limitation if not elimination of ITC was supported. Opposition was expressed by one participant to a mandatory checkoff to fund beef and pork promotional activities, due the administrative costs. That individual thought the idea of promotion is fine, but he chastised the organizations pushing the checkoff for not pushing harder for labeling of imported meat. Another person chimed in, "How can we compete with subsidized foreign production?"

Finally, in Vermillion one farmer spoke in favor of mandatory production controls, and target price protection generally seemed to be favored over more loans. One participant summed it up, "If farmers get a better price, credit will take care of itself."

In Alcester another pitch was made in support of cross compliance, and the use of total normal cropland acres, rather than individual crop acreage allotments, as the basis for setasides. There were calls for reductions in meat imports and for elimination of tax-loss farming, at least with respect to products for human consumption, if that caveat would remove the opposition of horse breeders. One of the more innovative suggestions made was to apply cargo preference requirements to ag imports if maritime interests continue to insist upon applying them to our grain exports.

It was pointed out the United States is the biggest meat importer in the world, and it was argued red meat consumption is not down if imports are included and that, contrary to popular belief, we do not produce enough meat for our own consumption. Policy differences pitting cattle and hog associations against other commodity groups and general farm organizations were decried, and it was agreed livestock feeders never make money feeding cheap grain. Opposition was expressed to a mandatory meat promotion check-off, and Southern feedlots were said to have the power on Capitol Hill. It was argued the biggest problem facing U.S. farmers is subsidies paid by foreign governments and that others will always undercut our price, but that we still sell grain overseas.

The storage payment differential was raised again in Alcester with the question,"Why does USDA favor elevators over farmers?" It was felt that grain standards should be raised because farmers are already paying the cost through discounts at local elevators. It was suggested Federal crop inspectors should be rotated regularly to guard against corruption. Money was advocated for research on alternate uses of crops, especially for export. One person argued profitable prices for cotton would in turn aid soybean and corn producers, and that use of synthetic fabrics has induced cotton farmers to switch to soybeans.

On conservation one farmer suggested requiring a grove of trees on every quarter of land would help cut production and, at the same time, protect the soil. Another argued local control must be exercised over any conservation reserve to preclude wealthy outsiders from coming in and buying up land and paying for it with Government payments.

The large fluctuations in cattle markets were questioned, and labeling of beef by point of origin was advocated again in Alcester. High interest rates were cited as the biggest problem for young farmers. One participant suggested, contrary to views heard at other meetings, that higher commodity loan levels are preferable to higher deficiency payments, particularly since the loans come in the fall. There was a strong sentiment that too much money is being spent on defense. One participant concluded the farm program should be allowed to revert to permanent law, based upon parity, and another argued that those making more than 50 percent of their income off the farm should be excluded from any referendum on farm policy.

In Lennox a member of a family farm corporation argued farm program payment limitations should be based upon the number of families involved, rather than simply treating the family corporation as one entity. Agreement was voiced for views expressed previously that the Farm Credit System has been spendthrifty and that farmers are paying for the excesses through higher interest rates. Continuing changes in the crop insurance program were said to be a problem, and it was argued the risk of being prevented from planting should be covered as well. Unions were said to have gotten too strong, contributing to increased input costs. It was suggested cutbacks in grain inspection may have contributed to complaints from foreign customers concerning the quality of our exports. It was said farmers don't pay any attention to Government crop reports, that there would be no objection to limiting such reports to once a year, and that carryover stocks should be considered inventory and not surplus.

The last meeting was held in Hartford, and most of the views expressed had been covered at previous meetings. Specific comments focused upon excessive spending overseas and needed improvements in our grain standards, although it was suggested our foreign customers may just be having a little fun with us over the issue, since it is a buyers' market. Finally, at this session, as in several of the others, strong opposition was expressed to forgiveness of interest on loans.

Mr. President, that concludes my report on the views of South Dakota farmers solicited by me and my staff over the recent Columbus Day recess. Obviously, a broad range of views were expressed and most farmers recognize the most difficult part of agreeing upon farm policy in Washington is that there is so little consensus among farmers themselves. At the risk of excluding the views of some, however, let me comment very briefly on several broad themes on which there seems to be significant consensus:

First, very few farmers believe more Government is the solution. In fact, they see Government as a large part of the problem. Most want Uncle Sam to stay out of their personal business, and they abhor the thought of bureaucrats in Washington mandating what they must do in their own fields and on their own farms.

Second, farmers believe they are not being given a fair deal. They believe they are being asked to compete unfairly against foreign producers, sodbusters and tax-loss farmers, and they

believe very strongly that our Government should take a much more active role in insisting upon fairness for American farmers, both at home and abroad.

Third, farmers are conservation minded and support strong provisions to protect our natural resources.

Fourth, farmers believe Government has always pursued a cheap food policy and that Congress will never act to force prices to rise enough to provide decent prices to farmers, even though the cost to consumers would be small.

Fifth, farmers recognize more loans at any rate of interest are not the answer. Loans must be paid, and there is no substitute for profitable commodity prices.

Sixth, farmers want to farm for the market, not for the Government, and to have the opportunity to make a decent living through their own efforts.

Seventh, farmers are tired of being powerless price-takers in the marketplace and pawns in their own Government's foreign policy objectives. They want to make their own production and marketing decisions. They want to have a voice in the prices they receive, to have something to say about their own fate.

Mr. President, farmers know Uncle Sam cannot wave a wand and solve all their problems. They know not all farmers can be saved and, indeed, that some deserve to fail. They do ask for fairness and for responsible policies which will give them a chance.

As far as I am concerned, that's not too much to ask.

THE PASSING OF SPENCER W. KIMBALL

Mr. McCLURE. Mr. President, today I join with many of my colleagues in mourning the passing of Spencer W. Kimball, who served with great distinction as president of the Church of Jesus Christ of Latter-day Saints.

We in Idaho have a special bond with the LDS Church. As neighbors of the church's home State of Utah, many Idahoans are members of the church. President Kimball was not only a spiritual leader of many of our people; he was truly a good friend of the State.

He made several visits to Idaho during his 12 years as leader of the church, and each visit strengthened the resolve of members to redouble their efforts on behalf of the church. Many Idahoans remember when he came to the scene of the Teton Dam collapse in 1976, offering assistance and encouragement at a time of great personal distress.

During Mr. Kimball's tenure as president, 47 new temples were built in this country and around the world, and each is a symbol of Mr. Kimball's tireless efforts to further spread the word of his faith. One of these stands today in Idaho's State capital of Boise, where a magnificent temple was opened in 1983.

History will show that under Mr. Kimball's leadership, the LDS Church prospered and grew dramatically. When he became president in 1973, there were 3.8 million members of the church. Today there are close to 6 million members, an accomplishment that reflects proudly on his personal commitment to expand the church's membership both here and abroad.

No matter what our personal faiths may be, we can all look to Spencer Kimball as an outstanding citizen and leader. His dedication to traditional family values, and his battle to overcome physical adversity, have been inspirational to millions, and not only to those who are members of the church. He was truly a man of great vision, and he will be missed and remembered by all Idahoans and people of faith around the world.

INVESTMENT OF SOCIAL SECURITY FUNDS

Mr. DOLE. Mr. President, today the Social Security Subcommittee of the Committee on Finance held a hearing on Social Security investment policy. I am glad that the subcommittee chairman, my good friend BILL ARMSTRONG, and the ranking member, Senator MOYNIHAN, convened this hearing because I believe it has cleared away many of the misunderstandings and unfair allegations that have clouded the public's understanding of what happened last Friday, when the Treasury redeemed certain securities held by the Social Security trust funds in order to pay benefits without breaching the debt ceiling.

The witness at the Social Security hearing was John Niehenke, Deputy Assistant Secretary of Treasury for Domestic Finance.

TREASURY PROCEDURE

Mr. President, the allegation has been made by some that the Social Security trust funds were raided by Treasury to keep the Government operating within the debt ceiling, and that the general fund borrowed from the trust funds.

In fact, the Treasury redeems securities held by the Social Security trust fund when necessary in order to pay Social Security benefits. The trust fund moneys are by law invested in specially-issued Government securities at prevailing rates of interest, but only to the extent income to the trust funds [OASDI] exceeds the amount necessary to pay current benefits. Some of those securities are redeemed whenever monthly tax receipts to the trust funds do not equal or exceed benefit payments for the month. This has occurred a number of times in recent years, and the Treasury has established a standard procedure for redemptions. In this case, Treasury redeemed lowest interest rate securities first in order to maximize return to the trust funds, which is a slight deviation from routine practice.

Normally, on the first of the month Treasury will transfer to the Social Security trust funds an amount equal to the anticipated payroll tax receipts for that month. That amount is then invested in short-term securities, which securities are redeemed as necessary to cover payment of benefit checks.

Because we have been bumping up against the debt ceiling, that procedure was changed in October: The credit for anticipated payroll taxes was given to the trust funds, but the amount of that credit was not invested in securities. That is because investing that amount in Government securities would have put us over the debt limit. To pay October Social Security benefits, Treasury redeemed some of the securities in which trust fund surpluses are invested, rather than draw down the—already low—general fund cash balance.

THE SITUATION LAST WEEK

By the beginning of November, general fund cash balances were too low to cover benefit payments even had Treasury wanted to follow that course. Faced with the prospect of default on November 1, Treasury accelerated its normal redemption process and cashed in securities held by the trust funds in the full amount of benefit payments due on the first of the month. Redeeming these securities freed up cash io make benefit payments without breaching the debt ceiling.

The one clear loss to the trust funds from this procedure is a one-time interest loss of $10 million, due to the timing of the redemption, that is, the accelerated process. Senator HAWKINS and others have made proposals to make the trust funds whole for any interest deemed to have been foregone as a result of early redemptions, and Chairman PACKWOOD has pledged to make sure that is done.

WHY IT HAPPENED

The November 1 redemption of securities was only a speed-up of a process that has been used before when necessary to pay Social Security benefits on time. The redemptions were done to ensure that benefit payments were done on time without causing a default, and default would make it impossible for benefit checks to be honored, in any event. The action was taken for the protection of Social Security beneficiaries.

Social Security is principally a pay-as-you-go program, with the trust fund reserves serving as a contingency against an economic downturn or other emergency situation. The trust fund reserves are essentially an ac-

counting device, although the interest earned on the securities does help support the program.

In my view, the House precipitated this problem by taking a walk on Friday night, by refusing to bargain seriously on deficit reduction legislation, and by sending the Senate a short-term debt limit bill that was sloppily drafted and wouldn't have done the job. The best way to avoid this situation in the future is to act responsibly to the debt limit and on the deficit—now, and in the future.

A PERSONAL TRIBUTE TO SPENCER W. KIMBALL

Mr. GARN. Mr. President, 2 years after he assumed the leadership reins of the Church of Jesus Christ of Latter-day Saints (Mormons), Spencer Woolley Kimball allegedly was overheard in conversation with another 80-year-old Mormon Church leader. Apparently one of their younger brethren was in the midst of a very effective speech. The older leader said to President Kimball, "Isn't it wonderful that we have such fine young leaders to take over after we are gone."

To which the 80-year-old Kimball responded, "Who's going anywhere?"

He courageously lived 10 more years and died November 5, 1985.

He suffered chronic heart disease resulting in open heart surgery. Later cancer was discovered in his throat. The resulting surgery left him nearly speechless, but through perseverance he was able to develop a raspy, gravely voice, laced with kindness that became a trademark among his 5.8 million followers. Interestingly, all of these calamities occurred prior to his calling as president of the Mormon Church some 12 years ago.

My personal friendship with President Kimball dates back to my youth. I grew up in a family home, which I still own, only a few blocks from the Kimball home. At the untimely death of my wife Hazel, President Kimball offered wise counsel to me, a young, freshman Senator, to be strong, shoulder my difficult load and do what was right by my family. His confidence and advice was of great help to me through those difficult days when I seriously considered resigning from the Senate.

Later, he honored Kathleen and me by marrying us in the Salt Lake Temple, and our first son was named Matthew Spencer in honor of this great, kindly leader.

Of course, we always remember our personal experiences, no matter how they are paled by the grander achievements of those we respect.

Spencer Wolley Kimball will most likely be remembered for his extension of the priesthood to all worthy male members of the Mormon Church ending a 148-year practice of barring blacks from the priesthood. The short announcement on June 9, 1978, in six paragraphs said simply "the long-promised day has come when * * * all worthy male members of the church may be ordained to the priesthood without regard to race or color." The message was hand carried to the floor of this Senate and read. Senators, though few in number, rose to their feet with the gallery in sustained applause.

Spencer Kimball's love for life and his relentless battle for more time to complete a myriad of unfinished tasks was summed up in his admonition to all members of the LDS Church and good people everywhere to lengthen your stride in doing good in the world. He said, "I see the quality of readiness and devotion in our people today. There is so much yet to be done. Let us move forward. Let us continue the journey (of life) with a lengthened stride. If we will," he said, "the Lord of all will be in our midst and not forsake us."

With all his own great physical adversity his willingness and challenge to everyone to add a little more effort had powerful consequences. During his stewardship in office the number of full-time, self-supported representatives of the church on missions reached its all time high of over 30,000. Membership during his time as president and prophet of the Mormon Church nearly doubled from 2.9 million members in 1973 to an estimated 5.8 million today world wide.

Edward L. Kimball, son of Spencer and biographer of his father's life said, "Since he has been President of the Church there has been a tremendous burst of missionary work. He's had a perception of missionary work in worldwide terms that was really new to the Church. Somehow there was an extra dimension to taking the message of the Savior to everyone." During his tenure he encouraged all young men to plan on full time service to the church, and much encouragement has been given to retired couples and young women who wish to give of their time.

Working and striving his way through typhoid fever, boils, heart attacks, open heart surgery, cancer surgery, brain surgery, and a pacemaker, this slightly built, but giant of a man, left a pattern of patience and tough dedication that men of good will everywhere can learn from. His steadfast devotion to the important things in life, his family and his faith should be an inspiration to all people, regardless of their particular religious faith. They certainly have been to me.

Mr. BAUCUS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous-consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. NICKLES). Without objection, it is so ordered.

FEDERAL RETIREMENT REFORM ACT

MODIFICATION OF UNANIMOUS CONSENT AGREEMENT

Mr. DOLE. Mr. President, last evening we entered into an agreement with reference to the civil service retirement program and we made a reservation for the distinguished minority leader. He now indicates he is ready to approve the agreement with one modification. I am prepared to accept that modification as stated by the minority leader.

Mr. BYRD. Mr. President, I thank the distinguished majority leader.

I suggest that the agreement be modified only as follows: namely, that there be 10 minutes equally divided on any debatable motion, appeal or point of order if submitted to the Senate for its decision.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BYRD. Mr. President, in conformity with the provision of the agreement, I hereby give my approval to the time agreement.

Mr. DOLE. Mr. President, I thank the distinguished minority leader.

Mr. BYRD. I thank the distinguished majority leader.

Mr. DOLE. I think that will expedite things this afternoon.

SCHEDULE

Mr. DOLE. Mr. President, I shall indicate to Members by noon today if possible whether or not there will be a session tomorrow. I will again state, as I did last evening, it depends on a number of areas in which we are looking for progress.

The Mil Con appropriations bill is, as I understand, to be taken up very quickly. Then we have 10 minutes of debate starting at 1:50 p.m. and a vote at 2 p.m. on the Kozinski nomination.

If Mil Con is disposed of, then we will proceed to consideration of the civil service retirement legislation under a 3-hour time agreement, which has been entered into. There will probably be two or three votes on amendments to that bill.

It is also my hope that Senators DOMENICI and CHILES will be able to propound a unanimous-consent agreement on the budget reconciliation measure today.

It is also our hope that the D.C. appropriations bill could be taken up. We believe the bill should take very little time. There probably will be one vote.

Then there is the Cooper nomination to be Assistant Attorney General.

If we can make progress in those areas today, then I would be prepared to indicate we will not have a session tomorrow. Of course, we are not in session on Monday.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. DOLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

FEDERAL RETIREMENT REFORM ACT

Mr. DOLE. Mr. President, I ask unanimous consent that I may call up the Federal Retirement Reform Act of 1985 at any time today after consultation with and concurrence of the distinguished minority leader.

Mr. BYRD. Mr. President, there is no objection on this side to moving to that legislation and I hereby give my consent to the order which the distinguished majority leader has just requested.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Morning business is closed.

MILITARY CONSTRUCTION APPROPRIATIONS, 1986

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate turn to the consideration of Calendar No. 380, H.R. 3327, the military construction appropriations bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (H.R. 3327), making appropriations for military construction for the Department of Defense for the fiscal year ending September 30, 1986, and for other purposes.

The PRESIDING OFFICER. Is there objection to the immediate consideration of the bill?

Mr. BYRD. Mr. President, the request has been cleared on this side. There is no objection.

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Appropriations, with amendments, as follows:

(The parts of the bill intended to be stricken are shown in boldface brackets, and the parts of the bill intended to be inserted are shown in italics.)

H.R. 3327

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the following sums are appropriated, out of any money in the Treasury not otherwise appropriated, for the fiscal year ending September 30, 1986, for military construction functions administered by the Department of Defense, and for other purposes, namely:

MILITARY CONSTRUCTION, ARMY

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, facilities, and real property for the Army as currently authorized by law, and for construction and operation of facilities in support of the functions of the Commander-in-Chief, [$1,646,152,000] *$1,541,190,000,* to remain available until September 30, 1990: *Provided,* That of this amount, not to exceed [$129,000,000] *$136,100,000* shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, NAVY

For acquisition, construction, installation, and equipment of temporary or permanent public works, naval installations, facilities, and real property for the Navy as currently authorized by law, including personnel in the Naval Facilities Engineering Command and other personal services necessary for the purposes of this appropriation, [$1,703,705,000] *$1,632,620,000,* to remain available until September 30, 1990: *Provided,* That of this amount, not to exceed [$129,000,000] *$139,260,000* shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor: *Provided further,* That of this amount, $8,250,000 shall be available for land acquisition at China Lake, California.

MILITARY CONSTRUCTION, AIR FORCE

For acquisition, construction, installation, and equipment of temporary or permanent public works, military installations, facilities, and real property for the Air Force as currently authorized by law, [$1,585,140,000] *$1,718,863,000,* to remain available until September 30, 1990: *Provided,* That of this amount, not to exceed [$130,000,000] *$144,096,000* shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

MILITARY CONSTRUCTION, DEFENSE AGENCIES

For acquisition, construction, installation, and equipment of temporary or permanent public works, installations, facilities, and real property for activities and agencies of the Department of Defense (other than the military departments), as currently authorized by law, [$124,955,000] *$208,350,000,* to remain available until September 30, 1990: *Provided,* That such amounts of this appropriation as may be determined by the Secretary of Defense may be transferred to such appropriations of the Department of Defense available for military construction as he may designate, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: *Provided further,* That of the amount appropriated, not to exceed [$25,000,000] *$30,000,000,* shall be available for study, planning, design, architect and engineer services, as authorized by law, unless the Secretary of Defense determines that additional obligations are necessary for such purposes and notifies the Committees on Appropriations of both Houses of Congress of his determination and the reasons therefor.

NORTH ATLANTIC TREATY ORGANIZATION INFRASTRUCTURE

For the United States share of the cost of multilateral programs for the acquisition or construction of military facilities and installations (including international military headquarters) for the collective defense of the North Atlantic Treaty Area as authorized in military construction Acts and section 2806 of title 10, United States Code, $38,000,000, to remain available until expended.

MILITARY CONSTRUCTION, ARMY NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army National Guard, and contributions therefor, as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, [$100,362,000] *$86,657,000,* to remain available until September 30, 1990.

MILITARY CONSTRUCTION, AIR NATIONAL GUARD

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air National Guard, and contributions therefor, as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, [$116,350,000] *$112,205,000,* to remain available until September 30, 1990.

MILITARY CONSTRUCTION, ARMY RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Army Reserve as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, [$61,746,000] *$59,900,000,* to remain available until September 30, 1990.

MILITARY CONSTRUCTION, NAVAL RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the reserve components of the Navy and Marine Corps as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, [$41,800,000] *$39,660,000,* to remain available until September 30, 1990.

MILITARY CONSTRUCTION, AIR FORCE RESERVE

For construction, acquisition, expansion, rehabilitation, and conversion of facilities for the training and administration of the Air Force Reserve as authorized by chapter 133 of title 10, United States Code, and military construction authorization Acts, [$63,073,000] *$60,100,000,* to remain available until September 30, 1990.

FAMILY HOUSING, ARMY

For expenses of family housing for the Army for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, including debt payment, leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, as follows: for Construction, [$252,506,000] *$319,496,000*; for Operation and maintenance, [$1,167,069,000] *$1,224,717,000*; for debt payment, $16,077,000; in all [$1,435,652,000] *$1,560,290,000*: *Provided*, That the amount provided for construction shall remain available until September 30, 1990.

FAMILY HOUSING, NAVY AND MARINE CORPS

For expenses of family housing for the Navy and Marine Corps for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, including debt payment, leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, as follows: for Construction, [$131,708,000] *$146,800,000*; for Operation and maintenance, [$524,270,000] *$541,099,000*; for debt payment, $17,302,000; in all [$673,280,000] *$705,201,000*: *Provided*, That the amount provided for construction shall remain available until September 30, 1990.

FAMILY HOUSING, AIR FORCE

For expenses of family housing for the Air Force for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, including debt payment, leasing, minor construction, principal and interest charges, and insurance premiums, as authorized by law, as follows: for Construction, [$186,350,000] *$199,400,000*; for Operation and maintenance, [$650,161,000] *$693,993,000*; for debt payment, $15,305,000; in all [$851,816,000] *$908,698,000*: *Provided*, That the amount provided for construction shall remain available until September 30, 1990.

FAMILY HOUSING, DEFENSE AGENCIES

For expenses of family housing for the activities and agencies of the Department of Defense (other than the military departments) for construction, including acquisition, replacement, addition, expansion, extension and alteration and for operation and maintenance, leasing, and minor construction, as authorized by law, as follows: for Construction, [$1,410,000] *$1,910,000*; for Operation and maintenance, [$12,890,000] *$17,090,000*; in all [$14,300,000] *$19,000,000*: *Provided*, That the amount provided for construction shall remain available until September 30, 1990.

GENERAL PROVISIONS

SEC. 101. None of the funds appropriated in this Act shall be expended for payments under a cost-plus-a-fixed-fee contract for work, where cost estimates exceed $25,000, to be performed within the United States, except Alaska, without the specific approval in writing of the Secretary of Defense setting forth the reasons therefor.

SEC. 102. Funds herein appropriated to the Department of Defense for construction shall be available for hire of passenger motor vehicles.

SEC. 103. Funds appropriated to the Department of Defense for construction may be used for advances to the Federal Highway Administration, Department of Transportation, for the construction of access roads as authorized by section 210 of title 23, United States Code, when projects authorized therein are certified as important to the national defense by the Secretary of Defense.

SEC. 104. None of the funds appropriated in this Act may be used to begin construction of new bases inside the continental United States for which specific appropriations have not been made.

SEC. 105. No part of the funds provided in this Act shall be used for purchase of land or land easements in excess of 100 per centum of the value as determined by the Corps of Engineers or the Naval Facilities Engineering Command, except; (a) where there is a determination of value by a Federal court, or (b) purchases negotiated by the Attorney General or his designee, or (c) where the estimated value is less than $25,000, or (d) as otherwise determined by the Secretary of Defense to be in the public interest.

SEC. 106. None of the funds appropriated in this Act shall be used to (1) acquire land, (2) provide for site preparation, or (3) install utilities for any family housing, except housing for which funds have been made available in annual military construction appropriation Acts.

SEC. 107. None of the funds appropriated in this Act for minor construction may be used to transfer or relocate any activity from one base or installation to another, without prior notification to the Committees on Appropriations.

SEC. 108. No part of the funds appropriated in this Act may be used for the procurement of steel for any construction project or activity for which American steel producers, fabricators, and manufacturers have been denied the opportunity to compete for such steel procurement.

SEC. 109. No part of the funds appropriated in this Act for dredging in the Indian Ocean may be used for the performance of the work by foreign contractors: *Provided*, That the low responsive and responsible bid of a United States contractor does not exceed the lowest responsive and responsible bid of a foreign contractor by greater than 20 per centum.

SEC. 110. None of the funds available to the Department of Defense for military construction or family housing during the current fiscal year may be used to pay real property taxes in any foreign nation.

SEC. 111. No part of the funds appropriated in this Act may be used to pay the compensation of an officer of the Government of the United States or to reimburse a contractor for the employment of a person for work in the continental United States by any such person if such person is an alien who has not been lawfully admitted to the United States.

SEC. 112. The expenditure of any appropriation under this Act for any consulting service through procurement contract, pursuant to 5 U.S.C. 3109, shall be limited to those contracts where such expenditures are a matter of public record and available for public inspection, except where otherwise provided under existing law, or under existing Executive order issued pursuant to existing law.

[SEC. 113. None of the funds appropriated in this Act may be obligated or expended in any way for the express purpose of the sale, lease, or rental of any portion of land currently identified as Fort DeRussy, Honolulu, Hawaii.]

SEC. 113. (a) Notwithstanding any other provision of law, including but not limited to section 809 of the Military Construction Act, 1968, section 807(d) of the Military Construction Act, 1984, or any provision of an annual appropriation Act restricting the use of funds for the sale, lease, rental, or excessing of any portion of land currently identified as Fort DeRussy, Honolulu, Hawaii, the Secretary of the Army (hereinafter referred to as the "Secretary") is authorized to sell or convey, at the appraised fair market value as determined by the Secretary, all right, title, and interest of the United States in up to 45 acres of land and improvements northeast of Kalia Road comprising a portion of Fort DeRussy, Hawaii, to the City and County of Honolulu or the State of Hawaii or their designated agencies, upon such terms and conditions as are acceptable to the Secretary. The exact acreages and legal descriptions of the property to be sold under this section shall be determined by surveys which are satisfactory to the Secretary. The cost of any such surveys shall be borne by the buyer.

(b) The Secretary is authorized to acquire land and design and construct such facilities as are necessary to replace those on the land to be sold pursuant to subsection (a). The Secretary is also authorized to relocate activities currently located at Fort DeRussy to such replacement facilities.

(c) The proceeds of the sale authorized to be conducted pursuant to subsection (a) shall be available without fiscal year limitation to acquire land and replace facilities authorized to be acquired or constructed pursuant to subsection (b) and to pay associated relocation costs. The remainder of the proceeds shall be converted into the Treasury as miscellaneous receipts.

(d) Any action under this section shall insure adequate parking for the Hale Koa Hotel—Armed Forces Recreational Area. Authority provided by subsections (b) and (c) shall extend to replacement and relocation of facilities at Fort Shafter to another site to accommodate relocation of Reserve facilities from Fort DeRussy.

SEC. 114. None of the funds in this Act may be used to initiate a new installation overseas without prior notification to the Committees on Appropriations.

SEC. 115. None of the funds appropriated in this Act for F-16 beddown projects at Misawa, Japan, may be obligated or expended unless there has been notification to the Committees on Appropriations that the approved Government of Japan budget for fiscal year 1986 includes projects associated with the F-16 beddown as an additive over the level of funding provided in Japanese fiscal year 1985 for the facilities improvement program.

SEC. 116. None of the funds appropriated in this Act may be obligated for architect and engineer contracts estimated by the Government to exceed $1,000,000 for projects to be accomplished in Japan or in any NATO member country, unless such contracts are awarded to United States firms or United States firms in joint venture with host nation firms.

SEC. 117. None of the funds appropriated in this Act for military construction in the United States territories and possessions in the Pacific and on Kwajalein Island may be used to award any contract estimated by the Government to exceed $1,000,000 to a foreign contractor: *Provided*, That this section shall not be applicable to contract awards for which the lowest responsive and responsible bid of a United States contractor exceeds the lowest responsive and responsible

bid of a foreign contractor by greater than 20 per centum.

SEC. 118. The Secretary of Defense is to inform the Committees on Appropriations and Committees on Armed Services of the plans and scope of any proposed military exercise involving United States personnel 30 days prior to its occurring, if amounts expended for construction, either temporary or permanent, are anticipated to exceed $100,000.

(TRANSFER OF FUNDS)

SEC. 119. Unexpended balances in the Military Family Housing Management Account established pursuant to section 2831 of title 10, United States Code, as well as any additional amounts which would otherwise be transferred to the Military Family Housing Management Account during fiscal year 1986, shall be transferred to the appropriations for Family Housing provided in this Act, as determined by the Secretary of Defense, based on the sources from which the funds were derived, and shall be available for the same purposes, and for the same time period, as the appropriation to which they have been transferred.

SEC. 120. Not more than 20 per centum of the appropriations in this Act which are limited for obligation during the current fiscal year shall be obligated during the last two months of the fiscal year.

(TRANSFER OF FUNDS)

[SEC. 121. (a) Funds appropriated to the Department of Defense for construction in prior years are hereby made available for construction authorized for each such department by the authorizations enacted into law during the first session of the Ninety-ninth Congress.

[(b) IN GENERAL.—10 U.S.C. 2860 is amended to read as follows:

["§ 2860. Availability of appropriations

["Funds appropriated to a military department or defense agency for a fiscal year for military construction or military family housing purposes may remain available beyond such fiscal year to the extent provided in the appropriation Acts.".

[(c) EFFECTIVE DATE.—The amendment made by subsection (b) shall apply to funds appropriated after the date of the enactment of Public Law 99-103.

[SEC. 122. The Secretary of the Army acting through the Chief of Engineers of the United States Army Corps of Engineers is hereby directed to assign a military design, construction and support mission of said Corps of Engineers to the Little Rock district of the Corps of Engineers, to enlarge the civil works boundaries of said district to include all of the State of Arkansas exclusive of the lands and waters within the St. Francis River basin and east of said basin which shall remain in the Memphis district, to designate the Little Rock district as a full service district which includes responsibilities for finance and accounting, planning, design, construction, operation and maintenance and appropriate support services, and to reassign said district to the Lower Mississippi Valley Division. The provisions of this paragraph shall not in any way affect or change the boundaries or responsibilities of the Vicksburg district.

[SEC. 123. Notwithstanding any other provision of law, the Secretary of the Army shall convey, without reimbursement, to the United States Modern Pentathalon Association, a nonprofit association organized under the laws of the State of Texas, all equipment owned by the United States and currently used by the United States Modern Pentathalon Team for training and competition.]

SEC. 121. Upon determination by the Secretary concerned that such action is necessary in the national interest, he may transfer funds available for military construction and military family housing between such appropriations or funds or any subdivision thereof, to be merged with and to be available for the same purposes, and for the same time period, as the appropriation or fund to which transferred: Provided, That such authority to transfer may be used only for military construction functions authorized by law, but in no case where the item for which funds are requested has been denied appropriations by Congress: Provided further, That the Secretary concerned shall notify the appropriate committees of Congress semiannually of all transfers made pursuant to this authority.

SEC. 122. (a) None of the funds appropriated in this Act may be available for any country if the President determines that the government of such country is failing to take adequate measures to prevent narcotic drugs or other controlled substances cultivated or produced or processed illicitly, in whole or in part, in such country, or transported through such country, from being sold illegally within the jurisdiction of such country to United States personnel or their dependents, or from being smuggled into the United States. Such prohibition shall continue in force until the President determines and reports to the Congress in writing that—

(1) the government of such country has prepared and committed itself to a plan presented to the Secretary of State that would eliminate the cause or basis for the application to such country of the prohibition contained in the first sentence; and

(2) the government of such country has taken appropriate law enforcement measures to implement the plan presented to the Secretary of State.

(b) The provisions of subsection (a) shall not apply in the case of any country with respect to which the President determines that the application of the provisions of such subsection would be inconsistent with the national security interests of the United States.

SEC. 123. Of the total amount of budget authority provided for fiscal year 1986 by this Act that would otherwise be available for consulting services, management and professional services, and special studies and analyses, 10 per centum of the amount intended for such purposes in the President's budget for 1986, as amended, for any agency, department or entity subject to apportionment by the Executive shall be placed in reserve and not made available for obligation or expenditure: Provided, That this section shall not apply to any agency, department or entity whose budget request for 1986 for the purposes stated above did not amount to $5,000,000.

SEC. 124. It is the sense of the Congress that the administration should call on the pertinent member nations of the North Atlantic Treaty Organization and on Japan to meet or exceed their pledges for at least a 3 per centum real increase in defense spending and furtherance of increased unit, equitable sharing of our common defense burden, and international stability.

SEC. 125. (a) Notwithstanding section 13(g) of the Surplus Property Act of 1944 (50 App. U.S.C. 1622(g) and section 4 of the Act of October 1, 1949 (50 App. U.S.C. 1622(c)), the Secretary of Transportation, if requested, shall, as to the property described in subsection (c), in order to facilitate an exchange of land negotiated between the State of Georgia and the County of Glynn, Georgia, grant a release to the County of Glynn, Georgia, from all of the terms, conditions, reservations, and restrictions contained in the deed of conveyance dated July 1, 1975, under which the United States conveyed certain property to the County of Glynn, Georgia, for airport purposes. This provision does not apply to the portion of the property, conveyed by that deed, that is not specified in subsection (c). This provision is subject to the conditions in subsection (b).

(b)(1) The County of Glynn finds that the property obtained in exchange for the property described in subsection (c) is equivalent in value to the property described in subsection (c).

(2) Revenue derived from the land obtained by the County of Glynn in exchange for the property described in subsection (c) must be used for the development, improvement, operation, or maintenance of a public airport.

(3) The property described in subsection (c) shall be used by the State of Georgia in a manner compatible with airport purposes.

(4) Approval of the Secretary of Transportation must be obtained prior to any subsequent transfer by the State of Georgia of the property described in subsection (c). Such approval shall be given only if the Secretary finds that the property will continue to be used in a manner compatible with airport purposes.

(c) Subsection (a) applies to the following described area known as the "Glynco Jetport Tract":

GLYNCO JETPORT TRACT

"To locate the Point of Beginning, proceed from the intersection of the eastern right-of-way of Canal Road with the northern right-of-way of the Glynco Parkway, north 16 degrees 31 minutes 05 seconds east along the eastern right-of-way of Canal Road for a distance of 342.33 feet to a concrete monument which is the Point of Beginning; thence, continue north 16 degrees 31 minutes 05 seconds east along the eastern right-of-way of Canal Road for a distance of 1160.25 feet to a concrete monument; thence, proceed south 73 degrees 28 minutes 55 seconds east for a distance of 514.8 feet to a concrete monument located on the western right-of-way of the Brunswick-Altamaha Canal; thence, proceed south 12 degrees 31 minutes 00 seconds west along the western right-of-way of the said canal for a distance of 910.66 feet to a concrete monument located on the northern right-of-way of the Glynco Parkway; thence, proceed south 65 degrees 01 minutes 04 seconds west along the northern right-of-way of the Glynco Parkway for a distance of 219.54 feet to a concrete monument which a point of curvature; thence continue along the said right-of-way for a distance of 31.0 minutes along the arc of a curve having a delta angle of 13 degrees 00 minutes, a Tangent of 334.95 feet, and a radius of 2939.79 feet to a concrete monument; thence, proceed north 85 degrees 53 minutes 24 seconds west for a distance of 398.00 feet to a concrete monument located on the eastern right-of-way of Canal Road and is the Point of Beginning.".

SEC. 126. None of the funds appropriated to the Department of Defense in this or any other Act may be obligated or expended to construct, operate, or maintain any facility that—

(1) is located on a military installation in the United States;

(2) is to be used for the operation of a commercial franchise business; and

(3) is not identified in a contract, supplemental agreement to a contract, a contract solicitation, or a letter of intent agreed to on or before May 23, 1985.

SEC. 127. Notwithstanding any other provision of law, funds appropriated by this Act for the United States contribution to the North Atlantic Treaty Organization Infrastructure program may not be obligated or expended at a rate exceeding the rate of recoupment during fiscal year 1986 of $30,000,000 of prefinanced United States contributions to this account.

SEC. 128. (a) Subsection (a) of the first section of the Act entitled "An Act relating to the rate of wages for laborers and mechanics employed on public buildings of the United States and the District of Columbia by contractors and subcontractors, and for other purposes" approved March 3, 1931 (40 U.S.C. 276a(a)), commonly known as the Davis-Bacon Act is amended—

(1) by inserting "(1)" after "(a)";

(2) by inserting "or, in the case of contracts awarded by the Department of Defense, every contract in excess of $1,000,000" after "$2,000" in the first sentence; and

(3) by adding at the end thereof the following new paragraph:

"(2)(A) The minimum wages provided for in paragraph (1) in the case of a construction, alteration, or repair contract awarded by the Department of Defense shall be the prevailing wages determined by the Secretary of Labor under subparagraph (B).

"(B) For purposes of subparagraph (A), the Secretary of Labor shall base his determination of the wages prevailing for the corresponding classes of laborers, mechanics, and helpers on—

"(i) the wage paid to 50 per centum or more of the corresponding classes of laborers, mechanics, and helpers employed on private industry projects of a character similar to the contract work in the urban or rural civil subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there; or

"(ii) if the same wage is not paid to 50 per centum or more of the laborer, mechanics, and helpers in the corresponding classes, the weighted average of the wages paid to the corresponding classes of laborers, mechanics, and helpers employed on private industry projects of a character similar to the contract work in the urban or rural civil subdivision of the State in which the work is to be performed, or in the District of Columbia if the work is to be performed there.".

(b)(1) The first section of such Act is further amended—

(A) by striking out "mechanics and/or laborers" in subsection (a)(1) and inserting in lieu thereof "laborers, mechanics, helpers, or any combination thereof";

(B) by striking out "laborers and mechanics" wherever it appears and inserting in lieu thereof "laborers, mechanics, and helpers";

(C) by striking out "mechanics and laborers" in subsection (a)(1) and inserting in lieu thereof "laborers, mechanics, and helpers"; and

(D) by striking out "laborers and mechanics" in subsection (b) and inserting in lieu thereof "laborers, mechanics, and helpers".

(2) Section 2 of such Act (40 U.S.C. 276a-1) is amended by striking out "laborer or mechanic" and inserting in lieu thereof "laborer, mechanic, or helper".

(3) Section 3 of such Act (40 U.S.C. 276a-2) is amended by striking out "laborers and mechanics" wherever it appears and inserting in lieu thereof "laborers, mechanics, and helpers".

Mr. MATTINGLY. Mr. President, I am pleased to recommend to the Senate, H.R. 3327, as amended, which provides appropriations for military construction for fiscal year 1986.

I believe that the recommendations before the Senate reflect a balanced program, and I am pleased that the distinguished ranking member of the subcommittee, Mr. SASSER, and I are in general agreement on the bill as it was reported from the full Appropriations Committee.

The budget request for military construction for fiscal year 1986 was $10,340,200,000. The committee is recommending $8,645,133,000 in new budget authority for this fiscal year. That amount is comprised of two large accounts: $5,497,545,000 for military construction projects; and $3,147,588,000 for the military family housing account which includes construction as well as operation and maintenance of the existing units.

The amounts I have mentioned reflect an increase to the House recommendation of $272.4 million; a decrease from the budget request of $1.7 billion; and an increase over last year's appropriation of $239.9 million.

In terms of percentages, the budget request was 23 percent above last year's appropriation including 5 percent inflation. The committee recommendation is 2.8 percent above last year's appropriation. So in terms of inflation and real dollars, the bill before the Senate today reflects no real growth—actually less than zero when the 5 percent inflation factor is taken into consideration.

Obviously, the bill before us does not provide the full amount requested. However, it does reflect the Senate position based on the authorization for military construction and it is within the subcommittee allocations for new budget authority and outlays.

Let me say now, since we have all been especially aware of outlay problems—that this recommendation provides new outlays of $2.236 billion. Prior year outlays total $5.388 billion for a total of $7.623 billion. The subcommittee allocation for outlays is $7.6 billion, so you can see that we have met the outlay target without much room to spare. It is my understanding that the Budget Committee does not have any objection to the bill as reported to the Senate. However, I must say that if we have a large number of amendments today which add to the total that each add-on amendment will have to be reviewed in terms of its impact on first year outlays as well as its increase to budget authority.

In order to stay within the subcommittee allocations, it was necessary to make reductions in the bill. The committee has attempted to make the cuts as painless as possible. We have also attempted to insure that those projects which are most vitally important to operational and readiness missions have been included.

The House bill included many cuts to projects which the subcommittee did not believe to be in the best interests of our national defense. Many of the reductions have been restored in the bill before you. However, in order to restore the House reductions, it was necessary to look for projects to defer. As you are all aware, since we are the last committee to act on this bill, it is difficult to come up with many new cuts. Based on that situation, the committee is recommending substantial reductions in a couple of broad categories.

The major category reduction is that of administrative facilities. While administrative facilities are necessary, I, personally, cannot consider them in the same category as tactical equipment shops, hangars or maintenance facilities.

The recommendation before you also reflects a change from previous years in that several projects are funded contingent upon authorization. These projects have been included because the authorization conference has not completed its action, and there are a number of projects which could not be considered in the appropriations conference if they are not included in this bill. I understand that the projections included have a good chance of being approved during the authorization conference.

Another area of concern to me is the minor construction accounts which are provided to each of the services and defense agencies. Minor construction is, as I understand it, to be used for unforeseen projects of less than $1 million which were not anticipated in advance and which should not wait for the next regular budget cycle. I believe, however, that in many instances projects that can and should be placed in the normal budget process are being accomplished.

Based on my concern over this account, the committee has reduced the minor construction accounts throughout the bill by about 50 percent. The House had made a reduction of about 33 percent to these accounts. But, I believe in many cases that we do not get the attention of the Department unless we "hit their wallet"—so to speak. I hope this action will make the Department more aware of the concerns over this account.

Mr. President, I do not believe it is necessary to go into great detail on the line items—particularly since there are many of them. Let me say, that within the confines of the authorization, the

committee has attempted to meet the requests it has received.

With regard to issues or problem areas, quite frankly military construction did not have any issues this year which I would consider controversial. There are, however, a couple of items I would like to bring to the Senate's attention.

The committee at my request has again included a general provision which would place a trigger on the amount of funds which can be obligated from the NATO Infrastructure account to insure that the recoupment process for prefinanced projects—over $210 million—continues in a positive direction. Progress has been made, but I believe that we must keep the pressure on.

There is report language included on the Philippine bases which are so very strategically important to the United States defense posture in the Pacific and Indian Ocean area. As you know, Senator LAXALT, a member and former chairman of the subcommittee, has just returned from a visit to the Philippines at the request of President Reagan. I have discussed this issue with the Senator from Nevada and had briefings from the administration. Based on that, the recommendation is to include the majority of the projects for the Philippines, although some were deferred in the administrative category. The report language stresses the concerns over security at our bases. I believe that it would not be in the best interests of this country to give any indication of backing away from these important bases at this time, especially since we have now seen that the Philippines are going to hold a general election sometime after the first of the year.

I know that Senator SASSER will address this issue as he has in his minority views in the report. I believe, however, that we both basically want the same thing—that is, continued access to these bases and improved security for U.S. personnel and property.

Also included in the recommendation is a Davis-Bacon provision. The provision is identical to an amendment which was approved by the Senate as part of the Defense Authorization Act. I truly believe that this amendment will not cause any problem with the so-called "prevailing wage" system. The major change for this provision is that it lifts the ceiling from $2,000 to $1 million on those military construction projects exempted from Davis-Bacon. In doing this, savings are estimated at $51 million this year alone and have been reflected in the bill as general reductions to the Army, Navy, and Air Force accounts.

Mr. President, I believe that covers the major points which I wanted to bring to the attention of the Senate. I understand that there will be a couple of amendments offered once the bill is opened for amendment.

At this time, I thank the distinguished Senator from Tennessee [Mr. SASSER], who is the ranking member, for his cooperation and assistance in the preparation of the bill.

Mr. President, I believe that the committee recommendation now before the Senate continues the Senate's strong support for military construction. I do not believe that any reduction recommended will cause problems in meeting the missions of our units worldwide. And in most cases, the Department of Defense has been given the benefit of the doubt on a project if there was a question to insure that it will be considered in the conference committee.

The recommendation before us today is the product of many hours of review from hearings, briefings, point papers and justification books. I believe that it is a fair and balanced program which meets the highest priority construction needs for the Department of Defense.

I urge my colleagues to support this bill as reported. Also, I urge Senators to come to the floor with their amendments.

Mr. President, at this point, I yield to the distinguished ranking minority member of the subcommittee [Mr. SASSER] for any comments he may have on the bill.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, I thank the distinguished chairman of the subcommittee for his efforts and for his remarks here today. I might say, Mr. President, that the distinguished chairman and I have worked well together on the Military Construction Subcommittee over the past few years. I think we have made some real progress toward keeping a closer rein on spending in the military construction area.

However, the bill before us today funds over 1,300 military construction projects throughout the world. We are providing more than $8.6 billion to fund these projects at almost 700 bases in literally every corner of this globe. I think, Mr. President, that the Senate should take a moment to reflect on the recent trends in military construction funding.

In fiscal year 1980, only 600 military construction projects were funded by Congress. That was just 5 years ago. The bill before us today is for more than twice that number.

In fact, military construction has been one of the fastest growing components of the Defense budget. In fiscal year 1980, the Milcon budget was only $3.8 billion. This fiscal year, the administration had originally requested $10.3 billion—a 171-percent increase in just 6 years.

The Congress has joined the administration in providing the necessary funds to improve our military facilities at home and abroad. Many of our facilities are deteriorating—there is no doubt about that—and are in bad need of replacement. New missions are requiring vast new structures to house new weapons systems. And we have embarked on a large program of facility improvements to support military families, a program that is badly needed if we are to maintain our reliance on an All-Volunteer Force.

I bring these facts before the Senate to illustrate the support the Congress has given to the military construction program in the past few years.

I must say, however, that, in my view, those large budget increases we have been approving will soon be a thing of the past.

In the bill before us, the committee has cut the administration's request by $1.7 billion. As we debate the need for further deficit reduction on this floor, it is clear that the growth of military construction accounts must be moderated in future years.

So, Mr. President, both the administration and the Congress will be faced with some hard decisions in coming years. We will not be able to fund everything base commanders would like to have. We are going to have to prioritize future military construction projects to assure that the greatest needs for our forces and their families are being met.

Mr. President, because of the fiscal realities of the United States, it is imperative that our allies begin to bear a larger share of the defense burden for what we have come to call the free world.

Included in this bill is language I first drafted 4 years ago urging the administration to call upon our NATO allies to increase their share of the common defense.

Any way you slice it, Mr. President, they are not doing their share, in the judgment of this Senator, whether it is on the basis of per capita expenditures or on the basis of percentage of gross national product, or whether it is on the basis of total spending.

In the past few years, I am happy to report some progress has been made. Last December, NATO approved a significant increase in NATO infrastructure funding—a step in the right direction.

However, as the U.S. Defense budget increases begin to shrink from the size of recent years, our allies must recognize that they must provide a more equitable share of defending Western interests.

Mr. President, there are many important provisions in this bill. Mr. MATTINGLY has dicussed many of them in his opening remarks, so I will not reiterate them to save the time of the

Senate this morning. But, as I said at the committee markup, the chairman and I agree on the vast majority of issues that come before our subcommittee.

However, there are those items where we must disagree.

One such item is the general provision regarding Davis-Bacon.

Mr. President, the bill before us includes a legislative provision which would exempt minor military construction projects from the requirements of the Davis-Bacon statutes.

Mr. President, the language in the bill is clearly legislation on an appropriations bill.

Furthermore, this issue has already been decided by the Congress. Last June, the junior Senator from Texas succeeded in passing these exact provisions on the Defense authorization bill. The conferees on the authorization deleted Senator GRAMM's amendment.

So, I would say to my colleagues "let us not beat this old dog around the bush any longer." Davis-Bacon has already been decided by the Congress. There is no reason to believe that our colleagues in the House will agree to these provisions they have so vigorously opposed on the authorization legislation.

Mr. President, before concluding my remarks, I would like to take a moment of the Senator's time and discuss military construction activities in the Philippines.

The bill before us provides $104 million to enhance our facilities at Clark Air Base and Subic Navy Base. These are the largest military installations—at least the largest Air Force base and the largest naval base—outside the continental limits of the United States.

During the subcommittee and full committee markups, I questioned the advisability of providing these funds for those bases at the present time, in view of the deteriorating security situation being faced in the Philippines.

All of us in this body are aware that the political, economic, and military crises which confront the Philippines could threaten our continued access to the military bases there.

A recent staff report advised the subcommittee that security must be beefed up at Clark and Subic to provide for the safety of military personnel and equipment. I am pleased that the committee is urging the Department of Defense to undertake an immediate review of the necessary security enhancements to protect our military interests in the Philippines.

However, Mr. President, as I pointed out in minority views which accompany the committee report, physical security enhancements, alone, will not ensure continued U.S. access to these vital facilities.

The government of President Marcos must institute prompt reforms, if stability is to be restored before the Communist insurgency spirals out of control and threatens the U.S. presence at Clark and Subic.

The committee has received reports that the Department of Defense is planning to spend as much as $1.3 billion in military construction at our Philippine bases over the next 7 years.

I submit that such an investment is unwise, until the United States can be reasonably assured that the Marcos government is moving toward meaningful reforms that will put an end to the corruption, inefficiency, and incompetence which are fueling the fires of the insurgency.

To be fair, Mr. President, I want to commend the Reagan administration for the recent attention it has been giving the Philippine crisis.

The recent visit by the President's personal emissary, our colleague, Senator LAXALT, is serving to make it clear in Manila that the United States will not sit idly by while the Government of the Philippines allows the country to fall to the Communist insurgency.

The United States has a vital interest to protect in the Philippines. To attempt to rebuild our military facilities there at some other Pacific location would be a significant setback and a costly one.

More important, it is vital that these facilities do not fall into Communist possession as did United States facilities at Cam Ranh bay in Vietnam.

United States taxpayers' dollars were used there to construct one of the most elaborate and productive naval bases in that region of the world. And who utilizes these resources today? This is the Southeast Asia port of the fleet of the Soviet Union.

Yet, Mr. President, we may be heading in that direction in the Philippines.

I believe we must be preparing contingency plans for the design and location of alternate facilities should we be denied future use of Philippine bases.

In addition, I believe we should be using every appropriate source of leverage to demonstrate to the Marcos regime that we are serious about the need to reform.

One source of leverage, I believe, is to place a moratorium on further military construction at our bases, except for security upgrade projects.

I have long felt that between governments actions speak much louder than words. And our words would be greatly strengthened if they were backed by a clear example that the United States of America is not going to continue to invest in the Philippine Islands until the regime governing those islands reforms itself and responds to the legitimate aspirations of its people.

I submit that such a moratorium should last until the President can certify to the Congress that the Government of the Philippines is heading in the direction of meaningful reforms which will halt the insurgency and restore democratic life and economic viability to the country.

Mr. President, I believe that we are facing a serious crisis in the Philippines today. It is the most serious security issue to confront the American people since the trauma of Vietnam.

For that reason, I believe it absolutely imperative that the Congress and the administration approach Philippine policy in a bipartisan manner.

As I previously stated, I have been pleased that the administration is beginning to pressure the Marcos government to initiate reforms before it is too late.

Events of the past few days indicate that, perhaps, that pressure is beginning to have some effect. President Marcos has called elections for mid-January. And the political opposition in that country has indicated it will vigorously contest the reelection of the Marcos government.

Only time will tell if those elections will be fair and honest and if they will be a legitimate expression of the will and opinion of the majority of the people of the Philippines. We will have to wait and see if the elections will bring about change or if they will result in a manipulated mandate of a corrupt regime.

Mr. President, I had planned to offer an amendment to this bill today which would place a moratorium on military construction at our Philippine bases.

However, the recent announcements in the Philippines give us some cause for encouragement. Perhaps our message, perhaps our pressure, is beginning to get through to the right people.

So, I will not offer that amendment. The administration desires that these military construction projects be funded this year as a signal of our determination to maintain our military bases in the Philippines.

I am willing to give administration policy a chance to work, since we are seeing some movement in the right direction.

But, if the elections in the Philippines result in a mandate for more corruption, more military incompetence, more terror, and further denial of legitimate human rights, then the administration and the Congress will have to come to grips with the realities which will have to be faced again in Southeast Asia.

It is my sincere hope that President Marcos is willing to consider the global consequences of the problems his country faces. The administration believes that, since President Marcos has been part of the problem, he must be

part of the solution. Perhaps that is correct. I have my own doubts. But there can be no doubt that the rest of the nations and the peoples of Asia are watching carefully what happens in the Philippine islands.

This a country that was given its independence by the Government of the United States. We are its chief patron. We have initially instituted a democratic form of government in that country, and the other peoples and nations of the region will be watching to see if democracy American style can endure and can flourish in Asia. Let us hope that President Marcos is willing to give it a chance.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc and that the bill as thus amended be regarded for the purpose of amendment as original text, provided that no point of order shall be considered to have been waived by agreeing to this request.

Mr. SASSER. I object, Mr. President.

The PRESIDING OFFICER. Objection is heard.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the committee amendments be agreed to en bloc, except section 128, and that the bill as thus amended be regarded for the purpose of amendment as original text, provided that no point of order shall be considered to have been waived by agreeing to this request.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

Mr. MATTINGLY. Mr. President, I understand that a few amendments will be offered. I am ready to begin consideration of the amendments. I think the Senator from Tennessee and I can go through some amendments right now.

Mr. BENTSEN. Mr. President, last July, the Secretary of the Navy announced plans for the strategic homeporting of several ships along the gulf coast, including major buildups in Corpus Christi and Galveston/Houston, TX, as well as in other States. This was a wise and welcome decision which should increase our Navy's capabilities in a strategically important area.

One reason for the selection of the two Texas cities was the strong community support for the homeports, backed up by a special appropriation by the Texas Legislature. The people of Texas wanted the increased Navy presence, and they were willing to pay their fair share of the startup costs.

It is a complex task, however, to plan for an influx of over 5,000 additional military personnel and their dependents, such as will occur in Texas. Roads, housing, schools, water and sewer lines must all be planned for and coordinated with the military construction and deployment schedules. The necessary analysis and planning can overwhelm all but the largest cities, so special help is needed.

The Defense Department has a special Office of Economic Adjustment to assist local communities in planning for the growth which strategic homeporting brings. That office has a fine record of smoothing the transition with advice, coordination, and planning funds. One of its major efforts in recent years, for example, was to help in the planning for the new Trident base at Kings Bay, GA.

Now the planning is beginning for the gulf coast homeporting. For those local efforts to be efficient and effective, the Office of Economic Adjustment must again play an important role. I have considered offering an amendment to provide $1 million in military construction funds to help gulf coast communities develop the necessary plans to cope with the expanded homeporting.

Mr. President, I wonder what the chairman of the Military Appropriations Subcommittee, the distinguished Senator from Georgia [Mr. MATTINGLY], would think about such an amendment.

Mr. MATTINGLY. Mr. President, I agree with the distinguished Senator from Texas [Mr. BENTSEN] on the value of community impact planning assistance and on the need for it in the gulf coast homeport sites. I do not believe an amendment is needed to accomplish that purpose, however, since the House-passed bill has earmarked such funds and the matter will be in conference.

On principle, our subcommittee was reluctant to approve funds for matters that were not authorized. And pending conclusion of the conference on the authorization bill, we decided not to fund projects which the Senate had not yet approved.

Let me advise the Senator from Texas, however, that I will support community impact planning funds for gulf coast homeports in the conference with the House on this measure if he will desist in offering an amendment at this time.

Mr. BENTSEN. Mr. President, with that clear assurance from the distinguished Senator from Georgia, I shall not offer my amendment. And I thank the Senator.

AMENDMENT NO. 969

(Purpose: To provide funds for construction in connection with the National Defense University at Fort McNair, Washington, DC.)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. ANDREWS). The pending amendment is the excepted committee amendment.

Mr. MATTINGLY. I ask unanimous consent to set aside the committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY], for himself, Mr. THURMOND, and Mr. HATFIELD, proposes an amendment numbered 969.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 4, line 1, strike out "$208,350,000" and insert in lieu thereof "$233,290,000".

Mr. MATTINGLY. Mr. President, I have no objection to the amendment.

Mr. SASSER. Mr. President, the amendment of the distinguished Senator from South Carolina seeks to fund a project which I think probably is meritorious, if this were not such an austere budget year. Our committee has had to make some serious cuts in the budget request, and we reduced this budget by $1.7 billion. So if there were no necessity to exercise budget restraint, I would be an enthusiastic supporter of the amendment offered by the Senator from South Carolina.

However, I will not offer an objection at this time, because I understand the desire of the Senator from South Carolina to get this project to conference, since the House did not provide funding for it. Therefore, I will offer no objection to the amendment.

Mr. MATTINGLY. I thank the distinguished ranking minority member of the committee.

Mr. THURMOND. Mr. President, this amendment would restore $25 million for the National Defense University. These funds are for critical academic space for the university, the Nation's top military school.

This program has been placed in both the House and Senate authorization bills. I strongly believe that this facility, long in the development process, is essential for the effective mission accomplishment and enhancement of our national security.

I urge my colleagues' support.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 969) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SASSER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 970

(Purpose: To appropriate funds for the construction of a medical supply warehouse at Camp Carroll, Korea, and for a medical contingency complex in Torrejon, Spain)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. Without objection, the committee amendment will be set aside.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY], for Mr. BINGAMAN and Mr. GLENN, proposes an amendment numbered 970.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 7, strike out "$1,541,190,000" and insert in lieu thereof "$1,545,690,000".

On page 3, line 13, strike out "$1,718,863,000" and insert in lieu thereof "$1,721,763,000".

Mr. MATTINGLY. Mr. President, the amendment provides funding for two overseas medical contingency facilities and this side has no objection to the amendment.

Mr. BINGAMAN. Mr. President, this amendment would restore funding for two overseas medical contingency facilities, one in Korea and one in Spain. We had testimony in the Manpower Subcommittee of the Senate Armed Services Committee earlier this fall on our military medical readiness. Dr. William Mayer, Assistant Secretary of Defense for Health Affairs, and the Services Surgeons General appeared at that hearing. That hearing highlighted just how far we had to go in order to have some semblance of medical readiness within our Armed Forces.

Dr. Mayer, at that hearing, specifically criticized the action by the House Appropriations Committee in deleting all of the funding for construction of medical contingency facilities overseas in this bill. So I want to commend the junior Senator from Georgia, Senator MATTINGLY, and the senior Senator from Tennessee, Senator SASSER, for restoring funding for many of these facilities in this bill. They have provided $6.85 million for the fleet hospital support facility near London. They have provided $1.15 million for the medical contingency complex at Incirlik Air Base in Turkey. They have provided $10.4 million for the medical contingency complex at Kimhai Air Base in Korea and they have provided $10.2 million for the fleet hospital support facility in Guam. I commend the Senators for their action in this case. I particularly appreciate the willingness to fund the Kimhi facility despite some misgivings presented in the minority staff's report on Asian military construction concerning the adequacy of Air Force and Army collaboration on that project and some concern about its siting.

The committee has recognized, and I commend them for it, the importance of these facilities to the caring for our soldiers should hostilities ever break out in Europe, the Mediterranean, or Northeast Asia. My amendment would restore funding for two other military contingency facilities. One is $4.5 million for a medical supply warehouse at Camp Carroll, Korea. The other is a $2.9 million medical contingency complex at Torrejon Air Base in Spain. Both are needed projects.

I realize that the Appropriations Committees of both Houses have chosen not to fund most other projects in Spain with the exception of a pier extension in Rota because of concern about whether the Spanish Government will continue our base rights in Spain. But I think that this facility is of such importance that we should go ahead with it. It would permit the immediate operability of a 500-bed contingency hospital at Torrejon. Without it there would continue to be insufficient medical capability to treat casualties under contingency operations in Europe and especially in the Mediterranean. There are currently no other available facilities in this area to support this critical requirement. And the result would be an unnecessarily high mortality rate and greater airlift demand in the terrible event that there were a contingency in NATO's southern flank or elsewhere in the Mediterranean. So I hope that this amendment will be acceptable to the committee. I appreciate the committee's support for the Medical Contingency Program. I appreciate the committee's concern with regard to the need for an overall plan on these overseas medical contingency facilities. Our hearing earlier this year in the Manpower Subcommittee adequately, in fact more than adequately, demonstrated the need for the services to work together better than they have in the past on this issue and I commend the committee's efforts to push them in that direction.

Mr. GLENN. Mr. President, I am pleased to cosponsor Senator BINGAMAN's amendment to add $7.4 million to the fiscal year 1986 military construction appropriations bill. These funds will permit construction of two very important wartime military medical contingency facilities overseas—one in Spain and one in Korea.

The sum of $2.9 million of this amendment will be used to construct a medical contingency facility adjacent to the existing Air Force military hospital at Torrejon Air Force Base in Spain.

During peacetime, this contingency facility will provide storage for a 500-bed hospital, a blood transshipment center, and other critical wartime medical supplies and equipment. In wartime, this facility will operate 204 hospital beds, triage, patient holding, and radiology augmentation. It will also allow the existing hospital at Torrejon to expand from 45 to 296 beds and to include surgery, sterile supply, and intensive care functions.

The remaining $4.5 million in this amendment will provide funds for construction of a medical warehouse at Camp Carroll, Korea. This medical warehouse project is a critical part of the active medical supply, optical and maintenance unit in the Far East. Coupled with others which are already funded in this bill, this project will allow this Army medical unit to relocate from its current antiquated, inadequate facilities in Seoul to new facilities at Camp Carroll.

This warehouse will provide medical supplies to all active medical facilities in Korea. It will also provide storage facilities for vitally needed medical war reserve supplies, and therefore is an essential step in improving our wartime medical readiness in Korea.

Mr. President, this fall, the Manpower and Personnel Subcommittee of the Armed Services Committee has held a series of oversight hearings on the military health care delivery system. Our hearing on wartime medical readiness focused on two recent Defense Department studies of our wartime medical capability in the NATO and Pacific theaters, both done by senior military medical officers. These reports revealed very serious and very disturbing gaps in the military services' current capability to provide medical care in the event of war.

My conclusion from these oversight hearings is that our current capability to deliver wartime medical care in a conventional war in both the NATO and Pacific theaters is totally inadequate. There is no excuse for this situation.

Part of the blame for this situation lies in the existing command structure of the military services, and the apparent inability of the military services to cooperate in planning for wartime medical care. This problem is systematic of the much larger problem of the inability of the military services to work together which the Armed Services Committee is addressing as part of our ongoing effort to reorganize the Department of Defense.

But the other part of the problem has been a simple lack of resources, including wartime contingency medical facilities. With the tremendous investment we have made in Defense spending in the last 5 years it is inconceivable to me how we can still be in the position of being able to treat only 3 out of 10 expected casualties in a NATO war. But that is where we are today.

Under the energetic leadership of Dr. William Mayer, the Assistant Secretary of Defense for Health Affairs, the Defense Department is beginning to recognize the serious nature of these shortcomings in our wartime medical care capability. We have made progress in the last year or so, but we still have a long way to go.

During our hearings this fall. Secretary Mayer pleaded with the Manpower and Personnel Subcommittee for assistance in securing funding for the overseas wartime contingency medical facilities requested in fiscal year 1986 budget. These projects are absolutely essential to improving our wartime medical readiness posture, which in turn, in my opinion, is absolutely essential to our Nation's ability to prosecute a conventional war.

For this reason, I urge my colleagues to support this amendment.

Mr. SASSER. Mr. President, I support the amendment by the Senator from New Mexico.

Medical readiness should be afforded a high priority by our military services.

The Appropriations Committee has added back a number of medical contingency projects which were deleted by the House.

I would urge the adoption of this amendment which restores two medical readiness projects—one in Spain and one in Korea.

I commend the Senator from New Mexico for bringing this amendment before the Senate.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 970) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SASSER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATTINGLY. Mr. President, I move to set aside the excepted committee amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 971

(Purpose: To appropriate funds for the replacement of the electrical distribution system at Fairchild Air Force Base, Washington)

Mr. MATTINGLY. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY], for Mr. GORTON, proposes an amendment numbered 971.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 13, add $12,500,000 to the number shown.

Mr. GORTON. Mr. President, my amendment would appropriate $12.5 million for the replacement of the antiquated electrical distribution system at Fairchild Air Force Base in Spokane, WA. This project is vitally important to Fairchild's primary air defense mission. It has the unequivocal support of the Strategic Air Command and Air Force and is 90 percent design complete. Indeed, this was the No. 2 priority in the entire Strategic Air Command military construction request for fiscal year 1986. The Office of the Secretary of Defense, however, inexplicably deleted the project from the proposed military construction budget. No other military construction projects for Fairchild AFB were included in the Department of Defense's budget request. The House military construction authorization and appropriation bills include the funds necessary for the project and yesterday the Senate conferees receded to the House position in the authorization conference.

Fairchild's current electrical distribution system dates to the base's construction in 1942. Although commercial power companies currently provide electricity to customers at a 13,200 voltage level, the base's system is designed to accommodate only 4,160 volts. Replacement transformers and other parts for systems using voltage rates lower than 13,200 volts no longer exist. As a result, replacement parts for the Fairchild's system are one-of-a-kind and must be custom made. Procurement of such parts is extremely expensive and increases the system's downtime. When the system is upgraded to 13,200 volts, powerline loss will decrease by 70 percent, saving the base an estimated $48,000 per year.

In addition, the system's age makes power failure a common occurrence. Since 1980, Fairchild reported 34 critical power outages directly affecting the base's weapons storage area, bomber alert area, air field lighting, or command post. The base averages 62 noncritical outages per year, for a total or 301 hours of downtime. Exterior electrical equipment failure accounts for 50 percent of these outages. A new distribution system would reduce equipment-related downtime by an estimated 100 hours, saving approximately $34,500 per year in manpower service costs. The base would also save approximately $5,600 per year in generator fuel costs. Thus, total savings as a result of increased efficiency would at a minimum amount to over $88,000 per year.

Most importantly, the base's electrical transmission lines, poles, and transformers are very vulnerable because of the system's age and above ground configuration. For example, a serious winter storm with high winds and sleet, not at all uncommon in the Spokane area, could have serious effects on the electrical system. It is estimated that 60 percent of the system's aged poles and lines would be lost in a very bad storm. Replacement of only the damaged poles and wires would cost approximately $1.7 million.

Fairchild conservatively estimates that repairing the system and restoring power would take 2 to 3 weeks. About 75 percent of the civilian work force would be idle—with pay—during the repairs, resulting in $480,000 salary loss. And this assumes none of the 95 pole-mounted transformers is damaged. Polychlorinated biphenol [PCB] is present in each of these old transformers. If storm damage caused just a few of the transformers to leak PCB, the base estimates cleanup costs of $1 million. The total cost of such a foreseeable system failure because of inclement weather could exceed $3.2 million. A catastrophic storm could have far worse consequences.

Mr. President, given the tremendous mission-related importance of the proposed electrical distribution system to Fairchild AFB and in turn to the security of the country, I urge my colleagues to support this amendment.

Mr. MATTINGLY. Mr. President, we have no objection to the amendment.

The PRESIDING OFFICER. The Chair points out that unanimous consent is required to consider the amendment.

Mr. MATTINGLY. I ask unanimous consent.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. SASSER. Mr. President, I have no objection to the amendment of the distinguished Senator from Washington. I understand that it is in the House bill. We have examined it. It appears to be meritorious. It concerns the replacement of an antiquated electrical distribution system at the Fairchild Air Force Base in Spokane, WA. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 971) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SASSER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 972

(Purpose: To add $2.2m for an Army Aviation Museum at Fort Rucker, Alabama)

Mr. MATTINGLY. Mr. President, I ask unanimous consent to set aside the pending amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY for himself and Mr. HEFLIN] proposes an amendment numbered 972.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 7, add $2,200,000 to the Senate number.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the amendment be in order.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, this is an amendment to add $2.2 million for a project which was authorized yesterday during the Armed Services Committee conference on military construction.

I am adding this only to ensure that the project can be considered during the appropriations conference on this bill.

The $2.2 million of Federal funds will be matched by private contributions to establish this museum at Fort Rucker, AL, the home of Army aviation.

This side has no objection to the amendment.

Mr. SASSER. We have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 972) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SASSER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATTINGLY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

Mr. MATTINGLY. I object.

The PRESIDING OFFICER. Objection is heard.

Mr. KENNEDY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. KENNEDY. Mr. President, as a parliamentary inquiry: What is the immediate business before the Senate?

The PRESIDING OFFICER. The pending question is accepting the committee amendment, section 128 at the end of the bill.

Mr. KENNEDY. I thank the Chair.

DAVIS-BACON

Mr. KENNEDY. Mr. President, it is my intention to raise a point of order under rule XVI against section 128 of the military construction appropriations. This provision amends the Davis-Bacon Act and limits its application on military construction projects.

I would point out to my colleagues that this is the same provision that the Senator from Texas and I debated last June when we considered the Defense Department authorization. My amendment to strike that provision failed on the closest of votes.

I do not believe there is any need for lengthy debate. I have no wish to delay the Senates business. The arguments have not changed. The facts remain the same.

But today's debate differs in one very important respect. In June we were considering legislation reported by the Armed Services Committee. Today, we are voting on an appropriations bill.

I believe the rules of the Senate are clear. The job of the subcommittee chaired by my good friend from Georgia is to appropriate, not to legislate. Now we can follow the rules the Senate has adopted or we can change them. But until such time as a majority of this body votes to change the rules and allow the Appropriations Committee to also write the laws, this is one Senator who will insist that the rules be enforced.

Let me also remind my colleagues that we took this same measure to conference on the DOD authorization and it was flatly rejected by our colleagues from the House. We were able to make some reforms in the Walsh-Healey Act, and as a result, achieve some significant budgetary savings. In return for those changes, we agreed not to amend Davis-Bacon. This was a long and tough negotiation that produced a compromise. I believe this amendment is a retreat from that agreement and will be just as forcefully resisted by the House.

Let me also state for the record my substantive as well as procedural objections. The Mattingly amendment would exempt 95 percent of all defense construction contracts from the Davis-Bacon Act. It goes beyond anything this administration has sought in the way of reform and includes provisions that the courts have struck down. The savings to the Government are negligible. And the result will be to lower wages, greatly expand the use of unskilled labor and jeopardize the quality of military construction projects.

The sole purpose of the Davis-Bacon Act is to insure that wages paid in Federal contracts do not undercut the prevailing wage rates in a given area. If this amendment is adopted we will have created a double standard for Federal contracts. Those bidding on military construction projects will be put at a tremendous disadvantage in recruiting the best workers. The most talented craftsmen will look for work on Federal projects that pay the highest wages. Federal contractors will find that they are pitted against each other in recuiting a skilled work force.

There is no need for this legislation. The administration has not asked for it and the Senate should not adopt it.

I believe the Senate should be entitled to hear from both managers of the bill. So I will make a point of order after they speak, after other Members address this issue, and when I am able to regain the floor.

Mr. SASSER addressed the Chair.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. SASSER. Mr. President, the distinguished Senator from Massachusetts is quite right on this matter. This clearly is legislation on an appropriations bill. This is a matter I think that addresses itself to the authorizing committee, addresses itself to the Armed Services Committee, and not to a military construction appropriation subcommittee.

I quite understand that my distinguished chairman and colleague from Georgia feels very strongly about this matter and of course, he is entitled to his view. He has proven himself in times past to be able to capably argue those views and support them at the appropriate time. But I submit today, Mr. President, that it is not appropriate to have this legislation on an appropriations bill.

We have labored long and hard in my view in this body over the past few years to try to move away from this business of attaching special interest matters or items onto the appropriations bills, which amounts to legislation on an appropriations bill. We have spend untold hours, days, nights debating these extraneous matters that somehow are attached to the appropriations bills as they move through this body.

I hope that those of us who serve on the Appropriations Committee would seek to uphold the rules of this body and seek to discourage legislating on an improper vehicles. That in this case, is legislating on an appropriations bill.

I sought to make this case, and did make it in the Appropriations Committee. But quite frankly, Mr. President, on those occasions it was obvious that my distinguished chairman would prevail.

I am hoping today perhaps he will reconsider, realize that this is legislation on an appropriations bill, and acquiesce in the amendment offered by the distinguished Senator from Massachusetts. Let us argue this issue on an-

other day on the appropriate legislation when it comes before this body at the appropriate time.

As I said earlier, I do think that we are simply beating a dead horse. We have been through this whole matter just a few months ago. The distinguished Senator from Texas at the appropriate time on the armed services authorization bill attached this very same language. It was accepted in this body by a very narrow margin, then vigorously resisted, and defeated in the conference.

There is no indication that the House has changed their minds or their feelings on this matter. I fear, Mr. President, even though my chairman has the best of motives, that we are simply attaching extraneous matters to this appropriations bill which will delay the Senate and bog us down.

I might say this. The chairman of the subcommittee supports this amendment on the assumption that reducing or eliminating the Davis-Bacon requirements would reduce the cost of military construction projects. That is not necessarily correct. I would like to point out to the chairman that the Department of Defense produced a study in March of this year which concluded that in every facility category except child care centers—quoting from the study—"Department of Defense military construction costs are generally equivalent to those in the private sector and less than those in other Government agencies."

So we have already directed the Pentagon, as the chairman knows, to begin looking at third party financing for child care centers to reduce those costs.

I would point out to my colleagues here today that I do not believe we are actually going to see any benefit from this measure.

Mr. NICKLES. Will the Senator yield for a question?

Mr. SASSER. I will yield the floor in a moment when I complete my remarks.

Mr. President, I am hopeful that the chairman will reconsider and accept the amendment of the distinguished Senator from Massachusetts. I yield the floor.

Mr. MATTINGLY. Mr. President, I will yield to my colleague from Oklahoma as soon as I finish my statement.

Mr. President, I feel strongly about this provision of the bill. The Davis-Bacon Act is out of touch with the economic realities of the 1980's. It is time we get rid of this costly regulation.

The most direct cost impact of the Davis-Bacon Act results from the tendency of prevailing wage determinations to raise wages on covered projects above levels that would prevail if competitive forces were allowed to operate. The tremendous administrative burden that existing law places on both the Government and contractors on small contracts almost defies description. This provision will save the taxpayers an estimated $51 million in fiscal year 1986.

This exemption from the Davis-Bacon Act represents a compromise. This legislation would codify current Labor Department regulations pertaining to the Davis-Bacon Act. It also increases the threshold from $2,000 to $1 million. It therefore does not exempt all defense construction contracts. By increasing the threshold, thousands of small contracts will be freed of Government-mandated wage determinations.

If we implement the reform in this bill, we will allow small business better opportunities to enter into defense construction. We will create competition. We will create more jobs because we can get more military construction for the same amount of money and therefore, we can increase the efforts being made to improve readiness and the quality of life for our troops.

Mr. President, there really is not a double standard. This is not special interest legislation. What it is is legislation in the interest of the personnel that serve on military installations. What it does is change the expensive way we are currently doing business and face the realities of the eighties. Laws that were passed decades ago are no longer applicable or necessary to meet current realities. There have been comments about legislation on appropriations measures. Well, all my colleagues know that every appropriation bill that we pass is loaded with legislative provisions.

I know there are very firm feelings, needless to say, on both sides of this issue. And those opposed to the provision will say, "Why not wait and hold a hearing on this?" Well, there have been enough hearings and debates on Davis-Bacon. I think the issue is very clear. I think there has been enough talk and the time has come to have some action.

Remember, if Gramm-Rudman becomes the law of the land or the line-item veto becomes the law of the land, we will need to find reductions where we can save money and not hurt people. Davis-Bacon is a provision that has outlived its usefulness and is a burden that the taxpayer shouldn't have to bear.

I urge my colleagues to support this committee provision.

I yield to my colleague from Oklahoma.

Mr. NICKLES. Mr. President, I rise in support of the distinguished chairman from Georgia in retention of the committee language. We have heard legislation on appropriations. I want to make sure that everyone is aware the appropriations language is not repealing the Davis-Bacon statute. Basically it says that for Department of Defense contracts we will use an increased threshold before applying Davis-Bacon. We increase that from $2,000 to $1 million.

The present threshold is $2,000. That means the Department of Labor will be coming in and mandating what the labor rates will be for any project above $2,000. That is absurd and it costs a lot of money.

For very small projects you can easily spend a lot more money than the project may be worth. Maybe you are doing a minor modification of changing the windows or fixing the roof. Even if you are doing that, this contractor does 90 percent of his work in the private sector but he wants to go to Fort Sill, OK, and repair a roof and the job will be $3,000. Then he has to have the Department of Labor come in and tell him what those labor rates should be for the project.

When he goes back and goes to work on a project downtown, then his people are paid at a different rate. Then they are paid what they have agreed to mutually between the employee and the employer. So it is not artificial. It is not something that is manipulated or dreamed up by the Department of Labor.

I hope my colleagues are aware that we are not repealing the Davis-Bacon statute. We are just saying for the Department of Defense military construction projects we will increase the threshold from $2,000 to $1 million.

We also say that in determining the prevailing wage we actually use 50 percent of the wage rates in an area instead of 30 percent. Really, if people are interested in finding out what is prevailing, I think it makes sense to use more than 30 percent. It makes sense to use 50 percent to find out really what is prevailing. I think that is a much more realistic figure.

Also, my colleagues need to know another part of this amendment is that it would allow the use of helpers. A lot of times, by Department of Labor regulations, in the past they have not even allowed the use of helpers, the classification for helpers.

You might have the lowest wage rate category on any function. In building a block building, the lowest wage rate classification may be $14 an hour, even though the rate for skilled laborers for that category of work would be $4, $5, or $6 or $7 an hour in that area.

You should not be talking about wage rates two or three times what is really prevailing.

The net essense is we can save a lot of money. These projects do not have to cost as much as they are scheduled to cost if we allow the committee language to remain.

We are making some difficult decisions on how we can make these tax

dollars go further so we can reduce the deficits. This is one excellent example of where we can save some taxpayer dollars and not reduce the military projects, not reduce the jobs. Actually, you can have more jobs because you can build more projects with the same amount of dollars. I hope that we will follow the lead of the Senator from Georgia and keep this committee language in the bill.

Mr. KENNEDY. Mr. President, if I may respond very briefly to the points that have been made by the Senator from Georgia and the Senator from Oklahoma.

What is intended and what is reality with Davis-Bacon is to insure that on work that is done in the areas of, in this case, military construction, workers are not going to be paid excessively nor are they going to be paid substandard wages. I do not think it is a good idea for us to accept the concept that the Federal Government should be an employer that pays substandard wages. Nor should the Federal Government be an employer that pays excessive wages.

The Federal Government, if it is going to support military construction projects, ought to pay the prevailing wage and let competition take place in the private sector on other factors. Mr. President, once we move into permitting substandard wages in the area of military construction, I think we do an enormous disservice to the men and women who serve in the Armed Forces.

How many parents will want their sons, who are perhaps jet fighter pilots, taking off on runways that may very well be built with substandard wages? How many parents want their sons and daughters to live in barracks that are poorly made or poorly constructed because of an inferior work product?

It seems to me that we ought to insure and insist, in the area of national security particularly, that those people who are going to serve in the Armed Forces, those people who are going to be living in these facilities, are going to have the best and that the competition that is going to take place in building the best will be based upon which contractor is the most efficient and productive, but will not be based upon who can pay the lowest wages. That is what we are talking about.

Mr. President, I have been around here long enough to know what has happened in instance after instance in terms of Federal contracting. We have seen instance after instance, even in the defense area, where contractors will come in and bid low, get the contract, and then go out and get bailed out at the Federal taxpayers' expense. That has been done routinely, Mr. President, and is being done even today. I daresay if we open up this opportunity, it will be done in excess in the future.

So, Mr. President, there may be those who differ with me on this particular interpretation, but we ought to have had the opportunity to examine these issues in the committees that have principle jurisdiction. That has not been done, Mr. President, and for the reasons I have indicated earlier and as I stated last spring, I shall make a point of order.

Mr. MATTINGLY. I just want to respond to the argument that Davis-Bacon leads to a higher quality of work.

But the truth of the matter is—"that just ain't so." I submit that that argument is fundamentally flawed, and instead the opposite is true.

Forcing a contractor to purchase more expensive labor may result in fewer units of labor being used, or possibly in the substitution of materials of lesser quality. Thus, output quality would probably decline, not rise.

I find it interesting that those who argue the point that Davis-Bacon leads to quality work somehow believe quality work is a result of paying artifically high wages, whereas the payment of market wages in the private sector produces worthless junk.

No, Mr. President, I argue that wasting the taxpayers' money never has been a guide to quality, and it never will.

Mr. KENNEDY. Mr. President, unless there are others who wish to speak on this, I shall ask the ruling of the Chair on the point of order under rule XVI against section 128 of the bill.

Mr. MATTINGLY. Mr. President, I raise the defense of germaneness.

The PRESIDING OFFICER. Under the precedents of the Senate, the question of germaneness having been raised, the Chair must submit that question to the Senate for a vote without debate.

Mr. KENNEDY. I ask for the yeas and nays, Mr. President.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

Mr. KENNEDY. Will the Chair state what the question is before the Senate?

The PRESIDING OFFICER. The question before the Senate is, Is the excepted committee amendment germane?

A yea vote indicates the committee amendment is germane; a nay vote indicates it is not.

Mr. KENNEDY. I thank the Chair.

The PRESIDING OFFICER. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. EXON. Mr. President, on this vote I have a pair with the distinguished Senator from West Virginia [Mr. ROCKEFELLER]. If he were present and voting he would vote "nay." If I were at liberty to vote, I would vote "aye." Therefore, I withhold my vote.

Mr. SIMPSON. I announce that Senator from Washington [Mr. EVANS] and the Senator from Pennsylvania [Mr. HEINZ] are necessarily absent.

I further announce that, if present and voting the Senator from Pennsylvania [Mr. HEINZ] would vote nay.

Mr. CRANSTON. I announce that the Senator from Hawaii [Mr. MATSUNAGA] and the Senator from West Virginia [Mr. ROCKEFELLER] are necessarily absent.

I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

The PRESIDING OFFICER (Mr. WARNER). Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 45, nays 49, as follows:

[Rollcall Vote No. 286 Leg.]

NOT VOTING—5

Evans	Matsunaga	Zorinsky
Heinz	Rockefeller	

The PRESIDING OFFICER. The amendment is not germane.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was declared to be not germane.

Mr. MATTINGLY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Georgia is recognized.

Mr. MATTINGLY. Mr. President, what is the pending business?

The PRESIDING OFFICER. The bill is open to further amendment.

AMENDMENT NO. 973

(Purpose: To provide additional funding for military child care centers)

Mr. DECONCINI. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Arizona [Mr. DECONCINI] proposes an amendment numbered 973.

Mr. DECONCINI. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 2, line 7, add $10,820,000
On page 3, line 13, add $2,100,000

Mr. DECONCINI. Mr. President, the Senate Appropriations Committee, in its fiscal year 1986 military construction bill, has not appropriated any new money for child care centers for the families of our military personnel. I raised this issue with the chairman of the Military Construction Subcommittee during the full committee markup on October 31, 1985. The chairman explained that none of the 30 day care projects covering three branches of our Armed Services were authorized by the Senate Armed Services Committee.

Mr. MATTINGLY. Mr. President, could we please stop for a moment so that we can hear what is being said?

The PRESIDING OFFICER. The Chair respectfully requests that Senators who desire to converse retire to the cloakrooms.

The Chair further wishes to advise the Senator from Arizona that the amendment amends part of the bill already amended and therefore would require unanimous consent.

Mr. DECONCINI. Mr. President, I thank the Chair for that advice.

Let me first thank the chairman and ranking minority member for bringing order to the Senate.

With the Chair's indulgence, I ask unanimous consent that the existing amendment be amended in accordance with my amendment which is at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. DECONCINI. I thank the Chair.

Mr. President, so no moneys were included in the appropriations bill. Additionally, he indicated that the funds were not included in order to keep the bill within its budget ceiling.

Since the markup I have worked closely with the distinguished chairman of the Subcommittee on Military Construction, Senator MATTINGLY, who assisted me in acquiring and compiling information on these child care centers. Senator MATTINGLY and his staff have been most cooperative and I thank them for their assistance.

Part of the problem we faced during markup has been corrected. During conference on the military construction authorization bill, the conferees approved an authorization level of $45.7 million for day care construction projects for the military.

The President's fiscal year 1986 budget request for military child care facility construction represents the highest funding request since fiscal year 1980.

Mr. MATTINGLY. Mr. President, will the Senator yield for a question?

Mr. DECONCINI. I am glad to yield to the Senator from Georgia.

Mr. MATTINGLY. Mr. President, is it not true that the amendment we had reaches the amendment that is proposed?

The PRESIDING OFFICER. The Senator is correct.

Mr. DECONCINI. That is correct.

If the Senator will just indulge me a few minutes here, The President's budget request for fiscal year 1986 for military child care centers is $53,740,000—more than $13 million higher than the House-passed military construction appropriations bill for fiscal year 1986. I share the President's apparent concern on the importance of these services.

Mr. President, this leads me to my amendment. I had originally intended to offer an amendment to provide funding for these military day care centers at the $45,675,000 level approved by the authorization conference. However, recognizing the chairman's desire to keep this bill under its allocation ceiling, I am instead offering an amendment to add $12,920,000 to the bill for child care projects on military bases located both within the United States and abroad.

What I have done in this amendment is to provide funding for any projects that were authorized by the conference but for which no moneys were provided in the House in its appropriation bill. Additionally, where the House appropriated level was lower than the level approved by the conferees in the military construction authorization conference, I have provided the full funding level approved by the conferees. It is my hope that the conferees on the bill before us today will ultimately fully fund all military day care centers at the authorized level.

I feel this funding is warranted for our military readiness and urgently required for supporting family stability in the military. The availability of child care services for military families affects military morale and our ability to attract and retain top-quality personnel. And the quality of our armed services personnel, Mr. President, impacts directly upon our national security. Would we consider sending our children to day care facilities off base with strangers or where the language barrier could hinder child development? For most of us, the answer to that question would be a resounding no.

This amendment addresses the military's concern about its ability to retain competent personnel. A Rand study graphically illustrates the importance of the quality of life for our servicemen. It concluded that 53 percent of military children later decided to join one of the armed services. If the quality of life on our military bases deteriorates, it will certainly impact on dependents' current attraction to military life as a career. So this amendment is a direct and prudent investment in our country's future.

If this amendment fails, it will only exacerbate the already intolerable situation our service members are experiencing in obtaining dependable and qualified child care services. To illustrate the problem, I would point out that the Army currently "allots" 23,000 child care spaces for a population of 300,000 children under the age of 6; waiting lists can reach as high as the 551 hopeful families at Fort Lewis, WA.

The bottom line, Mr. President, is cost: How much does it cost when service members miss work, worry about their children, and sometimes quit their jobs? A May 1984 Army survey listed 70,000 soldiers losing duty time or missing official functions because child care was unavailable. In a letter to Senator GOLDWATER, chairman of the Committee on Armed Services, Gen. John Wickam, Jr., U.S. Army Chief of Staff and John O. Marsh, Jr., Secretary of the Army, enumerated six initiatives most vital to the Army. Boldly standing out between "Pershing II security improvements" and an "intelligence command and control facility" were "child care centers."

It is worth repeating that the quality of life we offer our servicemen and women is central to successfully attracting and retaining qualified military personnel who operate increasingly complex and expensive technology. To keep personnel who have developed expertise in complex military systems, we need to recognize the vital role the family unit contributes to the stability and welfare of the military community. As both committed volunteers and defenders of democracy, these families deserve quality day care and education for their children.

Mr. President, my amendment is 32 percent of the House appropriations level and $32.8 million less than the one I originally intended to offer. In

order to comply with the distinguished chairman's wishes to keep this measure within its allocation ceiling, I have opted for the lower funding level. I urge all of my colleagues to support this amendment. Its adoption will help to ensure a strong, stable, and effective defense effort, and provide our military personnel with the necessary child care services they so richly deserve.

Mr. President, I ask unanimous consent that a table reflecting the funding allocations among military child care projects contained in my amendment be printed in the RECORD.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

FUNDING LEVELS FOR MILITARY CHILD CARE CENTERS: MILITARY CONSTRUCTION APPROPRIATION BILL, 1986

[In thousands of dollars]

[1] Anticipated military construction authorization bill conference agreement. At the time of the amendment, the conference committee had not met.

Mr. DECONCINI. Mr. President, I thank Senator MATTINGLY and Senator SASSER, the chairman and ranking minority member, also Rick Pierce, Mike Walker, and Bobby Mills of my staff for helping to put this amendment and compromise together.

I hope the committee can accept the amendment.

Mr. MATTINGLY. Mr. President, we have no objection to the amendment.

I ask the ranking minority member if he has any objection to the amendment.

Mr. SASSER. Mr. President, I have no objection, I say to the distinguished Senator from Georgia. As a matter of fact, I commend the Senator from Arizona for his amendment, and I think that his amendment and the cooperation of the distinguished chairman here will assure that the requested child care centers will become a reality. If we are going to maintain an All-Volunteer Force, that carries with it certain obligations and certain expenses, and I think one of them happens to be child care centers.

So I agree with the amendment.

Mr. MATTINGLY. Mr. President, I also agree.

I wish to say that I am glad that the authorizing committee met yesterday and completed action on the military construction authorization bill.

There is no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Arizona.

The amendment (No. 973) was agreed to.

Mr. DECONCINI. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the committee amendment be set aside so we may consider another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NO. 974

(Purpose: To appropriate funds for a maintenance shop and petroleum handling facility for Blytheville AFB, Blytheville, Arkansas)

Mr. MATTINGLY. Mr. President, I have an amendment, and I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY] for Mr. BUMPERS and Mr. PRYOR proposes an amendment No. 974.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 3, line 13, add $4,260,000.

Mr. PRYOR. Mr. President, I am happy to join with Senator BUMPERS to offer this amendment to fund $4.2 million for Blytheville Air Force Base. The money in question has been fully endorsed by the Air Force, and it has already been approved in the House version of this bill. In fact, the committee report to this military construction bill also states the Appropriations Committee's support for this money.

The Senate was forced to delay its approval for this money because of a difference between the House and Senate military construction authorization bills. I understand that that difference has now been cleared up and that it is now proper for us to proceed with an appropriation for these items.

The approval of funding for these projects will be most important to the continued successful operation of the B-52 and KC-135 squadrons at Blytheville. This funding is for militarily significant items: an aircraft repair shop which is essential for the maintenance of these Strategic Air Command aircraft, and a fuel storage facility that is essential for safety and aircraft operations. I ask that a letter from the Department of the Air Force be printed in the RECORD. This letter points out the importance of these projects.

Finally, Mr. President, let me point out the importance of the action we are taking today to Blytheville, AR, itself. Since last spring, when Blytheville showed up on a list from the Secretary of Defense of facilities that might be studied in the future for closure, the entire community has been under a cloud. This action today will allow a little sunlight to shine through. It is an indication that there are those in the Air Force and here in Congress who believe that Blytheville is, indeed, an important asset to the defense of the United States, a Strategic Air Command base could hardly be otherwise, and that truly strange things would have to happen for Blytheville to show up on any further lists of bases that might in the future be studied for closure.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF THE AIR FORCE,
Washington, DC, October 28, 1985.

Hon. DAVID PRYOR,
U.S. Senate,
Washington, DC.

DEAR SENATOR PRYOR: This is in response to your verbal inquiry of October 23, 1985, concerning information about two projects for Blytheville Air Force Base, Arkansas in the FY 1986 Military Construction Program (MCP). They are the Aircraft General Purpose Maintenance Shop and the Petroleum Operations Facility.

The General Purpose Shop was included in the Air Force's regular FY 1986 MCP submittal. The House Armed Services Committee (HASC) has approved the project for $3.75M but the Senate Armed Services Committee (SASC) denied it based on budgetary constraints. This project provides space for various support shops essential to the proper maintenance and repair of aircraft, aircraft components and associated equipment. These shops include battery, fiberglass, electric, hydraulic and welding functions vital to the support of the flying mission at Blytheville. The project is required to improve the base's ability to maintain aircraft, perform its missions and consolidate

these activities into a single facility for more effective and efficient aircraft support. It will permit these activities to vacate four existing substandard, widely scattered facilities which are too small, not properly configured or located, and have outdated mechanical, electrical and ventilation systems which subjects personnel to a hazardous work environment and degrades the aircraft maintenance support provided by these shops. One building is a WW II wood frame building and will be disposed of upon completion of this project. Space occupied in the other three buildings will be used for other functions for which they are considered adequate.

The Petroleum Operations Facility was added to the FY 1986 MCP by the HASC. This project provides a new environmentally controlled laboratory to permit effective and efficient control of aircraft fuels. It is needed for testing of petroleum products to insure uncontaminated fuels and lubricants, which meet the required specifications, are available for aircraft and support equipment use. A consolidated facility is required for centralization of aircraft fuel servicing activities to insure safe and effective operations and testing. Petroleum operations functions are currently occupying three separate facilities. These buildings are widely scattered and located in areas that are not conducive to laboratory activities. One building was once a residential farm house which is now unsound due to age, deterioration, and termite damage. It houses the fuels laboratory, accounting and administrative, training and supervisory support areas. The fuels control center and drivers lounge are located one and one-half miles away on the second floor of a flightline hangar which is one-half mile from the refueling vehicles parking area. Tool storage is in a third building also located one and one-half miles from the fuels lab. This arrangement prevents proper monitoring of equipment which subjects it to pilferage, sabotage, leakage and ineffective control and coordination of fuels activities. Two facilities will be disposed of and the third is a multiple use building in which vacated space will revert to use for which it is considered adequate.

The Air Force supports both projects and urges your support to retain them in the FY 1986 MCP.

Sincerely,

LARRY G. SHOCKLEY,
Deputy Chief, Legislation Division,
Office of Legislative Liaison.

Mr. BUMPERS. Mr. President, I am pleased to offer, with Senator MATTINGLY and Senator PRYOR, this amendment to provide $4.26 million in desperately needed military construction funds for Blytheville Air Force Base. These fund will be used to build an aircraft maintenance shop and a petroleum handling facility at this important SAC base.

Blytheville has been suffering in the last few years from insufficient military construction activity. Too many of the buildings there are of World War II vintage and badly need replacing. The aircraft maintenance shop is required to improve the base's ability to maintain aircraft, perform its missions, and consolidate these activities into a single facility for more effective and efficient aircraft support. The petroleum facility is needed for testing of petroleum products.

Blytheville is home to a squadron of B-52G bombers and KC-135 tankers. As such, it is one of the most important SAC bases. Its B-52's are armed with new air-launched cruise missiles, as well as short-range attack missiles and gravity bombs. It thus plays a very important role in our strategic retaliatory capability and thus in supporting our policy of preserving the peace through maintenance of a strong deterrent force.

At a time of growing Soviet strategic force capabilities, Blytheville has an especially important role to play. One key feature that makes Blytheville so important is its location. By being inland, Blytheville is safer from Soviet attack than are other bases located closer to the coast. This means that any Soviet cruise or ballistic missile attack would take longer to reach Blytheville, giving its bombers and tankers crucial extra minutes to fly away from the base, assuring their survival. Coastal bases are more vulnerable to attack.

Clearly the Air Force recognizes this vulnerability problem for coastal bases. This is why they support the inclusion of funding for the maintenance and fuel facilities, and is why they support Blytheville AFB. Just look at where they are basing the new B-1 bombers: Dyess AFB, TX, McConnell AFB, KS, Ellsworth AFB, SD, and Grand Forks AFB, ND. It's no coincidence that these bases are located well inland.

The vulnerability of coastal bases, and the better survivability of inland bases, suggest to me that when the advanced technology bomber, or Stealth, is ready for deployment, Blytheville and other inland bases would be logical places for them. I strongly support the Stealth program and believe that the greater survivability it offers in penetrating Soviet airspace should be matched by making sure that it has better survivability on this end, too. I urge the Air Force to look closely at Blytheville as a site for the Stealth bomber.

But to play an effective role, Blytheville must have modern facilities. The acceptance of this amendment by the Senate is a solid vote of confidence for a survivable SAC base structure, and Blytheville's important contribution to it.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the amendment be in order.

The PRESIDING OFFICER. Without objection , it is so ordered.

Mr. MATTINGLY. Mr. President, we have no objection on this side to the amendment.

Mr. SASSER. Mr. President, I have no objection. I think this goes a long way toward meeting the rquirements of the Air Force for a maintenance hangar and storage facility which is needed.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Georgia.

The amendment (No. 974) was agreed to.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. SASSER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 975

(Purpose: To restore $11 million in funding for a Systems Management Engineering Facility at L.G. Hanscom Air Force Base)

Mr. KENNEDY. Mr. President, I send an amendment to the desk, and ask for its immediate consideration.

The assistant legislative clerk read as follows:

The Senator form Massachusetts [Mr. KENNEDY] proposes an amendment numbered 975.

Mr. KENNEDY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At page 3 line 13: add $11,000,000 to the figure appearing at the above-cited location in the bill.

Mr. KENNEDY. Mr. President, I have had the opportunity to talk to the floor manager and the managers of the bill on this particular proposal.

It deals with the command and control facility and to ensure that it is going to have the kind of support that the Senate Armed Services Committee believed it should have, and which the House committee as well believed it should have.

I believe there is a solid case that can be made—and has been made in the RECORD previously. I hope the managers will be able to accept this particular amendment.

Mr. MATTINGLY. Mr. President, we have no objection to the amendment on this side, and we recommend approval of it.

Mr. SASSER. Mr. President, this is a worthy amendment. I certainly support the Senator from Massachusetts, and his amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from Massachusetts.

The amendment (No. 975) was agreed to.

Mr. KENNEDY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. NICKLES. Would the chairman of the subcommittee clarify his position on three Oklahoma projects which were added in the House? I know that the Senate did not include any add-ons in their authorization bill, but I believe that the projects may be authorized. I hope that the chairman can assure me that these projects will be supported in the conference on his bill.

The projects are as follows:

First, production facility at McAlester Army Depot, $2.3 million.

Second, mission support facility, Vance Air Force Base, $3.5 million.

Third, Lexington, OK, Army National Board storage facility, $7.2 million.

Mr. MATTINGLY. I can assure the Senator from Oklahoma that I am aware of these projects, and I will do every thing I can to project his projects, if authorized, during the appropriation conference.

Mr. BOREN. Mr. President, I want to thank my good friends from Georgia and Tennessee for their tremendous effort on this year's military construction appropriations bill. I am aware of the difficulties to obtain the necessary cuts to meet the 1986 budget resolution.

I have just received word that the military construction authorization conference, finished yesterday, includes three projects in Oklahoma which are not in this bill because of the lack of authorization at the time of markup.

The projects for Vance Air Force Base, where one-fifth of all USAF pilots are trained, is the mission support complex, long needed, which would consolidate functions now located all over the base including six 40-year-old wooden buildings. The cost of this construction is $3.550 million.

Another project is the base supply administration facility, at a cost of $1.9 million, to provide work space for the administrative, clerical, inventory management, and many other functions now located in warehouse space. This warehouse space is badly needed for adequate protection and proper storage of aircraft spares.

The third project, now authorized in this year's conference, is $2.3 million for a new building with special safety features necessary for the renovation to the PBX bomb loading production line at the Army ammunition plant located in McAlester, OK.

I would appreciate serious consideration by my colleagues that the Senate recede to the House on these projects during the conference on the fiscal year 1986 military construction appropriations.

AMENDMENT NO. 976

Mr. MATTINGLY. Mr. President, I send an amendment to the desk on behalf of myself and Senator SASSER, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The Parliamentarian advises the Chair that the amendment is drawn in such a way as to contain "whereases" and the resolve clause as not to be in order.

Mr. MATTINGLY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, there is no resolution at the desk at this time. Is that correct? Or amendments?

The PRESIDING OFFICER. The Senator is correct. There are no amendments pending at this time.

Mr. MATTINGLY. Mr. President, I send an amendment to the desk on behalf of myself and Senator SASSER, and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Georgia [Mr. MATTINGLY], for himself and Mr. SASSER, proposes an amendment numbered 976.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

At the appropriate place in the bill, add the following:

The Senate find that the U.S. has historically been a haven for those seeking refuge from repression; and

recent events have focused on the procedures used in handling cases involving foreign merchant seamen who might seek political asylum; and

serious questions have arisen about the application of those procedures by the INS in the case of Miroslav Medvid.

Therefore, It is the sense of the Senate that all legal and legitimate means should be taken by the U.S. government in arriving at a just resolution of this incident.

Mr. MATTINGLY. Mr. President, the amendment that I send to the desk on behalf of myself and the distinguished ranking member of the subcommittee, Senator SASSER, expresses the sense of the Senate that the U.S. Government should take all legal and legitimate means necessary to insure that a just resolution is reached in the matter involving the Soviet seaman who has apparently attempted to leave his ship now docked near New Orleans and who has been returned to the vessel by U.S. authorities.

I have serious questions about the procedures followed by the in this case. My hope is that with passage of this amendment, the administration will take every possible action to get to the bottom of this case. In fact, I understand that President Reagan has called upon Attorney General Meese to see if further action by U.S. officials is warranted. My amendment notes that the United States has historically been a place of refuge for those seeking escape from repression and I believe that we must not turn from that continuing responsibility.

I hope my colleagues will join me in supporting the amendment and I urge its adoption.

Mr. SASSER. Mr. President, I also urge adoption of this amendment offered by the distinguished Senator from Georgia and myself.

Mr. President, this amendment deals with the unfortunate incident that occurred not too many days ago regarding Mr. Medvid, the Russian seaman who attempted to defect, or find asylum, in the United States.

There is some concern about the way in which this case was handled by the Immigration Service. Frankly, as one Senator, I have no doubt as to what a young man is doing who jumps into the Mississippi River twice and swims to shore.

Clearly, he is in fear and, clearly, he is trying to seek some secure resting place.

That is the thrust of this amendment. I support it.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that Senators may insert statements into the RECORD concerning this amendment at this point.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. GLENN. Mr. President, like many of my colleagues I have many concerns and questions about the handling of the Medvid incident by U.S. officials. I have reviewed the affidavit of the INS interpreter who interviewed the Soviet seaman on October 24, 1985. That affidavit makes clear that Mr. Medvid did express his desire for political asylum in the U.S. during that interview. Why then did the INS return Mr. Medvid to the Marshal Konev? Why did they not immediately notify the State Department?

Subsequently, the State Department maintains, they had the opportunity to interview Mr. Medvid in a setting which would allow him to freely express his wishes and he repeatedly stated his desire to return to the U.S.S.R. One must wonder if during the period of time between the two interviews Mr. Medvid was so threatened and intimidated that he could

not restate his true desires, especially in the presence of Soviet officials.

The State Department has said that they consider the matter closed. I believe that conclusion is premature and that the affair has been grossly mishandled to the detriment not only of Mr. Medvid but also to the cause of human rights. I have joined several others in the Senate in urging the President to provide one last opportunity for Mr. Medvid to freely express his wishes. I sincerely hope that he will act expeditiously on the request by the members of the Senate.

I feel confident that the Senate and the American people would rest easier if we could be sure that Mr. Medvid is not being returned to the Soviet Union against his will and that all legal and legitimate means have been taken to accurately determine his wishes. The amendment before us very accurately states that the U.S. has historically been a haven for those seeking refuge from repression. We must see that this historical commitment to the oppressed is maintained in the case of Mr. Medvid.

Mr. MATTINGLY. Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (No. 976) was agreed to.

Mr. SASSER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. MATTINGLY. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOMENICI. Mr. President, I rise in support of the military construction appropriation bill as reported by the Appropriations Committee.

I commend the distinguished chairman, Senator MATTINGLY, and the members of the subcommittee for reporting a bill that is consistent with the subcommittee's section 302(b) allocation.

Mr. President, H.R. 3327 as reported provides $8.6 billion in budget authority and $2.2 billion in outlays for fiscal year 1986 for important military construction activities.

Taking into account outlays from prior-year budget authority and other actions completed, the bill is $0.4 billion in budget authority under and less than $50 million in outlays over the subcommittee's section 302(b) allocation under the fiscal year 1986 budget resolution.

Mr. President, I urge my colleagues to support the bill as reported and to oppose amendments that would result in significant additional outlays.

Mr. President, I ask unanimous consent that two tables showing the relationship of the reported bill to the congressional budget, the House-passed bill, and the President's budget request, and a summary of total appropriations action to date, be printed in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

MILITARY CONSTRUCTION SUBCOMMITTEE SPENDING TOTALS—SENATE-REPORTED BILL

[In billions of dollars]

	Fiscal year 1986	
	Budget authority	Outlays
Outlays from prior-year budget authority and other actions completed		5.4

[2] Less than $50,000,000.

Note.—Details may not add to totals due to rounding.

Source: Senate Budget Committee staff.

Mr. LEVIN. Mr. President, I wish to engage in a brief colloquy with the distinguished chairman of the Appropriations Subcommittee for Military Construction regarding two modest construction projects for the Michigan National Guard.

These two projects: One for the winterization of dormitory facilities at Phelps Collins Air National Guard Base, Alpena, MI, the other for the construction of a fuel cell maintenance facility at the Battle Creek Air National Guard Base at Battle Creek, MI.

The House of Representatives in both its authorizing and Appropriations Subcommittees on Military Construction provided funds for these two projects. I am also pleased that the Senate authorizing Subcommittee on Military Construction receded to the House on these projects during conference deliberation. I ask that my colleague who will represent the Senate at the appropriations conference to note this fact.

There are excellent reasons for appropriating funds for these modest projects.

Winterizing the dormitories at Phelps Collins will nearly double the utilization of this important facility. The one-time cost for this dramatic increase in capability is only $1.8 million.

The fuel cell maintenance facility for the Battle Creek base increases the maintenance capability, modernizes the base and increase its utility for the future.

I urge you to give favorable consideration to these two projects and that you sustain the House position during conference deliberations.

Mr. MATTINGLY. I thank my distinguished colleague from Michigan for his update on these two worthy projects for the Michigan Air Guard. As you understand, these projects could not have been considered by my subcommittee before conference since they were not in the military construction authorization bill. I assure you that they will be carefully considered during our deliberations with the House.

Mr. President, that concludes the amendments that were to be offered. I ask for third reading.

The PRESIDING OFFICER. The bill is before the Senate and open to further amendment. If there be no further amendment to be offered, the question is on the engrossment of the amendments and the third reading of the bill.

The amendments were ordered to be engrossed for a third reading and the bill to be read the third time.

The bill was read the third time.

Mr. MATTINGLY. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. MATTINGLY. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. MATTINGLY. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. MATTINGLY. Mr. President, we are ready for passage.

The PRESIDING OFFICER. The bill having been read the third time, the question is: Shall it pass? The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] and the Senator from Wyoming [Mr. WALLOP] are necessarily absent.

Mr. CRANSTON. I announce that the Senator from Michigan [Mr. LEVIN] and the Senator from West Virginia [Mr. ROCKEFELLER] are necessarily absent.

I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 94, nays 1, as follows:

[Rollcall Vote No. 287 Leg.]

YEAS—94

Abdnor	Armstrong	Bentsen

NOT VOTING—5

Heinz	Rockefeller	Zorinsky
Levin	Wallop	

So the bill (H.R. 3327), as amended, was passed.

Mr. MATTINGLY. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. SASSER. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. MATTINGLY. Mr. President, I move that the Senate insist on its amendments and request a conference with the House of Representatives thereon and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to, and the Chair [Mr. WARNER] appointed Mr. MATTINGLY, Mr. LAXALT, Mr. GARN, Mr. HATFIELD, Mr. SASSER, Mr. INOUYE, and Mr. STENNIS conferees on the part of the Senate.

Mr. DOLE. Mr. President, I thank the manager of the bill. This may not be record time, but it was a very good effort—2½ hours on a very important, major piece of legislation with rollcall votes. I thank both Senators SASSER and MATTINGLY for their outstanding work. It makes our job easier.

Mr. BYRD. Mr. President, will the distinguished majority leader yield?

Mr. President, I wish to associate myself with the remarks of the distinguished majority leader. I am proud to join with him in the commendations, the compliments, and felicitations. All are very well deserved on both sides.

ORDER OF PROCEDURE

Mr. DOLE. Mr President, we would not like to move to the Federal Retirement Reform Act of 1985.

Under a previous unanimous-consent agreement, at 1:50, we were to turn to the nomination of Alex Kozinski to be a circuit judge and then have a vote at 2 o'clock.

I ask unanimous consent that that be postponed until final disposition of the Federal Retirement Reform Act of 1985, and then at that time there be 10 minutes of debate on the nomination and then the yeas and nays occur on the nomination itself.

Mr. BYRD. Mr. President, reserving the right to object, I do not intend to object.

Mr. DOLE. Mr. President, I withhold the request.

Mr. BYRD. Mr. President, I have reserved an objection. I had earlier told the distinguished majority leader that it would be all right, that the request would be OK. But I am told by staff on our side that we should first check with Mr. LEVIN. So the distinguished majority leader will withhold the request momentarily. I remove my reservation.

The PRESIDING OFFICER. The Chair understands that the request of the majority leader has been withdrawn.

Mr. ROTH. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The Clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. ROTH. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUDGET ACT WAIVER

Mr. ROTH. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 247, a budget waiver to accompany S. 1527.

The PRESIDING OFFICER (Mr. SYMMS). The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 247) waiving section 303(a) of the Congressional Budget Act of 1974 with respect to S. 1527 as reported by the Committee on Governmental Affairs.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to, as follows:

S. RES. 247

Resolved, That, pursuant to section 303(c) of the Congressional Budget Act of 1974, section 303(a) of that Act be waived with respect to the consideration of S. 1527, the Federal Retirement Reform Act of 1985, a bill to provide supplemental retirement benefits for employees of the federal civilian service who are covered by Social Security as mandated by the Social Security Amendments of 1983.

S. 1527 would violate section 303(a) of the Congressional Budget Act of 1974 because

the bill provides new spending authority as described in 401(c)(2)(C) of that Act to become effective during fiscal year 1987, before the first concurrent resolution on the budget for fiscal year 1987 has been agreed to.

The budget authority provided in S. 1527 authorizes contributions from the employee and the employing agency to the pension system to fund future retirement benefits and authorizes the payment of entitlement benefits to individuals qualifying for such benefits under the provisions of S. 1527.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

BUDGET ACT WAIVER

Mr. ROTH. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of Senate Resolution 248, a Budget Act waiver to accompany S. 1527.

The PRESIDING OFFICER. The resolution will be stated by title.

The legislative clerk read as follows:

A resolution (S. Res. 248) waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1527.

The PRESIDING OFFICER. Is there objection to the present consideration of the resolution?

There being no objection, the resolution was considered and agreed to, as follows:

S. RES. 248

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1527, the Federal Retirement Reform Act of 1985, a bill to provide supplemental retirement benefits for employees of the federal civilian service who are covered by Social Security as mandated by the Social Security Amendments of 1983.

S. 1527 would violate section 402(a) of the Congressional Budget Act of 1974 because it authorizes the enactment of new budget authority for fiscal year 1986 and was reported after the July 8, 1985 deadline. The delay in reporting S. 1527 was occasioned by the complexities of developing legislation that meets the retirement needs of civilian employees while restraining the growth in pension expenditures.

The waiver of section 402(a) is necessary to permit timely consideration of the legislation prior to the expiration of the interim retirement plan on December 31, 1985.

Mr. ROTH. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. EAGLETON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

FEDERAL RETIREMENT REFORM ACT

Mr. ROTH. Mr. President, I ask unanimous consent that the Senate proceed to the consideration of S. 1527.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1527) to amend title 5, United States Code, to establish a new retirement and disability plan for Federal employees, postal employees, and Members of Congress, and for other purposes.

The PRESIDING OFFICER. Is there objection to the present consideration of the bill?

There being no objection, the Senate proceeded to consider the bill, which had been reported from the Committee on Governmental Affairs, with an amendment to strike out all after the enacting clause and insert the following:

That this Act may be cited as the "Federal Retirement Reform Act of 1985".

PURPOSES

SEC. 2. The purposes of this Act are—

(1) to provide Federal employees with a retirement benefits plan which is comparable to good private sector retirement benefits plans;

(2) to assist in building a quality career work force in the Federal Government;

(3) to promote financial stability and flexibility for the future of each Federal employee;

(4) to ensure a fully funded and financially sound Federal Government retirement benefits plan;

(5) to enhance portability of retirement assets between Federal jobs and jobs outside the Federal Government;

(6) to increase the options of each Federal employee with respect to retirement benefits plans;

(7) to encourage Federal employees to increase personal savings for retirement;

(8) to include Federal employees in the investment decisionmaking process with respect to the assets of the retirement system; and

(9) to extend financial protection from disability to additional Federal employees and to increase such protection for eligible Federal employees.

TITLE I—FEDERAL RETIREMENT SYSTEM

ESTABLISHMENT

SEC. 101. (a) Title 5, United States Code, is amended by inserting after chapter 83 the following new chapter:

"CHAPTER 84—FEDERAL RETIREMENT SYSTEM

"SUBCHAPTER I—DEFINITIONS; FEDERAL RETIREMENT SYSTEM

"Sec.
"8401. Definitions.
"8402. Federal Retirement System; participation.
"8403. Relationship to the Social Security Act.

"SUBCHAPTER II—BASIC PLAN

"8411. Entitlement to immediate retirement.
"8412. Entitlement to deferred retirement.
"8413. Computation of annuity.
"8414. Reduction for early retirement.
"8415. Reduction for survivor annuities.
"8416. Methods of payments.
"8417. Level benefits option.
"8418. Contributions.
"8419. Funding of annuity attributable to military service.
"8420. Lump-sum benefits; designation of beneficiaries; order of precedence.

"SUBCHAPTER III—THRIFT SAVINGS PLAN

"8421. Contributions.
"8422. Vesting.
"8423. Entitlement and elections relating to entitlement.

"8471. Treatment of certain individuals subject to the Civil Service Retirement and Disability System.
"8472. Special rules for participants retaining entitlement in the Civil Service Retirement and Disability System.
"8473. Participants subject to the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983.
"8474. Reemployed annuitants under a Government retirement system.

"8475. Exemption from certain offset provisions of the Social Security Act.
"8476. Regulations.
"SUBCHAPTER VIII—FEDERAL RETIREMENT THRIFT INVESTMENT MANAGEMENT SYSTEM
"8491. Federal Retirement Thrift Investment Board.
"8492. Federal Retirement Thrift Advisory Committee.
"8493. Employee Advisory Committee.
"8494. Executive Director.
"8495. Investment policy.
"8496. Administrative provisions.
"8497. Fiduciary responsibilities; liability and penalty.
"8498. Bonding.
"8499. Exculpatory provisions; insurance.
"SUBCHAPTER I—DEFINITIONS; FEDERAL RETIREMENT SYSTEM
"§ 8401. Definitions

"Except as otherwise provided in this chapter, for the purposes of this chapter—

"(1) the term 'account', when used with respect to a participant or annuitant, means an account established and maintained under section 8428(a) of this title;

"(2) the term 'annuitant' means a former participant who is entitled to an annuity under this chapter and who has applied under this chapter for the payment of the annuity to commence;

"(3) the term 'average pay', when used with respect to a participant, means the largest annual rate resulting from averaging the participant's rates of basic pay in effect over any 5 consecutive years of creditable service or, in the case of an annuity under this chapter based on service of less than 5 years, over the total service, with each rate weighted by the period it was in effect;

"(4) the term 'basic pay', when used with respect to a participant—

"(A) means the lesser of—

"(i) the basic pay of the participant established pursuant to law, without regard to any provision of law (except sections 5308 and 5382(b) of this title) limiting the rate of pay actually payable in any pay period (including any provision of law restricting the use of appropriated funds); or

"(ii) the rate of basic pay payable for level I of the Executive Schedule; and

"(B) includes the items described in subparagraphs (A) through (D) of paragraph (3) of section 8331 of this title and does not include the items excluded by such paragraph;

"(5) the term 'Board' means the Federal Retirement Thrift Investment Board established by section 8491(a) of this title;

"(6) the term 'Civil Service Retirement and Disability Fund' means the Civil Service Retirement and Disability Fund referred to in section 8348 of this title;

"(7) the term 'court', when used with respect to a judgment, decree, order, or other judicial action, means any court of the United States, a State, the District of Columbia, the Commonwealth of Puerto Rico, or a territory or possession of the United States, or any Indian court, having jurisdiction to issue such judgment, decree, or order or to take such other judicial action;

"(8) the term 'Director' means the Director of the Office of Personnel Management;

"(9) the term 'dynamic assumptions' means economic assumptions that are used in determining actuarial costs and liabilities of a retirement system and in anticipating the effects of long-term future—

"(A) investment yields,

"(B) increases in rates of basic pay, and

"(C) rates of price inflation;

"(10) the term 'earnings', when used with respect to the Thrift Savings Fund, means the amount of the gain experienced or yield received from the investment of sums in such fund;

"(11) the term 'eligible former spouse', when used with respect to a participant or former participant, means a former spouse of the participant or former participant who was married to the participant or former participant for at least 9 months;

"(12) the term 'employee' means—

"(A) each individual referred to in subparagraphs (A), (E), (F), (H), (I), and (J) of section 8331(1) of this title, including an employee of the United States Park Police and an employee of the United States Secret Service; and

"(B) a Congressional employee as defined in section 2107 of this title, including a temporary Congressional employee;

any of whose employment by the Government after December 31, 1983, is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, except that such term does not include any individual referred to in clause (i), (ii), (v), (vi), or (ix) of paragraph (1) of section 8331 of this title or in the undesignated material after clause (ix) of such paragraph, any individual excluded under section 8402(b)(2) of this title, or any individual who was subject to subchapter III of chapter 83 of this title on December 31, 1983, has not had a break in employment by the Government for a period of more than 1 year beginning after such date, and has not commenced participation in the System pursuant to section 8471 of this title;

"(13) the term 'Employee Advisory Committee' means the Employee Advisory Committee established in accordance with section 8493 of this title;

"(14) the term 'Executive Director' means the Executive Director appointed under section 8494(a)(1) of this title;

"(15) the term 'firefighter' means—

"(A) an employee the duties of whose position—

"(i) are primarily to perform work directly connected with the control and extinguishment of fires; and

"(ii) are sufficiently rigorous that employment opportunities are required to be limited to young and physically vigorous individuals, as determined by the Director considering the recommendation of the employing agency; and

"(B) an employee who is transferred directly to a supervisory or administrative position after performing duties described in subparagraph (A) of this paragraph for at least 10 years;

"(16) the term 'Fund' means the Civil Service Retirement and Disability Fund;

"(17) the term 'Government' means the Federal Government and Gallaudet College;

"(18) the term 'law enforcement officer' means—

"(A) an employee, the duties of whose position—

"(i) are primarily (I) the investigation, apprehension, or detention of individuals suspected or convicted of offenses against the criminal laws of the United States, or (II) the protection of officials of the United States against threats to personal safety; and

"(ii) are sufficiently rigorous that employment opportunities are required to be limited to young and physically vigorous individuals, as determined by the Director considering the recommendation of the employing agency; and

"(B) an employee who is transferred directly to a supervisory or administrative position after performing duties described in subparagraph (A) of this paragraph for at least 10 years;

"(19) the term 'loss', when used with respect to the Thrift Savings Fund, means the amount of the loss experienced from the investment of sums in such fund;

"(20) the term 'lump-sum credit' has the same meaning as provided by section 8331(8) of this title;

"(21) the term 'Member' has the same meaning as provided in section 2106 of this title, except that such term does not include a person who (A) was a Member of Congress on December 31, 1983, and (B) has not commenced participation in the System pursuant to section 8471 of this title;

"(22) the term 'military reserve technician' means a member of one of the reserve components of the Armed Forces specified in section 261(a) of title 10 who—

"(A) is assigned to a civilian position as a technician in the administration and training of such reserve components or in the maintenance and repair of supplies issued to such reserve components; and

"(B) as a condition of employment in such position, is required to be a member of one of such reserve components serving in a specified military grade;

"(23) the term 'net earnings' means the excess of earnings over losses;

"(24) the term 'net losses' means the excess of losses over earnings;

"(25) the term 'normal cost' means the entry-age normal cost of the provisions of the System which relate to the Fund, computed by the Office in accordance with generally accepted actuarial practice and standards (using dynamic assumptions) and expressed as a level percentage of aggregate basic pay, and shall be used to value the cost of the System for all purposes in which the cost of the System is required to be determined;

"(26) the term 'Office' means the Office of Personnel Management;

"(27) the term 'participant' means an employee or Member or a person who is receiving disability benefits under subchapter V of this chapter;

"(28) the term 'price index' has the same meaning as provided in section 8331(15) of this title;

"(29) the term 'service', when used with respect to a participant or former participant, means—

"(A) employment as a participant after December 31, 1986;

"(B) service which is creditable under section 8473 of this title;

"(C) subject to section 8419(a) of this title, military service as provided in section 8332(c) of this title;

"(D) service that is creditable under subchapter III of chapter 83 of this title, but only for the purposes provided in section 8472(a) of this title; and

"(E) leaves of absence commencing after December 31, 1986, under the same conditions and subject to the same limitations as are prescribed in section 8332(f) of this title; and

is computed as the full years and twelfth parts thereof, excluding from the aggregate the fractional part of a month, if any;

"(30) the term 'supplemental liability' means the estimated excess of—

"(A) the actuarial present value of all future benefits payable from the Fund under this chapter, over

"(B) the sum of—

"(i) the actuarial present value of the future contributions to be made on behalf of participants pursuant to section 8418(a) of this title; and

"(ii) the balance which is in the Fund on the date the supplemental liability is determined and is attributable to the System or to contributions made under section 204(b) or 205 of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 Stat. 1106; 5 U.S.C. 8331 note); and

"(31) the term 'System' means the Federal Retirement System described in section 8402(a) of this title.

"§ 8402. Federal Retirement System; participation

"(a) The provisions of this chapter comprise the Federal Retirement System.

"(b)(1) Except as provided in paragraph (2) of this subsection, each employee and Member shall be a participant in the System.

"(2)(A) The Office may exclude from the operation of this chapter an employee or group of employees in or under an Executive agency whose employment is temporary or intermittent, except an employee whose employment is part-time career employment (as defined in section 3401(2) of this title).

"(B) The Architect of the Capitol may exclude from the operation of this chapter an employee under the Office of the Architect of the Capitol whose employment is temporary or of uncertain duration.

"(C) The Librarian of Congress may exclude from the operation of this chapter an employee under the Library of Congress whose employment is temporary or of uncertain duration.

"§ 8403. Relationship to the Social Security Act

"Except as otherwise provided in this chapter, the benefits payable under the System are in addition to the benefits payable under the Social Security Act.

"SUBCHAPTER II—BASIC PLAN

"§ 8411. Entitlement to immediate retirement

"(a) An employee or a Member who is separated from Government employment after becoming 55 years of age and completing 10 years of service is entitled to an immediate annuity.

"(b) An employee or a Member who is separated from Government employment after becoming 62 years of age and completing 5 years of service is entitled to an immediate annuity.

"(c) An employee who is separated from Government employment—

"(1) after becoming 50 years of age and completing 20 years of service as a law enforcement officer or firefighter, or any combination of such service totaling at least 20 years, or

"(2) after completing 25 years of service as a law enforcement officer or firefighter, or any combination of such service totaling at least 25 years,

is entitled to an immediate annuity. The provisions of section 8335(b) of this title, relating to mandatory separation, shall apply to a participant who is a law enforcement officer or a firefighter.

"(d) An employee who is separated from Government employment—

"(1) after becoming 50 years of age and completing 20 years of service as an air traffic controller, or

"(2) after completing 25 years as an air traffic controller,

is entitled to an immediate annuity. The provisions of section 8335(a) of this title, relating to mandatory separation, shall apply to a participant who is an air traffic controller.

"(e)(1) Except as provided in paragraphs (2) and (3) of this subsection, any employee who has completed 25 years of service, or is not less than 50 years of age and has completed 20 years of service, and who—

"(A) is separated from Government employment involuntarily, except by removal for cause on charges of misconduct or delinquency, or

"(B) while serving in a geographic area designated by the Director, is voluntarily separated from Government employment during a period that (as determined by the Director)—

"(i) the agency in which the employee is serving is undergoing a major reorganization, a major reduction in force, or a major transfer of function, and

"(ii) a significant percentage of the total number of employees serving in such agency will be separated or subject to an immediate reduction in the rate of basic pay (without regard to subchapter VI of chapter 53 of this title or comparable provisions),

is entitled to an immediate annuity.

"(2) An employee described in paragraph (1)(A) of this subsection is not entitled to an annuity under this subsection if the employee has declined a reasonable offer of another position in the employee's agency for which the employee is qualified and the offered position is not lower than 2 grades or pay levels below the employee's grade or pay level and is within the employee's commuting area.

"(3) Paragraph (2) of this subsection shall not apply to a firefighter, law enforcement officer, or air traffic controller.

"(f) An annuity authorized by this section is computed under sections 8413 through 8415 of this title.

"(g) A former employee or Member who is entitled to benefits under subchapter I of chapter 81 of this title is not entitled to an annuity under this section while receiving such benefits.

"§ 8412. Entitlement to deferred retirement

"(a) A participant who is under 55 years of age and separates from Government employment after completing 10 years of service is entitled to an annuity to commence on or after the date the participant becomes 55 years of age but not later than the date the participant becomes 62 years of age, as elected by the participant under rules prescribed by the Office.

"(b) A participant who is under 62 years of age and separates from Government employment after completing 5 years of service and before completing 10 years of service is entitled to an annuity to commence on the date the participant becomes 62 years of age.

"(c) An annuity authorized by this section is computed under sections 8413 through 8415 of this title.

"(d) A former employee or Member who is entitled to benefits under subchapter I of chapter 81 of this title is not entitled to an annuity under this section while receiving such benefits.

"§ 8413. Computation of annuity

"(a)(1) Except as provided in paragraph (2) of this subsection and section 8414 or 8415 of this title, the amount of the annuity an annuitant is entitled to receive under this subchapter shall be equal to—

"(A) 0.9 percent of the annuitant's average pay multiplied by so much of an annuitant's total service as does not exceed 15 years; and

"(B) 1.1 percent of the annuitant's average pay multiplied by so much of the annuitant's total service as exceeds 15 years.

"(2) In the case of a participant whose service includes service in the position of a law enforcement officer, firefighter, air traffic controller, or military reserve technician, the percent applicable to the service in such position for the purposes of paragraph (1) of this subsection is 1 percent.

"(3) For the purposes of computing the amount of an annuity under paragraphs (1) and (2) of this subsection, the total service of a participant who separates from Government employment entitled to an immediate annuity or who dies leaving a survivor or survivors entitled to a survivor annuity under this chapter includes days of unused sick leave credited to the participant under a formal leave system to the same extent that unused sick leave is credited in computing an annuity of a person who is subject to subchapter III of chapter 83 of this title, as provided in section 8339(m) of this title.

"(b)(1) A former participant who is entitled to receive an annuity under subsection (c) or (d) of section 8411 of this title shall also be entitled to receive an annuity supplement, in addition to the amount of the annuity computed under subsection (a) of this section, while the former participant is under 62 years of age.

"(2) The amount of the annuity supplement payable to a former participant under paragraph (1) of this subsection shall be equal to the estimated amount of the benefits that—

"(A) the former participant would be entitled to receive under title II of the Social Security Act if the participant were 62 years of age on the date the annuity referred to in such paragraph commences; and

"(B) is attributable to service referred to in section 8411(c) or 8411(d) of this title, as the case may be,

computed on the date such annuity commences and increased as provided in paragraph (3) of this subsection.

"(3) Effective on January 1 of each year, the amount of the annuity supplement payable to a former participant under this subsection shall be increased by the percentage increase, if any, in the SSA average wage index (as defined in section 215(i)(1)(G) of the Social Security Act) published for November of the immediately preceding year over such index published for November of the year ending immediately before such preceding year.

"(c) In computing under this section the annuity of an individual who has performed service on less than a full-time basis, such service shall be credited on a proportional basis equal to the fraction that such service is of full-time service, and the annual rate of basic pay that would be payable for full-time service in the position shall be deemed to be the rate of basic pay.

"§ 8414. Reduction for early retirement

"(a) Except as provided in subsection (b) and (c) of this section, the annuity computed under section 8413(a) of this title (without regard to this section or section 8415 of this title)—

"(1) for an annuitant, other than an annuitant referred to in paragraph (2) or (3)(A) of this subsection, who is under 62 years of age on the date on which the annuitant's annuity commences shall be reduced by one-sixth of 1 percent for each full month that the annuitant is under such age on such date;

"(2) for an annuitant, other than an annuitant entitled to an immediate annuity under section 8411(e) of this title, who is at least 55 years of age and is under 62 years of age on the date on which the annuitant's

annuity commences and has not completed 30 years of service shall be reduced by five-twelfths of 1 percent for each full month that the annuitant is under 62 years of age on such date; and

"(3) for an annuitant who—

"(A) separated from Government employment as a military reserve technician entitled to an immediate annuity under section 8411(e) of this title, and

"(B) is under 55 years of age on the date on which the annuitant's annuity commences,

shall be reduced by one-sixth of 1 percent for each full month that the annuitant is under such age on such date.

"(b) Subsection (a) of this section shall not apply in the case of—

"(1) a participant who separates from Government employment entitled to an immediate annuity under section 8411(c) or 8411(d) of this title; or

"(2) an annuitant who has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title, is at least 55 years of age on the date on which the annuitant's annuity commences, and has completed 30 years of service.

"(c) Subsection (a)(1) of this section shall not apply to a participant who separates from Government employment as a military reserve technician after becoming 55 years of age and completing 30 years of service.

"§ 8415. Reduction for survivor annuities

"(a) The annuity of an annuitant computed under section 8413 of this title and, if appropriate, under section 8414 of this title shall be reduced by 10 percent for each survivor annuity which is expected to be payable out of the Fund with respect to the annuitant under this chapter.

"(b)(1) A reduction of an annuity pursuant to subsection (a) of this section in the case of an annuitant who has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title shall be adjusted, as appropriate to carry out such subsection, to reflect any change in circumstances relating to entitlement to a survivor annuity, including any election made pursuant to section 8434(a), 8436(b), or 8436(c) of this title and any termination of an entitlement to a survivor annuity.

"(2) An adjustment may not be made under paragraph (1) of this subsection in the case of an annuitant not described in such paragraph.

"§ 8416. Methods of Payment

"(a)(1) The Office shall prescribe methods of payment of annuities under this subchapter.

"(2) The methods of payment prescribed under paragraph (1) of this subsection shall include, but not be limited to—

"(A) a method which provides for the payment of a monthly annuity only to an annuitant during the life of the annuitant;

"(B) a method which provides for the payment of a monthly annuity to an annuitant and a monthly survivor annuity equal to 50 percent of the annuitant's annuity on the date of the annuitant's death (computed without regard to section 8415 of this title and any election under section 8417(a) of this title) to the annuitant's surviving spouse, if any; and

"(C) a method which provides for the payment of a monthly annuity to an annuitant and a monthly survivor annuity equal to 50 percent of the annuitant's annuity on the date of the annuitant's death (computed without regard to an election under section 8417(a) of this title) to an individual who is designated by the annuitant and who has an insurable interest in the annuitant.

"(b)(1) Subject to paragraphs (2) and (3) of this subsection—

"(A) under such regulations as the Office shall prescribe, a participant or former participant who is applying for an annuity under this subchapter to commence shall elect one of the methods of payment prescribed by the Office under subsection (a) of this section; and

"(B) the annuity of an annuitant under this subchapter shall be paid in accordance with the method of payment elected by the annuitant pursuant to subparagraph (A) of this paragraph.

"(2)(A) A participant or former participant who is married on the date on which the participant or former participant applies for an annuity under this subchapter to commence may elect a method of payment other than the method described in subsection (a)(2)(B) of this section only if the participant or former participant and the spouse of the participant or former participant jointly waive a survivor annuity under the method described in such subsection (a)(2)(B).

"(B) A waiver shall not be effective for the purpose of subparagraph (A) of this paragraph unless the waiver is made in writing, is notarized, and is filed with the Office on or before the date the annuity to which the waiver relates commences.

"(C) A waiver made in accordance with this paragraph shall be irrevocable.

"(3) In the case of an annuitant who is subject to paragraph (2)(A) of this subsection and fails to make an election under paragraph (1) of this subsection, an annuity and survivor annuity shall be paid under the method of payment described in subsection (a)(2)(B) of this section.

"(4) A participant or former participant may elect the method prescribed under subsection (a)(2)(C) of this section only if the participant or former participant is in good health on the date the election is made, as determined by the Office.

"§ 8417. Level benefits option

"(a) Under regulations prescribed by the Office, an annuity payable under this subchapter to a participant who is separating from Government employment entitled to an immediate annuity under subsection (a) of section 8411 of this title and is less than 62 years of age may be adjusted as provided in subsection (b) of this section, if elected by the participant on or before the date of separation.

"(b)(1) Subject to paragraph (2) of this subsection, an annuity payable under this subchapter to an annuitant who has made an election authorized by subsection (a) of this section may be increased during the period the annuitant is not less than 55 years of age and is less than 62 years of age and may be reduced on and after the date the annuitant is not less than 62 years of age as appropriate to provide the annuitant an annuity under this subchapter, during each month of such period, in an amount which (as nearly as is practicable to determine) equals the total amount of the monthly benefits payable to the annuitant under this subchapter and section 202(a) of the Social Security Act after such date.

"(2) The actuarial present value of the benefits expected to be paid under this subchapter to the annuitant as provided in paragraph (1) of this subsection may not exceed the actuarial present value of the benefits that would be expected to be paid under this subchapter to such participant if the adjustments authorized by such paragraph were not made, as determined under regulations prescribed by the Office.

"§ 8418. Contributions

"(a)(1) Each agency of the Government employing a participant shall contribute to the Fund an amount equal to the sum of—

"(A) the normal cost, as determined by the Office, of (i) each participant who is employed by the agency, and (ii) each disabled participant who is entitled to benefits under section 8442(a) of this title and was employed by the agency on the date the participant became disabled (computed using average pay as increased in accordance with section 8441(6) of this title); and

"(B) the normal cost, as determined by the Office, of the annuity supplement under section 8413(b) of this title for each law enforcement officer, firefighter, and air traffic controller who is employed by the agency.

In computing normal cost, the Office shall not take into account normal cost attributable to credit for military service provided in section 8419 of this title.

"(2) The contribution required by paragraph (1) of this subsection to be made by an agency shall be made from the appropriation or fund used to pay the agency's participants, or, in the case of an elected participant, from an appropriation or fund available for payment of other salaries of the office or establishment of the participant. In the case of a participant in the legislative branch who is paid by the Clerk of the House of Representatives, contributions for the benefit of such participant shall be paid from the contingent fund of the House of Representatives.

"(b)(1) As of the close of each fiscal year beginning after September 30, 1987, the Office shall compute for such fiscal year—

"(A) the amount of the supplemental liability of the Fund relating to participants and annuitants other than participants and annuitants referred to in subparagraph (B) of this paragraph, and

"(B) the amount of the supplemental liability of the Fund relating to participants and annuitants who are active or retired officers or employees of the United States Postal Service.

"(2) The amounts of any supplemental liability—

"(A) computed for any fiscal year pursuant to paragraph (1)(A) of this subsection with respect to participants and annuitants referred to in such paragraph (1)(A) of this subsection, and

"(B) computed for any fiscal year pursuant to paragraph (1)(B) of this subsection with respect to participants and annuitants referred to in such paragraph (1)(B),

shall each be amortized in thirty annual installments.

"(3) At the end of each fiscal year, the Office shall notify—

"(A) the Secretary of the Treasury of the amount of the annual installment computed under paragraph (2)(A) of this subsection for such fiscal year, and

"(B) the Postmaster General of the United States of the amount of the annual installment computed pursuant to paragraph (2)(B) of this subsection for such fiscal year.

"(4)(A) Before closing the accounts for a fiscal year, the Secretary of the Treasury shall credit the amount of the annual installment computed for such fiscal year pursuant to paragraph (2)(A) to the Fund, as a

Government contribution, out of any money in the Treasury of the United States not otherwise appropriated.

"(B) Upon receiving a notice required by paragraph (3)(B) of this subsection, the United States Postal Service shall pay to the Fund the amount of the annual installment specified in the notice.

"(5) For the purpose of carrying out paragraph (1) of this subsection with respect to any fiscal year, the Office may—

"(A) require the Board of Actuaries of the Civil Service Retirement System to make actuarial determinations and valuations, make recommendations, and maintain records in the same manner as provided in section 8347(f) of this title; and

"(B) may use the latest actuarial determinations and valuations made by such Board of Actuaries.

"(c)(1) Except as provided in paragraph (6) of this subsection, under regulations prescribed by the Office, a participant may elect to contribute to the Fund under this subsection. An election under this paragraph may be made only within 60 days after the date the participant first becomes a participant and shall be irrevocable.

"(2) Each agency of the Government employing a participant who elects under paragraph (1) of this subsection to contribute to the Fund shall deduct and withhold from the basic pay payable to the participant for any pay period the amount equal to the excess of—

"(A) the amount equal to 7 percent of such basic pay, over

"(B) the amount of the tax deducted and withheld from such pay for such period for the purposes of section 3101(a) of the Internal Revenue Code of 1954 (relating to old-age, survivor, and disability insurance under the Social Security Act).

"(3) Amounts deducted and withheld under paragraph (2) of this subsection shall be deposited in the Treasury of the United States to the credit of the Fund under such procedures as the Comptroller General of the United States may prescribe.

"(4) Each participant who elects to contribute to the Fund under this subsection shall consent and agree to the deductions required by paragraph (2) of this subsection. Notwithstanding any other provision of law, payment less such deductions is a full and complete discharge and acquittance of all claims and demands for regular services performed during the period covered by the payment.

"(5) Section 8334(d) of this title shall apply to refunds of amounts deducted as required by paragraph (2) of this subsection.

"(6) A law enforcement officer, firefighter, air traffic controller, and military reserve technician may not make an election under paragraph (1) of this subsection.

"(d) Under regulations prescribed by the Office, the head of an agency may request reconsideration of the amount of the normal cost or the supplemental liability computed by the Office for such agency under subsection (a) or (b) of this section. Any such request shall be referred to the Board of Actuaries of the Civil Service Retirement System. The Board of Actuaries shall review the computations of the Office and, if considered appropriate by the Board of Actuaries, recompute such normal cost or such supplemental liability of such agency under this subsection. The determination of the Board of Actuaries shall be final.

"§ 8419. Funding of annuity attributable to military service

"(a) Except in the case of an individual making an election under section 8471(a)(1)(A) of this title, a participant's or former participant's service shall include credit for military service as provided in section 8332(c) of this title without regard to whether the participant or former participant has made a deposit covering such military service as provided in section 8334(j) of this title.

"(b) Before closing the accounts for a fiscal year, the Secretary of the Treasury shall reimburse the Fund for the normal cost relating to the creditable military service of employees and Members who became participants during such fiscal year, actuarially adjusted to the date of payment, as determined by the Office. Reimbursements shall be made under this subsection out of sums appropriated to the Department of Defense for the purpose of making such reimbursements.

"(c) At the end of each fiscal year the Office shall compute the amount of the reimbursement required by subsection (b) of this section for the fiscal year and shall notify the Secretary of the Treasury of that amount.

"§ 8420. Lump-sum benefits; designation of beneficiary; order of precedence

"(a) Subject to subsection (h) of this section, a participant who—

"(1) has elected to make contributions to the Fund under section 8418(c) of this title;

"(2)(A) is separated from Government employment for at least 31 consecutive days; or

"(B) is transferred to a position in which he is not subject to this subchapter and remains in such a position for at least 31 consecutive days;

"(3) files an application with the Office for payment of the lump-sum credit;

"(4) is not reemployed in a position which he is subject to this subchapter at the time he files the application; and

"(5) will not become eligible to receive an annuity within 31 days after filing the application,

is entitled to be paid the portion of the lump-sum credit attributable to the contributions referred to in paragraph (1) of this subsection and interest on such portion, computed as provided in subsection (i) of this section.

"(b) Under regulations prescribed by the Office, a present or former participant may designate a beneficiary or beneficiaries for the purpose of this subchapter.

"(c) Lump-sum benefits authorized by subsections (d) through (f) of this section shall be paid to the person or persons who survive the participant to whom such subsections apply and are alive at the date title to the payment arises. Entitlement to such payment shall be in the same order of precedence as is provided in section 8342(c) of this title. Payment under this subsection bars recovery by any other person.

"(d) If a participant or a former participant not retired dies—

"(1) without a survivor, or

"(2) with a survivor or survivors and the right of all survivors terminates before a claim for survivor annuity is filed,

the portion of the lump-sum credit referred to in subsection (a) of this section and interest on such portion, computed as provided in subsection (i) of this section, shall be paid as provided in subsection (c) of this section.

"(e) If all annuity rights under this chapter based on the service of a deceased participant terminate before the total annuity paid equals the portion of the lump-sum credit referred to in subsection (a) of this section, the difference and interest on such difference, computed as provided in subsection (i) of this section, shall be paid as provided in subsection (c) of this section.

"(f) If an annuitant dies, annuity accrued and unpaid shall be paid as provided in subsection (c) of this section.

"(g) Annuity accrued and unpaid on the termination, except by death, of the annuity of an annuitant or survivor annuitant shall be paid to that individual. Annuity accrued and unpaid on the death of a survivor annuitant shall be paid in the same order of precedence as is provided in section 8342(g) of this title, and the payment bars recovery by any other person.

"(h)(1) Payment of a portion of the lump-sum credit under subsection (a) of this section—

"(A) may be made only if any current spouse and any former spouse of the participant are notified of the participant's application; and

"(B) in any case in which there is a former spouse, shall be subject to the terms of a court order or decree issued with respect to such former spouse if—

"(i) the order or decree expressly relates to the portion of the lump-sum credit involved, and

"(ii) payment of such portion of the lump-sum credit would extinguish entitlement of the former spouse to a survivor annuity under section 8435 of this title or to any portion of an annuity under section 8467 of this title.

"(2)(A) Notification of a spouse or former spouse under this subsection shall be made in accordance with such requirements as the Office shall by regulation prescribe.

"(B) Under the regulations, the Office may provide that paragraph (1)(A) of this subsection may be waived with respect to a spouse or former spouse of a participant if the participant establishes to the satisfaction of the Office that the whereabouts of such spouse or former spouse cannot be determined.

"(3) The Office shall prescribe regulations under which this subsection shall be applied in any case in which the Office receives two or more orders or decrees referred to in paragraph (1)(B) of this subsection.

"(i) Interest on a portion of the lump-sum credit shall be computed as if the interest had accrued at the end of each year on the portion of the lump-sum credit in the Fund during such year and shall be compounded annually. The rate of interest for any year shall be the rate of interest computed for such year under section 8334(e)(3) of this title.

"(j) Payment of the portion of the lump-sum credit referred to in subsection (a) of this section in the case of a participant or former participant voids all rights under this chapter which result from an election to make contributions to the Fund under section 8418(c) of this title.

"SUBCHAPTER III—THRIFT SAVINGS PLAN

"§ 8421. Contributions

"(a)(1) On and after the date a participant makes an election to make contributions to the Fund under section 8418(c) of this title or after the last date such an election may be made under such section in the case of a participant who does not make such election, the participant may contribute to the Thrift Savings Fund in any year an amount not exceeding 10 percent of the participant's annual rate of basic pay.

"(2) Each participant receiving disability benefits under subchapter V of this chapter may, until becoming 62 years of age (in the

case of a person who is disabled within the meaning of section 8441(4)(A) of this title) or until becoming 55 years of age (in the case of a person who is disabled within the meaning of section 8441(4)(B) of this title), contribute to the Thrift Savings Fund in any year an amount not exceeding 10 percent of the amount of the former participant's disability benefits payable under such subchapter during such year.

"(3)(A) Except as provided in subparagraph (B) of this paragraph, notwithstanding the limitations specified in paragraphs (1) and (2) of this subsection, if, in any period for which a participant is entitled to contribute to the Thrift Savings Fund, the participant contributes less than the maximum amount authorized by paragraph (1) or (2) of this subsection (as applicable), the participant may contribute in a later period for which the participant is entitled to contribute to such fund the amount equal to the excess of such maximum amount authorized for the earlier period over the amount contributed during the earlier period.

"(B) The total amount contributed under subparagraph (A) of this paragraph and paragraph (1) or (2) of this subsection in any period may not exceed the amount equal to 15 percent of the periodic equivalent of the participant's annual rate of basic pay for such period.

"(4) Any contribution under this subsection shall be made only pursuant to a program of regular contributions under regulations prescribed by the Executive Director.

"(5) At least once each year, a participant may modify the amount contributed pursuant to paragraph (1) or (2) of this subsection, as the case may be, under regulations prescribed by the Executive Director.

"(b)(1) The employing agency of a participant who contributes to the Thrift Savings Fund under subsection (a) of this section for any pay period, or, in the case of a disabled participant who contributes to such fund under such subsection for any disability benefits payment period, the employing agency of the participant on the date the participant became disabled (as defined in section 8441(4) of this title), shall make a contribution to the Thrift Savings Fund for the benefit of such participant or disabled participant. The employing agency's contribution shall be made at the end of such period.

"(2)(A) Except as provided in subparagraph (B) of this paragraph, the amount contributed under paragraph (1) of this subsection by an employing agency with respect to a contribution of a participant during any period shall be the amount equal to such portion of the amount of the participant's contribution as (i) does not exceed 5 percent of the amount of the gross pay or gross disability benefits, as the case may be, which is payable for such period, and (ii) is not contributed under subsection (a)(3) of this section.

"(B) In the case of a participant who has made an election to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title, the amount contributed under paragraph (1) of this subsection by an employing agency with respect to a contribution of a participant under subsection (a) of this section during any period shall be the amount equal to the sum of—

"(1) such portion of the total amount of the participant's contribution as does not exceed 1 percent of the amount of the gross pay or gross disability benefits, as the case may be, payable for such period,

"(2) one-half of such portion of the amount of the participant's contribution as exceeds 1 percent but does not exceed 3 percent of the gross pay or gross disability benefits, as the case may be, payable for such period, and

"(3) one-fourth of such portion of the amount of the participant's contribution as exceeds 3 percent but does not exceed 6 percent of the gross pay or gross disability benefits, as the case may be, payable for such period,

without regard to any amount contributed by the participant under subsection (a)(3) of this section.

"(c) The sums required to be contributed to the Thrift Savings Fund by an employing agency under subsection (b) of this section for the benefit of a participant shall be paid from the appropriations or funds available to such agency to pay the basic pay of participants or, in the case of an elected participant, from an appropriation or fund available for payment of other salaries of the participant's office or establishment. In the case of a participant in the legislative branch who is paid by the Clerk of the House of Representatives, contributions for the benefit of such participant shall be paid from the contingent fund of the House of Representatives.

"(d)(1) For purposes of the Internal Revenue Code of 1954—

"(A) the amount of any—

"(i) participant contribution, or

"(ii) employing agency's matching contribution,

to the Thrift Savings Fund shall not be included in the gross income of the participant in the taxable year in which such contributions are made, and

"(B) the determination of when, and in what manner, such contributions and any income allocable to such contributions are included in the gross income of such participant shall be made in the same manner as if the Thrift Savings Fund were a trust which met the requirements of section 401(a) of such Code.

"(2) Paragraph (1) shall not apply to any participant contribution described in paragraph (1)(A)(i) in any taxable year with respect to which section 402(a)(8) of such Code does not apply to contributions made to any qualified cash or deferred arrangement (within the meaning of section 401(k) of such Code).

"(e) Subsection (d)(1) of this section shall not be construed to provide that any amount of the participant's pay which is contributed to the Thrift Savings Fund shall not be included in the term 'wages' for purposes of section 209 of the Social Security Act or section 3121(a) of the Internal Revenue Code of 1954.

"§ 8422. Vesting

"(a)(1) A participant who separates from Government employment shall be entitled to an amount equal to—

"(A) the total amount of the contributions made under section 8421(a) of this title plus the total amount of the net earnings in the Thrift Savings Fund, or minus the total amount of the net losses, attributable to such contributions; and

"(B) the applicable percentage of the amount equal to the total amount contributed to the Thrift Savings Fund for the benefit of the participant under section 8421(b) of this title plus the total amount of the net earnings in the Thrift Savings Fund, or minus the total amount of the net losses, attributable to such contributions, as provided in subsection (b) of this section.

"(2) The amount to which a participant is entitled under paragraph (1) of this subsection shall be payable in accordance with the election made by the participant pursuant to section 8423 of this title.

"(b)(1) For the purpose of subsection (a)(1)(B) of this section, except as provided in paragraph (2) of this subsection, the applicable percentage for a participant separating from Government employment after having been a participant in the System for a period set forth under column I of the table below is the percentage set forth under column II of the table below opposite the description of such period:

"Column I Period for which the participant has been a participant in the System:	Column II Applicable percentage:
Less than 1 year	0
Not less than 1 year, but less than 2 years	20
Not less than 2 years, but less than 3 years	40
Not less than 3 years, but less than 4 years	60
Not less than 4 years, but less than 5 years	80
Not less than 5 years	100.

"(2) For the purposes of subsection (a)(1)(B) of this section—

"(A) the percentage applicable in the case of any participant who dies while employed by the Government shall be 100 percent; and

"(B) in the case of a participant making contributions under section 8421(a)(2) of this title, the period for which the person has been a participant in the System shall include periods for which such contributions were made.

"(c) When an election is made by a participant under section 8423(c) of this title, the amount equal to the excess of—

"(1) the sum of—

"(A) the amounts contributed to the Thrift Savings Fund with respect to the participant under section 8421 of this title; and

"(B) the net earnings in the Thrift Savings Fund attributable to such contributions, over

"(2) the amount in the Thrift Savings Fund paid or reserved for payment to or with respect to the participant pursuant to section 8423(c) of this title, . .

shall be available for the year in which the election is made to pay the administrative expenses incurred during such year under the Federal Retirement Thrift Investment Management System prescribed in subchapter VIII of this chapter. Any portion of the amount which is available for such purpose under this subsection in any year and is not obligated or expended before the end of such year shall be transferred to the Treasury of the United States for credit to Miscellaneous Receipts.

"§ 8423. Entitlement and elections relating to entitlement

"(a)(1) Any participant who separates from Government employment entitled to an immediate annuity under section 8411 of this title, any participant who separates from Government employment entitled to benefits under subchapter I of chapter 81 of this title, and, subject to paragraph (2) of this subsection, any participant who is entitled to receive disability benefits under subchapter V of this chapter is entitled and may elect—

"(A) to receive an immediate annuity from the Thrift Savings Fund;

"(B) to defer the commencement of the payment of an annuity from the Thrift Sav-

ings Fund until such date as the participant specifies;

"(C) to withdraw, in one or more payments, the amount of the balance credited to the participant's account in the Thrift Savings Fund; or

"(D) to transfer the amount of the balance in the account to an individual retirement account or other qualified plan (within the meaning of the Internal Revenue Code of 1954) of the participant.

"(2) An election may be made by a disabled participant under paragraph (1) of this subsection only within one year after the date the participant is determined to be disabled for the purposes of subchapter V of this chapter. The election is irrevocable.

"(b) Any participant who separates from Government employment entitled to a deferred annuity under section 8412 of this title is entitled and may elect—

"(1) to receive an annuity from the Thrift Savings Fund to commence on the first date the participant is entitled to receive the deferred annuity;

"(2) to defer the commencement of the payment of an annuity from the Thrift Savings Fund until a date after the first date the participant is entitled to receive the deferred annuity, as specified by the participant;

"(3) to withdraw in one or more payments, on or after the first date the participant is entitled to receive the deferred annuity, the amount of the balance credited to the participant's account in the Thrift Savings Fund; or

"(4) to transfer the amount of the balance in the account to an individual retirement account or other qualified plan (within the meaning of the Internal Revenue Code of 1954) of the participant.

"(c) Any participant who separates from Government employment before becoming entitled to an annuity under section 8411 or 8412 of this title is entitled and may elect—

"(1) to withdraw, in one or more payments, the amount computed under section 8422(a)(1) of this title, payable when the participant becomes 62 years of age; or

"(2) to transfer such amount to an individual retirement account or other qualified plan (within the meaning of the Internal Revenue Code of 1954) of the participant.

"(d)(1) Subject to paragraph (2) of this subsection, any participant making an election pursuant to subsection (a)(1)(B) or (b)(2) of this section may modify the date specified in the election or in a previous modification under this subsection.

"(2) Any modification of an election under paragraph (1) of this subsection may not be made on or after the date specified in the election or the latest modification made under such paragraph and may not specify a date for the commencement of annuity payments earlier than 1 month after the date the modification is filed with the Executive Director.

"§ 8424. Annuities: methods of payment; election; and computation

"(a)(1) The Board shall prescribe methods of payment of annuities under this subchapter.

"(2) The methods of payment prescribed under paragraph (1) of this subsection shall include, but not be limited to—

"(A) a method which provides for the payment of a monthly annuity only to an annuitant during the life of the annuitant;

"(B) a method which provides for the payment of a monthly annuity to an annuitant for the joint lives of the annuitant and the spouse of the annuitant and an appropriate monthly annuity to the one of them who survives the other of them for the life of the survivor;

"(C) a method described in subparagraph (A) of this paragraph which provides annual increases in the amount of the annuity payable;

"(D) a method described in subparagraph (B) of this paragraph which provides annual increases in the amount of the annuity payable; and

"(E) a method providing for the payment of a monthly annuity—

"(i) to the annuitant for the joint lives of the annuitant and an individual, designated by the annuitant under regulations prescribed by the Executive Director, who has an insurable interest in the annuitant; and

"(ii) to the one of them who survives the other of them for the life of the survivor.

"(b) Subject to subsection (c) of this section, under such regulations as the Executive Director shall prescribe, an annuitant electing under section 8423 of this title to receive an annuity from the Thrift Savings Fund shall elect, on or before the date on which the annuitant's annuity under this subchapter commences, one of the methods of payment prescribed by the Board under subsection (a) of this section.

"(c) The amount of an annuity payable under this subchapter pursuant to the method elected under subsection (b) of this section shall be determined on an actuarial basis under regulations prescribed by the Executive Director.

"§ 8425. Administrative provisions relating to payments and elections

"(a) The Executive Director shall make or provide for payments and transfers in accordance with an election of a participant under section 8423 or 8424(b) of this title.

"(b) Any election under section 8423 or 8424(b) of this title shall be in writing and shall be filed with the Executive Director in accordance with regulations prescribed by the Executive Director.

"(c) Notwithstanding any other provision of this section, an election or modification of an election under any provision of this subchapter shall not be effective if the election or modification would result in a violation of the terms of an applicable court decree of divorce, annulment, or legal separation, or the terms of any court order or court-approved property settlement agreement incident to a court decree of divorce, annulment, or legal separation, as determined by the Executive Director.

"§ 8426. Thrift Savings Fund

"(a) There is established in the Treasury of the United States a Thrift Savings Fund.

"(b) The Thrift Savings Fund consists of the sum of all amounts contributed under section 8421 of this title and all amounts deposited under section 8499(b) of this title, increased by the total net earnings from investments of sums in the Thrift Savings Fund or reduced by the total net losses from investments of the Thrift Savings Fund, and reduced by the total amount of payments made from the Thrift Savings Fund.

"(c) The sums in the Thrift Savings Fund are appropriated and shall remain available without fiscal year limitation—

"(1) to invest under section 8427 of this title;

"(2) to pay benefits under this subchapter;

"(3) to pay the administrative expenses of the Federal Retirement Thrift Investment Management System prescribed in subchapter VIII of this chapter;

"(4) to make loans to participants as authorized under subsection (e) of this section; and

"(5) to purchase insurance as provided in section 8499(b)(2) of this title.

"(d)(1) Except as provided in paragraph (2) of this subsection or section 8465(b) or 8467 of this title, and except as otherwise provided in a Federal law, sums in the Thrift Savings Fund may not be assigned or alienated and are not subject to execution, levy, attachment, garnishment, or other legal process. For purposes of this paragraph, a loan made from such fund to a participant shall not be considered to be an assignment or alienation.

"(2) Moneys due or payable from the Thrift Savings Fund to any individual and, in the case of an individual who is a participant, moneys which the individual would be entitled to receive under section 8422 of this title upon separation from Government employment shall be subject to legal process for the enforcement of the individual's legal obligations to provide child support or make alimony payments as provided in section 459 of the Social Security Act (42 U.S.C. 659) or to pay any indebtedness of the individual to the United States.

"(e)(1) The Board shall establish a program to make loans from the Thrift Savings Fund to a participant in case of financial hardship. The program shall be subject to the same conditions as are prescribed in section 408(b)(1) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1108(b)(1)).

"(2) The Executive Director shall prescribe regulations to carry out such program.

"(3) Any loan made to a participant under such program shall be made only out of sums contributed to the Thrift Savings Fund by the participant and net earnings attributable to such sums.

"(f) The sums in the Thrift Savings Fund shall not be appropriated and may not be used for any purpose other than the purposes specified in this section.

"§ 8427. Investment of Thrift Savings Fund

"(a) For the purposes of this section—

"(1) the term 'Common Stock Index Investment Fund' means the Common Stock Investment Fund established under subsection (b)(1)(C) of this section;

"(2) the term 'equity capital' means common and preferred stock, surplus, undivided profits, contingency reserves, and other capital reserves;

"(3) the term 'Fixed Income Investment Fund' means the Fixed Income Investment Fund established under subsection (b)(1)(B) of this section;

"(4) the term 'Government Securities Investment Fund' means the Government Securities Investment Fund established under subsection (b)(1)(A) of this section;

"(5) the term 'net worth' means capital, paid-in and contributed surplus, unassigned surplus, contingency reserves, group contingency reserves, and special reserves;

"(6) the term 'plan' means an employee benefit plan, as defined in section 3(3) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(3));

"(7) the term 'qualified professional asset manager' means—

"(A) a bank, as defined in section 202(a)(2) of the Investment Advisers Act of 1940 (15 U.S.C. 80b-2(a)(2)) which—

"(i) has the power to manage, acquire, or dispose of assets of a plan; and

"(ii) has, as of the last day of its latest fiscal year ending before the date of a determination for the purpose of this clause, equity capital in excess of $1,000,000;

"(B) a savings and loan association, the accounts of which are insured by the Federal Savings and Loan Insurance Corporation, which—

"(i) has applied for and been granted trust powers to manage, acquire, or dispose of assets of a plan by a State or Government authority having supervision over savings and loan associations; and

"(ii) has, as of the last day of its latest fiscal year ending before the date of a determination for the purpose of this clause, equity capital or net worth in excess of $1,000,000;

"(C) an insurance company which—

"(i) is qualified under the laws of more than one State to manage, acquire, or dispose of any assets of a plan;

"(ii) has, as of the last day of its latest fiscal year ending before the date of a determination for the purpose of this clause, net worth in excess of $1,000,000; and

"(iii) is subject to supervision and examination by a State authority having supervision over insurance companies; or

"(D) an investment adviser registered under section 203 of the Investment Advisers Act of 1940 (15 U.S.C. 80b-3) if the investment adviser has, on the the last day of its latest fiscal year ending before the date of a determination for the purpose of this subparagraph, total client assets under its management and control in excess of $50,000,000, and—

"(i) the investment adviser has, on such day, shareholder's or partner's equity in excess of $750,000; or

"(ii) payment of all of the investment adviser's liabilities, including any liabilities which may arise by reason of a breach or violation of a duty described in section 8497 of this title, is unconditionally guaranteed by—

"(I) a person who directly or indirectly, through one or more intermediaries, controls, is controlled by, or is under common control with the investment adviser and who has, on the last day of the person's latest fiscal year ending before the date of a determination for the purpose of this clause, shareholder's or partner's equity in an amount which, when added to the amount of the shareholder's or partner's equity of the investment adviser on such day, exceeds $750,000;

"(II) a qualified professional asset manager described in subparagraph (A), (B), or (C) of this paragraph; or

"(III) a broker or dealer registered under section 15 of the Securities Exchange Act of 1934 (15 U.S.C. 78o) that has, on the last day of the broker's or dealer's latest fiscal year ending before the date of a determination for the purpose of this clause, net worth in excess of $750,000; and

"(8) the term 'shareholder's or partner's equity', when used in paragraph (7)(D) of this subsection with respect to an investment adviser or a person who is affiliated with the investment adviser in a manner described in clause (ii)(I) of such paragraph (7)(D), means the equity shown in the most recent balance sheet prepared for such investment adviser or affiliated person, in accordance with generally accepted accounting principles, within 2 years before the date on which the investment adviser's status as a qualified professional asset manager is determined for the purposes of this section.

"(b)(1) The Board shall establish—

"(A) a Government Securities Investment Fund under which sums in the Thrift Savings Fund are invested in securities of the United States Government issued as provided in subsection (f) of this section;

"(B) a Fixed Income Investment Fund under which sums in the Thrift Savings Fund are invested in insurance contracts, certificates of deposits, or other instruments or obligations which (i) are selected by qualified professional asset managers, and (ii) return the amount invested and pay interest, at a specified rate or rates, on that amount during a specified period of time;

"(C) a Common Stock Index Investment Fund as provided in paragraph (2) of this subsection; and

"(D) such other investment funds as the Board determines to be appropriate for the purposes of this subchapter.

"(2)(A) The Board shall define an index which—

"(i) consists of (I) all of the common stocks that are publicly listed and traded on one or more national securities exchanges, and (II) over-the-counter securities quoted publicly on the National Association of Securities Dealers Automated Quotations system or on another automated basis, or

"(ii) is a commonly recognized index comprised of common stock the aggregate market value of which is as complete a representation of the United States equity markets as is reasonably practicable.

"(B) Except as provided in subparagraph (C) of this paragraph, the Common Stock Index Investment Fund shall be invested in a portfolio designed to replicate the performance of the index defined under subparagraph (A) of this paragraph. The portfolio shall be designed such that—

"(i) to the extent practicable, the percentage of the Common Stock Index Investment Fund that is invested in each stock is the same as the percentage determined by dividing the aggregate market value of all shares of that stock by the aggregate market value of all shares of all stock included in such index, or

"(ii) a sampling of stocks included in the index is used in the construction of an index fund that minimizes differences between the net portfolio return and the total index return.

"(C) The Executive Director may exclude certain stocks from the Common Stock Index Investment Fund and from the index defined in accordance with subparagraph (A) of this paragraph upon the recommendation of the Employee Advisory Committee, notwithstanding the standards for investment decisionmaking set out in section 8495 of this title.

"(c)(1) The Executive Director shall invest in the Government Securities Investment Fund the sums which are in the Thrift Savings Fund, are available for investment, and are not to be invested in an investment fund referred to in subsection (b)(1)(B), (b)(1)(C), or (b)(1)(D) of this section pursuant to an election made under subsection (d) of this section.

"(2) Except as provided in subsection (e) of this section, the Executive Director shall invest sums available in the Thrift Savings Fund for investment as provided in elections made under subsection (d) of this section.

"(d)(1) Except as provided in subsection (e) of this section, at least once each year, a participant or former participant may elect the investment funds referred to in subsection (b) of this section into which the sums in the Thrift Savings Fund credited to the account of such participant or former participant are to be invested or reinvested.

"(2) The election may be made by a participant or former participant under paragraph (1) of this subsection only in accordance with regulations prescribed by the Executive Director and within such period after the date the participant's or former participant's annual statement is transmitted to the participant or former participant pursuant to section 8428(b) of this title as the Executive Director shall prescribe in such regulations.

"(3) Each participant who elects to invest in the Common Stock Index Investment Fund or the Fixed Income Investment Fund shall sign an acknowledgement prescribed by the Executive Director which states that the participant understands that an investment in such fund is made at the participant's risk, that the participant is not protected by the Federal Government against loss on such investment, and that a return on such investment is not guaranteed by the Federal Government.

"(e)(1)(A) The Executive Director shall invest a percentage of the total amount that—

"(i) is contributed to the Thrift Savings Fund by a participant under section 8421(a) of this title during a year described under column I of the first table of minimum Government securities investments set out in subparagraph (B) of this paragraph, and

"(ii) is available for investment,

in the Government Securities Investment Fund as provided under column II of the table opposite the description of such year.

"(B) For the purposes of subparagraph (A) of this paragraph, the first table of minimum Government securities investments is as follows:

"Column I Year:	Column II Minimum percentage of the amounts contributed by a participant for each month of such year to be invested in the Government Securities Investment Fund:
1987	100
1988	80
1989	60
1990	40
1991	20.

"(2)(A) The Executive Director shall invest a percentage of the total amount that—

"(i) is contributed to the Thrift Savings Fund by the Government for the benefit of a participant pursuant to section 8421(b) of this title during a year described under column I of the second table of minimum Government securities investments set out in subparagraph (B) of this paragraph, and

"(ii) is available for investment,

in the Government Securities Investment Fund as provided under column II of the table opposite the description of such year.

"(B) For the purposes of subparagraph (A) of this paragraph, the second table of minimum Government securities investments is as follows:

"Column I Year:	Column II Minimum percentage of the amounts contributed for the benefit of a participant for each month of such year to be invested in the Government Securities Investment Fund:
1987-1992	100
1993	80
1994	60
1995	40
1996	20.

"(3) All sums credited to the Thrift Savings Fund pursuant to section 8473(b) of this title shall be invested in the Government Securities Investment Fund.

"(4) The sums which are invested in the Government Securities Investment Fund as required by this subsection and are returned to the Thrift Savings Fund after maturity of the securities purchased with such sums, and the amounts earned on the investment of such sums, shall be reinvested in the Government Securities Investment Fund.

"(f) The Secretary of the Treasury is authorized to issue special interest-bearing obligations of the United States for purchase by the Thrift Savings Fund. Obligations issued for the purpose of this subsection shall have maturities fixed with due regard to the needs of such fund as determined by the Executive Director, and shall bear interest at a rate equal to the average market yield (computed by the Secretary of the Treasury on the basis of market quotations as of the end of the calendar month next preceding the date of issue of such obligations) on all marketable interest-bearing obligations of the United States then forming a part of the public debt which are not due or callable until after the expiration of 4 years from the end of such calendar month. Any such average market yield which is not a multiple of one-eighth of 1 percent, shall be rounded to the nearest multiple of one-eighth of 1 percent.

"§ 8428. Accounting

"(a)(1) The Executive Director shall establish and maintain an account for each participant making contributions under section 8421(a) of this title.

"(2) The balance in the account of a participant or former participant at any time is the excess of—

"(A) the sum of—

"(i) all contributions made to the Thrift Savings Fund by the participant or former participant under section 8421(a) of this title;

"(ii) all contributions made to such fund for the benefit of the participant or former participant under section 8421(b) of this title;

"(iii) the amounts transferred to such fund with respect to the participant or former participant under section 8473(b) of this title; and

"(iv) the total amount of the allocations made to and reductions made in the account pursuant to paragraph (3) of this section, over

"(B) the amounts paid out of the Thrift Savings Fund with respect to such participant or former participant under this subchapter and subchapter IV of this title.

"(3) Pursuant to regulations prescribed by the Executive Director, the Executive Director shall allocate to the account of each participant or former participant an amount equal to a pro rata share of the net earnings and net losses from each investment of sums in the Thrift Savings Fund attributable to sums credited to the account of such participant, reduced by an appropriate share of the administrative expenses of the Federal Retirement Thrift Investment Management System prescribed in subchapter VIII of this chapter, as determined by the Executive Director.

"(b) The Executive Director shall provide each participant and former participant an annual statement of the balance in the participant's or former participant's account.

"(c)(1) For the purposes of this subsection, the term 'qualified public accountant' shall have the same meaning as provided in section 103(a)(3)(D) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1024(a)(3)(D)).

"(2) The Executive Director shall annually engage, on behalf of all participants, an independent qualified public accountant, who shall conduct an examination of any accounts established under subsection (a) of this section and of other books and records maintained in the administration of this subchapter as the accountant considers necessary to enable the accountant to make the determination required by paragraph (3) of this subsection. The examination shall be conducted in accordance with generally accepted auditing standards and shall involve such tests of the accounts, books, and records as the independent qualified public accountant considers necessary.

"(3) The independent qualified public accountant conducting an examination under paragraph (2) of this subsection shall determine whether the accounts, books, and records referred to in such paragraph have been maintained in conformity with generally accepted accounting principles applied on a basis consistent with the application of such principles during the examination conducted under such paragraph during the preceding year. The accountant shall transmit to the Board and the Comptroller General of the United States a report on his examination, including his determination under this paragraph.

"(4) In making a determination under paragraph (3) of this subsection, the accountant may rely on the correctness of any actuarial matter certified by an enrolled actuary, if the accountant states his reliance in the report transmitted to the Board under such paragraph.

"SUBCHAPTER IV—SURVIVOR BENEFITS

"§ 8431. Basic plan spousal benefits relating to the death of a participant or former participant other than an annuitant

"(a)(1) If a participant dies after performing 18 or more months of service and before separating from Government employment, the surviving spouse of a deceased participant shall be entitled to a survivor annuity payable out of the Fund.

"(2)(A) The amount of the survivor annuity which is payable under paragraph (1) of this subsection to the surviving spouse of a deceased participant other than a participant referred to in paragraph (3) of this subsection shall be equal to 50 percent of the reduced annuity which the participant would have been entitled to receive if the participant had retired from Government employment on the day before the date of death, computed as provided in subparagraph (B) of this paragraph.

"(B) For the purposes of subparagraph (A) of this paragraph, the reduced annuity of a deceased participant shall be the greater of—

"(i) the annuity computed with respect to the deceased participant under sections 8413 and 8414 (without regard to section 8415) of this title, or

"(ii) 65 percent of the annuity computed with respect to the deceased participant under section 8413 (without regard to sections 8414 and 8415) of this title.

"(3) The amount of the survivor annuity which is payable under paragraph (1) of this subsection to the surviving spouse of a deceased participant who elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title shall be equal to 50 percent of the annuity which the participant would have been entitled to receive if the participant had retired from Government employment on the day before the date of death, computed as provided in section 8413 of this title without regard to sections 8414 and 8415 of this title and any election under section 8417(a) of this title.

"(b)(1) If a former participant dies entitled to a deferred annuity under section 8412 of this title before payment of an annuity under subchapter II of this chapter to the former participant commences, the surviving spouse of the deceased former participant is entitled to a survivor annuity payable out of the Fund.

"(2)(A) The amount of the survivor annuity payable under paragraph (1) of this subsection to the surviving spouse of a deceased former participant shall be equal to 50 percent of the annuity which the deceased former participant would have been entitled to receive under such section if the deceased former participant—

"(i) had been 55 years of age on the day before the date of death, or

"(ii) in the case of a former participant who was 55 years of age or older on such day and was not receiving such annuity, had commenced to receive such deferred annuity on such day,

computed as provided in subparagraph (B) or (C) of this paragraph, as applicable.

"(B) For the purposes of subparagraph (A) of this paragraph, the annuity which a deceased former participant other than a participant described in subparagraph (C) of this paragraph would have been entitled to receive shall be equal the greater of—

"(i) the annuity computed with respect to the deceased former participant under sections 8413 and 8414 (without regard to section 8415) of this title, or

"(ii) 65 percent of the annuity computed with respect to the deceased former participant under section 8413 (without regard to sections 8414 and 8415) of this title.

"(C) For the purposes of subparagraph (A) of this paragraph, the annuity which a deceased former participant would have been entitled to receive in the case of a deceased former participant who elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title shall be computed under section 8413 of this title without regard to sections 8414 and 8415 of this title and any election under section 8417(a) of this title.

"(c) For the purpose of computing a survivor annuity under subsection (a) or (b) of this section, a deceased participant or former participant who died before completing 10 years of service shall be deemed to have completed 10 years of service.

"§ 8432. Basic plan spousal and insurable interest benefits relating to the death of an annuitant

"A survivor annuity shall be paid out of the Fund with respect to a deceased annuitant—

"(1) in accordance with the method of payment elected by the annuitant under section 8416 of this title;

"(2) as provided in subsection (b)(3) of such section; or

"(3) in accordance with an election made by the annuitant under section 8434(a) or 8436(c) of this title.

"§ 8433. Survivor benefits under the thrift savings plan

"(a) A survivor annuity shall be paid out of the Thrift Savings Fund with respect to a deceased annuitant as provided under a method of payment of annuities elected by the annuitant under section 8424(b) of this

title or in accordance with an election made by the annuitant under section 8434(a) or 8436(c) of this title. The amount of the survivor annuity shall be determined on an actuarial basis under regulations prescribed by the Executive Director.

"(b)(1) Except as provided in subsection (d) of this section, the amount in the account established and maintained for a deceased participant or deceased former participant (other than a deceased annuitant) pursuant to section 8428(a) of this title, determined on the date of an election under subsection (c) of this section, shall, subject to the limits of the entitlement set out in section 8422(a)(1) of this title (without regard to section 8422(a)(2) of this title), be paid as provided in paragraph (2) of this subsection.

"(2)(A) Except as provided in subparagraph (B) of this paragraph, payment under paragraph (1) of this subsection shall be made to the surviving spouse of the deceased participant or former participant pursuant to the method elected under subsection (c) of this section.

"(B) If a deceased participant or former participant referred to in paragraph (1) of this subsection is not survived by a spouse, payment under such paragraph shall be made to—

"(i) any individual who has an insurable interest in the participant or former participant and has been designated by the participant for the purpose of such paragraph under regulations prescribed by the Executive Director; or

"(ii) if the deceased participant or former participant did not make a designation as provided in clause (i) of this subparagraph, to the estate of the deceased participant or former participant.

"(c) A surviving spouse or another individual who is entitled to payment of benefits under subsection (b) of this section may elect—

"(1) to receive an annuity from the Fund payable monthly for life;

"(2) to transfer the amount referred to in such subsection to an individual retirement account (within the meaning of the Internal Revenue Code of 1954) of the surviving spouse; or

"(3) to withdraw such amount in one or more payments.

"(d) Any amount required for the payment of a survivor annuity with respect to a deceased participant or deceased former participant out of the Thrift Savings Fund pursuant to section 8435 of this title shall be deducted and withheld from a distribution made with respect to the deceased participant or deceased former participant pursuant to subsection (b) of this section. The amount deducted and withheld shall be maintained in the Thrift Savings Fund until expended in payment of the survivor annuity or until the survivor annuity terminates. Any sums remaining from the amount deducted and withheld after the termination of the survivor annuity, plus net earnings realized from investment of such amount, shall be distributed as provided in subsection (b) of this section, as the case may be.

"§ 8434. Basic and thrift savings plan survivor benefits relating to marriage after commencement of an annuity

"(a) If an annuitant—

"(1) is married on the date that the annuitant applies for payment of an annuity under subchapter II of this chapter to commence, the marriage terminates, and the annuitant remarries, or

"(2) is not married on such date and marries after such date,

the annuitant may irrevocably elect during the later marriage to provide an annuity for such annuitant's spouse under the method of payment described in section 8416(a)(2)(B) or subparagraph (B) or (D) of section 8424(a)(2) of this title. An election under this subparagraph shall be made in a signed writing received by the Office within 2 years after the date of the remarriage or marriage, as the case may be.

"(b) An election under subsection (a) of this section shall be effective the first day of the second month beginning after the election is received by the Office (in the case of a survivor annuity payable out of the Fund) or the Executive Director (in the case of a survivor annuity payable out of the Thrift Savings Fund), but not earlier than 9 months after the date of the remarriage referred to in paragraph (1) of such subsection or the date of the marriage referred to in paragraph (2) of such subsection, as the case may be.

"(c) An annuitant making an election under subsection (a) of this section to provide a survivor annuity payable out of the Fund shall, within 2 years after the date of the remarriage referred to in paragraph (1) of such subsection or the date of the marriage referred to in paragraph (2) of such subsection, as the case may be, deposit in the Fund an amount determined by the Office, as nearly as may be administratively feasible, to reflect the amount by which the annuity of such annuitant would have been reduced if the election had been in effect since—

"(1) the date that payment of an annuity to the annuitant under subchapter II of this chapter commenced, or

"(2) if the annuity had previously been reduced to provide for a survivor annuity under section 8432 of this title, the date the previous reduction in such annuitant's annuity was terminated under section 8415(b) of this title,

plus interest computed as provided in section 8438(a) of this title.

"(d) Notwithstanding any other provision of this section, an election under this section may not be made for the purpose of providing a survivor annuity payable from the Fund to a spouse of an annuitant by remarriage if—

"(A) such spouse was married to the annuitant on the date that payment of an annuity to the annuitant under subchapter II of this chapter commenced; and

"(B) rights to survivor benefits for such spouse based on marriage to such annuitant were then waived under section 8416(b)(2) of this title.

"§ 8435. Survivor benefits for eligible former spouses: entitlement; amount

"(a) Subject to subsections (b) through (g) of this section, an eligible former spouse of a deceased participant who died after performing 18 or more months of service and an eligible former spouse of a deceased former participant who died entitled to an immediate or deferred annuity under section 8411 or 8412 of this title is entitled to a survivor annuity under this section if and to the extent that—

"(1) an election under section 8436 of this title,

"(2) any court decree dissolving or annulling the marriage of the participant or former participant and the eligible former spouse, or

"(3) any court order or court-approved property settlement agreement incident to such decree,

expressly provides for such survivor annuity.

"(b)(1) The amount of the survivor annuity payable from the Fund to an eligible former spouse of a deceased participant or deceased former participant under this section may not exceed the excess, if any, of—

"(A) the amount applicable in the case of such eligible former spouse, as determined under paragraph (2) of this subsection, over

"(B) the total amount of all other survivor annuities payable from the Fund under this section to other eligible former spouses of the participant or former participant based on the order of precedence provided in subsection (d) of this section.

"(2) For the purposes of paragraph (1)(A) of this subsection, the amount applicable in the case of an eligible former spouse of a deceased participant or deceased former participant is the amount which would be computed for a surviving spouse of the deceased—

"(A) as provided in section 8416(a)(2)(B) of this title, if the deceased was an annuitant on such day;

"(B) as provided in section 8431(a) of this title, if the deceased was a participant described in paragraph (1) of such section 8431(a); or

"(C) as provided in section 8431(b) of this title, if the deceased was a former participant described in paragraph (1) of such section 8431(b).

"(c) The total amount of all survivor annuities payable from the Thrift Savings Fund to eligible former spouses of a deceased participant or deceased former participant pursuant to this section may not exceed the amount of the survivor annuities that would be payable to the former spouses out of 100 percent of the balance in the account of the deceased participant or deceased former participant, plus anticipated net earnings from investments allocable to such account, determined on an actuarial basis in accordance with regulations prescribed by the Executive Director.

"(d) If more than one eligible former spouse is entitled to a survivor annuity pursuant to this section, the amount of each such survivor annuity shall be limited appropriately to carry out subsection (b) or (c) of this section on a first-come, first-served basis determined by reference to the date an election is properly made pursuant to section 8436 of this title or the date on which the court decree, order, or court-approved agreement applicable to the entitlement was issued, as the case may be.

"(e) The commencement and termination dates of a survivor annuity payable under this section to an eligible former spouse of a deceased participant or deceased former participant shall be the commencement and termination dates determined under the provisions of the applicable court order, decree, or agreement or an election, as the case may be (if provided in such order, decree, agreement, or election), except that any such survivor annuity—

"(1) shall not commence before—

"(A) the day after the participant or former participant dies, or

"(B) the first day of the second month beginning after the date on which the Office receives written notice of the court order, decree, or agreement or the election, as the case may be, together with such additional information or documentation as the Office requires,

whichever is later, and

"(2) shall terminate not later than the date provided in section 8464(b)(2) of this title.

"(f) For the purposes of this section, a court decree, order, or agreement or an elec-

tion referred to in subsection (a) of this section shall not be effective, in the case of a survivor annuity payable out of the Fund to a former spouse, to the extent that the election is inconsistent with any joint waiver previously executed with respect to such former spouse under section 8416(b)(2) of this title.

"(g) Any payment under this section to a person bars recovery by any other person.

"§ 8436. Survivor benefits for former spouses: elections, deposits and collections, and administrative provisions

"(a)(1) If an annuitant has an eligible former spouse on the date that the annuitant applies for payment of an annuity to the annuitant under subchapter II of this chapter to commence, the annuitant may elect, under procedures prescribed by the Office, to provide a survivor annuity for such former spouse under section 8435 of this title. An election under this paragraph shall be made on such date or not later than the date which is 2 years after the date on which the marriage of the former spouse to the annuitant was dissolved or annulled, whichever is later. The election shall specify the amount of the survivor annuity to be provided under this paragraph.

"(2) If an annuitant makes an election under paragraph (1) of this subsection to provide a survivor annuity payable out of the Fund and the annuitant makes the election during the 2-year period referred to in such paragraph, the annuitant shall deposit in the Fund, within such period, an amount determined by the Office, as nearly as may be administratively feasible, to reflect the amount by which the annuity of such an annuitant would have been reduced if the election had been continuously in effect since the date the annuity commenced, plus interest computed as provided in section 8438(a) of this title.

"(3) An election under paragraph (1) of this subsection—

"(A) shall not be effective to the extent that it conflicts with—

"(i) any court decree or order referred to in subsection (a) of section 8435 of this title, or

"(ii) any agreement referred to in such subsection,

which is received by the Office before the date on which such election is made;

"(B) shall not be effective to the extent that the amount of the annuity specified in the election exceeds—

"(i) in the case of a survivor annuity payable from the Fund, the amount determined pursuant to subsections (b)(2) and (d) of section 8435 of this title; or

"(ii) in the case of a survivor annuity payable from the Thrift Savings Fund, the amount determined pursuant to subsections (c) and (d) of section 8435 of this title; and

"(C) shall not be effective, in the case of an annuitant who is married on the date of the election, unless the election is made with the written consent of the annuitant's spouse.

"(b) An annuitant who has elected to provide a survivor annuity for an eligible former spouse pursuant to subsection (a) of this section or who has an eligible former spouse entitled to receive a survivor annuity with respect to the annuitant under paragraph (2) or (3) of section 8435(a) of this title may make an election to provide or increase a survivor annuity for any other eligible former spouse of the annuitant within the same period that, and subject to the same conditions under which, an election could be made under subsection (c) of this section for a spouse of the annuitant (subject to the provisions of subsection (a)(3)(C) of this section relating to the consent of a spouse, if the annuitant is then married). The opportunity to make an election under the preceding sentence is in addition to any opportunity otherwise provided under this section.

"(c)(1) If the entitlement of an eligible former spouse of an annuitant to a survivor annuity under this subchapter is terminated or reduced by reason of the remarriage or death of the former spouse, the annuitant may elect, in a signed writing received by the Office (in the case of a survivor annuity to be paid out of the Fund) or the Executive Director (in the case of a survivor annuity to be paid out of the Thrift Savings Fund) within 2 years after the former spouse's date of death or remarriage, as the case may be, to provide a survivor annuity to the annuitant's spouse.

"(2) A survivor annuity elected under paragraph (1) of this subsection shall be paid under the method described in section 8416(a)(2)(B) of this title (in the case of a terminated or reduced entitlement payable out of the Fund) or in subparagraph (B) or (D) of section 8424(a)(2) of this title (in the case of a terminated or reduced entitlement payable from the Thrift Savings Fund).

"(d) If the entitlement of an annuitant's spouse to a survivor annuity under this subchapter is terminated by reason of the death of the spouse, the annuitant may elect, in a signed writing received by the Office (in the case of a survivor annuity to be paid out of the Fund) or the Executive Director (in the case of a survivor annuity to be paid out of the Thrift Savings Fund) within 2 years after the spouse's date of death to provide or increase a survivor annuity for a former spouse of the annuitant.

"(e) The requirement that the spouse of an annuitant waive a right to a survivor annuity under this subchapter as a condition for an election authorized by subsection (a)(3)(C) of this section shall not apply if the participant or annuitant establishes to the satisfaction of the Office that—

"(1) the spouse's whereabouts cannot reasonably be determined; or

"(2) due to exceptional circumstances, it would be inappropriate to require the participant or annuitant to obtain the spouse's consent.

"§ 8437. Termination of entitlement

"An election of an annuitant to provide a survivor annuity to the annuitant's spouse under this subchapter terminates on the first day of the first month beginning after—

"(1) the date of the death of the spouse; or

"(2) the date of the dissolution of the spouse's marriage to the annuitant.

"§ 8438. Deposits to the Fund

"(a) For the purposes of section 8434(c) or 8436(a)(2) of this title, the annual rate of interest for each year during which an annuity would have been reduced if the election referred to in such section had been in effect on and after the applicable date referred to in such section shall be the percent determined for such year under section 8334(e) of this title.

"(b) If an annuitant does not make a deposit required by section 8434(c) or 8436(a)(2) of this title, the Office shall collect such amount by offset against the annuitant's annuity payable from the Fund, up to a maximum of 25 percent of the net annuity otherwise payable to the annuitant. The annuitant is deemed to consent to such offset.

"(c) The Office may extend the time limit for making a deposit required by section 8434(c) or 8436(a)(2) of this title in any case for good cause shown.

"SUBCHAPTER V—DISABILITY BENEFITS

"§ 8441. Definitions

"For the purposes of this subchapter—

"(1) the term 'administrator of benefits' means—

"(A) the Office; or

"(B) an insurance company or other entity which—

"(i) offers claims payment services and related administrative services under benefit plans provided by employers in the private sector; and

"(ii) has entered into a contract with the Office pursuant to section 8450 of this title;

"(2) the term 'disability benefits under the Social Security Act' means disability insurance benefits payable under section 223 of the Social Security Act or benefits payable under section 202 of such Act by reason of being under a disability;

"(3) the term 'disability date', when used with respect to an eligible participant, means the date the eligible participant became disabled;

"(4) the term 'disabled', when used with respect to an eligible participant, means that the eligible participant—

"(A) is under a disability within the meaning of section 223 of the Social Security Act; or

"(B) is unable, because of disease or injury, to render useful and efficient service in the participant's position and is not qualified for reassignment, under procedures prescribed by the Office, to a vacant position—

"(i) which is in the participant's employing agency and is in the participant's commuting area;

"(ii) which is at the same grade or pay level as the participant's position; and

"(iii) in which the participant would be able to render useful and efficient service;

"(5) the term 'eligible participant' means an employee or Member whose service exceeds 18 months and—

"(A) who—

"(i) has applied for disability benefits under the Social Security Act and has been determined to be under a disability for the purposes of title II of the Social Security Act; or

"(ii) in the case of an employee or Member who is not entitled to disability benefits under the Social Security Act by reason of insufficient quarters of coverage, has been determined by an administrator of benefits to be disabled within the meaning of paragraph (4)(A) of this section on the basis of a report of examination required by section 8445 of this title; or

"(B) who has been determined by an administrator of benefits to be disabled within the meaning of paragraph (4)(B) of this section on the basis of a report of examination required by section 8445 of this title and the findings of the Office with respect to the reassignment of the employee;

"(6) the term 'final average pay', when used with respect to a disabled eligible participant, means the participant's average pay on the participant's disability date increased, each time after such date that the rates of pay under the General Schedule are increased pursuant to section 5305 of this title, by the same overall average percent of the increase in such rates, and compounded;

"(7) the term 'onset average pay', when used with respect to a disabled eligible participant, means the participant's average

pay on the participant's disability date increased on January 1 of each year after such date by the same percent by which annuities referred to in paragraph (1) of section 8462(b) of this title are increased under such section 8462(b)(2)(C) in December of the preceding year, and compounded; and

"(8) the term 'projected service', when used with respect to a disabled eligible participant, means the sum of the number of years of service performed by the participant before the participant's disability date and the number of years, if any, after such date and before the date the participant becomes—

"(A) in the case of an eligible participant referred to in subparagraph (5)(A) of this section, 62 years of age; or

"(B) in the case of an eligible participant referred to in subparagraph (5)(B) of this section, 55 years of age.

"§ 8442. Entitlement

"(a)(1) A person who is an eligible participant, is disabled, and has used all sick leave accrued and accumulated under subchapter I of chapter 63 of this title or any other similar applicable provision of law relating to Government employment is entitled to receive disability benefits under this subchapter while—

"(A) in the case of a person who is disabled within the meaning of section 8441(4)(A) of this title, such person is under 62 years of age and during the month in which such person becomes such age; and

"(B) in the case of a person who is disabled within the meaning of section 8441(4)(B) of this title, such person is under 55 years of age and during the month in which such person becomes such age.

"(2) On and after the first day of the first month beginning after the month in which a person referred to in paragraph (1) of this subsection becomes the maximum age prescribed for such person in subparagraph (A) or (B) of such paragraph, the person shall be treated as an eligible participant for the purposes of entitlement to benefits under subsection (b) of this section.

"(b)(1) Subject to paragraph (3) of this subsection, an eligible participant who—

"(A) is disabled within the meaning of section 8441(4)(A) of this title and is not less than 62 years of age, or

"(B) is disabled within the meaning of section 8441(4)(B) of this title and is not less than 55 years of age,

and who has 5 or more years of service and projected service shall be entitled to an annuity as provided in subchapter II of this title.

"(2) For the purposes of applying the provisions of subchapter II of this title in the case of an eligible participant pursuant to paragraph (1) of this subsection—

"(A) the eligible participant shall be deemed to have separated from Government employment on the day before the date the participant becomes entitled to an annuity pursuant to paragraph (1) of this subsection;

"(B) the service of the participant shall include the participant's projected service; and

"(C) the participant's average pay shall be equal to—

"(i) in the case of a participant not described in clause (ii) of this subparagraph, the participant's onset average pay; and

"(ii) in the case of a participant who has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title, the participant's final average pay.

"(3)(A) If an eligible participant has not elected to make contributions under section 8418(c) of this title or has received, under section 8420 of this title, a refund of the contributions made by the participant pursuant to an election made under such section 8418(c), the amount of the annuity which the participant is entitled to receive under subchapter II of this chapter by reason of the application of paragraph (1) of this subsection shall be the amount determined under subparagraph (B) of this paragraph.

"(B) The amount of the annuity which an eligible participant referred to in subparagraph (A) of this paragraph is entitled to receive under subchapter II of this chapter by reason of the application of paragraph (1) of this subsection shall be equal to the lesser of—

"(i) the amount of the disability benefits which such eligible participant was receiving under this subchapter on the day before the date the participant becomes entitled to receive such annuity; or

"(ii) the amount of the annuity computed in the case of such participant under the provisions of such subchapter.

"(c) If the condition of an eligible participant who is disabled within the meaning of subparagraph (A) or (B) of section 8441(4) of this title changes such that the participant is disabled within the meaning of the other such subparagraph, the entitlement of such participant to receive disability benefits under this subchapter shall be adjusted as appropriate to reflect the changed condition.

"§ 8443. Computation of benefits

"(a) The annual rate of the disability benefits payable under section 8442(a) of this title to an eligible participant referred to in section 8441(5)(A) of this title shall be equal to the excess of 60 percent of the participant's average pay on the participant's disability date over the amount, if any, which is payable or, on proper application would be payable to the participant as disability benefits under the Social Security Act on such date.

"(b) The annual rate of the disability benefits payable under section 8442(a) of this title to an eligible participant referred to in section 8441(5)(B) of this title—

"(1) during the period ending 1 year after the eligible participant's disability date, shall be equal to the excess of 60 percent of the participant's average pay on the participant's disability date over the amount, if any, which is payable or, on proper application would be payable to the participant as disability benefits under the Social Security Act on such date; and

"(2) after such period, while the participant is under 55 years of age, shall be equal to the excess of—

"(A) 40 percent of the participant's average pay on the participant's disability date as such average pay is increased by the same percent by which the amount of the participant's disability benefits computed under paragraph (1) of this subsection was increased on the first January 1 after such date, under section 8462 of this title, over

"(B) the amount of the disability benefits under the Social Security Act computed for the purpose of paragraph (1).

"§ 8444. Application

"(a) Except as provided in subsection (b) of this section, a claim of a participant for disability benefits under this subchapter may be allowed only if the participant files with the appropriate administrator of benefits an application for the disability benefits before the date the participant separates from Government employment or within 1 year after such date.

"(b) An appropriate administrator of benefits may waive the time limitation set out in subsection (a) of this section in the case of a participant if—

"(1) the administrator of benefits determines that the participant was mentally incompetent on the date the participant separated from Government employment or within 1 year after such date; and

"(2) the application for disability benefits is filed within 1 year after the date the participant is restored to mental competency or the date a fiduciary is appointed to manage the financial affairs of the participant, whichever date is earlier.

"§ 8445. Medical examinations

"(a) A participant applying for or receiving disability benefits under section 8442(a) of this title shall be examined by a physician under the direction of the appropriate administrator of benefits at such times as such administrator may require.

"(b) A physician examining a participant under subsection (a) of this section shall report to the appropriate administrator of benefits the diagnosis and prognosis with respect to such participant.

"(c) Notwithstanding any other provision of this subchapter, any participant who fails to submit to the examination required under subsection (a) of this section shall not be entitled to disability benefits.

"§ 8446. Offers of alternative employment

"(a)(1) Any participant who is applying for disability benefits under this subchapter, is examined pursuant to section 8445 of this title, and is determined on the basis of the examination to be able to perform the work required in any position described in paragraph (2) of this subsection shall be considered for appointment to such position.

"(2) A position referred to in paragraph (1) of this subsection is a position which is in the agency of the Government employing the participant referred to in such paragraph, is a position for which the participant is qualified, is not lower than the grade or pay level of the participant's position, and is within the participant's commuting area.

"(b) Any participant who is appointed to or offered a position under subsection (a) of this section is entitled to appeal to the Merit Systems Protection Board under section 7701 of this title any determination that the participant is able to perform the work required of such position.

"§ 8447. Recovery or restoration of earning capacity

"(a)(1) If an administrator of benefits determines that an individual who is receiving disability benefits under this subchapter has recovered from the disability before becoming 62 years of age (in the case of an individual who is disabled within the meaning of section 8441(4)(A) of this title) or 55 years of age (in the case of an individual who is disabled within the meaning of section 8441(4)(B) of this title), payment of the benefits shall terminate on the date the individual is reemployed by the Government or 1 year after the date of the medical examination on which such administrator's determination is based, whichever date is earlier.

"(2)(A) Payment of disability benefits to any individual under this chapter that has been terminated pursuant to paragraph (1) of this subsection shall be resumed if there is a recurrence of the individual's disability, as determined by an administrator of benefits after a medical examination of the individual, and the individual is under 62 years

of age (in the case of an individual who is disabled within the meaning of section 8441(4)(A) of this title) or under 55 years of age (in the case of an individual who is disabled within the meaning of section 8441(4)(B) of this title).

"(B) A resumption of payment of disability benefits under subparagraph (A) of this paragraph shall be effective on the date the medical examination referred to in such paragraph was completed.

"(C) The annual rate of the disability benefits payable to an individual upon resumption of payment under subparagraph (A) of this paragraph shall be the annual rate that would have been payable to the individual if payment of disability benefits had not been terminated pursuant to paragraph (1) of this subsection.

"(b)(1) If the administrator of benefits determines that an individual who is receiving disability benefits under this subchapter has received, during the latest calendar year, income from wages or self-employment or both totalling the amount equal to 60 percent of the rate of pay payable for the individual's position of Government employment on the individual's disability date determined for the purposes of this subchapter (increased as if such rate of pay had been increased, by the same percent as the overall percent increase in the rates of pay under the General Schedule, each time such rates had been increased pursuant to section 5305 of this title since such date), payment of the benefits shall terminate on the date 60 days after the end of such calendar year.

"(2)(A) If payment of disability benefits under this subchapter has been terminated pursuant to paragraph (1) of this subsection in the case of an individual who is not reemployed in a position subject to this chapter, who continues to be disabled, who is under 62 years of age (in the case of an individual who is disabled within the meaning of section 8441(4)(A) of this title) or under 55 years of age (in the case of an individual who is disabled within the meaning of section 8441(4)(B) of this title), and who receives in the calendar year in which the disability benefits were terminated, or any calendar year after such year, income from wages or self-employment or both totalling less than the amount computed in such case as provided in such paragraph, payment of disability benefits to the individual under this subchapter shall be resumed.

"(B) A resumption of payment of disability benefits to an individual under subparagraph (A) of this paragraph shall be effective the first day of the first year beginning after the year in which the individual received the income referred to in such subparagraph.

"(C) The annual rate of the disability benefits payable to an individual upon resumption of payment of disability benefits under subparagraph (A) of this paragraph shall be the annual rate that would have been payable to the individual if payment had not been terminated pursuant to paragraph (1) of this subsection.

"(c) Any determination under this section may be appealed to the Office. A determination of the Office in such an appeal may be appealed to the Merit Systems Protection Board under section 7701 of this title. The Merit Systems Protection Board may hear and adjudicate any such appeal.

"§ 8448. Relationship to workers' compensation

"(a)(1) An individual is not entitled to receive disability benefits under this subchapter and compensation for injury to or disability of the individual under subchapter I of chapter 81 of this title covering the same period of time.

"(2) Paragraph (1) of this subsection does not bar the right of a claimant to the greater benefit conferred by either subchapter referred to in such paragraph for any part of the period referred to in such paragraph.

"(3) Paragraph (1) of this subsection and the provisions of subchapter I of chapter 81 of this title do not deny any concurrent benefit to an individual under this subchapter and under subchapter I of chapter 81 of this title if the benefit under subchapter I of chapter 81 of this title is based on the death of another individual.

"(b)(1) Subject to paragraph (2) of this subsection, an individual's receipt of a lump-sum payment for compensation under section 8135 of this title shall not affect the individual's entitlement to disability benefits under this subchapter.

"(2) If disability benefits are payable under this subchapter by reason of the same disability for which a lump-sum payment of compensation referred to in paragraph (1) of this subsection has been made, so much of the compensation as has been paid for a period extended beyond the date payment of the disability benefits commences, as determined by the Department of Labor, shall be refunded to that Department for credit to the Employees' Compensation Fund. Before the individual may receive the disability benefits, the individual shall—

"(A) refund to the Department of Labor the amount representing the commuted compensation payments for the extended period; or

"(B) authorize the deduction of the amount from the disability benefits.

Deductions from the disability benefits may be made from accrued or accruing payments. The amounts deducted and withheld from disability benefits shall be transmitted to the Department of Labor for reimbursement to the Employees' Compensation Fund. When the Department of Labor finds that the financial circumstances of an individual entitled to disability benefits under this subchapter warrant deferred refunding under this paragraph, deductions from the disability benefits may be prorated against and paid from accruing payments in such manner as the Department determines appropriate.

"§ 8449. Military reserve technicians

"(a)(1) Except as provided in paragraph (2) of this subsection, a participant shall be entitled to disability benefits under this subchapter in the same manner as an eligible participant described in section 8441(5)(B) of this title if the participant—

"(A) is separated from employment as a military reserve technician by reason of a disability that disqualifies the individual from membership in a reserve component of the Armed Forces specified in section 261(a) of title 10 or from holding the military grade required for such employment;

"(B) is not considered disabled;

"(C) is not appointed to another position in the Government (under subsection (b) of this section or otherwise); and

"(D) has not declined an offer of appointment to a position in the Government under subsection (b) of this section.

"(2) Payment of disability benefits to an individual under this section terminates—

"(A) on the date the individual is appointed to a position in the Government (under subsection (b) of this section or otherwise);

"(B) on the date the individual declines an offer of appointment to a position in the Government pursuant to subsection (b) of this section; or

"(C) as provided in section 8447(a) or 8447(b) of this title.

"(b) Any individual applying for or receiving disability benefits pursuant to this section shall, in accordance with regulations prescribed by the Office, be considered by any agency of the Government before any vacant position in the agency is filled if—

"(1) the position is located within the commuting area of the individual's former position;

"(2) the individual is qualified to serve in the vacant position; and

"(3) the position is at the same grade or equivalent level as the position from which the individual was separated.

"§ 8450. Administrative provisions

"(a) For the purpose of this section, the term 'State' means a State of the United States, the District of Columbia, the Commonwealth of Puerto Rico, and a territory or possession of the United States.

"(b)(1) In order to provide for the administration of benefits under this subchapter with maximum efficiency and convenience for individuals entitled to such benefits, the Office is authorized to contract with one or more insurance companies or other entities described in section 8441(1)(A) of this title which the Office determines is appropriately qualified to perform some or all of the functions described in paragraph (2) of this subsection (to the extent that the Office is not expressly required by this subchapter to perform any function). The authority under this paragraph shall be exercised in accordance with provisions of this subchapter and applicable regulations issued pursuant to section 8461(c) of this title.

"(2) The functions referred to in paragraph (1) of this subsection are as follows:

"(A) Receive disability applications and determine benefits entitlements based upon medical evidence and availability of alternative employment.

"(B) Compute the amount of a benefits entitlement.

"(C) Receive, disburse, and account for monies from the Federal Employees' Disability Insurance Fund.

"(D) Monitor individual cases for rehabilitation opportunities and determine recovery from disability or restoration to earning capacity.

"(E) Serve as a channel of communication of information relating to administration of this subchapter.

"(F) Otherwise assist, in such manner as a contract entered into under paragraph (1) of this subsection may provide, in discharging administrative duties necessary to carry out the provisions of this subchapter.

"(c) A contractor under a contract awarded under subsection (b) of this section shall establish an administrative office under a name approved by the Office.

"(d) Subject to subsection (e) of this section, each contract under this section shall be for a term not to exceed 5 years and may be automatically renewable, in the absence of notice by either party of intention to terminate at the end of the then current term, for successive terms of 1 year each.

"(e) The Office may terminate any such contract under this section at any time (after such reasonable notice and opportunity for hearing as the Office may prescribe in regulations) if the Office finds that the contractor has failed substantially to carry out the contract or is carrying out the contract

in a manner which is inconsistent with the efficient administration of this subchapter.

"(f) Each contract entered into under this section shall provide for advances of monies from the Federal Employees' Disability Insurance Fund to the contractor for purposes of paying disability benefits under this subchapter and the costs of administration, as determined by the Office to be necessary and proper for carrying out the functions covered by the contract.

"(g) The Director may include in contracts awarded under subsection (b) of this section such terms and conditions as he considers appropriate to protect the interests of participants and the United States.

"(h) All records established or maintained by an administrator of benefits in the administration of this subchapter shall be the property of the United States. The administrator of benefits shall deliver such records to the Office whenever requested by the Office.

"(i) The provisions of any contract under this subchapter which relate to the nature or extent of coverage or benefits (including payments with respect to benefits) shall supersede and preempt any law of any State or political subdivision thereof, or any regulation issued thereunder, which relates to group disability insurance to the extent that the law or regulation is inconsistent with the contractual provisions.

"(j) The Secretary of Health and Human Services shall furnish to the Office and an administrator of benefits such information relating to the administration of the Social Security Act, including information on individuals claiming entitlement to benefits under this subchapter, as the Office determines to be necessary to carry out this subchapter.

"§ 8451. Annual accounting; special contingency reserve

"(a) A contract awarded under section 8450 of this title shall include a provision requiring the administrator of benefits under the contract to transmit an accounting to the Office not later than 90 days after the end of each contract year. The accounting shall set forth, in a form approved by the Office—

"(1) the total amount of all monies advanced to the contracting entity from the Federal Employees' Disability Insurance Fund during the contract year;

"(2) the total of all benefit payments made during the contract year; and

"(3) the amounts of the authorized administrative expenses charged for the contract year.

"(b) Any excess of the amount described in subsection (a)(1) of this section over the sum of the amounts described in subsections (a)(2) and (a)(3) of this section for a contract year shall be credited to contract charges in the succeeding contract year or returned to the Federal Employees' Disability Insurance Fund upon termination of the contract, as the Office directs.

"§ 8452. Federal Employees' Disability Insurance Fund

"(a) There is established in the Treasury of the United States a fund to be known as the 'Federal Employees' Disability Insurance Fund'.

"(b)(1) In order to fund benefits and administrative expenses under this subchapter, each agency of the Government employing participants shall make periodic payments to the Federal Employees' Disability Insurance Fund equal to a percentage of the basic pay of such participants which the Office determines is appropriate. The Office shall base its determination of an appropriate percentage on the disability experience of participants employed by such agency.

"(2) An employing agency shall pay the amounts required by paragraph (1) of this subsection from the appropriation or fund available for payment of the basic pay or salaries of employees of the agency. In the case of a participant in the legislative branch who is paid by the Clerk of the House of Representatives, the amount shall be paid from the contingent fund of the House of Representatives.

"(c) Sums in the Federal Employees' Disability Insurance Fund shall be available without fiscal year limitation as the Office determines necessary to pay disability benefits and administrative expenses authorized by this subchapter.

"(d) The Secretary of the Treasury may invest and reinvest any of the money in the Federal Employees' Disability Insurance Fund in interest-bearing obligations of the United States and may sell such obligations for the purposes of such fund. The interest on and the proceeds from the sale of these obligations become a part of such fund.

"(e)(1) No tax, fee, or other monetary payment may be imposed or collected by any State or by any political subdivision or other governmental authority thereof on, or with respect to, any funds transferred to contractors under this subchapter for payment and administration of disability benefits under this subchapter.

"(2) Paragraph (1) of this subsection shall not be construed to exempt any administrator of benefits from the imposition, payment, or collection of a tax, fee, or other monetary payment on the net income or profit accruing to or realized by the administrator from business conducted under this subchapter, if that tax, fee, or payment is applicable to a broad range of business activity.

"SUBCHAPTER VI—GENERAL AND ADMINISTRATIVE PROVISIONS

"§ 8461. Authority of the Office of Personnel Management

"(a) The Office shall pay all benefits that are payable under this chapter from the Fund.

"(b) The Office shall administer all provisions of this chapter not specifically required to be administered by the Board, the Executive Director, or any other entity.

"(c) The Office may make regulations to carry out the provisions of this chapter administered by the Office.

"§ 8462. Cost-of-living adjustment in basic plan annuities, survivor annuities, and disability benefits

"(a) For the purpose of this section—

"(1) the term 'base quarter', when used with respect to a year, means the calendar quarter ending on September 30 of such year; and

"(2) the price index for a base quarter is the arithmetic mean of such index for the 3 months comprising such quarter.

"(b)(1) Except as provided in paragraph (2)(B) of this subsection and subsection (c) of this section, effective December 1 of each year in which the price index for the base quarter of such year exceeds the price index for the base quarter of the preceding year, each annuity which is payable from the Fund under subchapter II or IV of this chapter and commences not later than such December 1 shall be increased by the percentage computed under paragraph (2), (3), (4), (5), (6), or (7) of this subsection, as applicable. This subsection does not apply to an annuity or survivor annuity payable from the Thrift Savings Fund.

"(2)(A) Except in the case of an annuitant to whom paragraph (5) of this subsection applies, the annuity of an annuitant who is authorized to elect to make contributions under section 8418(c) of this title and (i) has not made such an election, or (ii) has received, pursuant to section 8420 of this title, a refund of contributions made under such section 8418(c) shall be increased as provided in this paragraph.

"(B) An annuity of an annuitant who is under 62 years of age on the effective date of an increase in annuities under paragraph (1) of this subsection shall not be increased under such paragraph.

"(C) The percentage by which an annuity is increased under paragraph (1) of this subsection in any year in the case of an annuitant who is at least 62 years of age and is under 67 years of age on the date referred to in subparagraph (B) of this paragraph shall be the excess, if any, of—

"(i) the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year, over

"(ii) 2 percent.

"(D) The percentage by which an annuity is increased under paragraph (1) of this subsection in any year in the case of an annuitant who is at least 67 years of age on the date referred to in subparagraph (B) of this paragraph shall be the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(3)(A) Except in the case of an annuitant to whom paragraph (5) of this subsection applies, the annuity of an annuitant who has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title shall be increased as provided in this paragraph.

"(B) The percentage by which an annuity is increased under paragraph (1) of this subsection in any year in the case of an annuitant who is under 62 years of age on the effective date of an increase in annuities under such paragraph shall be the excess, if any, of—

"(i) the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year, over

"(ii) 2 percent.

"(C) The percentage by which an annuity is increased under paragraph (1) of this subsection in any year in the case of an annuitant who is at least 62 years of age on the date referred to in subparagraph (B) of this paragraph shall be the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(4)(A) Except in the case of an annuitant to whom paragraph (5) of this subsection applies, the annuity which an annuitant is entitled to receive under section 8411(c) or 8411(d) of this title shall be increased as provided in this paragraph.

"(B) The percentage by which an annuity is increased under paragraph (1) of this subsection in any year in the case of an annuitant who is at least 55 years of age and is under 67 years of age on the effective date of an increase in annuities under paragraph (1) of this subsection shall be the excess, if any, of—

"(i) the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year, over

"(ii) 2 percent.

"(C) The percentage by which an annuity is increased under paragraph (1) of this subsection in any year in the case of an annuitant who is at least 67 years of age on the

date referred to in subparagraph (B) of this paragraph shall be the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(5)(A) The annuity of an annuitant who is entitled to an annuity under subchapter II of this chapter by reason of section 8442(b) of this title, was authorized to elect to make contributions under section 8418(c) of this title, did not make such an election, and is under 67 years of age on the effective date of an increase in annuities under paragraph (1) of this subsection shall be increased under such paragraph in any year by the percentage equal to the excess, if any, of—

"(i) the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year, over

"(ii) 2 percent.

"(B) The annuity of an annuitant who is entitled to an annuity under subchapter II of this chapter by reason of section 8442(b) of this title, has elected to make contributions under section 8418(c) of this title, and has not received a refund of such contributions under section 8420 of this title shall be increased under paragraph (1) of this subsection in any year by the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(6)(A) The survivor annuity of a survivor who is entitled to the survivor annuity under subchapter IV of this chapter based on the service of a deceased participant, former participant, or annuitant other than a deceased participant, former participant, or annuitant referred to in paragraph (7)(A) of this subsection shall be increased under paragraph (1) of this subsection as provided in this paragraph.

"(B) The percentage by which a survivor annuity is increased under paragraph (1) of this subsection in any year in the case of a survivor annuitant who is described in subparagraph (A) of this paragraph and is under 67 years of age on the effective date of the increase in annuities under such paragraph (1) in such year shall be the percentage equal to the excess, if any, of—

"(i) the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year, over

"(ii) 2 percent.

"(C) The percentage by which a survivor annuity is increased under paragraph (1) of this subsection in any year in the case of a survivor annuitant who is described in subparagraph (A) of this paragraph and is at least 67 years of age on the effective date of the increase in annuities under such paragraph (1) in such year shall be the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(7)(A) The survivor annuity of a survivor who is entitled to the survivor annuity under subchapter IV of this chapter based on the service of a deceased participant, former participant, or annuitant who has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title shall be increased under paragraph (1) of this subsection in any year by the percentage computed under subparagraph (B) of this paragraph.

"(B) The percentage by which a survivor annuity is increased under paragraph (1) of this subsection in any year in the case of a survivor annuitant described in subparagraph (A) of this paragraph shall be the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(c)(1) The first increase (if any) made under subsection (b) of this section to an annuity payable to a participant who retires, to the surviving spouse or surviving former spouse of a deceased participant, or to the surviving spouse or surviving former spouse of a deceased annuitant whose annuity has never been increased under this subsection or subsection (b) of this section shall be equal to the product (adjusted to the nearest one-tenth of 1 percent) of—

"(A) one-twelfth of the applicable percentage of the adjustment computed under subsection (b) of this section, multiplied by

"(B)(i) the number of months (counting any portion of a month as a month) for which the annuity was payable before the effective date of the increase, or

"(ii) in the case of a survivor annuity payable to a surviving spouse or surviving former spouse of a deceased annuitant whose annuity has never been so increased, the number of months (counting any portion of a month as a month) since the annuity was first payable to the deceased annuitant.

"(2) Effective on its commencing date, an annuity referred to in subsection (b) of this section and payable to an annuitant's surviving spouse or surviving former spouse shall be increased by the total percentage by which the deceased annuitant's annuity had been increased under such subsection during the period beginning on the date the deceased annuitant's annuity commenced and ending on the date of the deceased annuitant's death.

"(d)(1) Except as provided in paragraph (3) of this subsection and subsection (e) of this section, effective December 1 of each year in which the price index for the base quarter of such year exceeds the price index for the base quarter of the preceding year, the amount of each disability benefit which is payable under subchapter V of this chapter and commences not later than such December 1 shall be increased by the percentage computed under paragraph (2) or (3) of this subsection, as applicable.

"(2) The amount of the disability benefit of a participant who was authorized to elect to make contributions under section 8418(c) of this title and did not make such an election shall be increased under paragraph (1) of this subsection in any year by the percentage equal to the excess, if any, of—

"(A) the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year, over

"(B) 2 percent.

"(3) The amount of the disability benefit of a participant who has elected to make contributions under section 8418(c) of this title and has not received a refund of such contributions under section 8420 of this title shall be increased under paragraph (1) of this subsection in any year by the percentage of the increase in the price index for the base quarter of such year over the price index for the base quarter of the preceding year.

"(e) The first increase (if any) made under subsection (d) of this section in a disability benefit which is payable to a participant and has never been increased under this subsection or subsection (d) of this section shall be equal to the product (adjusted to the nearest one-tenth of 1 percent) of—

"(1) one-twelfth of the applicable percentage of the adjustment computed under subsection (d) of this section, multiplied by

"(2) the number of months (counting any portion of a month as a month) for which the disability benefit was payable before the effective date of the increase.

"(f) The monthly installment of an annuity or disability benefit payable after adjustment under this section shall be rounded to the next lowest dollar, but the increase in the monthly installment under this section shall be at least $1.

"§ 8463. Rate of benefits

"Each annuity and disability benefit is stated as an annual amount, one-twelfth of which, fixed at the next lowest dollar, constitutes the monthly rate payable on the first business day of the first month beginning after the last day of the month for which the annuity or disability benefit has accrued.

"§ 8464. Commencement and termination of annuities

"(a)(1) Except as otherwise provided in this chapter, the annuity of a participant under subchapter II of this chapter shall commence on the first day of the first month beginning after—

"(A) the date the participant separates from Government employment entitled to an immediate annuity under section 8411 of this title, or

"(B) in the case of a participant who is entitled to a deferred annuity under section 8412 of this title and is not entitled to an immediate annuity under section 8411 of this title, the date elected by the participant under section 8412(a) of this title or the date the participant becomes 62 years of age, whichever is earlier,

as the case may be.

"(2) The annuity of an annuitant under this chapter terminates on the date of death or other terminating event provided by law.

"(b)(1) Except as otherwise provided in this chapter, a survivor annuity payable to an individual under this chapter shall commence on the first day of the first month beginning after the date of the death of the deceased participant or former participant on whose death such annuity is based.

"(2) A survivor annuity payable to a surviving spouse or an eligible former spouse of a deceased participant or deceased former participant under this chapter terminates on the last day of the last month ending before the surviving spouse or former spouse dies or, if the surviving spouse or former spouse is less than 55 years of age, remarries.

"§ 8465. Waiver, allotment, and assignment of benefits

"(a) An individual entitled to receive payment of benefits under subchapter II of this chapter may decline to accept all or any part of the amount of the benefits by a waiver signed and filed with the Office. The waiver may be revoked in writing at any time. Payment of the benefits waived may not be made for the period during which the waiver is in effect.

"(b) An individual entitled to receive payment of benefits under subchapter II of this chapter may make allotments or assignments of amounts from the benefits for such purposes as the Office considers appropriate.

"§ 8466. Application for benefits

"(a) No payment of benefits based on the service of a former participant shall be made under this chapter unless an application for payment of the benefits is received

by the Office before the one hundred and fifteenth anniversary of the former participant's birth.

"(b) Notwithstanding subsection (a) of this section, after the death of a participant or former participant, a benefit based on the participant's or former participant's service shall not be paid under subchapter IV of this chapter unless an application therefor is received by the Office within 30 years after the death or other event which establishes the entitlement to the benefit.

"§ 8467. Court orders

"(a) Payments under this chapter which would otherwise be made to a participant or former participant based upon the service of the participant or former participant shall be paid (in whole or in part) by the Office or the Executive Director, as the case may be, to another person if and to the extent that the terms of any court decree of divorce, annulment, or legal separation, or the terms of any court order or court-approved property settlement agreement incident to any court decree of divorce, annulment, or legal separation expressly provide. Any payment under this paragraph to a person bars recovery by any other person.

"(b) Subsection (a) of this section shall apply only to payments made by the Office or the Executive Director under this chapter after the date on which the Office or the Executive Director, as the case may be, receives written notice of such decree, order, or agreement, and such additional information and documentation as the Office or the Executive Director may require.

"§ 8468. Annuities and pay on reemployment

"(a)(1) Except in the case of an annuitant who has made an election under subsection (b) of this section, if an annuitant becomes employed in an appointive or elective position in the Government, payment of any annuity under subchapter II of this chapter to the annuitant terminates effective on the date of the employment, and the annuitant's service on and after the date the annuitant becomes so employed is covered by this chapter. Upon termination of the employment, the rights of the annuitant under subchapter II of this chapter shall be redetermined. If the annuitant dies while still so employed, a survivor annuity payable with respect to the deceased annuitant shall be redetermined as if the employment had otherwise terminated on the date of death.

"(2) The amount of an annuity resulting from a redetermination of rights under this chapter pursuant to paragraph (1) of this subsection shall not be less than the amount of the terminated annuity plus any increases under section 8462 of this title occurring after the termination of the annuity and before the commencement of the redetermined annuity.

"(b)(1) Under regulations prescribed by the Office, subject to paragraph (2) of this subsection, an annuitant who becomes employed in an appointive or elective position in the Government on a part-time basis may elect to continue to receive an annuity under subchapter II of this chapter.

"(2) The sum of—

"(A) the amount of an annuity payable under subchapter II of this chapter to an annuitant making an election under paragraph (1) of this subsection, and

"(B) the annual rate of pay payable to the annuitant,

during the part-time employment referred to in such paragraph may not exceed the annual rate of pay which is payable for full-time employment in the position in which the annuitant is employed.

"§ 8469. Information

"(a) The Office shall make available to each individual who is required or eligible to be a participant such information as may be necessary to enable the individual to understand the rights and benefits, including options, which the individual has under the provisions of this chapter.

"(b) The Office shall include in the information made available under subsection (a) of this section a summary description of the Thrift Savings Plan including—

"(1) information similar to the information required to be included in a summary description plan for the purpose of the Employee Retirement Income Security Act of 1974, as provided in section 102 of such Act (29 U.S.C. 1022); and

"(2) a statement that an investment of a participant's funds in the Common Stock Index Investment Fund (as defined in section 8427(a)(1) of this title) is made at the risk of the participant, that the participant is not protected by the Federal Government against loss on such investment, and that a return on such investment is not guaranteed by the Federal Government.

"SUBCHAPTER VII—TRANSITION PROVISIONS

"§ 8471. Treatment of certain individuals subject to the Civil Service Retirement and Disability System

"(a)(1)(A) Any individual—

"(i) who is subject to subchapter III of chapter 83 of this title as an employee (as defined in section 8331(1) of this title, other than an individual employed by the government of the District of Columbia), whose employment by the Federal Government is not employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, and who is not required by section 8402 of this title to be a participant,

"(ii) who is subject to subchapter III of chapter 83 of this title as an employee (as defined in section 8331(1) of this title, other than an individual employed by the government of the District of Columbia), whose employment by the Federal Government before January 1, 1984, is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, and who is not required by section 8402 of this title to be a participant, or

"(iii) who is a Member of Congress (as defined in section 2106 of this title) and who is not required by section 8402 of this title to be a participant,

may elect to commence participation in the System.

"(B) An election made under subparagraph (A) of this paragraph shall be made in writing, in accordance with such regulations as the Office may prescribe, and not later than December 31, 1987, or, in the case of an individual who becomes an employee or Member after a break in service for a period that includes January 1, 1987, not later than 1 year after the date on which the individual resumes service.

"(2) Except as provided in section 8472(d) of this title, any individual who makes the election authorized by paragraph (1) of this subsection shall retain accrued credit for entitlement to benefits under subchapter III of chapter 83 of title 5, United States Code, for service performed while subject to such subchapter.

"(3) An individual referred to in paragraph (1) of this subsection who becomes an employee or Member after a break in service for a period that includes January 1, 1987, may make deposits under section 8334 of this title for service performed before such date while subject to subchapter III of chapter 83 of this title.

"(b) Except as provided in section 8472(d) of this title, any individual who—

"(1) has an unrefunded lump-sum credit in the Fund under subchapter III of chapter 83 of this title,

"(2) is required by section 8402 of this title to be a participant, and

"(3) is not a participant referred to in section 8473(a) of this title,

shall retain accrued credit for entitlement to benefits under such subchapter for service performed while subject to such subchapter.

"(c) Except as provided in section 8472(d) of this title, any individual who—

"(1) has received a refund of a lump-sum credit in the Fund under subchapter III of chapter 83 of this title,

"(2) is required by section 8402 of this title to be a participant, and

"(3) is not a participant referred to in section 8473(a) of this title,

may make deposits under section 8334 of this title for service performed before January 1, 1987, while subject to subchapter III of chapter 83 of this title and shall, upon making such deposits, be entitled to credit under such subchapter for service covered by the deposits.

"(d) Survivor benefits shall be payable as provided in subchapter III of chapter 83 of this title and this chapter to the extent of the service creditable under such subchapter (pursuant to this section) and this chapter in the case of a participant referred to in subsection (a), (b), or (c) of this section.

"§ 8472. Special rules for participants retaining entitlement in the Civil Service Retirement and Disability System

"(a) Service that is creditable under subchapter III of chapter 83 of this title in the case of an individual who elects to be a participant or who retains entitlement in the Civil Service Retirement and Disability System under section 8471 of this title shall be credited as service under this chapter only—

"(1) for the purposes of determining eligibility to retire entitled to an annuity under section 8411 or 8412 of this title and entitlement for disability benefits under subchapter V of this chapter;

"(2) for the purpose of considering such service as years of participation in the System for the purposes of section 8422 of this title (relating to vesting under the thrift savings plan); and

"(3) for the purpose of determining the percent to apply under the applicable formula prescribed in section 8413(a)(1) of this title with respect to service which is creditable for all purposes under this chapter.

"(b) Service performed as a participant in the System by an individual referred to in subsection (a) of this section shall be credited under subchapter III of chapter 83 of this title only for the purpose of determining eligibility to retire entitled to an annuity under section 8335, 8336, or 8338 of this title.

"(c)(1) The rates of basic pay in effect for an individual referred to in subsection (a) of this section on and after the date the individual begins to participate in the System shall be taken into account in computing the individual's average pay (as defined in section 8331(4) of this title) for the purposes of subchapter III of chapter 83 of this title.

"(2) The rates of basic pay in effect for an individual referred to in subsection (a) of this section before the date the individual begins to participate in the System shall be

taken into account in computing the individual's average pay for the purposes of this chapter.

"(d) Section 8337 of this title (relating to disability retirement) shall not apply in the case of a participant referred to in subsection (a).

"§ 8473. Participants subject to the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983

"(a)(1) The service of a participant with respect to which a reduced contribution is made under section 204(a) of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 Stat. 1107; 5 U.S.C. 8331 note) shall be credited as service for the purposes of this chapter and shall be considered years of participation in the System for the purposes of section 8422(b)(1) of this title.

"(2) Paragraph (1) of this subsection shall not apply to a Member of Congress (as defined in section 2106 of this title) or to an individual described in section 8471(a)(1)(A)(ii) of this title.

"(b)(1) On January 1, 1987, the amount computed under paragraph (2) of this subsection shall be transferred from the Fund to the Thrift Savings Fund in the case of a participant to whom subsection (a)(1) of this section applies. The amount transferred shall be credited to an account established for the individual pursuant to section 8428(a) of this title.

"(2)(A) The amount transferred from the Fund in the case of a participant pursuant to paragraph (1) of this subsection shall be equal to the sum of—

"(i) two times the total amount deducted and withheld from the basic pay of the participant pursuant to section 204(a) of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 Stat. 1107; 5 U.S.C. 8331 note); and

"(ii) interest on the amount referred to in clause (i) of this subparagraph computed at the annual rate determined under the second sentence of this subparagraph and compounded annually, as if a fraction of such amount (determined as provided in subparagraph (B) of this paragraph) had been deposited to the credit of the Fund at the end of each month for which amounts were deducted and withheld from the basic pay of the participant as described in clause (i) of this subparagraph.

The annual rate referred to in clause (ii) for an amount transferred from the Fund in any calendar year shall be equal to the interest rate determined for such calendar year under section 8334(e) of this title.

"(B) In the case of any participant to whom paragraph (1) of this subsection applies—

"(i) the numerator of the fraction referred to in subparagraph (A)(ii) of this paragraph is one; and

"(ii) the denominator of the fraction is the number of months for which amounts were deducted and withheld from the basic pay of the participant as described in subparagraph (A)(i) of this paragraph.

"(3) For the purposes of section 8422 of this title—

"(A) one-half of the amount computed in the case of a participant referred to in subsection (a) of this section pursuant to paragraph (2) of this subsection shall be treated as a contribution made under section 8421(a) of this title; and

"(B) one-half of such amount shall be treated as a contribution made by the employing agency of the participant pursuant to section 8421(b) of this title.

"(4) All amounts transferred from the Fund pursuant to paragraph (1) of this subsection shall be invested in the Government Securities Investment Fund established under section 8427(b)(1)(A) of this title.

"(c) The total amount of any deposit made to the Fund under section 8334(j) of this title (relating to deposits covering periods of military service) in the case of a participant referred to in subsection (a)(1) of this section shall be refunded to the participant. The refund shall be paid out of sums in the Fund.

"§ 8474. Reemployed annuitants under a Government retirement system.

"(a) For the purposes of this section—

"(1) the term 'annuitant'—

"(A) in the case of the Civil Service Retirement and Disability System, shall have the same meaning provided in section 8331(9) of this title;

"(B) in the case of the Foreign Service Retirement and Disability System, shall have the same meaning provided in section 804(1) of the Foreign Service Act of 1980 (22 U.S.C. 4044(1)), except that such term does not include a survivor; and

"(C) in the case of the Central Intelligence Agency Retirement and Disability System, means—

"(i) any participant who is referred to in section 203 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees, and

"(ii) any individual who formerly was such a participant,

entitled to an annuity from the Central Intelligence Agency Retirement and Disability Fund;

"(2) the term 'Government retirement system' means—

"(A) the Civil Service Retirement and Disability System under subchapter III of chapter 83 of this title;

"(B) the Foreign Service Retirement and Disability System under chapter 8 of the Foreign Service Act of 1980 (22 U.S.C. 4041 et seq.); and

"(C) the Central Intelligence Agency Retirement and Disability System under the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note); and

"(3) the term 'reemployed annuitant' means an annuitant who becomes employed by the Government after the effective date of the Federal Retirement Reform Act of 1985 and is required by section 8402 of this title to be a participant.

"(b) A reemployed annuitant shall retain entitlement in the Government retirement system under which the annuitant was receiving an annuity.

"(c)(1) Service that is creditable under the Government retirement system of a reemployed annuitant shall be credited under this chapter only for the purpose of determining eligibility to retire entitled to an annuity under section 8411 of this title.

"(2) Service performed as a reemployed annuitant shall not be creditable service for the purposes of the Government retirement system of the reemployed annuitant.

"(d)(1) The rates of basic pay in effect for a reemployed annuitant on and after the date the annuitant begins to participate in the System shall be taken into account in computing the annuitant's average pay for the purposes of the Government retirement system under which the annuitant was receiving an annuity when the reemployment commenced.

"(2) The rates of basic pay in effect for a reemployed annuitant before the date the annuitant begins to participate in the System shall be taken into account in computing the annuitant's average pay for the purposes of this chapter.

"§ 8475. Exemption from certain offset provisions of the Social Security Act

"Sections 202(b)(4), 202(c)(2), 202(e)(7), 202(f)(2), 202(g)(4), and 215(a)(7) of the Social Security Act shall not apply in the case of a person who is a participant referred to in section 8471 of this title and who has completed 5 years of service.

"§ 8476. Regulations

"The Office may prescribe regulations to carry out this subchapter.

"SUBCHAPTER VIII—FEDERAL RETIREMENT THRIFT INVESTMENT MANAGEMENT SYSTEM

"§ 8491. Federal Retirement Thrift Investment Board

"(a) There is established in the executive branch of the Government a Federal Retirement Thrift Investment Board.

"(b)(1) The Board shall be composed of—

"(A) the Chairman of the Federal Reserve Board;

"(B) the Secretary of the Treasury;

"(C) the Director; and

"(D) two representatives of Federal employee organizations appointed by the President, one of whom shall be a representative from a labor organization (as defined in section 7103(a)(4) of this title) and one of whom shall be a representative from an organization for employees who are managers.

"(2) If an office referred to in paragraph (1)(A), (1)(B), or (1)(C) of this subsection is vacant, the person acting as the officer in such office shall be a member of the Board while acting as such officer.

"(3) The Chairman of the Federal Reserve Board shall be the Chairman of the Board.

"(4) The members of the Board appointed under paragraph (1)(D) of this subsection shall serve until replaced by the President.

"(c) The Board shall—

"(1) establish policies for—

"(A) the investment and management of the Thrift Savings Fund; and

"(B) the administration of subchapter III of this chapter and the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund;

"(2) review the performance of investments made for the Thrift Savings Fund;

"(3) without regard to civil service and classification laws, fix the rate of pay of the Executive Director;

"(4) supervise the Executive Director; and

"(5) review and approve the budget of the Board.

"(d)(1) The Board may—

"(A) adopt, alter, and use a seal;

"(B) except as provided in paragraph (2) of this subsection, direct the Executive Director to take such action as the Board considers appropriate to carry out the provisions of this subchapter and subchapter III of this chapter, the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund, and the policies of the Board;

"(C) upon the concurring votes of four members, remove the Executive Director from office for good cause shown after investigation by the Comptroller General of the United States and after considering any recommendations made by the Comptroller General with respect to the removal; and

"(D) take such other action as may be necessary to carry out the functions of the Board.

"(2) Except in the case of investments required by section 8427 of this title to be invested in securities of the Government, the Board may not direct the Executive Director or any contractor under a contract awarded under section 8494(c)(3) this title to invest or to cause to be invested any sums in the Thrift Savings Fund in a specific asset or to dispose of or cause to be disposed any specific asset of such Fund.

"(e) The members of the Board shall discharge their responsibilities solely in the interest of participants and beneficiaries under this chapter.

"§ 8492. Federal Retirement Thrift Advisory Committee

"(a)(1) The Board shall establish a Federal Retirement Thrift Advisory Committee (hereafter in this section referred to as the 'Advisory Committee').

"(2)(A) The Advisory Committee shall be composed of 6 members appointed as provided in subparagraph (B) of this paragraph.

"(B) The members of the Advisory Committee shall be appointed by action agreed to by a majority of the members the Board. Three of the members of the Advisory Committee shall be appointed from among investment asset managers not employed by the Government and three of the members of the Advisory Committee shall be appointed from among administrators of thrift savings plans established for employees of private sector enterprises.

"(3) The Board shall prescribe the terms and conditions of service of the members of the Advisory Committee.

"(b) The Advisory Committee shall—

"(1) advise the Board and the Executive Director on matters relating to—

"(A)(i) investment policy for the Thrift Savings Fund;

"(ii) selection of the types of investment funds which are appropriate for investment of sums in the Thrift Savings Fund; and

"(iii) selection of investment managers for the purpose of contracting for the administration of investment funds under section 8494(c)(2) of this title; and

"(B)(i) the performance of the duties of the Board and the Executive Director under the provisions of this subchapter and subchapter III of this chapter and the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund; and

"(ii) the administration of such provisions; and

"(2) review the performance of investments made for the Thrift Savings Fund.

"§ 8493. Employee Advisory Committee

"(a) The Board shall establish an Employee Advisory Committee. The Employee Advisory Committee shall be composed of 5 members, elected in accordance with subsection (b) of this section, each of whom is a participant and has an account balance in the Thrift Savings Fund.

"(b)(1) For the purposes of this subsection, the term 'voting participant' means a participant who has an account balance in the Thrift Savings Fund.

"(2) The members of the Employee Advisory Committee shall be elected by majority vote of the voting participants that vote in accordance with this subsection and the regulations prescribed by the Executive Director.

"(3) Each voting participant shall have one vote for each vacancy on the Employee Advisory Committee. For each election, a voting participant shall be entitled to cast only one vote for an individual nominee.

"(4) Nominations for the election of members to the Employee Advisory Committee shall be solicited from voting participants. Each nominee shall have the opportunity, in accordance with the regulations prescribed by the Executive Director, to submit a brief statement to voting participants in connection with the election.

"(5) Run-off elections shall be held in accordance with the regulations prescribed by the Executive Director.

"(6) Each member of the Employee Advisory Committee shall serve for a term of 2 years, except that, in accordance with regulations prescribed by the Executive Director, 3 of the first 5 members shall serve for a term of 3 years. In the event that a member, for any reason, fails to complete his or her term, an election will be held, in accordance with regulations prescribed by the Executive Director, to fill that vacancy for the remainder of the member's term.

"(c) The Employee Advisory Committee shall act by resolution of a majority of the members.

"(d) The Employee Advisory Committee shall—

"(1) advise the Board and the Executive Director on matters relating to—

"(A) investment policies for the Thrift Savings Fund, and

"(B) selection of the types of investment funds that are appropriate for investment of sums in the Thrift Savings Fund;

"(2) advise the Executive Director regarding exclusion of stocks from the Common Stock Index Investment Fund for the purposes of section 8427(b)(2)(C) of this title;

"(3) exercise all rights as shareholders with respect to stocks purchased for investments of the Common Stock Index Investment Fund; and

"(4) perform such other duties, as the Board may direct, with respect to investment funds established in accordance with section 8427(b)(1)(D) of this title.

"§ 8494. Executive Director

"(a)(1) The Board shall appoint an Executive Director by action agreed to by a majority of the members of the Board. The Executive Director shall have substantial experience, training, or expertise in the management of financial investments.

"(2) The Board shall prescribe the terms and conditions of service of the Executive Director.

"(b) The Executive Director shall—

"(1) carry out the policies established by the Board;

"(2) invest and manage the Thrift Savings Fund in accordance with the investment and other policies established by the Board;

"(3) provide for payment of annuities and other authorized distributions from the Thrift Savings Fund under this chapter, by the Office or otherwise; and

"(4) administer the provisions of this subchapter and subchapter III of this chapter and the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund.

"(c) The Executive Director, may—

"(1) prescribe regulations to carry out the responsibilities of the Executive Director under this section, other than regulations relating to fiduciary responsibilities;

"(2) without regard to civil service and classification laws, appoint, employ, and fix the compensation of such personnel as may be necessary to carry out the provisions of this subchapter and subchapter III of this chapter and the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund;

"(3) enter into such contracts or other arrangements (including contracts for the performance of administrative services), and make such modifications thereof, as may be appropriate to carry out the provisions of this subchapter and section 8427 of this title and the policies of the Board;

"(4) except as provided in section 552a of this title, obtain from any Federal agency, including any independent establishment or instrumentality of the United States, advice, information, estimates, statistics, and such other assistance as the Executive Director considers necessary to carry out the provisions of this subchapter and subchapter III of this chapter, the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund, and the policies of the Board;

"(5) make such payments out of sums in the Thrift Savings Fund as the Executive Director determines are necessary to carry out the provisions of this subchapter, subchapter III of this chapter, the provisions of subchapter IV of this chapter which relate to survivor annuities payable out of the Thrift Savings Fund, and the policies of the Board;

"(6) pay the compensation, per diem, and travel expenses of personnel from the Thrift Savings Fund;

"(7) accept and utilize the services of individuals employed intermittently in the Government service and reimburse such individuals for travel expenses, as authorized by section 5703 of this title, including per diem as authorized by section 5702 of this title;

"(8) except as otherwise expressly prohibited by law or the policies of the Board, delegate any of the Executive Director's functions to such officers and employees under the Board as the Executive Director may designate and authorize such successive redelegations of such functions to such officers and employees under the Board as the Executive Director may consider to be necessary or appropriate; and

"(9) take such other actions as are appropriate to carry out the functions of the Executive Director.

"§ 8495. Investment policy

"The Board shall develop investment policies under section 8491(c)(1) of this title which provide for—

"(1) prudent investments suitable for accumulating funds for payment of retirement income;

"(2) low administrative costs; and

"(3) investments likely to receive broad acceptance by participants and the public, taking into consideration the views of the Employee Advisory Committee.

"§ 8496. Administrative provisions

"(a) The Board shall meet—

"(1) not less than once during each fiscal year; and

"(2) at additional times at the call of the Chairman.

"(b)(1) Except as provided in section 8491(d)(1)(C) of this title, the Board shall perform the functions and exercise the powers of the Board on a majority vote of a quorum of the Board.

"(2) A vacancy on the Board shall not impair the authority of a quorum of the Board to perform the functions and exercise the powers of the Board.

"(c) Three members of the Board shall constitute a quorum for the transaction of business.

"(d)(1) Each member of the Board who is not an officer or employee of the Federal Government, each member of the Employee Advisory Committee who is not an employee or Member, and each member of the Federal Retirement Thrift Advisory Committee shall

be compensated at the daily rate of basic pay payable for grade GS-18 under the General Schedule for each day or part thereof during which such member is engaged in performing a function of the Board or the Federal Retirement Thrift Advisory Committee, as the case may be.

"(2) A member of the Board, the Federal Retirement Thrift Advisory Committee, or the Employee Advisory Committee shall be paid travel, per diem, and other necessary expenses under subchapter I of chapter 57 of this title while traveling away from his home or regular place of business in the performance of the duties of the Board, the Federal Retirement Thrift Advisory Committee, or the Employee Advisory Committee, as the case may be.

"(e) The accrued annual leave of any employee who is a member of the Board or the Employee Advisory Committee shall not be charged for any time used in performing service for the Board or such committee during any work period.

"(f) Section 14(a)(2) of the Federal Advisory Committee Act (86 Stat. 776; 5 U.S.C. App.) shall not apply to the Federal Retirement Thrift Advisory Committee or the Employee Advisory Committee.

"§ 8497. Fiduciary responsibilities; liability and penalty

"(a) For the purposes of this section—

"(1) the term 'fiduciary' means—

"(A) each member of the Federal Retirement Thrift Advisory Committee and the Executive Director;

"(B) any person who has or exercises discretionary authority or discretionary control over the management or disposition of the assets of the Thrift Savings Fund;

"(C) each member of the Employee Advisory Committee with respect to the member's duties in connection with the Common Stock Index Investment Fund, except with respect to the performance of the function referred to in section 8427(b)(2)(C) of this title; and

"(D) any person who, with respect to the Thrift Savings Fund, is described in section 3(21)(A) of the Employee Retirement Income Security Act of 1974 (29 U.S.C. 1002(21)(A)); except that, such term does not include the members of the Board;

"(2) the term 'party in interest' includes—

"(A) any fiduciary;

"(B) any counsel to a person who is a fiduciary, with respect to the actions of such person as a fiduciary;

"(C) any participant;

"(D) any person providing services to the Board and any person providing services to the Executive Director, with respect to the actions of the Executive Director as a fiduciary;

"(E) a labor organization the members of which are participants;

"(F) a spouse, sibling, ancestor, lineal descendant, or spouse of a lineal descendant of a person described in subclause (A), (B), or (D) of this clause;

"(G) a corporation, partnership, or trust or estate of which, or in which, 50 percent or more of—

"(i) the combined voting power of all classes of stock entitled to vote or the total value of shares of all classes of stock of such corporation;

"(ii) the capital interest or profits interest of such partnership; or

"(iii) the beneficial interest of such trust or estate,

is owned directly or indirectly, or held by a person described in subclause (A), (B), (D), or (E) of this clause;

"(H) an employee, officer, director, or an individual having powers or responsibilities similar to those of an officer and director, or a holder (directly or indirectly) of 10 percent or more of the shares of a corporation referred to in subclause (G) of this clause; and

"(I) an employee, officer, director, or an individual having powers or responsibilities similar to those of an officer and director, or a person who, directly or indirectly, is at least a 10 percent partner or joint venturer (measured in capital or profits) in a person described in subclause (A), (B), (D), (E), or (G) of this clause;

"(3) the term 'person' means an individual, partnership, joint venture, corporation, mutual company, joint-stock company, trust, estate, unincorporated organization, association, or labor organization; and

"(4) the term 'adequate consideration' means—

"(A) in the case of a security for which there is a generally recognized market—

"(i) the price of the security prevailing on a national securities exchange which is registered under section 6 of the Securities Exchange Act of 1934; or

"(ii) if the security is not traded on such a national securities exchange, a price not less favorable to the Thrift Savings Fund than the offering price for the security as established by the current bid and asked prices quoted by persons independent of the issuer and of any party in interest; and

"(B) in the case of an asset other than a security for which there is a generally recognized market, the fair market value of the asset as determined in good faith by the fiduciary or fiduciaries in accordance with regulations prescribed by the Secretary of Labor.

"(b)(1) To the extent not inconsistent with the provisions of this chapter and the policies prescribed by the Board, a fiduciary shall discharge his responsibilities with respect to the Thrift Savings Fund or applicable portion thereof solely in the interest of the participants and beneficiaries and—

"(A) for the exclusive purpose of—

"(i) providing benefits to participants and their beneficiaries; and

"(ii) defraying reasonable expenses of administering the Thrift Savings Fund or applicable portions thereof;

"(B) with the care, skill, prudence, and diligence under the circumstances then prevailing that a prudent individual acting in a like capacity and familiar with such matters would use in the conduct of an enterprise of a like character and with like objectives; and

"(C) to the extent permitted by section 8427 of this title, by diversifying the investments of the Thrift Savings Fund or applicable portions thereof so as to minimize the risk of large losses, unless under the circumstances it is clearly prudent not to do so.

"(2) No fiduciary may maintain the indicia of ownership of any assets of the Thrift Savings Fund outside the jurisdiction of the district courts of the United States.

"(c)(1) A fiduciary shall not permit the Thrift Savings Fund to engage in any of the following transactions, except in exchange for adequate consideration:

"(A) A transfer of any assets of the Thrift Savings Fund to any person the fiduciary knows or should know to be a party in interest or the use of such assets by any such person.

"(B) An acquisition of any property from or sale of any property to the Thrift Savings Fund by any person the fiduciary knows or should know to be a party in interest.

"(C) A transfer or exchange of services between the Thrift Savings Fund and any person the fiduciary knows or should know to be a party in interest.

"(2) Notwithstanding paragraph (1) of this subsection, a fiduciary with respect to the Thrift Savings Fund shall not—

"(A) deal with any assets of the Thrift Savings Fund in his own interest or for his own account;

"(B) act, in an individual capacity or any other capacity, in any transaction involving the Thrift Savings Fund on behalf of a party, or representing a party, whose interests are adverse to the interests of the Thrift Savings Fund or the interests of its participants or beneficiaries;

"(C) receive any consideration for his own personal account from any party dealing with sums credited to the Thrift Savings Fund in connection with a transaction involving assets of the Thrift Savings Fund.

"(d) This section does not prohibit any fiduciary from—

"(1) receiving any benefit which the fiduciary is entitled to receive under this chapter as a participant, a former participant, or a beneficiary of a participant or former participant;

"(2) receiving any reasonable compensation authorized by this title for services rendered, or for reimbursement of expenses properly and actually incurred, in the performance of the fiduciary's duties under this chapter; or

"(3) serving as a fiduciary in addition to being an officer, employee, agent, or other representative of a party in interest.

"(e)(1)(A) Any fiduciary that breaches the responsibilities, duties, and obligations set out in subsection (b) of this section or violates subsection (c) of this section shall be liable to the Thrift Savings Fund for any losses to such fund resulting from each such breach or violation and to restore to such fund any profits made by the fiduciary through use of assets of such fund by the fiduciary, and shall be subject to such other equitable or remedial relief as a court considers appropriate. A fiduciary may be removed for a breach referred to in the preceding sentence.

"(B) The Secretary of Labor may assess a civil penalty against a party in interest with respect to each transaction which is engaged in by the party in interest and is prohibited by subsection (c) of this section. The amount of such penalty shall be equal to 5 percent of the amount involved in each such transaction (as defined in section 4975(f)(4) of the Internal Revenue Code of 1954) for each year or part thereof during which the prohibited transaction continues; except that, if the transaction is not corrected (in such manner as the Secretary of Labor shall prescribe by regulation consistent with section 4975(f)(5) of the Internal Revenue Code of 1954) within 90 days after the date the Secretary of Labor transmits notice to the party in interest (or such longer period as the Secretary of Labor may permit), such penalty may be in an amount not more than 100 percent of the amount involved.

"(C) A fiduciary shall not be liable under subparagraph (A) of this paragraph with respect to a breach of fiduciary duty under subsection (b) of this section committed before becoming a fiduciary or after ceasing to be a fiduciary.

"(D) A fiduciary shall be jointly and severally liable under subparagraph (A) of this paragraph for a breach of fiduciary duty under subsection (b) of this section by another fiduciary if—

"(i) the fiduciary participates knowingly in, or knowingly undertakes to conceal, an act or omission of such other fiduciary, knowing such act or omission is such a breach;

"(ii) by the fiduciary's failure to comply with subsection (b) of this section in the administration of the fiduciary's specific responsibilities which give rise to the fiduciary status, the fiduciary has enabled such other fiduciary to commit such a breach; or

"(iii) the fiduciary has knowledge of a breach by such other fiduciary, unless the fiduciary makes reasonable efforts under the circumstances to remedy the breach.

"(E) The Secretary of Labor shall prescribe, in regulations, procedures for allocating fiduciary responsibilities among fiduciaries, including investment managers. Any fiduciary who, pursuant to such procedures, allocates to a person or persons any fiduciary responsibility shall not be liable for an act or omission of such person or persons unless—

"(i) such fiduciary violated subsection (b) of this section with respect to the allocation, with respect to the implementation of the procedures prescribed by the Board, or in continuing such allocation; or

"(ii) such fiduciary would otherwise be liable in accordance with subparagraph (D) of this paragraph.

"(2) A civil action may be brought in the district courts of the United States—

"(A) by the Secretary of Labor—

"(i) to determine and enforce a liability under paragraph (1)(A) of this subsection;

"(ii) to collect any civil penalty under paragraph (1)(B) of this subsection; or

"(iii) to enjoin any act or practice which violates subsection (d)(2) or (e) of section 8491 of this title;

"(B) by the Secretary of Labor, any participant, annuitant, former participant who is entitled to a deferred annuity under section 8412 of this title, other beneficiary, or fiduciary—

"(i) to enjoin any act or practice which violates any provision of subsection (b) or (c) of this section; or

"(ii) to obtain any other appropriate equitable relief to redress a violation of any such provision; or

"(C) by any participant, annuitant, former participant entitled to a deferred annuity under section 8412 of this title, or other beneficiary to recover benefits due to him or her under the provisions of this chapter, to enforce his or her rights under such provisions, or to clarify his or her rights to future benefits under such provisions.

"(3) An action may not be commenced under paragraph (2) of this subsection with respect to a fiduciary's breach of any responsibility, duty, or obligation under subsection (b) of this section or a violation of subsection (c) of this section after the earlier of—

"(A) 6 years after (i) the date of the last action which constituted a part of the breach or violation, or (ii) in the case of an omission, the latest date on which the fiduciary could have cured the breach or violation; or

"(B) 3 years after the earliest date on which the plaintiff had actual knowledge of the breach or violation; except that, in the case of fraud or concealment, such action may be commenced not later than 6 years after the date of discovery of such breach or violation.

"(4)(A) Except for actions under paragraph (2)(C) of this subsection, the district courts of the United States shall have exclusive jurisdiction of civil actions under this subsection. State courts of competent jurisdiction and district courts of the United States shall have concurrent jurisdiction of actions under paragraph (2)(C) of this subsection.

"(B) An action under this subsection may be brought in the District Court of the United States for the District of Columbia or a district court of the United States in the district where the breach alleged in the complaint or petition filed in the action took place or in the district where a defendant resides or may be found. Process may be served in any other district where a defendant resides or may be found.

"(5)(A) A copy of the complaint or petition filed in any action brought under this subsection (other than by the Secretary of Labor) shall be served on the Director, the Executive Director, the Secretary of Labor, and the Secretary of the Treasury by certified mail.

"(B) Any officer referred to in subparagraph (A) of this paragraph shall have the right in his discretion to intervene in any action. If the Secretary of Labor brings an action under paragraph (2) of this subsection on behalf of a participant or beneficiary, he shall notify the Director, the Executive Director, and the Secretary of the Treasury.

"(f) The Secretary of Labor may prescribe regulations to carry out this section, and may prescribe regulations exempting a person or class of persons from the requirements of this section.

"(g) The Secretary of Labor, in consultation with the Comptroller General of the United States, shall establish a program to carry out regular audits to determine the level of compliance with the requirements of this section relating to fiduciary responsibilities and prohibited activities of fiduciaries.

"§ 8498. Bonding

"(a)(1) Except as provided in paragraph (2) of this subsection, each fiduciary and each person who handles funds or property of the Thrift Savings Fund shall be bonded as provided in this section.

"(2)(A) Bond shall not be required of a fiduciary (or of any director, officer, or employee of such fiduciary) if such fiduciary—

"(i) is a corporation organized and doing business under the laws of the United States or of any State;

"(ii) is authorized under such laws to exercise trust powers or to conduct an insurance business;

"(iii) is subject to supervision or examination by Federal or State authority; and

"(iv) has at all times a combined capital and surplus in excess of such minimum amount (not less than $1,000,000) as the Secretary of Labor prescribes in regulations.

"(B) If—

"(i) a bank or other financial institution would, but for this subparagraph, not be required to be bonded under this section by reason of the application of the exception provided in subparagraph (A) of this paragraph,

"(ii) the bank or financial institution is authorized to exercise trust powers, and

"(iii) the deposits of the bank or financial institution are not insured by the Federal Deposit Insurance Corporation or the Federal Savings and Loan Insurance Corporation,

such exception shall apply to such bank or financial institution only if the bank or institution meets bonding requirements under State law which the Secretary of Labor determines are at least equivalent to those imposed on banks by Federal law.

"(b)(1) The Secretary of Labor shall prescribe the amount of a bond under this section at the beginning of each fiscal year. Except as otherwise provided in this paragraph, such amount shall not be less than 10 per centum of the amount of funds handled. In no case shall such bond be less than $1,000 nor more than $500,000, except that the Secretary of Labor, after due notice and opportunity for hearing to all interested parties, and other consideration of the record, may prescribe an amount in excess of $500,000.

"(2) For the purpose of prescribing the amount of a bond under paragraph (1) of this subsection, the amount of funds handled shall be determined by reference to the amount of the funds handled by the person, group, or class to be covered by such bond or by their predecessor or predecessors, if any, during the preceding fiscal year, or to the amount of funds to be handled during the current fiscal year by such person, group, or class, estimated as provided in regulations prescribed by the Secretary of Labor.

"(c) A bond required by subsection (a) of this section—

"(1) shall include such terms and conditions as the Secretary of Labor considers necessary to protect the Thrift Savings Fund against loss by reason of acts of fraud or dishonesty on the part of the bonded person directly or through connivance with others;

"(2) shall have as surety thereon a corporate surety company which is an acceptable surety on Federal bonds under authority granted by the Secretary of the Treasury pursuant to sections 6 through 13 of title 6, United States Code; and

"(3) shall be in a form or of a type approved by the Secretary of Labor, including individual bonds or schedule or blanket forms of bonds which cover a group or class.

"(d)(1) It shall be unlawful for any person to whom subsection (a) of this section applies, to receive, handle, disburse, or otherwise exercise custody or control of any of the funds or other property of the Thrift Savings Fund without being bonded as required by this section.

"(2) It shall be unlawful for any fiduciary, or any other person having authority to direct the performance of functions described in paragraph (1) of this subsection, to permit any such function to be performed by any person to whom subsection (a) of this section applies unless such person has met the requirements of such subsection.

"(e) Notwithstanding any other provision of law, any person who is required to be bonded as provided in subsection (a) of this section shall be exempt from any other provision of law which would, but for this subsection, require such person to be bonded for the handling of the funds or other property of the Thrift Savings Fund.

"(f) The Secretary of Labor shall prescribe regulations to carry out the provisions of this section and may prescribe regulations exempting a person or class of persons from the requirements of this section.

"§ 8499. Exculpatory provisions; insurance

"(a) Any provision in an agreement or instrument which purports to relieve a fiduciary from responsibility or liability for any responsibility, obligation, or duty under this subchapter shall be void.

"(b)(1) The Executive Director may require employing agencies to contribute an amount not to exceed 1 percent of the

amount such agencies are required to contribute in accordance with section 8421(b) of this title to the Thrift Savings Fund.

"(2) The sums credited to the Thrift Savings Fund under paragraph (1) of this subsection shall be available and may be used at the discretion of the Executive Director to purchase insurance to cover potential liability of persons who serve in a fiduciary capacity with respect to the Thrift Savings Fund, without regard to whether a policy of insurance permits recourse by the insurer against the fiduciary in the case of a breach of a fiduciary obligation.".

(b) The table of chapters at the beginning of part III of such title is amended by inserting after the item relating to chapter 83 the following new item:

"84. Federal Retirement System ..... 8401.".

TITLE II—AMENDMENTS RELATING TO SOCIAL SECURITY

AMENDMENTS TO THE SOCIAL SECURITY ACT

SEC. 201. Section 210(a)(5) of the Social Security Act is amended—

(1) by striking out "or" at the end of subparagraph (F);

(2) by striking out the semicolon at the end of subparagraph (G) and inserting in lieu thereof ", or"; and

(3) by adding at the end thereof the following new subparagraph:

"(H) service performed by an individual after such individual has commenced participation in the Federal Retirement System pursuant to section 8471 of title 5, United States Code;".

AMENDMENTS TO THE INTERNAL REVENUE CODE OF 1954

SEC. 202. Section 3121(b)(5) of the Internal Revenue Code of 1954 is amended—

(1) by striking out "or" at the end of subparagraph (F);

(2) by striking out the semicolon at the end of subparagraph (G) and inserting in lieu thereof ", or"; and

(3) by adding at the end thereof the following new subparagraph:

"(H) service performed by an individual after such individual has commenced participation in the Federal Retirement System pursuant to section 8471 of title 5, United States Code;".

TITLE III—MISCELLANEOUS AND CONFORMING AMENDMENTS

EXTENSION OF FEDERAL EMPLOYEES' RETIREMENT CONTRIBUTION TEMPORARY ADJUSTMENT ACT OF 1983

SEC. 301. (a) Sections 202(1), 202(6), 203(a)(4)(A), 203(a)(4)(B), 204(a), 206(b)(2)(A)(i), and 206(c)(3) of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 Stat. 1106; 5 U.S.C. 8331 note) are amended by striking out "January 1, 1986" each place it appears and inserting in lieu thereof "January 1, 1987".

(b) Section 205 of such Act is amended by striking out "and 1986" in subsections (b) and (c) and inserting in lieu thereof "1986, and 1987".

MISCELLANEOUS AMENDMENTS TO CHAPTER 83 OF TITLE 5, UNITED STATES CODE

SEC. 302. (a) Section 8331(1)(G) of title 5, United States Code, is amended to read as follows:

"(G) an individual first employed by the government of the District of Columbia before January 1, 1987;".

(b) Section 8332 of such title is amended by adding at the end thereof the following new subsection:

"(n) Except as provided in section 8472(b) of this title, service performed while a participant in the Federal Retirement System under chapter 84 of this title is not creditable under this section.".

(c)(1) The first sentence of section 8333(b) of such title is amended by inserting "or chapter 84 of this title" after "subject to this subchapter".

(2) Section 8333(c) of such title is amended by adding at the end thereof the following new sentence: "The requirements of the first sentence shall apply only with respect to the civilian service performed by a Member while not a participant in the Federal Retirement System under chapter 84 of this title.".

(d) Subsection (a) of section 8334 of such title is amended—

(1) in the first sentence of paragraph (1), by striking out "The employing" and inserting in lieu thereof "Except as provided in paragraph (3) of this subsection, the employing"; and

(2) by adding at the end thereof the following new paragraph:

"(3)(A) In the case of an employee or Member who was subject to this subchapter before January 1, 1984, and whose service—

"(i) is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954; and

"(ii) is not creditable service for any purpose under chapter 84 of this title,

an employing agency shall deduct and withhold from the basic pay of the employee or Member under paragraph (1) of this subsection during any pay period only the amount computed pursuant to subparagraph (B) of this paragraph.

"(B) The amount deducted and withheld from basic pay during any pay period pursuant to subparagraph (A) of this paragraph in the case of an employee or Member referred to in such subparagraph shall be the excess of—

"(i) the amount determined by multiplying the percent applicable to the employee or Member under paragraph (1) of this subsection by the basic pay payable for such pay period, over

"(ii) the amount of the taxes deducted and withheld from such basic pay under section 3101(a) of the Internal Revenue Code of 1954 for such pay period.".

(e) Section 8339 of such title is amended by adding at the end thereof the following new subsection:

"(o)(1) Effective on the first day of the month in which an annuitant or a survivor annuitant becomes 62 years of age, the annuity or survivor annuity computed under the other subsections of this section and payable to the annuitant or a survivor annuitant shall be reduced (but not below zero) by the amount determined by multiplying the amount of the old-age and survivors insurance benefits which the annuitant or survivor annuitant is entitled to receive under section 202 of the Social Security Act for the such month, if any, by a fraction—

"(A) the numerator of which is the total of the wages (within the meaning of section 209 of the Social Security Act) for service which is referred to in paragraph (2) of this subsection for years before the calendar year in which such month occurs, and

"(B) the denominator of which is the total of all wages (within the meaning of section 209 of the Social Security Act) and all self-employment income (within the meaning of section 211(b) of the Social Security Act)—

"(i) of such annuitant, or

"(ii) in the case of a survivor annuitant, of the employee or Member on whose service the survivor annuity is based,

credited for years after 1936 and before the calendar year in which such month occurs.

"(2) The service referred to in paragraph (1)(A) of this subsection is service which is covered by amounts deducted and withheld as provided in section 8334(a)(3) of this title, is service described in subparagraphs (C) through (G) of section 210(a)(5) of the Social Security Act, and is taken into account for the purpose of computing the annuity or survivor annuity to which paragraph (1) of this subsection applies.".

(f) Section 8348(a) of such title is amended—

(1) in paragraph (1)(A), by inserting "or the provisions of chapter 84 of this title which relate to benefits payable out of the Fund" after "subchapter"; and

(2) in paragraph (2), by inserting ", chapter 84 of this title," after "chapter".

CONFORMING PROVISIONS FOR THE POSTAL SERVICE RETIREMENT SYSTEM

SEC. 303. Section 1005(d) of title 39, United States Code, is amended to read as follows:

"(d) Officers and employees of the Postal Service (other than the Governors) shall be covered by chapters 83 and 84 of title 5 according to the provisions of such chapters. The Postal Service shall withhold from pay and shall pay into the Civil Service Retirement and Disability Fund the amounts specified in or determined under such chapter 83. The Postal Service shall pay into the Civil Service Retirement and Disability Fund the amounts specified or determined under subchapters II and V of such chapter 84. The Postal Service shall pay into the Federal Retirement Thrift Savings Fund the amounts specified in or determined under subchapter III of such chapter 84.".

HEALTH BENEFIT PLAN AMENDMENTS

SEC. 304. (a) Section 8901(1)(E) of title 5, United States Code, is amended to read as follows:

"(E) an individual first employed by the government of the District of Columbia before January 1, 1987;".

(b) Section 8901(10) of such title is amended—

(1) in subparagraph (C)(i)—

(A) by inserting "or 8467" after "8345(j)"; and

(B) by inserting "or 8434" after "8341(h)"; and

(2) in subparagraph (C)(ii)—

(A) by inserting "or 8434" after "8341(h)"; and

(B) by inserting "or 8467" after "8345(j)".

(c)(1) Subsection (b) of section 8905 of such title is amended—

(A) by redesignating subparagraphs (A), (B), and (C) of paragraph (1) as clauses (i), (ii), and (iii), respectively;

(B) by redesignating paragraphs (1) and (2) as subparagraphs (A) and (B), respectively;

(C) by inserting "(1)" after "(b)"; and

(D) by adding at the end thereof the following new paragraph (2):

"(2) A member of family of a deceased employee or annuitant who was enrolled in a health benefit plan under this chapter on the date of death of the employee or annuitant may continue the enrollment under the conditions of eligibility prescribed in regulations issued by the Office.".

(2) Subsection (c)(1) of such section is amended—

(A) in subparagraph (B), by inserting "or 8436(a)(1)" after "8339(j)(3)"; and

(B) in the second sentence—

(i) by inserting "or 8434" after "8341(h)"; and

(ii) by inserting "or 8467" after "8345(j)".

EMPLOYEES OF CERTAIN NONAPPROPRIATED FUND INSTRUMENTALITIES

SEC. 305. Section 2105(c) of title 5, United States Code, is amended by inserting ", chapter 84," after "chapter 81" in clause (2) of the first sentence.

DISCLOSURE OF EARNINGS INFORMATION OF DISABLED FEDERAL EMPLOYEES

SEC. 306. (a) Paragraph (7)(D) of section 6103(l) of the Internal Revenue Code of 1954 (relating to disclosure of returns and return information for purposes other than tax administration) is amended—

(1) by striking out "and" at the end of clause (vi);

(2) by striking out the period at the end of clause (vii) and inserting in lieu thereof a semicolon and "and"; and

(3) by adding at the end thereof the following new clause:

"(viii) disability benefits provided under subchapter III of chapter 83 of title 5, United States Code, or subchapter V of chapter 84 of such title.".

(b) The heading of paragraph (7) of section 6103(l) of such Code is amended to read as follows:

"(7) DISCLOSURE OF RETURN INFORMATION TO FEDERAL, STATE, AND LOCAL AGENCIES ADMINISTERING CERTAIN PROGRAMS UNDER THE SOCIAL SECURITY ACT OR THE FOOD STAMP ACT OF 1977 OR CERTAIN CIVIL SERVICE DISABILITY BENEFITS PROGRAMS.—".

COMPENSATION FOR WORK INJURIES

SEC. 307. Section 8113 of title 5, United States Code, is amended by adding at the end thereof the following new subsection:

"(c) The monthly basic compensation payable under this subchapter to an employee or former employee who is a participant or former participant in the Federal Retirement System under chapter 84 of this title shall be reduced by the amount of the benefits which are payable or, upon proper application, would be payable for the month to such employee or former employee under title II of the Social Security Act based on the service of such employee or former employee.".

GROUP LIFE INSURANCE FOR CERTAIN PARTICIPANTS IN THE FEDERAL RETIREMENT SYSTEM

SEC. 308. (a) Section 8701(a)(6) of title 5, United States Code, is amended to read as follows:

"(6) an individual first employed by the government of the District of Columbia before January 1, 1987;".

(b) Section 8704(a)(2) of such title is amended by striking out "(2) the" and inserting in lieu thereof the following:

"(2)(A) two, in the case of a participant in the Federal Retirement System under chapter 84 of this title who has elected to make contributions under section 8418(c) of this title, has not received a refund of such contributions under section 8420 of this title, and dies before retiring under such system; or

"(B) in the case of an employee other than a participant to which subparagraph (A) of this paragraph applies, the".

(c) Section 8705 of such title is amended by adding at the end thereof the following new subsection (e):

"(e)(1) Under regulations prescribed by the Office of Personnel Management, any person entitled to receive payment of insurance under this section by reason of the death of a person referred to in section 8704(a)(2)(A) of this title may elect to receive such payment in monthly payments payable for a period of 2 years.

"(2) Insurance shall be paid in accordance with an election made under paragraph (1) of this subsection.".

(d) Subsection (a) of section 8708 of such title is amended—

(1) by striking out "(a) For" and inserting in lieu thereof "(a)(1) Except as provided in paragraph (2) of this subsection, for"; and

(2) by adding at the end thereof the following:

"(2) In the case of each employee who after December 31, 1989, elects to continue insurance as provided in subsection 8706(b)(3)(A) of this title while receiving annuity or workers' compensation, the Office shall contribute a sum equal to one-half the amount which is withheld from the employee's annuity or compensation pursuant to subsection 8707(b) of this title. The contribution shall be made out of annual appropriations which are made for the purposes of this paragraph. Sums appropriated pursuant to this authorization shall remain available until expended.".

(e) Chapter 87 of such title is further amended—

(1) in section 8706 by striking out subsection (c) and redesignating subsections (d), (e), and (f) as subsections (c), (d), and (e), respectively;

(2) by striking out subsection (c)(1) of section 8714a and inserting in lieu thereof the following:

"(c)(1) Except as otherwise provided in this subsection, the optional insurance on an employee stops on his separation from service or 12 months after discontinuance of his pay, whichever is earlier, subject to a provision for temporary extension of life insurance coverage and for conversion to an individual policy of life insurance under conditions approved by the Office.";

(3) by striking out the first sentence of section 8714b(c)(1) and inserting in lieu thereof the following: "Except as otherwise provided in this subsection, the additional optional insurance elected by an employee pursuant to this section shall stop on separation from service or 12 months after discontinuance of his pay, whichever is earlier, subject to a provision for temporary extension of life insurance coverage and for conversion to an individual policy of life insurance under conditions approved by the Office."; and

(4) by striking out subsection (c)(1) of section 8714c and inserting in lieu thereof the following:

"(c)(1) Except as otherwise provided in this subsection, the optional life insurance on family members shall stop at the earlier of the employee's separation from the service or 12 months after discontinuance of pay, subject to a provision for temporary extension of life insurance coverage and for conversion to individual policies of life insurance under conditions approved by the Office.".

JUDICIAL SURVIVORS' ANNUITIES

SEC. 309. (a) Section 376 of title 28, United States Code, is amended—

(1) in subsections (b) and (d) by striking out "4.5 percent" each place it appears and inserting in lieu thereof "5 percent";

(2) by striking out subsection (c) and inserting in lieu thereof the following:

"(c)(1) There shall also be deposited to the credit of the Judicial Survivors' Annuities Fund, in accordance with such procedures as the Comptroller General of the United States may prescribe, amounts required to reduce to zero the unfunded liability of the Judicial Survivors' Annuities Fund. Such deposits shall be taken from the fund used to pay the compensation of the judicial official, and shall immediately become an integrated part of the Judicial Survivors' Annuities Fund for any use required under this section.

"(2) For purposes of paragraph (1), the term 'unfunded liability' means the estimated excess, determined by the Comptroller General on an annual basis, of the present value of all benefits payable from the Judicial Survivors' Annuities Fund, over the sum of—

"(A) the present value of deductions to be withheld from the future basic pay of judicial officials; plus

"(B) the balance in such fund as of the date the unfunded liability is determined.

In making any determination under this paragraph, the Comptroller General shall use the applicable information contained in the reports filed pursuant to section 9503 of title 31 with respect to the judicial survivors' annuities plan established by this section.";

(3) in subsection (h)—

(A) by striking out clauses (i) and (ii) in paragraph (1)(B) and inserting in lieu thereof the following:

"(i) 10 percent of the average annual salary determined under subsection (l)(1) of this section; or

"(ii) 20 percent of such average annual salary, divided by the number of children;";

(B) by striking out clauses (ii) and (iii) in paragraph (1)(C) and inserting in lieu thereof the following:

"(ii) 20 percent of the average annual salary determined under subsection (l)(1) of this section; or

"(iii) 40 percent of such average annual salary amount, divided by the number of children;"; and

(C) by inserting immediately after "remarriage" in paragraph (2) the following: "before attaining 55 years of age";

(4) in subsection (l)—

(A) by striking out "1¼ percent" and inserting in lieu thereof "1.5 percent";

(B) by striking out the colon after "subsection" in paragraph (2) and inserting in lieu thereof a semicolon; and

(C) by striking out the proviso and inserting in lieu thereof the following: "except that such annuity shall not exceed an amount equal to 50 percent of such average annual salary, nor be less than an amount equal to 30 percent of such average annual salary. Any annuity determined in accordance with the provisions of this subsection shall be reduced to the extent required by subsection (d) of this section, if applicable.".

(b) Section 7448 of the Internal Revenue Code of 1954 is amended—

(1) in subsection (c)—

(A) by striking out "(c) SALARY DEDUCTIONS.—There" and inserting in lieu thereof:

"(c) SURVIVORS ANNUITY FUND.—

"(1) SALARY DEDUCTIONS.—There",

(B) by striking out "3 percent" and inserting in lieu thereof "3.5 percent"; and

(C) by inserting at the end thereof the following new paragraph (2):

"(2) UNFUNDED LIABILITY DEPOSITS.—

"(A) IN GENERAL.—There shall also be deposited to the credit of the survivors annuity fund, in accordance with such procedures as the Comptroller General of the United States may prescribe, amounts required to reduce to zero the unfunded liability of the survivors annuity fund. Such deposits shall be taken from the fund used to pay the compensation of the judge, and shall immediately become an integrated part of

the survivors annuity fund for any use required under this section.

"(B) UNFUNDED LIABILITY DEFINED.—For purposes of subparagraph (A), the term 'unfunded liability' means the estimated excess, determined by the Comptroller General on an annual basis, of the present value of all benefits payable from the survivors annuity fund, over the sum of—

"(i) the present value of deductions to be withheld from the future basic pay of judges; plus

"(ii) the balance in such fund as of the date the unfunded liability is determined.

In making any determination under this subparagraph, the Comptroller General shall use the applicable information contained in the reports filed pursuant to section 9503 of title 31, United States Code, with respect to the Tax Court judges survivors annuity plan established by this section.";

(2) in subsection (d) by striking out "3 percent" the second place it appears and inserting in lieu thereof "3.5 percent";

(3) in subsection (h)—

(A) by striking out "subsection (c)" and inserting in lieu thereof "subsection (c)(1)";

(B) by striking out all after the words "equal to" in paragraph (2) and inserting in lieu thereof "the lesser of:

"(A) 10 percent of the average annual salary amount determined in accordance with the provisions of subsection (m); or

"(B) 20 percent of such average annual salary amount, divided by the number of children; or";

(C) by striking out all after the words "equal to" in paragraph (3) and inserting in lieu thereof "the lesser of:

"(A) 20 percent of the average annual salary amount determined in accordance with the provisions of subsection (m); or

"(B) 40 percent of such average annual salary amount, divided by the number of children."; and

(D) by inserting "before attaining fifty-five years of age" immediately after "remarriage" in the first sentence in the matter after paragraph (3); and

(4) in subsection (m)—

(A) by striking out "1¼ percent" and inserting in lieu thereof "1.5 percent"; and

(B) by striking out the comma and all other matter after "other prior allowable service" where it last appears and inserting in lieu thereof ", except that such annuity shall not exceed an amount equal to 50 percent of such average annual salary, nor be less than an amount equal to 30 percent of such average annual salary, and that any amount determined in accordance with the provisions of this subsection shall be reduced to the extent required by subsection (d), if applicable.".

(c)(1) Subsections (a) and (b) of section 1567 of title 11 of the District of Columbia Code are amended by striking out "3 per centum" each place it appears and inserting in lieu thereof "3.5 percent".

(2)(A) Subsection (a) of section 1568 of title 11 of the District of Columbia Code is amended by striking out "computing a survivor annuity" and inserting in lieu thereof "any provision of this subchapter which refers to this subsection".

(B) Subsection (c) of section 1568 of title 11 of the District of Columbia Code is amended—

(i) in paragraph (2)(B), by striking out "the lesser of (i) $2,700 per year divided by the number of such children or (ii) $900" and inserting in lieu thereof "the lesser of (i) $8,424 per year divided by the number of such children or (ii) $2,808";

(ii) in paragraph (3), by striking out "the lesser of (A) $3,240 per year divided by the number of such children or (B) $1,080" and inserting in lieu thereof "the lesser of (A) $10,110 per year divided by the number of such children or (B) $3,370";

(iii) by inserting before the first sentence of the matter following paragraph (3) the following:

"For the purpose of computing, under this paragraph, the annuity of a child that commences on or after January 1, 1987, the figures $8,424, $2,808, $10,110, and $3,370 shall be increased by the total percent increases allowed and in force with respect to retirement salaries of judges under section 11-1571(a) of this title on or after such date."; and

(iv) in the first sentence of the matter following paragraph (3) by inserting before the period the following: "prior to the attainment of fifty-five years of age".

(C) Subsection (e) of section 1568 of title 11 of the District of Columbia Code is amended to read as follows:

"(e) The annuity of a widow or widower of a judge electing survivor annuity shall be equal to—

"(1) in the case of a judge who dies while in active regular service as a judge, the greater of—

"(A) 60 percent of the retirement salary the judge would have been entitled to receive if the judge had retired on the day before the date of death (without regard to the age requirements prescribed in section 11-1562(b)), or

"(B) 60 percent of the retirement salary the judge would have been entitled to receive if the judge had retired on the day before the date of death with 15 years of service for the purposes of this subchapter (without regard to the age requirements prescribed in section 11-1562(b)),

computed under section 11-1564; and

"(2) in the case of a retired judge, 60 percent of the retirement salary payable to such judge on the day before the date of the judge's death.".

(d) The benefits conferred by section 376 of title 28, United States Code, section 7448 of the Internal Revenue Code of 1954, and section 1568 of title 11 of the District of Columbia Code by reason of the amendments made by this section shall apply only to individuals who first become eligible for annuities under such sections on or after the effective date of this Act, except that—

(1) such annuities shall be computed in accordance with the provisions of such sections, as amended by this section, notwithstanding contributions or deposits made in accordance with applicable law at lower rates; and

(2) no additional liability shall be created with respect to deposits made in accordance with applicable law before the effective date of this Act, or after such effective date pursuant to an installment payment election made under section 376(d) of title 28, United States Code, section 7448(d) of the Internal Revenue Code of 1954, or section 1567(b) of title 11 of the District of Columbia Code before such effective date.

TITLE IV—AUTHORIZATIONS, APPLICATION, AND EFFECTIVE DATES

FIRST YEAR EXPENSES OF THE FEDERAL RETIREMENT THRIFT INVESTMENT MANAGEMENT SYSTEM

SEC. 401. (a) Notwithstanding section 8426(c)(3) of title 5, United States Code, as added by section 101 of this Act, the expenses incurred in the administration of the Federal Retirement Thrift Investment Management System prescribed in subchapter VIII of chapter 84 of such title, as added by section 101 of this Act, during fiscal years 1986 and 1987 shall be paid from sums appropriated pursuant to subsection (b).

(b) There are authorized to be appropriated to the Federal Retirement Thrift Investment Board, for fiscal years 1986 and 1987, such sums as may be necessary to pay the expenses incurred in the administration of the Federal Retirement Thrift Investment Management System prescribed in subchapter VIII of chapter 84 of title 5, United States Code, as added by section 101 of this Act, during such fiscal years.

AUTHORIZATION TO CARRY OUT INFORMATION PROGRAM

SEC. 402. (a) The Office of Personnel Management shall take appropriate action during fiscal years 1986 and 1987, to make available on or before January 1, 1987, the information described in section 8469 of title 5, United States Code, as added by section 101(a) of this Act.

(b) There are authorized to be appropriated $1,000,000 to the Office of Personnel Management for fiscal year 1986 to carry out subsection (a). Sums appropriated pursuant to this authorization shall remain available until expended or until October 1, 1987, whichever is earlier.

APPLICATION

SEC. 403. Except for the provisions of subchapter VII of chapter 84 of title 5, United States Code (as added by section 101(a) of this Act), and the amendments made by title III of this Act, nothing in this Act shall reduce the accrued entitlements of current and retired Federal employees and their families to future benefits under the Civil Service Retirement and Disability System or any other Federal Government retirement and disability system. The full faith and credit of the United States Government is hereby pledged in support of the payment of such accrued entitlements.

EFFECTIVE DATES

SEC. 404. (a) Except as provided in subsections (b) and (c), this Act and the amendments made by this Act shall take effect January 1, 1987.

(b) Subchapter VIII of chapter 84 of title 5, United States Code (relating to the Federal Retirement Thrift Investment Management System), as added by section 101, shall take effect on the date of enactment of this Act.

(c) The amendments made by section 301 shall take effect on the date of enactment of this Act.

(d) The program required by section 8426(e) of title 5, United States Code, as added by section 101(a) of this Act, shall be established not later than January 1, 1988.

Mr. ROTH. Mr. President, the matter that the Governmental Affairs Committee brings before the Senate today is retirement legislation for Federal employees covered by Social Security.

As I think everyone here knows, the Social Security amendments of 1983 provided for Social Security coverage of Federal civilian employees who were hired January 1, 1984, and after.

Congress has the responsibility to write a retirement plan to cover these employees. This is an important point to remember. The plan before us today covers only new employees and

does not mandate any changes in the retirement plan applicable to employees on the payroll prior to January 1, 1984. It should be pointed out, however, that employees hired before January 1, 1984, are provided the option to join the new program if it is their wish.

On July 30 of this year, Senator TED STEVENS and I introduced a bill, S. 1527, to establish a new retirement program for Federal workers that supplements Social Security. That bill was the subject of 3 days of public hearings, on September 9, 10, and 11.

I am pleased to say that since these hearings, the leadership on the Republican side of the committee has been working with the leadership on the Democratic side to work out a mutually satisfactory bipartisan retirement bill. To put it mildly, that process has not been easy. In fact, there have been times when it has been extremely difficult. However, because of the leadership and the willingness to work together, we were able to put forward a bipartisan approach.

I should like to express my deep thanks and appreciation to the many people who helped to bring this about, but especially the chairman of the Civil Service Subcommittee, Senator STEVENS; my good friend and colleague the ranking minority member of the full committee, Senator TOM EAGLETON; and the ranking minority member of the subcommittee, my good friend Senator GORE.

We have an obligation to provide a responsible retirement plan to employees entering the Federal work force. Time to fulfill that obligation is running out. At the end of this year the interim plan for workers hired since January 1984 will expire. If Congress fails to act these people and the Government will be required to pay for both Social Security and the costs of the current retirement system. Costs to the employee would be staggering. Excessive costs—some 14 percent of a paycheck would go to retirement—resulting in overlapping and duplicative coverage.

To reach agreement on such a new plan, it was necessary that there be some compromising by all parties. Such a bipartisan compromise has been achieved. The compromise sets a cost limit at 21.9 percent of payroll, substantially below the 25-percent cost of the current system. This is indeed good news for the taxpayer.

It is important to note that the plan is also good for the employee. It breaks new ground by providing employees with an option to make a choice about the kind of retirement plan they want. Employees can choose a plan similar to the one TED STEVENS and I introduced on July 30 with full COLA protection over age 67. That plan's main feature is a significant thrift provision giving employees, through investment options, the opportunity to benefit directly is the economic growth of the country. Or if an employee is willing to contribute more of his own money and take a reduced thrift benefit, he or she can elect to receive benefits more similar to the current retirement system. Both options contain enhanced, comparable survivor and disability benefits.

I think this is the step into the future civil service employees have been waiting for and want to take, discrediting the notion that everything surrounding the civil service is outdated, bureaucratic and unimaginative.

Mr. President, even if the Social Security Amendments of 1983 had not mandated a new retirement system for workers hired after December 1983, I believe it would be time for Congress to design a modern pension system for Federal employees. Why should the civil servant be locked into an archaic retirement plan while his counterpart in the private sector or State government participates in plans that provide both retirement security and career flexibility? The Federal worker competes in the job market with the rest of the labor force. It is unfair to have his or her career opportunities limited by the conditions of the current pension system.

We are all aware of the shortcomings of the present retirement system. It favors the older career employee over the younger one, it makes mobility between the public and private sector difficult, it is poorly financed and it is too expensive. Our legislation eliminates the shortcomings of the current system, provides a sound basic benefit package similar to the private sector and allows employees to direct their income where it best suits their needs.

Let me say that, like any piece of compromise legislation over truly complicated, difficult issues, this compromise contains items that many people and various interest groups will not want. Yet, there are features in this compromise that I believe are very innovative and highly desirable. We must act; and I believe that the legislation before us represents the very best that can be achieved at this stage of the process. I should point out that it was unanimously reported out of the Committee on Governmental Affairs.

Before I proceed further, I say that we wish to complete this matter today. After we have made our decisions, a substantial amount of negotiating must be done with the House of Representatives in order to enact legislation before year-end, as mandated by existing law. The House and Senate, on both sides of the aisle, have indicated their desire to bring this matter to a conclusion promptly. By acting favorably on this proposal, difficult and complex though it may be, we will be demonstrating that our legislative process is still working well and can solve problems in a timely manner when it must.

Before I yield management of the bill to Senator STEVENS, I acknowledge the efforts to the Governmental Affairs Committee staff, the Senate Legislative Counsel's Office, the Congressional Research Service, the General Accounting Office, and the Congressional Budget Office in developing this very important and complex bill.

With any project of this size and scope, the realization of the final product is the result of the contributions made by numerous individuals. The committee staff who provided assistance on this document include John Duncan, Debbie Bisceglia, Denise Boerum, Eileen Bradner, Winthrop Cashdollar, Alan Cohen, James Cowen, Jane DePriest, Linda Gustitus, Sara Hamer, Margaret Hostetler, Peter Lynn, Thurgood Marshall Jr., Eileen Mayer, Richard Schreitmueller, Sally Smith, Melissa Solomon, and David Williams.

In drafting the actual legislation, the committee was aided by staff of the Office of the Senate Legislative Counsel including James Fransen, Bruce Kelly, Mark Mathiesen, and Gregory Scott.

Extensive research assistance was provided to the committee by the staff of the Congressional Research Service including Mary Anderson, Michael Burke, Thomas Gabe, Richard Hobbie, Geoffrey Kollmann, Carolyn Merck, Michael O'Grady, Mary Pilote, Raymond Schmitt, and Dennis Snook. Additional assistance was provided by Edwin Hustead and Michael Sullivan of Hay Huggins, Inc., and Robert Shelton and Thomas Eickmeyer of the U.S. General Accounting Office.

The committee also relied on numerous resources made available from the Congressional Budget Office by Earl Armbrust, David DelQuadro, Sherri Kaplan, and Larry Ozanne.

Mr. President, I hope the Senators of this body will support our efforts. This plan is fair. It does not discriminate between mobile workers and those who stay in Government, nor the young and old. In fact, except for some very few technical occupations, this plan covers everyone the same including Congress and its employees.

Furthermore, this plan is solidly financed. The money needed for benefits is paid up front, on an actuarial basis, not an arbitrary number.

This is a plan that allows the Government worker the same opportunities as the private sector and gives each employee control of his or her future retirement.

Mr. President, I ask unanimous consent to have printed in the RECORD an editorial contained in the Washington Post on Saturday, October 5, 1985, in which it says that the committee plan

is an excellent start in the direction that is needed to attract and hold quality workers.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

FEDERAL PENSIONS: PROGRESS

The touchy issue of constructing a new pension system for federal workers took a big step toward resolution this week when the Senate Governmental Affairs Committee unanimously approved a compromise measure. Neither the administration nor the House has supplied useful leadership on this issue, so strong bipartisan Senate support behind a sensible plan is especially important to get Congress moving.

The basic design of the proposal, developed by Sens. Ted Stevens, William Roth, Thomas Eagleton and Albert Gore, follows the three-tiered pattern now popular in the private sector. Social Security, with its full-inflation protection, provides the base. The next layer gives workers an assured pension supplement determined by years of service, salary before retirement and age at retirement. No contribution from the worker would be required for this benefit. Finally, an optional "thrift plan" tier would allow workers to make employer-matched contributions to a tax-deferred savings plan.

Compared with the retirement system that previous federal workers have enjoyed, the proposed system would provide less generous early retirement features and less complete inflation protection. On the other hand, it would provide superior disability and survivors' benefits, and much better benefit "portability" for the many workers who now sacrifice all benefits when they leave federal service for the private sector. And for the taxpayer the plan would offer substantial future savings.

A final deft addition to the plan, which alleviated union concerns and secured solid bipartisan support in the committee, would give workers an additional option. By agreeing to pay a small extra contribution, and by sacrificing some employer matching of thrift-plan savings, workers could choose to have more complete inflation protection at earlier reitrement ages. The total cost of the plan would be unaffected.

The administration has remained officially opposed to any plan that does not seriously undermine pension protection for federal workers. That's not a useful position. Federal pensions have been over generous and poorly designed. Congress was right to cover new federal workers under Social Security and require that a new, coordinated pension system be developed for them. But federal workers, as able Cabinet members and lesser officials will confirm, do much important work for this country from policing air traffic safety and environmental hazards to processing tax returns and Social Security benefits. A decent though responsible pension system is needed to attract and hold quality workers. The committee's plan is an excellent start in that direction.

Mr. ROTH. Mr. President, it is normally the policy for the chairman of the committee to manage the bill, but I have asked my good friend and colleague, the distinguished Senator from Alaska, to undertake that responsibility. I do so because I think we are all deeply indebted to his leadership, to his imaginative approach and his persistence in working for an excellent pension plan for the Government employees.

Again, in closing, I want to again pay my special thanks and appreciation not only to Senator STEVENS, but to Senator EAGLETON and Senator GORE as well as all members of the Governmental Affairs Committee for their willingness to work together in a bipartisan way to hammer out a new pension program that I personally believe will help ensure that we attract the kind of excellent employees we want to be part of the public sector.

Mr. EAGLETON addressed the Chair.

The PRESIDING OFFICER. The Senator from Missouri.

Mr. EAGLETON. Mr. President, I, too, wish to thank some people that have been very, very active participants in this bill. Before he leaves the floor I especially want to thank the chairman of the full committee, Senator ROTH of Delaware.

This bill has not been an easy one to craft but with his leadership as the chairman of that committee we were able to do a job in which all 13 members of the committee could agree. That is most unusual around here, especially on a subject that can be classified as controversial. But for his patient guidance of this measure, we would not be in this unanimous posture today. I thank him most kindly.

Mr. ROTH. I thank the Senator.

Mr. EAGLETON. Of course, I thank Senator STEVENS, who has labored for years in this vineyard. Senator STEVENS was the first Member of the Senate a long, long time ago to face up to the reality that there was going to be, like it or not, a new civil service retirement system, and that like it or not, not everybody would agree with it. And it would not be identical to the system that was then on the books.

During this period of time he was pretty much alone in terms of trying to craft and formulate a new bill, because, I repeat, it was controversial. But he persevered and he persevered. And thus we are where we are today through his efforts.

On my left is one of the new Members of the Senate, Senator GORE of Tennessee. When he came on the Governmental Affairs Committee, the one subcommittee assignment that no one wanted was the Civil Service Committee. Why did no one want it? Because that subcommittee would have within its jurisdiction the duty of formulating this new plan—a hot potato.

Yet, without griping or grousing he took that assignment, and threw himself into the substance of this effort, and a large portion of this bill before us today is the handiwork—the substantive, prudent handiwork—of Senator GORE.

Those are some of the lead players. There are some other players that do not get much credit because they do not have a title like Senator or chairman or ranking something or other. They do most of the work. They are the ones that work weekends and nights while the Senators make some basic fundamental decisions. But they have to work it out in real statutory ways.

There are five in particular that I want to mention that have devoted, I think in the aggregate, thousands of hours to this endeavor. They are all here on the floor. I think they all need to be recognized. Jamie Cowen of Senator STEVENS' staff; John Duncan, Senator ROTH's staff; Margaret Cranshaw of my staff; Peter Lynn, on loan to us from the General Accounting Office; and I thank Mr. Bowsher for that because I do not think we would have a bill today but for his excellent work; and last but by no means least, Thurgood Marshall, Jr., of Senator GORE's staff.

All of these individuals, as I say, devoted thousands of hours to putting this bill in the fine shape that it is in today. Let me now proceed to my prepared remarks.

Mr. President, the bill before us today, the Federal Retirement Reform Act of 1985, S. 1527, represents the culmination of nearly 3 years of work by the Governmental Affairs Committee and the individuals heretofore mentioned. The task of structuring a totally new retirement system for Federal employees hired after January 1, 1984, has been formidable. Indeed, never in my 17 years in the Senate have I seen an issue as complicated.

Our committee was directed by the Social Security Amendments Act of 1983, Public Law 98-21, to establish a new Federal retirement system for civil service employees—the first since the original system was founded in 1920. Prior to 1984 civil servants had never been in Social Security. Now every Federal employee hired after January 1, 1984, is subject to the 7-percent Social Security withholding.

They are also temporarily covered by the current civil service retirement system—a system designed for employees not covered by Social Security. The Congress was given until December 31, 1985, to formulate a new plan which would provide retirement income for Federal employees with Social Security as the basic benefit.

Mr. President, I believe that we will make the deadline—a deadline which often seemed impossible and one which most betting men would have given, at best, a 50-50 chance in 1983. I take a great deal of pride in the fact that this bill has actually reached the floor today and seems assured of passage.

I want to emphasize that while this matter has been guided by the Republican leadership, it has never been a partisan issue. Throughout those

nearly 3 years the committee has worked as a bipartisan and cooperative unit. The committee's unanimous vote at its October 2, 1985, markup reflects the success of our bipartisan approach to what is essentially a good government issue—a fair, equitable, and well-designed retirement plan for all Federal employees—Members of Congress, doctors, astronauts, secretaries, firemen, policemen, file clerks, custodians, and all of the myriad of Federal personnel. Obviously there were political differences on some of the key issues, but in the interest of the whole, and based on the crucial need for the Federal Government—the largest employer in the world—to have a working retirement system, both sides gave a little here and a little there. Mr. President, this compromise process worked.

What we have before us today is a bill sponsored not only by Senators ROTH and STEVENS, but a bill sponsored by Senators ROTH, STEVENS, EAGLETON, GORE, CHILES, NUNN, GLENN, LEVIN, DURENBERGER, MATHIAS, COHEN, and COCHRAN. An unfortunate mistake left most of our names off the printed document.

I emphasize this strong bipartisan sponsorship, Mr. President, because on a major issue such as this, such bipartisan support is unique in this Congress—a Congress that when facing major issues agrees on nothing and agrees to nothing. Therefore, as ranking minority member on the Governmental Affairs Committee, I am intensely proud of the committee's work on this measure. We were given a problem to solve, we solved it, and we met our deadline.

Now, let me turn a bit to what that has entailed. The committee effort spanned research covering subjects as diverse as macroeconomics, surveys of pension practices in the private, nonprofit, and State and local government sectors, the philosophy behind what a pension plan should be—both for an employer's cost and management concerns, as well as the employee's benefit package—and the statistical and actuarial bases which ultimately govern all assumptions or goals upon which a pension plan is designed.

Mr. President, I know that when I leave the Senate, my memory of this particular legislation will be one of numbers and charts, more numbers and more charts, and still more numbers and still more charts. Frustratingly, it is almost impossible to understand this legislation unless you get into the numbers and charts, so I have concluded, as I believe have Senators STEVENS, ROTH, and GORE that in fairness to our colleagues, we will not subject the Senate to lengthy explanations of what lies behind much of the bill.

The basic provisions of the bill have been thoroughly detailed in the statement of my esteemed colleague from Alaska, and pages 126 to 127 of the committee report provide a clear summary of the bill in chart form. Also of interest to my colleagues will be pages 118 to 125 of the committee report, which again in chart form, provide a comparison of the present Civil Service Retirement System and the new plan. It is the committee's expectation that many Federal employees, including Members of Congress, will find the new plan so attractive that they will want to transfer in. While this legislation changes nothing in the current plan, and I emphasize the word nothing, it does allow that transfer option.

It may surprise many of my colleagues that the committee finds the new plan so appealing that it expects numerous employees to transfer. This is particularly surprising since the cost of the new system is 21.9 percent of payroll, while current civil service retirement costs about 25 percent of payroll. If the plan will cost the Government less, how could individuals find the plan more attractive?

The answer, Mr. President, lies in how the money is distributed. The Federal Government now spends $16.5 billion a year on civil service retirement costs. The new system will cost about $14 billion a year, a substantial savings, and in long-run budgetary terms, a massive savings.

Under the current plan the bulk of the money is going to long career, high-income wage earners. The current defined benefit plan, which is based on a formula of years of service, times high 3 years of salary, times 2 percent, guarantees generous annuities to those who work a substantial portion of their careers in Government and earn at the top of the Federal pay scale. Senators and House Members are treated with great favoritism under the current system. This favoritism for Members of Congress, Mr. President, has been eliminated in the new plan. That saves the Government money, and the system is more equitable for everyone.

But eliminating favoritism for Members of Congress is only one place the new plan saves money. The far more important savings come from the new plan's basic structure—a structure known as a three-tiered plan.

With Social Security as the base tier, the new plan provides as a second tier a defined pension benefit, which is much like the current system's only less generous, and a third tier, which is known as a capital accumulation, thrift, or defined contribution provision. In essence, this "capital accumulation plan or, "CAP" as we've come to call it, allows each individual employee the option of saving a portion of his or her salary, with the Government matching that savings up to a certain level. Basically the "CAP" is similar to an Individual Retirement Account [IRA], Keogh, or 401(k) plan in the private sector.

If the employee leaves Government, he takes his savings, plus his Government match, with him. The money must be rolled-over into a qualified retirement plan, a retirement annuity or an IRA, but the money is the employee's. Under the current civil service retirement system only about 25 percent of those ever covered by the plan receive any annuity. The other 75 percent leave Government, take out the cash they have contributed, but receive nothing else from their years of Federal service.

The buzz word for the advantage the "CAP" plan gives employees is "portability." Today's workforce is increasingly mobile, it contains thousands of working women, many of whom move in and out of jobs as they take time out for family responsibilities, and it is highly competitive in the managerial, technical, and professional areas. "Portability" is attractive to all these groups. The private sector has long had portability features in its best retirement plans; this feature will help the Government compete for the people we need and want to attract.

I must emphasize, however, that the "CAP" portion of the bill actually represents only 3 percent of the total cost. The remaining 18.9 percent is divided between Social Security (5.9 percent) and the defined benefit (12.9 percent). This is extremely important to the Democratic side of the aisle. While the Democrats on the committee agreed with the "portability" feature and felt strongly that it will be attractive to today's worker, we felt equally strongly that the Federal Government must, like any responsible employer, guarantee all its employees a retirement annuity that is substantially above Social Security's basic benefits.

There are retirement plans that depend totally on capital accumulation provisions, and in those instances where the employee cannot or does not contribute, the retirement income is only Social Security. That should never happen to a Federal worker who has worked enough years with the Government to be eligible to retire. As a nation we must protect those at the lower end of the income ladder, those who simply cannot afford to contribute to a "CAP" plan, and we must also provide some guaranteed economic incentive (deferred salary if you will) to our best, most loyal, and longest-term employees.

It is along these lines that the committee compromised. Democrats pushed for a larger defined benefit provision; Republicans sought a larger capital accumulation provision. As Senator STEVENS will point out, our final compromise was a two-option plan. Those who want a system

weighted for a "CAP" plan can choose option A; those who want more from their defined benefit can choose option B. There are some problems with the option approach: Should an employee be forced to make such an important decision when he or she is young and just entering government? Will so many choices prove an administrative nightmare? Will it be clear to employees that either option offers a fair retirement plan, but that one may be more suitable to their own individual needs? If they understand that, will they make the right choice?

Personally, Mr. President, I do not have the answer to those obvious problems, but I am convinced that either option A or B will provide a solid, fair, and generous retirement plan. Also, it is very important to note that both option A and option B cost the same to the Federal Government, 21.9 percent of payroll.

Like health plans, pension plans today come in so many varieties, shapes and sizes that it proved impossible for the committee to agree to one single plan that was right for all Federal workers. The multitude of health plans work; I expect the two-option pension plan will work also. I do know that the two options represent the ultimate in fairness.

Finally, Mr. President, I wish to make some comments about pensions and pension planning in general.

When the Governmental Affairs Committee first commenced work on this legislation, I had three goals: (1) meet the December 31, 1985 deadline; (2) provide equitable benefits across the work force, and (3) cover military personnel. Unfortunately we failed on goal number 3. The Governmental Affairs Committee does not have jurisdiction over the military, and early on it was crystal clear that if Governmental Affairs attempted to convince the military that it should become part of the Federal Government's retirement system, the bill would be dead before we started. Interestingly, the Governmental Affairs Committee does not have jurisdiction over the Foreign Service or the Central Intelligence Agency, either, but as the amendments to S. 1527 show, those groups are going to cover their employees' with the new plan. The two groups will be granted the same special benefits S. 1527 provides for such groups as law enforcement officers and firefighters.

It is my hope that the military will ultimately be covered by the new plan. There is simply no justification for the special pension treatment that this Nation accords the Department of Defense.

You remember, Mr. President, I noted earlier that the cost of the current civil service retirement system—that is the one that is on the books now—is about 25 percent of payroll. The cost of the current military system—listen to this, Mr. President—is 52 percent of payroll. It is incredible. It is so huge, it is hard to imagine.

I repeat: the civil service retirement system costs 25 percent of the payroll; the military retirement system: 52 percent of payroll. I predict, Mr. President, that some day—it may not happen in this century, but maybe toward the end of this century, the Department of Defense is going to have to make a hard decision between guns and pensions. I predict that the pension system of the military will so overwhelm the budget of the Department of Defense, that it is going to have to make some very difficult decisions. Quite frankly, those difficult decisions should have been made right now, and the military should have been in this bill, which is 21.9 percent of payroll. But as I said, Governmental Affairs does not have jurisdiction over that subject matter, and had we attempted to capture it by some clever ploy or other, the whole bill would have gone down the tube.

But we're willing to help on the military problem. Our committee has computer programs, cost analyses, data comparisons, and any other imaginable kind of pension information, which we would gladly loan to our armed services colleagues so they can focus on this crucial issue.

Since our committee has spent nearly 3 years studying every aspect of pensions, there is no need for armed services to re-invent the wheel.

In fact, Mr. President, I would be personally happy to consult with them. Either fortunately or unfortunately, I have, through my original committee assignment 18 years ago to the Committee on the District of Columbia, and now as ranking on Governmental Affairs, learned more than I ever wanted to know about pensions. In 1979 our committee handled the DC Retirement Reform Act, which I remember as numbers and charts and more numbers and charts. All those numbers and charts established a mental basis for all the numbers and charts behind today's legislation. I think they'll be with me for life.

In light of that background, I can authoritatively say that the Federal Retirement Reform Act of 1985 establishes a system, which in combination with Social Security, is rationale, equitable, and affordable, and a system which will very likely be a model for retirement plans far into the future.

Mr. President, once again, I thank my colleagues, Senator ROTH, Senator STEVENS, and Senator GORE, for their exemplary work on this very difficult and complex bill.

Mr. STEVENS adressed the Chair.

The PRESIDING OFFICER. The Senator from Alaska.

Mr. STEVENS. Mr. President, I am pleased that my good friend, the Senator from Missouri [Mr. EAGLETON] has spoken on the bill, because, in truth, despite the things that have been said today so far, we would not have this bill before us today had it not been for the attitude that Senator EAGLETON has demonstrated, an attitude of dedication to good government. I am one who hopes that Professor EAGLETON will use this whole bill as a study for his students as he goes to a new career.

This bill establishes a supplemental retirement plan for Federal workers hired beginning January 1, 1984, who are covered under Social Security. The need for this bill, of course, came about as a result of the 1983 Social Security Amendments which first brought Federal employees into Social Security. However, the development of the retirement plan actually began long before 1983. In fact, it was the early part of this decade when we began to see the need for alternative Federal retirement plans because of spiraling costs and also began to anticipate the inevitable inclusion of Federal employees under Social Security. Today I feel that we have reached an important milestone in a very long journey.

During my years of service in Government, I have witnessed few, if any, issues which have commanded the degree of analysis, level of study and amount of time of this piece of legislation. It's practically unprecedented in my experience here in the Congress.

In the late 1970's and early 1980's I began studying the changing demographics of our society, in particular the proportion of workers versus retirees into the next century. I became troubled about the tremendous financial burden this could impose upon the Government and future generations. I was equally concerned about the need to provide adequate retirement income and financial security for retirees.

Then there was ths issue of covering Federal workers under Social Security. Since Social Security began in 1935, the issue of covering Federal employees had come up from time to time. In 1980, the Universal Coverage Study recommended inclusion of Federal employees under Social Security. Then in 1981, the President established the National Commission on Social Security Reform to study the problems of Social Security financing. One alternative was to cover Federal workers. By 1981, I knew it was only a matter of time before we needed a new Federal retirement system.

In 1981, we requested the Congressional Research Service [CRS] to do a study of alternative designs for Federal retirement programs. In December of that year, CRS issued a report, outlining four options to coordinate a new Federal retirement plan with Social Security. Based on that report, in the

fall of 1982, I introduced S. 2905, a three-tiered Federal retirement plan based upon Social Security. Although the bill was not acted upon, 6 months later new Federal employees were covered by Social Security. This forced us to tackle the problem of establishing a new Federal plan.

We have commissioned study upon study about Federal retirement issues, including those by the Congressional Research Service and the General Accounting Office.

Mr. President, I want to thank both of those agencies for the great cooperation they have given to us throughout this whole continuum. We have consulted extensively on retirement plan design issues with experts from the private sector. This was highlighted by the series of five Federal pension forums held in 1984 to discuss the types of retirement plans successfully used in private industry and State and local governments.

We had several objectives in mind in designing this system. First of all, we needed a plan which would supplement and be compatible with Social Security—the cornerstone of the retirement plan. We wanted a plan which would provide a package of retirement benefits for our Federal work force comparable to their private sector counterparts. This includes the employee's financial security during retirement, survivor benefits, and protection from disability.

It was important that Federal retirement benefits be attractive enough to enhance recruitment of top notch candidates for Federal jobs, including key managerial positions. We sought a plan which would allow for greater movement in and out of the Federal work force at all levels and during all career phases through portable benefits. Providing various options for our Federal employees in retirement planning was also a key design consideration. Finally, we desired a retirement plan that could do all of this but be financially stable and fully funded at a reasonable cost to the Government.

With S. 1527, I honestly believe we have achieved all of that. We have borrowed from the best of private industry, adopted features of very successful systems, and created some parts on our own to come up with what I believe is a "state-of-the-art" retirement plan which will most certainly serve as a mode for others.

The plan is three-tiered, a very common and successful design used in private industry. The first tier is Social Security, which provides the basis of retirement income, disability protection, and survivor benefits. The second tier is the basic annuity plan, which is noncontributory on the part of the employee. The final tier is the thrift savings plan, which provides for tax deferred investments through voluntary employee contributions matched in part by the Government.

The basic annuity plan, or the second tier, is added on rather than integrated with Social Security. This is a departure from usual private industry practice, which is to integrate pension plans to counterbalance the necessary Social Security tilt toward lower income workers. We selected this approach for a couple of reasons. Because of the complexity of integrated plans, they are sometimes difficult to explain to employees. With a retirement plan as large as this one, and given the size of the Federal work force, the simplicity of an add-on plan was appealing. Another important consideration was that we expect higher income employees to participate to a greater degree in the thrift plan than the lower income group, which serves to flatten the tilt. Although we believe lower income employees will contribute to the thrift plan, this add-on approach lessens the need of these employees having to participate to achieve adequate retirement benefits.

The annuity computation formula under the basic plan is backloaded as in the current retirement system. This gives greater weight to later years of employment, thereby encouraging career service. The annuity formula is less generous than the current system. However, this annuity is meant to supplement Social Security.

The provisions of the basic annuity plan were designed to parallel Social Security where possible. For example, the age for full retirement under S. 1527 is 62, which is the age at which Social Security is first payable. This is also the most common age for full retirement in private industry. However, in keeping with our goal of providing greater career flexibility and employee choice in retirement planning, S. 1527 allows employees to retire at age 55 with 10 years service on a reduced annuity. Under another option in the bill, which I will discuss later on, employees may make an additional contribution to enable them to purchase the right to retire at 55 with 30 years service with no reduction.

Cost-of-living adjustments [COLA's] under the basic annuity plan are also keyed to Social Security. Under the basic provisions of S. 1527, cost-of-living adjustments to annuities would begin at age 62, when Social Security is payable, and would be equal to the Consumer Price Index minus 2 percentage points. At 67, the eventual age for full Social Security retirement, the COLA would equal the CPI. Again, under the second option of the plan to be discussed later, employees could choose earlier and more extensive protection against inflation through making an additional contribution. In the private sector, COLA's are typically made on an ad hoc rather than regular basis and generally amount to something less than the full CPI.

Under the basic annuity plan, we have made special provisions, as under the current system, for law enforcement officers, firefighters and air traffic controllers to enable them to retire at age 50 with 20 years service or with 25 years at any age. We provide for an annuity supplement, approximately equal to the Social Security benefits, from retirement to age 62, when the Social Security benefit begins.

The third tier of the retirement system, the thrift savings plan, is one of the most innovative portions of the bill. This offers to the general Federal work force, for the first time, an attractive option available to many private sector employees. Until now only a few Federal organizations, such as the Tennessee Valley Authority, the Federal Deposit Insurance Corporation, the Federal Reserve Board, and the Comptroller of the Currency, included thrift savings plans in their retirement systems. These plans are very popular among employees at all income levels because of the matching employer contribution and the tax deferral on contributions and earnings. Thrift plans are likewise popular with employers because the costs are known from year to year and they do not add to some future compounded liability for pension costs. I believe it is imperative that we offer the privileges of thrift savings plans accorded to private sector employees to our Federal work force and that the Government as an employer benefit from the tremendous long-run savings of thrift plans.

The thrift savings plan will be managed by the Thrift Investment Board, which consists of Government officials and two employee representatives appointed by the President. This Board will have broad oversight and policy making responsibility with the more direct day-by-day management being handled by the Executive Director, who is appointed by the Board. Employee input and representation would come through the Employee Advisory Committee, with members elected by participants in the thrift plan.

Employees can contribute up to 10 percent of their pay with the Government matching the first 5 percent dollar-for-dollar. They can choose from among three investment funds—Government securities, fixed income, and common stock index fund. Having a limited number of funds in the thrift plan has been a successful practice in private industry and popular among employees. Employees would have the option of changing funds and contribution amounts yearly.

With a thrift fund of this size and scope for the Federal work force, concern about the role of the Federal Government in operating this fund

and its effect on the market is understandable. We have designed funds which are essentially self-managed and do not require extensive day-to-day investment decisions. Board members are prohibited by law from making specific investment decisions and from directing the Executive Director to make specific investment decisions. In addition, S. 1527 includes fiduciary obligations, enforcement provisions, and penalties which apply to private plans under the provisions of the Employee Retirement Income Security Act.

As mentioned earlier, S. 1527 offers two major retirement plan options to employees. Because of the diverse, large Federal work force, we thought it was important to provide alternatives to meet the needs of a wider range of employees. The basic plan provisions as described above apply to option A. Under option B, employees can elect to make a higher contribution of 7 percent, which would go to the old age, survivor, and disability portion of the Social Security tax up to the taxable wage base and the remainder to the retirement fund. Under option B, the employee match for the thrift plan would be different. Employees could contribute up to 10 percent of pay with the Government matching up to 6 percent as follows: for the first 1 percent, the match would be dollar-for-dollar; for the second and third percentage points, the match would be $0.50 per dollar; and for the fourth to sixth percentage points, the match would be $0.25 per dollar. In other words, the match would be 2.75 percent for the Government per 6 percent for the employee.

Under option B, the additional employee contribution, combined with employer savings from the reduced match in the thrift plan, enables the employee to purchase retirement at 55 and 20 with unreduced benefits. It also provides the employee with enhanced COLA's. Under option B, retirees at age 55 would have their annuities adjusted by the CPI minus 2 percentage points. At age 62, the COLA would equal the full CPI.

This plan provides disability benefits which are better than those under the current system. The bill establishes a separate long term disability [LTD] insurance plan self insured by the Federal Government but with benefits and services provided by a third-party administration. The plan will use two categories of disability—the Social Security definition and the civil service definition of occupational disability. For employees who become disabled, payment during disability is equal to 60 percent of his or her average salary offset by 100 percent of any Social Security benefit. After 1 year, if the employee does not meet the Social Security definition, but is considered occupationally disabled, the benefits are reduced from 60 percent to 40 percent of average pay. For Social Security disabled employees, the 60 percent benefit continues. When disabled employees reach retirement age, they roll over to the regular retirement rolls—for occupationally disabled, at 55 and for Social Security disabled at 62.

The survivor benefits under this plan nicely supplement those offered under Social Security. Benefits for surviving children up to age 18 are paid by Social Security, not under this bill. The bill offers supplemental death benefits—both for preretirement death and post-retirement death. In the case of the death of a worker, the survivor annuity would be payable upon death.

The benefits of S. 1527, when combined with Social Security, offer comprehensive retirement, survivor and disability coverage comparable and, in many cases, superior to the current retirement system. Yet, the cost of S. 1527 is 21.9 percent of payroll compared to the 25.2-percent cost of the current system. I believe package in this bill is a very good deal for both employees and the Government.

During the past 4 or 5 years in working on this bill, we spent a tremendous amount of time. We've talked a lot, listened a lot, drafted a lot, and redrafted even more. However, I have not been alone in this undertaking. In fact, I could not have done it alone. I would like to thank my colleagues, Senators ROTH, EAGLETON, and GORE, for their tireless efforts, invaluable assistance, and deep commitment to getting this retirement bill to where we are today. I would also like to express my appreciation to the other members of the Committee on Governmental Affairs for their cooperation, interest, and help on this retirement plan. This bill is the result of a truly cooperative and bipartisan effort.

Mr. President, I would say that it is unquestionably a monument to one person on the floor today, and that is my assistant, Jamie Cowen, who has worked with me through this whole period and is probably now the greatest expert we have in the field of governmental pensions and retirement systems. He has agreed to stay on the staff, as a matter of fact, until the bill is completed. He actually retired from our staff 2 years ago, but he decided that he would stay and work with us until the bill was finished.

I think it is an amazing thing that we are here on the floor of the Senate today with a bill as monumental as this one is, with this tremendous bipartisan support and with no controversial amendments. It is a tribute to the staffs on both sides and to those who have worked with us in a tireless manner that we have no controversy to present to the Senate in the area of this new retirement system for Federal employees.

Mr. President, I think the Senate as a whole can take great pride in the fact that we can still work on a matter in the public interest in a nonpartisan manner and for the best interests of all concerned.

EXECUTIVE SESSION

The PRESIDING OFFICER. Under the previous order, the hour of 1:50 p.m. having arrived, the Senate will now go into executive session to consider the nomination of Alex Kozinski to be U.S. circuit judge for the ninth circuit, on which there shall be 10 minutes of debate to be equally divided and controlled, with the vote on the nomination to occur at 2 p.m.

THE JUDICIARY

NOMINATION OF ALEX KOZINSKI, OF CALIFORNIA, TO BE U.S. CIRCUIT JUDGE FOR THE NINTH CIRCUIT

Mr. STEVENS. I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I rise in favor of the nomination of Judge Alex Kozinski for the Ninth Circuit Court of Appeals. Judge Kozinski graduated cum laude from UCLA in 1972. He graduated first in his class in law in 1975 at UCLA. He was law clerk to Judge Anthony M. Kennedy of the Ninth Circuit Court of Appeals in 1976. He was law clerk of Chief Justice Warren Burger in 1977. He served as assistant counsel in the Office of the Counsel to the President in 1981. He served as special counsel to the Merit Systems Protection Board from 1981 to 1982. He served as chief judge of the U.S. Claims Court from 1982 to the present. He is the chief judge now on the Claims Court.

Mr. President, there has been some charge here that he was overbearing with his employees. Three former employees of Alex Kozinski, the former attorney in charge of the Office of Special Counsel, the former attorney in charge of Hatch Act enforcement, and the Deputy Special Counsel, Merit Systems Protection Board, were unanimously of the opinion that while Judge Kozinski was special counsel they enjoyed an excellent working relationship with him. He was a man of good judgment, they said, a man of integrity and decisiveness. Judge Kozinski was demanding and set high standards for his staff but he was a very caring man for individuals.

Mr. President, I wish we had more Judge Kozinskis in this Government.

He set high standards. Some of the employees maybe did not like that and they are the ones who are complaining. The people who admired him the most were those who were faithful employees and did a good job. We are proud of the service he rendered.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time?

Mr. LEVIN addressed the Chair.

The PRESIDING OFFICER. The Senator from Michigan.

Mr. LEVIN. Mr. President, the Constitution tells us to advise and consent the President on his nominations to the Federal court. It tells us to be active in that process, not to go along with the nominee but to give our best judgment, our best advice, and then decide whether or not to consent. This appointee has been nominated to the second highest court in the country. Not one person on the ABA board said that he was extremely well qualified or even well qualified, a majority said he was qualified, and a minority said he was unqualified, and that occurred prior to the hearings in this matter and the correspondence which has been exchanged between Judge Kozinski and Senators THURMOND, BIDEN, and myself.

We have a man here who is obviously academically qualified, who is hard working, smart, and so forth, but who woefully lacks, on a consistent basis, the judicial temperament, the fairness, the sensitivity and the compassion which we should all insist of our Federal judges.

Former employees describe him as cruel and harsh and sadistic. One of those employees say, "After 20 years of Federal personnel management experience I cannot recall a more callous disregard for people than Mr. Kozinski exhibited."

What did a Federal judge say in hearing a case following Judge Kozinski's termination of a 25-year veteran of Federal service who developed life-threatening heart disease? What did that Federal judge say about that action of Judge Kozinski? There is, "No discernible valid, legitimate, acceptable governmental interest in doing anybody this way."

Judge Kozinski circulated an editorial in an effort to gain support for this confirmation which unfairly smeared a group which opposed his nomination.

It is clearly a smear and it is clearly unfair, connecting them with an organization with which they are not connected, and have not been for 1½ years. Judge Kozinski said of Mary Eastwood, when she refused to accept an appointment to San Francisco to take over that office—this is a former Acting Special Counsel—he said that she had abandoned her responsibilities and he did not know why it was that she refused to go to San Francisco. That is what he represented to this Senate in a letter. As a matter of fact, she had in a memo to Judge Kozinski explained that for 20 years she had lived here, her friends were here, her family was here, and that was the reason why she did not want to go. So he has not been fair to people, he has not been fair to people who appear in front of him, and he has not been straight with the U.S. Senate.

If I have any time remaining, I reserve the remainder of it.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I yield 2 minutes to the distinguished Senator from California.

The PRESIDING OFFICER. The Senator from California.

Mr. WILSON. Thank you, Mr. President.

Mr. President, we are about to engage in a vote, and I hope that we will cast that vote wisely with a view toward the kind of precedent we are setting for the consideration of judicial nominees. It is a serious business, and the discretion of the President, although subject to the advice and consent of the Senate, it seems to me is due the kind of consideration, regardless of party, regardless of the President, that we would expect if each of us were an appointing authority. Indeed, when we made recommendations to the President with respect to district court judges, we take great offense if those recommendations are not given due weight.

Well, here we have someone who is acknowledged to be a brilliant student of the law, someone who is acknowledged to be a tough manager, and apparently that has been his problem with some of his employees. If there is a Senator on this floor who has never been unkind, short of patience, overly painstaking with an employee, let him hold up his hand. If there are any in that category, and we are to limit the vote on those, then we will not have a vote today.

Mr. President, we are going to set a very dangerous precedent if we begin to view judicial candidates in strict partisan terms, and I think we need to be very careful that we do not give that impression.

The PRESIDING OFFICER. All the time in the control of the Senator from South Carolina has expired. The Senator from Michigan has 1 minute.

Mr. WILSON. I thank the Chair.

Mr. SYMMS. Mr. President, I support the nomination of Alex Kozinski to the U.S. Court of Appeals for the Ninth Circuit. The ninth circuit has jurisdiction over my State of Idaho and other Western States, and I am pleased that the President has chosen a person of Judge Kozinski's intellect and legal qualifications to fill this important position on the Federal bench.

Judge Kozinski currently serves as chief judge of the U.S. Claims Court which was created by the Federal Courts Improvement Act of 1982. In this position, he has earned the respect of colleagues for his diligent efforts to establish that court's reputation as a first-class judicial institution.

One of those colleagues; Judge John Weise, made the following remarks in a letter to the distinguished chairman of the Judiciary Committee, Senator THURMOND:

> Confronting the new court were many problems: an inherited backlog of over 1,700 cases; the uncertain burden of coping with an expanded Tucker Act jurisdiction; a significant reduction in overall staffing; and, indeed, even the inefficiencies of a physical plant in drastic need of improvement.
>
> By personal example Chief Judge Kozinski showed that the court could manage its docket with efficiency and fairness: he performed the administrative duties of his office while concurrently maintaining a full trial docket and achieving one of the highest case disposition rates. More could indeed be done with less!

This is the kind of public service we always seek but rarely find, and I believe Judge Kozinski should be commended for his efforts.

Mr. President, I have had the pleasure of meeting Judge Kozinski and reviewing his academic and professional achievements. It is a remarkable record of success, including his graduation at the top of his UCLA law school class, his work as a private attorney and as assistant counsel to the President, and his dedicated service as special counsel to the Merit Systems Protection Board and most recently as chief judge of the U.S. Claims Court.

His is an American success story which began with his family's emigration from Romania to the United States in the early sixties. His personal experience with communism has convinced him that it is "an evil, imperialist system." And as a result of that experience, Judge Kozinski retains what he calls "a deep, deep suspicion of what government can do if unrestrained." I believe it is this personal experience and conviction which afford Judge Kozinski the prudence and judicious temperament necessary to make him an outstanding member of the Federal appellate bench.

Without reservation or qualification, I recommend Judge Kozinski to my colleagues and urge them to approve his nomination to the Ninth Circuit Court of Appeals.

Mr. KENNEDY. Mr. President, I join my colleague from Michigan and others in opposing the confirmation of Alex Kozinski to be a judge on the Ninth Circuit Court of Appeals.

Judge Kozinski, in his conduct as head of the Office of Special Counsel in the Merit Systems Protection Board and in his conduct and testimony during the confirmation process, has

demonstrated that he lacks the qualifications necessary to be a Federal appellate judge.

The most troubling aspect of the Kozinski nomination is his misleading and evasive testimony before the Senate Judiciary Committee on controversial matters related to his nomination. Judge Kozinski has suggested that, in dealing with the Senate Judiciary Committee, he did not have an obligation to fully disclose the evidence on both sides of an issue. Following that approach, he gave less than complete and accurate accounts of the following matters:

MARY EASTWOOD CASE

Mary Eastwood challenged her employment termination by Judge Kozinski when he was the head of the Office of Special Counsel at the Merit Systems Protection Board. Judge Kozinski, in a letter to Senators THURMOND and BIDEN, implied that she lost her case. He neglected to mention that she received $22,000 in back pay and $10,000 in attorneys' fees and he sent the committee only half of the settlement agreement, the half that did not contain the attorneys' fees award.

WORKING RELATIONSHIP WITH HIS STAFF AT THE OFFICE OF SPECIAL COUNSEL

At his confirmation hearing, Judge Kozinski said that his working relationship with his staff was excellent. Numerous affidavits submitted to the Judiciary Committee by employees who worked for Judge Kozinski flatly contradicted his representation, and provided numerous, appalling incidents of the nature of the relationships.

DISTRIBUTING AN INACCURATE EDITORIAL LINKING THE GOVERNMENT ACCOUNTABILITY PROJECT AND TERRORIST GROUPS

In two letters to supporters asking them to lobby for him, Judge Kozinski enclosed an inflammatory radio editorial linking a group opposing him, the Government Accountability Project [GAP], to the Institute for Policy Studies [IPS], which the editorial characterized as a "revolutionary group hostile to the United States with ties to terrorist groups." In fact, GAP disassociated itself from IPS 1½ years ago.

In his letter to Senators THURMOND and BIDEN, Judge Kozinski stated that he had not sent any letters "impugning persons questioning my qualifications and urging recipients to lobby on my behalf."

FINED TWO ATTORNEYS WITHOUT NOTICE OR OPPORTUNITY TO BE HEARD

While serving on the U.S. Claims Court, Judge Kozinski summarily fined two attorneys for filing a nonmeritorious complaint of judicial misconduct. In a letter to Senators THURMOND and BIDEN, he cited 25 cases as precedent for his action. In his second confirmation hearing, Judge Kozinski conceded that the cases he cited were not judicial misconduct cases and required notice prior to the imposition of sanctions. When pressed, he acknowledged that, contrary to his representation in his letter, his action was unprecedented.

In addition to his lack of candor with the Judiciary Committee, Judge Kozinski has demonstrated that he lacks compassion and basic decency in his dealings with his subordinates. His tenure at the Office of Special Counsel was marked by harsh and inappropriate conduct towards his staff. He edited staff work in "technicolor," using several different colors of ink and making demeaning personal remarks. He virtually threatened to fire an aide over the rescheduling of a picnic, and even sought to fire a messenger because a piece of mail was lost.

Judge Kozinski is a bright young Court of Claims judge who has been named to an extremely important position. In all but a tiny percentage of cases, the court of appeals is the court of last resort in our judicial system. We have a solemn responsibility to assure that the judges we confirm to the federal appellate bench possess high integrity, good judgment, and reasonable compassion. Judge Kozinski fails to meet these essential standards and he should not be confirmed.

Finally, Mr. President, I also want to commend Senator CARL LEVIN for his unusual diligence in developing the facts on Judge Kozinski. Senator LEVIN is not a member of the Senate Judiciary Committee—but he should be. For in my opinion, he has done one of the best—if not the best—jobs, from a standing start, that I have seen on a nomination to a lower Federal court in my 23 years on the committee. I congratulate Senator LEVIN on his brilliant work on this nomination, and I urge the Senate to heed the overwhelming case our colleague has presented against the fitness of this nominee to be a Federal judge.

Mr. BIDEN. Mr. President, I am of the opinion that the nominee before us today is exceedingly intelligent and competent. However, since the committee reported, without objection, Mr. Kozinski's nomination to the full Senate, Senator LEVIN, on the basis of new information, raised disturbing issues concerning Mr. Kozinski's candor during his initial confirmation hearing, including his responses to Senator SIMON's written interrogatories and to Senator LEVIN's October 8 letter to Chairman THURMOND and me. Candor and forthrightness are measures of a nominee's temperament which is an important prerequisite for a judge.

Those issues primarily involve Mr. Kozinski's representations concerning his record as Special Counsel to the Merit Systems Protection Board, an office created by Congress to protect whistleblowers from reprisals by Government agencies. Numerous former employees submitted detailed affidavits to support allegations that Mr. Kozinski failed to adequately investigate and protect whistleblowers in specific cases.

In addition, Senator LEVIN questioned Mr. Kozinski's candor in defending his circulation of a copy of a radio editorial implying that certain of his opponents were somehow supportive of terrorist groups with interests hostile to the United States.

Finally, Senator LEVIN questioned Mr. Kozinski's candor in explaining precedents supporting his judicial decision summarily reprimanding and fining attorneys without notice and an opportunity to be heard.

The essence of Senator LEVIN's concern is whether Mr. Kozinski lacks the requisite temperament for appointment to the important, life-tenured position of the appeals court. Although I was concerned about many of these same issues when the Judiciary Committee first considered Mr. Kozinski's nomination I gave him the benefit of my doubts.

As a result of Senator LEVIN's concerns, the Judiciary Committee held a second hearing on Mr. Kozinski's confirmation. It was my hope and expectation that Mr. Kozinski had been completely candid with the Judiciary Committee and as a consequence had the temperament which we ought to expect of a judge. For a nominee, testifying under oath, before a Senate committee has an obligation, not unlike the obligation of a judge writing a judicial opinion, to present fully all the facts regardless of whether they are perceived to be favorable.

I have concluded that Mr. Kozinski does not, and I shall vote against his confirmation.

Mr. HATCH. Mr. President, as we prepare to vote, I would like to make just a few brief comments. First, with respect to the allegations made against Judge Kozinski, I can say—after sitting through all the hearings and reviewing every detail of every criticism—that there is not a single allegation supported by evidence of substance. To the contrary, every allegation has an explanation which further establishes the judge's character and judicial temperament. Frankly, I think the Senate should be somewhat embarrassed that it has lodged such groundless criticisms against this outstanding jurist.

In the closing moments of this debate, however, I would like to focus the Senate on the evidence of most relevance to the Senate's decision—Judge Kozinski's performance at the head of the U.S. Court of Claims. Judge Kozinski took over a new court with new jurisdiction, few resources, and myriad unanticipated problems that accompany the inauguration of a

new Federal court. He has earned the respect and loyalty of all the judges and staff of his court. In only 3 years, he has established that court as one with a fine reputation. He has reduced the backlog it was born with, despite being short one judge for more than a year. He has carried a full caseload in addition to his administrative duties as chief judge. In 3 years, he has published 56 opinions, disposed of over 170 cases, and handled countless motions and hearings. He has already logged 110 days of trial on the bench. This is a record that has won him the respect of the President that nominated him for the ninth circuit as well as the esteem of his fellow judges and legal colleagues. The Senate should be honored to approve an individual of this caliber for the Federal bench.

Mr. LEVIN. Mr. President, the issue here is obviously not whether Judge Kozinski is academically qualified. The question is his temperament, how fair he is to people, how straight he is with the Senate of the United States.

One last example that I want to share is when he told the Judiciary Committee about his decision to summarily impose sanctions, without notice and without a hearing, on attorneys before him was well precedented. In fact, he cited about 25 cases supporting that extraordinary action. As a matter of fact, when pressed at his hearing last Friday, he admitted that his action was totally unprecedented, unlike what he represented to the Senate.

Mr. President, Judge Kozinski lacks the compassion, the sensitivity, the commitment to fairness and forthrightness to be a Federal appellate judge.

The PRESIDING OFFICER. All time having expired, the question is, Will the Senate advise and consent to the nomination of Alex Kozinski, of California, to be U.S. circuit judge for the ninth circuit? On this question, the yeas and nays have been ordered, and the clerk will call the roll.

The bill clerk called the roll.

Mr. SIMPSON. I announce that the Senator from Pennsylvania [Mr. HEINZ] is necessarily absent.

Mr. CRANSTON. I announce that the Senator from West Virginia [Mr. ROCKEFELLER] is necessarily absent.

I also announce that the Senator from Nebraska [Mr. ZORINSKY] is absent because of illness.

I further announce that, if present and voting, the Senator from West Virginia [Mr. ROCKEFELLER] would vote "nay."

The PRESIDING OFFICER (Mr. WALLOP). Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 54, nays 43, as follows:

[Rollcall Vote No. 288 Ex.]

YEAS—54

Abdnor	Gramm	Murkowski
Andrews	Grassley	Nickles
Armstrong	Hatch	Packwood
Boschwitz	Hatfield	Pressler
Chafee	Hawkins	Quayle
Cochran	Hecht	Roth
D'Amato	Heflin	Rudman
Danforth	Helms	Simpson
DeConcini	Humphrey	Specter
Denton	Kassebaum	Stafford
Dixon	Kasten	Stennis
Dole	Laxalt	Stevens
Domenici	Long	Symms
Durenberger	Lugar	Thurmond
East	Mathias	Trible
Evans	Mattingly	Wallop

Cranston	Lautenberg	Simon
Dodd	Leahy	Weicker
Eagleton	Levin	
Exon	Matsunaga	

NOT VOTING—3

Heinz	Rockefeller	Zorinsky

So the nomination was confirmed.

Mr. THURMOND. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. HEFLIN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. DOLE. Mr. President, I ask unanimous consent that the President be immediately notified of the confirmation of this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. DOLE. Mr. President, I ask unanimous consent that the Senate go back into legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, the distinguished leader has asked for a comment on the pending legislation. For the information of the Senate, we have worked out the disagreements on all of the amendments that are covered by the time agreement.

We will be in the process of accepting them all shortly. We expect one rollcall vote on this on final passage, and that will be the only final passage. That should take place in roughly an hour.

ORDER OF PROCEDURE

Mr. DOLE. Mr. President, will the Senator yield?

Mr. STEVENS. I am happy to yield to the leader.

Mr. DOLE. Mr. President, as I indicated to the distinguished minority leader, if we can put some of these things together, there will be a likelihood of no session tomorrow.

I think I am about to be safe in indicating that we will not be in session tomorrow. After we finish this, we will take up the D.C. appropriation bill. That will be a very short debate.

There will be one vote. Depending on what happens to the vote, that will determine the future of the bill.

Then we will try to reach some unanimous-consent agreement on reconciliation. Senator CHILES, Senator DOMENICI, and others are working on that this afternoon.

So I am prepared to indicate at this time that we will not be in session tomorrow.

FEDERAL RETIREMENT REFORM ACT

The Senate continued with the consideration of the bill (S. 1527).

Mr. GORE addressed the Chair.

The PRESIDING OFFICER. Who yields time?

Mr. EAGLETON. I yield such time as the Senator may require.

The PRESIDING OFFICER. The Senator from Tennessee.

Mr. GORE. Mr. President, I am pleased to be a cosponsor of S. 1527, the Federal Retirement Reform Act of 1985. As a cosponsor of this bill, I find myself in good company because by now most of my colleagues on the Senate Governmental Affairs Committee are also cosponsors.

To varying degrees, each of my colleagues on the committee has devoted considerable time and thought to this legislation. Virtually all of our potential differences have been aired without the rancor that often characterizes issues in which the stakes are so high. None of the cosponsors has achieved everything he has sought, yet we have all made signficant contributions.

I wish to add my voice to those that have already been raised in praise of the chairman of the subcommittee, Senator STEVENS; the chairman of the full committee, Senator ROTH, and the ranking minority member of the full committee, Senator EAGLETON.

As a freshman member of the Governmental Affairs Committee, I wondered what the experience of this legislation would be like, but I must say that I have found it enjoyable and educational, and I have learned a great deal in particular from the three senior Senators whom I just mentioned. I thank them for allowing me to be a part of such an enjoyable, deliberative process.

Mr. President, the 1983 decision to extend Social Security coverage to Federal employees left Congress with

the difficult task of redesigning the Civil Service Retirement System. That responsibility must be discharged by the end of this year, according to the 2-year period we allotted ourselves. Our failure to do so will require Federal workers who have started work since January 1984, or who will be coming to the Federal Government in the future, to contribute up to 14 percent of their hard-earned pay, for pension benefits which will be uncertain at best. It is obvious, therefore, that we have to act.

Throughout our deliberations, our focus has been to ensure that Federal employees, at work and upon retirement, receive fair and reasonable compensation for their service. That compensation should be fair and reasonable in the eyes of the workers themselves, whose efforts are vital to the varied functions of our Federal Government. It should be fair and reasonable, as well, in the eyes of the taxpayers, who correctly insist that their tax dollars be spent sensibly and to good result.

As is often the case, we have been obligated to examine a terrain cluttered with a number of highly technical issues. From that clutter of issues, we have sought to extract a sensible retirement policy—a policy that must be clear enough for those who will depend upon it for their economic security, and flexible enough to address the various situations and needs that Federal workers may face during their careers.

The manner is which we ultimately address these concerns will recast the basic Federal retirement structure and its pattern of payments for decades. We are, therefore, in a unique position to influence the kind of Federal work force this country should have.

Mr. President, as the ranking minority member of the subcommittee of which Senator STEVENS is the chairman, I have been in a position to see and benefit from the depth of his extensive knowledge in the pension field. That resource, together with the leadership and cooperation of both Chairman ROTH and the senior Senator from Missouri, Senator EAGLETON, has forged a good bill which I commend to every member of this body. The careful attention to details of substance and leadership which these Senators have devoted to this challenge over the past several years has been evident in every aspect of the process. I am a newcomer to this process and I am proud to have been able to play a part in it. We also owe a debt of thanks to the tireless efforts of the committee staff and the team of congressional research service analysts who assisted the committee, and to the witnesses who testified during lengthy hearings on this issue.

The bill's three-tier design combines Social Security with a defined benefit tier that focuses on providing a sure and certain retirement benefit, and a defined contribution tier that provides for portability and flexibility. The bill goes a step further by providing Federal workers with an option of choosing between two alternative mixes of retirement plans, according to their needs. Both alternatives offer significant advantages to the Federal worker.

Mr. President, I am cosponsoring this bipartisan substitute, because I believe it addresses all the concerns I targeted in my floor statement at the time Senators ROTH and STEVENS introduced S. 1527 in its original form. Those issues—the COLA, early retirement, the mix between defined benefit and defined contribution, and the benefits for survivors and disabled workers—all require important choices. The resolution of those choices lies at the heart of a sound pension system.

Chief among those issues is the degree to which we should protect future pension benefits from dwindling in the face of rising prices. To be sure, this is a familiar and difficult issue for all of us. The fixed incomes of retirees must be accorded a measure of economic security.

Because Social Security continues to be fully and automatically adjusted for changes in the cost of living, it serves as the basic component of income protection for all workers. But a pension must also serve as a dependable source of retirement income. That objective is only possible if its value is maintained. While the expense of COLA's in benefit programs is of concern to all of us, we must be careful not to schedule an erosion in benefit value that grows worse with each passing year.

With those concerns in mind, S. 1527 reflects an understanding that an adequate retirement benefit should not rely solely upon the inflation protection granted by the Social Security cost-of-living adjustment. That is particularly true for option B which provides generous inflation protection to early retirees and full COLA's to all retirees at age 62 and above.

As they plan for their retirement years, Federal employees deserve to know with certainty at what age benefits begin. The current Civil Service Retirement System has been criticized for permitting employees to retire as early as age 55. This costly feature of the system has been a major focus of our deliberations.

It is important to note that many private-sector employers, particularly those with a heavy concentration of physical labor, permit unreduced retirement at age 55 to workers with careers spanning 30 or more years. Virtually all private-sector pensions make some provision for retirement at that age. Furthermore, despite the range of jobs in the Federal Government and the private sector, the average retirement age is around 61—for workers inside or outside the Government. That comes as a surprise to some casual observers of the pension issues.

With 62 as its earliest age of eligibility, Social Security reduces the benefits Federal employees will receive at earlier ages. Although option A of this bill would go further, by reducing the Federal pension benefit drawn before age 62, option B would permit Federal workers who have devoted a lifetime to Government service to receive an unreduced pension benefit prior to age 62.

We cannot guarantee every worker in every circumstance the same total benefits he or she would now receive. The issue thus becomes one of determining the appropriate mix of benefits to achieve the goal of fairly distributing those benefits among employees at every salary level. S. 1527 would establish a contributory, employee-savings plan with significant tax benefits accruing to those who elect to participate. The savings plan also provides participants under both options with generous Government matching funds.

The thrift plan component will give every worker the opportunity to supplement a defined benefit and predictable pension amount. The bill recognizes that some workers will not be in a financial position to participate in the savings plan fully and consistently throughout their careers. For workers falling into that category, this bill provides a basic defined pension which, along with Social Security, is intended to produce adequate retirement income on its own.

Before I move on, I would like to raise two related issues. First, this bill and several of the pending amendments provide special benefits for employees whose job requirements are unusually demanding. The retirement legislation before the House committee currently provides more generous benefits for some of these groups—including the U.S. Park Police and National Guard technicians. I hope that in resolving the differences between this legislation and that in the other body, the conferees will be able to fashion a standard to measure the needs of each of these groups fairly and consistently.

Second, I feel it bears noting when considering the thrift plan provisions of this bill, that the investment of those funds in common stocks may not always yield a greater return than investment in Government securities. I have requested an analysis of this issue from the Congressional Research Service, and I ask unanimous consent that a copy of the analysis be printed in the record at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See Exhibit 1.)

Mr. GORE. I believe that it is important to require, as S. 1527 does, that each thrift plan participant be fully apprised for the higher risks associated with investment of thrift plan money in common stocks as opposed to Government securities.

Finally, a pension plan must not only meet the obvious and expected needs of its retirees, but must assure its participants and their families adequate income protection in the event of death or disability. We can do no less than provide our employees a package of specific family protections should such family disasters strike.

I have taken particular interest in the design of the survivors benefits package. Chief among our concerns in protecting survivors have been the needs of displaced homemakers. To that end, this legislation provides an immediate and unreduced annuity for survivors of Federal workers who die prior to retirement. The legislation also establishes a basic group life insurance benefit which amounts to a 2-year salary continuation.

In conclusion, Mr. President, this bill combines compassion with confidence and good fiscal sense. I urge its passage.

Again, Mr. President, I commend my senior colleagues on the committee who have done so much to craft this legislation.

EXHIBIT 1

CONGRESSIONAL RESEARCH SERVICE,
THE LIBRARY OF CONGRESS,
Washington, DC, November 7, 1985.

To: Hon. Albert Gore, Jr.
Attention: Thurgood Marshall, Jr.
From: Dennis Snook, Civil Service Retirement Team, Education and Public Welfare Division.
Subject: Question on Risks Associated With Investing Capital Accumulation Savings in the Private Sector as opposed to Federal Securities.

You have asked us if we could provide information relating to the claim that if a capital accumulation plan (CAP) were adopted as part of a new Civil Service Retirement System (CSRS), Federal employees could achieve greater returns on CAP asssets if they invested in private investment opportunities rather than in Federal securities. While a definitive answer to this question is not possible, we are providing you with the results of study done by Richard A. Hobbie of the Civil Service Retirement Team.

Dr. Hobbie finds that while it is clear that individuals have opportunities for higher returns if money is invested in private sector market instruments, that high return is necessarily associated with greater risk. Certainly some individuals would do better by taking such risks, but a portion of the population practicing private sector investment would do less well than if they had invested the same amount of money in risk-free federal securities. Relatively recent developments in financial management could have the potential for lowering the risks to individuals by pooling the assets in a fund so that they could be invested in a broad spectrum of stocks, but the value of any participant's share of the assets would still depend on the health of the fund in the year in which the individual retired. The data in the attached report suggest that a chance of lower value in private investment always exists, no matter how diversified, and that historical experience indicates years of lowered value occasionally occur. Given that retirement funds in individual CAPs are accumulated over the years of employee service, and are thus influenced by fluctuation in common stock values, a significant risk of lower investment return from private sector investment cannot be denied.

WOULD FEDERAL WORKERS EARN A HIGHER RATE OF RETURN ON THEIR INDIVIDUAL CAPITAL ACCUMULATION PLAN ACCOUNTS IF THEY INVESTED IN COMMON STOCKS INSTEAD OF U.S. TREASURY SECURITIES?

A BRIEF ASSESSMENT

During the recent debate on civil service retirement reform, some have advocated a type of suplemental pension plan often called a "capital accumulation plan" (CAP). A CAP is a deferred compensation arrangement in which an employee can contribute before-tax or after-tax compensation to an individual account maintained in his behalf that might also receive matching employer contributions at some specified rate up to a maximum. This type of plan would allow employees hired after 1983 to contribute additional amounts voluntarily toward their retirement to supplement benefits available to them under social security and a scaled-down mandatory civil service pension plan.

If the future resembles the past, Federal workers could ear on average a higher rate of return on their individual capital accumulation accounts in common stocks instead of Treasury securities. However, because common stocks are riskier than default-free U.S. Treasury securities, some workers would earn less, some workers would earn about the same, and some workers would earn more in common stocks than they would in U.S. Treasury securities. Therefore, if Congress wants to offer Federal worker the opportunity to invest their individual CAP funds in private securities, it should do so with the recognition that some workers would earn less than they would if they invested in U.S. Treasury securities.

In the debate on how to invest individual CAP funds, the following argument has been made in support of investing in a diversified portfolio of common stocks: [1]

(1) Retirement plans have long-term investment perspectives.

(2) Contributions are made to a CAP account over many years and employees receive benefits over many years.

(3) Despite short-term volatility, the *Standard and Poor's Index* of 500 common stocks still has outperformed less risky securities, such as long-term corporate or government bonds.

(4) Moreover, even when one selects the best and worst 20 years for each type of investment, common stocks still have out performed other securities.

(5) Therefore, despite the short-term volatility of common stocks, all employees can realize a higher yield from a diversified portfolio of common stocks than from less risky investments.

The data presented to support this argument initially appear overwhelming. For example, the value of a dollar invested in common stocks at the end of 1925 would have grown in nominal terms to $248.25 by June 30, 1985 compared to only $14.51 for long-term corporate bonds, $9.68 for long-term government bonds, and $7.20 for Treasury bills.[2] Granted, annual returns to common stocks fluctuated widely from −43 percent to +54 percent, but over the long-term they grew phenomenally (see table 1). Moreover, even in the worst 20 years for common stocks (1929–1948), the real rate of return was 0.8 percent, which was not as bad as the worst 20 years for long-term government bonds at −3.1 percent (1962–1981).[3]

The main problem with this argument is that the data do not reflect a realistic pattern of individual contributions to a CAP. Assuming that the growth of one dollar contributed at the beginning of a long holding period reflects what would happen to the growth of an individual CAP fund is tantamount to assuming that all contributions for the worker's career are made in the first year. This is unrealistic, and it leads to an erroneous conclusion that short-term market fluctuations in the value of common stocks do not matter.

Short-term fluctuations are much more important than portrayed in this argument because they can dramatically affect the value of a fund in the last few years before retirement. This would occur because not only do workers tend to contribute more in later years, but even for a constant dollar contribution the annual returns in the last few years are critical. Consider a simple example in which a worker contributes a dollar per year for 20 years and earns 6.1 percent per year. At the end of 20 years he would have accumulated $20 in contributions and $17.18 in earnings for a total future value of $37.18. Half of the interest would have been earned, however, in the last five years. Therefore, the annual returns in the last few years are critical to the final value of an individual CAP.

Recognizing that short-term market fluctuations make a significant difference in the final value of the account allows one to see why some workers might be worse off if they invested in common stocks. Suppose a dollar is invested at the beginning of 1971 in a portfolio of common stocks reflecting the returns to the *Standard and Poor's Index* of 500 stocks, long-term government bonds, or a fund that would have replicated the interest earned in the Civil Service Retirement System (CSRS) trust fund.[4] At the end of 1980, common stocks would have yielded $2.25 (see table 2). This compares to only $1.47 for long-term government bonds and $1.90 for the CSRS-type fund. Thus, after 10 years it would appear that the common stocks would outperform long-term government bonds and the CSRS trust fund.

A different picture emerges when one examines shorter time periods. Granted, the funds would not have the same value in 1971 if they had been invested differently in earlier years, but it is the last few years that make the big differences. Therefore, assume for illustration that the three funds start at

---

[1] Fossel, Jon S. Investment Implications of S. 1527 Thrift Savings Plan. Alliance Capital Management Corporation, Sept. 9, 1985. 16 p.

[2] Ibid., p. 7.

[3] Ibid, slide IV.

[4] The data for the Standard and Poor's Index and long-term government bonds were for calendar years. The data for the CSRS trust fund were for fiscal years, excluding the transition quarter of 1976.

$1.00 in 1971 and the worker has, say, four years left until retirement. Also, assume that he makes no more contributions. This is as unrealistic as the data used in the argument for investment in common stocks, but including additional contributions would only exaggerate fluctuations in these data. It would not alter the conclusion.

If a worker had invested in the CSRS-type fund, his account would have grown to $1.25 at the end of 1974. The comparable figure in long-term government bonds would have been $1.23, but for common stocks it would have been only $0.85. In other words, his investment in common stocks would have depreciated by 15 percent from its initial value and by 32 percent from what it could have earned in the CSRS-type fund. Moreover, it would have taken the common stocks two years to recover to the same value as an investment in the CSRS-type fund and a total of six years to exceed it substantially. Therefore, if the worker could have afforded to wait to withdraw his funds six years after retirement, he would have been better off investing in common stocks.

This demonstrates how critical a drop in the stock market could be if it happens in the year of retirement. If the worker needs the annuity that he thought he could buy with the value of his fund before the stock market decline, then he faces three choices. First, he could delay retirement. Second, he could temporarily live at a lower level of comsumption during retirement until the stock market recovers. Then, he could buy an annuity when his funds have earned an amount at least equal to riskless investments. Third, he could accept a permanently lowered standard-of-living during retirement by buying an annuity with the depressed value of his fund.

TABLE 1.—TOTAL ANNUAL RETURNS IN PERCENTS FOR SELECTED INVESTMENTS, 1926–81 [1]

[In percents]

Year [2]	Common stocks	Long-term corporate bonds	Long-term Government bonds	U.S. Treasury bills	CSRS trust fund
1925					
1926	11.62	7.37	7.77	3.27	4.56

The PRESIDING OFFICER. Who yields time?

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. GORE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Who yields time?

Mr. EAGLETON. I yield such time as the Senator from Tennessee may consume.

AMENDMENT NO. 977

(Purpose: To eliminate the requirement of financial hardship as a condition for obtaining a loan from the Thrift Savings Fund)

Mr. GORE. Mr. President, I have an amendment which I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Tennessee [Mr. GORE] proposes an amendment numbered 977.

On page 176, line 24, beginning with "in", strike out all through "hardship" on line 25.

Mr. GORE. Mr. President, this amendment has been discussed on both sides of the aisle.

Section 8426(e) of this legislation directs the Thrift Investment Board to establish a program to make loans available from sums that an employee has contribued to the Thrift Savings Fund. Section 8426 specifies that any such loan be made only in case of financial hardship.

Because the imposition of a financial hardship requirement does not comport with the vast majority of such plan provisions in private industry, my amendment would strike the hardship requirement from the bill. The effect of the amendment would be to broaden the Board's discretion to establish a loan program under section 8426.

This amendment is prompted by my review of recent studies conducted by Hewitt Associates and the Permanent Commission on Public Employee Pension and Retirement Systems. Those studies indicate that over 80 percent of the thrift-type plans in the private sector which include loan provisions do not include a financial hardship requirement. The applicable statutory requirements direct employers who choose to make loans available to do the following: Make loans available to all participants on a nondiscriminatory basis; make sure that the loans

are adequately secured; and require that they bear a reasonable rate of interest. Although an employer may choose to impose a hardship requirement, it is not required by law.

We should leave that decision to the Board. The establishment of a hardship requirement would create a significant and costly administrative problem for the Board or whatever entity is responsible for assessing employee claims of hardship.

More importantly, I think that Federal workers under this legislation should stand on the same footing as the majority of those in private industry who participate in similar capital accumulation. I emphasize that my amendment would not alter the bill's requirement that loans be made only from amounts contribued by the employee and not from the Government matching contribution.

I have always felt that one of the attractive aspects of the thrift plan concept is the fact that it is a retirement vehicle that provides, in effect, an increase in salary through the employer matching provision. But that matching benefit only accrues to those who are able to and choose to participate. Elimination of the financial hardship requirement, in my opinion, would increase the ability and the willingness of Federal workers to participate in the thrift plan. It is a worthwhile amendment and I urge its adoption.

Mr. STEVENS. Mr. President, I have some concerns with this amendment. The bill currently permits loans in hardship cases. This amendment loosens the hardship restrictions on loans. The primary purpose of the thrift plan is to augment retirement income, not establish a new lending institution. I am particularly concerned that employees will borrow their contributions, not repay them and simply take advantage of the Government contributions at retirement.

My understanding is that the executive director of the board will continue to regulate loan arrangements from the fund. I would be interested to know from the distinguished manager of the bill from the Democratic side what his views are on loan restrictions.

Mr. EAGLETON. As the distinguished Republican manager of the bill knows, the loan arrangements are still subject to ERISA restrictions which include a requirement to repay the loan at the market rate of interest, plus the loan must be secured. But I would agree with my colleague that the policy for loans, while not based on financial hardship, still be limited to those situations in which a verifiable need for the loan exists, such as education or medical expenses.

Mr. STEVENS. I would hope that the executive director has the requisite authority to assure the loans be repaid.

Mr. EAGLETON. I agree. It is clearly our intention that the executive director have the authority to enforce the requirement to repay the loans.

Mr. STEVENS. Mr. President, this comports with the private sector practice. This amendment of Senator GORE's eliminates that hardship restriction.

Mr. President, we are prepared to accept the amendment.

The PRESIDING OFFICER. Do the Senators yield back their time?

Mr. STEVENS. Mr. President, there is no specific time on any amendment, is there?

The PRESIDING OFFICER. There are 10 minutes on each side.

Mr. STEVENS. I yield back our time.

Mr. GORE. We yield back our time.

The PRESIDING OFFICER. All time is yielded back.

The question is on agreeing to the amendment.

The amendment (No. 977) was agreed to.

Mr. STEVENS. Mr. President, I move to reconsider the vote.

Mr. GORE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

INCREASE IN PUBLIC DEBT LIMIT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate a message from the House of Representatives on House Joint Resolution 372.

The PRESIDING OFFICER laid before the Senate the following message from the House of Representatives:

Resolved, That the House disagree to the amendments of the Senate to the amendments of the House to the amendments of the Senate to the resolution (H.J. Res. 372) entitled "Joint resolution increasing the statutory limit on the public debt", and ask a further conference with the Senate on the disagreeing votes of the two Houses thereon.

Ordered, That the following are appointed as conferees:

From the Committee on Ways and Means: Mr. Rostenkowski, Mr. Gibbons, Mr. Pickle, Mr. Rangel, Mr. Stark, Mr. Jones of Oklahoma, Mr. Jenkins, Mr. Gephardt, Mr. Russo, Mr. Duncan, Mr. Archer, Mr. Vander Jagt, Mr. Crane, and Mr. Frenzel.

From the Committee on Appropriations: Mr. Whitten, Mr. Boland, Mr. Natcher, Mr. Smith of Iowa, Mr. Pursell, and Mr. Loeffler.

From the Committee on Rules: Mr. Pepper, Mr. Moakley, Mr. Derrick, Mr. Beilenson, Mr. Frost, Mr. Latta, and Mr. Lott.

From the Committee on Government Operations: Mr. Brooks, Mr. Fuqua, Mr. Waxman, Mr. Synar, Mr. Horton, and Mr. Kindness.

From the Committee on the Budget: Mr. Gray of Pennsylvania, Mr. Downey of New York, Mr. Miller of California, Mr. Leath of Texas, Mr. Kemp, and Mr. Gradison.

Appointed as additional conferees: Mr. Foley, Mr. Ford of Michigan, Mr. Obey, Mr. Aspin, Mr. Mineta, Ms. Oakar, Mr. Panetta, Mr. Fazio, Mr. Michel, Mr. Dickinson, Mr. Cheney, Mr. Lewis of California, Mrs. Martin of Illinois, and Mr. Mack.

Mr. STEVENS. Mr. President, this has been cleared with the distinguished leader on the Democratic side of the aisle. I move that the Senate insist on its amendments and agree to the conference requested by the House and that the Chair be authorized to appoint conferees on the part of the Senate.

The motion was agreed to and the Presiding Officer [Mr. WALLOP] appointed Mr. PACKWOOD, Mr. DOMENICI, Mr. ROTH, Mr. DANFORTH, Mr. ARMSTRONG, Mr. GRAMM, Mr. RUDMAN, Mr. LONG, Mr. BENTSEN, Mr. CHILES, Mr. LEVIN, Mr. BOREN, and Mr. HOLLINGS conferees on the part of the Senate.

FEDERAL RETIREMENT REFORM ACT

AMENDMENT NO. 978

(Purpose: To amend the Central Intelligence Agency Retirement Act of 1964 for Certain Employees to establish a new retirement and disability plan for certain employees of the Central Intelligence Agency)

Mr. EAGLETON. Mr. President, I have an amendment I send to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Missouri [Mr. EAGLETON], for himself and Mr. STEVENS, proposes an amendment numbered 978.

Immediately following title III, insert the following:

TITLE IV—CENTRAL INTELLIGENCE AGENCY RETIREMENT

REFERENCES

SEC. 401. The Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1043; 50 U.S.C. 403 note) is amended—

(1) in section 111, by striking out "When" and inserting in lieu thereof "Except as otherwise provided in section 302 of this Act, when";

(2) by striking out "this Act" each place it appears in title II except in sections 201 and 264, and inserting in lieu thereof "this title"; and

(3) by inserting "under this title" after "payable from the Fund" each place it appears in title II.

CONTRIBUTIONS TO THE CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

SEC. 402. Section 211 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1045; 50 U.S.C. 403 note) is amended—

(1) by inserting "Except as provided in subsection (d)," before "7 percent" in the first sentence of subsection (a); and

(2) by adding at the end thereof the following new subsection (d):

"(d)(1) In the case of a participant who was a participant subject to this Act before January 1, 1984, and whose service—

"(A) is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, and

"(B) is not creditable service for any purpose under title III of this Act or chapter 84 of title 5, United States Code,

there shall be deducted and withheld from the basic pay of the participant under this subsection during any pay period only the amount computed pursuant to paragraph (2).

"(2) The amount deducted and withheld from the basic pay of a participant during any pay period pursuant to paragraph (1) shall be the excess of—

"(A) the amount determined by multiplying the percent applicable to the participant under subsection (a) by the basic pay payable to the participant for such pay period, over

"(B) the amount of the taxes deducted and withheld from such basic pay under section 3101(a) of the Internal Revenue Code of 1954 for such pay period.".

OFFSET OF ANNUITY BY THE AMOUNT OF SOCIAL SECURITY BENEFITS

SEC. 403. Section 221 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1045; 50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(p)(1) Effective on the first day of the month in which an annuitant, including a survivor, becomes 62 years of age, the annuity computed under the other subsections of this section and payable to the annuitant shall be reduced (but not below zero) by the amount determined by multiplying the amount of the old-age and survivors insurance benefits which the annuitant is entitled to receive under section 202 of the Social Security Act for the such month, if any, by a fraction—

"(A) the numerator of which is the total of the wages (within the meaning of section 209 of the Social Security Act) for service which is referred to in paragraph (2) of this subsection for years before the calendar year in which such month occurs, and

"(B) the denominator of which is the total of all wages (within the meaning of section 209 of the Social Security Act) and all self-employment income (within the meaning of section 211(b) of the Social Security Act)—

"(i) of such annuitant, or

"(ii) in the case of a survivor, of the participant on whose service the annuity is based,

credited for years after 1936 and before the calendar year in which such month occurs.

"(2) The service referred to in paragraph (1)(A) of this subsection is service which is covered by amounts deducted and withheld as provided in section 211(d), is service described in subparagraphs (C) through (G) of section 210(a)(5) of the Social Security Act, and is taken into account for the purpose of computing the annuity to which paragraph (1) of this subsection applies.".

TREATMENT OF CERTAIN RECALL SERVICE

SEC. 404. Section 271 of the Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1052; 50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(c) Subsection (b) shall not apply to an annuitant who becomes subject to title III of this Act by reason of recall service.".

CONFORMITY BETWEEN THE FEDERAL RETIREMENT SYSTEM AND THE CENTRAL INTELLIGENCE AGENCY PENSION SYSTEM

SEC. 405. Section 292 of the Central Intelligency Agency Retirement Act of 1964 for Certain Employees (50 U.S.C. 403 note) is amended by adding at the end thereof the following new subsection:

"(c) The President shall maintain, under the same conditions and in the same manner as provided in subsections (a) and (b), existing conformity between the Federal Retirement System provided in chapter 84 of title 5, United States Code, and the Central Intelligence Agency Pension System provided in title III of this Act.".

CENTRAL INTELLIGENCE AGENCY PENSION SYSTEM

SEC. 406. The Central Intelligence Agency Retirement Act of 1964 for Certain Employees (78 Stat. 1043; 50 U.S.C. 403 note) is amended by adding at the end thereof the following:

"TITLE III—CENTRAL INTELLIGENCE AGENCY PENSION SYSTEM

"ESTABLISHMENT

SEC. 301. (a) There is hereby established a Central Intelligence Agency Pension System.

"(b)(1) Except as otherwise specifically provided in this title or any other provision of law, all participants in the Central Intelligence Agency Pension System shall be subject to the provisions of chapter 84 of title 5, United States Code, and shall be treated in all respects as persons whose participation in the Federal Retirement System provided in that chapter is required by section 8402 of such title.

"(2) Participants in the Central Intelligence Agency Pension System may not make an election authorized by section 8418(c) of title 5, United States Code, and shall not be entitled to any benefits under chapter 84 of such title which result from such an election.

"DEFINITIONS

"SEC. 302. As used in this title, unless otherwise specified—

"(1) the term 'annuity' means the annuity which is described in subchapter II of chapter 84 of title 5, United States Code, and is payable to a Pension System participant;

"(2) the term 'dynamic assumptions' has the same meaning as provided in section 8401(9) of title 5, United States Code;

"(3) the term 'Fund' means the Central Intelligence Agency Retirement and Disability Fund maintained by the Director pursuant to section 202;

"(4) the term 'normal cost' means the entry-age normal cost of the provisions of the System which relate to the Fund, computed by the Director in accordance with generally accepted actuarial practice and standards (using dynamic assumptions) and expressed as a level percentage of aggregate basic pay, and shall be used to value the cost of the System for all purposes for which the cost of the System is required to be determined;

"(5) the term 'Pension System participant' means a person who participates in the Central Intelligence Agency Pension System;

"(6) the term 'supplemental liability" means the estimated excess of—

"(A) the actuarial present value of all future benefits payable from the Fund under this title, over

"(B) the sum of—

"(i) the actuarial present value of the future contributions to be made on behalf of participants pursuant to section 305(b)(2)(A) of this Act; and

"(ii) the balance in the Fund attributable to the System on the date the supplemental liability is determined or to contributions made under section 204(b) or 205 of the Federal Employees' Retirement Contribution Temporary Adjustor Act of 1983 (97 Stat. 1106; 5 U.S.C. 8331 note); and

"(7) the term 'System' means the Central Intelligence Agency Pension System.

"PENSION SYSTEM PARTICIPANTS

"SEC. 303. (a) Except for persons excluded by subsection (b), all officers and employees of the Agency, any of whose service after December 31, 1983, is employment for the purpose of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954 shall be Pension System participants.

"(b) Participants in the Central Intelligence Agency Retirement and Disability System who were participants in such system on or before December 31, 1983, and who have not had a break in service in excess of 1 year since that date, are not made Pension System participants by this section, without regard to whether they are subject to title II of the Social Security Act.

"SPECIAL RULES RELATING TO THE ENTITLEMENT OF SECTION 203 EMPLOYEES TO ANNUITY

"SEC. 304. (a) Any Pension System participant who is described in section 203 and retires voluntarily or mandatorily under section 102(c) of the National Security Act of 1947 (61 Stat. 498; 50 U.S.C. 403(c)) or section 233 or 235 of this Act under conditions authorizing an immediate annuity for participants in the Central Intelligence Agency Retirement and Disability System shall be entitled to an immediate annuity computed under subsections (a)(2), (a)(3), and (c) of section 8413 of title 5, United States Code. The annuity shall not be subject to reduction under section 8414 of such title.

"(b) A Pension System participant who is entitled to an immediate annuity under subsection (a) shall be entitled to receive an annuity supplement while under 62 years of age. The annuity supplement shall be based on the total creditable service of the participant and shall be computed and increased in accordance with section 8413(b) of title 5, United States Code.

"(c)(1) Any Pension System participant described in section 203 may be retired under the conditions specified in sections 233 and 235(a) and shall be retired under the conditions specified in section 235(b). Each Pension System participant so retired shall receive benefits under this title.

"(2) For the purpose of this subsection—

"(A) the term 'participant', as used in the sections referred to in paragraph (1), means a Pension System participant described in section 203; and

"(B) the term 'system', as used in section 233, means the Central Intelligence Agency Pension System.

"(d) Any Pension System participant described in section 203 who is separated under the conditions specified in section 234(a) shall be entitled to a deferred annuity under section 8412 of title 5, United States Code, unless the Director determines that the separation was based in whole or in part on disloyalty to the United States.

"FUNDING

"SEC. 305. (a) All payments under subchapters II, IV, and VII of chapter 84 of title 5, United States Code, based on the

service shall be paid by the Director from the Fund.

"(b)(1) All sums required to finance the payments referred to in subsection (a) shall be credited to the Fund.

"(2) The sums referred to in paragraph (1) are—

"(A) amounts which are determined by the Director to be necessary to defray the normal cost of the benefits, other than disability benefits, payable under this title to Pension System participants;

"(B) the sums which are transferred to the Fund by the Secretary of the Treasury to amortize over 30 years the supplemental liability of the System which is attributable to Pension System participants, as computed at the end of each fiscal year beginning after September 30, 1987; and

"(C) the sums which are transferred by the Secretary of the Treasury to the Fund out of funds appropriated to the Department of Defense for the purpose of paying the costs incurred during any year which relate to the creditable military service of Pension System participants.

"(c) At least every 5 years, the Secretary of the Treasury shall prepare periodic valuations of the Central Intelligence Agency Pension System and shall advise the Director of (1) the normal cost of the System, without regard to the cost of disability payments, (2) the supplemental liability of the System, and (3) the amounts necessary to finance the costs of the System.

"THRIFT SAVINGS PLAN

"SEC. 306. (a) The Director, in consultation with the Executive Director of the Federal Retirement Thrift Investment Board, may—

"(1) maintain exclusive records relating to Pension System participants' elections, contributions, and accounts under the Thrift Savings Plan provided in subchapter III of chapter 84 of title 5, United States Code; and

"(2) provide for investments under the Thrift Savings Plan to be made and accounted for by such Executive Director in aggregate amounts for the Central Intelligence Agency Pension System.

"(b) The Director may make the necessary allocations of earnings, losses, and charges to individual accounts of Pension System participants under the Thrift Savings Plan.

"(c) The Executive Director of the Federal Retirement Thrift Investment Board may not exercise authority under subchapter III or VIII of chapter 84 of title 5, United States Code, in the case of the Central Intelligence Agency Pension System to the extent that the Director exercises authority provided in subsections (a) and (b).

"DISABILITY

"SEC. 307. The Director, instead of the Office of Personnel Management, may contract with an administrator of benefits (as defined in section 8441(1) of title 5, United States Code), for the purpose of administration of benefits under subchapter V of chapter 84 of such title with respect to Pension System participants.

"GENERAL AND ADMINISTRATIVE PROVISIONS

"SEC. 308. (a) The Director shall administer the Central Intelligence Agency Pension System except for matters (other than matters to which section 306 of this Act applies) relating to the Thrift Savings Plan provided in subchapters III and VIII of chapter 84 title 5, United States Code, and matters (other than matters to which section 307 of this Act applies) relating to disability benefits under subchapter V of such chapter. The Director shall, with respect to the Central Intelligence Agency Pension System, perform the functions and exercise the authority vested in the Office of Personnel Management or the Director of such Office by such chapter 84, and may issue regulations for such purposes.

"(b) Section 201(c) shall apply to determinations of the Director under the Central Intelligence Agency Pension System which, if made by the Office of Personnel Managment under chapter 84 of title 5, United States Code, the Director of such Office, or an administrator of benefits (as defined in section 8441(1) of such title), would be appealable to the Merit Systems Protection Board, to such Office, or to the Director of such Office.

"TRANSITION PROVISIONS

"SEC. 309. The Director shall issue regulations providing for the transition from the Central Intelligence Agency Retirement and Disability System to the Central Intelligence Agency Pension System. For this purpose, the provisions of sections 8471, 8472, and 8473 of title 5, United States Code, relating to the Civil Service Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement under such system shall be deemed to refer in like manner to the Central Intelligence Agency Retirement and Disability System and contributions, deposits, pay computations, service credit, and disability retirement thereunder.

"REFERENCES IN OTHER LAWS

"SEC. 310. References made to participation in the Federal Retirement System in sections 8113(c), 8475, 8704(a)(2), and 8705(e) of title 5, United States Code, section 210(a)(5)(H) of the Social Security Act, and section 3121(b)(5)(H) of the Internal Revenue Code of 1954 shall be deemed to refer to participation in the Central Intelligence Agency Pension System.".

Redesignate the succeeding title and sections accordingly.

Mr. EAGLETON. Mr. President, the purpose of this amendment is to revise the current CIA Retirement and Disability System to provide retirement provisions to personnel covered by that system in the future, who were first hired after December 31, 1983, benefits comparable to the provisions Senator LUGAR's amendment provides to new Foreign Service personnel hired after that same date.

I point out that when it was established in 1964, the CIA system was patterned after the Foreign Service System. Furthermore, the proposed benefit provisions are the same as we are providing for Federal law enforcement officers.

AMENDMENT NO. 979

(Purpose: To improve the administration of retirement benefits for officers and employees of the Central Intelligence Agency)

Mr. DURENBERGER. Mr. President, I have an amendment at the desk and I ask for its immediate consideration.

The PRESIDING OFFICER. Is this an amendment to the amendment?

Mr. DURENBERGER. This is an amendment to the amendment by the Senator from Missouri.

The PRESIDING OFFICER. Is all time yielded back on the first amendment?

Mr. STEVENS. All time is yielded back.

Mr. EAGLETON. We yield back our time.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Minnesota [Mr. DURENBERGER] (for himself and Mr. HOLLINGS) proposes an amendment numbered 979 to amendment No. 978.

Mr. DURENBERGER. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 14, immediately following line 1, insert the following:

ADMINISTRATION OF THE CIVIL SERVICE RETIREMENT AND DISABILITY SYSTEM FOR EMPLOYEES OF THE CENTRAL INTELLIGENCE AGENCY

SEC. 407. Section 8347 of title 5, United States Code, is amended by adding at the end thereof the following new subsection (n):

"(n)(1) Notwithstanding any other provision of this subchapter, the Director of Central Intelligence shall—

"(A) administer the provisions of this subchapter with respect to officers and employees of the Central Intelligence Agency; and

"(B) perform the functions and duties which would otherwise be performed with respect to such officers and employees by the Office of Personnel Management or the Director of such Office under this subchapter.

"(2) The Director of the Office of Personnel Management shall furnish such information and services to the Director of Central Intelligence as the Director of Central Intelligence determines necessary to carry out paragraph (1) of this subsection.".

REPORT ON EXPANSION OF COVERAGE OF THE CENTRAL INTELLIGENCE AGENCY RETIREMENT AND DISABILITY SYSTEM

SEC. 408. (a) The Director of Central Intelligence shall determine whether it would be appropriate to expand the coverage of the Central Intelligence Agency Retirement and Disability System to include any officers and employees of the Central Intelligence Agency who are subject to the Civil Service Retirement and Disability System under subchapter III of chapter 83 of title 5, United States Code.

(b) Not later than 1 year after the date of the enactment of this Act, the Director of Central Intelligence shall transmit to the Congress the Director's determinations under subsection (a) and any recommendations for legislation which the Director considers appropriate and relate to such determinations.

Mr. DURENBERGER. Mr. President, I rise on behalf of myself and my colleague, Senator HOLLINGS, to amend the amendment of the Senator from Missouri.

Let me say first that I do this in a spirit of improving an already excellent amendment. I do it also with a

great deal of admiration and respect for anyone who has to occupy the position of chairing the Subcommittee on Civil Service, Post Office, and General Services. It is a subcommittee that handles isues that only a few people care about and that nobody ever sends thank-you notes about.

So on behalf of those of us who are on their subcommittee, I publicly compliment the Senator from Alaska and the Senator from Missouri for taking on a series of headaches that nobody else would ever want to take on and for producing in the underlying bill here, today an incredible piece of legislation. It may end up pleasing no one but it will be a testimonial, by that very fact, to their skill as legislators in this very difficult area.

Senator EAGLETON's amendment is important and must be passed. It covers two areas not included in the pending legislation—coverage of Central Intelligence Agency personnel under the new Civil Service Retirement System and inclusion of overseas agency personnel under the so-called special early retirement provisions for high risk occupations. But, unfortunately, the amendment does not go quite far enough to cover the unusual circumstances affecting CIA personnel.

As you are aware, the CIA has come under a great deal of public and congressional scrutiny in the past decade and certainly in the past week. Unfortunately, what you are not seeing or hearing are the thousands of actions they are doing right on a daily basis. In particular, we are consistently demanding that our intelligence officers abroad provide more and more information on hostile intentions, especially those of terrorists.

This involves risk. More and more of our CIA field personnel are being subjected to threats and abuse. Two years ago we witnessed an example of this when a number of them were killed by a terrorist bombing of the U.S. Embassy in Beirut. And as their assignment become more hazardous and demanding, the special mental and physical requirements necessary of the intelligence officer increase dramatically.

To meet this standard the CIA must continually replace its officers overseas with younger personnel whose identities are not known and who can stand up to the stresses of their environment. To do this the CIA currently allows these officers to retire at age 50. The Director of Central Intelligence can demand that they retire at age 55.

Yet making these demands on our CIA personnel forces them out at an age where job opportunities are limited. In addition, their skills are unique and we vigorously discourage them from revealing or marketing their expertise in new careers. That is why we must be careful not to send a false message—that their Government demands the risk, but is unwilling to pay the price. If we are not going to pay these people what they deserve up front, then we must provide for them at the end.

I am pleased to say, Mr. President, that there is nearly unanimous agreement on this point and that the pending amendment will continue the early retirement program for our overseas intelligence officers. But there are two modifications necessary if we are to truly insure the security, integrity, and effectiveness of the Central Intelligence Agency's retirement system.

First, this amendment provides for full self administration by the CIA of its retirement and disability programs. This is critical if the Agency is to maintain confidentiality for its employees who are serving or will serve—literally a life and death need in this time of international terrorism. Under current law, only overseas personnel records are strictly maintained inhouse by the Agency. In the Eagleton amendment, this is expanded to cover future nonoverseas employees. But a critical gap continues for the thousands of current nonoverseas personnel whose records are maintained by OPM and other nonsecure agencies around Washington.

Second, the amendment requires the Director of Central Intelligence to study the current CIA Retirement Program and determine what changes and expansions are appropriate. It has been 20 years since such a major review has been done and it is clear to this Senator that modifications are necessary.

In our discussions with the Government Affairs Committee and the CIA, we have concluded that it may be necessary to expand the current CIA Retirement and Disability Program to meet special needs. Is this also the understanding of the Senator from Missouri?

Mr. EAGLETON. Yes, it is.

Mr. DURENBERGER. We also believe that it is important that we conduct such a review of the CIA Retirement and Disability System and make appropriate changes within the next year. Does the Senator also believe this is correct?

Mr. EAGLETON. Yes, I do.

Mr. DURENBERGER. I thank the Senator.

Mr. President, I had also intended to propose that we prevent the deterioration of pension benefits for future overseas and cover personnel. Currently, the average CIA officer will retire with a pension that will replace 47 percent of this preretirement salary.

Under the pending legislation, this same employee will retire with only a 41-percent-replacement rate. But by slightly adjusting the pension accrual rate from 1 percent to 1.3 percent, this slip in benefits could be avoided. That is what I think should be done but in the interest of seeing this legislation enacted quickly, I will not make that proposal today. But I do expect the DCI to review this in the context of his study.

Our intelligence officers face hazards unknown to other overseas or law enforcement personnel. They and their families must lead their lives undercover, never telling friends and acquaintances of their true mission and responsibilities. In a world filled with terrorism, their very safety and lives are at stake if their cover is revealed. Most of these officers also work two jobs—their cover employment and their agency duties. And, finally, the nature of this work is very exacting, dangerous, and difficult. In short, it is unlike any other work in government.

Mr. President, there is a great need for a strong and effective human intelligence service in today's international environment. My service on the Select Committee on Intelligence has made me well aware of how much we depend on the fine men and women of our intelligence community. Their responsibilities are unique and their contribution is unparalleled. It is my determination that they, in turn, will be able to depend on us. I urge that the Senate support me in this effort and adopt this amendment.

Mr. HOLLINGS. Mr. President, I rise in support of the amendment of the chairman of the Intelligence Committee.

The men and women who serve in the Central Intelligence Agency are some of the finest we have in public service. They are first class in terms of experience, expertise, and special skills. Their responsibilities are difficult, unique, and often life-threatening. And, their successes are never publicly acknowledged. They are truly the front line of a "silent war" against terrorism, subversion, and attacks upon the United States and its allies.

The amendment before the Senate does two important things: it allows the CIA to administer its retirement system in order to provide adequate security of the names, addresses, and occupations of its employees; and it instructs the Director of Central Intelligence to review the existing CIA Retirement and Disability System and recommend any necessary expansions and modifications.

Mr. President, our overseas intelligence officers face hazards unknown to the Foreign Service or law enforcement personnel. They and their families must lead their lives undercover, never revealing their true mission to friends or acquaintances. If their cover is ever revealed their very safety and lives are at risk. At this moment there is a memorial at Langley for over 70 intelligence officers who have given their lives in service to this country.

More names will be added as a result of the Embassy bombing in Beirut and other recent acts of terrorism. And, finally, most of these officers work two jobs—their cover employment and their agency duties.

In short, the work of an intelligence officer is very exacting, difficult, and dangerous. It is unlike any other work in government. Yet the Government cannot offer top salaries to this talented and highly skilled group of professionals. Instead, we have to largely rely on their sense of duty, loyalty, and idealism.

But we can do one think—we can prevent their pension from deteriorating in the future, as the pending legislation allows. That is what Senator DURENBERGER and I intended to do today. But we see which way the current is running here and in the interest of comity will revisit that issue in the future. But our message is clear—we intend to work on this issue next year. We intend to do our best to assure this cadre of professionals that we understand and appreciate their contribution.

Mr. President, this amendment rests on the merits and should be passed. It does not violate the spirit of this legislation and it does not violate the spirit of reform. I have been involved in civil service pension reform for years and will match my record against any in this Chamber. I led the fight to eliminate the "1 percent kicker" in 1976. I led the fight to end the "look back" provision in 1980. I led the fight to end the "dual COLA's" in 1981. I know what good reform is and I also know the political price we often have to pay back home to get it enacted.

But let me tell you that the bandwagon for reform in this legislation should not run over good solid public policy. Our intelligence officers deserve support now and in the future. I urge my colleagues to enact this amendment.

Mr. DURENBERGER. I believe that this amendment has been cleared with both the Senator from Missouri, the proponent of the amendment it seeks to amend, and our leader from Alaska.

The PRESIDING OFFICER. Do the Senators yield back their time,

Mr. STEVENS. Mr. President, I have no objection to the amendment to the amendment or to the basic amendment and urge their adoption. I yield back the remainder of our time.

The PRESIDING OFFICER. All time being yielded back, the question is on the amendment of the Senator from Minnesota.

The amendment (No. 979) was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Missouri, as amended.

The amendment (No. 978) was agreed to.

Mr. DURENBERGER. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT NO. 980

(Purpose: To amend the Foreign Service Act of 1980 to reform the Foreign Service Retirement and Disability System)

Mr. STEVENS. Mr. President, I send to the desk an amendment on behalf of the distinguished Senator from Indiana [Mr. LUGAR] and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The assistant legislative clerk read as follows:

The Senator from Alaska [Mr. STEVENS], for Mr. LUGAR, proposes an amendment numbered 980.

Mr. STEVENS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Immediately following title III, insert the following:

TITLE IV—FOREIGN SERVICE RETIREMENT

REDESIGNATION OF CERTAIN PROVISIONS OF THE FOREIGN SERVICE ACT OF 1980

SEC. 401. (a) Chapter 8 of title I of the Foreign Service Act of 1980 (94 Stat. 2102; 22 U.S.C. 4041 et seq.) is amended—

(1) by striking out the caption of such chapter and inserting in lieu thereof the following:

"CHAPTER 8—FOREIGN SERVICE RETIREMENT AND DISABILITY

"SUBCHAPTER I—FOREIGN SERVICE RETIREMENT AND DISABILITY SYSTEM"

(2) by striking out "this chapter" each place it appears and inserting in lieu thereof "this subchapter"; and

(3) by inserting "under this subchapter" after "payable from the Fund" each place it appears.

(b)(1) Section 808(d) of such Act (94 Stat. 2110; 22 U.S.C. 4048(d)) is amended—

(A) by striking out "such subchapter" each place it appears in the second and third sentences and inserting in lieu thereof "subchapter I of such chapter 81"; and

(B) by striking out "Act" each place it appears and inserting in lieu thereof "subchapter".

(2) Section 808(e) of such Act (94 Stat. 2111; 22 U.S.C. 4048(e)) is amended by striking out "Act' each place it appears and inserting in lieu thereof "subchapter".

(c) Section 809(a) (94 Stat. 2111; 22 U.S.C. 4049(a)) is amended by striking out "Act" and inserting in lieu thereof "subchapter".

CONTRIBUTIONS TO THE FOREIGN SERVICE RETIREMENT AND DISABILITY SYSTEM

SEC. 402. Section 805 of the Foreign Service Act of 1980 (94 Stat. 2104; 22 U.S.C. 4045) is amended—

(1) by inserting "Except as provided in subsection (g)," before "7 percent" in the first sentence of subsection (a); and

(2) by adding at the end thereof the following new subsection (g):

"(g)(1) In the case of an employee or member of the Service who was a participant subject to this subchapter before January 1, 1984, and whose service—

"(A) is employment for the purposes of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, and

"(B) is not creditable service for any purpose under subchapter II of this chapter or chapter 84 of title 5, United States Code,

there shall be deducted and withheld from the basic pay of the employee or member of the Service under this subsection during any pay period only the amount computed pursuant to paragraph (2).

"(2) The amount deducted and withheld from the basic pay of an employee or member of the Service during any pay period pursuant to paragraph (1) shall be the excess of—

"(A) the amount determined by multiplying the percent applicable to the employee or member of the Service under subsection (a) by the basic pay payable to the employee or member of the Service for such pay period, over

"(B) the amount of the taxes deducted and withheld from such basic pay under section 3101(a) of the Internal Revenue Code of 1954 for such pay period.".

OFFSET OF ANNUITY BY THE AMOUNT OF SOCIAL SECURITY BENEFITS

SEC. 403. Section 806 of the Foreign Service Act of 1980 (94 Stat. 2106; 22 U.S.C. 4046) is amended by adding at the end thereof the following new subsection:

"(m)(1) Effective on the first day of the month in which an annuitant, including a survivor, becomes 62 years of age, the annuity computed under the other subsections of this section and payable to the annuitant shall be reduced (but not below zero) by the amount determined by multiplying the amount of the old-age and survivors insurance benefits which the annuitant is entitled to receive under section 202 of the Social Security Act for such month, if any, by a fraction—

"(A) the numerator of which is the total of the wages (within the meaning of section 209 of the Social Security Act) for service which is referred to in paragraph (2) of this subsection for years before the calendar year in which such month occurs, and

"(B) the denominator of which is the total of all wages (within the meaning of section 209 of the Social Security Act) and all self-employment income (within the meaning of section 211(b) of the Social Security Act)—

"(i) of such annuitant, or

"(ii) in the case of a survivor, of the participant on whose service the annuity is based, credited for years after 1936 and before the calendar year in which such month occurs.

"(2) The service referred to in paragraph (1)(A) of this subsection is service which is covered by amounts deducted and withheld as provided in section 805(g), is service described in subparagraphs (C) through (G) of section 210(a)(5) of the Social Security Act, and is taken into account for the purpose of computing the annuity to which paragraph (1) of this subsection applies.".

TREATMENT OF CERTAIN RECALL SERVICE

SEC. 404. Section 823 of the Foreign Service Act of 1980 (94 Stat. 2122; 22 U.S.C. 4063) is amended by adding at the end thereof the following new subsection:

"(c) If an annuitant becomes subject to subchapter II of this chapter by reason of recall service—

"(1) subsections (a) and (b) shall not apply to such annuitant; and

"(2) section 824 shall apply to the recall service as if such service were reemployment.".

REEMPLOYMENT

SEC. 405. Section 824 of the Foreign Service Act of 1980 (94 Stat. 2122; 22 U.S.C. 4064) is amended to read as follows:

"SEC. 824. REEMPLOYMENT.—(a)(1)(A) Except in the case of an annuitant who makes an election under subsection (b), if any member of the Service who has retired and is receiving an annuity under this subchapter or subchapter II of this chapter becomes employed in an appointive or elective position in the Government, payment of any annuity under either subchapter to the annuitant terminates effective on the date of the employment.

"(B) If an annuity of an annuitant is terminated under subparagraph (A) by reason of reemployment and—

"(i) the annuitant was not entitled to an annuity under subchapter II of this chapter before the reemployment began, or

"(ii) the reemployment service is subject to the Federal Retirement System under chapter 84 of title 5, United States Code.

the terminated annuity shall resume and the annuitant shall be entitled to an additional annuity under subchapter II of this chapter effective on the date of termination of the reemployment. The additional annuity shall be computed under sections 8413, 8414, and 8415 of title 5, United States Code (as made applicable by subchapter II of this chapter), based on the service during the period of reemployment and the basic salary paid the annuitant for such service.

"(2) A reemployed annuitant who, before reemployment, was entitled to an annuity under subchapter II of this chapter and has been reappointed in a status covered by the System under such subchapter shall be entitled to a redetermination of rights under such subchapter upon termination of the employment. If such annuitant, before reemployment, was also entitled to an annuity under subchapter I of this chapter, that annuity shall be resumed upon termination of the employment.

"(b)(1) A member of the Service who is entitled to an annuity under this subchapter or subchapter II of this chapter and becomes employed in an appointive or elective position in the Government on a part-time or temporary basis may elect to continue to receive either or both annuities as provided in this subsection.

"(2) The total annuity payable under this chapter to an annuitant making an election under paragraph (1) shall be reduced during the part-time or temporary employment referred to in such paragraph as necessary to meet the requirements of paragraph (3).

"(3) The sum of—

"(A) the total annuity payable under this chapter to an annuitant making an election under paragraph (1), and

"(B) the annual rate of pay payable to the annuitant during the part-time or temporary employment referred to in such paragraph,

may not exceed, in any year, the highest annual rate of pay which is payable during such year for full-time employment in the position in which the annuitant is employed.

"(4) Upon termination of the part-time of temporary employment referred to in paragraph (1), payment of the full annuity of an annuitant who has made an election under paragraph (1) of this subsection shall resume.

"(c) The amount of an annuity which has been terminated or reduced under this section by reason of the reemployment of the annuitant and is resumed under this section shall be the amount of the annuity which would have been payable if the annuitant had not accepted the reemployment. The amount of an annuity resulting from a redetermination of rights pursuant to subsection (a) shall not be less than the amount of the terminated annuity plus any increases under section 826 or section 8462 of title 5, United States Code, as appropriate, occurring after the termination of the annuity and before the commencement of the redetermined annuity.

"(d) If an annuitant to whom this section applies dies while reemployed, a survivor annuity payable with respect to the deceased annuitant shall be redetermined as if the employment had terminated on the date of death.

"(e) The annuity rights of any member of the Service who is reemployed in the Federal Government shall be determined under this section instead of section 8468 or 8474 of title 5, United States Code.

"(f) When any such retired member of the Service is reemployed, the employer shall send a notice of such reemployment to the Secretary of State, together with all pertinent information relating to such employment, and shall pay directly to such member the salary of the position in which he or she is serving.

"(g) In the event of any overpayment under this section, such overpayment shall be recovered by withholding the amount involved from the salary payable to such reemployed member of the Service or from any other moneys, including annuity payments, payable under this chapter.".

COMPATIBILITY BETWEEN THE FEDERAL RETIREMENT SYSTEM AND THE FOREIGN SERVICE PENSION SYSTEM

SEC. 406. Section 827 of the Foreign Service Act of 1980 (94 Stat. 2124; 22 U.S.C. 4067) is amended by adding at the end thereof the following new subsection:

"(c) The President shall maintain, under the same conditions and in the same manner as provided in subsections (a) and (b), existing conformity between the Federal Retirement System provided in chapter 84 of title 5, United States Code, and the Foreign Service Pension System provided in subchapter II of this chapter.".

FOREIGN SERVICE PENSION SYSTEM

SEC. 407. (a) Chapter 8 of title I of the Foreign Service Act of 1980 (94 Stat. 2102; 22 U.S.C. 4041 et seq.) is amended by adding at the end thereof the following:

"SUBCHAPTER II—FOREIGN SERVICE PENSION SYSTEM

"SEC. 851. ESTABLISHMENT.—(a) There is hereby established a Foreign Service Pension System.

"(b)(1) Except as otherwise specifically provided in this subchapter or any other provision of law, all participants in the Foreign Service Pension System shall be subject to the provisions of chapter 84 of title 5, United States Code, and shall be treated in all respects as persons whose participation in the Federal Retirement System provided in that chapter is required by section 8402 of such title.

"(2) Participants in the Foreign Service Pension System may not make an election authorized by section 8418(c) of title 5, United States Code, and shall not be entitled to any benefits under chapter 84 of such title which result from such an election.

"SEC. 852. DEFINITIONS.—As used in this subchapter, unless otherwise specified—

"(1) the term 'annuity' means the annuity which is described in subchapter II of chapter 84 of title 5, United States Code, and is payable to a participant;

"(2) the term 'dynamic assumptions' has the same meaning as provided in section 8401(9) of title 5, United States Code;

"(3) the term 'Fund' means the Retirement and Disability Fund maintained by the Secretary of the Treasury pursuant to section 802;

"(4) the term 'normal cost' means the entry-age normal cost of the provisions of the System which relate to the Fund, computed by the Secretary of State in accordance with generally accepted actuarial practice and standards (using dynamic assumptions) and expressed as a level percentage of aggregate basic pay, and shall be used to value the cost of the System for all purposes for which the cost of the System is required to be determined;

"(5) the term 'participant' means a person who participates in the Foreign Service Pension System;

"(6) the term 'supplemental liability' means the estimated excess of—

"(A) the actuarial present value of all future benefits payable from the Fund under this subchapter, over

"(B) the sum of—

"(i) the actuarial present value of the future contributions to be made on behalf of participants pursuant to section 855(b)(2)(A) of this Act; and

"(ii) the balance in the Fund attributable to the System on the date the supplemental liability is determined or to the contributions made under Section 204(b) or 205 of the Federal Employees' Retirement Contribution Temporary Adjustment Act of 1983 (97 Stat. 1106; § U.S.C. 8331 note); and

"(7) the term 'System' means the Foreign Service Pension System.

"SEC. 853. PARTICIPANTS.—(a) Except for persons excluded by subsection (b), all members of the Foreign Service, any of whose service after December 31, 1983, is employment for the purpose of title II of the Social Security Act and chapter 21 of the Internal Revenue Code of 1954, who would, but for this section, be participants in the Foreign Service Retirement and Disability System pursuant to section 803 shall be participants in the Foreign Service Pension System.

"(b) Members of the Service who were participants in the Foreign Service Retirement and Disability System on or before December 31, 1983, and who have not had a break in service in excess of 1 year since that date, are not made participants in the System by this section, without regard to whether they are subject to title II of the Social Security Act.

"SEC. 854. ENTITLEMENT TO ANNUITY.—(a) Any participant who retires voluntarily or mandatorily under section 607, 608, 811, or 813 under conditions authorizing an immediate annuity for participants in the Foreign Service Retirement and Disability System shall be entitled to an immediate annuity computed under subsections (a)(2), (a)(3), and (c) of section 8413 of title 5, United States Code. The annuity shall not be subject to reduction under section 8414 of such title.

"(b) A participant who is entitled to an immediate annuity under subsection (a) shall be entitled to receive an annuity supplement while the annuitant is under 62 years of age. The annuity supplement shall be based on the total creditable service of the annuitant and shall be computed and increased in accordance with section 8413(b) of title 5, United States Code.

"(c)(1) Any participant may be retired under the conditions specified in section 811 and shall be retired under the conditions specified in sections 812 and 813 and receive benefits under this subchapter.

"(2) For the purposes of this subsection—

"(A) the term 'participant', as used in the sections referred to in paragraph (1), means a participant in the Foreign Service Pension System; and

"(B) the term 'System', as used in those sections, means the Foreign Service Pension System.

"(d) Any participant who is separated for cause under section 610 shall be entitled to a deferred annuity under section 8412 of title 5, United States Code, under the conditions specified in such section unless the Secretary determines that the separation was based in whole or in part on disloyalty to the United States.

"SEC. 855. FUNDING.—(a) All payments under this subchapter which are comparable to payments under subchapters II, IV, and VII of chapter 84 of title 5, United States Code, based on the service of participants or former participants shall be paid by the Secretary of State from the Fund.

"(b)(1) All sums required to finance the payments referred to in subsection (a) shall be credited to the Fund.

"(2) The sums referred to in paragraph (1) are—

"(A) amounts which (i) are determined by the Secretary of State to be necessary to defray the normal cost of the benefits, other than disability benefits, payable under this subchapter to participants who are members of the Foreign Service, and (ii) are paid by each agency which employs any such participants;

"(B) the sums which are transferred to the Fund by the Secretary of the Treasury to amortize over 30 years the supplement liability of the System which is attributable to such participants, as computed at the end of each fiscal year beginning after September 30, 1987; and
